Mr. BATE obtained the floor.

Mr. COCKRELL. As it is quite late I hope the Senate will relieve the Senator from Tennessee from the necessity of proceeding this evening, and let him retain the floor for to-morrow. If he will yield to me I will move that the Senate proceed to the consideration of executive business.

Mr. JONES, of Arkansas. I ask the Senator from Tennessee to yield to me, that I may ask the Senate to proceed to the consideration of the bill (H. R. 8674) for the relief of Sterling H. Tucker and others, a bill which was reported by the Committee on the Judiciary, has come from the House of Representatives, and is one of peculiar merit.

Mr. VEST. I wish to make some reports from the Committee on Commerce.

The PRESIDENT *pro tempore*. While Senators are adjusting the differences between themselves, the Chair will lay before the Senate a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills:

A bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President and to provide for and regulate the counting of the votes for President and Vice-President and the decision of questions arising thereon; and

A bill (S. 1494) to secure to the Cherokee freedmen and others their proportion of certain proceeds of lands under the act of March 3, 1883.

REPORTS OF COMMITTEES.

Mr. VEST, from the Committee on Commerce, to whom was referred the bill (H. R. 11107) to amend an act entitled "An act to authorize the Fort Smith and Choctaw Bridge Company to construct a bridge across the Poteau River, in the Choctaw Nation, near Fort Smith, Ark.," reported it without amendment.

He also, from the same committee, to whom was referred the bill (H. R. 11338) to authorize the construction of a bridge across the Coosa River at Gadsden, in the State of Alabama, reported it with amendments.

He also, from the same committee, to whom was referred the bill (S. 3528) to authorize the construction of a bridge across the Coosa River at Gadsden, Ala., reported adversely thereon, and the bill was postponed indefinitely.

MISSISSIPPI RIVER BRIDGE AT LA CROSSE.

The PRESIDENT *pro tempore* laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11139) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis.

Mr. SPOONER. I move that the Senate insist upon its amendments and request a conference with the House of Representatives on the disagreeing votes of the two Houses.

The motion was agreed to.

By unanimous consent, the President *pro tempore* was authorized to appoint the conferees on the part of the Senate, and Mr. SAWYER, Mr. DOLPH, and Mr. VEST were appointed.

AMERICAN GROCER ASSOCIATION.

The PRESIDENT *pro tempore* laid before the Senate the bill (S. 577) for the relief of the American Grocer Association of the city of New York, returned from the House of Representatives at the request of the Senate.

Mr. SAWYER. I move that the bill be indefinitely postponed. A bill precisely like it has been passed by both branches.

The PRESIDENT *pro tempore*. The bill will be indefinitely postponed, if there be no objection.

ELECTORAL MESSENGERS.

The PRESIDENT *pro tempore*. If there be no objection, the bill (S. 3609) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President, and to provide for and regulate the counting of the votes for President and Vice-President, and the decision of questions arising thereon," being identical with the bill passed this morning on the motion of the Senator from Massachusetts [Mr. HOAR], will be indefinitely postponed.

HOUSE BILL REFERRED.

The bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act, was read twice by its title, and referred to the Committee on Appropriations.

VIOLATIONS OF CIVIL-SERVICE LAW.

The PRESIDENT *pro tempore*. The resolution requesting the Attorney-General to inform the Senate whether he has any information concerning violations of the civil-service law, offered by the Senator from New Hampshire [Mr. CHANDLER], who is now absent, will be placed on the Calendar, to be called up when he may return.

SURETIES OF JAMES W. DEMBY.

Mr. JONES, of Arkansas. The Senator from Tennessee [Mr. BATE] yields to me that I may move that the Senate proceed to the consideration of the bill (H. R. 8674) for the relief of Sterling H. Tucker and others.

Mr. EDMUNDS. I very much wish, as I am compelled to go away to-morrow, that the Senate would consider the bill in respect to making a grant of some money to Mrs. Waite, to which the colleague of my friend from Arkansas objected when it was read to-day. May I ask the Senator from Arkansas if he knows whether his colleague [Mr. BERRY] is disposed to withdraw his objection? I have tried to find him, but without success.

Mr. JONES, of Arkansas. I am not authorized to speak on that subject; but I do not think that my colleague would interpose any further objection to the consideration of the bill.

Mr. EDMUNDS. If my friend is not authorized to speak for his colleague, it would not be right for me to ask nor for the Senate to take up the bill in his absence to-day. I shall not object to the consideration of the bill moved by the Senator from Arkansas, subject to objection; but after that is disposed of I think I must move that the Senate adjourn.

The PRESIDENT *pro tempore*. The bill will be read at length for information, subject to objection.

The Secretary read the bill, as follows:

Be it enacted, etc., That Sterling H. Tucker, William P. Grace, Elhanon J. Searle, Josiah H. Demby, Samuel H. Bard, and William G. Pennington, or their estates be, and they and each of them are hereby, released from any and all liability as the sureties upon the official bond of James W. Demby, formerly pension agent, the said release to take effect upon the payment of the legal costs heretofore accrued in the prosecution of said claim by the United States: *Provided*, That all the rights and remedies of the Government on said bond as against said James W. Demby shall in no manner be affected hereby, but remain in full force and effect in law.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. EDMUNDS. I merely wish to say that I did not concur in the report of the committee. I do not think the bill ought to pass; but as a majority of the committee were of opinion that it ought, I shall not interpose any opposition except to state what I have stated.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ELIZA A. CUTLER JONES.

Mr. DAWES. I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 2331.

Mr. EDMUNDS. I promised that I would move an adjournment.

Mr. DAWES. This will take but a moment.

The bill (H. R. 6619) for the relief of Eliza A. Cutler Jones was reported by its title.

Mr. EDMUNDS. I shall let that go subject to objection.

The PRESIDENT *pro tempore*. The bill will be read at length subject to objection.

The bill was read, and the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay to Mrs. Eliza A. Cutler Jones, of Scottsville, Monroe County, New York, $5,000, in five annual installments of $1,000 each, out of any money that may hereafter be appropriated for the use and benefit of the Cheyenne Indians.

Mr. EDMUNDS. Let us hear the report.

The PRESIDENT *pro tempore*. There is no report from the Senate committee.

Mr. DAWES. There is a House report which gives the facts.

Mr. EDMUNDS. Waiving the breach of privilege, let us hear the House report.

The PRESIDENT *pro tempore*. The report made in the House of Representatives will be read.

Mr. EDMUNDS. My friend from Massachusetts, the chairman of the Committee on Indian Affairs, says that he can state the case more briefly than the reading of the report made in a body with which we have nothing to do.

Mr. DAWES. Some years ago the Cheyenne Indians made a raid upon three men employed by the Government in their service in gathering stock and murdered the three men. At different times heretofore Congress has inserted in an appropriation bill in two different items an appropriation of $5,000 each, one to the widow and the other to the mother of two of these murdered men, to be paid in installments of $1,000 each annually and taken out of the appropriation made to the Cheyenne Indians. This bill is to give to the aged and poor mother of the last of these three murdered men $5,000, as has been given in the case of the other two, to be taken out of the appropriation made for the Cheyenne Indians, so that they may be punished a little each year to remind them of the crime committed.

This bill has passed the other House, and is precisely like two others that have become laws heretofore.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WIDOW OF CHIEF-JUSTICE WAITE.

Mr. EDMUNDS. Mr. President, I wish now, as I see my friend from Arkansas [Mr. BERRY] is in the Chamber, who objected to the present consideration of the bill respecting the widow of the late Chief-Justice, to appeal to him to withdraw his objection to its consideration, as I am obliged to leave town to-morrow, and I have reported the bill, and it was the opinion of the Senate when the matter was considered, as is well known—I wish to appeal to him to withdraw his objection. Of course, if he does not, whether here or not, it can not be considered. I have no objection to my friend opposing the bill, but in respect of its consideration it will be a favor to me if he could feel it consistent with his duty to allow the bill to be now considered.

Mr. BERRY. I think the bill is thoroughly a bad one. To withdraw my objection is equivalent to consenting to its passage by the Senate, as I believe a majority of the Senate would vote to pass it. I do not think the bill ought to pass, and I believe it to be my duty to interpose whatever lawful and legal objections the rules authorize me to interpose, and therefore I can not give my consent to take the bill up this evening. The Senator can move to-morrow, I presume, to take it up, and if a majority of the Senate agree to take it up, then it will be before the Senate; but to consent now will be equivalent to a consent to its passage.

As I stated before, I do not know any character of legislation that has been brought before the Senate the principle of which I regard as more vicious than the one that is involved in this bill.

Mr. EDMUNDS. I do not wish to make any reply to the observations of the Senator from Arkansas. The case has been stated, and the precedents in the history of the Government. I only wish to give notice that to-morrow morning, as soon as it is in order, I will, if I am able to stay till to-morrow morning, and if not, somebody else of the committee will, move to take up the bill, and if a majority of the Senate are willing to take it up it will be taken up and considered. Having said that, I move that the Senate do now adjourn.

The motion was agreed to; and (at 4 o'clock and 8 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, October 10, 1888, at 12 o'clock m.

HOUSE OF REPRESENTATIVES.

TUESDAY, *October* 9, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of the proceedings of yesterday was read and approved.

PRIVATE LAND CLAIM IN NEW MEXICO.

The SPEAKER laid before the House a letter from the Secretary of the Interior, transmitting a report of the surveyor-general for New Mexico on the private land claim known as the Nicolas Duran de Chaves grant No. 155; which was referred to the Committee on Private Land Claims.

SENATE BILLS REFERRED.

The SPEAKER also laid before the House Senate bills of the following titles; which were read twice, and referred as indicated:

The bill (S. 3501) relating to the classification of post-offices and amend-

atory of the act approved March 3, 1883, entitled "An act to adjust the salaries of postmasters"—to the Committee on the Post-Office and Post Roads.

The bill (S. 3340) for the disposition of Fort Brooke military reservation at Tampa, Fla., and for other purposes—to the Committee on the Public Lands.

AMERICAN GROCER ASSOCIATION, NEW YORK CITY.

The SPEAKER. The Chair also lays before the House a duplicate (sent to the House by request) of the bill (S. 577) for the relief of the American Grocer Association of the city of New York. The Senate has heretofore requested the return of this bill to that body.. If there be no objection, the Clerk will be directed to return it. The Chair hears no objection, and it is so ordered.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had passed without amendment the bill (H. R. 10666) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

The message further announced that the Senate had passed the bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the date for the meeting of the electors of President and Vice-President and to provide for and regulate the counting of the votes for President and Vice-President and the decision of questions arising thereon;" in which the concurrence of the House was requested.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. ROBERTSON, indefinitely, on account of important business.

To Mr. CATCHINGS, indefinitely, on account of important business.

To Mr. DAVIDSON, of Florida, indefinitely, on account of urgent business.

To Mr. YODER, indefinitely.

To Mr. HENDERSON, of North Carolina, indefinitely, from Thursday next.

CHANGE OF REFRENCE.

The SPEAKER. The bill (H. R. 8634) providing for the sale of the Fort Sedgwick military reservation in the State of Colorado and Territory of Wyoming to actual settlers, and Senate bill No. 1765 of the same title and on the same subject, have been referred to the Committee on Military Affairs. The gentleman from Colorado [Mr. SYMES] asks that the Committee on Military Affairs be discharged from further consideration of these bills, and that the same be referred to the Committee on Public Lands. In the absence of objection that order will be made.

There was no objection, and it was so ordered.

MONUMENT TO GENERAL KNOX.

Mr. DINGLEY. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill S. 449, and assign the 4th day of December next for its consideration.

The SPEAKER. The Clerk will report the title of the bill, after which the Chair will ask for objection.

The Clerk read as follows:

A bill (S. 449) for the erection of a monument to the memory of Maj. Gen. Henry Knox, at Thomaston, Me.

The SPEAKER. In the absence of objection, the order requested by the gentleman from Maine will be made.

There was no objection, and it was so ordered.

Mr. DINGLEY. I desire one moment further, Mr. Speaker. As possibly on that day there may be other business occupying the attention of the House, I ask unanimous consent that if by reason of public business this bill be not considered on that day, that it be made a continuing order until it is considered.

Mr. BACON. To that request I object.

Mr. DINGLEY. But, if my friend from New York will permit me to suggest, there may be some matter of public importance to be considered on that day, and I should dislike very much to undertake to antagonize it with this special order. I hope my friend will not object, because it is a very reasonable request, simply that there may be some time for the consideration of this bill, not to interfere with public measures. I do not want it to stand in the way.

The SPEAKER. The Chair understands the gentleman from New York to insist upon his objection.

Mr. BACON. I do.

Mr. MILLIKEN. This is a monument to one of the most distinguished soldiers of the Revolutionary war, and I am sure if the gentleman from New York will remember that fact he will not insist on objecting.

Mr. BACON. I thank the gentleman from Maine for the information. I have some knowledge of the history of this country in its earlier days; still I am glad to have my memory refreshed. I did not object, however, on historical grounds.

Mr. MILLIKEN. I did not intend to undertake to instruct the gentleman, but only to recall what this bill was.

PUBLIC BUILDING, FORT WORTH, TEX.

Mr. ABBOTT. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (S. 1974) for the erection of a public building at Fort Worth, Tex.

The SPEAKER. The bill will be read, subject to objection.

The Clerk proceeded to read the bill.

Mr. EZRA B. TAYLOR. Mr. Speaker, it is useless to consume the time in reading the bill. I shall object to its consideration.

CHINESE EXCLUSION.

The SPEAKER. The Chair has just received a communication from the Acting Secretary of the Treasury which seems to be urgent in its character, asking that an appropriation for the purpose of carrying into effect the provisions of the recent Chinese exclusion act, approved October 1, 1888, be made. The Chair will lay this communication before the House at once and order its reference to the Committee on Appropriations.

Mr. SOWDEN. Regular order.

Mr. DINGLEY. What is the proposition the Chair has just submitted to the House?

The SPEAKER. It is a letter from the Acting Secretary of the Treasury recommending that an appropriation be made to carry into effect the provisions of the Chinese-exclusion act lately passed.

ORDER OF BUSINESS.

Mr. SOWDEN. I demand the regular order.

The SPEAKER. The regular order is the call of committees for reports.

Mr. WHITTHORNE. Will my friend from Pennsylvania yield to me to enable me to ask unanimous consent to fix a day for the consideration of a very important bill during the next session?

The SPEAKER. The regular order being demanded, the Chair will call the committees for reports.

Mr. HOOKER. I ask unanimous consent to dispense with the formal call of committees, with leave to gentlemen to file their reports with the Clerk.

The SPEAKER. In the absence of objection, that order will be made.

There was no objection, and it was so ordered.

FILING OF REPORT.

The following report was filed by being handed in at the Clerk's desk:

MARY P. MYERS.

Mr. BLISS, from the Committee on Pensions, reported back favorably the bill (S. 3540) granting a pension to Mary P. Myers; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

The SPEAKER. The regular order is the hour for the consideration of bills reported from committees, which begins at 12 o'clock and 27 minutes. The call rests with the Committee on Public Lands, which has a bill under consideration coming over from yesterday.

Mr. MCRAE. Before proceeding with the execution of that order, I would ask leave to consider Senate bill 3475.

The SPEAKER. But the regular order has been demanded by the gentleman from Pennsylvania.

Mr. MCRAE. I think if the gentleman from Pennsylvania understands the nature of the bill he will withdraw his demand. It pertains to Washington Territory, and the bill has passed the Senate. The Delegate from the Territory is now absent; but the people of that locality feel a deep interest in this bill. It involves no expenditure.

Mr. JACKSON. I would like to ask what was done with the bill which was pending when the hour expired yesterday?

The SPEAKER. That is in the Committee of the Whole. The gentleman from Arkansas asks, before proceeding with the regular order, to consider this Senate bill.

Mr. MCRAE. Does the gentleman from Pennsylvania insist on his demand?

The SPEAKER. It has not been withdrawn.

Mr. SOWDEN. If I withdrew it in this instance, others would have a perfect right to claim the same courtesy, to which they would be entitled.

Mr. MCRAE. I am not asking it as a personal favor. This is a matter for Washington Territory, the Delegate being absent.

Mr. SOWDEN. But if I withdraw the call I am bound in the interest of consistency to allow other gentlemen the same courtesy.

Mr. MCRAE. I move that the House resolve itself into Committee of the Whole for the consideration of the bill which was under consideration yesterday.

The motion was agreed to.

Mr. MCRAE. Before the House go into Committee of the Whole I move to limit general debate to twenty minutes.

The SPEAKER. But the House has determined to go into Committee of the Whole on the state of the Union. The gentleman from Ar-

kansas [Mr. McRAE] asks unanimous consent that general debate be limited to twenty minutes. Is there objection?

Mr. JACKSON. I object.

The House accordingly resolved itself into Committee of the Whole, Mr. RICHARDSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole, and the Clerk will read the title of the pending bill.

The Clerk read as follows:

A bill (S. 758) to relieve purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, and for other purposes.

The CHAIRMAN. If no member desires to address the committee the Chair will submit the question on the adoption of the amendments.

Mr. McRAE. There appears to be some objection to this bill, and believing that it should be considered in full House with a quorum, I will make a proposition that I hope will be agreed to by the committee. It is this: That the bill be reported back to the House with the recommendation that it be set for consideration on the 15th of next December.

Mr. JACKSON. Reported how—what kind of a report?

Mr. McRAE. With the request that consideration be postponed until the 15th day of next December.

Mr. JACKSON. I move to amend by striking out the day named in the motion, so that no day will be fixed for the consideration of this bill.

Mr. FARQUHAR. I would suggest in connection with a motion of that kind that there are over two hundred general bills on our Calendar that have as much merit as this bill has, and I think it is very unfair to the short session that we should set metes and bounds for the consideration of bills. I shall object to designating any time for the consideration of any bill that is on the Calendar; I will make a standing objection to setting days for the consideration of bills.

Mr. McRAE. This is a very important public bill and not on the Private Calendar.

Mr. FARQUHAR. But it is on the General Calendar with general measures which are on that Calendar, I have one or two measures on there myself which are of ten times more importance than that bill, and I feel like treating all alike. Therefore, from this time henceforth I will make a standing objection to fixing of days for the consideration of bills.

Mr. SOWDEN. I would like to ask the gentleman from Arkansas [Mr. McRAE] how much is involved in this bill?

Mr. McRAE. There is no amount of money appropriated by it specially. The bill authorizes——

Mr. SOWDEN. How much is involved in it generally, if not specially? Does it involve a large sum of money?

Mr. McRAE. It does not involve any new liability, but authorizes a settlement of some that have existed for many years. It does not involve the appropriation of an additional dollar except for such lands as have been erroneously sold by the United States after granting them to the States, and then only what was paid for the land, giving money indemnity at $1.25 per acre for the dry-land indemnity now allowed by law.

A number of States have claims growing out of these old grants pending against the Government, and the Government has claims pending against these same States. This bill makes it possible for a settlement upon a money basis, without changing or enlarging in any way the original grant. It is to the interest of the States, the United States, and the settlers as well.

Mr. SOWDEN. It does not involve a large sum of money?

Mr. McRAE. It does not increase the liability of the Government unless the land allowed as indemnity is not worth $1.25 per acre. It is in fact in many instances worth more. And the same thing can be said of the lands in place where the States take the land from the purchasers of the Government. In such cases the Government refunds to the purchaser what he paid and the States take the land. The United States make nothing. The States get land and the settler is turned out of his home. This bill authorizes a settlement of such cases by refunding the money to the States, thus perfecting the title of the purchaser. It does not interfere with the original adjustment in the slightest except as I have stated.

Mr. JACKSON. I differ entirely in my judgment from the statement made by the gentleman from Arkansas [Mr. McRAE]. I think this bill does involve a large amount of money.

Mr. McRAE. How much time does the gentleman wish to discuss the bill?

Mr. JACKSON. If you proceed with the consideration of this bill I will take the floor in my own right, so that I can have my own time in opposition. I consider this bill very objectionable, and intend to oppose it to the best of my ability.

Mr. McRAE. You can not take my time, and if you proceed now you must submit to a limit. I have the floor, but will divide with you.

The CHAIRMAN. The gentleman from Arkansas moves to postpone the consideration of the bill until the 15th of December, and the gentleman from Pennsylvania [Mr. JACKSON] moves that the bill be reported to the House and that its consideration be indefinitely postponed. The Chair thinks the motion made by the gentleman from Arkansas has precedence over the motion made by the gentleman from Pennsylvania, and it is now in order.

Mr. McRAE. I made that as a proposition after I had been informed that a quorum would be demanded on the passage of the bill. I thought it would be agreed to by those who oppose the bill. As that does not meet with the approval of my friends who are opposed to the bill, I withdraw my motion or proposition.

The CHAIRMAN. The gentleman from Arkansas withdraws the motion, and the question will be on the motion of the gentleman from Pennsylvania [Mr. JACKSON] to indefinitely postpone the consideration of the bill.

Mr. JACKSON. I will not allow the gentleman from Arkansas [Mr. McRAE] to be more considerate than I am; so I will withdraw my motion.

The CHAIRMAN. The gentleman from Arkansas [Mr. McRAE] has the floor.

Mr. McRAE. Mr. Chairman, as it appears that we can not get rid of considering the bill at this time, I will now yield any reasonable time which any gentleman may desire to make a statement or to ask me any questions with reference to the bill. If the gentleman from Pennsylvania [Mr. JACKSON] wishes time for that purpose, I will yield to him cheerfully.

Mr. JACKSON. If the Chair will recognize me in opposition to the bill, I will take the floor in my own right, and then I shall have something to say about it. I do not want to occupy any part of the time of the gentleman from Arkansas [Mr. McRAE]. I want to be recognized in opposition to the bill.

The CHAIRMAN. Does the gentleman from Arkansas yield the floor?

Mr. McRAE. I do not; but I will yield the gentleman from Pennsylvania any time he wishes, reserving the same to myself to reply to him.

Mr. JACKSON. I prefer to take the floor in my own right, as I have already stated.

Mr. McRAE. Well, you can not take it at this time in your own right, and thus talk out the hour allowed for consideration.

Mr. JACKSON. I am not asking it until the time comes to oppose this bill.

Mr. McRAE. The gentleman from Colorado [Mr. SYMES] expressed a desire to have some time to be heard upon the bill, and I now yield him five minutes.

Mr. SYMES. In explanation of this bill, and in reply to statements made by gentlemen on the floor that it is a bill calling for some new appropriation, I desire to say that it is simply a bill to pay what the Government is under absolute obligation to pay. It is a bill to carry out and execute the provisions of United States statutes which have been executed in other cases, in pursuance of the land policy of this Government for a great many years, by paying to the different States 5 per cent. of the proceeds of the public domain sold within the States after their admission into the Union.

It is beyond contradiction, sir, that every new Western State and every new Southern State wherein there was public domain at the time of its admission into the Union was guarantied this payment, and the Government thereafter carried out the guaranty in the statutes and the enabling acts by paying to the States 5 per cent. of the proceeds of the sales of the public domain thereafter disposed of within the boundaries of such new State. It is strange, sir, to hear these objections made by gentlemen who live in the East, and some of them representing States which received this 5 per cent. fund years ago.

It is not just for gentlemen to object at this late day to doing justice to these new States simply because the Government has been slow and Congress has not performed its duty by carrying out in good faith the different acts to which I have referred with reference to the 5 per cent. due new Western States, as they were carried out in the past in regard to the older States when they were represented by the predecessors of these gentlemen who now make these objections. I have stated the sum and substance of this bill, and I have made these few remarks merely for the purpose of placing it before the House in its proper status, not as a new measure, not as a bill to appropriate money, but simply as a bill to carry out laws upon the statute-books of the United States, and to fulfill to some of the new States guaranties of Congress which have been already fulfilled with reference to the older States.

Mr. JACKSON. What statutory provision does the gentleman refer to?

Mr. SYMES. The provisions are contained in a general act as well as in different special acts.

Mr. JACKSON. Do you refer to the swamp-land indemnity fund?

Mr. SYMES. Yes; I refer to that and other acts.

Mr. McRAE. Mr. Chairman, as a part of my remarks upon this bill I desire to have the report of the committee printed in the RECORD, but I will not take time to have it read.

The report is as follows:

The Committee on the Public Lands, to whom was referred the bill (S. 758) for the relief of purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, and for other purposes, have had the same under

consideration, and report the same back, with the recommendation that it pass with the following amendment:

Strike out the following words in the first section: "except by grants to such States or to railroad corporations in such States by homestead entries."

Except section 6, which seeks to extend the provisions of the act of September 28, 1850, to the States admitted into the Union since the 17th day of March, 1860, this bill is substantially the same as H. R. 6897, reported from the said committee to the House on the 8th day of February, 1888, and the committee adopt so much of the Report 347 as is applicable to this bill, as follows:

That the full scope and effect of this bill may be understood, it will be necessary to thoroughly understand the several swamp-land grants and the action of the Interior Department with reference thereto; and to that end copies of the acts of Congress and the regulations of the Department are hereto appended. The act approved March 2, 1849 (9 Stat., 352), granted to the State of Louisiana the whole of the swamp and overflowed lands in said State found unfit for cultivation, with the exception of those tracts fronting on rivers, creeks, bayous, etc., surveyed into lots or tracts under the acts of March 31, 1811, and May 24, 1824.

The act of September 28, 1850 (9 Stat., 519), granted to each of the public land States then in the Union the whole of the swamp and overflowed lands remaining unsold within their limits, made unfit thereby for cultivation, and the Secretary of the Interior was required to make out accurate lists and plats of the lands described as aforesaid, and transmit the same to the governors of the States. For some reason the Secretary failed to make any such selections and segregation of such lands as the act clearly contemplated except as he saw fit to make partial and imperfect lists when called upon by the agents of the States from time to time. This failure or neglect has been the source of a great deal of controversy between the States and the Interior Department, and also of a great deal of vexatious and expensive litigation between those claiming under the grant and those adverse to it.

On the 21st day of November, 1850, the Commissioner of the General Land Office transmitted to the governors of all the States covered by the grant a circular of instructions as to the manner of proceeding under said act, with a request that the State elect which of the two proposed methods for designating swamp lands would be adopted.

The proposed methods were:

1. The field-notes of Government survey to be taken as the basis for selections, and all lands shown by them to be swamp or overflowed within the meaning of the act to be placed in the lists to be reported to the General Land Office.

2. The States to make the selections by their own agents and at their own cost, and report the same to the surveyor-general with proof of the character of the land.

The act approved March 12, 1860, extended the grant of September 28, 1850, to the States of Minnesota and Oregon. California, by the act approved July 23, 1866, was granted the same character of lands within her limits, but the method of selecting was much simplified and the adjustment has been much easier than in the other fourteen swamp-land States.

Michigan, Minnesota, and Wisconsin elected to make the field-notes the basis for determining the character of the land.

Alabama, Arkansas, Florida, Illinois, Indiana, Iowa, Mississippi, Missouri, Ohio, and Oregon elected to make their selections by agents in the field, and they have all made their selections; but very few, if any, have been able to get their claims finally adjusted by the Department.

California did not adopt either method, because under the grant to that State such action was not necessary.

In Louisiana nearly all of the selections are made under the act of March 2, 1849, by deputy surveyors, under the direction of the United States surveyor-general, at the expense of the State. Such lands as are claimed under the act of September 28, 1850, are selected by State agents, with proof of character of the land. Within the last few years the States of Alabama, Indiana, Louisiana, Mississippi, and Ohio, with the consent of the Department of the Interior, have adopted the field-notes of survey as the basis of adjustment of their claims.

Some of the selections made by the State of Arkansas more than thirty years ago and intended to be confirmed by the act of March 3, 1857, are yet unadjusted, and a great many tracts selected and claimed under the grant of that State have been sold and disposed of by the United States. At this lapse of time it is next to impossible to furnish the Secretary of the Interior with the proof that he should have taken as soon as "practicable after the passage" of the act making the grant.

The grant as first introduced was only intended for Arkansas. That State was mentioned by name both in the title and the body of the act making the grant. It promptly and in good faith entered upon a system of levees and drains to reclaim the lands. In alphabetical order it was the second on the list of States. Notwithstanding all this, less has been done toward adjustment in that State than any other. No indemnity either in lands or money has ever been allowed, although its right to both is not denied.

At the suggestion of the Department, and in the hope that it would lead to an early adjustment of the claim of the State, the Legislature, by two acts, one approved March 17, 1885, and the other March 19, 1887, adopted the field-notes of survey. The Secretary was not satisfied that the said acts gave the governor "full power" to consent to the adjustment of said grant and the claim of the State for indemnity, and on the 16th day of May, 1887, advised the Commissioner, in a written opinion, "that no further action should be taken" by the Department relative to the claim under the swamp-land act until the governor has been given "full power" by appropriate legislation to consent to the adjustment of said grant and the claim for indemnity in accordance with the principles enunciated in the Louisiana case.

For thirty years, upon one pretext or another, the adjustment of this State's claim has been delayed, and for all this time the United States has been disposing of more or less of the lands previously granted to the State and using the money received, while all the time the State is being charged with interest on the debt due the United States. This course on the part of the Department charged with the duty of prompt adjustment, in addition to trifling with law and vested rights, is unjust to the State in that it diminishes a fund upon which it had the right to rely and also in the initiation of a series of defective titles and the lawsuits and losses that always follow such.

This injustice has extended to the other States as well as Arkansas, but in less degree. In proof of the immense litigation that has come of such action reference is made to the citations made by the Department in its circular of April 18, 1882, of nearly two hundred decisions of the court of last resort and of the Department.

The first section of the act of September 28, 1850, after giving the reason for its passage, states that the whole of the swamp and overflowed lands, made thereby unfit for cultivation and unsold, are hereby granted to the States It was an unconditional present grant by Congress of such lands to the States within which they lie, without reference to their sections, townships, and ranges, but at the same time fixed a criterion by which it could be easily ascertained what was granted, to wit, such legal subdivisions of the public lands the greater part of which were so far swamp and overflowed as to be wet and unfit for cultivation.

All such lands were granted and the title vested September 28, 1850, and have continued to be so granted and vested ever since. This has frequently been settled by the decisions of the Supreme Court of the United States. Congress has never attempted to forfeit the grant or in the least modify the description by which they were given to the States, and such as were wet and unfit for cultivation at the time of the grant passed without any reference to the swampy or non-swampy character since or now.

The failure of the Secretary of the Interior to make the list and plats, and his action in continuing to dispose of the lands granted, became such a grievance that Congress passed two remedial acts. The first of these was approved March 2, 1855, and granted relief to the purchasers and locators of swamp and overflowed lands by giving the States the purchase-money for all such lands sold, and allowing dry lands of like quantity for such as were otherwise disposed of. Presuming upon an early adjustment, and assuming that no more erroneous sales would be made or approved by the Commissioner of the General Land Office, this act was not made prospective and continuing, as it ought to have been.

Other difficulties arose about the selections made by the States, and so Congress again, on March 3, 1857 (11 Stat., 251), passed an act declaring that the selections of swamp and overflowed lands granted to the States by the act of September 28, 1850, theretofore made and reported to the General Land Office, so far as the same remained vacant and unappropriated and not interfered with by actual settlement under existing laws of the United States, were confirmed and approved for patent, and extended and continued in force to that time the act of March 2, 1855. So under existing laws the case may be stated as follows:

1. That the respective States to which the grant applied are entitled to all the swamp and overflowed lands made unfit thereby for cultivation which remained unsold therein on the 28th day of September, A. D. 1850.

2. That for all such lands sold between September 28, A. D. 1850, and March 3, A. D. 1857, the States are entitled to the purchase money received.

3. That for all such lands otherwise disposed of than by sale between said dates the States are entitled to have indemnity in lands not swamp and overflowed.

4. That for such lands as have been sold or otherwise disposed of since September 28, A. D. 1857, no indemnity, either in money or lands, has been granted and no adjustment is possible. The land itself must be taken from the purchaser or settler by the State or its grantee, or lost. When such purchasers or settlers are evicted they come to Congress for relief or accept a return of the purchase-money.

5. That in the States where all of the public lands have been disposed of no indemnity scrip is issued, or if issued is of no value to the State, because it is held that it can only be located in the State to which it may be issued. There are certain moneys in the Treasury of the United States received for lands that passed by the said grant, which in both law and equity belong to these States. Besides this, many of them are entitled to other lands not yet sold or disposed of.

The proposed measure is for the adjustment of the claims of the States interested upon a money basis, so as to save for actual settlers all of such lands as did pass to the States by the grant, but have neither been certified for patent nor sold by the United States. It makes no new grant and does not enlarge any previously made. It does not seek to make any change in the mode of selecting or making proof of the methods of selections. Nor does it modify or reverse any decision of the courts or the Department. But it simply provides for an adjustment in accordance with the established methods of the Department and the decisions of the courts, and when such adjustments are made it gives cash at $1.25 per acre, when under the present law either the land in place or dry indemnity land would be received. This will be the effect of the first section if it should become law.

The second section provides for the certification and payment of the money or the entering of proper credits when, as in the case of the State of Arkansas, there is a debt due the United States.

The third section makes the acceptance of cash indemnity a relinquishment and waiver of all right to the land and a confirmation of the title in the United States or their grantees.

The fourth section requires the Department to consider all lists made and proofs taken in accordance with the rules of the Department to be considered in making the adjustment.

The fifth section will have the effect to redeem all outstanding indemnity script at $1.25 per acre. The following letter will show the amount issued to States where the public lands have all been sold and which can not under the rules now in force be located in the States named. These States insist that they can be located on any vacant lands; the attempt has several times been made.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., February 4, 1888.

SIR: In reply to your oral inquiry, I have the honor to inform you that the certificates issued to the States of Illinois, Indiana, and Iowa, authorizing the location of land in lieu of swamp and overflowed lands located with warrants or scrip prior to March 3, 1857, now outstanding and unsatisfied, amount to 121,059.39 acres, as follows:

	Acres.
Illinois	99,675.83
Indiana	3,715.44
Iowa	17,668.12

Very respectfully,

S. M. STOCKSLAGER,
Acting Commissioner.

In conclusion the committee would call attention to the grants and some decisions under them, and to the fact that a similar bill was reported to the last House from the Committee on Public Lands. The bill ought to pass.

GENERAL LAND OFFICE, *November 21, 1850.*

SIR: By the act of Congress entitled "An act to enable the State of Arkansas and other States to reclaim the 'swamp lands' within their limits," approved September 28, 1850, it is directed "that to enable the State of Arkansas to construct the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands made thereby unfit for cultivation which shall remain unsold at the passage of this act shall be, and the same are hereby, granted to said State."

1. By the fourth section of this act it is directed that the provisions of it shall be extended to, and their benefits be conferred upon, each of the other States of the Union in which such swamp and overflowed lands may be situated.

2. And "that in making out a list and plats of the lands aforesaid, all legal subdivisions, the greater part of which is 'wet and unfit for cultivation,' shall be included in said lists and plats; but when the greater part of a subdivision is not of that character, the whole of it shall be excluded therefrom."

This act clearly and unequivocally grants to the several States those lands which, from being swampy or subject to overflow, are unfit for cultivation. In this class is included also all lands which, though dry part of the year, are subject to inundation at the planting, growing, or harvesting season, so as to destroy the crop, and therefore are unfit for cultivation, taking the average of the season for a reasonable number of years as the rule of determination.

You will please make out a list of all the lands thus granted to the State, des-

ignating those which have been sold or otherwise disposed of since the passage of the law, and the price paid for them when purchased.

The only reliable data in your possession from which these lists can be made out are the field-notes of the surveys on file in your office; and if the authorities of the State are willing to adopt these as the basis of those lists, you will so regard them. If not, and those authorities furnish you satisfactory evidence that any lands are of the character embraced by the grant, you will so report them.

The following general principles will govern you in making up these lists, to wit:

When the field-notes are the basis, and the intersections of the lines of swamp or overflow with those of the public surveys alone are given, those intersections may be connected by straight lines; and all legal subdivisions, the greater part of which are shown by these lines to be within the swamp or overflow, will be certified to the State; the balance will remain the property of the Government.

Where the State authorities may conclude to have the surveys made to determine the boundaries of the swamp or overflowed lands, those boundaries alone should be surveyed, taking connections with the nearest sections or township corners; or

Where the swamp or overflowed lands are on the borders of a stream or lake the stream or lake could be meandered and ordinates surveyed at suitable intervals from the borders of the stream or lake to the margin of the swamp or overflowed lands, and by connecting the ends of those ordinates next to that margin by straight lines the boundaries of the swamp or overflowed lands can be ascertained with sufficient accuracy. In no case, however, should any such boundaries or ordinates be marked in the field, as they may produce difficulty in determining the lines and corners of the public surveys hereafter, and thus lead to litigation. The selections in all these cases will be made as before directed. Where satisfactory evidence is produced that the whole of a township, or of any particular or specified part of a township, or the whole of a tract of country bounded by specified surveyed or natural boundaries, is of the character embraced by the grant, you will so report it, the adjacent subdivisions, however, to be subject to the regulations above given; and in every case, under each rule or principle herein prescribed, 40-acre lots or quarter-quarter sections will be regarded as the legal subdivisions contemplated by the law.

The affidavits of the county surveyors and other respectable persons that they understand and have examined the lines, and that the lands bounded by the lines thus examined and particularly designated in the affidavit are of the character embraced by the law, should be sufficient.

The line or boundary of the overflow that renders the land unfit for regular cultivation may be adopted as that which regulates the grant.

You will make out lists of these lands as early as practicable, according to the following form, one copy of which you will transmit to the land officers and another to this office. The land selected should be reserved from sale, and after those selections are approved by the Secretary of the Interior, the register should enter all the lands so selected in his tract books as "granted to the State by an act of 28th September, 1850, being swamp or overflowed lands," and on the plats enter on each tract "State act of 28th September, 1850." Copies of the approved lists will be sent to the registers for this purpose. Your early attention is requested in this matter, that the grant may be disposed of as speedily as possible.

Very respectfully, your obedient servant,

J. BUTTERFIELD, *Commissioner.*

Part of section.	Section.	Township.	Range.	Remarks.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., December 13, 1886.

REGISTERS and RECEIVERS,
United States Land Offices:

GENTLEMEN: The rules heretofore in force relative to the admission of entries and filings on lands selected (and prior to their approval and certification by the Secretary of the Interior) as "swamp and overflowed and rendered thereby unfit for cultivation," are hereby modified as follows:

1. When any settler upon such lands or applicant to enter the same under the public-land laws of the United States shall apply to make a filing or entry under said laws, accompanied by a statement under oath, corroborated by two witnesses, that the land in its natural state is not swamp and overflowed and rendered thereby unfit for cultivation, the register and receiver will allow such filing or entry "subject to the swamp-land claim."

2. Upon the admission of any such filing or entry the register will at once notify the governor of the State thereof and allow him sixty days within which to object to the perfection of the entry, and to apply for a hearing of the State to prove the swampy character of the land.

3. When a hearing is ordered between the State and claimant under the public-land laws the burden of proof will be upon the State to establish the character of the land.

4. When no protest or application for a hearing is presented on the part of the State, as herein provided, the State will be deemed concluded from thereafter asserting a claim to the land under the swamp-land grant.

5. The foregoing applies only to those States whose claims are adjusted by examinations in the field.

6. Where swamp-land selections are based upon the field-notes of survey, and the land is alleged not to have been in fact swamp and overflowed and rendered thereby unfit for cultivation at the date of the swamp-land grant, the burden of proof will be upon the contestant or adverse claimant under the public-land laws.

7. You will promptly advise this office when notice is given the governor in any case, stating the date of such notice, and the description of the land involved. You will also duly report the governor's action in each case.

WM. A. J. SPARKS,
Commissioner.

Approved:
L. Q. C. LAMAR, *Secretary.*

UNITED STATES SWAMP-LAND LAWS—REGULATIONS AND DECISIONS THEREUNDER—GENERAL LAND OFFICE, APRIL 18, 1882.

An act to aid the State of Louisiana in draining the swamp lands therein.

Be it enacted, etc., That to aid the State of Louisiana in constructing the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands, which may be or are found unfit for cultivation, shall be, and the same are hereby, granted to that State.

SEC. 2. *And be it further enacted*, That as soon as the Secretary of the Treasury shall be advised, by the governor of Louisiana, that that State has made the necessary preparation to defray the expenses thereof he shall cause a personal examination to be made under the direction of the surveyor-general thereof, by experienced and faithful deputies, of all the swamp lands therein which are subject to overflow and unfit for cultivation; and a list of the same to be made out and certified by the deputies and surveyor-general to the Secretary of the Treasury, who shall approve the same, so far as they are not claimed or held by individuals, and on that approval the fee-simple to said lands shall vest in the said State of Louisiana, subject to the disposal of the Legislature thereof: *Provided, however*, That the proceeds of said lands shall be applied exclusively, as far as necessary, to the construction of the levees and drains aforesaid.

SEC. 3. *And be it further enacted*, That in making out a list of these swamp lands, subject to overflow and unfit for cultivation, all legal subdivisions, the greater part of which is of that character, shall be included in said list; but when the greater part of a subdivision is not of that character, the whole of it shall be excluded therefrom: *Provided, however*, That the provisions of this act shall not apply to any lands fronting on rivers, creeks, bayous, water courses, etc., which have been surveyed into lots or tracts under the acts of 3d March, 1811, and 24th May, 1824: *And provided further*, That the United States shall in no manner be held liable for any expense incurred in selecting these lands and making out the lists thereof, or for making any surveys that may be required to carry out the provisions of this act.

Approved March 2, 1849.

An act to enable the State of Arkansas and other States to reclaim the "swamp lands" within their limits.

Be it enacted, etc., That to enable the State of Arkansas to construct the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands made unfit thereby for cultivation, which shall remain unsold at the passage of this act, shall be, and the same are hereby, granted to said State.

SEC. 2. *And be it further enacted*, That it shall be the duty of the Secretary of the Interior, as soon as may be practicable after the passage of this act, to make out an accurate list and plats of the lands described as aforesaid, and transmit the same to the governor of the State of Arkansas, and at the request of said governor cause a patent to be issued to the State therefor; and on that patent the fee-simple to said lands shall vest in the said State of Arkansas, subject to the disposal of the Legislature thereof: *Provided, however*, That the proceeds of said lands, whether from sale or by direct appropriation in kind, shall be applied exclusively, so far as necessary, to the purpose of reclaiming said lands by means of the levees and drains aforesaid.

SEC. 3. *And be it further enacted*, That in making out a list and plats of the land aforesaid, all legal subdivisions, the greater part of which is "wet and unfit for cultivation," shall be included in said list and plats; but when the greater part of a subdivision is not of that character, the whole of it shall be excluded therefrom.

SEC. 4. *And be it further enacted*, That the provisions of this act be extended to, and their benefits be conferred upon, each of the other States of the Union in which such swamp and overflowed lands, known and designated as aforesaid, may be situated.

Approved September 28, 1850.

The grant of swamp lands, under acts of March 2, 1849, and September 28, 1850, is a grant *in præsenti*. See United States Supreme Court decisions, Railroad Company *vs.* Fremont County (9 Wallace, 89); Railroad Company *vs.* Smith (*id.*, 95); Martin *vs.* Marks (7 Otto, 353); decisions of Secretary of the Interior, December 23, 1851 (1 Lester's L. L., 549), April 25, 1862, and opinion of Attorney-General, November 10, 1858 (1 Lester's L. L., 564).

The act of September 28, 1850, did not grant swamp and overflowed lands to States admitted into the Union after its passage. See decision of Secretary Interior, August 17, 1858; Commissioner General Land Office, May 2, 1871 (Copp's L. L., 464), affirmed by Secretary June 1, 1871, and Commissioner General Land Office, January 19, 1874 (Copp's L. L., 473), affirmed by Secretary July 9, 1875.

A State having elected to take swamp land by field-notes and plats of survey is bound by them, as is also the Government. See Secretary's decision, October 4, 1855 (1 Lester's L. L., 553), August 1, 1859 (*id.*, 571), December 4, 1877 (4 Copp's L. O., 149), and September 19, 1879.

An act for the relief of purchasers and locators of swamp and overflowed lands.

SEC. 1. *Be it enacted, etc.*, That the President of the United States cause patents to be issued, as soon as practicable, to the purchaser or purchasers, locator or locators, who have made entries of the public lands, claimed as swamp lands, either with cash, or with land-warrants, or with scrip, prior to the issue of patents to the State or States, as provided for by the second section of the act approved September 28, 1850, entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," any decision of the Secretary of the Interior or other officer of the Government of the United States to the contrary notwithstanding: *Provided*, That in all cases where any State, through its constituted authorities, may have sold or disposed of any tract or tracts of land to any individual or individuals prior to the entry, sale, or location of the same, under the pre-emption or other laws of the United States, no patent shall be issued by the President for such tract or tracts of land until such State, through its constituted authorities, shall release its claim thereto in such form as shall be prescribed by the Secretary of the Interior: *And provided further*, That if such State shall not within ninety days from the passage of this act, through its constituted authorities, return to the General Land Office of the United States a list of all the lands sold as aforesaid, together with the dates of such sale and the names of the purchasers, the patents shall be issued immediately thereafter, as directed in the foregoing section.

SEC. 2. *And be it further enacted*, That upon due proof, by the authorized agent of the State or States, before the Commissioner of the General Land Office, that any of the lands purchased were swamp lands, within the true intent and meaning of the act aforesaid, the purchase-money shall be paid over to the State or States; and where the lands have been located by warrant or scrip, the said State or States shall be authorized to locate a quantity of like amount, upon any of the public lands subject to entry, at $1.25 per acre, or less, and patents shall issue therefor upon the terms and conditions enumerated in the act aforesaid: *Provided, however*, That the said decisions of the Commissioner of the General Land Office shall be approved by the Secretary of the Interior.

Approved March 2, 1855.

An act to confirm to the several States the swamp and overflowed lands selected under the act of September 28, 1850, and the act of March 2, 1849.

Be it enacted, etc., That the selection of swamp and overflowed lands granted to the several States by the act of Congress approved September 28, 1850, entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," and the act of March 2, 1849, entitled "An act to aid the State of Louisiana in draining the swamp lands therein," heretofore made and reported to the Commissioner of the General Land Office, so far as the same shall remain vacant and unappropriated, and not interfered with by an actual settlement under any existing law of the United States, be, and the same are hereby, confirmed, and shall be approved and patented to the said several States, in conformity with the provisions of the act aforesaid, as soon as may be practicable after the passage of this law: *Provided, however*, That nothing in this act contained shall interfere with the provisions of the act of Congress entitled "An act for the relief of purchasers and locaters of swamp and overflowed lands," approved March 2, 1855, which shall be, and is hereby, continued in force and extended to all entries and locations of lands claimed as swamp lands made since its passage.

Approved March 3, 1857.

An act to extend the provisions of "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits" to Minnesota and Oregon, and for other purposes.

Be it enacted, etc., That the provisions of the act of Congress entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," approved September 28, 1850, be, and the same are hereby, extended to the States of Minnesota and Oregon: *Provided*, That the grant hereby made shall not include any lands which the Government of the United States may have reserved, sold, or disposed of (in pursuance of any law heretofore enacted) prior to the confirmation of title to be made under the authority of the said act.

SEC. 2. *And be it further enacted*, That the selection to be made from lands already surveyed in each of the States, including Minnesota and Oregon, under the authority of the act aforesaid, and of the act to aid the State of Louisiana in draining the swamp lands therein, approved March 2, 1849, shall be made within two years from the adjournment of the Legislature of each State at its next session after the date of this act, and, as to all lands hereafter to be surveyed, within two years from such adjournment, at the next session after notice by the Secretary of the Interior to the governor of the State that the surveys have been completed and confirmed.

Approved March 12, 1860.

Provisions of section 2 repealed as to all States except Minnesota and Oregon by enactment in Revised Statutes. (See section 5596.)

The grant of swamp lands to the States of Oregon and Minnesota was a grant *in præsenti*, and the land so granted can not be otherwise disposed of by the Government. See Secretary's decisions, April 15, 1880; Crowley *vs.* State of Oregon (7 Copp's L. O., 28), and the State of Oregon *vs.* United States, June 4, 1880 (*id.*, 53).

Status of lands within the meander lines of shallow bodies of water at date of survey that might have been temporarily overflowed considered. See Secretary's decision, December 2, 1874 (Copp's Land Laws, 475).

CHAP. CCXIX.—An act to quiet land titles in California.

SEC. 4. *And be it further enacted*, That in all cases where township surveys have been, or shall hereafter be, made under authority of the United States, and the plats thereof approved, it shall be the duty of the Commissioner of the General Land Office to certify over to the State of California as swamp and overflowed all the lands represented as such upon such approved plats within one year from the passage of this act, or within one year from the return and approval of such township plats.

The Commissioner shall direct the United States surveyor-general for the State of California to examine the segregation maps and surveys of the swamp and overflowed lands made by said State, and where he shall find them to conform to the system of surveys adopted by the United States, he shall construct and approve township plats accordingly, and forward to the General Land Office for approval: *Provided*, That in segregating large bodies of land, notoriously and obviously swamp and overflowed, it shall not be necessary to subdivide the same, but to run the exterior lines of such body of land. In case such State surveys are not found to be in accordance with the system of United States surveys, and in such other townships as no survey has been made by the United States, the Commissioner shall direct the surveyor-general to make segregation surveys upon application to said surveyor-general by the governor of said State, within one year of said application, of all the swamp and overflowed land in such townships, and to report the same to the General Land Office, representing and describing what land was swamp and overflowed under the grant, according to the best evidence he can obtain. If the authorities of said State shall claim as swamp and overflowed any land not represented as such upon the map or in the returns of the surveyors, the character of such land at the date of the grant (September 28, 1850) and the right to the same shall be determined by testimony to be taken before the surveyor-general, who shall decide the same subject to the approval of the Commissioner of the General Land Office.

SEC. 5. *And be it further enacted*, That it shall be the duty of the Commissioner of the General Land Office to instruct the officers of the local land offices and the surveyor-general, immediately after the passage of this act, to forward lists of all selections made by the State referred to in section 1 of this act, and lists and maps of all swamp and overflowed lands claimed by said State or surveyed as provided in this act, for final disposition and determination, which final disposition shall be made by the Commissioner of the General Land Office without delay.

Approved July 23, 1866.

Mr. MCRAE. Now, Mr. Speaker, unless some other gentleman desires to make remarks upon the bill or to ask a question about it, seeing that it will be impossible for us to pass the bill with the number of members now present, I shall ask to have the consideration hour considered as closed so far as this bill and the committee are concerned, so as to allow other committees a chance to do something.

Mr. JACKSON. Since debate has been entered upon and remarks have been made in favor of the bill, I think we who oppose it should at least have an opportunity to briefly state some of the objections to it. I think the gentleman from Colorado [Mr. SYMES] must certainly misapprehend the provisions of the bill or he would not have made the answers he did to my questions. The bill of the Senate (758), now under consideration, has nothing in it in regard to 5 per cent. payments. It is a bill providing for an allowance and payment to certain States at a fixed price per acre for swamp lands that it is alleged were embraced in grants made by the General Government to those States, and which lands the States have never received.

It is true, as carefully stated by the gentleman from Arkansas [Mr. MCRAE], that this bill does not carry an appropriation of money from the Treasury of the United States. But, Mr. Speaker, it is equally true that the passage of this bill will involve the United States in a liability for a very large sum of money. It is very similar to the bill reported at this session to the House from the Committee on the Public Lands (H. R. 6897), Report No. 347, and it will require but a very brief examination of the bill to satisfy any one that it involves a large liability on the part of the General Government, and that the zeal for its passage is wholly animated by a desire to eventually get handsome donations and allowances from the United States Treasury to certain States in the South and West that are well known to be embraced within its provisions.

Mr. Speaker, if I can be indulged for a very brief time, I would like to call attention to a few points in this case. The title of the bill is "An act to relieve purchasers of and indemnify certain States for swamp and overflowed lands disposed of, and for other purposes." This title, it will be observed, is broad enough to cover almost anything that might be desired, not only in regard to the somewhat celebrated swamp-land grants, but as to anything else. Now what, in fact, are the grants of swamp lands to the States? The original of the acts making these grants are the acts relating to Louisiana, approved 2d March, 1849, and the act relating to Arkansas, approved 28th September, 1850. The fourth section of this latter act made its provisions apply to all States then in the Union having public lands.

The purport of these acts is to grant to the States the swamp and overflowed lands within their boundaries for the purpose of reclaiming them. They were evidently only intended as a grant of such lands as are wholly unfit for cultivation without the construction of levees and drains under a system so extensive that only the State itself is competent to undertake it.

It is safe to say, Mr. Speaker, that of all the improvident legislation of Congress nothing has ever equaled these grants for abstracting public lands from the General Government without consideration. It is a well-known fact that under the different and varying systems of selection vast quantities of good arable lands have been obtained.

The very title of this bill shows that. It is to relieve purchasers who have acquired titles from the United States for lands so desirable that the settler in search of a home going upon the land never suspected the land to be swamp land. The fact is these grants accomplished no good purpose and should never have been made. No such grants, I venture to say, if attention is called to the fact, could now be obtained from Congress. Yet one of the provisions of this bill is to extend all these grants to all States admitted into the Union since 1860.

The gentleman from Colorado speaks of this bill as an innocent, harmless statute to pay some old, just debt. Yet, if I am not mistaken, his State without this act has not the shadow of a claim to any swamp lands whatever. I have not time to go into a full history of this legislation, and shall content myself with calling attention to some of the most objectionable features of this bill. Since the passage of the swamp-land acts in 1849 and 1850 the Government of the United States has been disposing of public lands in various ways—to States and corporations for public improvements by cash sales, by homesteads, by grants for public schools, and for some few other purposes.

It is claimed that the swamp-land grants are grants *in præsenti*, and that without requiring any designation whatever title at once passed to all swamp and overflowed lands to the respective States; that if by inadvertence the Government included in its gifts to a homesteader, or a sale or grant to any one, any land that can now be proven to have been swamp land, the State should now receive pay and indemnity for such lands at $1.25 per acre. No matter if the United States Government got but 12 cents per acre, or nothing at all, it should pay the State at the rate of $1.25 per acre for all such lands.

Further, no matter that it has been the State's own negligence that it has not had the swamp lands designated heretofore, it now claims indemnity for its own negligence.

These claims have no foundation in equity or justice. This bill is simply a convenient medium to get indirectly an appropriation for benefit of a State; and as it extends its benefits to many States, it of course has many friends.

It does not, as I have observed, make an immediate appropriation, but it does make it the duty of the Administration to settle and adjust these alleged claims, and it expressly provides that each State shall have indemnity at the rate of $1.25 per acre for such claims.

It further provides that the Secretary of the Treasury shall cause such State to be credited with these amounts, and he shall apply the same on any debt due the United States by such State.

But, Mr. Speaker, the drawers of this bill were careful to provide that none of this money should apply in the payment of the direct tax, as will appear from a reading of the second section. They eventually intend to have it money.

Mr. Speaker, there are other questions concerning this bill that ought to be discussed before it is voted upon. The gentleman in charge of it intimates that its consideration is not to be pressed at this time, and I hope to have further time to speak of it if it is called up again in this Congress.

Mr. MCRAE. I have offered to yield time to the gentleman if he desires it, but he refused to accept it unless I would surrender to him.

Mr. JACKSON. I thank the gentleman very kindly; but in a discussion of this kind we of the opposition have a right to be heard in our own time, and the gentleman's merely yielding time is not satisfactory.

Mr. MCRAE. The gentleman understands that we have only one hour altogether for the consideration of this bill, and I now say to him that I do not intend to yield the floor to him or any other gentleman to make speeches in opposition to the bill, with no chance to reply to them at this time. I have consented not to proceed with the discussion at this time because as we can not pass it no good will come from it.

If the gentleman compels the friends of the bill to go into the discussion at this time, we propose to take care of our own side. The bill

will bear discussion and I am anxious to discuss it, but I want that discussion before a House able to pass it if a majority so think. I do not care to talk to less than a quorum when I know that point will be made to defeat me.

If, however, gentlemen on the other side will not consent to let me take the course I suggest, then I propose to occupy the time allowed me under the rules of the House.

The CHAIRMAN. The gentleman from Arkansas is entitled to the floor for an hour.

Mr. NELSON. As there is no prospect of passing the bill now, I trust the gentleman from Arkansas [Mr. McRAE] will withdraw it.

The CHAIRMAN. The gentleman has that right.

Mr. McRAE. I can not consent to withdraw the bill; but if the gentleman from Pennsylvania [Mr. JACKSON] will consent to the agreement suggested, it will obviate any trouble about the matter. If he does not, the hour will have to be consumed. It is not my purpose to stand in the way of any other committee.

I move that the committee rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. RICHARDSON reported that the Committee of the Whole on the state of the Union having had under consideration the bill (S. 758) to relieve purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, and for other purposes, had come to no resolution thereon.

ORDER OF BUSINESS.

Mr. McRAE. I move that the hour allotted to the Committee on Public Lands for the consideration of the bill just reported from the Committee of the Whole, be now considered as closed; and on that motion I call for the previous question, if such a motion is in order.

The SPEAKER. No motion of that sort can be entertained under the rules. The rules provide imperatively that an hour shall be set apart for the consideration of bills previously reported from committees; and if at the end of the hour on any day a committee has a bill unfinished, it is allowed sufficient time on the next day, not exceeding one hour, to complete the consideration of that bill; when the consideration of that bill is completed or the bill withdrawn the time of the committee has expired.

Mr. McRAE. The motion I make has reference to a bill exactly in that condition—a bill coming over from the consideration hour of yesterday.

The SPEAKER. But the proposition of the gentleman can not be put in the form of a motion; it can be adopted only by unanimous consent, because the rule does not allow a motion to be made to dispense with the hour or any part of it. Has this bill been withdrawn in the Committee of the Whole?

Mr. McRAE. It has not. I did not desire to withdraw it.

The SPEAKER. Then the gentleman asks unanimous consent that the hour belonging to the Committee on Public Lands may be considered as closed for to-day.

Mr. NELSON. So far as relates to that committee, that proposition is satisfactory to me; but I think the gentleman ought not to ask to cut off other committees.

Mr. McRAE. I do not; and have done all I could to avoid such a result except to abandon this bill, and that I will not do.

The SPEAKER. The effect of the proposition will simply be that this committee will hereafter have a sufficient length of time to compensate for the time which may be lost this morning.

Mr. McRAE. The very object of my proposition is to enable some other committee to go on.

Mr. NELSON. To-day?

Mr. JACKSON. Well, I object. I desire that the Committee on Public Lands shall have their time on this bill to-day. I do not want the time to go over till to-morrow; I want it to be occupied this morning, so far as I am concerned.

The SPEAKER. But the Chair will state to the gentleman that immediately upon the completion of the consideration of the bill now pending, the Committee on Public Lands would lose its place, and another committee would be called. No other bill from the Committee on Public Lands could be taken up under the rule.

Mr. JACKSON. But my impression is that this bill, if considered, will consume the time.

Mr. EZRA B. TAYLOR. If the House will listen to me for one moment, I may perhaps say something which will be of interest. After careful consideration of all the circumstances I have come to this conclusion, by which I shall abide: With my consent, there shall be no other legislation during this session of Congress, in the absence of a quorum, except appropriation bills and pension bills.

Mr. O'NEILL, of Pennsylvania. And the gentleman excepts also, I hope, private bills to which there is no objection.

Mr. EZRA B. TAYLOR. I mean just what I say.

Mr. McKENNA. I ask unanimous consent to introduce for consideration the resolution which I hold in my hand.

The SPEAKER. The regular order has been insisted upon by the gentleman from Pennsylvania [Mr. SOWDEN], who, being appealed to, declined to withdraw the call. Of course the Chair is bound by that demand.

Mr. McKENNA. The gentleman from Pennsylvania, I believe, is present. I ask that the resolution be read and that the Chair put the request for unanimous consent.

The SPEAKER. The gentleman from Pennsylvania does not seem to be present.

Mr. TAULBEE. I demand the regular order.

Mr. McKENNA. You have not heard this resolution read.

The SPEAKER. The hour for the consideration of bills reported from committees has not yet expired, and no other business can now be transacted.

Mr. O'NEILL, of Pennsylvania. I wish to say that I hope the gentleman from Ohio [Mr. EZRA B. TAYLOR] will not include in his objection private bills.

The SPEAKER. That is a matter of personal appeal to the gentleman from Ohio. The House is now acting under the rule which sets apart this hour for the consideration of bills heretofore reported from committees.

Mr. O'NEILL, of Pennsylvania. But the gentleman said he would not permit any bill to pass——

The SPEAKER. That has no reference to anything now before the House.

Mr. RICHARDSON. If the gentleman [Mr. McRAE] representing the Committee on Public Lands does not desire to call up any other bill, is it not in order to call the next committee?

The SPEAKER. If the gentleman from Arkansas makes no motion that the House resolve itself into Committee of the Whole for the consideration of the bill pending in that committee, the Chair would of course call another committee, and the Committee on Public Lands would lose the remainder of its hour.

Mr. McRAE. The Committee on Public Lands cares nothing about the remainder of this hour, seeing that in the present condition of the House the opposition to the pending bill will be able to prevent its passage. But we do desire that this bill shall not lose any right whatever which it may have as unfinished business.

The SPEAKER. It will not lose any right in that respect. If left undisposed of at the conclusion of this hour, it becomes unfinished business under the rules of the House.

Mr. McRAE. Then I am perfectly willing that the next committee be called.

The SPEAKER. But it becomes unfinished business in the class of business to which it belongs and in the order in which it stands on the Calendar.

Mr. McRAE. I understand that; but it goes on the Calendar as unfinished business?

The SPEAKER. It does.

Mr. McRAE. I suppose that is all I can hope to accomplish.

Mr. JACKSON. I wish to make a parliamentary inquiry. Has the Committee on Public Lands the right to call up any other bill now?

The SPEAKER. It has not. Having occupied one hour yesterday, its right to-day is simply to continue the consideration of the bill pending at the termination of that hour. The next committee is the Committee on Indian Affairs.

PIPESTONE INDIAN RESERVATION, MINNESOTA.

Mr. NELSON. Mr. Speaker, in the absence of the chairman of the Committee on Indian Affairs, and as I see no other member of the committee present, I desire to call up House bill No. 11128 and ask that it be considered in the House. It is now on the Calendar of the Committee of the Whole on the state of the Union.

The SPEAKER. The gentleman from Minnesota, from the Committee on Indian Affairs, calls up House bill No. 11128, and asks unanimous consent that the Committee of the Whole on the state of the Union be discharged from its consideration——

Mr. NELSON. As the gentleman from Arkansas [Mr. PEEL], the chairman of the committee, has just come in, I ask to withdraw the call of that bill.

Mr. PEEL. I suppose its consideration might go on.

The SPEAKER. The Clerk will read the title of the bill.

The Clerk read as follows:

A bill (H. R. 11128) for the disposition of the agricultural lands embraced within the limits of the Pipestone Indian reservation in Minnesota.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to discharge the Committee of the Whole on the state of the Union from the further consideration of this bill——

Mr. EZRA B. TAYLOR. I object.

Mr. NELSON. I move, then, that the House resolve itself into Committee of the Whole for the consideration of the bill.

The question being taken on the motion of Mr. NELSON, there were—ayes 20, noes 6.

Mr. EZRA B. TAYLOR. No quorum has voted.

The SPEAKER. The Chair will appoint Mr. NELSON and Mr. EZRA B. TAYLOR as tellers.

Mr. HOLMES. If in order, I move that the House do now adjourn.

The House divided; and the tellers reported—ayes 9, noes 29.

So the motion was disagreed to.

ORDER OF BUSINESS.

Mr. BURNES. I ask, by unanimous consent, to report from the Committee on Appropriations a bill making an appropriation for the enforcement of the Chinese exclusion act.

The SPEAKER. That can not be done unless the gentleman from Pennsylvania withdraws his point of order.

Mr. BURNES. I ask the gentleman from Pennsylvania to allow this bill to be presented and acted on at this time.

Mr. SOWDEN. The reason I have made the point of order is a public one.

Mr. BURNES. The bill which I desire to bring before the House is in behalf of the public business. It makes an appropriation for the enforcement of the Chinese exclusion act. It is asked for urgently in order to carry out the law Congress has just passed. It is a public matter.

Mr. NELSON. Have I the right to withdraw the matter which I have called up, and which is now pending?

The SPEAKER. The gentleman can do so if he wishes.

Mr. NELSON. Then I will withdraw the bill and yield to the gentleman from Arkansas [Mr. PEEL].

The SPEAKER. The gentleman from Missouri [Mr. BURNES] asks unanimous consent to present a bill, the title of which will be read by the Clerk.

The Clerk read as follows:

A bill making an appropriation for the enforcement of the Chinese exclusion act.

Mr. PEEL. I believe I have the floor.

Mr. BURNES. I ask the gentleman to yield to me for the purpose of presenting for consideration the bill to which I have referred.

Mr. PEEL. The committee has only one hour for the consideration of bills which it has reported, and the gentleman can call his matter up after the morning hour as well as at this time. I do not like to yield at this time, as it will come out of the morning hour. I ask the Chair whether, if I yield, the time consumed will not come out of the morning hour?

The SPEAKER. It will come out of your hour.

ENFORCEMENT OF THE CHINESE EXCLUSION ACT.

Mr. MCKENNA. I ask, by unanimous consent, that the time consumed by the gentleman from Missouri [Mr. BURNES] in presenting the bill be not taken out of the hour belonging to the Committee on the Public Lands.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection, and it was ordered accordingly.

Mr. BURNES. I now ask, by unanimous consent, to present for consideration at this time a bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act.

The SPEAKER. The bill will be read, after which the Chair will ask for objection.

The bill was read, as follows:

Be it enacted, etc., That for the purpose of carrying into effect the provisions of the act approved October 1, 1888, entitled "An act supplementary to an act entitled 'An act to execute certain treaty stipulations relating to Chinese,' approved the 6th day of May, 1882," and to defray the expenses which may be incurred in the enforcement of said act by the Secretary of the Treasury during the fiscal year 1889, the sum of $50,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated out of any money in the Treasury not otherwise appropriated.

The SPEAKER. Is there objection?

Mr. SOWDEN. As this is a bill of a public character and necessary for the public service, I withdraw my demand for the regular order.

The bill was read a first and second time.

Mr. BURNES. I ask for the reading of the letter which I send to the Clerk's desk.

The Clerk read as follows:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., October 9, 1888.

SIR: The attention of the Congress is respectfully invited to the necessity of making some appropriation for the purpose of carrying into effect the provisions of the recent Chinese exclusion act, approved October 1, 1888.

The enforcement of the act necessarily devolves in the first instance upon the collectors of the several ports of entry in the United States, and from the very nature of the service must require the maintenance of a special force of inspectors, guards, and other employés, and as entry may be effected into the United States not only at the ports upon the Atlantic, Pacific, and Gulf coasts, but also across the Canadian and Mexican border lines, it is evident that a considerable force must be eventually employed in order to effectually enforce the provisions of the act.

It would be difficult to give a detailed estimate of the expenditure which might be required for this purpose, but it is recommended that an initial appropriation of $50,000 be made, and I inclose the draught of a provision to be inserted in some proper appropriation bill if this recommendation meets with the approval of the Congress.

As the act in question relates to and in a measure regulates the subject of immigration into the United States, it is believed that the money appropriated can be properly paid out of the immigrant fund provided for in the act of August 2, 1882, entitled "An act to regulate immigration." This fund is amply sufficient for this purpose, there being now to its credit upon the books of the Treasury the sum of $281,395.40.

Respectfully, yours,

HUGH S. THOMPSON,
Acting Secretary.

The SPEAKER,
United States House of Representatives.

Enforcement of Chinese exclusion act: For the purpose of carrying into effect the provisions of the act approved October 1, 1888, entitled "An act, a supplement to an act entitled 'An act to execute certain treaty stipulations relating to Chinese,' approved the 6th day of May, 1882," and to defray the expenses which may be incurred in the enforcement of said act by the Secretary of the Treasury during the fiscal year 1889, the sum of $50,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated.

Mr. BURNES. The Treasury asks, for the purpose of carrying into effect the provisions of the Chinese exclusion act, that the sum of $50,000 shall be paid out of the immigrant fund. We deemed that unnecessary, as that fund is in the Treasury, and therefore we have provided that the amount shall be appropriated out of any money in the Treasury not otherwise appropriated.

The bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. BURNES moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

THE WESTERN CHEROKEE INDIANS.

Mr. PEEL. I ask, by unanimous consent, to call up the bill (H. R. 1407) to authorize the Court of Claims to hear, determine, and render final judgment upon the claim of the Old Settler or Western Cherokee Indians.

The SPEAKER *pro tempore* (Mr. STONE, of Kentucky, in the chair). The Chair is advised that the bill is upon the Private Calendar.

Mr. PEEL. I had a bill of similar nature which was decided by the Chair could not be called up on private-bill day. Now this provides for allowing these Old Settler or Western Cherokee Indians to appeal to the Court of Claims for the adjustment of their claim. They have kept up their tribal relations for the prosecution of that claim, and so far as that claim is concerned they stand as an independent tribe. I do not see, therefore, why, as it relates to a public matter, it should be referred to the Private Calendar.

The SPEAKER *pro tempore*. After the explanation of the gentleman from Arkansas and a brief examination of the bill the Chair thinks it is a private bill. But the Chair will submit the statement to the House.

Mr. PEEL. Permit me, Mr. Speaker, further to state to the House that there is a bill on the Calendar for the reimbursement of certain Indians that Speaker CARLISLE on last Friday decided was a public bill, and could not be called up on that day. It is a bill which embodies more of the elements of a private bill than the one now under consideration, and yet it was held by the Speaker to be a public bill within the rule. Besides the Chair on last Friday ruled that the bill disposing of the Pipestone reservation was a public bill.

Mr. RYAN. What is this bill?

Mr. PEEL. This is the Old Settler or Cherokee claim. I hope the House will consider it a public bill.

Mr. HERBERT. I submit, Mr. Speaker, one further consideration that appears to my mind a sufficient one to indicate that the gentleman from Arkansas is correct in the position he takes. As I understand it this is in pursuance of a treaty between the United States and an Indian tribe. These treaties have always been regarded as quasi public—the tribe considered as one party to the treaty and the Government as the other—and of course a bill touching such a treaty, or a right growing out of it, would seem to be, and ought necessarily to be, a public bill, just as if the other party were a foreign nation instead of an Indian tribe. Treaties can only be made with tribes of Indians or other parties upon the theory that the person with whom the treaty is made, the tribe, or whatever it may be, is an entity in itself, like a foreign nation, and a treaty so made is necessarily a public treaty.

Mr. DINGLEY. Let the bill be read.

The bill was read at length.

Mr. EZRA B. TAYLOR. Is this bill subject to objection? I was temporarily out of the Hall.

The SPEAKER *pro tempore*. A question has been raised as to whether it is a public or a private bill. It has been called up in the hour by the Committee on Indian Affairs.

Mr. EZRA B. TAYLOR. I shall object to it at any time.

Mr. DINGLEY. I would like to ask the gentleman from Arkansas if this is a claim on the part of a certain tribe of Indians against the United States under a treaty?

Mr. PEEL. It is.

Mr. DINGLEY. Then it is a public bill.

Mr. PEEL. Undoubtedly.

Mr. DINGLEY. But if it is a claim of individual Indians against the Government it is a private claim.

Mr. PEEL. No; it is a claim of a separate band known as the Old Settlers or Cherokees, and for the purpose of presenting the claim they are considered as a separate tribe. Under the treaty of 1846, out of which this claim arises, they are recognized as a separate and independent tribe for the purpose of carrying on this claim against the Government.

Mr. DINGLEY. I made the inquiry because I think it has been frequently held in the House that matters arising between the United

States and a tribe of Indians as an entirety have been held to be public.

Mr. PEEL. That is correct.

Mr. DINGLEY. But if the claim relates to individuals of a tribe against the United States, then it is a private matter.

Mr. PEEL. This is a public bill for the reason that the tribe of Indians here are treated and held to be a separate band, independent of the other Cherokees, for the purpose of carrying on this claim against the Government. Otherwise, I repeat, they belong to the Cherokee Nation.

Mr. RYAN. I understand that these are simply members of the Cherokee Nation of Indians. They are called the Old Settlers, although they belong to the same tribe, the name being given to them, perhaps, because they were pioneers moving into the Territory at an earlier date than the remainder of the tribe. They are simply a class of that nation who perhaps went ont there at an earlier period than the rest of the tribe. They have some rights growing out of the treaty of 1846, and this bill is intended to provide a remedy. Nevertheless, it seems to me that it is a public measure since it does not specify by name the beneficiaries. Hence, I think, under the rulings of the Speaker of the House heretofore it is a public bill.

The SPEAKER *pro tempore*. After the reading of the bill, and in view of former rulings of the Chair on this question, the present occupant of the chair will hold this to be a public bill, and that it has the right of consideration in this hour.

Mr. PEEL. Now, Mr. Speaker, if the gentleman from Ohio proposes to make the point of no quorum upon this bill I would like to know it.

Mr. EZRA B. TAYLOR. I certainly shall.

Mr. PEEL. I think if the gentleman will reflect for a moment on the object of this legislation he will not do that.

Mr. RYAN. I understand the objection does not go to the merits.

Mr. EZRA B. TAYLOR. When the time comes I will show the reason of the objection. I shall insist, just as I have said, on the presence of a quorum.

Mr. PEEL. Very well, then, Mr. Speaker, I ask leave to withdraw the bill for the present.

There being no objection, the bill was withdrawn.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. McCOOK, its Secretary, announced that the Senate had agreed to the amendments of the House to the bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas.

The message further announced that the Senate had agreed to the amendment of the House to the bill (S. 2663) granting an increase of pension to Mrs. Mary M. Ord.

The message further announced that the Senate had agreed to the amendment of the House to the bill (S. 1190) for the relief of the estate of Joseph Fenno.

The message further announced that the Senate had agreed to the report of the conferees on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for other years, and for other purposes.

The message further announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States, to allow persons who have abandoned or relinquished their homestead entries to make another entry.

The message further announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 8962) for the relief of Anthony L. Woodson.

CHEROKEE FREEDMEN.

Mr. PEEL. I now ask to call up the bill (S. 1494) for present consideration.

The SPEAKER *pro tempore*. The Clerk will report the title of the bill.

The bill was read, as follows:

A bill to secure to the Cherokee freedmen and others their proportion of certain proceeds of land, under the act of March 3, 1883.

Whereas it is provided in the ninth article of the treaty of July 19, 1866, between the United States and the Cherokee Nation of Indians, that freedmen who have been liberated by voluntary act of their former owners, or by law, as well as all free colored persons who were in the (Cherokee) country at the commencement of the rebellion, and were then residents therein, or who might return within six months, and their descendants, shall have all the rights of native Cherokees; and

Whereas by the fifteenth article of the aforesaid treaty certain terms were provided under which friendly Indians might be settled upon unoccupied lands in the Cherokee country east of the ninety-sixth degree of west longitude, and the Indians thus settled were, upon full compliance with the provisions of said article, to be incorporated into and ever after remain a part of the Cherokee Nation, upon equal terms in every respect with native citizens; and

Whereas under the provisions of the aforesaid fifteenth article an agreement was entered into between the Cherokee Nation and the Delaware tribe of Indians, on the 8th day of April, 1867, which agreement was approved respectively by the Secretary of the Interior and the President of the United States on the 11th day of April, 1867, and by the terms of which the Delaware Indians "became members of the Cherokee Nation, with the same rights and immunities and the same participation (and no other) in the national funds as native Cherokees;" and

Whereas under the provisions of the aforesaid fifteenth article an agreement was entered into between the Cherokee Nation and the Shawnee tribe of Indians, on the 7th day of June, 1869, and approved by the Secretary of the Interior and the President of the United States, respectively, on the 9th day of June, 1869, by the terms of which the Shawnee Indians were incorporated into and became a part of the Cherokee Nation on equal terms in every respect, and with all the privileges and immunities of native citizens of the Cherokee Nation; and

Whereas it is provided by the sixth article of the aforesaid treaty that all laws of the Cherokee Nation shall be uniform throughout said nation; and

Whereas by an item in the act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1884, and for other purposes, approved March 3, 1883, the sum of $300 000 was "appropriated, to be paid into the treasury of the Cherokee Nation, out of the funds due under appraisement for Cherokee lands west of the Arkansas River, which sum shall be expended as the acts of the Cherokee Legislature direct;" and

Whereas by an act of the Cherokee Legislature, which was passed over the veto of the principal chief and became a law on the 19th day of May, 1883, the principal chief was directed to cause the said sum of $300,000 to be paid out per capita to the citizens of the Cherokee Nation by blood, and which sum has been paid out only to Cherokee citizens by blood, as directed by said act; and

Whereas by the said act of the Cherokee Legislature the aforesaid freedmen, Delaware and Shawnee Indians have been deprived of their legal and just dues guarantied them by treaty stipulations: Therefore,

Be it enacted, etc., That there be, and hereby is, appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $75,000, or so much thereof as may be necessary, to carry out the provisions of this act; and the amount actually expended shall be charged against the Cherokee Nation, on account of its lands west of the Arkansas River, and shall be a lien on said lands, and which shall be deducted from any payment hereafter made on account of said lands. The said sum, or so much thereof as may be necessary, shall be by the Secretary of the Interior distributed per capita, first, among such freedmen and their descendants as are mentioned in the ninth article of the treaty of July 19, 1866, between the United States and the Cherokee Nation of Indians; second, among the Delaware tribe of Indians incorporated into the Cherokee Nation by the terms of a certain agreement entered into between said Cherokee Nation and Delaware Indians, under the provisions of the fifteenth article of the aforesaid treaty, on the 8th day of April, 1867, and approved, respectively, by the President of the United States and the Secretary of the Interior on the 11th day of April, 1867; and, third, among the Shawnee tribe of Indians incorporated into the Cherokee Nation by the terms of a certain agreement entered into between the said Cherokee Nation and Shawnee Indians, under the provisions of the aforesaid article and treaty, on the 7th day of June, 1869, and approved, respectively, by the President of the United States and the Secretary of the Interior on the 9th day of June, 1869, in such manner and in such amount or amounts as will equalize the per capita payment made to Cherokees by blood in accordance with the act of the Cherokee legislature aforesaid, out of the sum of $300,000 appropriated by the act of March 3, 1883, aforesaid.

Mr. PEEL. As will be observed, during the last session of the Forty-seventh Congress, in 1883, Congress appropriated $300,000 to the Cherokee Nation to be expended as the Cherokee council might direct. The Cherokee council saw proper to distribute that money to their people; that is to say, that the Cherokees by their act excluded their freedmen who had been incorporated into their citizenship under the treaty of 1866 and who under that treaty were given all the rights and privileges of native Cherokees. It also excluded from the distribution the adopted Shawnees and Delawares who under agreement arising under the treaty of 1866 became citizens of the Cherokee Nation. The excluded parties in that nation appealed to the Department. The Department investigated the question fully, but as shown by the preamble the principal chief of the Cherokee Nation vetoed the bill by which those freedmen and the other Indians were prescribed from a participation in the distribution, but the council passed it over the veto by a two-thirds vote and it became a law. When the attention of the Department was called to it they made a thorough investigation of the matter, and the bill is substantially the same as it was approved by the Commissioner of Indian Affairs and the Secretary of the Interior and sent to the Forty-ninth Congress, or, I believe, first in the Forty-eighth Congress.

It was very fully investigated by the Committee on Indian Affairs, of which I was a member at that time, and I was chairman of the subcommittee having charge of the measure. We reached the same conclusion, that these parties had been wrongfully excluded and they were entitled to their share of that money. This bill then simply proposes to appropriate $75,000, or so much money as may be necessary to pay these freedmen, Shawnees and Delawares, their proportion and to charge that to the Cherokee fund, or that so much of the Cherokee fund shall be paid over to them. I believe that is about the substance of the measure, and I will now yield five minutes to the gentleman from Tennessee [Mr. PHELAN].

The SPEAKER *pro tempore* (Mr. STONE, of Kentucky). The Senate bill does not appear to have been before the committee.

Mr. PEEL. The House bill is reported by the Committee on Indian Affairs, and I will ask that the Senate bill be substituted. That may perhaps require unanimous consent.

The SPEAKER *pro tempore*. It does require unanimous consent. The gentleman from Arkansas asks unanimous consent that the Senate bill be substituted for the House bill under consideration. Is there objection? The Chair hears none.

Mr. PEEL. I now yield five minutes to the gentleman from Tennessee [Mr. PHELAN].

Mr. PHELAN. I shall not detain the House by entering into an elaborate discussion of this bill, but will simply say that it has all

been passed upon by every department of the Government which can take it into consideration. It has been passed upon very fully and given careful and full examination by the Interior Department—by the Secretary of the Interior and by the Commissioner of Indian Affairs—and it was sent to the Committee on Indian Affairs and carefully considered there. No money is to be appropriated ultimately out of the Treasury of the United States. The money which is appropriatod is to be charged against the Cherokee Nation, and taken out of money that will be paid for some of their lands which are yet to be sold. We are merely advancing to the parties who have been treated unjustly and unfairly by the Cherokee Nation an amount sufficient to pay them out of the Cherokee funds. It is an act of justice which will not cost the United States Government a single cent.

The people who are chiefly interested in this bill, as is well known, are the freedmen of the Cherokee Nation. Under the treaty of 1866 they were given all the rights of Cherokee citizens. Under the act distributing the money which was paid to these Indians from the sale of their lands, it was distributed solely and exclusively among citizens of the Cherokee Nation of Cherokee blood. In this way the freedmen were excluded and also the Shawnees and the Delawares.

This bill is simply an act of justice, which they now request at the hands of the House, and I hope there will be no objection to it. I am sure there can be none upon any ground of equity or of law.

Mr. PEEL. I move that the Committee on Indian Affairs be discharged from the further consideration of the Senate bill.

The motion was agreed to.

Mr. PEEL. I now move that the bill be put upon its passage.

Mr. KILGORE. Mr. Speaker, I can not agree to the passage of this bill. I will go further than the gentleman from Ohio [Mr. EZRA B. TAYLOR], and will say that in my opinion nothing ought to pass this House now except appropriation bills and a motion to adjourn *sine die*.

Mr. HENDERSON, of Iowa. Mr. Speaker, this is a matter of such fairness and of such importance that I think it ought to go through without objection. It is a bill for the relief of the Cherokee freedmen, and the case is an exceptional one.

Mr. PEEL. I hope the gentleman from Texas [Mr. KILGORE], when he understands the nature of this bill, will not object to it. It does not appropriate a dollar of money out of the Treasury. The matter is one which rests entirely between the Cherokee Nation and these citizens. The bill is recommended by the Department, and it has twice passed the Senate.

Mr. SOWDEN. What is the amount involved?

Mr. PEEL. About $60,000. I now move that the bill be ordered to a third reading.

The motion was agreed to.

The bill was accordingly read the third time, and passed.

Mr. PEEL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

Mr. KILGORE. Mr. Speaker, do I understand that that bill has passed? Three or four gentlemen were talking to me here so that I did not take in all that was going on. [Laughter.]

Mr. HENDERSON, of Iowa. They were all good conversationalists. [Laughter.]

Mr. PEEL. I will say to my friend from Texas [Mr. KILGORE] that while he was engaged in that conversation he was doing good service for his country. [Laughter.]

Mr. PEEL. I now call up for consideration the bill (H. R. 1407) to authorize the Court of Claims to hear, determine, and render final judgment upon the claim of the Old Settler or Western Cherokee Indians.

Mr. KILGORE. What is that?

Mr. PEEL. This is the same bill which was read a while ago and which the Chair ruled was a public bill. I will make a brief statement with regard to it, and I hope there will be no objection to the passage of the bill, for certainly it is nothing but an act of justice. If we owe any of our Indians anything I am sure that every honest man, and that includes, of course, every member of this House, will say that we ought to pay it. If we do not owe them anything, of course we ought not to pay them anything, and the country ought to know the facts. The subject-matter of this bill is the claim of the Old Settler Cherokees, who are known as the Western or Old Settler Cherokees of the Indian Territory. They were the first Cherokees that went west of the Mississippi River and located in the wilds in 1828. Under the treaty of 1846, made between these people as a separate band of Indians and the Cherokee Nation of Indians and the United States, they were authorized to present their claims to the proceeds of their lands that were sold west of the Mississippi River, and they have been prosecuting that claim for thirty or forty years. The Senate made two favorable reports upon that claim, which is now included in this bill.

Finally, in the Forty-seventh Congress, it was referred to the Secretary of the Interior with authority to employ a special accountant to go over the accounts between this branch of the Cherokee people and the Government of the United States and ascertain what amount, if any, was due them. That special accountant examined the matter thoroughly and reported a large amount as due—something over $400,000, together with a certain rate of interest. The Commissioner of Indian Affairs at the time, Mr. Price, made a similar report and brought us in debt to these Indians in about the same amount. In the Forty-eighth Congress, the first Congress of which I had the honor to be a member, the question came before the Committee on Indian Affairs, through an executive document, and we were asked to appropriate the money. The chairman of the Committee on Indian Affairs, of which committee I was a member, referred the claim to me for investigation. I gave it the most thorough investigation I have ever given any claim since I have been in Congress. I found no disagreement between myself and the Department as to the facts, but there was a disagreement as to the law. Under my construction of the treaty and the acts of Congress relative thereto I believed, and I so reported, that we did not owe these Indians anything. In the mean time, however, the Court of Claims got jurisdiction of the matter by a reference from the Senate committee, and they made a report in the alternative. They said that upon one construction of the treaty, which was the construction I had adopted, there was about $4,000 due the Indians, but upon the other construction, the one adopted by the Department, there was a much larger sum, about $400,000.

Now there stands a disputed question as to the legal construction of the treaty out of which this claim grows, a question which can never be settled satisfactorily to the country and the claimants unless it be passed upon by the court of last resort. This bill then provides simply for referring this claim to the Court of Claims for adjudication, with the right of either party to appeal to the Supreme Court of the United States. The bill is peremptory in requiring the Attorney-General, if the decision should be against the Government, to appeal to the Supreme Court. Thus under this bill the rights of these individual Indians will be passed upon by a court of our own creation.

The SPEAKER *pro tempore* (Mr. STONE, of Kentucky). The hour for the consideration of bills reported from committees has expired.

Mr. KILGORE. I will not agree to the passage of that bill; I will call a quorum on it.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. PERRY, indefinitely, on account of important business.

To Mr. HEARD, indefinitely, on account of important business.

HOMESTEAD ENTRIES.

Mr. MCRAE. I rise to present a privileged report, which I ask the Clerk to read.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States to allow persons who have abandoned or relinquished their homestead entries to make another entry, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

Amendment numbered 1: That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same with an amendment as follows: In line 6 strike out the word "them" and insert the words "him or her upon the lands settled upon." In line 8 strike out the words "they have" and insert "he or she has;" and the House agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows:

Strike out all of section 3 of said proposed amendment and insert in lieu thereof as follows:

"SEC. 3. That the price of all sections and parts of sections of the public lands within the limits of the portions of the several grants of lands to aid in the construction of railroads, which have been heretofore and which may hereafter be forfeited, which were by the act making such grants or have since been increased to the double minimum price, and also of all lands within the limits of any such railroad grant, and not embraced in the grant lying adjacent to and coterminous with the portions of the line of any such railroad which shall not be completed at the date of this act, is hereby fixed at $1.25 per acre."

And the House agree to the same.

Amendment numbered 3: That the Senate recede from its disagreement to the amendment of the House numbered 3, and agree to the same with an amendment as follows: Strike out all after the word "acres" in line 5 and insert as follows: "without proof of residence upon and certification of the additional entry; and if final proof of settlement and certification has been made for the original entry, when the additional entry is made, then the patent shall issue without further proof." Add as an additional section as follows:

"SEC. 5. That every person entitled under the provisions of the homestead laws to enter a homestead, who has heretofore complied with or who shall hereafter comply with the conditions of said laws, and who shall have made his final proof thereunder for a quantity of land less than 160 acres, and received the receiver's final receipt therefor, shall be entitled under said laws to enter, by legal subdivisions of the public lands of the United States subject to homestead entry, so much additional land as added to the quantity previously so entered by him shall not exceed 160 acres: *Provided*, That in no case shall patent issue until the person making such additional homestead entry shall have actually and in conformity with the homestead laws resided upon and cultivated the land embraced therein, and otherwise complied with such laws."

Amend the title as follows: Strike out the following words: "Amend section 2304 of the Revised Statutes of the United States," and add, after the word "entry," the words "and for other purposes;" and the House agree to the same.

THO. C. MCRAE,
BINGER HERMANN,
JOS. WHEELER,
Managers on the part of the House.

J. N. DOLPH,
J. H. BERRY,
Managers on the part of the Senate.

Mr. MCRAE. I move the adoption of that report.

The report was adopted.

Mr. McRAE moved to reconsider the vote by which the report was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ELECTORAL COUNT.

Mr. PEEL. I ask unanimous consent that the House take up and put on its passage a Senate bill now on the Speaker's table, the necessity of which must be obvious, it being designed to correct an error in the statute in regard to the electoral count.

The title of the bill was read, as follows:

A bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President, and to provide for and regulate the counting of the votes for President and Vice-President, and the decision of questions arising thereon."

Mr. PEEL. It will be obvious to the House, on the reading of this bill, that its passage is necessary. I yield to the gentleman from Kentucky [Mr. BRECKINRIDGE] to explain it if anybody desires an explanation.

Mr. BRECKINRIDGE, of Kentucky. I think the measure is understood by the House. It is a bill passed by the Senate for the purpose of correcting a mistake in the act of 1887.

Mr. DINGLEY. The bill should be passed immediately.

Mr. EZRA B. TAYLOR. There is no doubt about that.

There being no objection, the bill was read a first and second time, and the House proceeded to its consideration.

The bill was read, as follows:

Be it enacted, etc., That the certificates and lists of votes for President and Vice-President of the United States, mentioned in chapter 1 of Title III of the Revised Statutes of the United States, and in the act to which this is a supplement, shall be forwarded, in the manner therein provided, to the President of the Senate forthwith after the second Monday in January, on which the electors shall give their votes.

SEC. 2. That section 141 of the Revised Statutes of the United States is hereby so amended as to read as follows:

"SEC. 141. Whenever a certificate of votes from any State has not been received at the seat of Government on the fourth Monday of the month of January in which their meeting shall have been held, the Secretary of State shall send a special messenger to the district judge in whose custody one certificate of the votes from that State has been lodged, and such judge shall forthwith transmit that list to the seat of Government."

The bill was ordered to a third reading, and was read the third time; and the question being taken on its passage, the Speaker *pro tempore* announced the bill passed.

Mr. DOUGHERTY. I call for a division.

Several MEMBERS. Too late!

The SPEAKER *pro tempore*. The Chair thinks the call for a division comes too late.

Mr. BRECKINRIDGE, of Kentucky. I presume the gentleman from Florida [Mr. DOUGHERTY] does not understand the effect of this measure. By the present law the Presidential electors are required to meet on the second Monday in January, and they are required to have their certificate here by a certain day in December.

Mr. DOUGHERTY. The explanation of the gentleman from Kentucky is entirely unnecessary. I think I understand the provisions of the bill. But certain gentlemen on this floor have stated that no legislation shall be passed except certain kinds of legislation. There are bills in which the people of my district are directly concerned, bills which are in the interest of economy on the part of the Government, and bills the passage of which would be of great assistance to the people I represent in their present strait on account of the yellow-fever epidemic.

If it be the purpose of any gentleman——

The SPEAKER *pro tempore*. The gentleman's demand for a division comes too late.

Mr. DOUGHERTY. As I understand it, the Chair put the question, and, if no other gentleman voted "no," I certainly voted "no," and then I called for a division.

Mr. BRECKINRIDGE, of Kentucky. The demand for a division the Chair has declared came too late.

The SPEAKER *pro tempore*. The vote was taken, the Chair announced the result deliberately, and the demand for a division therefore comes too late. The bill has been passed.

DEFICIENCY APPROPRIATION BILL.

Mr. BURNES. I submit the following privileged report.

The report was read.

The SPEAKER. Is the reading of the statement on the part of the House conferees demanded? [After a pause.] If not, its reading will be dispensed with.

The statement of the House conferees accompanying the conference report under the rules is as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for 1888 and prior years, and for other purposes, submit the following written statement in explanation of the accompanying conference report:

The action of the conference committee differs from that submitted in a report to the House on the Senate amendments, on the 3d instant, in the following particulars only:

On amendments numbered 39 and 41: Appropriates $2,500 to enable the commissioners of the District of Columbia to employ special counsel to represent the District in the case of Samuel Strong, authorized to be submitted to an arbitration board under a joint resolution of Congress approved July 10, 1888.

On amendment numbered 42: Strikes out a provision to extend the time within which the Washington aqueduct tunnel shall be completed, from November 1, 1888, to June 30, 1889, and appropriates $5,000 for the expenses of a joint select committee authorized under a concurrent resolution of Congress to investigate work on and other matters relating to said tunnel.

On amendment numbered 100: Strikes out proposed appropriation of $8,745 to pay to the widow of the late Chief-Justice Morrison R. Waite the balance of one year's salary.

On amendment numbered 107: Omits from the provision to pay certain accounts of district attorneys in 1887, the claim of Grosvenor Lowrey for $911.20, certified in Senate Executive Document No. 270.

On amendments numbered 112 and 113, relating to the Industrial Christian Home Association of Utah: Inserts in lieu of the matter proposed by said amendments the provisions which are set forth in full in the conference report.

On amendment numbered 114: Strikes out proposed appropriation to pay one year's salary to the widow of Lafayette Dancy, an employé of the Internal-Revenue Service, who died of yellow fever in Florida.

On amendment numbered 138: Appropriates $66 for payment of an additional clerk to the House Committee on Enrolled Bills for eleven days' services to October 7, 1888.

On amendment numbered 231: Strikes out the provision to extend the laws of the United States over the territory known as "No Man's Land," and authorizing the entry of public lands therein under the homestead laws.

The bill as agreed upon by the conferees appropriates $4,873,133.37, being a reduction under the amount as it passed the Senate of $291,915.28, and an increase over the amount as it passed the House of $1,645,615.65.

JAS. N. BURNES,
JOSEPH D. SAYERS,
THOS. RYAN,
Managers on the part of the House.

Mr. McKENNA. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McKENNA. Mr. Speaker, is there any way to get a separate vote on the item concerning the Chinese indemnity?

The SPEAKER. There is not. The conference report must be acted upon as an entirety. It must be agreed to or rejected as a whole.

Mr. McKENNA. A motion is in order to reject the report.

The SPEAKER. That is involved in the proposition to disagree to the report. If it be disagreed to, the whole subject will be open, and the House may insist on its amendments or recede from its disagreement.

Mr. McKENNA. I hope the House will disagree to the conference report. Mr. Speaker, there is no good reason whatever for appropriating $276,000, at this time at any rate, to indemnify the Chinese. It will be observed that the language of the item is somewhat changed. It is put by the committee on the ground of humane reasons. It was put by the President in his recommendation on the ground of a thing befitting the national honor.

Now, Mr. Speaker, if it could be put on either ground, the Calendars of this House are groaning with bills which should be passed for humane reasons, and which should be passed for reasons befitting the national honor. We seem to be in haste, sir, to appropriate $276,000 for claims that have not been audited by any committee of this House, and yet if a bona fide claim, which has passed the scrutiny of one of the committees of this body, be offered for consideration, some gentleman will be eager enough to call the regular order, or some one else swift to demand a quorum and defeat it.

Now, it seems to me that we should be as fair and just to our own citizens as we want to be extraordinarily generous to the citizens of some other nation. In the treaty which was negotiated with the Chinese Government there was a clause of indemnity amounting to $276,000, granted confessedly upon no legal ground whatever; granted then, I suppose, diplomatically. For diplomatic reasons the Chinese Government rejected the treaty. They will not give us the benefit of it. But we propose to give them all the benefit there is in it. Now why? Will some gentleman tell me why? I would like to have some member of this committee explain to me the reason why. Will any gentleman give the answer? There is no legal obligation to do it; there is no moral obligation resting upon us, and the diplomatic reason by the action of China itself has been destroyed. Why, then, grant it?

As I said before, in my former remarks on this subject, in the Forty-ninth Congress we granted $147,000 distinctly on the ground that it should not become a precedent. We grant the $276,000 distinctly that it is for humane reasons and possibly not to become a precedent. Are we never to be humane hereafter? Is this to be the limit of it?

Mr. Speaker, if we should entertain its consideration on the ground of humanity, and I confess it is a strong ground; if we should entertain its consideration on some ground befitting the national honor, and I confess it is strong, there is no haste to entertain either at this time. The Chinese matter is not yet concluded. I hope it is near a conclusion; and when it has reached a conclusion it is time enough to consider whether we shall make gifts to China or whether we shall consider them in the light that this bill desires we should consider them.

Now I am well aware that it looks like this is an invidious matter; it looks as if this great and powerful nation could well afford to grant this sum of money; but if you put it on that ground let us not go abroad to do justice or to grant favors before we do so at home. I

would like some sufficient reason to be given why this should become a law at all.

Mr. CLEMENTS. Mr. Speaker, I do not rise for the purpose of replying to the remarks of the gentleman from California, who has just taken his seat, or to discuss the pending report, but simply to occupy the attention of the House for a few moments relative to some of the statements made by the gentleman from Illinois [Mr. CANNON], not long since, in regard to the expenditures under this Administration. I do not propose to go into a general statement as to the appropriations or expenditures of the public money, but simply to refer to one statement in particular which was made by him—that in relation to the increase of public offices and of salaries. All of the other points made by him have been sufficiently and amply answered by other gentlemen on this floor.

Appended to the remarks of the gentleman from Illinois was a statement that there had been during the last three sessions of Congress, including this one, 799 new offices created, with salaries aggregating $762,236.50 per annum. The gentleman did not trouble himself to present the other side of this question and to show during that time what places had been dispensed with and what salaries had been abolished. I hold in my hand a statement of the offices that have been abolished, the appropriations for which have been discontinued during the same period of time, aggregating 467 offices, at an aggregate compensation of $515,665 per annum. I will not stop to read it, but with the consent of the House will incorporate it in the RECORD as a part of and at the close of my remarks.

This statement, Mr. Speaker, shows that 467 offices with salaries aggregating $515,655 per annum have been discontinued during the three sessions of Congress referred to, and which at least should be considered as a partial offset to the 799 new offices alleged by the gentleman from Illinois to have been created during the same period.

Now, as to the places enumerated as having been established, and which go to make up the total of 799, to which he alludes, I find upon an examination of the table presented by him that out of these places that are counted as offices established 62 are policemen of the District of Columbia, 12 are employés of the fire department, and 25 janitors of new school buildings erected in the District within the past three years, making a total of 99 places of this character which have been created during that time, or an increase of that many in the fire department, the police service, and for the public-school buildings of this city, and which the gentleman enumerates in his list as a part of the new offices created under this Administration.

Here is a great and growing city, a city which in 1880, I believe, contained about 180,000 inhabitants and now nearly 230,000. It is not a strange thing under such circumstances that for the protection of public property and for the preservation of peace and order, for the protection of property from fire, that there should have been this moderate increase; but I wish to call attention to the fact that this increased force is arrayed in the table of the gentleman from Illinois as a part of the increased officers of this Administration.

In the consular service there appears to have been an increase of twenty-three new consulates during the three sessions. They are in fact not new offices created, but they are offices formerly compensated from the fees which they earned. By providing for them specific salaries, as has been done, the fees revert to the Treasury, a better service is obtained for the Government, and the revenue derived from the fees more than balances the aggregate of specific salaries paid.

I find also that of this number one hundred are in the Patent Office. Gentlemen know very well how the Patent Office is run. It is not intended to be a source of revenue especially to the Government; but for the benefit of inventors and the country at large it is necessary that people having cases there should have them disposed of as rapidly and as efficiently as possible. As the country grows our progress has been faster; a large number of applications for patents have been filed there. It has been growing all the while, and, consequently, has necessitated this increase.

During this period of time the Department of Labor was established. In that Department sixty-two of this increased number are employed. That Department was established for the benefit of labor throughout the country. It was demanded by the laboring people and was made without an objection from either side of this House.

Of the number suggested by the gentleman from Illinois I find also eleven United States Senate employés. These are Republican employés provided for by the Republican Senate; and, as is well known here, of course it was consented to finally as a matter of necessity on the part of the House.

Now, as to the General Land Office. In that great office there has been an increase of thirty-five new employés. It is unnecessary for me to state here the reasons for this increase; they are many and obvious. The legislation which has occurred during this period, restoring to the public domain vast bodies of lands granted by Republican Congresses to railroad corporations, has opened the field to and increased the number of homestead settlers, thus multiplying the business of this overworked office.

Then the increase of the Navy has caused an increase of ninety of this number in that Department. That has been sufficiently answered here. We all know the number of vessels that are being built under the provisions for the increase of the Navy.

In that number of officers enumerated by the gentleman from Illinois I find forty-one employés connected with the new Library building. That was voted for by both sides of this House, and was a new enterprise not connected with the current business of the Government.

The interstate-commerce law was also passed during this period, the commission established and went into operation, and I find it has six employés.

In the State, War, and Navy building I find there was fifty-six additional places. These are mostly charwomen and watchmen. There was a great building, which cost about $10,000,000, and which was not completed until a very short time ago. It required additional watchmen and charwomen to care for and protect that vast structure.

I find also four additional employés in the service of the Civil Service Commission, where the business has been accumulating on account of the increased number of examinations and applications.

Now, as to the increase of salaries. The gentleman from Illinois [Mr. CANNON] states there have been 350 salaries increased at an annual cost of $52,000. In examining his statement I find included therein the salaries of 78 employés of the fire department of the District of Columbia which have been increased from $20 to $40 each per annum. I also find that the salaries of 7 Senate employés have been increased and are charged as a part of the 350 referred to, and 165 charwomen have had their salaries increased $60 per annum, making an aggregate of 250 salaries increased, which accounts for that number of the 350 submitted by him, leaving only 100 which I have not accounted for.

I wish to call attention to the fact that of the whole number of salaries increased 7 were for Senate employés (Republican Senate); 165 were for the poorly paid charwomen in the Departments, and 78 were for the fire department force of the District of Columbia.

I do not wish to detain the House at any length, but I will now submit a few suggestions in regard to the Post-Office Department. In 1882 there were 521 employés in that Department. In 1884—the last year of Republican administration—there were 568, and in 1888 there were 591. These figures show an increase of only 70 employés from 1882 down to 1888.

Mr. MASON. I wish the gentleman would state whether the slightness of the increase accounts for the condition of the service.

Mr. CLEMENTS. I will finish my statement and then will answer the gentleman's question. The increase in the Department from 1884 to 1888 was only 23, and in 1884 the letter rate of postage was reduced from 3 to 2 cents per half ounce. The increase of 70 employés between 1882 and 1888 is partly accounted for by the necessity of using additional buildings, requiring the employment of 7 additional laborers, 12 additional watchmen, 22 charwomen, 3 firemen, 1 engineer, and 2 elevator conductors. From these figures it will be seen that the increase included only 23 additional clerks. The percentage of increase in the clerical force was only a little over 4 per cent., while the increase in the number of post-offices was 23.8 per cent., and the increase in the postal business was 39 per cent. And, Mr. Speaker, this increase in the business has been effected notwithstanding the decrease of the letter postal rate from 3 to 2 cents per ounce, and the increase of the unit of weight from one-half to 1 ounce, and the reduction of newspaper postage from 2 cents to 1 cent per pound. Of the increase of 70 in the number of employés in the Department from 1882 to 1888, only 23 have occurred during the present Administration; and this, notwithstanding the large increase in the service, shown by the figures I have already given, and the necessity of using additional buildings.

Now as to the question suggested by the gentleman from Illinois [Mr. MASON] a moment ago, it is really unnecessary for me to answer it, because the business men of this whole country know how greatly the postal service has increased, and it is not true, as is alleged in a general way by partisans upon this floor, that the service has been inefficient under this Administration. Gentlemen can make that statement in general terms and in a partisan manner here, but they can not substantiate it. The business men of the country will not testify that the charge is true. The business of the Post-Office Department has been greatly enlarged along with the business of the country, and it has been managed efficiently and frugally. I have here a statement of the increased expenditures and the increased revenues of the Department. I will not take time to read it in full now, but will incorporate it in my remarks. I want to call attention to one very significant portion of it, which shows the cost of every dollar of revenue from this source during the different years from 1883 to 1888. In 1883 the cost was $1.04, in 1884 it was $1.08, in 1885 it was $1.17; in 1886, the first fiscal year of a Democratic administration, it was $1.16; in 1887 it was $1.08, in 1888 it was $1.03. It will be seen, therefore, that the last year makes the best showing of any year from 1883 down to the present time.

Mr. DINGLEY. What do I understand that statement to be?

Mr. CLEMENTS. It is a statement showing the cost of every dollar of revenue from the Post-Office Department, and it illustrates the industry, the honesty, and the rigid economy with which that Department has been conducted under this Administration. And as I have

already said the decrease in the cost of collecting the revenue from this source has not in any way impaired the efficiency of the service.

*Decrease.

Mr. VANDEVER. Mr. Speaker, I understand the gentleman from Georgia [Mr. CLEMENTS] to have stated emphatically that the efficiency of the postal service has been materially increased of late and under the present Administration. Now, I can speak with confidence on this question in regard to the part of the country which I represent. At the commencement of this session of Congress I called the attention of this House to the suffering condition of the postal service in Southern California; and I stated then a fact which has never been contradicted—that on account of the inefficiency of the service or inadequate provision for it the mails had piled up in certain offices in Southern California, and especially in San Diego, to such an extent that when there was a change made in the office of postmaster at that place the new incumbent found the office encumbered with a lot of mails which had never been handled or distributed, and in order to get rid of them he was obliged to load them up on wagons and have them hauled down and dumped into San Diego Harbor.

That is a fact which can not be controverted or denied; and although there may have been an increase of appropriation for the postal service, and may have been something like a general increase in its efficiency, I can say that the beneficial effects of such increase have never reached our part of the country; and I assert that if we had here the evidence of the Post-Office Department it would show clearly and unequivocally that petitions are being received and piled up in the Department claiming relief that is but tardily afforded, if at all.

There may be no intention on the part of the Post-Office Department to withhold proper facilities from our part of the country; but I affirm that with reference to us the credit for economy which the Department claims is at the expense of the public convenience. Let me refer to one county of my district to show the growth of population and the increased necessity for postal facilities. In Los Angeles County two years ago the registered vote was a little over 17,000; the registration for this year has already reached 28,000. The increase is in about the same proportion in other counties of Southern California. Not a city or town of any pretensions in that section but is suffering for greater mail and postal service.

Now, that is a fair sample (though it may appear a little exaggerated)

of the general growth of population, the development of business, and the increase of resources in that part of the country. The service of the Post-Office Department has not kept pace with this increase and growth. We have not been able to impress upon the Post-Office Department the necessity for increased postal facilities, and the public there are suffering in this respect. They are crying aloud continually, and crying in vain, to the Post-Office Department for a service which shall be adequate to the public wants.

Mr. Speaker, the pertinency of the observations of the gentleman from Georgia [Mr. CLEMENTS] to the remarks of my colleague [Mr. MCKENNA] on this Chinese clause of the deficiency bill is not very apparent.

Mr. CLEMENTS. I did not rise for the purpose of replying to that gentleman. I so stated at the beginning of my remarks.

Mr. VANDEVER. Well, as I am on the floor and have some ideas in regard to the Chinese question, I propose to say a few words on that topic. The message of the President of the United States to this House approving the Chinese restriction act seemed to me in the nature of an apology for that act of approval on his part—not an apology to this House, but evidently an apology to China; and in order to make the act which he approved acceptable in some degree to the Chinese Government, the President recommended in his apology that there be an appropriation of $276,000 from the public Treasury as a sort of sop to the Chinese Government in order to make the bill go down. And we are now asked in the report of the conference committee on this deficiency bill to approve that apology of the President to the Chinese Government for signing a bill passed by the Congress of the United States; and that, too, after China had rejected a treaty with this Government that proffered indemnity for alleged depredations committed upon Chinese subjects residing in this country.

Mr. RYAN. A plaster for the bruise.

Mr. VANDEVER. Yes, sir. Now, I can not see that this House is called upon to approve that clause of the deficiency bill; and I agree entirely with every expression which has been made by my colleague. I think this proposed appropriation ought to be rejected. We owe it to ourselves, we owe it to the people we represent and to the country at large, that the official acts of the President of the United States should not be accompanied with apologies to foreign governments, and that a money consideration should not be tendered to such a government to make our Congressional action acceptable.

Mr. BURNES. Mr. Speaker, our relations with China, as is known to the public, are somewhat delicate, if not strained. It has been stated in certain quarters that there were outside influences operating to prevent the maintenance of such relations as, I trust, we seek to preserve with every nation on the face of the earth. Be that as it may, the State Department seems to have been firmly of the opinion that this money ought to be appropriated, not only for the reason suggested by the distinguished gentleman from California [Mr. MCKENNA], but as evidence of our willingness to pay for damages perpetrated upon citizens of a foreign country. Of course we want to pay our own citizens whatever is due them, but we can not do so in a moment nor in this bill. Let each claim stand on its own merits and bide its own time. That we can not now consider their claims seems not a sufficient reason why we should withhold payment to some one else of what seems to be a fair and reasonable obligation on the part of the Government toward citizens of a foreign government for injuries suffered at the hands of certain parties in some of the Territories of the United States. The amount of damage has been estimated at the sum proposed to be appropriated in this Senate amendment; and it is but reasonable and fair that the damage thus perpetrated should be recognized and paid for, even if not strictly required by the law of nations. We feel that there is some sort of law at least to justify this payment, and if nowhere else, it is recognized in the hearts of mankind.

All I desire to say in justice to the House committee is that the communication with regard to this matter was with the conferees on the part of the Senate, or with the Senate, and the amendment was urged on the conferees of the House by our brethren of the Senate. It was an amendment which met the approbation of the Senate. It was not only urged by members of the Senate conference, but by others distinguished in the councils of the nation at the other end of the Capitol.

I will say to my friend from California it was agreed upon and perhaps put upon the bill by the Senate before the reception of the message of the President of the United States. We were in conference for a number of days.

Mr. MCKENNA. Is not that a reason for not continuing it, that it was put on the bill upon the supposition the Chinese treaty would be ratified?

Mr. BURNES. I beg your pardon, it was put on after the treaty was known not to have been ratified. If I am wrong in that, I will say we had a conference after it was known the Chinese Government had refused to ratify the treaty, and the Senate conferees insisted on it before the reception of the President's message. The House conferees were indisposed to yield—I was, for one. When the message came it was urged as a reason why the action supported by the Senate conferees should be yielded to on the part of the House conferees. Under the circumstances, as no one mind can see the whole of this proposition, and looking at it as a whole, a compromise seems wise, for our relations with foreign countries—possibly peaceable relations—may be in some sense involved. We will do well to look at it from every point of view.

My friend has viewed it from a legislative standpoint, which may be satisfactory to him, but when we view it as a whole there are other considerations which should influence our action. It has met the approval of a co-ordinate branch of the legislative department of this Government, and the one that has to do with ratification of treaties, and the approbation of the executive department also. Because some of us can not see the wisdom of the tender of this payment now, is scarcely a sufficient reason for rejecting this conference report. Something is due to the judgment of others who have had to do, closely, with the whole subject. It is not necessary to argue in favor of a blind submission to the judgment of others, and I would not do so in ordinary matters, but this involves matters and considerations with which we have not had official connection, and concerning which the President and the Secretary of State, from other than a legislative standpoint, and the Senate, which has given it careful consideration, unite in warmly commending this amendment to us. It can do no harm, at least, to agree to the amendment. The money will not be paid to the Chinese Government until after the State Department has fully reconsidered the matter with reference to some further negotiation and arrangement which may be beneficial to the country.

Mr. VANDEVER. What specific claims of the Chinese Government were made the basis of your action in fixing that amount?

Mr. BURNES. It is intended to discharge the obligations of this Government to China on account of damages or injuries inflicted by our citizens on citizens of that country.

Mr. MCKENNA. Were they ascertained damages?

Mr. BURNES. I understand they were ascertained. They were sufficiently ascertained at least to enable the Secretary of State to incorporate this amount in the treaty with China which was rejected.

Mr. VANDEVER. It should be investigated by a committee of the House and not given directly without some such action on our part.

Mr. BURNES. We can not possibly investigate every item by the action of a committee of this House, but this having been investigated already by the Secretary of State to the extent of enabling him to fix this amount in the recent treaty, I do not see that Congressional investigation by a committee could do any good. No man can fix exactly what would be adequate compensation to the survivors of a family whose head, or other member was slain, maimed, or injured. The mind is incapable of grasping such elements of estimation or figures. But as this amount has been ascertained by the Department of State, and so far recognized as to have been put into the treaty, and be urged by the President and the Senate, I think we had better accept it.

Mr. DINGLEY. Mr. Speaker, in reply to some statements recently made in this House by the gentleman from Illinois [Mr. CANNON], it seems to me that my friend from Georgia [Mr. CLEMENTS] as well as the gentleman from Texas [Mr. SAYERS], who spoke the other day on the same subject, and the gentleman from Missouri [Mr. BURNES], have entirely lost sight of the real point which was made by him in his argument. If I understood the gentleman from Illinois aright in the statement made in this House a few weeks ago, in which he alleged that the appropriations had been largely increased under the present Administration, that the number of officials had been enlarged, and that the amounts paid in salaries had been increased over what they had been under a Republican administration, the gentleman from Illinois did not intend to make the allegation that these increases had been unnecessarily and extravagantly made, but he intended in calling attention to them simply to remind gentlemen on the other side of the House that in 1884, pending the Presidential election, they had charged throughout this country and in this House, as gentlemen will well remember, that the Republican party and the Republican administration had largely, unnecessarily, and extravagantly increased the appropriations and the number of officials, as well as their salaries, and that if the country would only give to them (the Democratic party) the control of the reins of Government, then they would show to the people of the country a large reduction of the appropriations and a large reduction of the number of officials and the amount of the salaries. The gentleman from Illinois simply called attention to the fact that these promises under which our friends on the other side came into possession of the Government in 1884, entering upon the actual control of it in 1885, had not been redeemed in any respect.

I take it that that was the only point the gentleman from Illinois had in mind in presenting the statistics which he did; and the very fact that it required the gentleman from Texas, the gentleman from Missouri, and the gentleman from Georgia to undertake to explain why all of these additions to the appropriations had been made, how the number of officials had been increased and how the salaries had been multiplied; I say, the fact that it was necessary to show that the business of the country had increased and had rendered necessary a large increase in official force and emoluments, is sufficient also as an explanation of all increases of appropriations under prior administrations. I take it for granted that not only under prior administrations, but under this present Administration the expenditures of the Government on the

whole have been brought within the proper necessities of the Government, having regard in their increases to the increased business of the country.

But I wish my friends on the other side of the House to bear in mind that when in 1884 in this House and throughout the country they were endeavoring to arouse the indignation of the people of this land against the Republican party and against Republican administrations simply because there had been slight increases, and when they promised to the people that if they should be put into power there would be reductions on appropriations, reductions of officials, and reductions of salary, that really they came into power under false pretenses.

Now, it seems to me that in all matters of this kind it is the desire of whatever party may be in power in this country to endeavor to carry on the administration of the Government within the limits of appropriate economy, and if this example which has been set before us of unredeemed promises of our friends in 1884 shall simply show them in the future that all such promises that may be made during political campaigns, like the promises they made themselves in 1884, are simply for political effect, and that they really had no intention at the time to redeem them, it will have a good influence upon the country. But it ought to be an indication to the masses of the people that their promises were all made for political effect.

I remember, sir, in 1884 one of the constant charges which was being made throughout the country was that the Republican administration had gathered into the Treasury a large and unnecessary surplus. I remember a gentleman, whom I heard upon the stump, declare that this surplus was some $300,000,000 of idle money, and thousands of voters were led to believe that there was truth in the statement, while the promise was held out to them that if there should be a change of administration then the idle surplus would be immediately used in the redemption of the interest-bearing debt of the country paying it off. What was the fact? When the present Administration came into power on the 4th day of March, 1885, it found that there was only $8,000,000 of surplus in the Treasury coming over from the preceding administration of Mr. Arthur, without taking into account the hundred millions of greenback redemption fund, or taking into account the money which had been provided to meet the obligation of the public debt at maturity.

Excluding these there was only eight millions of surplus, as shown by the subsequent accounts of the Treasury, at a time when it was stated that this immense sum of $300,000,000 was locked up in the vaults of the Treasury and while that statement was being used for campaign purposes. And yet, Mr. Speaker, there has not been a single hour since the 4th day of March, 1885, up to the present moment, when the surplus in the Treasury has not been far more than when the Republican administration gave up the control of the Government. The accounts and statements which have been rendered by the Secretary of the Treasury since the 4th day of March, 1885, show that all of the charges made in the campaign and preceding the Presidential election of 1884 were absolutely without foundation.

Mr. TURNER, of Georgia. But the gentleman from Maine ignores the fact that the condition of our finances was very different during this Administration from what it was before.

Mr. DINGLEY. I was replying——

Mr. TURNER, of Georgia. Because under the administration of the gentleman's party all the bonds outstanding and redeemable had not been paid, and for some months past we have been unable to redeem any bonds except at a premium; and it was on account of that condition that this surplus accumulated.

Mr. DINGLEY. But my friend forgets that on the 4th of March, 1885, when this Administration came into power, there were one hundred and forty-six millions of 3 percents subject to call at the option of the Government, and instead of calling in, canceling, and paying off these 3 percents, the present Administration proceeded to increase the surplus in the Treasury. The actual condition, the gentleman will ascertain on examination of the facts, shows that they increased that surplus of only $8,000,000 on the 4th of March, 1885, until, in October, it was over $66,000,000, without buying a single 3 per cent. bond.

Mr. SOWDEN. Did not the present Administration call in every one of the 3 per cent. bonds as rapidly as it could?

Mr. DINGLEY. Not at all. On the 4th of March, 1885——

Mr. SOWDEN. When were the last 3 percents redeemed or called in?

Mr. DINGLEY. Not until the subsequent January. On the 4th of March, 1885, there were one hundred and forty-six million in 3 per cent. bonds subject to call, and yet it was not until October in that year that a single one of these 3 per cent. bonds were called in, and they could have been called in through the summer and so much interest saved. I am not at this time complaining of this. But I complain that everywhere it was proclaimed on the stump in 1884 by the gentlemen who represent his party, and perhaps by the gentleman himself, that the Republican party was keeping in the Treasury hundreds of millions—$300,000,000—idle.

Mr. MCKENNA. Four hundred million dollars.

Mr. DINGLEY. And yet, as a matter of fact, from the 4th of March, 1885, until October, 1885, there was nothing even approximating the idle money in the Treasury that was charged.

Mr. MCMILLIN. Will my friend yield to me for a moment?

Mr. DINGLEY. Certainly.

Mr. MCMILLIN. Does he not know that when this Administration came in, as a partial explanation of this state of affairs, that the outgoing Secretary of the Treasury had said that gold and silver could not be kept together, and that a financial panic would come in spite of everything that could be done, and there would be a money stringency in less than ten months after the Administration came into power?

Mr. DINGLEY. I am aware that ex-Secretary McCulloch made a statement of that kind, and that statement was derided all over the country, and that gentlemen said there was no sufficient ground for this condition of affairs.

Mr. MCMILLIN. The gentleman knows that there was a very general apprehension all over the country, and in the campaign at which the present President was elected it was predicted that panic and ruin would follow his administration.

Mr. DINGLEY. Mr. Speaker, I want to say in reference to that matter that there was nothing to have prevented the present Administration from paying at least $10,000,000 from the 4th of March, 1885, until October, 1885; but this money was allowed to accumulate unnecessarily in the Treasury until October.

Mr. MCMILLIN. But the gentleman knows that the last one of these 3 percents have been redeemed—every one.

Mr. PETERS. Not until the President was forced to do it.

Mr. SOWDEN. I would like to ask the gentleman from Maine a question.

Mr. DINGLEY. I am ready to hear you.

Mr. SOWDEN. As I understand the gentleman, he stated to the House that when the present Administration came into power, on the 4th of March, 1885, it found a surplus of but $8,000,000 on hand and in the Treasury.

Mr. DINGLEY. A surplus of $8,000,000 over and above the matured obligations of the Government, and $100,000,000 for the redemption of the currency.

Mr. SOWDEN. This fund could not be applied to the redemption of the $146,000,000 3 per cent. bonds.

Mr. DINGLEY. But the amount was constantly accumulating from that time when the Republicans went out of power; and I was saying that the surplus had been constantly used by the Republican administration for the purpose of calling in the 3 per cent. bonds until that party did go out of power. But when another administration came in, notwithstanding they came in under the charge that this amount had been needlessly accumulating in the Treasury under the Republican party, yet they proceeded to accumulate more, when their Republican predecessors had been paying the 3 per cent. bonds off as rapidly as they could.

Mr. MCMILLIN. Oh, not at all.

Mr. PETERS. And they had to get the Morrison resolution passed through the House to compel the Secretary of the Treasury to go on with the payment.

Mr. SOWDEN. But you contend that when the present Administration came into power there was only $8,000,000 surplus in the Treasury.

Mr. DINGLEY. That was eight millions that was left after the outgoing administration had been using about ten millions per month in paying off the 3 per cent. bonds. But the revenue was accumulating at the rate of nearly ten millions per month from that time on, and instead of using that ten millions month by month to call in the 3 per cent. bonds, the present Administration allowed the surplus to accumulate at the rate of about ten millions a month, until in October, 1885, it had reached the amount of sixty-six millions.

Mr. TURNER, of Georgia. Does not the gentleman know that the Morrison resolution did not relate to the 3 per cent. bonds?

Mr. PETERS. It related to the surplus, though.

Mr. TURNER, of Georgia. Now, I want to call the attention of the gentleman from Maine [Mr. DINGLEY] (who is always courteous and whose courtesy I do not wish to trespass upon unwarrantably) to the fact that when the present Administration came into power the outstanding bonds of the Government redeemable at the option of the Administration amounted to $196,000,000, and to the further fact that every dollar of those bonds was redeemed by the Administration up to the 1st of August of last year, so that when Congress met there were no bonds at all outstanding subject to the call of the Government, and the only way in which the surplus accumulating in the Treasury could be disposed of was by going into the market and buying those bonds at the enormous premium of which the gentleman is aware.

Mr. DINGLEY. Let me repeat what I have already said. On the 4th of March, 1885, when the present Administration came into power, the surplus revenue had been used by the Republican administration, which went out at that date, in calling in and paying off the 3 per cent. bonds, so that there were but eight millions of surplus revenue—idle money, so called—in the Treasury. Now, I say that instead of using the surplus revenue, as it had been previously used by the Republican

administration, to call in and pay off the 3 per cent. bonds, this present Administration permitted the revenue to accumulate at the rate of about ten millions per month in the time between the 4th of March, 1885, and October, 1885, so that in the latter month the amount of idle money in the Treasury had reached some $66,000,000.

Now, observe my point. I say there was no sufficient reason for refusing to use that idle money to call in and pay off the 3 per cent. bonds during that period, and especially no reason for such action by a Democratic administration, in view of the fact that the Democratic leaders had appeared upon the platform and had risen in this House during the pendency of the Presidential election of 1884 and had charged upon the Republicans that they had not used the surplus in paying off the debt as rapidly as they ought to have done, but had permitted an accumulation of at least three hundred millions of idle money in the Treasury, although as a matter of fact, on the 4th of March, 1885, the amount was only $8,000,000.

Mr. MILLIKEN. Mr. Hendricks in his campaign speeches put the "surplus" at four hundred millions.

Mr. DINGLEY. And, gentlemen, in order to make a show of justification for your statements as to the enormous accumulation in the Treasury you had to include the one hundred millions of greenback redemption, you had to include gold and silver against which there were outstanding certificates, you had to include money which had been set aside to meet bonds and to pay interest which had matured, money which was necessary to meet the constantly maturing obligations of the Government. Now, I am not so much complaining of what was done during the period I have mentioned, as I am calling attention to the fact that the very gentlemen who, during the campaign of 1884, had charged upon the Republicans that they were holding in the Treasury a vast amount of idle money, and who were promising that if they should come into power they would use that idle money in paying off the debt, when they did come into power not only did not increase the payments upon the debt but stopped them entirely for six months and allowed an extra accumulation of $58,000,000 of idle money between the 4th of March, 1885, and October of the same year. I am calling attention to this, and also to the fact that by their own admission, appropriations have been increased under the present Administration, officials have been increased under the present Administration, and salaries have been increased under the present Administration.

I do not say unnecessarily increased, and neither did the gentleman from Illinois [Mr. CANNON]. But, nevertheless, gentlemen, you admit that they have been increased; increased, as you say, no doubt properly, because the business of the country has increased; but I am calling attention to the fact that what you said in 1884 that you would do if you should come into power you have not done, and that you are confessing, by the position which you take now, that your charges against the Republicans in 1884 had no sort of foundation. [Applause on the Republican side.]

Mr. MCMILLIN. Will the gentleman permit a question?

Mr. DINGLEY. Yes, sir.

Mr. MCMILLIN. You have contrasted Democratic action with Republican action as to the public debt. Now, is it not a fact that a Democratic House passed a bill for the refunding of that debt, reducing the interest to 3 per cent., a reduction which would have saved on the amount of outstanding bonds about $16,000,000, and did not President Hayes veto that bill, and, on account of that veto, did not the people have to pay millions of money in interest before the bonds were refunded?

Mr. DINGLEY. The gentleman now is going back many years.

Mr. MCMILLIN. I go back to show what was done with reference to this same debt. You have been talking about the action of the two parties with regard to the debt, and I want the whole of the facts to go before the country, and I say that the people had to pay from ten to sixteen million dollars additional, in interest, on account of that veto by a Republican President.

Mr. DINGLEY. The gentleman has gone back to 1877 or 1878 for the purpose of finding an excuse for what occurred in 1885. Now, I wish to call the gentleman's attention to the fact that under the bill introduced by Senator Windom the very bonds of which he has spoken were subsequently refunded at 3 per cent. interest, under conditions far more favorable to the Government than those which were proposed in the bill vetoed by President Hayes.

Mr. MCMILLIN. No, sir. President Garfield's administration saw that the action of the Hayes administration would be their ruin, and they got remission down to 3½ per cent., and the Democratic House forced the rate down to 3 per cent.

Mr. DINGLEY. Not at all; but——

Mr. MCMILLIN. But millions of interest had been paid out in the mean time.

Mr. DINGLEY. Having the floor, Mr. Speaker, I think I shall endeavor to occupy half the time myself.

Mr. MCMILLIN. I beg the gentleman's pardon. I interrupted him with his permission.

Mr. DINGLEY. I was entirely willing to yield for a question, but I am not willing to yield for a speech.

Mr. SOWDEN. Will the gentleman allow me to ask him another question?

Mr. DINGLEY. Yes, sir.

Mr. SOWDEN. I would like to know whether the gentleman's lamentations about the charges which he alleges were made against his party prior to the last Presidential election is not the result of the impression which those charges made upon the public mind and the success with which they met before the people in contributing to the election of the present President of the United States?

Mr. MILLIKEN. The gentleman acknowledges, then, that he elected his President under false pretenses?

Mr. SOWDEN. Not at all.

Mr. DINGLEY. What I am calling attention to is that by what has been said here to-day it is confessed that all of the charges that were made against the Republican party and the Republican administration in the campaign of 1884, by means of which, as the gentleman from Pennsylvania [Mr. SOWDEN] well says, the people were deceived into the election of the Democratic candidate, were without foundation. That is what I am calling the attention of the House and of the country to at this time. You admit, I say, that there was no foundation for your charges, because, instead of reducing the appropriations, as you said you would if you should get into power, alleging as you did that the Republicans had been extravagant and profligate in their expenditures, instead of reducing the appropriations as you promised, you have increased them. You say, very properly, I think, that you have increased them because the country has grown; but did not the country grow during the period of the Republican administrations as well as since? Why could you not have been honest enough in the campaign of 1884 to have owned up that there had been no profligate expenditures, and that the increase of appropriations which had been made had resulted simply from the increased business of the country. Why did you not admit that explanation of the increase under the Republican administrations, just as you offer it now in explanation of the increases which you have made yourselves?

Now, your Administration has come into power on the charge that the Republicans had been maintaining unnecessary officials. I heard the charge made on dozens of stumps that there were twice as many officials as ought to be maintained, and that our party had been using them for political work; and it was promised that if you should come into power you would reduce these officials and these salaries. And now, by your confession here to-day you have not only not reduced the number of officials, but have increased them and have increased salaries. And you give the very appropriate excuse that the business of the country has increased; that it was necessary to have the utmost efficiency possible. I accept the excuse, but call attention to the fact that in giving this excuse you convict yourselves of having deluded and deceived the people in 1884, and induced them to elect your candidate for the Presidency in the belief that he would do something which now you confess he has not done, ought not to have done, and could not have done.

Mr. SOWDEN. One word more. Does not the gentleman from Maine know that his party to-day through their newspapers and public speakers are parading before the country these very facts, and are claiming for electioneering purposes that under this Administration the appropriations have been increased some $90,000,000; and is not this done for the purpose of imposing upon the people——

Mr. DINGLEY. In other words, the gentleman means to say that we are trying to do what his party did.

Mr. SOWDEN. Is not this done for the purpose of inducing the people to vote for the Republican Presidential ticket upon these allegations that the present Administration has been more profligate in the expenditure of public moneys than even its predecessor? Does not the gentleman know further that in reply to the statements of the gentleman from Illinois [Mr. CANNON] the gentleman from Texas [Mr. SAYERS] has put forth a full and unanswerable explanation of every charge, accounting satisfactorily for every item of increase, and which increase included some $30,000,000 for additional pensions in excess of the amount granted by the administration immediately preceding the present?

Mr. DINGLEY. The amount is stated a large number of millions too high.

Mr. SOWDEN. Does not the gentleman know——

Mr. DINGLEY. When the gentleman gets through his speech I will go on.

Mr. SOWDEN. Has not the gentleman himself used this very argument in a recent speech in the State of Pennsylvania—the argument that this Administration has been far more extravagant than the preceding one——

Mr. DINGLEY. I have not used that argument at all in that form.

Mr. SOWDEN. And has the gentleman been frank enough to give, in explanation of the increased appropriations, the real reasons for it, namely, the increased allowance for pensions, the natural growth of the country, and the enlargement of the public business?

Mr. DINGLEY. I wish to say to the gentleman from Pennsylvania that the only use I have made personally in my arguments of this increase of appropriations and officials and salaries has been in precisely

the line I have already indicated, simply showing that the pretense under which the Democratic party came into power in 1884 is now confessed to have been without foundation; that officials and appropriations and salaries have been increased as rapidly under the present Administration, not to say more rapidly, than under previous administrations.

Representatives of the Democratic party have claimed—and it was not for me to say the claim was not just—that this increase was because of the increase in the business of the country. But I have called attention to the fact that by this confession they admit that when, in 1884, they charged that Republican administrations had needlessly increased appropriations, had been making profligate expenditures, and that if the Democrats should come into power appropriations and officials and salaries should be reduced, they obtained power under a pretense which their own official conduct has not verified; for instead of reducing these expenditures they have increased them in various directions. I ask the gentleman from Pennsylvania whether that argument is not legitimate and sound?

Mr. SOWDEN. The gentleman's party makes the same charge against us to-day which he says representatives of the Democratic party made against the Republican administration in 1884.

Mr. MILLIKEN. But the difference between your statements and ours is that yours are now shown to have been untrue, while you do not deny that the statements we make are true. That is quite a wide difference.

Mr. DINGLEY. A single word further. The three responses which we have had to the statements made a few weeks ago by the gentleman from Illinois [Mr. CANNON] show that the people, in accepting as true the charges in 1884 that the Republican party had been profligate in expenditures, had increased officers and salaries unnecessarily, were deluded. You did make the people believe those charges, but now you confess that they were without foundation. In reference to all such charges which we hear from time to time on either side of the House I think it may be said, with the experience we have had, that we undervalue somewhat the intelligence of the people on matters of this kind. There was no ground in 1884 for your charges. I do not believe there is ground now to any great extent for any charges of extravagant and unnecessary appropriations and the creation of unnecessary officials; but I believe we have now the same reason and stronger reason to make such charges than you had in 1884. But I believe, as a matter of fact, such things are hardly being alluded to now by speakers on our side except for the purpose of calling attention to the fact that you deceived the people in 1884.

I believe the people of this country, without respect to party, intend to carry on the affairs of the nation as economically and as efficiently as may be under the circumstances; and although there are occasional instances of falling away from duty, and occasional instances of unwise and improper expenditure, yet I do not want the people of the country to be led into the belief each party coming into power is doing all it can to spend profligately the money of the people and to appoint officers unnecessary, and, in other words, is not to be trusted for fidelity or for common honesty in the management of the affairs of the nation.

I regretted in 1884 when you recklessly made these charges against the Republican party and made so many people believe there was some foundation for them. I regretted to see it, for to some extent it undermined the confidence of the people in the integrity of the public service, and I think there is no necessity for anything of that kind.

The two great parties of the country are divided on great lines of public policy. Let us hold the discussion in reference to the line of division, disagreeing honestly with reference to our views on this matter, discussing them candidly, and not on every occasion which may come up charging upon the other side dishonesty, want of integrity, want of fidelity. But I do not allude to any of these facts I have brought forward, to this increase of expenditure, to this increase of officials under the present Administration, or to the increase of salaries for the purpose of making any charges with respect to its efficiency and fidelity, but simply to hold a mirror up to you in order that you may see the charges you made in 1884, and upon which I believe you came into power, were without foundation and deceived the people of this country.

Mr. BURNES. I have no disposition to engage in this discussion, but I wish to express a word or two——

Mr. DINGLEY. I reserve my time.

Mr. BURNES. I wish to express a word or two of admiration for much the gentleman from Maine has said in regard to the subject under discussion, and perhaps I would be permitted to express the feeling I have that he has been exceedingly adroit. If he had alluded exclusively to the surplus and money question, to the purchase of bonds, subjects which belong to another committee of this House, and not to the subject of appropriations, I should have been entirely content to say nothing.

The gentleman from Maine [Mr. DINGLEY] has studiously avoided alluding to the real proposition on which, in my judgment, the Democratic party succeeded in the election of 1884. The Democratic party have been in power in this House, with one exception, from 1875 to this time, and it was in some sense responsible for appropriations during that period. No gentleman so far as I know has ever urged with any very great degree of prominence that the appropriations made during the Republican administrations of the Government were extraordinarily excessive or extravagant. And I submit it could scarcely do so without some degree of self-stultification. It was not, then, because of the appropriations during Republican administrations so much, if at all, but it was as to the character of the expenditures and the faithful manner in which they ought to have been disbursed, and in many instances were not.

To that subject the gentleman has made no allusion and I seek to make none. I call the attention of the House and the country to the fact, however, that in the discussion of this question we can not avoid, in justice and in fairness, contrasting the integrity of the expenditures under this Administration as against the want of it in the expenditures under the former administrations. [Applause on the Democratic side of the House.]

In saying this, sir, I only state a fact, without any partisan feeling or design. I simply call the attention of my friends on the other side, and the country, to the fact that for the last four years the money that has been expended has been expended without causing a single blush on any American cheek. Can you say as much for preceding administrations?

Whatever we can or can not say, I simply rose for the purpose of emphasizing the assertion that the people of this country turned the Republican party out of power, in my judgment, not because of the amount of money that was appropriated through Congress, but because of the waste and extravagance and want of integrity, as they believed, that existed in some departments of the administrations that preceded the present one at least. [Applause on the Democratic side.]

Mr. MILLIKEN. Mr. Speaker, it is a very easy thing for the gentleman from Missouri and for other gentlemen on that side to talk about the "waste and extravagance" under a Republican administration of this Government. But it will be a very much more difficult thing for him or for them to substantiate any such statements. It makes some material difference with political parties who the critics are. There is just this difference between your party and ours in the treatment of each other. We have treated you decently and with charity, a charity you have sorely needed. You have slandered us for political capital. It had become an old story with you. You had been crying about "corruption" against the Republican party ever since, and even before the close of the war. It was the only stock in trade your party had.

Mr. Tilden, when he came to run as a candidate for governor of the great State of New York, saw with his political sagacity that it was no use for him to attempt to accomplish a Democratic victory in that State and a Democratic victory in this country upon the old lines upon which you had been working for so many years. He saw you had gone behind in that. He saw that the people of this country would not intrust you with the reins of Government simply on the claims that you had been setting up, and that there was but one way for the Democratic party to succeed in that campaign, which was to commence an attack upon the integrity of the party in power, and to inaugurate your talk about wise reforms in Governmental administration. Well, you then took up the cry, and have been crying it ever since. You have been a good deal like the old lady who made up a story and told it and told it again, and told it so often that she began to believe it herself, and who finally was ready to swear to the truth of it anywhere, when as a matter of fact in the first beginning she did not believe a word of it herself and knew that it was false.

You know how it was in the last campaign. I happened to have a little something to do with that myself, and I have a distinct recollection of a certain distinguished member of the Democratic party who went all through the State of New York—and I know that because I followed him myself—who stated everywhere, and used it and urged it in argument against the Republican party, that there was horded up in the Treasury of the United States as a surplus $300,000,000, which was held there for corrupt purposes.

Mr. Hendricks, your candidate for Vice-President, who was perhaps a little more intense, or a better Democrat than the person to whom I refer, made the statement still more extravagant. He said that there was four hundred millions. And yet, Mr. Speaker, to show how much reliance was to be placed upon such statements as that, when your party came into power in this Government and the party of which I am a member had gone out, and the whole question of surplus was discussed, as it was discussed in this House. there was a statement made that we had left but about eight millions of surplus in the Treasury, a statement on the floor of this House to which there was no denial. It could not be denied because it was the truth. And when one gentleman who had gone through that campaign and had stated that three hundred millions of surplus was in the Treasury, kept there by the Republican party for corrupt purposes, was asked why he made the statement when, as a matter of fact, there was only eight millions, he had nothing to say.

But, sir, you went further than that. You stated that the Republican administration of the Government was rotten with corruption; and one distinguished Democrat, when it was proposed to appoint Carl

Schurz as Secretary of the Interior, said that would not do, that it was all rotten with corruption; that your party was going to put in the breaking-up plow and turn it all out to the light, and that Carl Schurz, having once been Secretary of the Interior, might be very much embarrassed to be in that position under such circumstances. But what did you do? One of your party was appointed as Secretary of the Interior, and he was a man who was honest enough to admit, as I have been credibly informed, that he never found so systematic a method as had been pursued in conducting the administration of that Department, and that everything was correct and straight. You had the vaults of the Treasury overhauled; you had the moneys counted; you found the books all right; you found the money all there; you found everything, down to a defalcation of 2 cents, but I understand that even that was afterwards discovered where some not very careful Democratic counter had dropped the money upon the floor, where it was afterwards discovered.

Now, I say this but to emphasize the statement of my colleague [Mr. DINGLEY]. I do not charge upon the Democratic party, as he does not charge upon it, that these increases in expenses which you have made have been unnecessary; and I say further that I believe it is demoralizing to the people of the country—I believe it is a public injury that in the political campaigns or at any other time these reckless statements should be made regarding any administration, for when the people of the country are brought to believe that their public servants and those standing as high as the President of the United States and his Cabinet are corrupt and dishonest they will find that the strongest possible excuse and inducement to be so themselves. And I would be glad if this should be the last of these indiscriminate attacks on the characters of administrations.

My friend from Missouri may iterate and reiterate his statement in regard to the corruption of Republican administrations before his party came into power; but I say again it is the old story. It not only has never been verified, but the last three and a half years of Democratic rule have proved its falsehood. All this time you have had ample opportunity for investigation, and have shown nothing crooked or wrong. The silence of your officials is the fullest and most conclusive proof that Republican rule was as clean as it was patriotic. Gentlemen will please remember in what condition the country was when you relinquished the Government. You handed it over to us in the flames of civil war. If you will remember this, and what a great crisis we had to go through, if you will also remember the demoralizing influences of a great civil war, all of which fell upon our hands, while we handed back the Government to you with the nation peaceful and prosperous—I think if you will recall these facts, and look through the history of our country during that period, you will say that we came out of a great contest and down to the present time with as clean hands and pure administration of the trust confided to us as can be found in the records of the affairs of men. [Applause on the Republican side.]

Mr. PETERS. I want to call the attention of the House to one single fact; and I do it for the purpose, if possible, of riveting the attention of the Committee on Appropriations to that fact, so that it may be taken into consideration. I do not make any complaint against the increase of the official force in any Department. I believe that the increase in some of the Departments, at least, should be greater than it is. I simply want to call attention to one Department, and that is the Department of the Commissioner of the General Land Office. There has been, as stated by the gentleman from Georgia [Mr. CLEMENTS], an increase in the clerical force of that Department; and yet what do we find?

Notwithstanding there has been an increase in the clerical force there as compared with that under the Republican administration, yet the work is getting further and further behind during the present Administration. Let me give an illustration: When a man enters a piece of land and lives upon it for a period of six months and applies to have his title completed he pays $200 to the Government, and yet he is unable to obtain evidence of his title for three years after he has paid the last dollar into the Treasury. Now, the gentleman from Georgia says that the Patent-Office is run in the interest of the inventors, and that the inventors pay the money for carrying on that office.

So is it with the Land Office. The man who enters these public lands pays the Government for them. If he enters under the homestead laws he pays the officers the fees, and yet it is years and years before he can get evidence of his title. If he takes land under the preemption or timber-culture laws, he pays to the Government $200 for 160 acres of land, and the homesteader or pre-emptor pays all these expenses, so that the Government is not out one dollar. Yet he is compelled, in the absence of any contest, in the absence of any suspicion that may be cast upon his title, to wait three years, as it is at present, before he can obtain from the Government evidence of his title. Under Republican administration I admit that the title could not issue immediately, but it could issue in a shorter time than three years.

What I want to impress on the Committee on Appropriations when the appropriations bills are considered and brought in during the short session of the Fiftieth Congress is, that the force of the Land Office should be so increased that these men who have paid their money should have evidence of their title from the Government within a reasonable time. It might at least be shown that they had paid their money into the Treasury of the Government.

[Cries of "Vote!"]

Mr. SOWDEN. I would like to ask the gentleman from Missouri [Mr. BURNES] if amendment 107, as modified by the conference report presented by him, excludes the $911.20 balance claimed by Grosvenor Lowrey, one of the special counsel in the Bell telephone cases?

Mr. BURNES. It does.

Mr. Speaker, the Senate amendment relating to the extension of certain laws over the Public Land Strip has been disagreed to, and is not in this conference report. The proposition to pay a year's salary to the widow of a gentleman who died of yellow fever is not in the report. The proposition to pay the widow of the late Chief-Justice Waite the balance of a year's salary is not in the report.

Mr. RYAN. I suppose my friend means that the Senate has receded from those amendments.

Mr. BURNES. The Senate has receded from those amendments.

In regard to the proposition concerning the establishment of an institution for the purpose of assisting in the eradication of polygamy in Utah Territory I desire to make a brief statement, more for the purpose of calling the attention of the Treasury Department to the facts than anything else. We found that matter—I may call it that appropriately—in this condition. Some $40,000 had gotten into the hands of Governor West to be expended by him at the will or wish or on the order of a corporation organized in the Territory of Utah by some good women, doubtless, who had interested themselves in the work of extinguishing polygamy. That money was there in the hands of no bonded officer, subject to be expended by private persons. It was held and liable to be expended by parties who were not under any bond to the Government of the United States. By the amendment as now agreed upon the first thing we accomplish is to get that money, the unexpended balance of the two preceding appropriations, into the hands of a bonded officer of the United States to be appointed by the Secretary of the Treasury.

On investigation it will be found that there are marked discrepancies in several financial statements that have been made to the members of the committee and possibly to the House. That is to say, in one financial statement I found the total amount received—apparently stated at $40,000; expended in temporary home, $13,500; paid for some lots in Salt Lake on which the building is to be erected, $10,500; leaving a balance of $16,000 out of $40,000. But it appears that there were $48,800 drawn out of the Treasury; and the account, instead of starting with $40,000, as it does in this financial statement of the corporation alluded to, should start with $48,800. And then the $13,500 alleged to have been expended under the direction of the corporation should be carefully considered, for the reason that the $40,000 drawn out of the Treasury were drawn as stated in this financial estimate in the month of August last, two months ago, and that $13,500 is deducted from the $40,000 instead of the $48,800, when it could not in the nature of the transaction have been expended after the date it was received.

Now, it is simply impossible for them to have spent $13,500 since August last, and there is no pretense that there has been any such amount expended. I think it will be found upon investigation that the expenditures for the first year, as reported by Governor West in his annual report to the President, were included in the $13,500, without raising the debt entry from $40,000 to $48,800. At all events it will furnish some little work for the Treasury Department, which I trust and know it will carefully perform.

The amount of appropriation asked for in the Senate amendment was $80,000. We give only $32,000.

Mr. EZRA B. TAYLOR. Mr. Speaker——

Mr. BURNES. Does the gentleman from Ohio desire to ask a question?

Mr. EZRA B. TAYLOR. I simply want to ask whether the gentleman desires to have this bill passed? If he does, I ask him to let it be passed without any more talk. [Laughter.]

Mr. BURNES. I move the previous question. [Renewed laughter.]

The question was taken on ordering the previous question, and the Speaker declared that the ayes seemed to have it.

Mr. DOUGHERTY. I ask for a division.

The House divided; and there were—ayes 34, noes 3.

Mr. DOUGHERTY. No quorum.

The SPEAKER. The point being made that no quorum has voted, the Chair will appoint to act as tellers the gentleman from Florida [Mr. DOUGHERTY] and the gentleman from Missouri [Mr. BURNES].

The House again divided; and the tellers reported—ayes 45, noes 3.

The SPEAKER. Does the gentleman from Florida insist upon the point of no quorum?

Mr. DOUGHERTY. Yes, sir.

Mr. EZRA B. TAYLOR. Mr. Speaker, if it is in order I move that the House do now adjourn.

Mr. BURNES. I hope the House will not adjourn.

The question was taken on the motion to adjourn, and it was not agreed to—ayes 7, noes 30.

Mr. HOOKER. I hope my friend from Florida [Mr. DOUGHERTY],

who I know has been very much irritated by the failure to get up for consideration certain matters pertaining to his own greatly afflicted portion of the country, will reconsider his opposition to this measure and will not call a quorum. I am sure that when he considers that this is a bill the passage of which is necessary for the public interests he will feel that opposition to it ought not to be manifested in this way. It is a bill which I believe meets the almost unanimous approbation of both sides of the House, and I hope that the gentleman, in the generosity of his nature (for I know him to be a generous man), will withdraw his opposition.

The tellers resumed their places.

Mr. BURNES (before the announcement of the final vote). Mr. Speaker, I move that the House do now adjourn.

Mr. HOOKER. Pending that motion, Mr. Speaker, I rise to a question of privilege. I desire to make a motion to reconsider a vote which was taken on yesterday in the House. During my absence a bill was called up by the chairman of the Committee on Public Lands for the creation of a new land district in the southern part of Mississippi. It was a bill which had been introduced by my colleague, Colonel STOCKDALE, who represents that portion of the State. The existing land district is located in my own city of Jackson, in the county in which I live. Some time ago, when the bill was first reported from the Committee on Public Lands, my colleague, Colonel STOCKDALE, came to me——

Mr. EZRA B. TAYLOR. Mr. Speaker——

The SPEAKER. The Chair will state to the gentleman from Mississippi [Mr. HOOKER] that a motion to reconsider the vote by which the bill was passed was made yesterday and was laid on the table; so that unanimous consent will be required to reopen the question.

Mr. HOOKER. I am going to ask unanimous consent to set aside the vote laying the motion to reconsider on the table, and I am offering my reasons for making that request.

The SPEAKER. But the gentleman from Ohio [Mr. EZRA B. TAYLOR] objects.

Mr. HOOKER. I hope the gentleman will not object to my making a statement.

Mr. EZRA B. TAYLOR. I do not object to the gentleman making his statement, but I object to the result.

Mr. HOOKER. Then I will make the statement, and the gentleman can object to the request if he pleases. When that bill was brought into the House with a favorable report from the Committee on Public Lands my colleague, Colonel STOCKDALE, sought me at my seat and said that he had had several opportunities to call up the bill and have it passed, but that, in deference to my known opposition to it, he would not call it up in my absence, and therefore had not availed himself of these opportunities. On yesterday I was in the city and in the House during the greater part of the day, but at the time this bill was called up I was not in the House. I had been called out on a matter of business which detained me thirty or forty minutes, and relying upon the statement previously made to me by my colleague I did not suppose it was necessary for me to be here to watch the bill; on the contrary, I expected that I would be notified when it was to be called up in order that I might have an opportunity to state my objections to it. My colleague did not say to me directly that he would not call up the bill at any other time in my absence, but the implication in what he said was very strong that he would not call it up without giving me notice.

I think it important to me that I should make this statement. I therefore ask unanimous consent that the order by which the motion to reconsider was laid on the table be set aside. In this way the bill presented by the committee will stand as passed by the House, with the motion to reconsider pending. This is all I ask; and I appeal to the usual fair-mindedness and justice of my colleague not to interpose any objection to this request, which I suppose will meet no objection from any other quarter.

The SPEAKER. The Chair understands the gentleman from Ohio to object.

Mr. HOOKER. I understand him now to withdraw the objection.

Mr. EZRA B. TAYLOR. I withdraw my objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. STOCKDALE. I desire to say, in justice to myself, that if I used any expression which led my colleague to think that I would not call this bill up in the House, such a thing was entirely foreign to my intention. I was about to call the bill up by unanimous consent, and asked recognition for that purpose; but in conversation with my colleague he told me that he would object. I did not call it up and lost for the time my privilege of recognition. Afterward, when I again had opportunity to be recognized, and the Speaker told me I was at the head of the list, I did not ask unanimous consent to bring the bill up, because my colleague was not in the House.

But I never intended to say—and I do not know how my colleague could have so understood me—that I would not try to have the bill passed in the House regularly under the rules. I knew that my colleague was in the House when the gentleman from Arkansas [Mr. MCRAE] commenced to call up bills on the Calendar of the Public Lands Committee—a fact which certainly was ample public notice that any bill on the Calendar of that committee might be called up. I was asked by the gentleman from Arkansas whether I desired the bill called up, and I said yes.

Now, there can be no object in setting aside what has been done except simply to raise objection on the ground of "no quorum." The land office in question is located in the only part of our State that has any public lands. To transact business in reference to those lands the people there have now to go a long distance to the land office in the city of Jackson. This bill does not interfere with that land office, and there can be no object in opposing it except to compel my people to journey to the city of Jackson for the benefit of a couple of officials there.

Mr. HOOKER. I wish to say only one word more. Whatever may have been the intention of my colleague, he certainly said he had not called the bill up because he knew I would object to it if called up.

Mr. STOCKDALE. By unanimous consent, yes.

Mr. HOOKER. The fair inference therefore was that I should have notice when the bill was brought up for passage. While I was in the city yesterday, and may have been in the House in the early part of the day, I was not present at the time this bill was under consideration. All I ask now is that the order of the House laying on the table the motion to reconsider shall be set aside, and that the bill shall be regarded simply as passed. Then, if I can not give any good reason in favor of the reconsideration of that vote, the order of the House passing the bill will stand.

The SPEAKER. The gentleman from Mississippi [Mr. STOCKDALE] objects to the request of his colleague.

Mr. HOOKER. Do I understand my colleague to object?

Mr. STOCKDALE. Yes, sir.

The SPEAKER. The question is on the motion to adjourn.

The motion was agreed to; and accordingly (at 3 o'clock and 55 minutes p. m.) the House adjourned.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. BACON: A bill (H. R. 11582) granting a pension to Patrick Callahan—to the Committee on Invalid Pensions.

By Mr. E. B. TAYLOR: A bill (H. R. 11583) for the relief of George Farnwalt—to the Committee on Military Affairs.

SENATE.

WEDNESDAY, *October* 10, 1888.

Prayer by Rev. WILLIAM E. PARSON, of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

MISSOURI RIVER BRIDGE AT OMAHA.

Mr. ALLISON. I present the memorial of T. J. Power, of Helena, Mont., alleging an obstruction to the navigation of the Missouri River caused by the construction of the piers of the Union Pacific Railway Company between Council Bluffs and Omaha. I ask that the memorial be referred to the Committee on the Improvement of the Mississippi River, and in connection with it I desire to offer a resolution for present consideration.

The PRESIDENT *pro tempore*. The memorial will be referred to the Committee on the Improvement of the Mississippi River and Tributaries. The resolution will be read.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That the Committee on the Improvement of the Mississippi River and Tributaries be, and it is hereby, directed to inquire whether the construction of the Union Pacific Railroad Company bridge over the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr., authorized by Congress, is in conformity with law, or if the piers of the present bridge or the piers of an old bridge constructed by the said company, are an obstruction to the free navigation of the river, and if so, to report a bill for the remedy of the same.

REPORTS OF COMMITTEES.

Mr. WILSON, of Maryland, from the Committee on Claims, to whom was referred the bill (S. 1712) for the relief of G. M. Woodruff, reported it without amendment, and submitted a report thereon.

Mr. CHACE, from the Committee on the District of Columbia, to whom was referred the bill (H. R. 9418) to incorporate the Washington and Western Maryland Railroad Company, reported it with amendments.

Mr. HAWLEY, from the Committee on Printing, to whom was referred the bill (H. R. 1860) to amend section 683 of the Revised Statutes, reported it with an amendment, and submitted a report thereon.

Mr. FAULKNER, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 10032) granting a pension to Milton Wallen;

A bill (H. R. 10253) granting a pension to Emmanuel P. Steed;

A bill (H. R. 3681) granting a pension to Carter W. Tiller; and

A bill (H. R. 9176) granting a pension to Charlotte Taylor.

Mr. JONES, of Arkansas, from the Committee on Claims, to whom was referred the bill (S. 3619) for the relief of Alice E. Robertson, reported it without amendment, and submitted a report thereon.

Mr. SPOONER, from the Committee on Claims, to whom was referred the bill (H. R. 9464) for the relief of Hudson G. Lamkin, reported it without amendment, and submitted a report thereon.

CONDITION OF THE CIVIL SERVICE.

Mr. HALE. By direction of the Select Committee to Examine into the Condition of the Civil Service I present the report of the committee, together with the testimony taken by it.

The PRESIDENT *pro tempore*. What disposition does the Senator desire to have made of the report?

Mr. HALE. I should like an order to have the usual number of copies printed of the report and the testimony.

The PRESIDENT *pro tempore*. It will be so ordered if there be no objection.

Mr. HALE. I wish to say, as the Senator from New Jersey [Mr. BLODGETT] is not present, that he desired me, if he was not present, to ask in behalf of the minority that leave might be given to file any report they may desire to make upon the subject at any time during the session. I ask that that leave may be granted.

The PRESIDENT *pro tempore*. The Chair hears no objection, and the leave is granted. The report is not accompanied by a bill or resolution?

Mr. HALE. The report is not yet accompanied by a bill. The committee will further sit and further investigate.

REVENUE-BILL TESTIMONY.

Mr. MANDERSON. I am directed by the Committee on Printing to report favorably a Senate resolution, and I ask for its present consideration.

The PRESIDENT *pro tempore*. The resolution will be read.

The Secretary read the resolution submitted by Mr. ALDRICH October 9, 1888, as follows:

Resolved, That in addition to the usual number there be printed 750 copies of the testimony accompanying Senate report No. 2332 for the use of the Senate.

Mr. DAWES. What report is that?

Mr. MANDERSON. The testimony taken by the Finance Committee on the revenue bill.

The resolution was considered by unanimous consent, and agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States to allow persons who have abandoned or relinquished their homestead entries to make another entry.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President *pro tempore:*

A bill (S. 70) to provide for warehousing fruit brandy;

A bill (S. 619) granting an increase of pension to Leopold Mayer;

A bill (S. 664) for the relief of William R. Wheaton and Charles H. Chamberlain, of California;

A bill (S. 741) for the relief of William Tabb;

A bill (S. 889) granting a pension to Mary O. Hall;

A bill (S. 1089) for the relief of Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy;

A bill (S. 1219) granting a pension to David Heinbach;

A bill (S. 1614) granting a pension to Phillipe Ray;

A bill (S. 1671) for the relief of the heirs of Martin Kenofsky;

A bill (S. 1926) granting a pension to William Smith;

A bill (S. 2567) granting a pension to Nancy Polock;

A bill (S. 2593) granting a pension to Sarah E. McNamara;

A bill (S. 2742) to incorporate the Brightwood Railway Company of the District of Columbia;

A bill (S. 3018) granting an increase of pension to John N. Bovee;

A bill (S. 3030) granting a pension to Mary J. Foster;

A bill (S. 3083) restoring to the pension-roll the name of Florian Lischewsky;

A bill (S. 3175) granting a pension to Mrs. Caroline Taylor;

A bill (S. 3197) granting a pension to Abbie L. Ham;

A bill (S. 3230) granting a pension to Martha J. Cole;

A bill (S. 3241) granting a pension to Easter A. Jackson;

A bill (S. 3427) to amend section 4474 of the Revised Statutes of the United States;

A bill (H. R. 4765) for the relief of G. W. McAdam; and

A bill (H. R. 8962) for the relief of Anthony L. Woodson.

BILLS INTRODUCED.

Mr. FARWELL introduced a bill (S. 3624) for the relief of Charles D. French; which was read twice by its title, and referred to the Committee on Indian Affairs.

He also introduced a bill (S. 3625) for the relief of Michael Herr; which was read twice by its title, and referred to the Committee on Indian Affairs.

He also introduced a bill (S. 3626) for the relief of D. H. Ming; which was read twice by its title, and referred to the Committee on Indian Affairs.

WITHDRAWAL OF PAPERS.

On motion of Mr. HARRIS (for Mr. DANIEL), it was

Ordered, That Arthur Connell be allowed to withdraw his petition and papers from the files of the Senate on leaving copies of the same, there having been an adverse report.

EXPORTATION OF CATTLE THROUGH CANADA.

Mr. WILSON, of Iowa. I offer the following resolution, and ask for its present consideration:

Resolved, That the Committee on Foreign Relations be directed to inquire and report at as early a day as practicable what action can be taken to effect an arrangement with the Dominion of Canada whereby American cattle for export to England and other European countries may be transported through said Dominion of Canada, or any port or ports thereof, without being subjected to the delay imposed by the quarantine regulations now in force.

Mr. CULLOM. To what committee is the direction given?

Mr. WILSON, of Iowa. The Committee on Foreign Relations.

Mr. CULLOM. I do not know whether it belongs to that committee or not.

Mr. WILSON, of Iowa. Yes, it relates to our relations with foreign countries.

Mr. CULLOM. It relates to transportation as well. However, I do not object to the resolution.

The resolution was considered by unanimous consent, and agreed to.

Mr. WILSON, of Iowa. Inasmuch as the subject to which the resolution refers is one of growing interest, especially to the Western portion of the country, I ask that some papers which have been sent to me relating to the subject may also be referred with the resolution to the Committee on Foreign Relations.

The PRESIDENT *pro tempore*. The papers will be received and referred to the Committee on Foreign Relations, if there be no objection.

GEORGE K. OTIS.

Mr. CALL. If the morning business is over, I desire to move that the Senate proceed to the consideration of Senate bill 682.

The PRESIDENT *pro tempore*. If there is no further morning business, the Calendar under Rule VIII is in order, and——

Mr. HOAR. I move to proceed to the consideration of the bill reported from the Committee on the Judiciary yesterday.

Mr. CALL. I believe I have the floor.

Mr. HOAR. I beg pardon; I did not know that the Senator held the floor.

Mr. CALL. I was about to make a motion to proceed to the consideration of a bill.

The PRESIDENT *pro tempore*. The Chair had recognized the Senator from Florida. The Calendar under Rule VIII being in order, the title of the first bill on the Calendar will be stated.

The SECRETARY. Order of Business 1995, a bill (S. 3348) for the relief of George K. Otis.

Mr. MITCHELL. Will the Senator from Florida allow the first case on the Calendar to be passed? It is a case on which there will be no discussion, and it has been called up very frequently as the first case on the Calendar. It will only take a moment. I think there will be no objection to it.

Mr. CALL. I yield for that purpose, if the Senator desires it.

Mr. MITCHELL. I shall not insist upon it if it takes more than a moment's time.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3348) for the relief of George K. Otis. It directs the Postmaster-General to allow George K. Otis, late contractor on route 6771, New York, for the contract term from July 1, 1881, to June 30, 1885, pro rata increase of pay for any increase of service which the Postmaster-General may have required him to perform during that period, the same to be based on the number of trips actually run and distance traveled in excess of what he was required to perform on the date of the execution of his contract.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ALFRED PLEASONTON.

Mr. CALL. I move that the Senate proceed to the consideration of the bill (S. 682) authorizing the President to appoint and retire Alfred Pleasonton a major of cavalry in the Army of the United States.

The PRESIDENT *pro tempore*. The Chair is informed that a bill of the House of Representatives, identical with the Senate bill, has passed both Houses and is now in conference. Therefore it would be superfluous to pass the Senate bill.

Mr. CALL. I understand that there is some difficulty in getting the House bill which has passed the Senate considered by the conference and reported to the two Houses. I have no particular interest in the bill, but I am informed that General Pleasonton is in a condition of extreme want and suffering. He has appealed to me through his friends repeatedly, and said he had appealed to other Senators to allow the bill to be considered. It seems to be impossible to obtain a conference re-

port upon the House bill. It is for that reason, this bill standing upon the Calendar, that I have asked that it be considered by the Senate. I do not know what action the Senate can take in regard to the House bill unless it should instruct its conferees to report to the Senate.

The PRESIDENT *pro tempore*. The Senator from Pennsylvania [Mr. CAMERON] is chairman of the managers at the conference on the part of the Senate.

Mr. CAMERON. I will state that I have been endeavoring for some time to get a meeting of the Senate conferees with the conferees on the part of the House, but up to this time I have been unable to do so. As the Senate passed the bill, it retired General Pleasonton as major, while the House retired him as colonel. The Senate in all cases in putting officers upon the retired-list has declared that they should be retired with the rank which they held at the time of their resignation. General Pleasonton's friends insist upon it that he shall be retired with a higher rank. That is the difference between the two Houses. As soon as a meeting of the conferees can be brought about, I have no doubt the matter will be adjusted. Up to this time we have been unable to agree.

Mr. CALL. I suppose nothing further can be done now; but I desire to bring the matter to the attention of the chairman of the Senate conferees with the hope that there may be a report made. The bill should receive final consideration at the hands of Congress.

The PRESIDENT *pro tempore*. The Senate bill will be restored to its place on the Calendar.

ANDREW J. SMITH.

Mr. CULLOM. The Senator from Massachusetts [Mr. HOAR] yields to me to call up the bill (H. R. 2579) authorizing the President to appoint and retire Andrew J. Smith, late colonel of the Seventh United States Cavalry and a major-general of volunteers.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Military Affairs with an amendment, in line 9, before the words "in the Army of the United States," to strike out "brigadier-general" and insert "colonel of cavalry;" so as to make the bill read:

Be it enacted, etc., That the laws regulating appointments in the Army be, and they are hereby, suspended, and suspended only for the purposes of this act; and the President is hereby authorized to nominate and, by and with the advice and consent of the Senate, appoint Andrew J. Smith, late colonel of the Seventh United States Cavalry and a major-general of volunteers, a colonel of cavalry in the Army of the United States, and thereupon to place him, the said Andrew J. Smith, upon the retired-list of the Army, with the rank and grade of colonel, without regard and in addition to the number now authorized by law of said retired-list.

The amendment was agreed to.

Mr. HAMPTON. I wanted to have the House bill substituted for the Senate bill.

Mr. CULLOM. It is.

Mr. HAMPTON. I see the Senator from Illinois called up the House bill. It is all right.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

S. T. MARSHALL.

Mr. ALLISON. The Senator from Massachusetts [Mr. HOAR] kindly yields to me that I may ask the Senate to take up the bill (H. R. 2196) for the relief of S. T. Marshall. It is a bill relating to a constituent of mine, and I believe there will be no objection to it.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay $6,598.49 to S. T. Marshall, of Keokuk, Iowa, in full of all claim or demand as assignee of G. M. Marshall, in a contract made in 1850, to supply and furnish beef cattle to General Estill, purchasing and disbursing agent of the United States for the commission sent to California, in 1850, to make treaties with the Indians.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONDEMNED CANNON AND SMALL-ARMS.

Mr. CAMERON. I ask the Senate to consider at this time the bill (S. 3612) donating condemned cannon and small-arms to Naval Post No. 400, Grand Army of the Republic, Department of Pennsylvania. I will state that this bill was read on a former occasion, but was objected to by the Senator from Illinois [Mr. CULLOM], who I understand now withdraws his objection.

Mr. CULLOM. I wish to state that I was under a misapprehension when the bill was formerly read. I desire to withdraw any objection to its passage.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PREVENTION OF YELLOW FEVER.

Mr. HARRIS. I ask the Senate to proceed at this time to the consideration of the joint resolution 113, reported by me yesterday from the Committee on Epidemic Diseases. It is important, if the joint resolution is to pass at all, that it should be passed at once.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. R. 113) concerning the conference to be held in Washington, December next, to consider the best means of preventing the introduction of yellow fever and other epidemic diseases into this country.

Mr. CALL. I offer as an amendment to that joint resolution the joint resolution which was adversely reported by the Committee on Epidemic Diseases; and I ask that it be read.

Mr. HARRIS. The joint resolution is on the Calendar of itself. I think it is subject to a question of order, and I make it. It is a pending measure upon the Calendar.

The PRESIDENT *pro tempore*. The Chair understood the Senator from Florida to desire to offer as an amendment the joint resolution adversely reported.

Mr. HARRIS. So I understand, but it is offering a measure pending on the Calendar as an amendment to another measure.

The PRESIDENT *pro tempore*. The Chair did not so understand the Senator from Florida. The Chair understands the Senator from Florida to offer as an amendment the substance of the joint resolution adversely reported. It will be read as an amendment to the pending joint resolution. The Chair understands the Senator from Florida to move to strike out and insert?

Mr. CALL. I do.

Mr. HOAR. I should like to inquire of the Senator from Tennessee if the consideration of the joint resolution is likely to lead to discussion?

Mr. HARRIS. That depends altogether on the Senator from Florida, I must answer the Senator from Massachusetts.

Mr. HOAR. I was assigned the floor by the President of the Senate, and yielded for matters which I understood would require no discussion and about which there was no difference of opinion. I wish to have a bill taken up for discussion.

Mr. HARRIS. I was not aware of the fact that the Senator from Massachusetts had the floor in respect to some measure of his or I should have asked his courtesy to allow me to call up the joint resolution. If the joint resolution is to pass at all, in my opinion it is a matter of some importance that it should be passed at once so as to go to the other House. I have no desire to say a word except to have the joint resolution read, but if the Senator from Florida by proposing to debate it shall defeat its passage, I shall have done my duty in asking the Senate to consider it. Of course, I shall not trespass upon the courtesy of the Senator from Massachusetts beyond the time that his patience will allow me to do so, but will abandon my request at any moment the Senator may suggest.

Mr. HOAR. Very well.

The PRESIDENT *pro tempore*. The amendment proposed by the Senator from Florida [Mr. CALL] will be read.

The SECRETARY. It is moved to strike out all after the resolving clause and insert:

That the President of the United States call upon the Academy of Sciences to convene in the city of Washington at as early a day as practicable, and that the President shall select and request the attendance of such persons of the different schools of medicine and of such others of attainments in science and natural research who shall be distinguished for learning and eminent attainments to take evidence, examine into, and report upon all methods that shall be submitted to them for the cure, prevention, and suppression of yellow fever and other contagious or infectious disease.

SEC. 2. That the President is authorized to invite the attendance of men eminent for learning and attainments in science and natural research from foreign countries and to order a reasonable per diem compensation to them and mileage from and to the homes of all persons who shall be requested to attend and shall attend such convention, including the members of the Academy of Sciences, and the sum of $100,000, or so much thereof as shall be necessary, is hereby appropriated to pay the expenses of such convention.

SEC. 3. That the President shall appoint the time of the meeting of such convention and the length of time which it shall continue, and may adjourn it or extend the time of its continuance.

SEC. 4. That the money herein appropriated shall be paid upon the order of the President of the United States or as shall be directed by him.

Mr. CALL. Mr. President, I do not wish to interfere with the Senator from Massachusetts in the bill he wishes to bring up for consideration, but it is I think quite obvious that this is a subject of considerable importance. I am of the opinion that the joint resolution which was adversely reported contains all that is meritorious in the measure of the committee and much that is not contained in that measure, but is important for the protection of the people against this plague. The joint resolution of the committee is impotent of good and is virtually a suppression of all scientific and practical inquiry by experimental methods. It proposes that a number of persons of greater or less sanitary knowledge and opinions shall convene at their own expense and make public their several preconceived opinions already made public in the newspapers and public journals, and like the former commission adjourn.

Why the Committee on Epidemic Diseases should desire to exclude from the consideration of this subject the ablest intellect that can be found in the country, whether it is or is not upon the boards of health of the different States, or whether it is or is not in the military or naval

service, is a proposition that I think they can not vindicate. In the presence of a plague of such very great danger to the whole country as is threatened by this disease, certainly there can be no excuse with intelligent men for ignoring the best capacity that may be found to investigate and consider the subject, nor for confining the selection of this capacity for investigation to the boards of health of the several States.

That is the whole distinction. The amendment that I offer authorizes the President to convene any persons in the United States, whether they are upon boards of health or not upon boards of health, whether they are in the military or naval service or not in the military or naval service, whether in the United States or out of the United States, whose researches and reputation entitle them to consideration, to consider this subject. It provides the only method by which it can be done, the means for compensating them for their service, and providing for their coming to and their going from the place of deliberation.

That is the whole question, and upon that question I wish to have a vote of the Senate. The Committee on Epidemic Diseases say let us take the men not selected for this purpose but who chance to be members of the State boards of health, conspicuous, some of them for eminent ability, others for executive ability, and others perhaps without any special fitness for the investigation. They are not to be selected by the medical profession nor by any scientific body for this most important of all purposes, the consideration and suggestion of plans and methods of investigation and research of the nature and the remedies which have been or may be developed for the prevention and cure of this terrible plague. The committee propose to take whoever may chance to be put upon those boards. It does not provide them with transportation or compensation, but leaves them to their own private resources altogether. It makes no compensation to them for their expenses or for the time occupied in considering a subject which is of importance, and of the greatest importance, not only to the lives and happiness of our people, but also of very great pecuniary importance to the whole country.

That is the whole difference, and therefore I desire a vote upon the two propositions.

Mr. HARRIS. Mr. President, I propose to consume but a single moment. The Committee on Epidemic Diseases carefully considered the joint resolution offered as an amendment by the Senator from Florida, and with absolute unanimity, without a dissenting voice or a dissenting opinion, directed me to report as an original measure the joint resolution now before the Senate for consideration, and to report the joint resolution of the Senator from Florida adversely.

I do not know where the Senator from Florida would look for information upon this subject other than the members of those organizations who deal exclusively with sanitary work, and the study of whose lives has been devoted to sanitation. The various boards of health of all the States propose to select from their respective bodies the best sanitarians and send them here for the purpose of conferring and considering the causes and the best methods of prevention of the epidemics referred to in the joint resolution.

The absolute unanimity of the committee in favor of the joint resolution reported by me and against the joint resolution offered as an amendment by the Senator from Florida, fully justifies me, and as I think justifies the Senate, in voting down the amendment and passing the joint resolution as reported by the committee.

Mr. CALL. Mr. President, I expected that would be about the kind of argument which would be used—that is, the unanimity of the committee, not the reasons for that unanimity. Now, what is the proposition the Senator from Tennessee makes? That you can look nowhere for knowledge upon these subjects except to the boards of health of the respective States, the lives of whose members have been devoted to sanitary knowledge. What authority has he for that statement? How does he know that the members of the boards of health who will be selected will be persons who have devoted their lives to that purpose? There is no reasonable probability that this is true. There may be eminent men here and eminent men there, but the fact that they are selected as a board of health will be no evidence upon that point.

Then there are no means provided for these people to pay their expenses while considering this subject, and the time they can give to this work will be limited by their personal means. There are no means provided for their coming or going, and no means for pursuing any investigations or experiments. Why shall we assume that outside of the boards of health, who doubtless contain many men of much merit, there is not the most conspicuous ability all through the country which could be made available to consider this subject? Why should we not consider that the eminent scientific men of foreign countries who have been appointed upon commissions by their respective governments and sent where this disease is to be found, as well as other diseases, to investigate the processes of cure and prevention—why shall we say here that they would not be important factors in the consideration of this subject? The joint resolution of the committee will prevent investigations and scientific experiments. It loses the opportunity of using the favorable moment when public attention is awakened to the importance of the subject, and postpones and ignores the processes of intelligent thought, examination, and experiment, which alone can possibly lead to discovery of the secrets of nature, until a new holocaust of human life shall be caused by our own ignorance and neglect.

Mr. President, that is the whole subject. I know the Senate will follow the committee, as usual; but I wished to present the two propositions in contrast, the unanimity of the committee without reason, without a single fact upon which they can base a reasonable conclusion, really suppressing inquiry and refusing to recognize eminent medical and scientific knowledge, and the proposition embracing the whole scientific and medical knowledge of the country and of the world, to be convened in a representative form and in limited numbers here for the consideration of this subject and the formulation of plans of inquiry, observation, and experiment. First, the Academy of Sciences, which comprises men not only devoted to one science, but to all methods of scientific natural result; then the members of the boards of health, represented and selected by the different committees or boards of health, or the President, and then men conspicuous throughout the world for the consideration of the cure or prevention of a plague that for one hundred years has desolated the countries of Central America, the United States, and the West Indies, and which threatens now to prevail throughout the whole country in all of its great cities.

It is a subject of the greatest importance, and it is worth the expenditure of a hundred thousand dollars to dignify the investigation and make it effective and useful. It is a narrow-minded idea on our part that refuses to avail ourselves of the conspicuous ability which is to be found in other countries as well as our own for the investigation of this subject.

The PRESIDENT *pro tempore*. The question is on agreeing to the amendment proposed by the Senator from Florida [Mr. CALL].

The amendment was rejected.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

WIDOW OF CHIEF-JUSTICE WAITE.

Mr. HOAR. I move that the Senate proceed to the consideration of the bill (S. 3621) for the payment to the widow of the late Chief-Justice Morrison R. Waite the balance of a year's salary, which was reported yesterday by the Judiciary Committee.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. BERRY. Mr. President——

Mr. HOAR. I thought perhaps the Senator from Arkansas would permit me, as I have charge of the bill, according to what I suppose is the usual custom, to make a remark in its favor, if there is no objection.

Mr. BERRY. Certainly; I give way to the Senator from Massachusetts.

Mr. HOAR. I wish merely to repeat what has been said before, that the needs of the family of the late Chief-Justice are well known. He had, like Professor Agassiz, never found time to make money when he was engaged in a higher public service.

It has been said that there is no precedent for this legislation. I understand that the case of every member of the House of Representatives and every member of the Senate who has died in office, for a great while, is a precedent for this legislation. It is the universal practice to give to the family of a deceased Senator or Representative his salary for the current year.

It is true that there are some distinctions between the office of Chief-Justice of the United States and that of a Senator or Member of Congress, but all the distinctions are such as make the argument much stronger, in my judgment, in the case of the jurist than in the case of the legislator, because the life of the judge the whole year, whether his court is in session or not, is necessarily devoted to the public service to the exclusion of all other methods of making money, and his calculations must have been made, provision for the support of his family must have been anticipated, planned for, with reference to the receipt of his salary and to the receipt of nothing else from any money-making employment.

It is notorious that Senators and Members of Congress are not only permitted by law, but conceive themselves permitted by practice and by public sentiment, to devote large portions of the year to the practice of their profession or business, whatever it may be. If Chief-Justice Waite himself had died in the Senate his family would have received this appropriation without question, although it would undoubtedly have been true of that eminent jurist and magistrate that he would have been in the receipt of large sums for professional services rendered during the year when Congress was not actually in session; or, as in the case of many eminent lawyers of both Houses of Congress, it would have been true that he would have been rendering service in the Supreme Court of the United States for compensation even while the legislative body of which he was a member was in session.

I therefore confidently affirm that the precedent which we are in the habit of applying to our own associates applies with double force to the case of a Chief-Justice of the Supreme Court of the United States.

Mr. HAWLEY. May I add a single word to that? It seems to me

also that the established pension to the widows of the Presidents may be considered as in some degree a precedent.

Mr. BERRY. Mr. President, under the law the Chief-Justice of the United States was entitled to receive and did receive $10,500 per annum. Every dollar that was due the late Chief-Justice at the time of his death was either paid to him or to his widow. The Government is not indebted to the Chief-Justice or his widow either legally, equitably, or morally, one dollar. This is a proposition to give out of the Treasury of the United States something over $8,000 simply as a donation or gift. It is not pretended that the Chief-Justice rendered any services for which he was not paid according to the contract and according to the law. If it be right, as the Senator from Massachusetts insists, to pay the widow of a Senator or Member or a Chief-Justice, and I place them all on the same ground, then the Senator from Massachusetts ought to have the courage to bring in a bill and make it the law of the land in advance to say that a member of Congress shall have $5,000 per annum, and in case of his death that his widow shall receive $5,000 more.

But it is not the law yet; and when a member of Congress or a Senator dies it is sought to give them aid by putting it on an appropriation bill or something of that character, so that the world may not know what is being done. Gentlemen now seek to extend that practice to the widow of the Chief-Justice of the United States. If it be right to do that, why not make it in the law so that the people of the country may understand that when a man is elected to Congress or appointed Chief-Justice this is part and parcel of the contract.

The Senator from Massachusetts seeks to appeal to our sympathies by saying that the condition of the family is well known. Chief-Justice Waite drew a salary of $10,500 for twelve or fourteen years; I do not remember the time. If he was not able to save anything from that salary for his family, then I assert here upon the floor of this Senate he must have lived in a very extravagant way. I assert when it is said again and again that a family can not live respectably upon the sum of $10,500 and save anything in Washington, that it is not true. If the Chief-Justice was economical he ought to have saved a large amount for his family. Therefore the appeal for sympathy has no place here inasmuch as this is a gift pure and simple. There are 10,000, ay, 100,000 widows throughout this land whose husbands' salaries over and above expenses did not amount to $500 that would appeal to my sympathies ten times more strongly than the widow of one who received a salary of $10,500 a year.

These are the objections that I have to this bill. The same objections, I admit, apply to the widow of a Senator or Member. There is no law for either. It is a gift, pure and simple, and it is laying down a precedent—and each precedent is used to put some additional person on that list—it is laying down a precedent to build up here in the city of Washington an aristocratic class, those who live off the toil and labor of the laboring classes throughout this country. It is a gift pure and simple of eight thousand and odd dollars. It might as well be $50,000. There is no reason for saying one sum above another.

I am opposed to it upon principle. I would oppose it in the case of the President's widow, in the case of the widows of Senators and Members. I am opposed to giving it to the widow of the Chief-Justice of the United States. It is easy to be generous with money that does not belong to us. By what authority, by what right do you make donations and select out one person and say this money shall be given to this person, who has no claim, legal, equitable, or otherwise. It is upon this principle that I think the Senate ought not to pass this bill, and if precedents have been made we ought not to make another precedent which will be used hereafter to extend to the widow of every judge of a United States court. If it is given to the widow of the Chief-Justice, there can be no reason why it should not be given to the others.

I hope the bill will not pass.

Mr. CALL. Mr. President, I propose to vote for this bill, and I desire to say that in my judgment not a single proposition of the Senator from Arkansas can be sustained as a matter of reason and argument.

What are those propositions? They are often made here, and this is a question of important public policy. I am not willing to give money out of the Treasury without consideration. If there be no important and wise public policy which demands that compensation should be made to the widow of a Senator or Member of Congress, some allowance, if there is no public policy that requires that retired officers should receive pay, if the interests of the people do not demand that the widows of Presidents shall receive some consideration, I think that there is as much public virtue on my part and those who think with me in sustaining them as there is on the part of the Senator from Arkansas in refusing to do so.

But what are these propositions that the Senator makes? Nothing more than that Congress has no right to do what? To value the services of a public servant after his death, that it should forget to consider that George Washington or Thomas Jefferson or some other great patriot who has given his life to the people rendered services that in a money value are beyond amount. How unreasonable and absurd such a proposition! Why can you not value the services of Chief-Justice Waite to-day and say they were worth more than the sum that the law required to be paid him? And then, how unreasonable it is that it is so often urged here just like the report of the Committee on Epidemic Diseases—how unreasonable to say that there can be no consideration given to eminent public virtue.

How will you conduct a government if you say there can be no reward to a man for surpassing his fellows in devotion to the public interest, in sacrificing himself and his personal interest for them? Why, Mr. President, you can have no government, you must have a degraded people and institutions that ignore merit and public virtue if you act on such a notion.

Mr. BERRY. Will the Senator allow me a moment?

Mr. CALL. Certainly.

Mr. BERRY. I suppose the Senator proceeds upon the theory that these largesses are given only for great public merit, and then he would say that it is a proper thing for the Congress of the United States to resolve that we will give to the widows of the most deserving the money of the people; and then resolve that we and the Chief-Justice are the most deserving. That is the theory upon which he goes; that is, that whomsoever a majority of the members of Congress may think deserving they may give any amount of money they see proper out of the Treasury of the United States, and it is proper for them to say that they themselves are the most deserving persons; hence we will give our widows $5,000.

Mr. CALL. I do not understand that the Chief-Justice was a member of Congress.

Mr. BERRY. The Senator had spoken of members of Congress to-day, and referred to them specially.

Mr. CALL. Neither do I understand that the widow of a man who was a member of Congress is a member of Congress either, nor do I understand that the widow of a President is a member of Congress, but that proposition of the Senator is just as wide of the mark and unreasonable as the other.

Here is the simple question: Has the Congress of the United States the right to consider what was the moneyed value of the services of Chief-Justice Waite now that he is dead; and if they had the right before, have they not now?

Does the fact that a law has been passed fixing a particular amount of money for a particular service forbid Congress to consider the propriety of an increase or decrease of the amount? If the facts justify it, it should be done, and who will say that a Chief-Justice of the Supreme Court, a co-ordinate department of this Government, intrusted with the consideration of the great public questions upon which the happiness and welfare of the people depend, should not be allowed to live in a degree of dignity which will enable him to receive respectably the people of the United States who come here expecting to receive attention and consideration from him, or that he shall live like a beggar or a pauper, turning from his door the people who have honored him with public position.

Mr. President, I do not believe that the interests of public virtue, of free government, demand that the servants of the people shall be humiliated in the presence of themselves. Therefore I have upon all proper occasions when the question arose as to a faithful public servant who had given his life in the honest and meritorious performance of his duty and had left those behind him unprovided for—I, as a representative of the people, believing that I sympathize with them and represent them fully, and never having found in my public life in a single public meeting an unwillingnes on the part of the people to respond to that sentiment, I am willing and always shall be willing to make a reasonable and moderate provision for those they have left behind them for our care and consideration by our public servants who had meritoriously performed their duty.

Mr. COKE. Mr. President, being a member of the Judiciary Committee, from which this bill was reported, I rise to say that I opposed it in the committee and oppose its passage here. I believe in equality before the law of all the people of these United States. I believe one good respectable widow woman is exactly the same before the law as another is. There are hundreds of thousands of good widow-women in the United States as much entitled in law, in equity, and of right to a donation from the Congress of the United States as the estimable lady for whose relief this bill is pending before the Senate. Why shall we select one and ignore others? Chief-Justice Waite was paid all he expected to receive during his lifetime; and that which was due him of his salary, if it has not been paid, will be paid to his widow. There is nothing in the law, there is nothing in the equity of the case, there is nothing in the right and propriety of it, which separates this lady from hundreds of thousands of good respectable and needy women in the United States equally meritorious. Why shall they be ignored and she receive a donation?

Mr. President, I have uniformly voted against legislation of this character since I have been here and I always will. I am opposed to privilege and to classes among our people. I stand for equality before the law for all our people, and I stand here to oppose any donation to any individual to be selected from the mass of our people. They are meritorious alike. No man and no woman has a right to demand one thing before the law that all others have not an equal right to demand and to receive. The argument upon which the Senator from Florida would justify this bill will build up an aristocracy in this country to live upon the labors of the working people of the country.

It is all very well to talk about being liberal with other people's money. The money in the Treasury of the United States was placed there for the purpose of carrying on this Government, and it is no part of the administration of the Government for the Congress of the United States to take this treasure and give it away to selected objects and selected persons.

I submit, Mr. President, that the bill is of a character that should not pass, should not become a law. I have never supported one like it, and I never will.

Mr. HOAR. Will the Senator from Texas inform the Senate whether there is not as much constitutional authority for this proposition as for supplying the people of Texas with seeds, which he advocated, and which was passed on his recommendation a year or two ago?

Mr. COKE. The Senator from Massachusetts will be answered with a great deal of pleasure. Whether constitutional or not, the Agricultural Department has for more than a quarter of a century been established as one of the executive branches of this Government. As a part of the duty of that Department about $100,000 of appropriations, or perhaps more, have annually been expended for a number of years for seed for general distribution among the people. Now, if it is constitutional to appropriate money to buy seed for general distribution, is it not equally constitutional to appropriate money to buy seed for particular distribution where a particular reason exists for the particular distribution?

I do not defend the creation of the Agricultural Department. I believe that there was no warrant in the Constitution for it when it was created; but it having been ingrafted upon our governmental system, it being an existing and a subsisting fact, what is done by that Department in the way of acquiring and distributing seed, I do submit to the Senator from Massachusetts, is an ample justification and precedent for what was attempted to be done by the passage of the Texas seed bill.

I will add that I did not introduce the Texas seed bill. It was a House bill, passed there without a division, which came to the Senate in the usual way. I advocated its passage by the Senate in exactly the same constitutional views that sustains the votes cast every year in both Houses of Congress for the agricultural appropriation bill.

Mr. GEORGE. Mr. President, this bill appeals to my sympathies. I knew Chief-Justice Waite, and esteemed him as a man and as a great magistrate. I think his services as Chief-Justice of the United States, though possibly not so brilliant as those of some of his predecessors, were of that solid and useful character which conferred great benefit upon this country. He held the highest place to which a man can aspire who belongs to the profession of which I am an humble member. There is nothing which I could do or say to honor his memory, to testify to his great worth, which I would not do if I had the power to do it; but I believe that this bill, though appealing to our sensibilities, is not only a very dangerous precedent for us to follow but it is without warrant in the Constitution.

I understand the appropriating power to be defined and limited and circumscribed exactly in the Constitution with the taxing power. When I look at that instrument I find that Congress has power to lay and collect taxes to carry on the Government, to pay the debts, and provide for the general welfare of the people of the United States. I believe, contrary to the opinion of some of my friends upon this side of the Chamber, that the power to tax and the power to appropriate are not confined simply to those purposes necessary to carry on the Government. I believe we have a broader power, as I have frequently expressed on this floor, a power to appropriate money to provide for the general welfare. But I do not believe that in that general welfare is included the power to make a gift, a donation pure and simple to a single individual. I believe that we, the Congress of the United States, are not the owners of the money in the Treasury. I believe we are simply trustees, and that we are bound to dispose of that money according to the letter of attorney under which we act. I do not think that letter of attorney extends to the making of private donations to private individuals, and, however much I might be disposed from sympathy, from a respect for the memory of the great man whose widow is named in the bill, I feel constrained from a sense of duty to cast my vote against this bill, not only as being without warrant in the Constitution, but as being another precedent in a dangerous direction, which will hereafter be quoted and relied upon as an authority on the part of Congress or as a persuasion to Congress to vote money to a private person whenever Congress in its judgment, in its discretion, may think that private person is entitled to its benefactions.

Mr. CALL. I think the Senators who make the statement that they are opposed to giving money out of the Treasury as a gift should be prepared to sustain the proposition that this is a gift. What is a gift? Can any one say that when a man has rendered valuable service and money is paid to him greater than the amount the law provides, that is a gift? What pretense is there for saying it is a gift, unless it be true that you can not measure the amount fixed in the law as the consideration for the service and say you have undervalued it? Can not a private individual say, "My contract is a harsh one; the services rendered demand more?" How, then, can this proposition be made that this is a gift because Congress says the services of this man, followed by his death, deserve as a matter of valuation, of compensation, a greater sum than was paid to him? Senators who make these remarks can not state the definition of debt without themselves refuting their proposition? What is a debt? Is it not an obligation—something owed by some person for something done, some service performed? And because you have promised less than the service was worth is it less a debt if you have the honesty to say "I paid you less than the service was worth?" These Senators say it is very wrong for them to do this; they claim that "debts *ex debito justitiæ*" can not exist between the people and their servants. They insist that there is great danger to the people if they shall consent when a man has died in their service, has given his life to them, to keep his wife and children from starving, by valuing his service more highly than they would have done if he had lived. This greater valuation of a service which involves the loss of life, in their argument is a crime.

Then, again, the Senator from Mississippi says it is unconstitutional, although he reads the words "Congress may levy taxes to pay the debts of the United States." What is a debt and who are authorized to say what shall be a debt of the United States but the two Houses of Congress of the United States? Who but they, the representatives of the people, can alter the consideration to be paid for a service and make it greater or less and recognize the service as a debt or *quantum meruit?*

Why is not that a debt when the Congress of the United States say it is a debt? What is a debt? As I have said before, a debt may be one of justice, or a debt of merit, or a debt to be awarded by the legislative power of the Government in consideration of services rendered. What is a debt? Why, those persons can not make a definition of it without justifying this bill. A debt is something due for services, something due either from equity or by the terms of a promise or because of merit, a *quantum meruit*, as much as it deserves, even according to the theories of the law.

Therefore there is nothing in these propositions of the Senator from Mississippi or the Senator from Texas or the Senator from Arkansas.

As to equality, why does not the Senator decline to receive the compensation provided here of $5,000, which is far in excess of the $350 average pay of the laborers and of the people of the United States? Why talk about equality when we recognize a difference in services always?

He is not the friend of the people and of equality who is willing to degrade and humiliate those who hold high public stations of the Government into pauperism or those whom they leave behind as beggars and forcing them to live upon the public charity. There is in the conditions of life in this world something due to appearances, something to the necessities of the public service, and the true friend of the people is he who by a public policy honors the faithful public servants, rewards them with just applause, and allows them, their wives, and their children the same respectability of appearance and the same opportunities and privileges as those that belong to other people in private life filling positions of dignity and important trust and duty.

The Senators would have a pandemonium upon earth if their systems of public policy could be adopted—no rewards for merit, for public virtue, for the sacrifice of life in the performance of duty—but they would inscribe over the public service, "Let him who performs public service leave all hope behind. Virtue and faithful public service have no rewards. The interests of the people require the punishment of the faithful public servant." I fail to see any truth or force in them.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and was read the third time.

The PRESIDENT *pro tempore* put the question on the passage of the bill, and declared that the "ayes" appeared to prevail.

Mr. BERRY. I ask for a division.

Mr. HOAR. Will the Chair allow me to appeal to the Senator from Arkansas not to insist on his call for a division? The Senator's opinion, and that of the other gentlemen who agree with him, has been put on record by their speeches, which will go into the RECORD, and the calling of a division at this time may very possibly disclose the want of a quorum and thus prevent the continuance of the business of the Senate—the speech of the Senator from Tennessee [Mr. BATE], which we are all expecting. I hope the Senator will consider his duty as done by recording his judgment without insisting upon a division.

Mr. BERRY. I have no disposition to take any course which will show that the Senate is in such a condition that no further business can be done when there is public business here that probably is a necessity.

I did state yesterday that I thought a majority of the Senate would vote for this bill. That opinion was based upon the fact that I believe every Republican Senator will cast his vote for it from the circumstance that they invariably vote for this character of legislation, and when they are re-enforced by the Senator from Florida [Mr. CALL] I have no doubt that a majority will vote for the bill.

Therefore, inasmuch as it is probable that a division may disclose the fact that there is not a quorum of the Senate in the city, and thereby prevent the passage of the general deficiency and other bills, I shall

withdraw the call with the hope, and almost with the certainty, that this bill can not, ought not, and will not pass the other House during the session, and therefore no great damage will be done.

The PRESIDENT *pro tempore*. Shall the bill pass?

The bill was passed.

POTEAU RIVER BRIDGE.

Mr. JONES, of Arkansas. I move that the Senate proceed to the consideration of the bill (H. R. 11107) to amend an act entitled "An act to authorize the Fort Smith and Choctaw Bridge Company to construct a bridge across the Poteau River, in the Choctaw Nation, near Fort Smith, Ark."

The motion was agreed to; and the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LEGAL REPRESENTATIVES OF ELIZA M. FERRIS.

Mr. SAWYER. I move that the Senate proceed to the consideration of the bill (H. R. 1152) for the relief of the legal representatives of Eliza M. Ferris.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Reuben D. Smart, administrator of Eliza M. Ferris, deceased, the sum of money to which she would have been entitled by pension certificate 220860, and which was not issued until four days after her death.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COOSA RIVER BRIDGE AT GADSDEN, ALA.

Mr. MORGAN. I move that the Senate proceed to the consideration of the bill (H. R. 11338) to authorize the construction of a bridge across the Coosa River, at Gadsden, in the State of Alabama.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, line 3, after the word "railroad," to insert "company;" in line 5, after the word "constructed," to strike out "in accordance with the regulations of the Secretary of War;" in line 10, after the word "same," to insert "*Provided*, That the Secretary of War shall approve the plans and dimensions of said bridge;" and in line 12, after the word "bridge," to insert "if approved by the Secretary of War;" so as to make the section read:

That the Anniston and Cincinnati Railroad Company, a corporation created and existing under the laws of the State of Alabama, having constructed a bridge and approaches thereto over the Coosa River, at or near Gadsden, in Etowah County, on a direct line from Anniston, in Calhoun County, to Attalla, in Etowah County, in the State of Alabama, said company is hereby authorized to keep and maintain the same: *Provided*, That the Secretary of War shall approve the plans and dimensions of said bridge. Said bridge, if approved by the Secretary of War, shall be maintained so as to provide for the passage of railway trains, and, at the option of the corporation by which it is built, may be used for the passage of wagons and vehicles of all kinds, for the transit of animals, and for foot-passengers, upon conditions to be agreed upon between said corporation and the county commissioners' court of the said county of Etowah and approved by the Secretary of War.

The amendment was agreed to.

The next amendment was, in section 2, line 21, after the word "prescribed," to insert:

And provided further, That nothing herein contained shall be held to alter or affect existing laws as to the removal of bridges obstructing the navigation of rivers when the Secretary of War shall so determine.

The amendment was agreed to.

The next amendment was, in section 4, line 1, after the word "that," to strike out, "the bridge authorized under this act shall be built and located under and subject to such regulations for the security of navigation of said river as the Secretary of War may prescribe; and to secure that object the;" in line 10, after the word "and," to strike out "until said plan and location of the bridge shall have been approved by the Secretary of War" and insert "if the Secretary of War, upon an examination of the papers to him submitted, shall require any change in the location or plans of said bridge, or its entire removal, the company shall, at its own expense, comply with such requirements;" and in line 19, after the word "bridge," to insert "by reason of said bridge being alleged to be an obstruction to the navigation of said Coosa River;" so as to make the section read:

SEC. 4. That said company shall submit to the Secretary of War for his examination and approval the design and drawings of the bridge and a map of the location, giving the topography of the banks of the river, the shore-lines at high and low water, the direction and strength of the current at all stages, and the soundings, accurately showing the bed of the stream, and if the Secretary of War, upon an examination of the papers to him submitted, shall require any change in the location or plans of said bridge, or its entire removal, the company shall, at its own expense, comply with such requirements, said bridge shall not be built; and if any change be made in the plan of said bridge such change shall be subject to the approval of the Secretary of War; and if any litigation shall be had in regard to said bridge by reason of said bridge being alleged to be an obstruction to the navigation of said Coosa River, the same shall be in the circuit court of the United States in whose territorial jurisdiction said bridge or any part thereof is located.

The amendment was agreed to.

The next amendment was to strike out section 6, in the following words:

SEC. 6. That if actual construction of the bridge herein authorized shall not be commenced within one year from the passage of this act, and be completed within three years from the same date, the rights and privileges hereby granted shall cease, and this act shall be null and void.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the following bills:

A bill (S. 307) for the relief of Margaret Kennedy;

A bill (H. R. 7547) granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota; and

A bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes.

Mr. MORGAN. I move that the Senate insist on its amendments, and ask for a conference with the House of Representatives thereon.

The motion was agreed to.

By unanimous consent, the President *pro tempore* was authorized to appoint the conferees on the part of the Senate; and Mr. VEST, Mr. SAWYER, and Mr. CULLOM were appointed.

CHIPPEWA INDIANS.

Mr. DAVIS. I move that the Senate proceed to the consideration of the bill (H. R. 7935) for the relief and civilization of the Chippewa Indians in the State of Minnesota. This bill was considered the other day, and was then read at length.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill.

The PRESIDENT *pro tempore*. The bill when last before the Senate was read at length, and the amendment reported by the Committee on Indian Affairs to strike out all after the enacting clause and insert a substitute was amended in certain particulars. The question now is upon agreeing to the amendment of the Committee on Indian Affairs as amended.

Mr. DAWES. I believe the Senator from Minnesota desires to offer an amendment to the committee amendment.

Mr. DAVIS. I desire to offer a further amendment, which is, in section 1, line 28, after the word "effect," to insert the following proviso:

Provided further, That in any case where an allotment in severalty has heretofore been made to any Indian of land upon any of said reservations, he shall not be deprived thereof or disturbed therein, except by his own individual consent, separately and previously given, in such form and manner as may be prescribed by the Secretary of the Interior.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

HOMESTEAD ENTRIES.

Mr. TELLER. I ask that an order be made to print the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States to allow persons who have abandoned or relinquished their homestead entries to make another entry. The bill has not been printed, and I ask that an order may be made to print the usual number as it finally passed.

The PRESIDENT *pro tempore*. In the absence of objection it will be so ordered.

KENTUCKY RIVER BRIDGES.

Mr. VEST. I move that the Senate proceed to the consideration of the bill (H. R. 11262) to authorize the construction of bridges across the Kentucky River and its tributaries by the Richmond, Nicholasville, Irvine and Beattyville Railroad Company.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, line 16, after "foot-passenger," to insert the following proviso:

Provided, That the rates of toll charged by said company shall be first approved by the Secretary of War.

The amendment was agreed to.

The next amendment was, in section 3, line 12, after the word "War," to insert:

and if the Secretary of War shall at any time think any changes necessary in the plans of said bridge or bridges, or that the said bridge or bridges should be entirely removed, the said alterations or removal shall be at the expense of the company.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. VEST. I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon.

The motion was agreed to.

By unanimous consent, the President *pro tempore* was authorized to appoint the conferees on the part of the Senate, and Mr. VEST, Mr. SAWYER, and Mr. CULLOM were appointed.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 9th instant approved and signed the following acts:

An act (S. 937) for the relief of David L. Brainard and others;

An act (S. 145) for the relief of Edward Braden and Job W. Angus;

An act (S. 1668) for the relief of A. M. Woodruff;

An act (S. 1582) for the relief of the estate of Lucien Goyaŭx;

An act (S. 320) for the relief of John D. Adams;

An act (S. 3125) restoring the right of pre-emption to Alfonso Roberts;

An act (S. 3471) to authorize the construction of bridges across the Kentucky River and its tributaries by the Louisville Southern Railroad Company;

An act (S. 1101) granting a pension to Rachael A. Sinkinson;

An act (S. 1500) granting a pension to Margaret M. Miller;

An act (S. 2720) granting a pension to John B. Ross;

An act (S. 2836) granting a pension to William E. Taylor;

An act (S. 2862) granting a pension to William R. Dean;

An act (S. 2887) granting a pension to George H. Johnson;

An act (S. 1591) granting an increase of pension to Madison M. Meredith;

An act (S. 1958) granting an increase of pension to Eleanor B. Goodfellow;

An act (S. 2346) granting an increase of pension to Jenny Hart Mullany;

An act (S. 2675) granting an increase of pension to Lieut. John R. Durham;

An act (S. 2838) granting an increase of pension to Betsey A. Mower; and

An act (S. 2711) restoring Phebe McLaughlin to the pension-roll.

THE REVENUE LAWS.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 9051.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. BATE. Mr. President, from December last to the present day this Congress has been engaged in an effort to meet the demand of the the people for the equalization, reform, and revision of taxation. For the last twenty years, from 1868 to 1888, that demand has been voiced in the platforms of the Democratic party at each Presidential election, and more than once found echo in the platforms, State and national, of the Republican party.

The present Democratic House of Representatives, recognizing its constitutional obligation to originate measures of taxation, has discharged its duty by sending to the Senate, for its concurrence, a bill which in its general scope partially complies with the demands and expectations of the people, with the pledges of the party, and with the bold, manly, and emphatic recommendations of the President in his official communications to the Congress and the country.

If possible to more emphasize the earnestness of its purpose to fulfill its promise of tariff reform in the line of reduction of taxation, the Democratic convention at St. Louis in June last, with a unanimity and enthusiasm unparalleled in American politics, has made Mr. Cleveland its nominee for re-election and Judge Thurman for the Vice-Presidency on a platform which admits of no equivocation and of no misunderstanding. The exigency of party and the desperate fortunes of partisans may misrepresent them, the Democratic party, and its platform as "free trade" and as seeking to compass the injury of American labor, but its platform language and its acts can not be misunderstood nor its honest purpose to reform taxation denied in the face of recent legislation by a Democratic House of Representatives, as evidenced by the "Mills bill" and the mode of its passing the House.

This bill, a Democratic measure, in its scope and terms is antagonistic to "free trade." When we consider that the Democratic party, by its every utterance in convention platforms, in speeches by its representative men, in measures presented to Congress and votes thereon, advocates, along with its measure of tariff reduction as its party policy, the raising of revenue through a tariff as the chief source of necessary national income, the charge against it of "free trade" becomes absurd. Indeed, it refutes itself when we recall the necessities of large revenues demanded by the interest on the public debt, the payment of pensions, the improvement of rivers and harbors, the erection of Government buildings throughout the country, the construction of a navy, the fortifications for the seaboard defense, and the necessary current expenses of the Government, increasing yearly with the growth of population and the expanse of country.

These all united, demand an amount of revenue which, when levied upon customs, will afford the incidental protection needed by the most enlarged and extended system of domestic manufactories, while they successfully destroy the force in any accusation of "free trade." The existing tariff is 47.2 per cent. on the $100. The Mills bill reduces it to 42 per cent., making a reduction of only about 5 per cent. Does this look like "free trade?" The census of 1880 shows that the average labor cost of manufactured articles was 18 per cent.; the average duty under existing tariff law is 47 per cent. Thus a protecting bounty of 29 per cent. was secured, not to labor, but to capital, and was a tax upon the whole people, laborers included, of 29 per cent. Of this the Mills bill takes off only 9 per cent. and leaves 20 per cent. still to capital. This is called free trade, and its lifting of the burden of taxation is attempted to be held up to labor as hostile to the interest of the workingman.

OBSTRUCTION TO REFORM BY REPUBLICANS.

On the other hand, the Republican party, notwithstanding its repeated pledges to reduce taxation—pledges, not flippantly uttered in the idle phrase of a heated political contest, when playing for party advantage, but in solemn utterances in party platforms, State and national; pledges, promulged in Executive messages, and in discussions of them by those whose recognition as party leaders was undisputed; pledges, by official reports of commissions, gravely made in response to demands of legislative enactments, and by commissions created for the purpose of ascertaining and reporting what was best to be done for the country in regard to this tariff question—notwithstanding these party pledges, expressed and implied, we find in this Senate Chamber to-day, after a delay in committee of two months and a half, obstacles thrown in the path of its progress by that which its authors call "a substitute," and, as was recently shown in the other end of this Capitol, a party seemingly organized to defeat that necessary revenue reform to which all parties stand committed. And what is that substitute but an obstruction aiming to compass the defeat of the will of the people in this regard and override and defy the oft-repeated pledges for reduction of the existing tariff?

Let us see how this comes about.

With all its professions, promises, and platforms, the Republican party, while professing to recommend and favor a reduction of the surplus and a reformation of the tariff, has obstructed nearly every movement in that direction. All of its distinguished leaders, Secretaries of the Treasury, and recent Presidents have, in speeches and messages as individuals and officers, urged and advised a reduction of the excessively high war-tariff to a reasonable peace basis. But as a party, and within the last four years as individuals and officials, the whole position has been changed. Capital and monopoly seem to have laid their violent hands upon the organization, suppressed or reversed the opinions of individuals, and thwarted, as they relate to this question, the plans and purposes of the party.

As to the only tariff act, 1883, that has become a law in recent years—after reading the criticism, in his minority report on the pending bill, by the senior Senator from Kentucky [Mr. BECK], in which he caustically gives the history of the manner in which it became a law—I forbear criticism upon it, and only say it was satisfactorily shown on day before yesterday by the Senator from North Carolina [Mr. VANCE] that in its practical operation it did not reduce, but increased the revenue.

The public utterances of such men as Senator ALLISON, who has charge of this bill, and Senator SHERMAN, as a member of the committee who opened the discussion explaining this substitute, and President Arthur by messages, insisting that a time had long since been reached when the rate of taxation made necessary by a tremendous civil war should be reduced, are matters of public record and public history. But what has been done by that great party!

Following those expressions and urgent utterances, the Forty-eighth Congress was unable to pass any measure looking to the reduction. The measure introduced and known as "Morrison's horizontal 20 per cent. reduction" was defeated by striking out the enacting clause, the motion being supported *in solido* by the Republicans, aided by a few ultra-protection Democrats.

In the Forty-ninth Congress the same Republican party, again aided by the same contingent from the Democrats, defeated a bill prepared with great care and labor, by refusing consideration of it. They shut down the throttle-valve and refused even to consider the measure.

In the Fiftieth Congress what has been done? Governed by the same spirit of obstruction and relying upon division among Democrats, in confident expectation that no bill would pass, that party, either in the House or Senate, made no move, presented no measure, either as an originial or as a substitute, until to their consternation and surprise the Mills bill passed. Then, suddenly awakened to the necessity of doing something under the pressure of the growing public sentiment in favor of a reduction of the surplus, the Senate began to assume a sudden and unwonted activity. All at once, in the dog days of August, at the very heels of the longest session in American history, the Senate, with

its imperial toga on, suddenly concluded it would meet the requirement of the last fifteen or twenty years, and save the country from a redundant treasury and exorbitant and oppressive taxation.

But it requires much time and consideration to prepare so important a measure, especially when it is a measure not intended to be passed or to become a law. Several times did grave Senators from this side of the Chamber, in their anxiety to soothe and lull the growing discontent of the country, arise in their places in the Senate and anxiously inquire "when that bill was to be forthcoming?" And as frequently were they admonished to hold themselves in patience, that in a "few days" the measure would be presented. Finally, on the 4th of October, 1888, it was presented, at a time when every man in the Senate and House who had had anything to do in its preparation or presentation could see it had been delayed and withheld until it was impossible even to give it consideration with any view to final action before the close of the pending election. Was it prepared and intended to be passed? might well be asked. It is simply a monstrous delusion, not to say fraud, held up to placate the American people, while the Republican majority encompass its defeat, as they will, it and all other bills to substantially reduce the tariff. It is but another exemplification of how not to do it. With all its seeming plausibility it is simply an obstruction to any real and actual movement in the proper direction, and is simply a misleading equivalent of striking out the enacting clause or refusing consideration.

The Mills bill has passed the House and is an honest movement made in good faith. It is before the country. Now, supposing the friends of this substitute are in earnest and in good faith pushing it for passage, it is proper to glance at it a moment and see what virtue, if any, there is in it.

DECEPTIVENESS OF THE SENATE'S SUBSTITUTE.

This Senate substitute is a superstructure of protection erected upon a frame-work of revenue reform. That much at least the President and his party has wrested from the reluctant grasp of monopoly and manufacturers by demanding tariff reform.

In this substitute revenue reform is compassed by removing the tax from tobacco, as the Mills bill does, and reducing the tax on cigars, cheroots, and cigarettes, about which neither consumer nor manufacturer cared an iota. The latter puts it on his sales, and the former pays it fractionally.

Toward the further recognition of the public demand for revenue reform, spirits used in the arts and sciences are placed on the free-list in this substitute, and thus the door is opened to such frauds as may perhaps, no doubt will to a great extent, make whisky practically free. If so, sugar and bitters reduced, an untaxed cocktail will be at the demand of every toper before he eats his "free breakfast" at which his sugar is half taxed, his tin plates, his tin kitchen utensils, his canned meat and vegetables are heavily taxed, his clothing and tablecloths, his carpets and blankets are all doubly taxed beyond the demands of the revenue.

What the tax-payer gains on his sugar he loses on his woolen goods and on the metals which enter into every calling.

What the smoker gains on "cigars, cheroots, and cigarettes" is doubly taxed on the building and fencing materials of the farmer and mechanic. What science gains by "free whisky" the manufacturers enjoy, but the duty on salt is paid by all citizens; but when salted meat is exported the tax on salt is remitted; and yet this is called protection to the American consumer. New England fish is cured with free salt, but Western pork with taxed salt (having no rebate). Raw wool, which the Mills bill admits free, is divided by the Senate bill into three classes, and taxed from the sheep's back through all the manipulations of manufacture until it turns to "shoddy," when it again is taxed in the lowest-priced goods which the extremely poor people would be glad to have cheapened by the remission of all duties.

Iron ore, which the Senate committee's substitute retains on the dutiable-list at 75 cents per ton, and, thus starting taxation in the bowels of the mine, pursues the iron through every change, as in pig-iron, steel, and all kinds of hardware, until it rusts back into earth. The plow, the loom, and the anvil—agriculture, manufactures, and mechanics—are each and all taxed from the earliest beginning to the completest product—not to support the Government, but to pamper with the hard-earned money of the people the already inordinate profits of the few.

Protection under this "substitute," it is claimed, offers to the people a free-list of $6,500,000. Tariff reform as shown in the Mills bill tenders a remission of $19,750,000 duties, a difference of $13,250,000 toward the reduction of the surplus.

The duty remitted on sugar is largely in excess of that remitted by the Mills bill, and yet this step in the direction of "tariff reform" which follows the Mills bill is deceptive and misleading. The duties paid on sugar go more directly into the Treasury and affect less the price of the article than any goods on the dutiable-list, and hence they fall lightest upon the people. The duty on raw wool, on the contrary, follows that raw material through all stages of manufacture, increasing the price of domestic manufacture at every stage and falling upon the people with an arithmetical progressive increase until it becomes a real burden to the consumer. Thus revenue reduction in one article of consumption is followed by revenue protection in another; but the article reduced is an agricultural, while that protected is a manufactured product. The hand, hostile to agriculture, which framed this substitute, has been aided by another, partial to manufactures, and both seem to have labored to make the people pay for the profit of the favored classes.

When General Harrison, the Republican nominee, announced in his letter of acceptance that the issue in this campaign was not one of schedules but of principles, between free-trade and protection, he could not have supposed that his party in the Senate would reduce the issue to one purely of schedules and abandon all matters of principle, and that the question which the people would be called upon to decide in the approaching election related solely to how much the revenue should be reduced, and not to the principle upon which future revenue should be raised. The Republicans in the House voted and argued in a manly, straightforward way for protection, but the Republican Senate bill has brought the discussion to a mere matter of schedules. The public has thus gained something since the Mills bill passed the House.

The Republican platform declares that—

We favor the entire repeal of internal tax rather than surrender any part of our protective system.

And the nominee of the party, in reiterating the same purpose, announced that the issue before the people was not one of schedules, but of principles, and that the country was to decide between "free trade" and "protection" as systems of revenue.

The Senate substitute for the Mills bill, abandoning the declaration of the Republican platform and the nominee, reduces the issue to one of schedules merely.

ATTEMPT TO CHANGE THE ISSUE.

The argument of the Senator from Ohio [Mr. SHERMAN], as a member of the committee explaining this substitute, is directed more to the changes of the administrative sections of the revenue laws than to the subject-matter of revenue reduction, his principal argument for the substitute being based upon the fact that it embodies the act passed by the Senate at an early day of this Congress for a revision of customs laws in their administrative features. It is the changes introduced by the previous act which makes the substitute, in the opinion of the Ohio Senator, the most "perfect revenue measure ever placed on the statute-books of the United States."

Differing with the Senator, I am persuaded, upon an examination of it, that the proper characterization of this substitute is a scheme to reduce revenue without reducing burdensome taxes, and that protectionists do not fear in the "Mills bill," which it seeks to supplant, a reduction in the wages of labor, but in the profits of that labor, and that it is the excess of profits that is endangered by the Mills bill.

It is not improved administration, but relief from taxation that now troubles the people. "Overvaluation" may be an evil of large proportions, but "overtaxation" is the greater and more oppressive burden which now paralyzes trade and embarrasses both the Government and the community. The Senate substitute has endeavored to "side-track" the taxation train and give a clear way to the administrative engine, while the "Mills bill," without neglecting the administrative evil, has endeavored to relieve the taxation burden from the people. It is not "novel devices" of schedules, as the Senator from Ohio says, but new methods of tax relief which the people are awaiting.

But much has been gained in the long delay of preparing this substitute. Public opinion has asserted its right to be heard, and the demand for fair play and equal rights in taxation has driven the Senate committee from the party's platform of tariff for protection to the Democratic policy of a tariff for revenue with incidental protection. The issue, in Senator SHERMAN'S words, is between "a tariff for revenue only and a tariff for revenue and protection." The remarks of the Ohio Senator can be understood only as an apology for and explanation of the abandonment of a tariff for protection, and the adoption of a tariff for revenue with incidental protection. The matter of schedules is not as important as this abandonment of the purely protective tariff policy. Not only is the party's declaration at Chicago, that rather than abandon any part of the protective system it would abolish the whole internal revenue, given up by the substitute, but only a very small part of the internal revenue is repealed, some $24,000,000 out of the $124,000,000. In that, protection is given up as the basis and foundation of revenue. Between the Mills bill and the Senate substitute the dividing lines run entirely between schedules and rates, and the principle of protection finds but little left to stand upon and but few to do it reverence.

The tax on sugar is reduced one-half—from 82 per cent. to 41 per cent., and that on rice from 63 per cent. to 50 per cent. The principle that underlies these reductions, whatever may be said of their purpose, is to reduce revenue on articles of agriculture which enter not into manufactures and therefore do not multiply the cost of living (as the customs tax does not follow it), and which are easiest paid and of which the Government receives all that is paid by the people, while the increased duty on wool and on iron enters into manufactures and increases their cost nearly five times the amount of duty and inures to the manufacturers' profit and the people's loss. This is protection concealed under revenue reduction, a sham and a fraud, which the Senate's "substitute" dare not avow, even though it sustains the Chicago platform.

The seesaw schedule on wool—some duties going up and others com-

ing down—can not possibly be defended on any principle of protection. It can be justified only on that of revenue with incidental protection. But the Senator from Ohio is not entirely satisfied with that, but takes it, as he says, because "half a loaf is better than no bread;" in other words, as the country would not stand the bread of protection he takes the half-loaf of revenue with its incidental protection. And as there was no tin in this country to protect, the Senate committee's substitute treats tin-plate as sheet-iron, and conceals its protection under the cover of iron and again disavows the protection of tin, but hopes to encourage the manufacture of tin-plates by taxing "sheet-iron." This deceptive subterfuge will not recommend itself to the housewife, the laborer, the roofer, and the canner of agricultural products—to protect 5 per cent. of tin the substitute taxes 100 per cent. of iron; *i. e.*, all of the iron in the tin-plate.

Then, "the best revenue bill that was ever introduced into the Congress of the United States," as the Senator from Ohio designates the Senate's substitute, is founded not on the protective policy, but conceals that policy beneath the cloak of revenue reduction, and without the courage of protection convictions, yields that principle and that policy, under the guise, to the demands of the people for equal favors to all and protection to none.

The corner-stone of the Senate "substitute" for the Mills bill is correctly measured, in line and angle, in the views of the minority, by—

> The statements, arguments, and appeals of manufacturers and others, who demand that the present high rate of tariff taxation shall be maintained, and in many instances, prompted not by any revenue necessities, but alone for the purpose of increasing their own profits at the expense of sixty millions of tax-payers.

As the foundation was laid in these representations, so the superstructure was completed for the profits of the builders at the expense of the tax-payers.

The report of the Committee on Finance, which is designed to support and sustain the Senate substitute, erroneous in facts and illogical in deduction, is misleading, and confronted with the almost self-evident proposition that free raw material cheapens the cost of production and lessens the price of the article. The Republican majority of the committee, admitting the truth of this proposition, endeavors to qualify and limit its application by the substitution of "crude" for "raw materials," and by confining the material to the productions of foreign countries which can not be raised in this country; such raw material, the Republican majority admit, "should be placed on the free-list," thus making free a part of the raw material of foreign countries and taxing another part.

The Mills bill, on the other hand, enlarges the free-list with many articles of raw material without regard to the locality of production, because they are important elements in manufactures, and when lessened in cost will cheapen the product to the consumer.

There are many other inconsistencies and incongruities in the Senate committee's substitute which plainly reveal the embarrassments under which its framers labored in their effort to preserve protection from the demand of the people for tariff reform.

It is but a few days since the Senator, Mr. ALLISON, who reported this substitute, assailed on the floor of the Senate the expenditures of public money by the present Administration and alleged that there would be no addition to the surplus this year, because the expenditures were already within twenty millions of the estimated receipts. If that statement was founded in fact, how can the Senator recognize the propriety of reducing the receipts by $73,668,994.30?

In view of that statement, with what propriety do the Republican Senators in their report aver that before any tariff measure can go into effect the additions to the surplus which will accrue within the next four months will be sufficient to pay in full the outstanding 4½ per cent. bonds due in 1891, $221,000,000?

When debating an appropriation bill it is alleged that extravagance has squandered the revenue, but when reporting the tariff the very first reason assigned is that the object of the substitute is "to reduce the national revenues, which are now excessive," and will in four months be enough to retire $221,000,000 of bonds. To quote from the utterances of that Senator yesterday, "Consistency, thou art a jewel."

CONTRADICTORY EXAMPLES.

The inconsistencies of argument are not less than those of its statements. It is alleged in argument that low duties increase the revenue, and in support of that statement it is said in the minority report—

> That it was officially estimated at the time of the passage of the various acts (act July 14, 1870, and May 1 and June 6, 1872) that these changes (of duties) would result in a reduction of the revenue from customs of $57,227,500. The revenue from this source in 1869 was $176,114,904, and in 1873 it was $184,929,542, or an increase of $8,814,138, instead of a reduction of $57,227,510. * * * Similar results may be reasonably expected should the House bill become a law.

But when specific duties are urged in preference to ad valorem duties, then it is affirmed that low duties decrease the revenue; and in support of that argument it is said:

> That the value of all the articles upon which the rates of duty are changed by the bill, and which alone are affected by its provisions, imported in 1887, according to the statement furnished by the Committee on Ways and Means and printed in connection with the bill, was $249,805,796.20. Upon these articles there was imposed a duty in 1887 of $136,087,149.77, equivalent to 54.48 per cent. ad valorem. The same articles, if imported under the provisions of the proposed bill, would have paid, according to the same statement, duties amounting to $86,600,907.62, or an ad valorem rate of 34.67 per cent. The resulting deduction of 1887 would be $49,406,240.15.

Thus, reducing the duties in 1872 increased the revenue by $8,814,138 instead of reducing them $57,299,510 as had been expected. But the committee affirm that the reduction of the Mills bill will cause a reduction on the importation in 1887 of $49,406,240.15. It is not for this side of the Senate to reconcile statements so variant or conclusions so inconsistent.

The incongruities of the report are strikingly apparent throughout, but a single example need only be considered at present. The duty on horses and mules, $20 per head, is a Procrustean bed upon which a Canadian pony and Clydesdale stallion, a Mexican mustang or a broncho and an English thoroughbred are stretched side by side and adjusted and fitted to exactly the same amount of duty. It would have been a more consistant schedule to have classed horses and hay at $2 per ton, or with "acorns and dandelion root at 1½ cents per pound."

While the Mongolian race has been denied that same asylum which every other race finds in this country, the substitute of the Senate committee offers him the consolation of having his "joss-sticks or joss-lights" on the free-list. The disciples of Confucius and Brahma can not come to America, but the implements of their religion shall find free admission where the devotee is denied a resting place. "Free joss-sticks" comes from that side of the Senate which has consumed three months in discussing how to drive the Chinaman from their own free "joss-sticks" in this country.

REPUBLICAN INCONSISTENCY.

The substitute and the accompanying report, read either along or between the lines, are a recognition of the great demand for tariff reform which the people are pressing from all sections of the country upon Congress. But it is at the same time an effort to divert the current into a direction which shall save certain interests from their just contributions to the public welfare, and enable certain others to contrive to levy inordinate profits upon the public. No clamor about labor, or about home industries, or home markets, or other deceptive phrase can blind the people to the single and honest purpose of the Democratic party to adjust the tariff upon principles which shall know no favoritism, and by means of rates which shall confer no special privileges. Guarding invested capital and watching closely the interests of labor, the Democratic party will conform the tariff faithfully to the best interests of manufactures, commerce, and agriculture, without permitting American labor to suffer any diminution of its just reward.

The revision of the customs laws finds in the report of the Senate's committee justification from several existing evils, namely: Excessive revenues; frauds from undervaluation; defects, anomalies and incongruities in schedules; a necessity for a proper readjustment and equalization of tariff rates, and relief and protection to home industries. These reasons, with the exception of protection, are also the foundation of tariff reform in the Mills bill. The Senator from Iowa in his speech day before yesterday made protection the chief distinguishing feature of the Senate's substitute for the Mills bill. That protection has existed for more than twenty-five years under the laws which create all the evils which the substitute seeks to remedy. For the truth of this remark I need only refer to the speech of the Senator from Iowa [Mr. ALLISON] as a member of the House eighteen years ago, when, on March 24, 1870, he squarely and emphatically avowed the necessity for reform of the tariff in the interest of agriculture, remarking that—

> The agricultural interest, it will be seen, is much the largest interest in its aggregate product as well as in the number of persons employed. I believe no one will claim that this large interest is directly protected. It is true that under customs laws there is a small duty upon wheat, barley, oats, and other agricultural products, but it does not afford any protection to the great wheat and grain producing regions of the country. The gentleman from Ohio [Mr. Wilson], in discussing this question, stated that the cost of wheat in New England is about $1.70 per bushel, while in Illinois, Iowa, and Wisconsin the price is about 65 cents per bushel. The Canadian wheat is the only wheat that comes in competition with our own. Canada being nearer New England than the wheat-growing States more than makes up the duty in the reduced cost of transportation.
>
> What is true of wheat is equally true of other grains. Therefore the farmer has practically no protection at all, and whatever benefit he derives is from what the home market furnishes for home products. Unfortunately for the farmer, the market price of wheat is fixed by the price which the surplus will bring abroad, or the price of wheat in London or Liverpool. At that market, where the surplus is sold, and which fixes the value of the whole crop, he comes in competition with the grain produced in the Crimea, in Hungary, and in the region of the Baltic, from fields cultivated by what is known, in comparison with our own, as pauper labor.
>
> But I am told we must so legislate as to furnish a home market for all our agricultural products, and this can only be done by high tariff. Any one examining the subject will see that our agricultural products increase more rapidly than our population, so that if we do not export these products in their natural condition, we must do so by converting them into manufactured articles and export these articles. But this can not be done under a high tariff, for all nations will buy manufactured products where they are the cheapest, and the nation selling the cheapest will control the market. This rule excludes our highly-taxed manufactures made from highly-taxed materials from the markets of the world, although we have natural advantages possessed by no other nation.

The reduction of the revenue was not in 1870 so much the object which the Senator had in view, as the relief of agriculture from the baleful effects of "a high tariff." For in the same speech he assailed the duty on wool and woolens as particularly injurious to the farmer, and in illustration of this injury said:

> I will say with regard to the duty on wool and woolens that I regard it not as an intentional fraud, but as operating as though it were a fraud upon the great body of the people of the United States. I allude to the woolen tariff, a

law the effect of which has been to materially injure the sheep husbandry of this country. In a single county in the State of Iowa, between 1867 and 1869, the number of sheep was reduced from twenty-two thousand to about eighteen thousand in two years, and what is true of this county is true to a greater or less extent of other counties in Iowa, and during this time the price of wool has been constantly depreciated.

Mr. LAWRENCE. I should like the gentleman to inform me how a reduction of the duties on wool and woolen goods would inure to the advantage of the wool-grower?

Mr. ALLISON. I will tell the gentleman how, in my judgment, the wool-grower will be benefited. As the law now is the tariff upon fine wools of a character not produced in this country is 100 per cent. upon their cost. The tariff upon woolens of the same class is only about 50 per cent., so that the finer woolen goods are imported and not the coarser fabrics. Before the tariff of 1867 our manufacturers of fine goods mixed foreign fine wools with our domestic product, and were thus able to compete successfully with the foreign manufacturer of similar wools. But being prohibited from importing this class of wools, these fine goods can not now be produced in this country as cheaply as they can be imported. Consequently, mills that were formerly engaged in producing these goods have been compelled to abandon business or manufacture the coarser fabrics. If they could afford to manufacture those fine goods, they would make a market which we do not now have for our fine wools, to be mixed with other fine wools of a different character from abroad. This want of a market, as I understand it, is the reason why our fine wools now command so low a price. There is no demand for them at home, and we can not export them in competition with fine wools grown in other countries.

I know that the inconsistencies of Republican Senators are not Democratic arguments, but they are emphatic illustrations of the changes which party exigencies force upon party leaders, and will persuade the people that the Senate substitute is more a party measure than an effort to correct existing evils.

What becomes of the home-market delusion of 1870, when the duties were as high, if not higher, than now? The Senator was correct in saying: "The farmer has practically no protection at all," and "unfortunately for the farmer the market price of wheat is fixed by the price which the surplus will bring abroad, or the price of wheat in London or Liverpool." These were not free-trade arguments, but were those of protectionists in behalf of agriculture and the farmers. Why have they lost their force in 1888?

The present cry of free trade when tariff reform is mentioned was a favorite subterfuge when the Senator from Iowa was exerting his great abilities in behalf of reform. The predecessor of Mr. ALLISON in the Senate, the Hon. James W. Grimes, as far back as January 24, 1867, encountered the same outcry of free trade which Mr. ALLISON reiterates now:

Mr. President, the man who opposes the passage of this bill must expect to be slandered. The "protectionists," as they choose to call themselves, have already opened the vials of their indignant wrath upon the heads of those whose opposition they anticipated. Threats of utter political extinction are hurled against every man who, in the exercise of an independent judgment, is not prepared to impose upon his constituents the burdens which the various manufacturing combinations demand. That portion of the public press suborned to their interests is rife with charges that "the capital is thronged with free-traders, and that British gold is operating to secure American legislation for British interests." Every man is condemned in advance who would inquire before he would vote.

We know what all this means, and so far as I have the ability, I am resolved that the people shall know what it means.

It means that two or three large manufacturing interests in the country, not satisfied with the enormous profits they have realized during the last six years, are determined at whatever hazard to put more money in their pockets; and to this end they have persuaded some and coerced other manufacturing interests to unite with them in a great combination demand for what they call protection to American labor, but what some others call robbery of the American laborer and agriculturist.

It is the fashion to denounce every man who does not favor a prohibitory tariff as a free-trader. The charge is made that free-trade agents are at work to influence Congress, and that our tables are incumbered with free-trade documents. Who has seen these free-trade agents? I have yet to see the first man who was in favor of free trade, nor have I seen any man who was opposed to a revenue tariff which would incidentally protect such branches of American industry as needed the fostering aid of the Government. It is on questions of detail that we differ. We disagree as to how much money shall be taken from the pocket of Peter to support and enrich his brother Paul.

Iowa seems to have been represented on the tariff by gentlemen of every shade of opinion. When the Senator explains again, as he has promised, I hope he will reconcile his own opinions and explain why his predecessor and himself, both Republicans, are so divergent on the same question.

Time will not permit me to collect together the many inconsistencies of Republican leaders. They would fill volumes of no small size. I think I could show the Senator [Mr. HISCOCK], who has just preceded me in this debate, voting to put salt on the free-list and now sustaining the substitute with salt on the dutiable list. I could show other Senators now here voting free salt, but will confine my references to those who have just discussed this substitute.

The debate on the substitute will offer the opportunity to each Senator to explain his present position and reconcile what now appears to be a remarkable departure from previous expressions of political convictions.

SALT.

Apart from the vast utility of salt in domestic life, in preserving meat and fish both for domestic consumption and during the longest voyages, it furnishes muriatic acid and soda, a glaze for coarse pottery, improves the whiteness and clearness of glass, gives hardness to soap; in melting metals it preserves the surface from calcination; it is employed to advantage in some assays; it is used as a mordant and for improving certain colors, and enters more or less into as many of the other processes of the arts and sciences as alcohol, which the substitute relieves from tax.

Its tax was one of the causes of the first French revolution, and among the relief of that outbreak was the abolishment of the odious *gabelle* or salt tax. In England the duty was abolished in 1823. Its territorial distribution is co-extensive with the earth and the seas yield it also for the use of man. Its taxation marks the progress of despotism in ancient Rome, in France, in Russia, in Austria, and its relief from taxes measures the progress of enlightened government. The exigencies of war and the pressure of debt may excuse the burdening of this indispensable necessary of life with the increased cost of a tax, but such an imposition in time of peace and prosperity measures the extent to which privilege and favoritism oppress the people in their daily life and struggle. The Mills bill places salt on the free-list; the Senate substitute puts it on the dutiable-list. The first consults the interests of the people; the second looks only to the profits of the manufacturers.

NORTHERN AND SOUTHERN STATES.

The Senator from New York [Mr. HISCOCK] enters into statistical analysis to show, relatively and comparatively, the North and the South in manufactural interest. His theory seems to be that inasmuch as the South has but little investment in manufactures she has but little interest in the tariff question. I submit that this is neither a broad and liberal nor even a correct view. The interest taken by the South in manufactures is not restricted to the amount of capital which her citizens may have invested therein; with a broader and more liberal view she looks to the use of the raw materials which prosper more freely under her climate than in the colder regions of the North.

The manufacturers wherever located are dependent upon the productions of the South and West; and that is a narrow and contracted view which is confined either to the locality of manufactures or to the amount of interest invested. The exact line of demarkation drawn by the Senator to designate the North has escaped my memory, but I was forcibly impressed with the fact that in classifying the Southern States he failed to credit them with the large resources and extensive development of manufactures in Missouri, Kentucky, West Virginia, and Maryland. An estimate of resources of any kind for the Southern group of States which takes no account of these four States, is too palpably erroneous to call for reply. If I may use the expression, it is a statistical play of Hamlet with the Prince of Denmark left out.

Whatever the purpose of such restricted comparison, the effect is to belittle and dwarf the South, and then impute jealousy to her people, because they are presumed to be less prosperous than the North. I deny the proposition that the South is less prosperous than the North, except by the devastations of war and the greater devastations inflicted since by the Republican party. There is no standard or measurement for prosperity except that of money value, and even that is arrived at by statistics which are not always reliable. But by that standard it certainly comes with indifferent grace from the Senator who represents in part the great commercial metropolis, New York City, to forget the productive values of the South which flow through the channels of trade to and from that great city.

The cotton of the South, in value from thirty to fifty millions, finds its way to market through the commission houses which the Senator represents, and deposits its tolls of commission in the tills of his constituency; and to the cotton must be added the naval stores, the rice, the sugar, and the molasses, as well as the profits which her merchants leave behind them in their purchases of goods. When all these are estimated, the words of the farewell address of the father of his country will find greater significance than the Senator gives to them:

The North, in an unrestrained intercourse with the South, protected by the equal (not protective) laws of a common Government, finds in the productions of the latter great additional resources of maritime and commercial enterprise and precious materials of manufacturing industry.

REDUCTION CONFINED TO FOUR HEADINGS.

According to the report of the majority there are only four headings under which the people are to enjoy relief from taxation; they are:

Sugar relief	$27,759,783.95
Free-list relief	6,428,095.56
Tobacco relief	24,371,460.98
Alcohol relief	7,000,000.00
Total	65,559,340.49

Estimating the present population at 68,000,000 the per capita relief is, from sugar, 41 cents, or $2.05 for a family of 5 persons; from free-list 6½ cents, for the family 32 cents; from alcohol 9½ cents, for the family 47½ cents. Total per capita relief, 57 cents; total family relief, $2.84½.

The smokers, chewers, and snuffers only enjoy the reduction of the tax on tobacco, but these persons are but a small part of the whole people, and they are taxed only when they voluntarily use the weed. Therefore for every dollar of relief to the chewers, smokers, and snuffers a dollar of other tax remains on the whole people. There can be no per capita relief from tobacco, because the whole people do not use tobacco. The women and children, a very large part of the men and boys, neither smoke nor chew nor snuff, yet all the people wear woolen clothes, sleep under blankets, and consume the necessaries of life which remain taxed

because the smokers and chewers and snuffers are relieved from tax. The least commendable part of the Mills bill is made the chief virtue of the substitute.

The extent of relief to the family by the substitute is $2.84½. That is the relief which an ordinary family of five persons would receive under the substitute.

The amount which the same family would contribute to the Government under the substitute can not be stated until proper tables have been prepared. But as the duties which really bear heaviest on the people have not been reduced materially below those of the existing law, the subjoined table taken from the speech of Hon. JOHN D. STEWART, of Georgia, in the House on May 2, will serve to contrast the Mills bill with the substitute in the matter of relief to a family in an investment of $501. It will be seen that the Mills bill reduces taxes $84.29 and the substitute $2.94½ for the family of five persons.

Under the present law let us see what an ordinary family on a farm has to contribute to the Government. I submit a schedule of articles mostly used by a family as an illustration, and the duty on them, and also showing the reduction proposed under the Mills bill:

	Value.	Duty.		Net saving.
		Per cent.		
One cook stove	$35.00	47=	$16.45	
By Mills bill		31=	10.85	
				$5.60
One set crockery	12.00	55=	6.60	
By Mills bill		35=	4.20	
				2.40
One set cheap glassware	4.00	56=	2.24	
By Mills bill		41=	1.64	
				.60
One set cheap cutlery	2.00	50=	1.00	
By Mills bill		35=	.70	
				.30
Two carpets, $12 and $15	27.00	47=	12.00	
By Mills bill		30=	8.00	
				4.00
Sugar	20.00	60=	12.00	
By Mills bill		50=	10.00	
				2.00
Molasses	10.00	47=	4.70	
By Mills bill		35=	3.50	
				1.20
Salt	3.00	40=	1.20	
By Mills bill		Free-list.		
				1.20
Two suits each for father and two sons, six suits, $14	84.00	54=	45.36	
By Mills bill		45=	37.80	
				7.56
Two suits each for mother and two daughters, six suits, $14	84.00	82=	68.88	
By Mills bill		40=	33.60	
				35.28
Twelve pairs shoes, $2.50 each	30.00	30=	9.00	
By Mills bill		15=	4.50	
				4.50
Six wool hats, $1 each	6.00	73=	4.38	
By Mills bill		40=	2.40	
				1.98
Six fur hats, $2.50 each	15.00	52=	7.80	
By Mills bill		40=	6.20	
				1.60
Six ladies' hats, $3 each	18.00	70=	12.60	
By Mills bill		40=	7.20	
				5.40
Six bonnets for ladies, $3 each	18.00	70=	12.60	
By Mills bill		40=	7.20	
				5.40
Farming tools, including plows, gear, handsaw, ax, draw-knife, chains, etc	$60.00	47=	$28.20	
By Mills bill		34=	13.60	
				14.60
Medicines	20.00	*48=	9.80	
By Mills bill		30=	6.00	
				3.80
Thread, needles, thimbles, scissors, etc	12.00	35=	4.20	
By Mills bill		20=	2.40	
				1.80
Four pairs blankets, $3 each	12.00	70=	8.40	
By Mills bill		40=	4.80	
				3.60
Two umbrellas, $2.50 each	5.00	40=	2.00	
By Mills bill		30=	1.50	
				.50
Cotton hosiery, undershirts, etc	8.00	45=	3.60	
By Mills bill		30=	2.40	
				1.20
Window glass	2.00	60=	1.20	
By Mills bill		43=	.86	
				.34
Starch	4.00	94=	3.70	
By Mills bill		47=	1.88	
				1.82
Rice	10.00	113=	11.30	
By Mills bill		100=	10.00	
				1.30
Total cost under present tariff	501.00		189.27	
Under Mills bill			104.98	
				84.29

*Average.

But, Mr. President, there must always follow unjust consequences and individual hardships under any system of taxation, and that policy which minimizes these hardships is sought by the Democratic party in a "tariff for revenue," while the maximum of benefits to the minimum of people is the natural and unavoidable result of protection.

Both parties, then, Mr. President, are agreed upon a tariff for the support of the Government, but the Republican party goes further and favors a tariff specially in the interest of manufactories, independent of such benefits as incidentally flow from a tariff for revenue. This, in the main, is the issue—the shibboleth by which parties will be recognized in the coming battle.

The difference seems to flow from the natural tendencies of the Democratic party to preserve equality and justice between individuals and interests, and of the Republican party to build up favorite interests out of labor and the more productive interests of the country. Despotisms, Mr. President, exercise dominion under the pretense of protection, but in a democracy the citizen exercises self-government and seeks the free exercise of his labor and the enjoyment of its proceeds without restriction of the government other than for the protection of his rights and liberty, in verification of that incisive and expressive utterance of Mr. Lincoln, that our Government was "of the people, by the people, and for the people."

Tax is defined to be a levy upon property for the support of government, and is just, as it regards equality of all interests and individuals, according to their ability to pay. The existing tariff exempts the $50,000,000,000 of capital of our country from taxation while it taxes the food and raiment and medicine consumed by the poor, without exception from age, sex, color, or condition.

Whilst the British Government emerged from barbarism, property, being mostly in the hands of the aristocracy, was not taxed, and the revenues of the sovereign were derived from hereditary customs, which embraced taxes on commerce, that still retain the name of "customs," from the rude prerogatives of the crown, or tariffs from "customs," equally piratical as at Tariffa on the Mediterranean. The means for the support of government were afterwards increased by the representatives of industrial communities, who voiced, to some extent, the will of the people; and since then the aristocracy have been taxed according to their property possessions, and commerce has become free, and wealth has multiplied and become more varied and diffused, and along with it has enlarged the spirit of liberty and equality among the people.

The manufactories of the American colonies were domestic, or were operated in the domestic circles by families, and in the workshops of mechanics; and as early as 1663 the colonists opposed all "navigation acts;" and in their resistance to restrictions on commerce was first displayed the spirit of the Revolution.

NO OPPOSITION TO MANUFACTURES.

Soon after its establishment, the Government of the United States passed (in 1789) a tariff for revenue that operated for the benefit of these domestic manufactories in the families of the people, and in the workshops of the mechanics, without distinction; for whilst it raised the prices of imported goods it also incidentally advanced the prices of their domestic manufactures of which the consumers were the owners.

The manufactures which were thus intended to be incidentally protected were chiefly those of individuals, which were made by the family in the household and workshop. They were the products of the distaff, the hand-loom, the hammer, the anvil, the jack-plane, the draw-knife, and the shoe-bench, and were not those of associated and aggregated capital of corporations, trusts, and combinations. Protection under that tariff, as well as under its modifications and changes, down to 1816, was to help the individual, or the simple partnership, where the individual liability obtained, and the competition which it guarded was between the individual citizens in the house and home and the aggregated capital abroad and foreign to the land. Our present system of manufactures had no existence under that tariff. Corporations with chartered privileges, relieving the individual property of its owners from liability for the debts of the concern, now the usual mode of operating, had then no existence here. The decision in the Dartmouth College case had not then found expression favoring charters and vested rights in response to the matchless argument of Mr. Webster, inspired by excessive devotional love for his *alma mater*.

I learn from Bishop's History of Manufactures that in a list of thirty-two iron manufactories whose names were attached to a petition in 1785 there is not the name of either a company or firm, much less a corporation. The one hundred and thirty families which in 1791 constituted the population of the town of Pittsburgh, by far the largest iron manufactory then on the continent, as it is to-day, were composed of five blacksmiths, two whitesmiths, three wheelwrights, two tinners, one clock and watch maker, and thirty-seven persons manufacturing, but not a single firm or corporation. Thomas Jefferson "made nails at the rate of about a ton a month at a considerable profit," and was an inventor of many useful devices, and, if I may so say, besides *inventing* the Democratic party.

In the great trades procession in Philadelphia, which in 1789 welcomed the formation of the Government under the Constitution, there were no corporations, combinations, pools, or trusts; but individuals

and firms represented American manufactures, and their individual property was legally held liable for all their obligations. The encouragement and protection which this tariff of 1789 extended to individuals was incidental to revenue; its 7½ per cent. duty on the invoice value of bar, bolt, and pig-iron, its one-half cent per pound duty on steel, and 1 cent per pound on nails were the liberal protection which individuals received from the Congress, composed to a very large extent of the framers of the Constitution.

That kind of protection, incidental to revenues at these low rates, compared to the present, was nominal, and continued until 1816, when the doctrine of subordinating revenues to protection made its first appearance in our politics. Under the fostering care of protection the individual manufacturer has disappeared and no longer enjoys the encouragement and protection of his Government. The scales, by some legerdemain, have turned, and the individual then protected, has today become the victim of protection, and in his place the associated wealth of corporations and the greed and chicanery of combinations, pools, and trusts, with modern "corsairs" at their head, now fill the land with hardship and want, domineer over the individual, and dictate the laws of Congress and of State Legislatures.

MONOPOLY THE CHILD OF PROTECTION.

In every department of business protection has planted and cultivated these un-American institutions. The food we eat, the beverages we drink, the clothes we wear, the conveyances that transport our persons or productions—in fact, all we are or all we can hope to become, is created, controlled, doctored and manipulated by these hectoring and domineering combinations. They are both under and outside of the tariff; they are everywhere and in every kind of production and mechanism, from the nursing-bottle of the infant to the nail driven in the coffin of the dead old man. And their monopoly of the necessaries of life, with increasing power, adds to the burdens incident to humanity and are inseparable from existence.

It was the expectation of Mr. Hamilton, expressed in his celebrated report in 1791 on manufactures, that their protection and encouragement by duties and imports would render monopoly impossible, but experience has refuted his conclusions and shows that monopolies have grown greater in volume and stronger in power and influence than in his day (see third volume Hamilton's Works); and the dream of Mr. Clay in 1824 was that prosperous manufactories would reduce prices and alleviate the hardships of life for the poor and the workingman and that protection would prove a barrier to monopolies. (See his speech on tariff in 1824.)

But the first century of our existence as a government is about to close with this people bound and fettered in every relation of life to hard task-masters of monopoly under its various and varying forms of combinations, pools, and trusts.

So, Mr. President, this original, our first tariff act, was thus preferred as a measure for revenue because it incidentally operated to benefit the laborer, who was both the maker and owner of these domestic manufactures; still the principle of equality was urged, not only for exercise in individual relations at home, but in our commerce with all nations.

Harmony and a liberal intercourse with all nations—

Says Washington in his farewell address—

are recommended by policy, humanity, and interest, and our commercial policy should hold an equal and impartial hand, neither seeking nor granting exclusive favors nor preferences, consulting the natural course of things, differing and diversifying by gentle means the streams of commerce by favoring nothing.

The incidental benefits of the tariff for revenue by raising the prices of these domestic manufactures, as all bounties will do, invited the competition of capital, which, with hired labor and machinery, has absorbed the family manufactures and those of the workshops of the laborers into its enlarged factories, until the laborers, while not ceasing to be consumers, have ceased to be the owners of their products, and their advanced prices now go to the stockholders and capitalists, who own these factories, and not as formerly to the laboring owners. And in competition with each other at home, as well as with those abroad, and for larger profits, these capitalists depress the wages of their laborers, who, for the subsistence of themselves and families, "strike" to prevent the competition among themselves that might impoverish and degrade them.

The tariff protected the laborer when he owned the goods, and it protects the capitalists now who own them and oppresses the laborer who pays the prices of the goods. The free exchange of their industries belongs to the natural equity of all legitimate industries, and it is the duty of Government to regard equally the rights of all, as it is also the duty of all to contribute according to their ability for its defense and support. Legislation, whenever a distinction has to be made, should be for the greatest good to the greatest number.

Agriculture is the foundation and support of all other industries, and, more largely than others, exercises labor in independent relations with capital, and contributes more perhaps than all others to the liberty and happiness of mankind. The values of the products of our fields are not confined to home demands, but are enlarged through the exchanges of the world, to feed and clothe its nations. It is not good policy that they should be confined, for there are no invading Tartars against whom we want to build a Chinese wall; let them find a market wherever one exists, for unless you sell you can not buy.

Should our agricultural products be exchanged abroad for money alone its increase at home would soon depreciate the value sufficiently to depress all industries and to damage all social and business relations.

Were our exchanges represented as by one of our merchants he must consider that after the exchange of our agricultural products for the cheaper goods abroad he would have to pay to our Government a tax or tariff for permission to sell them at home; hence he would convert abroad a sufficient quantity of his agricultural products into money to pay the tariff on the balance he should receive in exchange, which, after such deduction, would amount to about one-half the quantity he would have received had there been no tariff; and after paying the tariff to the Government he advances the prices of his goods to the consumer in selling then at home to the extent of the tariff, or freights, exchange, and insurance, interest upon the money invested, not failing to charge profits on all these, but places, in sales to the consumer, like profits on the amount paid as tariff, in order to compensate himself for the tax he had paid to the Government. The home manufacturer then advances the prices of his goods that pay no tariff, which advanced prices are paid by the consumers, including laborers and their families, which constitutes what, by a strange perversion, is called the "protection" of the home laborer against the foreign laborer.

The foreign laborer pays for his necessaries the reduced price paid abroad by the merchant, and only that, while the home laborer pays in addition the amount of the tariff to the merchant or to the home manufacturer; but by absorbing the domestic manufactures of our families and of the work-shops of our laborers and substituting, under the protection and by aid of class legislation, vast establishments in which work is done by iron muscles that never weary nor wear out, propelled by that wonder-worker, steam, the sales of the home manufactures have increased until they largely exceed those of goods imported, as they do in value the revenue of the Government; and on these sales of manufactured goods untold millions are realized by the favored few, and the millions of toilers and their families as consumers are being oppressed and becoming poorer and poorer.

By what mode of operation are these wonderful results brought about? Has the dream of the alchemist become a reality and the hidden secret of the "philosopher's stone" been discovered, by which the baser metals are turned to gold? Mr. President, does not the secret consist in that unequal, invidious class legislation, with its devious methods of enforcement known as the "war tariff?"

Let us glance for a moment at some of the inside workings of this scheme, miscalled protection, operating with the approval of national legislation, and see how the magic spell of this modern American necromancy turns all it touches into gold.

EFFECT OF THE TARIFF ON RAILROADS.

The Bessemer steel combination in 1866 effected a consolidation of all the American patents for the manufacture of this kind of steel, and then, under the protective tariff, was free to occupy and hold the country, its people, and its railroads, subject to its greed and powerless to escape from its exactions. In that year there was produced by the American steel combination 1,500,000 tons. The 140,000 miles of railroads in the United States have been made, by the existing protective tariff, helplessly subject to this combination. We built in 1887 from 10,000 to 12,000 miles of railroads, every mile of which required 90 tons of steel rail, which cost not less than $15 per ton more from that combination than they could have been purchased for in England. Here was a tax of $13,500,000 exacted of new railroads. The life of a rail is ten years, and the entire system requires renewal within that time. The additional cost of $1,350 per mile, exacted by this combination, entails, for 140,000 miles, a charge of $18,900,000. In other words, the existing protective tariff would impose upon the building and repairing of railroads a charge of $32,400,000 more than the same materials could be bought under a freer and less restrictive duty.

Again, sixty-odd companies are combined in the production of salt, whose exactions are aided and promoted by a protective duty of 39.3 per cent.

Again, the refiners' trust in the sugar trade is encouraged and protected by a duty of 82.04 per cent., and the same system of protection of exaction and imposition follows and adheres to almost every article necessary to life and comfort. Of these trusts Mr. Blaine says:

There is not one among them all that derives its being, owes its organization, or came up under the patronage of the National Government.

Strictly and exactly speaking this remark may be true, and yet nearly every one of these trusts is promoted and made profitable by the customs duty which, embarrassing the sale of the imported article, gives to the domestic article the control of the home market. In a prominent influential daily paper (the New York World of September

11, 1888) the following list of "tariff-fostered trusts" is given, with the per cent. of protection and the labor cost per $100:

Title.	Protection.	Labor.
	Per cent.	*Per* $100.
Tin trust	32	$21
General iron trust	45	25
Bessemer-steel trust	84	9
Soap trust	26	3
Linseed-oil trust	54	5
Envelope trust	25	11
Cordage trust	25	12
Paper-bag trust	35	15
Salt trust	50	25
Crockery trust	56	40
General steel trust	45	29
Plow-steel trust	45	29
Nail trust	45	22
Copper trust	24	22
Zinc trust	52	25
Lead trust	74	65
Glass trust	55	45
Rubber-shoe trust	25	24

And may be added cotton bagging and ties, which are now heavily oppressing the planter, and numerous others.

The President has well said of the Democratic party:

We believe that these trusts are the natural offspring of a market artificially restricted; that an inordinately high tariff, besides furnishing the temptation for their existence, enlarges the limits within which they may operate against the people and thus increase the extent of their power for wrong-doing. With an unutterable hatred of all such schemes we count the checking of their baleful operations among the good results produced by revenue reform.

And yet when the Democratic party seeks to relieve the people from these exactions by repealing and reducing duties which produce a revenue no longer needed in its present volume, that simple and necessary proposition crystallizes both parties around threads of ancient politics and turns back our approaching Presidential election to the questions which divided the country more than a half century ago when corporations, trusts, combinations, and pools were unknown, or certainly not known to such uses as they are now prostituted; so that almost at the threshold of a new century we find our countrymen thrashing over again the old straw our fathers left behind them, but with different and entirely new machinery.

It would be not more ridiculous, but less painful, to clothe ourselves in the old continental dress—the silk stockings, knee buckles, and buckskin shirts of our fathers—than to fetter and bind the energy, enterprise, and industry of sixty millions of their descendants in the leading-strings which helped their "infant industries" when the owners did their own work and enjoyed the profits themselves in their own simple and honest way, by which no one was oppressed—this before Whitney's gin had done its work by increasing a thousand-fold cotton culture in the South, or Arkwright's genius had multiplied the single spindle our grandmothers used as they "sat on the creepie and spun at the wheel" a single thread into the twirling millions which now sing in factories, with monopolistic hum, under the combination of machinery and pressure of steam.

These once simple threads spun and woven by our grandmothers, knew little of combined strength and served a plain and honest purpose, a stranger to political entanglements, but now its multiple has oppressive combinations, with commercial potency and political entanglements as troublesome to unravel as were those threads Penelope wrought for the shroud of Laertes while impatiently awaiting the return of Ulysses from his mysterious wanderings.

HOME MARKET AND AGRICULTURE.

The surplus domestic productions of the country over and above the consumption at home amounted in 1887 to $703,622,923, as stated in the report of the Secretary of the Treasury to this Congress. That vast value of our industries was sent abroad for a market, first, because it could not be consumed at home, and, second, because there were needed at home many articles of foreign productions.

In the exchange this country swapped, to use a homely phrase, $716,183,211 worth of its own products for $692,319,768 worth of the products of other people, and received also the difference, $23,863,443 worth of exchange. The products which composed the exports were, from agriculture, $523,073,798, or 74.41 per cent.; from manufacture, $136,735,105, or 19.45 per cent.; from mining (including mineral oil), $11,758,662, or 1.67 per cent.; from the forest, $21,126,273, or 3.01 per cent.; from fisheries, $5,155,775, or .73 per cent.; of other products, $5,173,310, or .73 per cent. (Fitzel's statistical report to Congress.)

Agriculture, which is victimized by these tariff laws, thus provided 74.41 per cent., or three-fourths, and all others 25.59 per cent. In the exports agriculture bears to manufacture the proportion of 75 to 20. In the labor of the country engaged in these two sources of production, agriculture employed, in 1880, 7,670,493 laborers, and manufacturers employed 2,732,595, in the ratio of 3 to 1. Why should the three agricultural laborers be forced to pay taxes for the one laborer in manufacture? The agricultural laborer may be unskilled, yet he guides the plow and gathers in the products which constitute 75 per cent. of the country's exports. Is he not as much entitled, and no more, to the protection and encouragement of the Government as his brother laborer in the factories of the country?

Agriculture, Mr. President, is the natural calling of man; it is the chief source of animal life; upon it depend the diversified interests of society; it turns the wheels of the factory, and propels the car of commerce; it gives strength to the "sinews of war," and potency to the wand of peace; then should it not rather be fostered than slighted by unfriendly legislation? Is not this culture of the field, the orchard, and garden the source of the bread of life on which all must live, and to which in destitution and want all turn, with the hope and faith of old Elijah when he prayed on Mount Carmel amidst the priests of Baal for the clouds to overcast and give rainfall on the dry earth to save a famishing people?

It is estimated that between one and two thousand millions of human beings, besides the domestic animals, are daily fed from the products of the soil; yet, notwithstanding the profusion and prodigality that greets us on every side in this teeming land, the soil untilled for a single year would cause the wail of woe to supplant "the song of the reaper," and the giant specter of famine to brood over every hearthstone. Then is it not suicide to visit upon this interest invidious and hurtful legislation?

What warrant exists in the Constitution, or institutions of this country, for favors to any class of its citizens which are not equally extended to all? If we listen to Washington's farewell address, heretofore quoted, equality among all the children of our common mother is, under the Constitution and teachings of our fathers, the American doctrine. In that (the principle of equality and justice) were laid by our fathers the foundation-stones of our political structure, and any system of obligation that exacts tribute from one class or one person for another class or another person to promote the individual interest of the one violates the fundamental idea of American equality, saps the foundation, and crushes the key of its supporting arch.

AGRICULTURE BUYS IMPORTS.

The agricultural products that are exported are those for which no market exists in this country, and amounted last year to seven hundred and three millions, which were sold in the markets where free trade fixes their price. On the other hand, more than 80 per cent. of products of manufactures were sold in this country with a protected market of over 47 per cent. And this 80 per cent: is five times the amount in value of revenue collected at the customs, and is a bounty that comes from the consumer and goes to the manufacturer who makes and sells the goods consumed in this country; for they sell their goods to the consumer at the same price as if they had paid the tariff tax. Thus the farmer is compelled to sell under free trade, but he must buy under protection.

The pauper labor of Europe and Asia fixes the price of the products of agriculture by competition in the open markets of the world, but the protected owners of factories in the United States fix the prices of what the farmer buys. Is it to be wondered that the farmer complains that while pauper labor abroad fixes the price of all he has to sell, that his clothing, his implements, his transportation, and many of the necessaries of life are not only taxed for the benefit of others, but the price itself is regulated and arranged to suit the greed and avarice of combinations, pools, and trusts?

The amount of goods imported in 1881 was estimated at $753,240,125; and the amount of home manufactures of all descriptions during the year ending June 30, 1883, was estimated at $7,800,000,000. For illustration, let it be supposed that the one-fifth of the latter amount was of the same description of goods as those taxed, then the amount received as incidental protection by our home manufacturers would be twice the amount raised by the Government. So far as this amount received by the Government results from a tariff for revenue, the advocates of the Mills bill, I will say the Democratic party, does not object to it. But it insists, inasmuch as the capital of the manufacturers pays nothing to the Government, and the advanced prices of their goods are paid by their laborers, as by other consumers, that the manufacturers should be satisfied with getting double the amount of the revenue that the Government receives.

But it seems their influence has become organized into the Republican party—for twenty-five years hitherto the strongest party, as a party organization, known to the country—and seeks to control legislation specially for large profits by the influence of capital in business relations—and employment, whether so considered or not, frequently operates to practically support their measures—whilst agricultural laborers vote almost universally against the wishes of their employers without the slightest apprehension of results on that account. Should the tariff average 50 per cent. on all our imports (and it does within a fraction), our exports would be exchanged abroad for a sufficiency of money to pay it, which would continue to swell the volume of our circulation till its depreciation would reduce the home value of $1.50 to that of $1 abroad.

The prices of commodities that make up the cost of home production would correspondingly rise, without any increase of value, till the cost of home production would amount to that of competition abroad and the tariff added, and would continue to advance till the foreign prod-

uct would again become cheaper than similar varieties at home, when importations would be resumed on the basis of an increasing cost of not less than 50 per cent. on all home production. Fixed compensation, the wages of labor, and the prices of transportation, and of home products sold abroad, would not rise, but would lose, at least to the extent of the tariff, or 50 per cent. This would include our home manufactures sold abroad; for their home-cost having risen 50 per cent., would be equal to the tariff when there would be no protection at home, but in the foreign market; the foreign manufacturer would not pay our tariff, and our home-cost would follow our home manufactures as a tax of 50 per cent. in favor of the foreign manufacturer.

The amount of sales of cotton fabrics in South America from the United States has fallen to less than $3,000,000, whilst that of Great Britain has risen to more than $60,000,000.

ENLARGE THE MARKETS.

There is a Democratic international policy underlying the effort of that party at tariff reform; a policy which seeks to open the markets of the world to American manufacturers, which hopes to increase the number and wages of workingmen by multiplying the products of factories until every market of all the nations shall deal in the cheap and beautiful and useful products of American industry, invention, and ingenuity. To that end the national Democratic platform of 1884 announced that—

We favor an American policy based on more intimate commercial relations with the sixteen sister republics of North, Central, and South America, but entangling alliances with none.

That declaration is in perfect harmony with the initial platform of the party, the inaugural address of Mr. Jefferson, which declared for—

Peace, commerce, and honest friendship with all nations, entangling alliances with none.

In the line of the platform of 1884 the Senator from Maryland [Mr. GORMAN] introduced the "bill to provide for a joint celebration by the sixteen American republics on the 4th of March, 1889, in honor of the one hundredth anniversary of the Constitution of the parent Republic, the United States."

This was an important step to recover to American trade, commerce, and manufactures the great markets of the American republics—to remove the humiliating fact that with an annual manufacturing product valued at $5,369,579,191, according to the census of 1880, but a beggarly 2 per cent. of our manufactures finds a market in all the foreign markets. And that while the republics of South America annually import from all nations $475,000,000, of that sum the great manufactories of the United States furnish but $77,141,000.

The responsibility for this great loss of trade lies with the protective policy of the Republican party. The restrictive duties which that policy has imposed on the raw materials produced by American republics have driven their commerce and their products to the ports of European nations, where less duties or free trade awaits their arrival. Their hemlock, their dye-woods, their textile grasses, and their wool were all taxed at our custom-houses until the trade with the United States became unprofitable. Hence our manufactures find but a limited sale in these Central and South American countries. It is a universal rule that no people will buy where they can not sell, and hence where burdensome restrictions are imposed on imports there must be a corresponding decline of exports. The consular reports to the State Department contain many virtual protests from our consular representatives against the bad policy of restriction by high duties, as well as forcible arguments for a more liberal fiscal arrangement with the American republics.

In the same direction of liberality of trade and enlargement of markets were the resolutions introduced in the House of Representatives by Hon. R. W. TOWNSHEND, on January 7, 1884, for an American zollverein, or customs union, on the principle of free-trade between all American republics, and like, or common duties, on the products of all other nations.

The great Mississippi Valley, Mr. President, pours its abundant products both of the soil and the workshop through the great river into the very lap of all the American republics. But the restrictive policy of the Republican party has heretofore as effectually divested those markets of American products as the Gulf Stream has carried the waters northward and Europeward.

Tennessee, an important factor in all that concerns the Mississippi Valley, throbbing with vital energy, near the heart of this great country, has felt every restraint that impeded the progress or hindered the development of that great empire of production. The need that is greatest along that valley is markets for the wealth which nature and man annually turns out. That necessity will soon demand a larger field than the home market of 60,000,000 people. The world's market of more than 1,000,000,000 of people can only be opened to the country's energy by the liberal policy of the Democratic party, by which a fair exchange of national products is taxed only for the economic expenses of an honest government.

As the quantity of the precious metals—

Says Mr. Blackstone—

increases, this universal medium, or common sign, will sink in value and grow less precious, and *vice versa*.

The increased quantity of the whole—

Says Mr. Say, in his Political Economy—

reduces the value of any part, and *vice versa*.

The value, then, of our money is intensified or depreciated in the hands of our laborers as our agricultural products are exchanged abroad for products or money.

The laborers of our country, then, Mr. President, not only pay about 50 per cent. tax on their food and raiment and medicine to the Government and manufacturers, but the value of their wages is reduced in the same proportion, whilst the foreign laborers in competition do not pay such tax, and the value of their money is not depressed.

The tariff expressing the amount of cost of production in a nation operates as a tax on its productions in all the markets of the world besides its own, and at home, our financial history shows, is periodically repeated, in succession, an increase in the volume of circulation and depreciation in the value of money, a rise in the cost of production, excessive importations, and a demand for the coin, followed by the substitution and increase of paper and the convulsive contraction of its value, so that in all this the tendency is to absorb the accumulation of the money and to swell the fortunes of a few.

It will be seen from the American Almanac of 1879 that the cost of producing cotton in 1876 was about 9.2 cents per pound and the price obtained 9.8 cents per pound, and I suppose the statistics of later years, during the entire decade, would show, besides the waste of the fields and the tattered condition of the laborers, a more unfavorable comparison between its prices and the cost of its production. The same depression may be observed of all of our agricultural products sold abroad, and, meanwhile, to our shipping this depression has been more destructive than all the storms that have swept over the sea. And but for the amazing productive power of the agricultural South and West serious disaster would have ere now come upon us.

In this connection it is pertinent to say that Spain imported vast quantities of gold and silver from her discoveries in America, and as the volume of her circulation increased the cost of her production was proportionately greater than in the rest of Europe, for, as the money-metal became more plentiful, it became less valuable in its purchasing capacity. "England, under the first Mary, then under the Stuarts, sought the Spanish trade, and during the reign of James II, by the liberal policy of her laws, conducted almost the entire Spanish trade with Europe. The consequence was, the material wealth of England increased more rapidly duirng the latter reign than at any other period of the British Empire."

Spain passed tariff and restrictive laws to retain her circulation, whilst England enlarged her commerce. Spain, from her narrow policy, hemmed in her resources by restrictive commercial laws and lost much of her prestige and commerce with the world, which intensified the value of her money and reduced the cost of production. England grew richer and Spain poorer. England, then a "pent-up Utica," appealed to Neptune for the power of his trident, opened her ports, extended her commerce to the world, became rich, prosperous, and powerful.

And so, Mr. President, we are asked to play the part of Spain—draw around us a cordon, by allowing restrictive and onerous war-tariff laws to remain and become crystallized into our statutes, and thus continue to lessen the purchasing capacity of our money and increase the cost of production. Is this good political economy? Is it wise legislation? Furthermore, this tends to invite travel and investment abroad, where the purchasing capacity of money is greater. Hence, the hegira of capitalists and their families at every incoming spring and autumn, transferring millions of money annually from our shores to Europe, indulging in marvelous expenditures while enjoying with magnetic companions coaching trips beneath the Druid oaks of merry old England, and in Scotland toying with the historic curios of Abbotsford, lunching on the banks of the Clyde, or regaling with hilarity beneath the shadows of the peaks of Ben Lomond, and return less in love with the simple manners and plain democratic institutions of our fathers. And well may Mr. Carnegie spend a portion of his $5,000 daily income, arising from operating in iron under the protection of our existing tariff laws, in Scotland, where the purchasing capacity of money is greater.

The protectionists, under the inspiration of Mr. Blaine, in a celebrated speech three years ago, boast that $3,585,408,792.52 of the public debt, including interest since 1860, has been paid mainly through the proceeds of the tatiff. This boastful statement finds echo with Republicans now. To the extent that it was paid subsequent to the repeal of laws that taxed incomes, it may be replied that not one cent has been paid by capital nor by the proceeds of manufactures, but that the means were obtained by a tax on the goods received in exchange for our agricultural products (as the representative of labor) paid by consumers without any exception of age, color, or condition.

PROTECTION ADVANCES PRICES.

I have assumed, and I think correctly, that the amount paid to the manufacturers on the advanced prices of their goods is twice the amount paid to the Government, so that in paying the $3,585,408,792.52 to the Government, as is the boast of protectionists, the consumers, embracing all classes of laborers and their families, paid to the capitalists who owned the manufactories, for protection, twice that amount, or $7,170,517,585. Nor does this latter large amount include that received for the support of Government nor that paid on our debt and its interest

since 1860. Thus, all amounts raised by the tariff and expended for pensions, internal improvements, public buildings, education, etc., are paid, not by capital, but by consumers, embracing laborers of every description, who pay twice the amount to home manufacturers that they pay to the Government for these purposes.

Nor will it appear strange that the capitalists and protectionists should support schemes for profligate expenditure of money and the repeal of the tax on whisky and tobacco, etc., when it is considered that they will pay nothing beyond that paid by ordinary consumers and the manufacturers will receive $2 for every dollar the Government will collect by a tariff for such purposes as to supply the revenue thus withdrawn. Yet the manufacturer is not satisfied with the exemption of his capital from taxation, and with incidental protection, but as competition multiplies and the cost of production increases, he becomes clamorous, and with the greed of a Turkish bashaw reduces the wages of his laborers, and demands that the consumers, embracing all kinds of laborers, be further taxed, or tariffized, especially for his benefit; and now, under the operation of this special and partial legislation, besides a sufficiency for the support of Government, a vast amount has accumulated in the Treasury that invites wasteful appropriations.

Nor is the enormously-accumulated interest of manufacturers in sympathy with honesty, economy, and virtue in the administration of the Government; for every dollar that is wasted, or is stolen by dishonest Government officials, to replace it the consumer is taxed, through this unequal operation of the tariff for the benefit of the manufacturer, twice the amount wasted or taken, and for every dollar thus lost the manufacturer gets two. Nor is it in sympathy with republican institutions and their principle of equality, as it tends to build up rich and privileged classes, not only exempt from national taxation, but with power to tax the consumers of manufactures (including laborers and the poor of every description) at the same rates that Government taxes them for its support on goods from abroad.

Again, the friends of protection further compare the values of the property of the United States, estimated at $16,000,000,000 in 1860, and at $50,000,000,000 in 1883, and 1887, $62,000,000,000, and ignore all causes for such increase other than the operation of the tariff. (It is not claimed, however, more for a protective tariff than for a tariff for revenue.) It will be remembered that our circulation had a much larger representative value at the former, 1860, than at the latter period. And besides, our natural increase and foreign immigration, our railroads, our mines, and inventions for production and communication, besides the development of our vast domain from Mexico, with constant receipts into the Treasury of apples of gold from California on waiters of silver from Nevada.

These have all contributed to develop this immense wealth, and while being done our agricultural interests and our shipping having been retarded in their development by the operation of the tariff, and our manufactories have increased into mammoth institutions, mainly by absorbing the products of our fields, our domestic manufactures, and those of the workshops of our mechanics, as well as the developments which come most naturally from all these. Again, the protectionists further compare the prosperity of the North, as the friend of a protective tariff, with the condition of the South as opposed to it. The tariff with all of its ramifying influences has been enforced at the South and West as at the North and East.

The comparison is, however, good to show the different effects of the tariff by robbing the agricultural portion that opposes it to enrich the manufacturing interest that befriends it else by what operation of opposition to the tariff have the thousands of millions of their agricultural products been counted to their waste, and by what operation of support have grown up from their material barrenness the vast accumulations of the North and East? And may it not be that the recipients of those bounties, through the operation of the tariff, will still further strip the South as, from the resources which God gave her, she quickens into new life; and may it not be they will still further draw from the entire Northwest the proceeds of their agricultural products in order to pay the expenses of Government and build up a magnificent special class of wealth and influence, contrasted with the destitution of laborers who, driven from employment by trusts and combinations (the legitimate offspring and handmaids of this unequal and unjust tariff legislation), seek subsistence by "strikes" or as tramps on the highways begging for bread? These trusts and combinations, with their pooling policy—now becoming so numerous and gigantic under the operation of our present tariff laws—is the realization of the gravest and most alarming fears of our fathers as to monopolies.

EQUALITY OF TAXATION IN THE STATES.

Under the jurisdiction of home rule in the States all are taxed according to their ability to pay, and capital is taxed for the purpose of education, internal improvements, etc., except such limited amounts as may be exempt for the protection of the poor. These influences of enlightenment and development under State protection or home rule are fostered in harmony with natural advantages and through the inspiration of demand and supply. But under the jurisdiction of the General Government the operation of the tariff exempts capital from taxation and taxes the food, raiment, and medicine consumed by the poor, without distinction of age, sex, color, or condition, for the protection of capitalists engaged in manufactures. Our capitalists, therefore, can well offer to favor education by the Federal Government, and also internal improvements in a wild and extravagant manner rather than by home rule, as in the former case their capital is exempt and in the latter it is taxed according to value, while under local State government our food and raiment and medicine are exempt.

Again, let it not be said, Mr. President, that under existing tariff laws the merchant pays the tariff, for he is compensated by the advanced prices paid by the consumers; nor that the foreigner pays it, since he receives from the merchant the present prices of his goods in his own locality. But who pays the advanced prices of the goods of the home manufacturer? Why, Mr. President, if the consumers, who embrace all varieties of laborers, pay the tariff, how in the nature of things are our home laborers, who, as consumers, do pay it, protected against foreign laborers who do not pay it? Again, nor let it be said that goods can be sold as cheaply after paying the tariff as by paying nothing at all. If the tariff does not advance the price of goods, in what way, I ask, is it to afford protection to the home manufacturer? The question answers itself.

The arguments of the protectionists are much the same as those of the Irish and British landlords in favor of protection for their corn, but at last the laborers demanded cheaper food to keep off starvation, and they obtained privilege to buy where food and raiment were cheapest and bring it beneath their thatched roofs untaxed. This gave some relief, though a mere bagatelle compared to that needed by those oppressed consumers. American laborers and our poor need cheap food and clothing and medicines, and they are told that they can get them cheaper by paying either to the Government or to the manufacturers 47 per cent. on every dollar's worth to which the tariff applies, and that this is protection against the foreign laborer who pays not one cent. Heaven save the mark!

England invites her laborers to the more refined production at home and opens to them her commerce for the free exchange of her products for those of the world. Whilst we are expressing sympathy for home rule and the sufferings of Ireland as we should, we are inconsistently warring against "home rule" at home, and by laying an exorbitant embargo are closing to American laborers the commerce of the world and reducing the values of their wages even below the relief of hunger. Our revenues from customs, as I have said, are paid by the consumers of goods received in exchange for our agricultural products. From this source has flowed all the means of the tariff towards paying the expenses of the Government and a large portion of the public debt, to construct internal improvements, to build costly palaces all over the country, to pay $80,000,000 annually for pensions and bounties, and incidentally to afford twice as much as all these to manufactories, to swell the estimates of their growth and lessen those of the fields. What would the tariff have produced without our agricultural products that paid for the imports upon which the tariff was laid? And without these products, what would the tariff have produced to accomplish all the results represented by protectionists as of the tariff?

HENRY CLAY COULD NOT SUPPORT THE SUBSTITUTE.

Ah, but we are told by high-tariff protectionists that it is "the American system," and they invoke the name of the "great commoner," Henry Clay, to lend it inspiration and effect. In revamping, under existing auspices, the so-called American system of protection, they have superadded to its hardships and injustices the partial repeal of the easiest paid and lightest bearing tax.

There is around the so-called "American system" a hoariness of age and respectability of origin which entitles it to careful consideration, even when its original purpose has outlived the circumstances and conditions which gave it plausibility and won for it a widespread popularity. There lingers around the memory of Henry Clay a halo of admiration which, however any one may oppose his teaching, forbids any American from treating with disrespect any system which his genius originated and his eloquence exemplified.

But it is doing no violence to his well-earned fame to assert that the very principles and circumstances which in 1824 induced him to formulate and advocate protection would, if he were here to-day, make him eloquent in the advocacy of tariff reduction. Recognizing justice as the great underlying policy of civil society, and that any national departure from it lies under the suspicion of being a scheme to plunder the many for the benefit of the few, Henry Clay would recognize the existing tariff as, in the language of Justice Miller—

none the less robbery because it is done under the forms of law and is called taxation.

See among his later expressions in 1843, after the "infants" could stand alone—his Bronson letter. Henry Clay, who was the illustrious friend of these infant manufactures, met these charges by a positive denial. In his letter to S. F. Bronson, of Georgia, in September, 1843, he said:

The sum and substance of what I conceive to be the true policy of the United States in respect to a tariff may be briefly stated. In conformity with the principle announced in the compromise act, I think that whatever revenue is necessary to an economical and honest administration of the General Government ought to be derived from duties imposed on foreign imports. And I believe that in establishing a tariff of those duties such a discrimination ought to be made as will incidentally afford reasonable protection to our national interests. I

think there is no danger of a high tariff being ever established; that of 1828 was eminently deserving that denomination. I was not in Congress when it passed, and did not vote for it; but with its history and with the circumstances which gave it birth I am well acquainted. They were highly discreditable to American legislation, and I hope, for its honor, will never be repeated.

My opinion that there is no danger hereafter of a high tariff is founded on the gratifying fact that our manufactures have now taken a deep root. In their infancy they needed a greater measure of protection; but as they grow and advance they acquire strength and stability, and consequently will require less protection. Even now some branches of them are able to maintain in distant markets successful competition with rival foreign manufactures.

Mr. President, were Mr. Clay here now to see a tariff tax of 47.2 per cent., or an average of that, on every $100 worth of imported goods, from which was annually flowing an excessive revenue in time of profound peace and unexampled prosperity; to see, not the feeble, struggling manufactories of his day, mostly operated in the family circles, but the overgrown condition of the multiple of those infant industries, with an annual income of 10, 20, 30, yea, greater per cent., by which, through the outgrowth of class legislation, they have rapidly gathered untold wealth and grown to giant form; ay, sir, and were Mr. Clay here to see as the consequence thereof the vast drain that this so-called protection has made and is making upon the consumers, including the laborers, of this country, and to witness this process of absorption on which the favored few have fattened into very monopolies, do you think for a moment that this great commoner, who, when alluding to such protection as he advocated (arguing in a celebrated speech made in 1824, that it would tend to prevent monopolies), would recognize this present monopolistic machine as the bantling of that day which he, the high priest of his party, christened at the baptismal font of justice and equity as "the American system"—a system, which asked 25 not 47 per cent., and at a time when American manufactories were few, feeble, and not self-sustaining?

For him now to see not only the marvelous development, with its plethora of wealth, commanding millions of money with which to subsidize the press and command a powerful lobby to work for a continuance upon our statute-books of this existing and absorbing class legislation would be to invite his condemnation. Legislation, which under its deceptive shield called "protection," not only opens up channels through which the golden current of Pactolus seems to flow into a vast reservoir of wealth, with its concomitant results of social and political influence, but inviting, if not creating, ugly methods which give rise to those modern ravenous and unconscionable capitalized organizations known as trusts, combines, and pools—organizations which hold within their unrelenting grasp the body of dependent labor, and with power to paralyze at will its manhood and its strength; methods, that limit at will, by a ukase from the head-center, the amount and price of labor by which they operate—no matter whether operated by iron or human hands—as they shut down and lock out dependent employés. Not only so, but methods peculiar to corporations and combines that, boa-constrictor-like, wind their slimy folds around the honest industries of our country, and with constricting coils crush out that honorable competition through which alone this class of labor can find relief. And this, forsooth, is called "the American system of protection."

Ay, Mr. President, these methods, I insist, reach out, even to circumscribing and regulating the amount of field-culture, as in the sugar trust, and limiting the amount of yield of raw material, as in certain mining trusts, for fear that a more extensive culture or greater yield might lessen the power to control the market value of the product, and thus encourage that competition which would deprive them of the power to command and regulate the price of labor.

Past experience and current statistics show that all this tends to increase the wealth of the rich and the poverty of the poor; and while this is being done, the favored few who are in the "combine" are content to know that their share of the "pool" will await their checks at the end of every quarter.

That vast establishments have risen up, especially in the North and East, as by magic, is admitted, and with equal truth it is insisted that our laborers and agricultural producers have been wasted to construct them, as had been the builders of the ancient monuments that perpetuate the tyranny as well as the genius that built them. Where will we find in the records of the past a despotism that exempted the capital of the country from taxation and taxed alone the food and raiment consumed, without any exception, of the laborer and of the poor? The colored laborers of the fields, in exchange of their products for supplies, receive far short of the amount they would have received had there been no tariff, and they too are immensely profitable to the manufacturers, for they are nearly all agriculturists.

And what does this vast accumulation of wealth pay to the Government for its support? Its owners seem patriotic and zealous for the glory and prosperity of the country. They are grateful, and favor the gift of pensions and bounties to its defenders. They are liberal, and would give vast sums for internal improvement by the General Government, and are indignant at those who oppose them; but they exclaim: Hands off! do not tax our money, nor our lands, nor our manufacturers, nor our palaces, nor our railroads, nor our stocks, nor our bonds, to pay for them; but go and tax the food and raiment and medicine generally consumed by the poor, including the old pensioners, the children at school, the ministers in the cause of Christ, the sisters of charity, the laborers and their families, of all ages, sexes, colors, and conditions; go and tax them, but let the bondholder, the railroader, the factory-owner go free from paying taxes to the General Government. And while you collect Government taxes for such purposes, by such means and from such sources, the manufacturers will collect twice as much and call it the protection of the home against the foreign laborer. Away with such philosophy!

These advanced prices caused by the tariff are felt at every meal that is eaten, upon every garment that is worn, and every dose of medicine that is given. "Do we not also pay as consumers?" say the manufacturers. Yes, but you pay only as equals of the laborer and consumer, however poor, for the exemption of your millions, and that you may recover back, under the pretense of protection, thousands of dollars for every one that you pay. For the laborer and poor there is no exception, and all the money, lands, stocks, and bonds of the rich millionaires, being entirely untaxed by the Government, all together do not pay as much as the shirt of the pauper when living or his shroud when dead.

But may there not be a pursuing Nemesis, as capital in the South is now moving from our wasted fields, seeking more favored investments in manufactures, and competition is multiplying and enlarging—if not strangled by trusts—till an equilibrium will be produced and relieve the most oppressed. Capital, coward as it is, will seek investment where greatest and safest remuneration is found, and happily for the future of my section of this country, the policy of New England is forcing her reluctantly from the field into the factory. Her raw material in mountains of coal and iron, in fields of cotton, in forests of lumber, interspersed with water ways that, under a genial climate, are never ice-bound, are inviting generous rivalry. It asks justice and fairness, not invidious class legislation. Her development, in all save agriculture, in an economic way, affects New England interests; yet that agriculture languishes under oppressive legislation inspired by the land of the Puritan. If law is the perfection of reason, it must be just and bear on all alike, and if we would have prosperity and happiness to follow, our legislative councils must be guided by liberal and enlightened policy.

Let manufacturers continue to enlarge, and competition reduce the prices of their product, and our fields be restricted by trusts and combines in supplying them, and foreign products be driven from our shores by high tariffs, from what source, then, shall we derive our revenue? Protection, then, to the extent proposed, must lead to direct taxation, and that, too, to the extent necessary to pay the enormous amounts that profligacy and the disregard and absorption of the jurisdiction of the States must produce. Would it not be well to open a little wider our national toll-gates and further extend the free-list to raw material, inviting our sister republics of Central and South America, in a less selfish manner, to closer relationship, and allow them to enter our ports with less tax upon their commodities for exchange, thus extending abroad the market for our agricultural and manufactural products? With this extended market would come *pari passu* the demand for increase of labor at home, and with it employment at better wages, where now conspiracies between monopolies forbid it.

Would not this tend to paralyze and check these modern juggernauts or trusts, which limit labor and regulate its price? Is it not safer and better for the country to get rid of the present $120,000,000 and daily increasing surplus revenue in the Treasury, thus lessening temptation to extravagant, profligate, and demoralizing legislation, and so provide for the future that such vast excess shall not so accumulate, but be kept in the channels of trade to strengthen and enliven the business interests of the country? Is it not wiser, then, to adhere to a tariff for revenue with incidental protection; to properly guard home as against foreign labor; to an economical administration of the Government, under the guidance of the present strong, bold, honest hand which now grasps the helm of state?

I submit, Mr. President, with that respect due to the opinions of my senior Senators, that such is the wisest policy, meanwhile properly regarding the rights of the States as contemplated in our Constitution by our fathers, for the peace, happiness, and liberty of our people.

Mr. CULLOM. Mr. President——

Mr. DOLPH. I understand the Senator from Illinois does not care to proceed to-night.

The PRESIDENT *pro tempore*. Does the Senator from Illinois desire to proceed this evening?

Mr. CULLOM. I should prefer not to proceed to-night if that course be agreeable to the Senate.

Mr. PLATT. I should like to say a word about the progress of debate upon the bill. The Senator from Illinois does not wish to proceed to-night, and it is manifest that he ought not to be required to do so. I wish to ask whether the bill can not be taken up at an earlier hour than 2 o'clock to-morrow, for if I address the Senate upon the subject I shall have to do so to-morrow.

Mr. ALLISON. I hope the course suggested by the Senator from Connecticut will be taken. In the nature of things we can not have much morning business at this stage of the session. Therefore I shall move to take up the bill at an earlier hour in the morning, so as to accommodate both Senators.

ESTATE OF JOSEPH H. MADDOX—VETO MESSAGE.

The PRESIDENT *pro tempore* laid before the Senate the following message from the President of the United States, which was read:

To the Senate:

I herewith return without approval Senate bill No. 2201, entitled "An act for the relief of Laura E. Maddox, widow and executrix, and Robert Morrison, executor, of Joseph H. Maddox, deceased."

An act of Congress approved July 2, 1864, provided among other things that the Secretary of the Treasury, with the approval of the President, might authorize agents "to purchase for the United States any products of States declared in insurrection, at such price as should be agreed on with the seller, not exceeding the market price thereof at the place of delivery."

Under the authority of said act the Secretary of the Treasury, with the approval of the President, prescribed rules and regulations to govern the transactions thus permitted, and appointed one H. A. Risley an agent to act for the United States in making such purchases.

On or about the 13th day of November, 1864, said Risley entered into a written contract with Joseph H. Maddox and two other parties, whereby the latter agreed to sell and deliver to Risley as such agent, at Norfolk or New York, 6,000 boxes of tobacco, 350 barrels of turpentine, and 700 barrels of rosin. It was also agreed that all products transported under the contract should be consigned to said Risley as agent, and shipped on a Government transport, or if not so shipped, should be in the immediate charge of an agent of Risley's, whose compensation and expenses should be paid by the sellers. Said products were to be sold in New York or Baltimore under Risley's direction, and one-fourth of the proceeds, after deducting certain expenses, costs, and charges, were to be retained for the United States and three-fourths paid to Maddox and his associates.

It was expressly provided in said contract as follows: "Nothing in this contract contained shall be construed as incurring any liability on behalf of the United States."

It appears that Maddox, very soon after the contract was made, acquired all the interest of his associates therein.

The President of the United States signed an order or permit for the transportation of the goods, in fulfillment of the contract, and for the passage of the parties selling such goods through the Federal military lines, the permit declaring, however, that such transportation and passage should be "with strict compliance with the regulations of the Secretary of the Treasury, and for the fulfillment of said contract with the agent of the Government."

Maddox and his associates were not at the time the contract was entered into the owners of any of the property they agreed to sell and deliver. But it is alleged that Maddox, as one of the parties to the contract and as assignee of his co-contractors, purchased 4,042 boxes of tobacco, worth at the time more than $735,000, for the purpose of fulfilling this contract.

The tobacco was purchased by him within the rebel lines in the State of Virginia. A part of it, he charges, was forcibly taken by the military forces of the Government and converted to its use or destroyed while being transported to its destination, and the remainder of it having been detained in storage at Richmond, Va., was afterwards appropriated to the use of the United States or was destroyed in the fires at Richmond upon the capture of the city by the United States forces in 1865.

An action predicated upon the contract with Risley was brought by Maddox in the Court of Claims to recover the value of this property, but it was held by the court that the contract was void.

On appeal to the Supreme Court of the United States the decision of the Court of Claims was affirmed, upon the ground, as has been previously decided by said court, that under the law the Treasury regulations and the executive orders concerning the purchase of products of insurrectionary States a purchasing agent of the Government had no authority to negotiate with any one in relation to the purchase of such products, unless at the time of the negotiation the party either owned or controlled them; that neither the law nor the regulations for its execution protected a speculation wherein the products to be sold were to be procured by the contractor within the rebel lines after the contract was made; that private citizens were prohibited from trading at all in the insurrectionary districts; and that the object of the law, and the regulations to carry it into effect, was to encourage the insurgents themselves to bring their products to agents of the Government.

With this adverse decision all chance of recovery upon legal grounds or before the courts was dissipated. But recourse to Congress still remained. As appears from a memorandum furnished in support of this bill, the alleged equities of the case were presented to the Forty-second, Forty-third, Forty-fourth, Forty-fifth, Forty-sixth, Forty-eighth, and Forty-ninth Congresses. Two adverse and more than two favorable committee reports have been made upon the claim. No bill for the relief of the claimant has, however, passed Congress until the present session, when a favorable condition seems to have presented itself.

The bill herewith returned empowers and directs the accounting officers of the Treasury to settle and pay to the representatives of Maddox the amount found due him on account of the loss and damage he sustained by the seizure by our military forces of the tobacco purchased by him under the agreement referred to, excluding, however, the tobacco destroyed by fire in the city of Richmond, and provides that said claim shall be determined upon the evidence taken and now on file in the office of the clerk of the United States Court of Claims and the War Department and any other competent evidence.

I fail to appreciate the equities which entitle this claimant to further hearing. Every intelligent man should be charged with the knowledge that, as a general rule, commercial intercourse with the enemy is entirely inconsistent with a state of war, and that the law of 1864 had for its object the encouragement of the insurgents themselves to bring their products to us, and not the authorization of persons to roam through the insurrectionary districts and purchase their products on speculation.

Even if the claimant did not understand these conditions, he certainly knew that his contract was based upon a statute; that the agent with whom he was contracting was a creature of statute, and that such statute and certain regulations of the Secretary of the Treasury made thereunder regulated the right and limited the action of all the parties to said contract. These things sufficiently appear from the very terms of the contract and the permit signed by the President. The privileges and liberties contained in this permit are expressly granted "with strict compliance with regulations of the Secretary of the Treasury."

If, before or after entering into this contract, the claimant had examined these regulations, he would have found that they provided that "commercial intercourse with localities beyond the lines of actual military occupation by the United States forces is absolutely prohibited." He would have also found that such regulations expressly provided that the power of the agent of the Government to make contracts should be founded upon the statement that the contractor then owned or controlled the products for which he contracted. And yet the permit of the President, which so completely put the claimant upon inquiry as to what he might or might not do, seems now to be relied upon as the source of equities in his favor, and is pressed into his service under the guise of a sanction of his unlawful proceedings.

Besides the general knowledge the claimant should have possessed of the commercial disabilities consequent upon a state of war, and the information afforded him by his contract and permit, a proclamation of the President, publicly issued September 24, 1864, furnished abundant notice of the kind of trading which would be permitted.

The property for which compensation is asked constitutes a part only of that agreed to be furnished. None of it ever reached the possession of the agent of the Government, but, as I understand the case, was at the time of its seizure or destruction still in the territory of the enemy and in rebellious possession. If, in the circumstances detailed, it was treated by our military forces in like manner as other property in the same situation, there would seem to be no hardship in holding that the contractor assumed this risk as one arising from his unauthorized and, if successful, his profitable venture.

Not being satisfied that there are any especial equities which entitle this claim to more consideration than many others where equities might be claimed in behalf of those who long ago violated our non-intercourse laws, I am unwilling to sanction a precedent which, if followed, might substantially work a repeal of these laws regarded necessary and expedient by those charged with legislation during the war of the rebellion and who had in full view all the necessities of that period.

GROVER CLEVELAND.

EXECUTIVE MANSION, *October* 10, 1888.

The PRESIDENT *pro tempore*. Shall the bill pass, the objection of the President of the United States to the contrary notwithstanding?

Mr. SPOONER. I move that the bill and the message of the President be referred to the Committee on Claims and printed.

The motion was agreed to.

SAMUEL HEIN.

Mr. SPOONER. On behalf of the Senator from Nevada [Mr. STEWART] I report favorably from the Committee on Claims without amendment the bill (S. 3351) for the relief of Samuel Hein. I ask that the bill may be considered at this time.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Samuel Hein, late disbursing agent of the Coast Survey, or his legal representatives, $1,285, being the amount disallowed by the accounting officers of the Treasury.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

YANKTON RESERVATION.

Mr. DAWES. I present a conference report. I suppose it does not require any action on the part of the Senate.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7547) granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the Senate amendment numbered 1.

That the title be agreed to as proposed by the Senate.

H. L. DAWES,
O. H. PLATT,
JAMES K. JONES,
Managers on the part of the Senate.
S. W. PEEL,
KNUTE NELSON,
Managers on the part of the House.

The PRESIDENT *pro tempore*. The report will be filed.

EXHIBITS FOR PARIS EXPOSITION.

Mr. DOLPH. I introduce a joint resolution, which I ask to have read at length with a view to its present consideration.

The joint resolution (S. R. 115) authorizing the Departments of the Government to use articles in their possession for exhibition at the Paris Exposition of 1889, was read the first time at length, as follows:

Resolved, etc., That the Executive and other Departments of the Government, the National Museum, the Geological Survey, and the Smithsonian Institute, be, and they are hereby, authorized to use for exhibition at the Paris Exposition of 1889 such articles and cases as may be on hand and for which space can be obtained; and that any unexpended balance of the appropriation for the Cincinnati Exhibition of 1888 may be applied for the preparation and boxing of such exhibits.

Mr. DOLPH. This joint resolution was handed to me by an officer of the State Department to-day. He came here to see the chairman of the Committee on Foreign Relations, who is absent. The resolution, I think, will meet no opposition. I have consulted all the members of the Committee on Foreign Relations who are present to-day, and all are in favor of the resolution and agree to its being put upon its passage now.

Mr. HOAR. What does the joint resolution comprehend? It seems to be pretty vague in description. I should like to have it read once more.

The PRESIDENT *pro tempore*. The joint resolution will be read the second time at length.

The joint resolution was read the second time.

Mr. HOAR. I do not understand what the phrase means, "the Executive and other Departments of the Government." What are the "other Departments?"

Mr. DOLPH. I understand that the articles which it is proposed to place on exhibition at the Paris Exposition are the articles which are now on exhibition at Cincinnati, Ohio.

Mr. HOAR. The joint resolution does not say so.

Mr. DOLPH. I send to the desk and ask to have read a letter from the Acting Secretary of State to the chairman of the committee, which was handed to me in the absence of the chairman.

The PRESIDENT *pro tempore*. The letter will be read, if there be no objection.

The Secretary read as follows:

DEPARTMENT OF STATE, *Washington, October* 10, 1888.

SIR: The attention of this Department has been called to the fact that, without Congressional action, the Director of the National Museum will have no authority to have articles shipped from that collection to Paris. The same is true of articles in the possession of the Smithsonian Institution and the Bureau of Ethnology, all of which Departments of the Government would be able at trifling expense, if authorized to do so, to make a satisfactory and creditable display at the Paris exposition which opens in May, 1889.

It will be quite unnecessary to make any further appropriation of funds for the purpose indicated if the unexpended balance of the sum appropriated for the Cincinnati Exposition may be devoted to packing and preparing the exhibits made by the Government there, and transferring them to Paris. All that is desired is that authority should be given to the various Departments of the Government that have articles on hand to use them in the direction indicated. It is proposed by the Commissioner General, who, I believe, has been in correspondence with the authorities of the Smithsonian Institution and the Geological Survey, that little more should be done than transfer the articles now on exhibition at Cincinnati to Paris.

A form of a proposed resolution is hereto appended.

I have the honor to be, sir, your obedient servant,

G. L. RIVES, *Acting Secretary.*

Hon. JOHN SHERMAN,
Chairman Committee on Foreign Relations, United States Senate.

Inclosure: Joint resolution (proposed).

Mr. HOAR. The joint resolution is slovenly, unmeaning, and utterly unworthy of the Senate or of a legislative body. The Senator from Oregon ought to put it in proper shape before it is passed.

The Geological Survey—

What is the "Geological Survey" as an official?

The Geological Survey is hereby authorized to use for exhibition at the Paris Exposition of 1889 such articles and cases as may be on hand.

Where? It is accompanied by a letter saying that it refers to the articles which have been already exhibited at Cincinnati.

The Executive and other Departments of the Government—

are also authorized.

There is no limitation in the joint resolution to articles which have been exhibited at Cincinnati.

Mr. DOLPH. I will ask the Senator if he knows of any such resolution that has been passed which specifies the articles in the different departments which are to be put on exhibition?

Mr. HOAR. The resolution might at least state, not indicating the several articles, that the responsibility of selecting such articles should be put upon some official or person named.

Mr. DOLPH. I understand the resolution to do that. It specifies the heads of the various bureaus or Departments which have the articles.

Mr. HOAR. It seems to me very extraordinary legal phraseology to say that the Geological Survey is authorized to send to Paris "such articles and cases as may be on hand."

Mr. DOLPH. I am not going to get up a controversy with the Senator from Massachusetts about the joint resolution. I did not draw it. It was transmitted here by the Department of State——

Mr. HOAR. I shall object to it until it is put in proper form.

Mr. DOLPH. Otherwise I might feel disposed to defend the joint resolution and its phraseology.

Mr. HOAR. I object to its present consideration.

Mr. TELLER. While "the Geological Survey" is a common term, perhaps it is not technically correct. That designation ought to be be stricken out, and the Interior Department inserted. The Geological Survey is but a bureau under the Secretary of the Interior.

Mr. DOLPH. I have no objection to that amendment being made. I will modify the joint resolution in that manner if it will be satisfactory to the Senator from Massachusetts; but if the rest of the resolution is not satisfactory to him, of course it must go over.

The PRESIDENT *pro tempore*. The joint resolution having been read twice, is there objection to its present consideration?

Mr. HOAR. I object.

The PRESIDENT *pro tempore*. The resolution will be referred to the Committee on Foreign Relations or placed on the Calendar, at the option of the Senator from Oregon.

Mr. DOLPH. Let it go on the Calendar.

The PRESIDENT *pro tempore*. The joint resolution will be placed on the Calendar.

COMMITTEE ON EPIDEMIC DISEASES.

Mr. HAMPTON submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Epidemic Diseases have leave to sit during the recess of Congress, and any necessary expenses shall be paid out of the contingent fund of the Senate.

THE REVENUE LAWS.

Mr. DOLPH. I move that the Senate now proceed to the consideration of executive business.

Mr. CALL. I ask the Senator to withdraw that motion for a moment.

Mr. DOLPH. I will withdraw it for the purpose of hearing what the Senator proposes.

Mr. CALL. I wish to give notice that at the conclusion to-morrow of the remarks of the Senator from Illinois [Mr. CULLOM], unless some other Senator is prepared to speak, I shall address the Senate, by their leave, on the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue, reported by the Senate Committee on Finance.

Mr. TELLER. I think the Senator from Connecticut [Mr. PLATT] gave notice that he would follow the Senator from Illinois.

Mr. CALL. Then I will say at the conclusion of the remarks of the Senator from Connecticut.

EXECUTIVE SESSION.

Mr. DOLPH. I renew my motion.

The PRESIDENT *pro tempore*. The Senator from Oregon moves that the Senate do now proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After nine minutes spent in executive session the doors were reopened, and (at 4 o'clock and 26 minutes p. m.) the Senate adjourned until to-morrow, Thursday, October 11, 1888, at 12 o'clock m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate October 8, 1888.

POSTMASTERS.

Everington D. Kelly, to be postmaster at Oregon City, in the county of Clackamas and State of Oregon.

Robert M. Carpenter, to be postmaster at Audubon, in the county of Audubon and State of Iowa.

Samuel E. Carrell, to be postmaster at Adel, in the county of Dallas and State of Iowa.

Perry M. Trumbower, to be postmaster at Muncy, in the county of Lycoming and State of Pennsylvania.

RECEIVER OF PUBLIC MONEYS.

Robert F. Coates, of Wichita, Kans., to be receiver of public moneys at Wichita, Kans.

Executive nominations confirmed by the Senate October 10, 1888.

James Petigru Lesoesue, of South Carolina, to be consul-general of the United States at Melbourne, Australia.

PROMOTION IN THE ARMY.

First Lieut. James Parker, regimental quartermaster, to be captain, October 2, 1888, *vice* Lawton, who resigns his line commission only.

PROMOTIONS IN THE NAVY.

Assistant naval constructors to be constructors in the Navy: John F. Hanscom, of Massachusetts; John B. Hoover, of Pennsylvania; Joseph Foster, of Pennsylvania; Richard Gatewood, of Virginia; and Francis T. Bowles, of Massachusetts.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *October* 10, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT D. D.

The Journal of yesterday's proceedings was read.

Mr. DOUGHERTY. Mr. Speaker, I desire to undertake to make a correction of the Journal, if in order.

The SPEAKER. Of the RECORD?

Mr. DOUGHERTY. No, of the Journal. I would like to have read again that portion of the Journal which refers to the passage of Senate bill No. 3620 on yesterday.

The SPEAKER. What is the title?

Mr. DOUGHERTY. A bill supplementary to an act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President."

The SPEAKER. What correction does the gentleman suggest?

Mr. DOUGHERTY. I desire to call the attention of the House to a fact in reference to that matter, and in support of the statements I shall now make I will ask the Official Reporter to read his stenographic notes of what actually occurred, and have that compared with what the RECORD, which is before me, shows occurred, in connection with the passage of that bill.

The SPEAKER. The Clerk will again read that portion of the Journal to which the gentleman refers.

The Clerk read as follows:

On motion of Mr. PEEL, by unanimous consent, the said bill, Senate No. 3620, was taken from the Speaker's table and read twice.

The House having, by unanimous consent, proceeded to its consideration, the said bill was read the third time, and passed.

Mr. PEEL moved to reconsider, etc.

Mr. DOUGHERTY. If it is competent to do so now, I desire to have the Journal corrected so as to show that if that bill did pass this House at all it passed without a quorum. The gentleman from Kentucky, Mr. STONE, occupied the chair temporarily during that proceeding.

He rose in his place and put the question to the House. I think no member except myself voted in the negative. But I certainly voted "no," and loud enough to be heard by all of the members about me. Immediately upon voting "no," and before the gentleman from Kentucky, occupying the chair, rose to decide the question, I called for a division. The Chair either did not hear me or refused to hear me. I heard distinctly every word uttered by the Chair in reference to that bill, and my voice is certainly as powerful as his.

But if he did not hear me it was his fault, not mine; for he should have preserved order in the House and upon the floor, so that members rising and respectfully addressing the Chair could be heard.

My object now, sir, is to have the Journal corrected so as to show the exact facts in reference to the passage of that bill; and I want to know whether this is to be a precedent that the Chair, by a quick decision, shall be able to cut off a member from exercising his constitutional rights upon this floor.

The SPEAKER. The Journal, the Chair will state, can not be corrected in that particular. The Journal does not purport to contain what is said by members, but only records the action of the House in its proceedings.

Mr. DOUGHERTY. It undertakes to show what is done in the House.

The SPEAKER. The RECORD contains the official report of the debates and proceedings in the House. But the Journal is correct, as the gentleman states.

Mr. DOUGHERTY. The Journal states that the bill passed.

The SPEAKER. And the gentleman's statement, of course, goes into the RECORD of to-day.

Mr. DOUGHERTY. Yes, sir; but it should go into the Journal and show that when this bill passed it passed without a quorum as required by the Constitution of the country, if the point be raised.

The SPEAKER. The Chair does not see how the Journal can be corrected to show that the gentleman made the point that no quorum had voted; because if it was done the bill was not passed at all until a quorum had voted, and the gentleman had the right then to insist and to continue to insist if he had desired to make the point that no quorum had voted.

Mr. DOUGHERTY. I could not do that, because I could not be recognized by the Chair. But if the Speaker would examine the RECORD——

The SPEAKER. The Chair will submit the gentleman's motion to the House as to whether or not the Journal can be so corrected as to show that the gentleman on the floor made the point of order that no quorum had voted.

Mr. DOUGHERTY. That would not be a fact, Mr. Speaker. The point that no quorum had voted was not made, for the simple reason that although occupying the floor for that purpose the Chair refused to recognize me to make that point.

The SPEAKER. The present occupant of the chair was absent at the time, having called the gentleman from Kentucky [Mr. STONE] to occupy the chair during the hour for the consideration of bills, which hour expired before the present occupant returned. The Chair therefore can have no personal knowledge of what occurred on the floor of the House. The Chair understands the gentleman's statement now to be that the point of no quorum was not made.

Mr. DOUGHERTY. It was not.

The SPEAKER. And therefore the Journal is correct.

Mr. DOUGHERTY. I desire that the stenographer, if he has his official notes, shall read them to show how the language as it appears in the RECORD compares with what actually took place on the floor.

The SPEAKER. The Chair will have the official notes read, and if necessary have the RECORD corrected to conform to them.

Mr. DOUGHERTY. The object in correcting the RECORD is to find out whether the action taken by the Chair on yesterday is to be considered a precedent to be followed by this House in the future.

Mr. ROGERS. Mr. Speaker, I was not present when the matter referred to here took place and know nothing of it; but I would suggest that the gentleman from Kentucky [Mr. STONE] is not now in his seat.

The SPEAKER. The gentleman from Kentucky is in the Hall.

Mr. ROGERS. I now perceive that he is.

The SPEAKER. The Chair has sent for the original notes of the Official Reporter, and will have them compared with the RECORD. While waiting for that the Chair will submit some personal requests of members.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. HARE, indefinitely, on account of important business.

To Mr. MOORE, indefinitely, on account of important business.

To Mr. GEST, indefinitely.

To Mr. MANSUR, for the balance of the week, on account of important business.

To Mr. JOHNSTON, of North Carolina, indefinitely.

To Mr. SAWYER, indefinitely, on account of important business.

ENROLLED BILLS SIGNED.

Mr. KILGORE, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled bills of the House and Senate of the following titles; when the Speaker signed the same:

A bill (H. R. 4765) for the relief of G. W. McAdam;

A bill (H. R. 8962) for the relief of Anthony L. Woodson;

A bill (S. 3427) to amend section 4474 of the Revised Statutes of the United States;

A bill (S. 3241) granting a pension to Easter A. Jackson;

A bill (S. 3230) granting a pension to Martha J. Cole;

A bill (S. 3197) granting a pension to Albert L. Ham;

A bill (S. 3083) restoring to the pension-roll the name of Florian Lischewsky;

A bill (S. 3175) granting a pension to Mrs. Caroline Taylor;

A bill (S. 3030) granting a pension to Mary J. Foster;

A bill (S. 3018) granting an increase of pension to John N. Bovee;

A bill (S. 2742) to incorporote the Brightwood Railway Company of the District of Columbia;

A bill (S. 2593) granting a pension to Sarah E. McNamara;

A bill (S. 2567) granting a pension to Nancy Polock;

A bill (S. 1926) granting a pension to William Smith;

A bill (S. 1671) for the relief of the heirs of Martin Kenofsky;

A bill (S. 1614) granting a pension to Phillipe Ray;

A bill (S. 1219) granting a pension to David Heinbach;

A bill (S. 1089) for the relief of Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy;

A bill (S. 889) granting a pension to Mary O. Hall;

A bill (S. 741) for the relief of William Tabb;

A bill (S. 619) granting an increase of pension to Leopold Mayer;

A bill (S. 664) for the relief of William P. Wheaton and Charles H. Chamberlain, of California; and

A bill (S. 70) to provide for warehousing fruit brandy.

ORDER OF BUSINESS.

Mr. KILGORE. Mr. Speaker, I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. KILGORE. I want to ask whether it is competent to make a motion to reconsider when unanimous consent had been given to a matter.

The SPEAKER. It is. Unanimous consent is nothing more than a unanimous vote.

Mr. KILGORE. Then, on yesterday, the gentleman from Maine [Mr. DINGLEY] obtained unanimous consent to fix a certain day in December for the consideration of a bill. I want to enter a motion to reconsider that vote.

The SPEAKER. The motion can be entered, and the Chair will see whether it was not made on yesterday. The Chair will cause the Journal to be examined.

Mr. MCRAE. Mr. Speaker, I desire to rise to a question of privilege.

The SPEAKER. The gentleman will state it.

SWAMP AND OVERFLOWED LANDS.

Mr. MCRAE. On yesterday when considering Senate bill 758 to relieve purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, those who were present will remember that in the little discussion had the gentleman from Pennsylvania [Mr. JACKSON] wanted to oppose the bill. I offered to yield him time out of the hour allotted to me. He declined to accept it. In the RECORD this morning there is a speech of over a column in length from him, very little of which was spoken on the floor in my presence. There are some incorrect statements and unjust conclusions in his remarks as they appear that I would have noticed if they had been delivered. I shall not ask that the RECORD be corrected in that respect, but call attention to the fact that these statements were not made on the floor to show why they were not replied to by me. I was prepared to defend the bill and to answer the gentleman at the time, and think it was hardly fair to so extend his remarks after I had offered him time to be heard. I suppose the remarks are properly credited to him. He assumes the responsibility for them, and I only call attention to them to show that they were not spoken in debate and could not have been answered by me at the time, and to now say that when the bill is reached again for consideration I shall take occasion to answer the objections made by the gentleman and satisfy any reasonable man of the justice of the measure.

Mr. KILGORE. I demand the regular order.

Mr. JACKSON. I would like to say one word in reply to the gentleman from Arkansas [Mr. MCRAE] in regard to the statements he has made. I will be very brief.

The SPEAKER. The gentleman from Pennsylvania [Mr. JACKSON] asks to make a statement.

Mr. JACKSON. The gentleman from Arkansas [Mr. MCRAE] is correct in his statement that my remarks made yesterday on the floor were revised and corrected in the published RECORD, but not with more liberality than I think is customary in members. In fact, the gentleman's own remarks made yesterday were revised by himself so liberally and freely that when I saw the copy it seemed to be generally rewritten, and this called my attention to the need of revising my

own. But I make no complaint of this. I think he improved them, although they are printed very different from the Reporter's copy. After all, the gentleman and I have discussed this question before, and I think there is nothing there that is not in line with the position we have both generally taken and did take yesterday. So far as I know, there are no disputed facts. The contest is as to policy and arguments.

Mr. McRAE. It is not the revision of the gentleman's remarks that I complain of, but of making a speech in the RECORD that he ought to have known I would reply to if I had heard. I so stated to him, and I stated to him when the bill was up that I would yield him a portion of my time, reserving to myself the right to reply, and he ought to have made his points upon the floor of the House so that I could have an opportunity of replying.

Mr. JACKSON. I insisted on going on and discussing the bill, taking my own time, but the gentleman would not agree to this. I did not need to take time from the gentleman.

In the way of revision I did simply what the gentleman himself did in the same connection, only a little more so, as I had more to say.

Mr. McRAE. I revised and corrected the report of what I said, while you after doing that extended a single sentence into an argument, say, of a column when you had no time at all.

Mr. JACKSON. Your revision in the same way consisted in striking out and putting in something else.

The SPEAKER. The regular order is——

Mr. McRAE. I only corrected what the reporter made me say, and made no attempt to discuss the bill further than to answer questions asked me about it. I have no more to say.

Mr. TAULBEE. I ask the gentleman from Texas to yield to me for a moment in order to offer a resolution and make a brief statement with reference to it.

Mr. KILGORE. I yield to the gentleman for that purpose.

BRIDGE FROM LOUISVILLE, KY., TO JEFFERSONVILLE, IND.

Mr. TAULBEE. This is a resolution of inquiry which relates to the navigation of the Ohio River, and I consider it very important that it should pass at this time. It would properly go to the Committee on Rivers and Harbors, but there is not a quorum of that committee present in the city; and if the House will hear the resolution read I do not think there will be any objection to its passage. If, on the reading of the resolution, there should be any objection to its immediate consideration, I shall not insist upon it; but I do not believe there will be any.

There being no objection, the resolution was read, as follows:

Whereas a proposition is now pending before the War Department for the construction of a bridge between Louisville, Ky., and Jeffersonville, Ind., etc.: Therefore, be it

Resolved, That the Secretary of the Treasury be requested, if not inconsistent with the public interests, to inform this House—

1. Whether the proposed bridge can be built without violating existing law.
2. What effect its construction will have upon the coal, iron, and river interests of the Ohio and Mississippi Valleys.
3. What public necessity has been disclosed for the building of a bridge at that point.
4. Whether any evidence bearing upon the foregoing questions have been presented to the War Department, and if so, what is its purport and character?

Mr. TAULBEE. The Clerk, very properly, did not read the preamble in full, but now that the House has heard the resolution I do not think there will be any objection to it.

The SPEAKER. Is there objection to the consideration of the resolution just read?

There was no objection.

The resolution was adopted.

Mr. TAULBEE moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

Mr. KILGORE. I demand the regular order.

Mr. O'NEILL, of Pennsylvania. I want to ask the gentleman from Texas [Mr. KILGORE] whether he will not let me, on behalf of the State of Pennsylvania, call up a bill to authorize the auditing of an account between that State and the United States. I have a request in relation to it from the executive department of the State of Pennsylvania, and there is some comity due to a State in such a matter, and I am sure the bill can meet no objection.

Mr. KILGORE. Let it wait until another day.

The SPEAKER. The regular order is demanded. The regular order is the call of committees for the presentation of reports.

Mr. LAWLER. I ask unanimous consent that gentlemen having reports to present may be allowed to file them with the Clerk.

Mr. O'NEILL, of Pennsylvania. I must object to that. I want to call up a bill for consideration.

The committees were called for the presentation of reports.

Mr. LAWLER. Mr. Speaker——

The SPEAKER. The regular order is insisted upon, which cuts off all request for unanimous consent. The regular order is the hour for the consideration of bills reported from committees. The hour begins at half past 12 o'clock, and the call rests with the Committee on Indian Affairs.

Mr. PEEL. Mr. Speaker, when the hour expired yesterday House bill 1407 was under consideration. While I am of opinion that if members fairly understood the object of the bill there would be no objection to it, yet as there seems to be some difference of opinion about it, and as it is a bill of considerable importance, I desire to say to gentlemen who objected yesterday that if they still insist upon making the point of "no quorum," I shall ask that it be passed over without losing its place, so that it may come up for consideration when we have a quorum.

Mr. EZRA B. TAYLOR. There will be the same objection. There can be no more legislation in this House without a quorum.

Mr. PEEL. Then I ask unanimous consent that the call of the Committee on Indian Affairs be passed over without losing its place, so that when we meet in December with a quorum present we shall be able to proceed with this bill.

The SPEAKER *pro tempore* (Mr. McMILLIN). The gentleman from Arkansas [Mr. PEEL] asks unanimous consent that the call of the Committee on Indian Affairs be passed over, and that that committee may not lose the remainder of its time, which would be one hour, the call having been exhausted so far as yesterday was concerned. Is there objection?

Mr. KILGORE. Does it not have its place anyhow?

The SPEAKER *pro tempore*. The Chair will state to the gentleman from Arkansas [Mr. PEEL] that if consent is given to his request the status will be that there will be one hour for the consideration of this bill, but the committee can not call up any other bill unless by unanimous consent.

Mr. PEEL. I understand that.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Arkansas [Mr. PEEL]?

Mr. KILGORE. Yes, sir; I object to this House now fixing any day or hour for the consideration of business at the next session.

Mr. PEEL. My request does not fix any day.

Mr. KILGORE. I object to giving anybody any special rights for next session.

The SPEAKER *pro tempore*. The gentleman from Texas objects. Objection having been made, this bill is in Committee of the Whole House on the state of the Union, and the House will have to resolve itself into Committee of the Whole in order to reach it. What is the desire of the gentleman?

Mr. PEEL. I suppose it is idle to consume further time upon this, as there seems to be a disposition to stop all business. The gentleman from Ohio [Mr. EZRA B. TAYLOR] announces that he does not propose to let us go on without a quorum; and the gentleman from Texas [Mr. KILGORE] objects to the committee being passed over, and I do not see what we can do. [Laughter.]

Mr. KILGORE. Mr. Speaker, I rise to a parliamentary inquiry, with a view to accommodate my friend from Arkansas [Mr. PEEL]. I understand his proposition to be that his committee shall not lose its place in the call.

The SPEAKER. The request of the gentleman from Arkansas was that the Committee on Indian Affairs should be passed over for the present without losing the right to occupy the remainder of the time belonging to it in this hour under the rules of the House. The Chair supposes that the usual course would be pursued and that the committee could come in and claim the remainder of its time whenever no other committee was occupying the consideration hour.

Mr. KILGORE. And the request would not fix a day for the consideration of this bill?

The SPEAKER. It would not.

Mr. KILGORE. Then I will make no objection.

The SPEAKER. Is there further objection to the request of the gentleman from Arkansas [Mr. PEEL]?

Mr. McMILLIN. Mr. Speaker, I move that the House do now adjourn.

Mr. O'NEILL, of Pennsylvania. Before that motion is put, I wish the gentleman would let us have the call of committees for the consideration of bills continued, as I am very anxious that the Library Committee should be called. Even though I know there will be objection to considering the bill which the committee will present, on account of the absence of a quorum, I would like to have the call appear on the record, just as I would like to have it appear of record and go to the country that there are forty or fifty of us here present and that we might, if we chose, pass a number of unobjectionable bills which are on the Calendar and which would help many of our individual constituents.

The SPEAKER. The motion to adjourn is pending, and debate is not in order.

Mr. McMILLIN. I only wish to state that the reason I make the motion is because of the announcement on the part of the gentleman from Ohio that no business could be done.

Mr. LANHAM. Pending that I move that when the House adjourn to-day it be to meet on Friday next.

The question was taken on the motion of Mr. LANHAM; and on a division there were—ayes 30, noes 32.

So the motion was rejected.

The question recurred on the motion of Mr. McMILLIN, which was rejected.

The SPEAKER. The Chair will continue the call of committees.

The Committee on the Territories was called.

Mr. BAKER, of New York. I would like to ask my colleague from Texas on the Committee on the Territories if he would make the point of "no quorum" on the bill for the admission of South Dakota?

Mr. KILGORE. Yes, sir.

Mr. BAKER, of New York. Then I will not call it up.

Mr. O'NEILL, of Pennsylvania. Will the gentleman make the point of "no quorum" on the consideration of pension bills on next Friday night? If so, I should approve of the motion to adjourn over until Friday, and from Friday until Tuesday, and so on.

The SPEAKER. The Chair will continue the call of committees.

Mr. BAKER, of New York. I desire to ask the question of my friend from Texas, if he proposes to oppose the consideration of any further bills, whether it is not better to adjourn for a few days. I notice from the morning papers to-day that the House is falling to pieces like the petals of a flower——

Mr. SOWDEN. Regular order.

The Committee on Labor was called.

Mr. BAKER, of New York. Pending that call I desire to ask unanimous consent that the Committee on the Territories may be considered as not passed so that it may be called at the next session.

Mr. CLEMENTS. I object.

The SPEAKER. The Chair will state that the probabilities are that the whole list of committees is likely to be called through anyway.

EIGHT-HOUR LAW.

Mr. PLUMB. On behalf of the Committee on Labor, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill S. No. 405, and consider the same in the House.

The SPEAKER. The bill will be read, after which the Chair will ask for objection.

The bill was read at length.

The SPEAKER. The gentleman from Illinois asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of this bill and consider it in the House.

Mr. ALLEN, of Mississippi. I object.

Mr. PLUMB. I move that the House now resolve itself into Committee of the Whole on the state of the Union for the purpose of considering this bill.

The question was taken; and on a division there were—ayes 24, noes 14.

Mr. ALLEN, of Mississippi. No quorum.

The SPEAKER. The point of order being made that no quorum has voted, the Chair will order tellers.

Mr. ALLEN, of Mississippi, and Mr. PLUMB were appointed tellers.

Mr. ALLEN, of Mississippi. It is unnecessary to go into the consideration of that bill, as the gentleman from Ohio has notified us there can be no legislation.

ORDER OF BUSINESS.

Mr. BURNES. Pending the vote on this question, I ask unanimous consent to suspend the count until I can make a statement and a request of the House.

The SPEAKER. If there be no objection, the gentleman will be permitted to submit a suggestion.

There was no objection.

Mr. BURNES. It will be remembered that on yesterday a certain bill relating to the Presidential count was called up by the gentleman from Kentucky and passed, and the motion was made to reconsider the action of the passage of the bill, which motion was laid on the table in the usual form. The failure of the presiding officer to hear the objection on the part of a member, which objection was undoubtedly made—and no member in the House will hesitate for a moment to indorse the integrity of the gentleman who occupied the chair—but it was evident he did not hear the objection made. Under all the circumstances, and in order that we may be in a shape which will be fair to all sides, I ask unanimous consent that so much of the action of the House as laid on the table the motion to reconsider the vote by which the bill was passed be rescinded.

Mr. MILLIKEN. What is the bill?

Mr. BURNES. It is the bill in reference to the Presidential count.

The SPEAKER *pro tempore* (Mr. MILLIKEN). The Clerk will report the title of the bill, after which the Chair will ask for objection.

The Clerk read as follows:

A bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President to provide for and regulate the counting of the votes for President and Vice-President and the decision of questions arising thereon."

Mr. BURNES. Now, Mr. Speaker, I ask unanimous consent simply to set aside the action of the House which moved to reconsider and laid on the table the motion to reconsider the passage of that bill.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Missouri?

Mr. DOUGHERTY. Mr. Speaker——

Mr. EZRA B. TAYLOR. I object.

Mr. BURNES. I hope the objection will not be insisted upon.

Mr. DOUGHERTY. Do I understand that objection is made to the request?

The SPEAKER *pro tempore*. The gentleman from Ohio objects.

Mr. STONE, of Kentucky. I ask the gentleman at least to withdraw his objection until a statement is made by the gentleman from Florida.

Mr. EZRA B. TAYLOR. I have no objection to do that.

Mr. DOUGHERTY. I did not desire to make a statement, Mr. Speaker, but simply rose to ask, if the objection had been withdrawn to the action as proposed by the gentleman from Missouri, what would be the parliamentary status of that bill?

The SPEAKER *pro tempore*. The Chair will state that if the request of the gentleman from Missouri for unanimous consent had been granted, the bill would have stood as passed, with a motion pending to reconsider the action passing it.

Mr. DOUGHERTY. And no new motion to reconsider would have to be entered.

The SPEAKER *pro tempore*. No new motion would have to be entered. The request of the gentleman from Missouri was to set aside the order to lay on the table the motion to reconsider, which would have left the motion to reconsider pending.

Mr. BURNES. Mr. Speaker, I trust that this proposition, which will leave the bill in the control of the House subject to any action that may be taken now or hereafter, will be acquiesced in by the House. We desire to adopt without further delay the conference report on the general deficiency bill. Ten thousand poor fellows are needing the money we are appropriating for them; they ought to have had it long ago. This is a bill in which numbers of poor people of this country are interested; and I do trust—I ask as a personal favor—that the bill may not be longer allowed to hang. By taking the action now requested we can pass this general appropriation bill, and I do hope——

Mr. MORRILL. I would like to ask the gentleman from Missouri what connection there is between the two propositions?

Mr. BURNES. The gentleman from Florida thinks that he was deprived of the right of objecting to the passage of a bill called up by the gentleman from Kentucky [Mr. BRECKINRIDGE] by the accident of the Speaker *pro tempore* not hearing his objection; and if that matter be put *in statu quo* so that the gentleman from Florida can be heard upon it or have a vote on it at any time he may call it up, he will not further object to the passage of this appropriation bill. That is the whole matter.

Mr. MORRILL. That is just what I wanted to ascertain.

Mr. BURNES. It enables us to pass the general deficiency bill.

Mr. MORRILL. I was utterly unable to see any connection between the two propositions; and I do not see now why the gentleman from Florida should undertake to punish the whole House.

Mr. EZRA B. TAYLOR. I objected to the proposition because I thought a bill which had been passed by the House ought to remain passed. I did not know what connection there was between the two propositions. I would like to know whether it is understood by anybody that this bill in regard to which the motion to reconsider is to be pending shall not pass into law. If there is anybody in the House who objects to that bill, I would like to know it; for I care more for that bill than for the general deficiency bill.

Mr. BURNES. I will say to my friend from Ohio that I do not know what action is proposed to be taken by any member of the House in regard to that bill; but the bill will be left as passed, with a motion to reconsider pending.

Mr. EZRA B. TAYLOR. I withdraw my objection.

The SPEAKER *pro tempore*. The Chair will state that the bill has been returned to the Senate.

Mr. HOOKER. I wish to say, in connection with what has been stated by the gentleman from Missouri [Mr. BURNES] and other gentlemen, that I conceive it natural that the gentleman from Florida, having called for a division which was not heard by the gentleman at that time occupying the chair, and which I thought, with due deference——

Mr. BURNES. Will the gentleman yield for a moment?

Mr. HOOKER. Certainly.

Mr. BURNES. I ask unanimous consent to send a message to the Senate recalling the bill.

The SPEAKER *pro tempore*. The Chair will ask whether there is further objection to the request of the gentleman from Missouri.

Mr. HOOKER. Before the question is put I want to make this remark——

Mr. FARQUHAR. One word. This is seemingly a bargain; it is not a matter of parliamentary proceeding at all; and I should certainly feel like objecting unless I were very sure that no other gentleman would make objection to the passage of this deficiency bill. I agree with the gentleman from Missouri that this bill ought to have been passed long ago. If it is now simply an accommodation to the gentleman from Florida that his motion shall be placed on record so that he may appear as objecting to the passage of the bill with reference to the Presidential electors, I see no difficulty in agreeing to it, because the matter of reconsideration is a privileged question. But if there are

other objectors lying by, and the gentleman from Florida is given this opportunity also, I think it would be taking an unfair advantage of the courtesy of the House to hang up this deficiency bill any longer. I would like to reserve that point.

Mr. BURNES. I am sure there will be no further objection.

Mr. FARQUHAR. If the gentleman is satisfied of that, all right. I did not know but that the gentleman from Mississippi intended to make a point.

Mr. BURNES. Oh, no; I think not.

Mr. FARQUHAR. I certainly am not disposed to object to the request; but I feel it urgent that this deficiency bill should be passed at once, for the honor of this House and for the credit of the country.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Missouri?

Mr. HOOKER. I want to make a single remark before the House passes upon that request.

The SPEAKER *pro tempore*. The gentleman will suspend his remarks for a moment, until a message from the Senate is received.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. McCOOK, its Secretary, announced that the Senate had receded from its amendments to bills of the following titles:

A bill (H. R. 1239) to extend the jurisdiction of the Light-House Board to the Sacramento and San Joaquin Rivers, California;

A bill (H. R. 1249) for establishing a light-house and fog-signal on Roe Island, Suisun Bay, California;

A bill (H. R. 1641) for the erection of a light-house at or near a point about midway between Barnegat and Navesink lights, in the State of New Jersey;

A bill (H. R. 5700) to facilitate the transportation of life-saving and light-house supplies at Hog Island, Virginia;

A bill (H. R. 7421) for establishing a light off Pamlico Point, North Carolina;

A bill (H. R. 7604) for the establishment of a light-house and fog-signal at or near Gull Shoal, Pamlico Sound, North Carolina;

A bill (H. R. 8855) for the establishment of a light-ship with a steam fog-signal at Sandy Hook, New York Harbor; and

A bill (H. R. 10183) to establish a light-ship off Great Round Shoal, near Nantucket, Mass.

The message further announced that the Senate had passed without amendment bills of the following titles:

A bill (H. R. 6619) for the relief of Eliza A. Cutler; and

A bill (H. R. 8674) for the relief of Starling H. Tucker and others.

The message also announced that the Senate had passed with amendments the bill (H. R. 11139) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis.; asked a conference with the House on said bill and amendments, and had appointed as conferees on the part of the Senate Mr. SAWYER, Mr. DOLPH, and Mr. VEST.

ORDER OF BUSINESS.

Mr. HOOKER. I was proceeding to remark, Mr. Speaker, that when the gentleman from Florida [Mr. DOUGHERTY] called for a division, I think, with due deference to my friend who was then in the chair, and who, I know, endeavored to decide this matter according to what was right, he ought to have been recognized in the demand for a division. But, sir, at the same time I regard the bill which has been passed as an important one. It is for the purpose of correcting an error in reference to the electoral count which existed in the statute as it passed in 1887. It is a Senate bill, that is, it was introduced in the Senate and passed that body unanimously. I should regard it as unfortunate after the bill had been passed by the unanimous approbation of the House if any action should be taken on our part at this time by which that important bill should be defeated; and anxious as I am to see the deficiency bill acted upon and passed, I should regret very much seeing the House put itself in the attitude where we might be very much embarrassed in reference to the passage of that electoral-count bill. I think that is an important bill. I think it was right on our part that it was passed.

Now if it is understood the gentleman from Florida will not persist in his opposition to that bill, and will not raise the question of a quorum on the deficiency bill, then I think we should agree to the request which has been made and let the matter stand in that attitude. The deficiency bill is of great importance. There are several thousand people interested in it. It is one of the general appropriation bills, and it is important that it should be passed at once. I hope, therefore, there will be no further objection, but that it will be allowed to go through.

Mr. ROGERS. I was temporarily called out of the House, and I wish to know what is the question before the House.

The SPEAKER *pro tempore*. It is on the request of the gentleman from Missouri [Mr. BURNES] to set aside the action of the House laying on the table the motion to reconsider the vote by which the electoral-count bill was passed.

Mr. ROGERS. He wants to enter the motion to reconsider the vote by which the bill was passed.

The SPEAKER *pro tempore*. It was passed, and the motion was made to reconsider the vote by which the bill was passed, and that motion was laid on the table. The gentleman's request is to set aside by unanimous consent the vote by which the motion to reconsider was laid on the table, and to allow the motion to be entered to reconsider the vote by which the bill was passed.

Mr. ROGERS. I should like to know, if I am in order, what is the object of the gentleman from Missouri in reconsidering that matter.

The SPEAKER *pro tempore*. It has been already stated.

Mr. ROGERS. I was out of the House at the time.

Mr. BURNES. It is done because of the feeling that by the action of the Chair, of course unintentionally, the gentleman from Florida was deprived of his right to have a division on the passage of the bill. Those of us who sat near the gentleman from Florida are aware of the fact that he did call for a division, which, however, was not heard by the Chair. If the vote by which the motion to reconsider was laid upon the table be vacated that leaves the matter standing before the House on the motion of the gentleman from Florida to reconsider the vote by which the bill was passed.

Mr. ROGERS. Is the gentleman from Florida opposed to this electoral-count bill at all?

Mr. BURNES. I do not know that the gentleman has urged any reason why he was opposed to that bill, but evidently he showed signs of opposition to its passage.

Mr. STONE, of Kentucky. Mr. Speaker, I was in the chair as Speaker *pro tempore* at the time this matter took place. The vote was taken on the bill. The Chair announced the ayes seemed to have it, and then with some deliberation announced that the ayes had it and that the bill was passed. At that time the gentleman from Florida rose and demanded a division. He states to me in private conversation that he demanded a division before the result was announced by the Chair. The Chair did not hear his demand. The bill was then announced as passed. No motion was made or put to the House that the vote by which the bill was passed should be reconsidered. The RECORD shows exactly what occurred from beginning to end. I do not know what the Journal shows, but I do know that the RECORD shows that there was no motion made to reconsider, and therefore no motion was made to lay the motion to reconsider upon the table. That is all I have to say.

While I regret that the gentleman from Florida was deprived of his right, I wish to say for myself distinctly that I had no intention to deprive the gentleman from Florida, or any other gentleman, of any right which he possessed. The decision I made when I occupied the chair in reference to this bill was only what the House had the right to demand at my hands as its presiding officer at the time.

That was the only question in the matter; and beyond that no motion was made or action was taken in regard to the bill. No motion was made to reconsider.

Mr. DOUGHERTY. I will state, in reference to what the gentleman from Kentucky [Mr. STONE] has said, that it has not at any time been my intention to impugn his motives in this matter.

Mr. STONE, of Kentucky. I did not understand the gentleman to do so.

Mr. DOUGHERTY. I make the statement to this House, and I think the gentlemen who were sitting in my vicinity at the time I was on the floor will bear out the statement, that, having voted "no," immediately after voting I called for a division. The Chair evidently did not hear me, and decided the question. Now, as to the matter of deliberation—the deliberation with which he decided it—I think that gentlemen upon this floor will agree that the decision was certainly a very quick one. The gentleman, however, is of course the best judge of the deliberation with which he decided that question; and I raise no point upon that.

The practice on this floor has been—if I am any judge of the procedure since I have been a member on this floor—a question having been put, a member calls for a division, and even after the Chair has decided the question and a gentleman has arisen and stated that he had called for a division it has certainly been the custom of the House to have the division. It has certainly been the uniform custom of the present occupant of the chair.

The SPEAKER. The Chair will state that he now has the original notes of the Official Reporter, which can be read if the gentleman from Florida [Mr. DOUGHERTY] desires; but these notes show what has already been stated by the gentleman from Kentucky [Mr. STONE] that no motion to reconsider was made. If there be no objection, therefore, the Journal will be corrected, and it will be in order for the gentleman from Florida [Mr. DOUGHERTY] to make the motion to reconsider.

Mr. ROGERS. A point of order. Can he do so, having voted "no?"

The SPEAKER. The Chair does not know how any gentleman voted, the yeas and nays not having been taken.

Mr. DOUGHERTY. If having voted in the minority——

The SPEAKER. There is no record of the vote, and in such cases any gentleman can make a motion to reconsider.

Mr. DOUGHERTY. A parliamentary inquiry, Mr. Speaker. Would the fact of a motion being entered to reconsider the vote by which that bill was passed bring the bill back from the Senate?

The SPEAKER. The House would then, the Chair presumes, in accordance with the usual custom, request the Senate to return the bill.

Mr. DOUGHERTY. Is there any precedent for the Senate refusing to return the bill? [Laughter.]

The SPEAKER. The Chair has not examined the precedents; but if there be no objection, the Journal will be corrected in accordance with what is shown by the record and the statement by the gentleman presiding at the time, and if the gentleman desires he can make a motion to reconsider. If there be no objection, the Journal as corrected will be approved.

Mr. STONE, of Kentucky. If while occupying the chair on yesterday the gentleman from Florida [Mr. DOUGHERTY] feels that by any action of mine he was deprived of any right to which he was entitled as a member upon this floor, I simply want to say that I desire the House to give to the gentleman from Florida the opportunity to exercise any right that he might have thus been deprived of. I will at the same time make my humble acknowledgment to the House for any error I may have committed, if I did so.

Mr. DOUGHERTY. I will state that so far as I am concerned I will do the gentleman from Kentucky the justice to say that whatever right I may have been deprived of it was inadvertently done on the part of the gentleman from Kentucky.

Mr. Speaker, I would first ask that the Journal be corrected.

The SPEAKER. That has been done.

Mr. DOUGHERTY. Then I ask to enter a motion to reconsider.

The SPEAKER. The gentleman has the right to enter that motion. If there be no objection, the Clerk will be instructed to request the Senate to return the bill to the House.

Mr. FARQUHAR. Mr. Speaker, I desire to ask a parliamentary question on Rule XVIII, which I send to the Clerk's desk to be read.

The Clerk read Rule XVIII, as follows:

When a motion has been made and carried or lost it shall be in order for any member of the majority, on the same or succeeding day, to move for the reconsideration thereof, and such motion shall take precedence of all other questions, except the consideration of a conference report, a motion to fix the day to which the House shall adjourn, to adjourn, or to take a recess, and shall not be withdrawn after the said succeeding day without the consent of the House, and thereafter any member may call it up for consideration: *Provided*, That such motion, if made during the last six days of a session, shall be disposed of when made.

Mr. FARQUHAR. Now, Mr. Speaker, to my mind the arrangement proposed this morning sets aside the spirit of that rule, from the fact that the gentleman from Florida [Mr. DOUGHERTY] did not vote with the majority. So far as the status of the electoral bill is concerned, I think that every gentleman here, except the gentleman from Florida, feels that it ought not to be changed. There is, however, one point with reference to the status of the bill upon which my mind is not clear, and that is how far it will be affected by the motion to reconsider.

Mr. DOUGHERTY. No such motion was made.

Mr. FARQUHAR. I refer to the proposition of the gentleman to make a motion to lay the motion to reconsider on the table. What I desire to know of the Chair is this: What is the exact status of the bill, provided the House agree unanimously to the gentleman's request?

The SPEAKER. The Chair will first decide the point of order made by the gentleman from New York. The gentleman makes the point of order that the gentleman from Florida [Mr. DOUGHERTY] has no right to make the motion to reconsider because as a matter of fact he voted in the negative or with the minority. But that question has been frequently presented to the House, and ever since the Twenty-third Congress at least, and perhaps before that time, it has been decided as the Chair decided it awhile ago. The Clerk will read the decision made in the Twenty-third Congress, which has been followed ever since.

The Clerk read as follows:

Where a vote is not taken by yeas and nays, and consequently no record made of each member's vote, it is the well-settled practice to permit any member to move a reconsideration.

The SPEAKER. The Chair thinks, therefore, that the gentleman from Florida has a right to enter the motion to reconsider.

The status of the bill is this. The bill was passed yesterday, and the gentleman from Florida [Mr. DOUGHERTY] now makes a motion to reconsider the vote by which the bill was passed. If that motion is called up now, it must be acted upon now.

Mr. EZRA B. TAYLOR. I move to lay that motion on the table.

The question was taken on the motion of Mr. EZRA B. TAYLOR, and the Speaker declared that the ayes seemed to have it.

Mr. DOUGHERTY. I call for a division.

The House divided; and there were—ayes 40, noes 8.

Mr. DOUGHERTY. No quorum.

Mr. PLUMB. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PLUMB. I desire to inquire what has become of the business that was progressing when the matter came up?

The SPEAKER. The Chair is advised that this matter was taken up by unanimous consent upon the request of the gentleman from Missouri [Mr. BURNES]. Of course, if the regular order is demanded, the Chair must proceed with the regular order, which is the hour for the consideration of bills reported from committees.

Mr. PLUMB. Then, for want of making an objection, we are taking up time in this way?

The SPEAKER. The present occupant of the chair was out when this matter came up, but is advised that it came up by unanimous consent.

Mr. MCMILLIN. The gentleman from Missouri [Mr. BURNES] asked unanimous consent that this matter might be taken up pending the action as to tellers, and it was done. The tellers were standing on the floor when the consent was given.

The SPEAKER. That is the information given to the present occupant of the chair.

Mr. PLUMB. I desire to inquire whether the former order of business can now be proceeded with?

The SPEAKER. It can. The matter which came up by unanimous consent was a request by the gentleman from Missouri [Mr. BURNES], which was not agreed to, and afterward the gentleman from Florida [Mr. DOUGHERTY], as a matter of right, entered a motion to reconsider, which motion will be pending, and also the motion of the gentleman from Ohio [Mr. EZRA B. TAYLOR] to lay the motion to reconsider on the table.

The tellers will resume their places. The question is on the motion of the gentleman from Illinois, that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill the title of which was read.

Mr. BURNES. I wish to make a parliamentary inquiry. Would it be proper for me now to call up as a privileged matter the conference report on the deficiency bill?

The SPEAKER. That is in order.

Mr. BURNES. Then I call up that report.

The SPEAKER. A conference report is in order, even when a motion to adjourn is pending. The gentleman calls up for further consideration the report of the conference committee on the deficiency appropriation bill.

Mr. BURNES. I move that the report be adopted.

The SPEAKER. The motion was made yesterday; the previous question was ordered upon it, and the House was dividing, but no quorum voted. The tellers will resume their places.

Mr. DOUGHERTY. I wish to make a parliamentary inquiry. What is now the status——

The SPEAKER. The Chair has stated that on the bill with reference to the electoral count the gentleman from Florida has entered his motion to reconsider, and the gentleman from Ohio [Mr. EZRA B. TAYLOR] has made a motion to lay that on the table. The pending question in reference to that bill is upon the motion to lay on the table.

Mr. DOUGHERTY. Where is the bill in fact?

The SPEAKER. The bill has passed the House, and has been returned to the Senate.

Mr. DOUGHERTY. Would it be in order to offer a resolution asking the Senate to return the bill to the House, as a motion to reconsider has been entered?

The SPEAKER. Not at this time, because the gentleman from Missouri has called up the conference report.

Mr. JACKSON. I wish to make a parliamentary inquiry. At one time during this discussion a request was made, and, I believe, submitted by the Chair, that the Clerk request the Senate to return this bill. I wish to know whether that request was submitted.

The SPEAKER. The Chair stated that in accordance with the custom in such cases it would be in order to make such a request of the Senate, but it was not made.

The gentleman from Florida [Mr. DOUGHERTY] and the gentleman from Missouri [Mr. BURNES] will resume their places as tellers upon the question of agreeing to the report of the conference committee.

Mr. BURNES. As it has been announced that the bill in reference to the electoral count has been returned to the Senate, I ask unanimous consent to offer a resolution requesting the Senate to return the bill, pending the motion of the gentleman from Florida to reconsider.

Mr. BAKER, of New York. I would like to inquire the object in having the bill reconsidered.

Mr. BURNES. There is a motion pending now to reconsider, and the bill ought to be here.

Mr. JACKSON. A motion was made to lay the motion to reconsider on the table.

Mr. BURNES. The motion to reconsider is pending and also the motion to lay on the table.

Mr. EZRA B. TAYLOR. There is no more use in talking. I will say to the gentleman from Missouri that if Florida controls this Government let her take possession.

Mr. BURNES. Oh, well, Florida does not.

Mr. DOUGHERTY. Florida is not undertaking to do anything of the kind. A Representative from Florida is undertaking to place himself in a position where he will not be deprived of his rights as a member on this floor. That is all.

Mr. BURNES. I ask unanimous consent to offer the resolution I have indicated.

Mr. BAKER, of New York. I object.

The SPEAKER. The Clerk will inform the Senate that a motion

to reconsider is pending, and the Senate can take its own course in regard to the bill.

Mr. PLUMB. Now is it in order to proceed with our business?

The SPEAKER. The tellers will resume their places.

Mr. BURNES. I rise to a point of order. The record now discloses the condition of this bill; and I submit that the House, as a matter of right, should demand the recall of the bill. I make the point that it is the duty of this House, pending the motion to reconsider, to bring the bill back.

The SPEAKER. The present recollection of the Chair is that when there were joint rules in force covering proceedings between the two Houses—rules agreed to by both branches of Congress—there was a provision of the kind which the gentleman indicates. But those rules have not been regarded as in force since 1877; and the House and the Senate have, since that time, conducted their business with each other upon the principles of general parliamentary law. All that the House can do as a matter of privilege or right, is, through its Clerk, to notify the Senate that a motion to reconsider has been made and is pending.

Mr. DOUGHERTY. And to ask the return of the bill. It is usual to ask the Senate in such cases to return the bill.

Mr. BAKER, of New York. Is it not necessary that there should be an order of the House directing the Clerk to make the notification?

The SPEAKER. The Chair thinks it is the duty of the Clerk to convey to the Senate that information in regard to the state of the bill.

Mr. BAKER, of New York. Regardless of any instruction by the House?

The SPEAKER. The Clerk always notifies the Senate of the fact that a bill has passed the House; and the Chair thinks that when a motion to reconsider the passage of a bill is entered the Clerk should notify the Senate that there is such a motion pending. But the House has control of this matter. If the Committee on Enrolled Bills should report this bill to the House as being duly enrolled and ready for the signature of the Speaker, the House may refuse to receive the report and may refuse to permit the Speaker to sign the bill, because a motion to reconsider is pending. The House must always have control over its own proceedings.

Mr. ROGERS. I wish to submit a parliamentary inquiry, or it may be a point of order. I desire to know whether the Clerk of the House has the right to bear any message to the Senate which he is not directed to communicate by an order of the House entered on its Journal.

The SPEAKER. The Chair would hesitate about deciding as to the actual right of the Clerk; but the Chair thinks it has been the custom to communicate to the Senate all proceedings of the House in relation to bills passed by the House—House bills, and certainly Senate bills.

Mr. ROGERS. I desire to raise a point of order.

The SPEAKER. What is it?

Mr. ROGERS. It is that the Clerk of the House has no business and it is not his duty to make a communication to the Senate requesting the return of a bill passed by the House without first having the authority of the House for so doing.

The SPEAKER. The Chair will examine the matter.

Mr. DOUGHERTY. Has it not been the practice of the House to take such action as is proposed to be taken by that resolution in cases identical with the one now before us?

The SPEAKER. It has; and invariably unanimous consent has been granted for such a request, so far as the Chair remembers.

Mr. BAKER, of New York. I desire to withdraw my objection to the request of the gentleman from Missouri [Mr. BURNES].

Mr. HIESTAND. I demand the regular order.

The SPEAKER. The objection having been renewed, the Chair will take time to investigate and see what has been the practice of the House in similar cases heretofore. Heretofore, so far as the Chair knows, there has never been objection to the request for the recall of a bill from the Senate. It may be the question has never yet been presented to the House.

The tellers will take their places in reference to the report of the committee of conference on the deficiency bill.

Mr. EZRA B. TAYLOR. I move that the House do now adjourn.

The question was put, and the Chair declared that the noes seemed to have it.

Mr. EZRA B. TAYLOR. I demand a division.

The House divided; and there were—ayes 8, noes 37.

So the House refused to adjourn.

Mr. BAKER, of New York. What is the present status of the request of the gentleman from Missouri [Mr. BURNES] in reference to the electoral count?

The SPEAKER. It was objected to.

Mr. LAWLER. I desire to present a privileged report.

The SPEAKER. There is one before the House.

Mr. HIESTAND. I withdraw the motion for the regular order.

The SPEAKER. Objection having been withdrawn, the question recurs on the request made by the gentleman from Missouri [Mr. BURNES] for the adoption of the resolution which the Clerk will read.

The Clerk read as follows:

Resolved, That the Clerk of the House request the Senate to have returned to the House the bill S. 3620, a motion to reconsider the vote by which the bill was passed having been made.

Mr. BRECKINRIDGE, of Kentucky. Mr. Speaker, I think it is far more important that bill should pass than that the deficiency bill should pass. The election of the President may depend on the passage of that bill, and I therefore must object.

The SPEAKER. The Chair will look into the question and determine what the practice of the House has been.

Mr. DOUGHERTY. Mr. Speaker, I withdraw the demand for a further count.

The SPEAKER. The point of order being withdrawn, the Chair will announce the result of the vote.

The tellers report—ayes 51, noes 1.

So, no further count being demanded, the conference report was agreed to.

Mr. BURNES moved to reconsider the vote by which the conference report was adopted, and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

MARGARET KENNEDY.

Mr. LAWLER. I wish to submit a privileged report. This report is signed by the committee on the part of the Senate and the House, except Mr. BROWER, who was not in the city.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 307) for the relief of Margaret Kennedy, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

W. J. STONE,
FRANK LAWLER,
Managers on the part of the House.

WM. M. STEWART,
JOHN C. SPOONER,
JAMES K. JONES,
Managers on the part of the Senate.

The conference report was adopted.

Mr. LAWLER moved to reconsider the vote by which the conference report was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

Mr. PLUMB. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PLUMB. I wish to know whether on to-morrow the Committee on Labor will have an additional hour on this same question?

The SPEAKER. The Committee on Labor will have on to-morrow, or whenever that character of business is reached, an hour to complete the consideration of the bill before the House.

YANKTON AND MISSOURI RIVER RAILROAD.

Mr. PEEL submitted the following conference report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7547) entitled "A bill granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the Senate amendment numbered 1.

That the title be agreed to as proposed by the Senate.

S. W. PEEL,
KNUTE NELSON,
Managers on the part of the House.

H. L. DAWES,
O. H. PLATT,
JAMES K. JONES,
Managers on the part of the Senate.

The statement submitted by the House conferees was read, as follows:

The managers appointed on the part of the House upon the disagreement of the House to the Senate amendments to House bill 7547, entitled "A bill granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota," respectfully report: That the Senate amendment to said bill constitutes after the title an entire new bill. But inasmuch as the restrictions upon the railway company are increased, and the interests of the Indians are equally or better protected by the said amendment, your committee recommend concurrence therein. The bill as presented provides that the proposed railway shall pay to the Indians whatever damages they sustain in consequence of the appropriation of their lands, etc., for the construction of the road, the amount to be ascertained in such manner as the President may determine, and to pay in addition thereto the sum of $15 per mile per annum to the Indians.

And further, that said road shall at all times be under the control of the Congress of the United States until the said Territory is admitted into the Union as a State, and then to be under the control of the said State.

S. W. PEEL,
K. NELSON,
Managers on the part of the House.

The report was adopted.

Mr. PEEL moved to reconsider the vote by which the conference report was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ADJOURNMENT.

Mr. MCMILLIN. Mr. Speaker, I move that the House do now adjourn.

Mr. LANHAM. Pending that, I move that when the House adjourns to-day it adjourn to meet on Friday next.

The motion was agreed to.

The motion of Mr. MCMILLIN was then agreed to; and accordingly (at 1 o'clock and 40 minutes p. m.) the House adjourned until Friday next.

PRIVATE BILL INTRODUCED AND REFERRED.

Under the rule private bill of the following title was introduced and referred as indicated below:

By Mr. RICE: A bill (H. R. 11584) for the relief of Florida Kennerly—to the Committee on Invalid Pensions.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. ABBOTT: Petition of heirs of David and Barbette Carb, of Tarrant County, Texas, for reference of their claim to the Court of Claims—to the Committee on War Claims.

By Mr. PHELAN: Petition of Mrs. C. A. Russell, administratrix of B. B. Neville, of Shelby County, and of M. E. Eubanks, heir of Ann B. McGowan, of Hardeman County, Tennessee, for reference of their claims to the Court of Claims—to the Committee on War Claims.

SENATE.

THURSDAY, *October* 11, 1888.

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. CULLOM presented the petition of Thomas S. Hasler, late surgeon of Company K, Fifty-fifth Regiment Ohio Infantry Volunteers, praying to be allowed a pension; which was referred to the Committee on Pensions.

REPORTS OF COMMITTEES.

Mr. SAWYER, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 2702) granting a pension to Mary Ann Shock;

A bill (H. R. 10515) to increase the pension of William Gallagher;

A bill (H. R. 5751) for the relief of Margaret M. Hatch; and

A bill (H. R. 7887) granting an increase of pension to Jonathan C. Harrison.

CHINESE EXCLUSION.

Mr. ALLISON. I am instructed by the Committee on Appropriations to report favorably without amendment the bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act. I should like to have the bill passed now, if there is no objection.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill for the purpose of carrying into effect the provisions of the act approved October 1, 1888, entitled "An act a supplement to an act entitled 'An act to execute certain treaty stipulations relating to Chinese,' approved the 6th day of May, 1882," and for defraying the expenses which may be incurred in the enforcement of that act by the Secretary of the Treasury during the fiscal year 1889 the sum of $50,000, or so much thereof as may be necessary, is appropriated by the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS INTRODUCED.

Mr. CAMERON introduced a bill (S. 3627) to increase the pension of John B. Davis; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 3628) granting an increase of pension to Emma Biddle; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Pensions.

He also introduced a bill (S. 3629) for the relief of the heir or heirs of John Howard Payne; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

REDUCTION OF LETTER-POSTAGE.

The PRESIDENT *pro tempore*. If there are no resolutions, concurrent or other, the order of morning business is closed.

Mr. MITCHELL. There is a bill on the table which I had the honor of introducing on the 17th of September, relating to the reduction of letter-postage. If agreeable to the Senate, I ask that it be taken up for the purpose of enabling me to submit some brief remarks upon it.

The PRESIDENT *pro tempore*. The bill will be read.

The Secretary read as follows:

A bill (S. 3558) to reduce letter-postage to 1 cent per ounce.

Be it enacted, etc., That from and after March 4, 1889, the rates of letter-postage shall be as follows: On all letters weighing 1 ounce or less, the postage from any point or place in the United States to any other point or place within the limits of the United States, and on all drop-letters, shall be 1 cent, and for each additional ounce or fraction thereof the postage shall be 1 cent additional.

The PRESIDENT *pro tempore*. If there be no objection, the bill is before the Senate, and the Senator from Oregon will proceed.

Mr. MITCHELL. Mr. President, before moving a reference of this bill to the Committee on Post-Offices and Post-Roads, I desire to submit a few observations for the consideration of that committee and of the Senate.

Cheap postage on letters is something that interests every man, woman, and I might perhaps with propriety say, every child in the United States; especially are the business communities, as well as those who are poor, interested in having letter-postage as low as possible. In considering this subject, of course it is proper that the revenues of the Post-Office Department should be taken into account; and while, in my judgment, it never was expected that the Post-Office Department in this country would be self-sustaining, nor is there in either law or logic any very good reason why it should be, especially at the sacrifice, either total or partial, of the interests of the great masses of the people, any more than the War, Navy, or Interior Departments should be self-sustaining, at the same time it is well we should look to the practical effect in the matter of revenues and the interests of tax-payers generally, of any proposed law looking to a reduction of letter-postage.

There was evidently a radical difference in intention between those who framed the articles of confederation and the framers of our Constitution. Under the former it is plainly to be observed it was expected the Department would be self-supporting, while under the latter it is quite apparent there was upon the part of those who established our present Government an entire absence of all expectation of self-support.

The great fundamental idea upon which the postal system of the United States rests is not that of revenue—as is the case in most European countries—but to disseminate intelligence, accommodate the people, encourage trade, aid commerce, strengthen the ties of friendship and social intercourse, and give stability and vitality to the social, business, and political fabric.

In most of the countries of Europe the main object of the postal service is to produce revenue; we see, consequently, in England, that out of gross receipts amounting to £8,705,337, on money-order and postal business proper, during the year ending March 31, 1888, a net revenue of £2,771,517, or nearly $14,000,000, was realized; in Germany, that out of gross receipts from all branches of the postal service, amounting to 252,933,664 francs, in the year ending March 31, 1887, a net revenue of 34,088,665 francs, or over $6,800,000, was realized; and in France, that out of gross receipts amounting to 172,945,928 francs, during the year ending December 31, 1886, a net revenue of 33,069,462 francs was realized.

It is, therefore, to the postal service of these countries respectively that they look in a large measure for the revenues necessary to revolve the wheels of government in the various *other* departments of the public service, and it is, therefore, a species of general taxation impressed upon and collected annually from the convenience, the business, and social intercourse, and the means of dissemination of intelligence among the people. It is, in other words, a direct and burdensome tax in these European countries and under these European systems upon those things which can not but be properly classed among the very *essentials* of life.

In the United States it is wholly different. There is no reason whatever that the Post-Office Department in this country should be self-supporting, much less that it should be looked to as a source of revenue to be used in liquidating the ordinary expenses of the Government in other Departments. Taxes from other sources, on the luxuries of life and on those articles of foreign production which come in direct competition with the home products of our own country are more than sufficient to meet the ordinary expenses of the Government, including any annual deficit in the revenues of the Post-Office Department. From these sources of taxation we are to-day confronted with what by some is regarded a dangerous surplus in the national Treasury, and all parties are insisting on a reduction of taxation of from $60,000,000 to $75,000,000.

It may further be said in this connection that our present rates of letter-postage are as cheap, perhaps a fraction cheaper, than are the rates of any other country on the globe. The penny postage of Great Britain is a large fraction *higher* than our present 2-cent letter-postage, weight, distances, and value of coins considered. But however this may be, if without any serious embarrassment either to the revenues of the Government or the postal service generally in all its varied and important ramifications the rates of letter-postage can be reduced below the present rate of 2 cents for each ounce or fraction thereof, thus extending a most material service to the great body of the American people, then it should be done without any hesitation or unnecessary delay.

We are a progressive nation; none more so—yea, none by a very large percentage so much so among civilized men; and with our progress it is but right that our legislation should gradually tend to reduce, so far as possible, the burdens of the people, and lighten, so far as consistent with good government, the taxes of the masses upon all those articles of general use, which, like letters, must be ranked, not among the

luxuries, but the necessities of life. Especially is the ordinary business letter, as also the every-day letter of social intercourse between separated friends, to be properly ranked among the indispensable necessities of business and social life.

Prior to 1845, forty-three years ago, letter-postage was in this country 25 cents on each letter of a single sheet of paper sent any distance over 400 miles, and 50 cents on a letter containing two sheets of paper a similar distance, and 75 cents on a three-sheet letter. In that year (1845) the first reduction was made by Congress, whereby the letter rate was fixed at 5 cents on all letters going any distance under 300 miles, and 10 cents on all distances over 300 miles; and what was the effect? The increase of letters written and sent was such that, although there was a temporary falling off in the aggregate annual receipts, it was not enough to create a deficiency. Seven years elapsed before another reduction was made. This was in 1851, when letter-postage was reduced from 5 cents to 3 cents, and rates generally on second and third class matter were reduced, and yet, in 1865, there was a surplus in the Post-Office Department of $861,430. In 1882 the surplus was $1,400,000, and in 1883 about $2,000,000. The next reduction in letter-postage was in October, 1883, when the rate of letter-postage was reduced to 2 cents for each half-ounce. This resulted in a deficiency the ensuing fiscal year of about $1,888,601, and in 1885 the deficiency, we are told, was about $7,000,000.

But notwithstanding this great deficiency, a Republican administration intervened again in 1884 in behalf of the masses of the people and of the business interests of the country, and provided that letters not exceeding 1 ounce in weight should go for 2 cents between any points however remote throughout the States and Territories of the Union; and the rates, moreover, on newspapers and periodicals were reduced one-half. Still, notwithstanding this increase in the weight of the letter to be conveyed and the reduction of rates for other matter, the deficiency in 1886 was not as great as in 1885. In the latter year, as we have seen, it was about $7,000,000, while in 1886 it was about $6,930,000, and one year later, in 1887, as we are advised by the report of the Postmaster-General, the deficiency was only about $4,000,000, or nearly $3,000,000 less than that of the previous year—a result brought about mainly by the large increase of mailable matter transmitted through the mails, and also by a very serious and indefensible curtailment of the star-route mail service throughout the States and Territories of the Pacific coast and elsewhere, whereby the people were unjustly deprived of proper mail service.

But not only so. Notwithstanding the decrease in postage rates, the revenues to the Department increased in the fiscal year ending June 30, 1887, $4,840,000 over those of the preceding year. Postmaster-General Vilas in his last annual report says:

> In part arising from an extension of the limits of mailable matter of the fourth class, ordered to meet the requirements of trade, and from the receipts of the special delivery service, but chiefly from the greater employment of all postal facilities consequent upon the rising business prosperity of the country, faithfully reflected in the postal service, the revenues have gained upon the preceding year by nearly $4,840,000, attaining a height never reached before, despite the restrictive operation of various reductions in the rates of postage.

It is true the expenditures of the Post-Office Department for the fiscal year ending June 30, 1888, were largely in excess of those of the preceding year; the expenditures for the year 1887 being $53,723,782, and for the year ending June 30, 1888, $55,723,782, or an increase in one year of $2,717,588. It is furthermore true that the expenditures of this Department were in the fiscal year ending June 30 last in excess of those in the last year of President Arthur's administration—that is, the fiscal year ending June 30, 1885—in the sum of $5,677,547, the expenditures in 1885 being only $50,046,235, while in the fiscal year just closed, June 30, 1888, they were $55,723,782. While this is all undoubtedly true, it is plain that, with a commendable but not parsimonious economy in the administration of the Post-Office Department, in connection with the vast increase of population and business throughout the country and the consequent multiplication of post-offices and of postal business, the deficiency now existing in the Post-Office accounts must, under existing rates, soon give place to a very large surplus. In fact, the late Postmaster-General, Mr. Vilas, while not favoring a present reduction in the rates of letter-postage, so states in his annual report. He says, in speaking of the reduction in the deficiency of last year over that of the previous year and of the great increase of business:

> While the fair augury from our present circumstances gives hope that during the current year it (the deficiency) will nearly if not entirely disappear.

He further says:

> It may, therefore, be fairly affirmed that from the beginning of the current fiscal year (July 1, 1887) the postal service has again become substantially self-sustaining.

This prediction of the late Postmaster-General Vilas in his last annual report, it is true, has not been entirely verified, inasmuch as the Department, instead of showing an entire disappearance of any deficiency for the current year referred to by Mr. Vilas, or that the postal service has from the beginning of the current fiscal year (July 1, 1887) again become self-sustaining, there is an actual deficiency of $2,555,040. Still it is true that although the expenditures are thus largely increased, that is, in the sum of $5,677,547 over those of 1885, the last year of Republican administration—still, owing to the largely increased revenues, it is true the gap between revenue and expenditure is gradually, if not rapidly, growing less, and as has been the case within two or three or four years at most, after all, cases of reduction of the rates of letter-postage, will soon disappear.

And hence it follows that without any detriment whatever to the fiscal operations of the Government in connection with the affairs of the Post-Office Department, and without drawing upon the tax-payers to supply annual deficiencies, and with immense benefit to the great masses of the people, especially the business community, and in another form the indigent classes, a reduction of letter-postage to 1 cent to each 1-ounce letter or fraction thereof, and also including all drop letters, may very properly be made. Such a move would be in the interest of the rapid exchange of intelligence; it would increase and add strength and vigor to business transactions, and tend to the maintenance, perpetuity, and strengthening of those ties of kindred, connecting millions of individuals throughout the length and breadth of our wide domain, and which add strength, stability, and unity to the nation, and by means of all which national prosperity is promoted and the great cause of civilization advanced.

THE HISTORY OF LEGISLATION RELATING TO THE RATES OF LETTER POSTAGE IN THE AMERICAN COLONIES.

It may be interesting, in connection with this proposed legislation, as showing the rapidity of the national growth, to note the first steps taken by the English Parliament looking to the establishment of a regular system of mails in America. The first enactment on this subject was made in the year 1710. It is contained in chapter 10 of the 9th Queen Anne and was an act providing for the establishment of a general post-office for all Her Majesty's dominions and for setting apart a weekly sum out of the revenues thereof, that is of the revenues of the post-office for, to quote the act, "the service of the war and other Her Majesty's occasions."

This act also fixed a schedule of postage rates throughout the English dominions, including, of course, the American colonies. The schedule was lengthy and complicated. It provided, for instance, among other things—

> That on all letters and packets from New York to New London, the chief town in Connecticut, in New England, and from Philadelphia, the chief town in Pennsylvania, and from those places back to New York, the postage should be on a single letter 9 pence; double letter, 1*s.* 6*d.*; treble letter, 2*s.* 3*d.*; a 1-ounce letter, 3*s.*

It also provided—

> That on all letters and packets from New London and Philadelphia to any place not exceeding 50 English miles, and thence back again, the postage should be on a single letter, 4*d.*; double letter, 8*d.*; treble, 1*s.*, and on an ounce letter, 1*s.* and 4*d.*

The next important step was taken in 1765 (chapter 25 of 5 George III), which was an act to alter certain rates of postage and to amend, explain, and enlarge several provisions in an act made in the ninth year of the reign of Queen Anne, and in other acts relating to the revenue of the post-office.

LEGISLATION AS TO LETTER POSTAGE BY THE CONTINENTAL CONGRESS.

The next important legislation in reference to this general subject of postal service in America was the act of the Continental Congress of July 26, 1775. This act provided that a Postmaster-General should be appointed for the United Colonies, who should hold his office at Philadelphia and should be allowed a salary of $1,000 per annum for himself and $340 per annum for a secretary and comptroller, with power to suggest so many deputies as to him might seem proper and necessary.

This act also provided that a line of posts should be appointed, under the direction of the Postmaster-General, from Falmouth in New England to Savannah in Georgia, with as many cross-posts as he should think fit.

This act further provided an allowance to the deputies in lieu of salary and of contingent expenses of 20 per cent. on the sums they collected and paid into the general post-office annually when the whole was under or not exceeding $1,000 and 10 per cent. for all sums above $1,000 a year.

It was also recommended by the Continental Congress that the Postmaster-General should establish a weekly post to South Carolina. The Journals of the Continental Congress further show that on that date (July 26, 1775), the Congress proceeded to the election of a Postmaster-General for one year and until another should be appointed by a future Congress, at which election Benjamin Franklin was unanimously chosen Postmaster-General.

By the act of the Continental Congress of April 16, 1779, the then rates of postage, which were fixed by chapter 10, 9 Queen Anne, in 1710, were doubled.

The next change in postal rates is to be found in a resolution of the Continental Congress of December 28, 1779, by which it was provided that the rate of postage until the further orders of Congress should be, "twenty prices upon the sums paid in the year 1775." Five months later, on May 5, 1780, by a resolution adopted on that date, the rates of postage were doubled. This act also provided as follows:

> That all masters of packets and other vessels in Continental service be, and they are hereby, required to lodge whatever letters they bring from abroad, in the post-office nearest to the port where they shall arrive and immediately after their arrival.

While on December 12, 1780, it was provided by a resolution of the Continental Congress as follows:

That the rates of postage on letters be fixed at half the rates paid at the commencement of the war.

This resolution further provided as follows:

That the post-riders to the eastward during their necessary stay at Fishkill have their horses kept in the public stables, and that a reasonable deduction be made from their pay for the forage they shall be supplied with.

And it was further ordered:

That the Postmaster-General order the post-riders to travel through Connecticut at a distance from the sea shore in such a manner as may render them secure from attempts of a like nature with that which lately happened at Stratford, in that State.

It would seem from this that the people of Connecticut in and about Stratford had about that time, 1780, been interfering in some way with the English mail service in this country.

The next change made by the Continental Congress in postage on letters was by resolution of October 19, 1781, when it was resolved as follows:

That the price to be paid for the postage of letters be reduced to what it was at the commencement of the present war.

This resolution authorized the Postmaster-General—

To allow the several postmasters such commission per cent. as he should think their respective services merit, so that the said commissions did not in the whole exceed 20 per cent.; and, further, that he cause the mail to be carried with all dispatch once a week; and, still further, that from and after the 1st day of December next (1871) all express riders on constant pay be dismissed from the public service.

This state of the postal service, in so far as the rates of postage on letters were concerned, continued for one year, until October, 1782, when a lengthy enactment upon the subject of the mail service in this country, entitled "An ordinance for regulating the post-office of the United States of America," was passed. By this ordinance the rates of postage on letters to and from the different post-offices within the United States were as follows, in pennyweights and grains of silver, estimating each pennyweight at five-ninetieths of a dollar, to wit: For any distance not exceeding 60 miles, 1 pennyweight 8 grains; upwards of 60 and not exceeding 100 miles, 2 pennyweights; upward of 100 and not exceeding 200 miles, 2 pennyweights 16 grains; and so on, 16 grains advance for every 100 miles. These were the inland rates; other rates were provided for foreign mail matter.

The next change in the letter postal rates in this country was brought about by a resolution of Congress on October 20, 1787, when it was resolved as follows:

That the Postmaster-General be, and he is hereby, authorized and instructed to alter the present rates of postage so as to reduce them as nearly 25 per cent as will consist with the present mode of calculating pennyweights and grains of silver, in order to reduce them to the currencies of the several States, and that he make the necessary arrangements so that the new rates may take place on the 5th day of April next.

This resolution also provided as follows:

Whereas large packets would frequently be sent by post if a proportionably less rate of postage were charged for them than for letters: Therefore,

Resolved, That the Postmaster-General be, and he hereby is, authorized to fix such rates per pound weight for the carriage of such packets as he may judge will be most likely to induce persons to send such by post.

LETTER POSTAL LEGISLATION UNDER THE PRESENT GOVERNMENT.

The history of legislation in reference to the rates of letter postage in this country since the adoption of our Constitution is very interesting and may very properly be considered with profit in connection with the consideration of the pending measure looking to the reduction of postage on letters to 1 cent per ounce, and especially with reference to the question already briefly referred to, that of the effect of the several reductions on the revenues of the Post-Office Department.

The act of February 20, 1792, was the first act under our present Constitution fixing the rates of postage on domestic letters. That act established the following rates, to take effect on the 1st day of June, 1792. Section 9 provided—

For every single letter not exceeding 30 miles, 6 cents; for every single letter over 30 miles and not exceeding 60 miles, 8 cents; for every single letter over 60 miles and not exceeding 100 miles, 10 cents; for every single letter over 100 miles and not exceeding 150 miles, 12½ cents; for every single letter over 150 miles and not exceeding 200 miles, 15 cents; for every single letter over 200 miles and not exceeding 250 miles, 17 cents; for every single letter over 250 miles and not exceeding 350 miles, 20 cents; for every single letter over 350 miles and not exceeding 450 miles, 22 cents; and for every single letter over 450 miles, 25 cents.

This act also provided that for every double letter double these rates should be paid, and for every triple letter triple such rates.

The next change in rates of domestic letter-postage was made by section 7 of the act of March 2, 1799. That act established a general post-office at the seat of Government of the United States, and provided that—

For every letter composed of a single sheet of paper conveyed not exceeding 40 miles, 8 cents; over 40 miles and not exceeding 90 miles, 10 cents; over 90 miles and not exceeding 150 miles, 12½ cents; over 150 miles and not exceeding 300 miles, 17 cents; over 300 miles and not exceeding 500 miles, 20 cents; over 500 miles, 25 cents.

By this act a letter containing two pieces of paper was designated as "a double letter," and double the above rates of postage were to be paid. A letter containing three pieces of paper was designated as "a triple letter," and on which triple the above rates were to be paid.

This act also, in section 13, authorized postmasters—

to pay mail-carriers 1 cent for each way-letter delivered to them, also mail-carriers authorized to demand and receive 2 cents in addition to the ordinary postage for every letter delivered by them to persons living between post-offices on their route.

The next change in the rates of postage on letters was made by section 11 of the act of April 30, 1810, and was as follows:

A letter containing a single sheet of paper to be sent—	Cents.
Forty miles	8
From 40 to 90 miles	10
From 90 to 150 miles	12½
From 150 to 300 miles	17
From 300 to 500 miles	20
And all over 500 miles	25

On double letters, or two pieces of paper double, these rates were charged, and on triple, or three pieces of paper, triple rates.

The thirty-fourth section of this act also provided that the rate of postage on drop or local letters should be 1 cent each.

Another change in the rates of letter-postage was made by section 1 of the act of April 9, 1816, which provided that rates of postage after May 1, 1816, should be as follows:

Every letter composed of a single sheet of paper—	Cents.
Less than 30 miles	6
Over 30 miles and not exceeding 80 miles	10
Over 80 miles and not exceeding 150 miles	12½
Over 150 miles and not exceeding 400 miles	18½
Over 400 miles	25

Every double letter composed of two pieces of paper double these rates, and for every triple letter, or three pieces of paper, triple these rates.

This was, it will be perceived, a slight increase in the rates of letter-postage over those provided by the act of April 30, 1810.

The next legislation in reference to letter-postage was that of section 13 of the act of March 3, 1825. The rates, however, fixed by this act were substantially similar to those of the act of April 9, 1816. This act also provided that on all drop or local letters delivered at the post-office 1 cent each should be paid.

The next material change in the rates of domestic letter-postage in this country was made by section 1 of the act of March 3, 1845, and was in substance as follows:

For every single letter in manuscript, or marks and signs, by mail, under 300 miles, 5 cents; over 300 miles, 10 cents; double letter, double rates; treble letter, treble rates; quadruple letter, quadruple rates; and every letter or parcel not exceeding one-half ounce in weight shall be deemed a single letter, and every additional weight of one-half ounce or less shall be charged with an additional single postage. Drop or local letters shall be charged a postage rate of 2 cents each.

This act went into effect July 1, 1845.

This is the first legislation, it will be perceived, by which the rate of letter-postage on letters was based partly on the weight of the letter sent. The act still maintained distance sent as an element, but reduced the schedule from a number of distances as recognized in all previous legislation to simply two measures of distance; that is to say, all distances under 300 miles and all distances over 300 miles.

MAIL SERVICE ON THE PACIFIC COAST.

The first postal legislation looking specially to the establishment of a proper postal service on the Pacific coast is to be found in the act of March 3, 1847. By section 1 of this act, which was entitled "An act to establish certain post-routes, and for other purposes," the following post-routes were established on the Pacific coast. I quote from the act:

From Oregon City, via Fort Vancouver and Fort Nisqually, to the mouth of Admiralty Inlet.

And—

From Oregon City, up the Willamette Valley, to the Kalamet River in the direction of San Francisco.

The act further provided in this wise:

The above routes shall go into operation July 1, 1847, or sooner should the funds of the Department justify the same.

Section 6 of this act (March 3, 1847) also provided as follows:

That the Postmaster-General be, and he is hereby, authorized to contract for transporting a mail from Charleston, S. C., to Chagres, touching at St. Augustine and Key West, and also at Havana, in the Island of Cuba, if deemed expedient, and across the Isthmus to Panama, and from thence to Astoria, or the mouth of the Columbia River, touching at Monterey, San Francisco, and such other places on the coast as the Postmaster-General may direct; the mail to be carried from Charleston to Chagres, and from Panama to Astoria, in steam-ships, and to be transported each way once every two months, or oftener as the public service may require.

By section 7 of this act the Postmaster-General was authorized to establish a post-office and appoint a deputy postmaster at Astoria, Oregon, and at such other places on the coast of the Pacific within the territory of the United States as the public interests may require. That act also provided that—

All letters conveyed to or from—	Cents.
Chagres should be	20
Havana	12½
Panama	30
Astoria	40
Any other place on the Pacific	40

It was, moreover, by virtue of the provisions of this act (March 3, 1847) that the postage-stamp was first introduced to the letter-senders of the United States. Section 11 provided as follows:

That to facilitate the transportation of letters in the mail, the Postmaster-

General be authorized to prepare postage-stamps which, when attached to any letter or packet, shall be evidence of the payment of the postage chargeable on such letter.

The next reduction in letter postage was made by the act of March 3, 1851, section 1 of which act provided that the letter-postage rates should be as follows:

For every single letter, in writing, marks, or signs, by mail, not exceeding 3,000 miles, prepaid postage, 3 cents; not prepaid, 5 cents; for any greater distance, double these rates.

This act went into effect July 1, 1851.

The next reduction in letter postage was made by the act of March 3, 1855. Section 1 of that act provided that in lieu of the rates of postage then in force, the rate should be as follows:

For every single letter, in manuscript or paper of any kind, in writing, marks, or signs, conveyed in the mail between places in the United States, not exceeding 3,000 miles, 3 cents; and for any greater distance, 10 cents; for a double letter, double rates; treble letter, treble rates; quadruple letter, quadruple rates.

This act also provided that every letter or parcel not exceeding one-half ounce in weight should be deemed a single letter, and every additional weight of one-half ounce or less should be charged an additional rate.

This act also provided that all postage should be prepaid, and that postage on drop or local letters should be 1 cent each.

The act of April 3, 1860, provided in section 2 that postage on drop or local letters delivered by carriers should be 1 cent each.

The next change in postal rates on letters was made by the act of February 22, 1861, section 17 of which provided that the rate of letter-postage between any State or Territory east of the Rocky Mountains and any State or Territory on the Pacific should be 10 cents for every one-half ounce.

It was also provided by the act of March 2, 1861, section 9, that contractors on the overland route to San Francisco shall be—

required to run a pony-express during the continuance of their contract or until the completion of the overland telegraph, at certain times, carrying for the Government free of charge 5 pounds of mail-matter, with the liberty of charging the public, for transportation of letters by said express, not exceeding $1 for one-half ounce; to commence before the 25th day of March, 1862, and expire July 1, 1864.

By the act of March 3, 1863, the first regular division into classes of mailable matter was made. That act divided mailable matter into three classes: First class, letters; second class, regular printed matter; third class, miscellaneous matter.

This act also fixed the uniform single rate of postage at 3 cents prepaid by stamp for all distances.

The act of March 3, 1865, section 15, fixed the prepaid postage on drop-letters at all offices except-free delivery, at 1 cent; while the act of June 8, 1872, section 157, established the postage on drop or local letters at letter-carrier offices at 2 cents the half-ounce or fraction thereof, and 1 cent the half-ounce or fraction thereof at all other offices.

By this act, furthermore (section 170), the first provision was made in this country for the issue and transmission of postal-cards at 1 cent each.

By the act of March 3, 1879, letter rates of postage were fixed at 3 cents on each half-ounce, or fraction thereof, postal-cards at 1 cent, and drop-letters at the rate of 2 cents per half-ounce or fraction thereof, including delivery at letter-carrier offices; and 1 cent for each half-ounce or fraction thereof where free delivery by carrier is not established.

The next important and most radical reduction in the rates of letter-postage was made by the act of March 3, 1883, the act having been passed by a Republican Congress and signed by President Arthur, whereby letter-postage was reduced one-third, or from 3 cents to 2 cents for each half ounce. This act took effect October 1, 1883.

But not only so. On the last day of the last Republican administration, on March 3, 1885, another reduction of one-half the then existing rates was brought about by the approval on that day by President Arthur of an act providing that on and after July 1, 1885, letter-postage should be charged at the rate of 2 cents for each *ounce* or fraction thereof. Prior to that the rate was 2 cents on each *half* ounce.

It will be observed the most important changes in the matter of reductions of postage on letters occurred in the years 1845, 1851, 1855, 1863, 1883, and 1885. It is well to observe a little more carefully what effect in respect of the revenue was produced by these several reductions of letter-postage.

The postal revenues, for instance, for the fiscal year ending June 30, 1845, the year immediately preceding the reduction made by the act of March 3, 1845, were $4,439,841.80, while the revenue for the fiscal year succeeding that of 1846, being the first year after the adoption of the reduced rate, the revenues were $4,089,089.97, showing a reduction of only $350,751.83, while in the next five succeeding years the average annual postal revenues amounted to $5,158,078.05, or an increase on the average annually for these five years of $718,236.25.

The following table gives the yearly gross postal revenues for these five fiscal years:

For the fiscal year—	
1847	$4,013,447.14
1848	4,161,077.85
1849	4,705,176.28
1850	5,499,986.66
1851	6,410,604.33

In the case of the next material reduction in letter-postage, that of the act of March 3, 1851, by which the 5 and 10 cent rates for inland letters, established by the act of March 3, 1845, were reduced to 3 cents prepaid and 5 cents unpaid for any distance under 3,000 miles, and double said rates for distances over 3,000 miles, there was really a marked increase in the revenues from the very start.

The postal revenues for the year 1852 were $6,925,971.28 as against $6,410,604.33 the preceding year under the old rates, being an increase, as will be seen, of $515,366.95, while the average yearly postal revenues for the three succeeding years, 1853, 1854, and 1855, were $6,749,482.35, or an average increase of $338,878.02 over the revenues of 1851.

Coming to consider the effect of the next material reduction in letter-postage, that of the act of March 3, 1855, we find there was a material increase in the revenues as will be seen from the following statement:

The postal revenues for the fiscal year 1856, being the first year after the adoption of the reduced rates fixed by the act of March 3, 1855, were $7,620,821.66 as against $7,352,136.13 for the fiscal year ending June 30, 1855, the year preceding the reduction in letter postage, showing an increase in the revenue the first year after the decrease in the rates of letter-postage of $268,685.53.

So, too, with the reduction made by the act of March 3, 1863, whereby a uniform letter rate of 3 cents was fixed for all distances. We find that for the fiscal year ending June 30, 1863, the postal revenues were $11,163,789.59, while for the next succeeding year under the reduced rates the postal revenues were $12,438,253.78, or an increase of $1,274,464.19; while in the second year subsequent to this reduction of letter-postage, that of 1865, the gross postal revenues were $14,566,158.70, or an increase over those of the fiscal year 1863, the year immediately preceding this reduction of $3,392,369.11.

I here insert the following table showing the yearly gross revenues and expenditures of the Post-Office Department for the last ninety-eight years, commencing with the year 1790, and from which it will appear at a glance that through all these several reductions in the rates of letter-postage (and there were still greater reductions from time to time in the postage on second and third class matter, and which I have not cited or discussed) there has been a gradual and marvelously rapid increase each year in the gross revenues of the Post-Office Department, the gross annual revenues to-day being more than six times greater than they were thirty years ago:

United States postal statistics, 1790–1888.

Years.	Revenue of the Department.	Expenditure of the Department.	Years.	Revenue of the Department.	Expenditure of the Department.
1790	$37,935	$32,140	1840	4,543,522	4,718,236
1791	46,284	36,657	1841	4,407,726	4,499,528
1792	67,443	54,530	1842	4,546,849	5,674,752

1821	1,059,087	1,184,283	1871	20,037,045	24,390,104
1822	1,117,490	1,167,572	1872	21,915,426	26,658,191
1823	1,130,115	1,156,995	1873	22,996,742	29,084,946
1824	1,197,758	1,188,019	1874	26,477,072	32,126,415
1825	1,306,525	1,229,043	1875	26,791,360	33,611,309
1826	1,447,703	1,366,712	1876	27,805,908	38,203,488
1827	1,524,633	1,468,959	1877	27,468,323	33,486,322
1828	1,659,915	1,689,945	1878	29,277,517	34,165,084
1829	1,707,418	1,782,132	1879	30,041,983	33,449,898
1830	1,850,583	1,932,708	1880	33,315,479	36,542,804
1831	1,997,811	1,936,122	1881	36,785,398	39,251,736
1832	2,258,570	2,266,171	1882	41,883,005	40,482,021
1833	2,617,011	2,930,414	1883	45,508,693	43,282,944
1834	2,823,749	2,910,605	1884	45,335,959	47,224,560
1835	2,993,356	2,757,350	1885	42,560,844	50,046,235
1836	3,408,323	3,841,766	1886	43,948,423	51,004,744
1837	4,236,779	3,544,630	1887	48,837,609	53,006,194
1838	4,238,733	4,430,662	1888	*53,173,742	*55,723,782
1839	4,484,657	4,636,536			

*In these amounts the business of the last quarter of the fiscal year ending June 30, 1888, has been estimated.

THE POSTAL SERVICE IN GREAT BRITAIN.

A similar lesson as to the effect of reduced postal rates resulting in largely increased postal revenues is gleaned from an examination of the postal service of Great Britain.

The inland rate of letter-postage in the United Kingdom of Great Britain and Ireland was reduced by act of Parliament in 1839 from 4 pence to 1 penny per one-half ounce. This act went into effect on January 10, 1840. It may be interesting to observe the effect on the postal revenues of the United Kingdom from this very large reduction in the rates of letter-postage. The immediate effect of course was a very large increase in the number of letters annually sent; and while for the first few years there was a material falling off in the revenues, it was but a short time until the gross postal revenues of the Government were largely in excess of those in 1839 and preceding years, when the letter-postage was 4 pence. The number of letters delivered in the United Kingdom in 1839, the year preceding the establishment of penny-postage, was reported at 75,907,572, while the number delivered in 1840, the first year after the rate had been reduced to a penny, was 168,768,344, or an increase of 122½ per cent. The number of letters delivered in 1841, as shown by the statistics, the second year of the reduced postage, was 196,500,191, while in each succeeding year the letters rapidly increased. In 1845 the number was 271,410,789; in 1850, 347,399,197; in 1855, 456,216,171; in 1860, 564,000,000; in 1865, 648,000,000; in 1870, 863,000,000; in 1871, 915,000,000.

Another reduction of one-half on letter-postage was brought about in Great Britain by the act of Parliament of October 5, 1871, by which the standard weight of a single letter was increased from one-half to 1 ounce, the postage remaining the same, 1 penny. The effect of the reduced inland rate of postage on the revenues of the British post-office department, first, by the act of 1839, providing for a penny-postage, and, secondly, by the act of October 5, 1871, increasing the weight of a single letter from one-half to 1 ounce, may be seen from the following table, showing the gross revenues, in pounds, of the British post-office each year, commencing with the year 1838 and ending with the year 1887:

Year.	Gross revenue.	Year.	Gross revenue.
1838	£2,346,278	1875	£5,670,000
1849	2,390,763	1876	5,950,000
1840	1,359,466	1877	6,000,000
1841-1845*	1,658,214	1878	6,150,000
1846-1850*	2,143,717	1879	6,240,000
1851-1855*	2,569,836	1880	6,350,000
1856-1860*	3,135,587	1881	6,700,000
1861-1865*	3,891,568	1882	7,000,000
1866-1870*	4,618,146	1883	7,300,000
1871	4,900,454	1884	7,730,000
1872	4,680,000	1885	7,905,000
1873	4,820,000	1886	8,150,000
1874	5,792,000	1887	8,450,000

*Average for five years.

POSTAL RATES ON LETTERS IN SEVERAL EUROPEAN COUNTRIES.

The following tables will show the present domestic rates of postage for letters in Belgium, France, Germany, Greece, Great Britain, Italy, Netherlands, Portugal, Spain, Sweden, and Switzerland, all of which may be considered with interest and profit in connection with the consideration of this subject:

Domestic rates of postage for letters.

1. BELGIUM.

For a letter not above 15 grams (½ ounce) 10 centimes (2 cents).
For every additional 15 grams, 10 centimes (2 cents).

2. FRANCE.

For a letter not above 15 grams, 15 centimes (3 cents).
For a letter above 15, but not above 30 grams, 30 centimes (6 cents).
For a letter above 30, but not above 45 grams, 45 centimes (9 cents).
For a letter above 45, but not above 60 grams, 60 centimes (12 cents).
For a letter above 60, and not above 75 grams, 75 centimes (15 cents), etc., 15 centimes (3 cents) for every additional 15 grams.

3. GERMANY.

For a letter not above 15 grams, 10 pfennig (2½ cents).
For a letter above 15, and not above 250 grams (8¾ ounces), 20 pfennig (4 cents).
Unpaid letters, 20 pfennig (4 cents) for letters up to 15 grams, and 30 pfennig (6 cents) for all letters above that weight and below 250 grams.

4. GREECE.

For a letter not above 15 grams, 20 lepta (4 cents).
For a letter above 15, and not above 30 grams 40 lepta, (8 cents).
For a letter above 30, and not above 60 grams, 60 lepta (12 cents).
For a letter above 60, and not above 100 grams, 80 lepta (16 cents).
For every additional 100 grams, 80 lepta (16 cents).

5. GREAT BRITAIN.

For a letter not above 1 ounce, 1*d.* (2 cents).
For a letter above 1 ounce, but not above 2 ounces, 1½*d.* (3 cents).
For a letter above 2 ounces, but not above 4 ounces, 2*d.* (4 cents).
For a letter above 4 ounces, but not above 6 ounces, 2½*d.* (5 cents).
For a letter above 6 ounces, but not above 8 ounces, 3*d.* (6 cents).
For a letter above 8 ounces, but not above 10 ounces, 3½*d.* (7 cents).
For a letter above 10 ounces, but not above 12 ounces, 4*d.* (8 cents).
A letter above the weight of 12 ounces is liable to a postage of 1*d.* (2 cents) for every ounce, beginning with the first ounce. Thus a letter weighing between 14 and 15 ounces must be prepaid 1*s.* 3*d.* (30 cents).

6. ITALY.

For a letter not above 15 grams, prepaid, 20 centesimi (4 cents); unpaid, 30 centesimi (6 cents).
For a letter above 15 and not above 30 grams, prepaid, 40 centesimi (8 cents); unpaid, 60 centesimi (12 cents).
For a letter above 30 and not above 45 grams, prepaid, 60 centesimi (12 cents); unpaid, 90 centesimi (18 cents).
For a letter above 45 and not above 60 grams, prepaid, 80 centesimi (16 cents); unpaid, 1.20 liras (24 cents).
For a letter above 60 and not above 75 grams, prepaid, 1 liras (20 cents); unpaid, 1.50 liras (30 cents).
For a letter above 75 and not above 90 grams, prepaid, 1.20 liras (24 cents); unpaid, 1.80 liras (36 cents).

7. NETHERLANDS.

For a letter not above 15 grams, 5 cents, Dutch (2 cents).
For a letter above 15 and not above 50 grams (1¾ ounces), 10 cents, Dutch (4 cents).
For a letter above 50 and not above 100 grams (3½ ounces), 15 cents, Dutch (6 cents).
For a letter above 100 and not above 150 grams (5 ounces), 20 cents, Dutch (8 cents).
For a letter above 150 and not above 200 grams (7 ounces), 25 cents, Dutch (10 cents).
For a letter above 200 and not above 300 grams (10½ ounces), 30 cents, Dutch (12 cents).
For a letter above 300 and not above 400 grams (14 ounces), 35 cents, Dutch (14 cents).
For a letter above 400 and not above 500 grams (17½ ounces), 40 cents, Dutch (16 cents).
For a letter above 500 and not above 750 grams (26½ ounces), 45 cents, Dutch (18 cents).
For a letter above 750 and not above 1,000 grams (35 ounces), 50 cents, Dutch (20 cents).

8. PORTUGAL.

For every 15 grams, or fraction of 15 grams, 25 reis (2.5 cents).

9. SPAIN.

For a letter not above 15 grams, 25 centimos (5 cents).
For a letter above 15 and not above 30 grams, 35 centimos (7 cents).
For a letter above 30 and not above 45 grams, 45 centimos (9 cents).
And 10 centimos (2 cents) for every additional 15 grams.

10. SWEDEN.

For a letter not above 15 grams, 12 ore (2.2 cents).
For a letter above 15 and not above 125 grams, 24 ore (4.4 cents).
For a letter above 125 and not above 250 grams, 36 ore (6.6 cents).

11. SWITZERLAND.

For a letter not above 15 grams, 10 centimes (2 cents), 20 centimes (4 cents).
For a letter above 15 and not above 250 grams, 20 centimes (4 cents), 40 centimes (8 cents).

THE GREAT DISPROPORTION BETWEEN LETTER RATES AND RATES ON SECOND AND THIRD CLASS MATTER.

While perhaps some forcible reasons may be advanced in favor of the existing disproportion in postage rates as between letter-senders and the publishers of newspapers and periodicals, it is a somewhat startling fact, perhaps not generally known, that while the latter furnish about one-third of the aggregate weight and bulk of the mail matter transmitted through the United States mails, only about one-fortieth, as we learn from the recent report of the late Postmaster-General, of the postal revenues, arises from this source. So that it will be observed that while the first, third, and fourth class mail matter, mainly letters, constitute but two-thirds of the weight and bulk of our entire mails, these classes of mail matter furnish about thirty-nine fortieths of the postal revenues.

While the great advantages to the people arising from the cheap and rapid dissemination of intelligence through newspapers and periodicals can not well be overestimated, with the startling disproportion in the postal revenues made respectively on these different classes of mailable matter, letter postage ought in reason and justice to be reduced. In fact, the first, third, and fourth class mail matter is taxed in postal rates not only a sum far in excess of the cost of the transmission of such matter, but a sum in excess sufficient to meet and more than meet the immense loss that annually necessarily occurs to the Department in the carriage of newspapers and periodicals. In other words, the letter-senders of this nation not only pay, by way of postage on letters sent, the full cost of transmission and handling of letters thus sent, but in addition contribute a large bonus to the publishers of newspapers and periodicals to enable them to send their mail matter through the mails of the country.

It is, however, proper to be stated in this connection that it has been the public policy in this country, and especially has it been the policy of the Republican party, to keep the postal rates on newspapers and periodicals at the lowest possible minimum; and this for the reason, the validity and force of which will be recognized by all, that these are the great vehicles of the dissemination of intelligence among all classes and conditions of people. That such a policy should be continued in the interest of public intelligence, in the universality of current news, public thought, and literature must be conceded by all.

While, therefore, not favoring any increase in the postage on newspapers and periodicals, it would seem reasonably plain that the present wide disproportion in existing rates as between these classes of mail matter should be materially lessened by a reduction of at least *one-half* in the present rates of *letter-postage*, as proposed by the pending bill.

The Republican party in its recent national convention did not fail to give consideration to this important subject. The propriety of reducing postage rates on letter-mail was recognized, and the party was pledged to action in that direction.

The following is one of the planks in the platform of the Republican

party, adopted at Chicago at the recent national convention, and it correctly voices the present prevailing sentiment of the great majority of the people throughout the Republic:

We demand the reduction of letter-postage to 1 cent per ounce.

Inasmuch as the national Democratic platform is silent on this important subject, it is fair to presume the Democratic party, or at least its recognized leaders, who hold its conventions, prepare and adopt its platform, and nominate the Presidential candidate of the party, are opposed to any reduction in the rates of letter-postage. The late Postmaster-General and present Secretary of the Interior, Mr. Vilas, in his late annual message, recorded his opposition to any reduction.

As an humble member, therefore, of the Senate Committee on Post-Offices and Post-Roads, following out my own convictions on this subject, and in accordance, moreover, with what I believe to be the largely predominating public sentiment on this question, and in accordance, furthermore, with what I believe to be equal, exact justice as between all interested in the transmission of mailable matter throughout the United States, and in consonance with the position assumed by the Republican party in national convention assembled, I have introduced this bill. It provides that from and after March 4, 1889, the rates of letter-postage in the United States shall be 1 cent on each letter weighing not to exceed 1 ounce and 1 cent additional for each additional ounce or fraction thereof—this to apply to all letters transmitted from any post-office in any State or Territory of the United States or the District of Columbia to any other post-office, however near or remote, in that or any other State or Territory of the United States or in such District.

The bill further provides that a similar rate of 1 cent only shall be exacted as postage on each drop letter not exceeding 1 ounce in weight, and an additional cent for each additional ounce or fraction thereof, at any post-office in the United States.

In conclusion, it may perhaps with propriety be said that in the event of the reduction of letter-postage to a 1-cent rate, there is no very good reason why the unit of weight should not also be increased to two ounces; for as the average weight of letters is much less than even one ounce—the present standard—an increase in the unit would not add materially to the weight of the letter mails. Should this be done, fourth-class matter, or merchandise, should then be put on an equality with third-class matter, the rate of postage on which is now 1 cent for two ounces.

With these changes all the present absurd distinctions between first, third, and fourth-class matter would be wiped out. An uniform rate of 1 cent for every 2 ounces of weight would exist on all mail matter except newspapers and periodicals sent to subscribers. The annoyances that so often now result from the detention of matter for insufficient postage could be made to disappear; the temptation to petty fraud by the concealment of written matter in matter of a lower grade would vanish, and absolute privacy could be given to every parcel of matter mailed, for there would no longer be any reason why it should not all be sealed.

For valuable data in connection with the statistics employed by me I must express my grateful acknowledgments to Mr. Madison Davis, the present efficient chief clerk in the office of the Third Assistant Postmaster-General.

Before concluding I also desire to attract attention, by inserting the same in my remarks, to the very interesting and instructive paper upon the subject of letter postage, which I hold in my hand, prepared in 1883 by Hon. A. D. Hazen, then and for many years the very able and efficient Third Assistant Postmaster-General.

It was upon the facts and reasonings mainly of General Hazen contained in this document that the recommendation of President Arthur for a reduction of letter postage from a 3 to a 2 cent rate was based, and which finally led to the act of Congress of March 3, 1883, reducing the letter rate from 3 to 2 cents on each half ounce.

The bill under consideration is a measure destitute of any element of sectionalism. It is free from anything in the nature of partisanship. It is pregnant with material benefit to all classes, races, and conditions; to those of every business, profession, or occupation in life; to the old and young, men and women, rich and poor, native-born and adopted citizen, and to the alien resident or traveler within our borders as well. Its advantages, blessings, and benefits are unrestricted and universal.

APPENDIX.

[Paper submitted to the Postmaster-General by the Third Assistant Postmaster-General for his consideration, November 18, 1882.]

TWO-CENT POSTAGE FOR DOMESTIC LETTERS.

The balance-sheet of the Department for the last fiscal year showed a handsome surplus of receipts over expenditures, and this has occurred but once since 1851, when the letter-rate of postage was reduced to 3 cents. The exception was in the year 1865, when there was a slight profit, owing to the suspension of mail service in the Southern States. During the year ended June 30, 1851, the receipts amounted to $6,410,604.33, and the expenditures to $6,278,401.68. In the year 1852 the receipts were $5,184,526.84 and the expenditures $7,103,459.04, leaving a deficiency of $1,923,932.20, or 27 per cent. to be supplied from the general Treasury.

This deficiency steadily grew, principally by reason of largely increased expenditures, until 1860, nearly one-half of the expenditures for which year were paid out of the Treasury. During the four years of the war, from 1861 to 1865, the receipts fell only 4.7 per cent. short of the expenditures. In 1865 alone, as before indicated, there was a small surplus of receipts. The restoration of service in the Southern States again increased the burden on the Treasury, so that in 1868 28.3 per cent. of the expenditures were supplied from that source. From this point the tendency was generally towards lower deficiencies, but still in 1875 the Treasury contributed 20.2 per cent. of the expenditures. In 1879 the deficiency was 10.1 per cent., and for 1881 the receipts fell 7 per cent. short of the expenditures. This deficiency was not only wiped out during the last year but a surplus of 3.6 per cent. of the receipts will remain after extinguishing all the liabilities for the year. * * *

While the idea that the postal service should be self-supporting has ever been a favorite one with the American people, no claim has ever been seriously entertained that it should be a source of revenue to the General Government. The utmost that has been expected was that its earnings should be sufficient to defray its expenditures. It would scarcely be good policy to permit the earnings of the Department to exceed its outlays in any considerable amount. A large credit balance would tend to encourage lavishness in expenditure and to promote selfish schemes in the name of the public interests. Nothing induces economy so much as a difficulty in making both ends meet. A small mortgage on the homestead is the best incentive to frugality in the domestic habits of the household.

The Department is now on a surely paying business, and as the receipts are increasing at a much greater rate than the expenditures the general Treasury will at an early day, unless there should be a change in the present condition, be a large gainer from the profits of the postal service. If, however, the theory be correct that the earnings should not be permitted to exceed the outlays of the service, the question is squarely presented as to how the balance shall be maintained. If the present profits could be used advantageously to extend facilities and to afford conveniences to the public not now enjoyed, there can be scarcely a doubt of the popular willingness to have them applied in this direction.

Popular as has been the idea of a self-sustaining service, public opinion has ever sanctioned the granting of needful sums from the Treasury rather than the usefulness of the service should be impaired by a lack of means from the postal revenues. But the expenditures for the coming year have been estimated upon the full measure of the public requirements, as well as the same can now be anticipated, and yet they fall considerably short of the estimated revenues. The result promises to be a large increase on the present profits. The time would seem to be auspicious therefore for a reduction in the rates of postage. As to where the reduction should begin is worthy of serious consideration.

For a long series of years past domestic letters have received the least favor in the postal legislation of the country. The present 3-cent rate was fixed in 1851, though letter-writers have been offered a cheaper, if not altogether a satisfactory substitute, by the introduction of the postal-card. On letters addressed to foreign countries the present uniform rate is 5 cents to the countries within the Postal Union, while the average rate to the same countries in 1851 was several times that amount. On newspapers and periodicals to regular subscribers (second-class matter) the present uniform rate of 2 cents per pound is less than one-half of the average of the complex rates existing in 1851.

The reductions on transient newspapers, circulars, and other printed matter have been equally great since that year, being now 1 cent for each 2 ounces. Parcels of merchandise, not exceeding 4 pounds in weight, first admitted into the mails in 1850, are carried at the rate of 1 cent for each ounce. Moreover, many articles now carried at the cheap rates for third and fourth class matter in 1851 were either subject to letter rates of postage or else were excluded from the mails.

Domestic letters transmitted from one post-office to another now yield a minimum revenue of 96 cents per pound (assuming that each letter is up to the full standard of a half ounce in weight); second-class matter 2 cents per pound; third-class matter, 8 cents per pound, and fourth-class matter, 16 cents per pound. Nearly all the official mail matter of the several Executive Departments of the Government is carried in "penalty" envelopes, yielding no revenue to the Post-Office Department. These are the several classes of matter admitted into the mails, and these the charges upon which the Department realizes its revenues. The principal item of cost is for transportation, and the same rates are paid alike for all classes of matter. The cost of handling one class does not differ materially from the cost of handling another class by the employés in post-offices or on the lines of transportation.

It must be obvious, therefore, that the burden of maintaining the service falls most unequally upon letters. Upon what principle of justice this should be so is not easy of comprehension. Following the example of the oldest and best established governments of the world, the founders of the Constitution delegated to the Government a monopoly in the carriage of letters, and the wisdom of their action has gone unquestioned by the people to this day. Competition by private carriers is, however, allowed for all the other classes of matter permitted to go in the mails. So strictly has the monopoly been maintained that, though by act of Congress letters may be carried outside the mails they must be inclosed in Government stamped envelopes, the Government thus exacting its lawful revenue even when not performing any service in connection with the letters. Common fairness would appear to demand, since the Government maintain the exclusive right to do the work, that the charge should be somewhat proportioned to the cost of doing it and that the loss on merchandise, for example, should not be made a tax on correspondence. So, too, it would seem to be just as fair to tax the letter writers of the country, through the medium of their postages, for supplying commissary stores for the Army as for carrying the official mail matter of the War Department.

With reference to the effect of a reduction in the rates of postage the experience of the past may be found instructive. The changes in the rates were comparatively unimportant up to the 1st July, 1845. The rates on letters existing prior to that date were as follows:

For every letter composed of a single sheet of paper conveyed—	Cents.
Not exceeding 30 miles	6
Over 30 and not exceeding 80 miles	10
Over 80 and not exceeding 150 miles	12½
Over 150 and not exceeding 400 miles	18¾
Over 400 miles	25

And for every double letter, or letter composed of two pieces of paper, double these rates, and for every triple letter, or one composed of three pieces of paper, triple these rates; and for every packet composed of four or more pieces of paper, or one or more other articles, and weighing 1 ounce avoirdupois, quadruple these rates, and in that proportion for all greater weights.

The following were the rates fixed to take effect on the 1st July, 1845, namely:

"For every single letter in manuscript, or paper of any kind, by and upon which information shall be asked for or communicated in writing, or by marks or signs conveyed in the mail, for any distance under 300 miles, 5 cents, and for any distance over 300 miles, 10 cents. For a double letter, double these rates; and for a treble letter, treble these rates; and for a quadruple letter, quadruple these rates; and every letter or parcel not exceeding half an ounce in weight shall be deemed a single letter, and every additional weight of half an ounce, or less than half an ounce, shall be charged with an additional single postage."

Taking distance into account it will be observed that the reduction in the charges was very great. The next important reduction was under the act of March 3, 1851, which established the following rates for domestic letters:

"Every single letter, in writing, marks, or signs, by mail, not exceeding 3,000 miles, prepaid postage, 3 cents; not prepaid, 5 cents; for any greater distance, double these rates."

Although a temporary loss of revenue followed these two reductions it was speedily followed in both cases by a large increase.

For several years prior to 1845 the revenues were almost stationary in amount. Indeed, for the four years ended June 30, 1845, the total amount was $304,433.64 less than for the four years immediately preceding that period. For the year ended June 30, 1845, the revenue was $4,289,841.80, and for the next year, under the reduced rates, it was $3,487,199.35, showing a falling off of $802,642.45. For the year 1847 it increased to $3,880,309.23, and for the year 1848 to $4,555,211.10, or $265,369.30 more than for the year 1845, the entire recovery of the loss of revenue from the reduction in the rates having thus occurred within three years. The increase continued at a rapid pace, so that for the year ended June 30, 1851, the revenue was $6,410,604.33, being $2,120,762.53, or 49.4 per cent. more than for the last year (1845) under the old rates, and $2,923,404.98, or 83.8 per cent. more than for the first year (1846) of the new rates.

The immediate loss of revenue by the act of March 3, 1851, was still greater; but this, too, was speedily recovered. The falling off in the first year of the change was $1,226,077.49, the entire receipts for the year ended June 30, 1852, having been $5,184,526.84. For the year ended June 30, 1854, the revenue amounted to $6,255,586.22, or only $155,018.11 less than for the year 1851, the loss by the reduction of the rates having been nearly recovered in three years. For the year 1855 the revenue was $231,531.80 more than for 1851. The increase steadily continued, and for the year ended June 30, 1860, the revenue was swelled to $8,518,067.40, being $2,107,463.07, or 32.8 per cent., more than for the year 1851, and $3,333,540.56, or 64.2 per cent., more than for 1852.

Again: During the eight years from 1837 to 1845 there were no material changes in the rates of postage, and yet the revenue for 1845 was $655,826.41, or 13.2 per cent. less than for 1837, while the revenue for the year ended June 30, 1853, was $950,882.90, or 22.1 per cent. over that of 1845, notwithstanding that both of the great reductions in the rates of postage had occurred during the intermediate eight years.

For the year 1882 the receipts were more than eight times as much as for 1852, and the increase alone for 1882 over 1881 was only $93,514.66 short of the entire receipts for the year ended June 30, 1852, the first year of the 3-cent rate.

Some idea of the immediate loss by a reduction from 3 cents to 2 cents in the rate of letter-postage may be obtained from the issue of the ordinary 3-cent adhesive stamps and stamped envelopes. It is true that many letters calling for more than one rate of postage bear the higher denominations of stamps, but it is also true that many 3-cent stamps are used for parcels of merchandise and other matter not belonging to the first class. The amount of 3-cent stamps used in this way will probably exceed that of the larger stamps used on letters, so that a diminution of 33⅓ per cent. in the value of the 3-cent stamps would represent the maximum loss on an equal volume of business. The number of the ordinary 3-cent stamps and stamped envelopes issued during the fiscal year ended June 30, 1882, was 849,159,950. An increase of 10 per cent. on these would give 934,075,945 as the issue for the current year. This latter number increased by 10 per cent. would give 1,027,483,539 for the next fiscal year. One cent taken from the value of each of these would amount to $10,274,835.39.

This would be the maximum loss for the first year if a reduction in the rate should be made to take effect on the 1st of July next. But there are good reasons for believing that the actual loss would be much less than that amount. In the first place, the issues of stamps were very considerably in excess of the actual sales during the year 1882. This was occasioned in part by the increased number and importance of the post-offices, requiring a heavier stock to be kept on hand, but more largely by the fact that towards the close of 1881 the requisitions from postmasters were greatly curtailed because of insufficient appropriations for the manufacture of stamps and envelopes. The depletion of stock in post-offices in 1881 was accordingly left to be filled up in 1882, making the issues for the latter year unduly excessive. Thus the sales for the year were $39,703,357, while the issues amounted to $40,978,053.42. The 3-cent stamps issued in 1882 must therefore be regarded as an extravagant basis on which to found the present calculation.

The stimulus of a lower rate would be likely to lead at once to a large increase in the number of letters mailed, and it is probable that a cheaper letter rate would tend in a measure to dispense with the use of postal-cards for written correspondence. In view also of the fact that sealed communications invite closer attention by the recipients than do open ones it is not improbable that to some extent circulars would be inclosed under seal at a 2-cent rate.

Taking these special reasons into account the loss of revenue for the first year may be safely put at $3,000,000, leaving the revenue for the year at $42,670,456.27 instead of $50,670,456.27, as already estimated upon the basis of existing rates. The estimate of $42,670,456.27 for 1884 on a 2-cent rate is $3,393,594.89, or 7.3 per cent. less than the estimated revenue for 1883, and it is $794,046.12 more than the actual revenue for 1882.

The estimated expenditures for the coming year aggregate $46,741,111.25, but the actual expenditures will fall considerably short of this sum, because the requirements at best can only be approximated, and common prudence demands that the appropriations recommended should be sufficiently large to prevent possible deficiencies in any of the thirty-eight distinct items covered by the estimates. If these margins should amount to $1,000,000, the actual expenditures would be left at $45,741,111.25, or $3,070,654.98 more than the estimated receipts on the basis of a 2-cent domestic letter rate. The deficiency required from the Treasury for the first year would therefore be about $3,000,000, or less than 7 per cent. of the expenditures.

This deficiency would be fully offset, and the Department placed on a paying basis at once by a fair allowance for the official mail matter of the Government, and by increasing the charge on merchandise to a proper compensation for carrying it. If the reduction should be made to take effect on the 1st January, 1884, there would be no deficiency for the fiscal year ended June 30, 1884, as the profits for the first six months of the year would offset the loss for the last six months.

The estimated deficiency for the year ending June 30, 1884, based on a reduction from the 1st July, 1883, is not a large one, being relatively a little smaller than the deficiency for the year 1881.

The deficiency for the first year, after the reduction of 1845, was 14.4 per cent., and for the first year after the reduction of 1851 it was 27 per cent. The reduction of 1845 was made in the face of the fact that there was a deficiency of $30,890.19, or seven-tenths of 1 per cent., in the revenue for the last year of the old rates. For the last year before the reduction of 1851 the receipts were only $132,202.65, or a little more than 2 per cent., more than the expenditures. The surplus of $1,508,224.94, or 3.6 per cent., shown for 1882, will, without doubt, be fully doubled during the present year, and the proposed reduction in the rate may therefore be made in the light of existing profits of no mean dimensions.

The reduction in the letter rate from 3 to 2 cents would not be proportionately as great as either of the reductions of 1845 or 1851. True, by the reduction of 1845 letters carried less than 30 miles were reduced only from 6 cents to 5 cents; but the 5-cent rate was also made to carry a letter 300 miles, for which the charge was previously 18¾ cents, and the maximum charge was reduced from 25 cents to 10 cents. The act of 1851 reduced the minimum charge from 5 cents to 3 cents, nearly one-half, and enlarged the distance from 300 to 3,000 miles.

Not only is the proposed reduction in the rate much less than the reductions of 1845 and 1851, but a reduction of the letter-rate now would not affect as large a proportion of the revenue as the reductions did then. This is because in 1851 and prior thereto the functions of the mail service were confined to the carriage of letters and printed matter, the latter not even including bound books. Many articles then charged at letter-rates, or not admitted into the mails at all, are now carried as third or fourth class matter, and new sources of revenue have been added by the introduction of the registry and money-order system. Hence letters contribute a much less proportion of the revenue than they did in 1851. Besides, the present recommendation does not contemplate a change in the rates on printed matter, while considerable reductions on this class of matter were effected by the acts of 1845 and 1851, the free circulation of newspapers within the county of publication having been first admitted in 1845.

Unless the experience of past reductions in this and other countries should be at fault in this instance, the reduction now proposed in the letter-rate will be speedily followed by a very large augmentation of business, and it will at no distant day prove to have been an economic measure of the highest importance to the postal service as well as to the public. Although a comparatively small deficit will be encountered at the start, I am fully persuaded that unless there should be unexpected reverses in the prosperity of the country the Department will again be found upon a paying basis within three years from the time of the reduction, even with the burdens imposed by merchandise and the free mail matter of the Government. To prevent too great a loss at once it would perhaps be wise to confine the present reduction to the 3-cent domestic letter-rate; but as soon as the recovery from this reduction shall have taken place the rate on drop-letters will next be entitled to a reduction.

If the proposed reduction should be made at the forthcoming session of Congress, it would be of advantage to the Department not to have it go into operation before the 1st of January, 1884. Not only would this prevent a deficiency during the fiscal year ending June 30 of that year, but it affords sufficient time in which to reduce to a minimum the stock of 3-cent stamps and stamped envelopes in the hands of postmasters. Under the operations of a sudden change a large quantity of these would have to be returned to the Department for destruction. The labor of handling the stock and of adjusting the accounts with postmasters would be no inconsiderable one, to say nothing of the loss in the cost of manufacturing the articles.

I move the reference of the bill to the Committee on Post-Offices and Post-Roads.

The motion was agreed to.

Mr. SAWYER. I move that Order of Business 161, being a resolution directing the Committee on Post-Offices and Post-Roads to inquire into the advisability of reducing the rate of postage on first-class mail matter, be recommitted to the Committee on Post-Offices and Post-Roads.

The motion was agreed to.

MARGARET KENNEDY.

Mr. SPOONER. I present the report of the committee of conference on the bill (S. 307) for the relief of Margaret Kennedy.

The PRESIDENT *pro tempore*. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 307) for the relief of Margaret Kennedy, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

WM. M. STEWART,
JOHN C. SPOONER,
JAMES K. JONES,
Managers on the part of the Senate.

W. J. STONE,
FRANK LAWLER,
Managers on the part of the House.

The PRESIDENT *pro tempore*. The report will be filed. It requires no action on the part of the Senate.

WITHDRAWAL OF PAPERS.

On motion of Mr. WILSON, of Maryland, it was

Ordered, That the heirs and legal representatives of Capt. Lambert Wickes, United States Navy, have leave to withdraw from the files of the Senate all papers filed by them connected with the bill for their relief, on account of pay and prize-money due said Wickes, there having been no adverse report upon said bill.

COOSA RIVER BRIDGE AT GADSDEN, ALA.

Mr. VEST. I move to reconsider the vote by which the Senate yesterday passed the bill (H. R. 11338) to authorize the construction of a bridge across the Coosa River at Gadsden, in the State of Alabama, in order that a mistake may be corrected.

The PRESIDENT *pro tempore*. If there be no objection, the votes by which the bill was passed and ordered to a third reading will be reconsidered.

Mr. VEST. I move to strike out, in line 16 of section 4, the words "said bridge shall not be built."

The PRESIDENT *pro tempore*. The amendment will be stated.

The SECRETARY. In section 4, line 16, after the word "requirements," it is proposed to strike out "said bridge shall not be built;" so as to read:

If the Secretary of War, upon an examination of the papers to him submitted, shall require any change in the location or plans of said bridge, or its entire removal, the company shall, at its own expense, comply with such requirements; and if any change be made in the plan of said bridge such change shall be subject to the approval of the Secretary of War.

The amendment was agreed to.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. VEST. I move that the Senate insist on its amendments and ask for a conference with the House of Representatives.

The motion was agreed to.

By unanimous consent, the President *pro tempore* was authorized to appoint the conferees on the part of the Senate; and Mr. VEST, Mr. SAWYER, and Mr. CULLOM were appointed.

LIGHT AT CEDAR RIVER POINT.

Mr. SAWYER. I move that the bill (S. 3229) to establish a light at or near Cedar River Point, at the mouth of Cedar River, Green Bay, Michigan, be recommitted to the Committee on Commerce. The appropriation in the bill has gone into the sundry civil bill, so that it is not necessary to pass it.

The motion was agreed to.

CONDITION OF THE CIVIL SERVICE.

Mr. HALE submitted the following resolution; which was referred to the Committee on Printing:

Resolved by the Senate, That there be printed 10,000 copies of the report of the Select Committee to Investigate the Operations of the Civil Service, and 1,000 copies of the report and testimony, one-half for the use of the committee and one-half for the Senate.

THE REVENUE LAWS.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 9051.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. CULLOM. Mr. President, the question before the Senate and also before the country is, whether the American system of protection to American labor and our American industries shall be continued or whether the Government shall adopt a policy of free trade, or, what is the same thing in effect, a tariff for revenue only.

I desire to say in the outset that the remarks I shall make will not be confined to a discussion of the items either of the House bill at length or of the Senate Finance Committee's bill, for the reason that I have had but very little time for the consideration of the latter, and for the further reason, I think proper to state, that in my judgment it is utterly impracticable for the Congress of the United States to consider those bills item by item with a view of securing the adoption of either at the present session. Therefore my remarks will be somewhat general, as I have already indicated.

There are three ways by which the necessary revenues for the support of the Government may be raised. By direct taxation, by internal or excise taxes, or by customs duties, or by all three if necessary. Before the late civil war the nation had no internal-tax system. It relied entirely on import duties, except as it received money from the sales of public lands and other small miscellaneous sources. The war made it necessary to resort to every means known to the Constitution for raising revenue. Vast sums of money were raised for the prosecution of the war and the maintenance of the Union. When the struggle for national life ended, the financial emergency soon began to pass away, and in the period which has elapsed since the war the Government has paid much the larger part of the debt thereby incurred, taxes both internal and external have been greatly reduced, and to-day we as a nation are in the extraordinary situation of having a surplus in the Treasury. I will say here by way of remark that it seems to be tolerably difficult to find out just how much that is, and there is some question whether there is any; but it is stated that we have a surplus in the Treasury, no more debt due, and the executive and legislative departments of the Government and the people of the country are also debating the question, what is the best mode of stopping the accumulation of the surplus? Not how to get money in, but how to keep it from coming in too fast. There is no need of temper or excitement in the discussion of this question; it is a question of political economy. It is a question about which good men differ. The thing for the American people to do is to reason together, and in the light of all the facts decide it. The people will decide it at the polls in November, whether we do here or not, and, as I believe, in favor of the Republican party and policy.

The Republican party has always believed in the doctrine of protection. The Democratic party does not believe in a protective tariff, though of late, since the issue has been made, that party has begun by its leaders—Mr. MILLS and others—to talk about the amount of protection their bantling, the so-called Mills bill, gives to the various industries.

The Republican party declares in favor of so framing any act for the collection of duties on imports as to give reasonable protection to our industries and the labor to carry them on, and that the revenue should mainly be collected from imports. The Democratic party does not believe in such doctrine, but insists that the true policy is to look alone to the collection of sufficient revenue, and by whatever tariff laws we have collect the duties from such imports as will produce the most revenue, having no regard to the principle of protection.

The Democracy deny that the protective policy is in the interest of American labor, American industry, or in harmony with the national Constitution.

The Republican party asserts that the tariff policy is in harmony with the Constitution, in harmony with the views of the fathers who made it, and with the views of the statesmen of the first sixty years of the nation's history, with rare exceptions, and that it has resulted in developing the nation's resources, adding immensely to its wealth and vastly benefiting the wage-workers of the country.

Mr. President, in my judgment the adoption of the Cleveland-Mills free-trade policy and the passage of the Mills bill, which is stated to be the President's views crystallized into the form of a statute, would for a time not reduce the surplus, but would put more money into the Treasury from import duties, but finally, by bankrupting the people so that they could not buy either imported or domestic goods, the surplus would disappear, and the nation would commence a system of borrowing money, the business in which the last Democratic administration was engaged before the late war—selling bonds at a discount to pay the current expenses.

Such a magnificent puzzle to other nations as the United States Government, in a quarter of a century after the greatest and most expensive civil war known to modern history, having a great surplus in its Treasury, and having difficulty in stopping its accumulation, would not be heard of again for some time; surely not under the administration of the Government in accord with British ideas on the tariff question. The Republican party discriminates in making a revenue statute for the collection of duties by placing a duty upon articles or property imported the like of which is produced in this country; the theory of a tariff for revenue adhered to by the Democracy is against this. We can not raise coffee or tea in this country, hence we allow coffee and tea to come to our ports and markets free. We can raise wheat and wool, hence we do not allow wheat and wool to be brought into this country without paying a duty.

The Democratic theory, if adhered to, requires that a tax should be collected on importations of coffee, tea, and every other article which we use and do not make or produce, and allow the articles or products the like of which we do produce to come in free, or with as small a duty as can be levied for revenue purposes. The Democratic party, as reflected in its ideas and purposes by the President's message and by the so-called Mills bill, approached as near to the theory of the party as in their judgment they dared and avoid defeat.

Mr. President, the Republican tariff policy is American. The Democratic policy (opposition to protection) is English. The Republican party insists on keeping alive American industries; the Democratic doctrine is that that subject is not to be considered in the consideration and enactment of customs laws. The Republican party seeks to secure good wages to American labor; the Democratic party, in pressing for a tariff for revenue only, insists that laborers will fare as well under its policy of revenue reform as under a protective system.

The Republican party believes in good wages, good living, good homes, good schools, and comfort to the toiling masses, and that a protective tariff will go far in securing such blessings, and points with pride to the facts as proof. How any man can believe in a policy of free trade in this country I confess I am unable to comprehend. The theory of free trade, free seas, buy where you can buy cheapest and sell where you can get the best price, is all very beautiful, but does not work in the practice of nations. The teaching that all the world's akin, and that we should regard the interest of the world outside of our own nation equally with the interests of our own, is pleasant, but nations do not practice it.

The time has not come yet when wars and rumors of wars are not heard, or when the lion and the lamb shall lie down together with the consent of the lamb, or that the world is making much progress toward a condition that will justify the expectation of the millennium very soon. As citizens we look first to our families, to the community in which we live, to our country and flag, last to the great world outside of our own land. We are not called upon to pass by home and country and the welfare of our own people and expend our sympathy and aid and comfort on strangers in other lands, when other nations with which we deal are seeking only the welfare of their own people at the expense of our own.

But if any provide not for his own, and especially for those of his own house, he has denied the faith, and is worse than an infidel.

May not this be borne in mind in enacting laws for our great national household?

Mr. President, let us see what the early history of the country has been on the tariff question. It has been often said that in the very first Congress after Washington became President a law was passed embodying the principles of a protective tariff. The act recited that it was necessary for the support of the Government, for the discharge of its debts, and for the encouragement of manufactures that duties be laid on goods and merchandise imported. "For the encouragement of manufactures" is the language of the first tariff act enacted by the fathers of the Republic and approved and enforced by Washington. It recognized the principles of protection, and the discussion of the subject then has been the foundation of everything that has been said pertinent to the question since; yet in the face of the fact that Washington and other men who aided in framing our great national Constitution enacted the first law incorporating the doctrine of protection, we are told by modern Democracy that a tariff for protection is unconstitutional and robbery.

The early Presidents successively recommended and advocated the doctrine of protection.

Mr. Madison in one of his messages called attention to the expediency of a revision of the tariff, giving reasons why home industry should be protected, declaring that the tariff had hitherto only been of

secondary importance and that in view of the development of the manufacturing and cotton-growing interest it had become a matter of primary consideration.

Mr. Monroe advocated the doctrine of protection, and under his administration the tariff act of 1824 was adopted, which was opposed by the representatives from the Southern States in Congress, but was championed by that great commoner Henry Clay, of Kentucky, whose name will live in history as the powerful advocate of American industry and American labor.

John Quincy Adams advocated a protective tariff, and during his administration the tariff act of 1828 was passed, which brought to the surface the deadly doctrine of secession, or nullification, which at last culminated in rebellion in 1860. Before 1828 Webster had not favored the protective system, but at that time came out for it, and gave as a reason that it had become the established policy of the nation, and he therefore supported it.

So, Mr. President, I might go on giving the views of the earlier statesmen favoring a protective tariff or the American policy.

The Whig platform of 1840, when William Henry Harrison was the candidate for that party and was elected, contained the following declaration:

A tariff for revenue to defray the necessary expenses of the Government and discriminating with special reference to the protection of the domestic labor of the country.

The Whig platform of 1852 declared—

That revenue sufficient for the expenses of the Government in time of peace ought to be derived mainly from a duty on imports and not from direct taxes, and on laying such duties sound policy requires a just discrimination, and when practicable, by specific duties, whereby suitable encouragement may be afforded American industry equally to all classes and to all portions of the country.

This was the doctrine of the statesmen irrespective of party in the nation's early history, especially of Washington, Madison, Monroe, John Quincy Adams, and Jackson among the Presidents, supported by the leading statesmen of their time; so it was the doctrine of Harrison, Taylor, Lincoln, Grant, Hayes, Garfield, and Arthur. In 1832–'33 there was a struggle over the tariff, and from that time the Democratic party, under the lead of the South, began to assert its free-trade ideas more freely, as occasion offered.

The Democratic national convention of 1856 announced that the time had come when the Democratic party should declare itself in favor "of free seas and progressive free trade throughout the world." The party carried the election. A Pennsylvania Democrat was elected; the South controlled him, and the country had free trade and free bankruptcy to its heart's content for the succeeding four years. Every man, woman, and child almost is familiar with the condition of the country when Buchanan surrendered and Lincoln took charge of the executive department of the Government. The nation was bankrupt, discredited, and disgraced, the people were poor, the mills and factories were closed, mechanics and laborers were idle, and the farmers had no market for their products—either grain, hogs, horses, or cattle—except at the merest nominal price.

The Republican party in 1860, in national convention, declared—

That while providing for revenue for the support of the General Government by duties on imports, sound policy requires such an adjustment of these imports as to encourage the development of the industrial interests of the whole country.

The policy of the Republican party to-day, by its platform and by its legislation, is to encourage the development of the industrial interests of the whole country. The platform of the Republican party in 1872 declared—

That the law for raising revenue by duties on importations should be so adjusted in its details as to aid in securing remunerative wages to labor and promote the industries, prosperity, and growth of the whole country.

The platform of 1876 of the Republican party provided—

That the revenue necessary for the current expenditures and the obligations of the public debt must be largely derived from duties upon importations, which, so far as possible, should be adjusted to promote the interests of American labor and advance the prosperity of the whole country.

The tariff provisions of the platforms of 1872 and 1876 sounded the right note on the protection question; they announced the doctrine of the party, and it is the doctrine of the party now, and, in my judgment, is believed in by a vast majority of the American people.

The Democratic party in 1876, in its convention, after denouncing the then existing tariff and reciting the alleged evils which resulted from it to the people, closed its assault in the following language:

We demand that all custom-house taxation shall be only for revenue.

Democracy began to assert itself more strongly in favor of free trade, or as near it as is consistent with the collection of import duties at all.

In 1880 the Republican national convention—

Affirmed the belief avowed in 1876, that the duties levied for the purpose of revenue should so discriminate as to favor American labor.

Mr. President, the prominent idea of late years in the Republican party has been the protection of American labor, it being well understood that without protection American wages would inevitably be reduced.

The Democratic convention of 1880 resolved in favor of "a tariff for revenue only."

The Republican party of 1884 declared that—

It is the first duty of a good government to protect the rights and promote the interest of its own people. The largest diversity of industry is the most productive of general prosperity and of the comfort and independence of the people. We therefore demand that the imposition of duties on foreign imports shall be made not "for revenue only," but that in raising the requisite revenues for the Government such duties shall be so levied as to afford security to our diversified industries and protection to the rights and wages of the laborer, to the end that active and intelligent labor as well as capital may have its just reward and the laboring man his full share in the national prosperity. Against the so-called economic system of the Democratic party, which would degrade our labor to the foreign standard, we enter our solemn protest.

This is a splendid declaration of Republican doctrine on the tariff question.

The Democratic platform of 1884 was cooked up to confuse and fool the people on the tariff question; it was a straddle, and so denounced then by Republicans and denounced since by Democrats, Henry Watterson and others. I will not stop to quote it. It was denunciatory of the existing tariff and greatly concerned about the laboring men, and, among other things, declared the internal tax a war tax; and in that they were right, because it had not been imposed before.

The Republican platform for this year upon the tariff question declares in favor of the American system of protection, protests against its destruction by the Democratic party in the interest of Europe, favors the reduction of the national revenue by repealing the taxes on tobacco, the tax on spirits for the arts and mechanical purposes, and by such a revision of the tariff laws as will tend to check imports of such articles as are produced by our people, the production of which gives employment to our labor, and release from import duties those articles (except luxuries) of foreign production the like of which can not be produced at home. Finally, if such a revision does not sufficiently reduce the revenue, repeal the internal taxes rather than surrender the protective system to the behests of whisky trusts. The above, Mr. President, is the substance of the tariff plank of the Republican platform of 1888, and is in harmony with the provisions and declarations of the previous platforms of the party.

The Democratic platform of this year, 1888, contains the astounding declaration that "all unnecessary taxation is unjust taxation," followed by the same declaration in different forms of expression, apparently supposing that somebody did not believe that unnecessary taxation is unjust taxation. Nobody ever disputed the proposition, and nobody desires unnecessary taxation. The platform indorses the platform of the party of 1884, which has been admitted to be a juggle on the tariff question; it indorsed the President's December message, which the British press lauded as a free-trade document; it indorsed the Mills bill, which was prepared in the supposed interest of the cotton States of the South, and which was at first declared to be a great reform measure looking only to the question of revenue, but which the leaders of the party now are laboring to show is a very good protection measure.

Mr. President, the Democratic party is a free-trade party if it is anything, and has been for fifty years. The people of the Southern States have regarded cotton as king, and have harbored the mistaken idea that their interest lay in the direction of free trade; they have believed that it was their interest to export their cotton to be manufactured in Europe and encourage its importation in manufactures to this country to supply our markets. A market for our products far away, instead of one at home, seems to be the Democratic idea. How much better for the people, how much more American and patriotic, and in the interest of the development of our own resources, and how much more in the interest of American labor, that our looms and mills and factories should be cared for, and how much more profitable to the planter who raises the cotton that it should be spun and woven at home, and placed upon the market in our own land as well as elsewhere. Mr. CARLISLE, in a speech in his district at Covington, recently made the announcement that it is declared in the Democratic platform that "unnecessary taxation is unjust taxation," and by that declaration he says his party "will stand or fall in this contest." He, too, seems to desire to make the people believe that the Republicans are for letting the surplus continue to accumulate. He knows better, for he is an intelligent man.

He says when Mr. Cleveland came into office, March 4, 1885—

He found upon the statute-book laws passed by Republican Congresses under which there was being annually collected from the people $100,000,000 in excess of the actual necessities of the Government. * * * Year after year some of us have struggled in Congress to secure a reduction of this enormous burden upon the people.

Whose fault is it that the reduction has not been made? The House of Representatives, whose duty it is under the Constitution to originate revenue bills, has been Democratic nearly all the time for sixteen years, that gentleman much of the time its presiding officer. There has been a large Democratic majority in that body part of the time, and a fair majority all the time, except two years of the sixteen. Why has not the reduction been made? Democracy is responsible and not the Republicans.

The venerable candidate for Vice-President on the Democratic ticket in his speech at Cheltenham, I believe, said:

The issue, then, is fairly made up between us. It is between high taxation on the one hand and reasonable taxation on the other. It is between taking

the money out of the people, out of their own control, out of their own pockets and burying it in the cellar of the Treasury Department, or it is between that and leaving the money where it belongs, in the pockets of the people, to be used by them as their wants require and as their intelligence and honesty direct.

I ask Mr. Thurman what his party has done to reduce taxation if taxes are too high.

It is known to this country that every effort has been made by the Republican party in the Senate in endeavoring to secure action on the part of the Administration in reducing the surplus, first in taking up bonds that it had a right to take up, and, secondly, to buy bonds which it had not the right to redeem, and yet it has stubbornly refused to do either to the extent that the law authorized it to do.

Why has not a bill to reduce taxation, to revise the tariff and the internal-tax laws, long years ago come to this Senate? That body having power to send to us revenue bills has never done it when the Democrats controlled it since the war until within the last three months. And yet we are to be held responsible for the accumulation of the surplus, whatever it may be, because they, having a majority in the House of Representatives, and having the power under the Constitution, and they alone, have failed to do their duty.

When the Republicans had the control of Congress in 1883, the tariff was revised and the taxes were reduced. We finally have a bill, and so far as this Senate is concerned, we will revise the tariff, will reduce the surplus, and will at the same time protect labor and the industries of the country.

I charge that the Democratic party is responsible for the unnecessary flow of money into the Treasury. That party has not desired to stop it, unless by the adoption of a policy which would reduce the laboring man's wages or close up the mills and factories of the country.

The Secretary of the Treasury said in his last annual report that the receipts for the year ending June 30, 1888, actual and estimated, were $383,000,000, and that the expenditures were $316,817,785.48, showing a surplus of $66,182,214.52. The bill reported to the Senate by the Finance Committee, of which my honorable friend here [Mr. ALLISON] was chairman of the subcommittee that made the bill, as a substitute for the so-called Mills bill, makes a reduction of more than that amount, and if the present Administration should be continued, which I trust and believe will not be done, the reduction would be too great, but if General Harrison, the gallant soldier and able and experienced statesman, the standard-bearer of the Republican party, shall be the choice of the country for its President, the popular branch of Congress will doubtless be Republican also, and then the expenses of the Government will be curtailed, economy will be again enforced, and the administration of affairs will cost the people about the amount of the last Republican administration.

Mr. President, I have given the substance of the provisions of the platforms of the two great parties on the tariff question to show that the Republican party has, in line with the fathers of the Republic, been steadily in favor of the protective policy, and that the Democratic party has for years—since the days of Jackson—been against it. The Republican party is solidly for the protective system to-day, and we appeal to the people to listen and beware of the danger which surely will follow the success of the policy urged upon the country by the President and his followers. The Democracy has, as I have said, practically been for free trade for years, but they have managed by their platforms and plans of campaign to avoid the issue by facing both ways as in 1884, when the orators of that party made protective speeches in one section and free-trade speeches in another.

The President forced his renomination by his December message, and at the same time made the issue for this campaign, which neither he nor his party can now shirk or throw off. The issue is made up and must be decided at the polls.

The December message was an announcement that the free-traders were ready for the contest; the Republican party at once accepted the challenge.

The solid South is practically solid for free trade. It is a solid fact that the solid South, with the aid of Northern Democrats with Southern principles, mean if they can to dictate the financial policy of the nation. Since the beginning of this Congress we have had abundant evidence, not only of a determination on the part of the South to dictate the financial policy of the country, but also upon all important questions. If it were in order for me to refer to the other branch of Congress I would say that that body is organized with a Southern man for Speaker and with chairmen of committees from the States south of Mason and Dixon's line, of Elections, Ways and Means, Judiciary, Commerce, Naval Affairs, Rivers and Harbors, Agriculture, Coinage, Weights and Measures, Post-Office and Post-Roads, Indian Affairs, Railroads and Canals, Mines and Mining, Improvement of the Mississippi River, Education, Claims, Labor, War Claims, Private Land Claims, Revision of the Laws, District of Columbia, and many others of perhaps less consequence.

Mr. President, I do not make this somewhat startling showing for the purpose of exciting sectional feeling or jealousy, but to show that in another body the representatives of that portion of the Union which struggled for four years to destroy it have control of the important legislation of the country. I have no unkind words to utter against any man, but I do not believe in Texas statesmanship. I believe that if the policy as expressed in the so-called Mills bill, and as expressed by the honorable Senators from that State on this floor, were to prevail it would result in ruin to the business of the country.

The senior Senator from Texas, on the 12th of September, in talking about the murders in Washington County, in his State, said that—

> If there is any one thing in this world the average Texan would go any number of miles out of his way to kick and kill and destroy it is a protective tariff.

As the Senator made that statement with an apparent feeling of satisfaction and pride, I am bound to assume that he would go any number of miles with his devoted constituents and join them in their effort to destroy a protective tariff. Then the junior Senator from Texas comes forward and defines the boundary between a tariff for revenue and a tariff for protection. He says:

> That as long as the increase of the tax secures an increase of revenue it is a revenue tariff, but when we reach the point in any commodity where the increase of the tax reduces the revenue by excluding imports we then have a tariff for protection.

And then the Senator proceeds to show that the protective policy is wrong. Mr. President, the Senator says that as long as an increase of tax secures an increase of revenue it is a revenue tariff. A revenue tariff is what our Democratic friends are in favor of, the effect of which is they are in favor of a tariff to secure to Great Britain and other countries the certainty of exporting to this country whatever they please to the fullest extent without regard to the effect such exportations may have on the industries or labor of America.

The position of the Democracy results in protection to foreign manufactures and foreign labor, and ruin and death to home labor and industry. So, Mr. President, the American people are being educated by the distinguished gentleman from Texas on the subject of political economy since they (the people) have had the misfortune of having a Democratic House of Representatives and the greater misfortune of having a gentleman for President whose training in statesmanship began after he was elected President, in the Southern school, the teachers mainly coming from Texas.

Mr. President, in the Northwest every year about this time the agricultural people, the farmers, are alarmed by the announcement that Texas cattle have been brought in from that State and the Texas fever has come with them, spreading among the native herds for miles around, resulting in great loss and injury to the agricultural interests of the section. The proposed tariff legislation, the author of which is said to be a gentleman from Texas, if allowed to be enacted would be worse than the Texas fever among cattle; it would be Texas fever in the business of the country and paralyze the business of the whole country, followed by poverty and distress.

Immediately after the President's message in December, the Ways and Means Committee of the House began its work of framing a tariff bill in accordance with it. After about seven months a bill revising the tariff and to reduce the surplus as alleged, passed; not the same bill reported, but with such modifications as it became necessary to make to secure the requisite votes of Northern Democrats to pass it. While it is urged now that the bill affords ample protection to American industry and labor, yet no Democrat has been heard to utter one sentence in favor of protection. When in the discussion of the Mills bill a Republican asked the question, "Has any friend of this bill (referring to the Mills bill) in this debate uttered one sentence in favor of the American tariff system which discriminates in favor of the home producer and laborer?" the answer came from a Democrat, "No; there was none and you will not hear any Democrat utter one." Neither have we. The Democratic party is opposed to the protective principle.

Mr. President, let us see how much truth there is in the declaration of the President that duties on imports raise the price to the consumers of all articles imported and subject to duty by precisely the sum paid for such duties. Let us take a few examples and see whether that is the operation of a tariff law. Theories are of no account, neither are statements even when made by Presidents when they are in opposition to facts. Take the familiar instance of steel rails. They were first manufactured in this country in 1868, at which time imported steel rails were sold at the sum of $158.50 per ton; they were manufactured in great quantities from that time in this country, and the price ran down with a duty of $28 per ton part of the time and finally reduced to $17, until in 1885 they sold at $28.50, only 50 cents above the duty when we began to make them, and in 1886 the manufacture was 1,763,667 tons and the importation was only 46,500 tons. Protection increases production and lessens the price. Where natural advantages exist for the production of the article protected the encouragement of home manufactures tends to stop importation, home competition begins, and the price decreases to the consumer.

Take the article of soda-ash, which is largely used in certain manufactures; it has not been long that it has been manufactured in this country. It was imported and sold to our people at $48 per ton; finally its manufacture began here, the price went down from $48 to $45, then to $36, and then to $30, falling $18 per ton less than when we used the imported article and did not manufacture it.

Take the article of nails, used by the people. Nails cost 25 cents

per pound—imported wrought nails. The tariff of 1824 imposed a duty of 5 cents a pound, which rate was retained until 1833. According to Democratic doctrine, nails ought to have sold at 30 cents a pound, but instead the price of nails went down to 8 and 9 cents a pound. The tariff duty was lowered to 1½ cents per pound in 1883, and the price is now from 2 to 3 cents per pound.

Axes are a useful article in this and all countries. Before the American people began to manufacture axes in this country the price of English axes was from $2 to $4 apiece. A tariff duty was imposed on English axes; soon axes, American and English, were selling at $1.25 to $1.50; the price ran down still lower, our American manufacturers began to export their axes, and at the World's Fair at Philadelphia in 1876 the English commissioners said, in their report to their government, that—

For years Sheffield supplied not only our own country but nearly all the world. * * * This monopoly remains with us no longer. * * * The American ax has for many years displaced the axes imported from Great Britain; they are now imported into this country (meaning England).

Such is the testimony of the English commissioners to our Centennial Exposition.

Take the article of files. Up to the time the Government passed into the control of the Republican party in 1861, files were nearly all imported and cost our people from $6 to $7 per dozen. Establishments for the manufacture of files were constructed in this country and put in operation. Congress imposed a duty on files; the price of files went down from $6 to $7 per dozen to $2 and $2.30 per dozen, and the importation of files practically ceased. So, Mr. President, I might go on and give almost numberless instances showing the absurdity of the position of the President and his followers. The effect of a protective tariff is the encouragement of home industry, the building of factories and mills and their operation. Competition follows, and reduced prices are assured.

Our Democratic friends seem to be greatly concerned about the duty on blankets and attempt to create the belief in the minds of the people that they are being robbed on account of the duty on imported blankets. Let us see how that is. Reports from responsible manufacturers in this country show that blankets that cost in 1860 $13 now cost $6.80. Blankets that cost $10, $8, $7.50, $5, $3.75, $3.50, $2.25, $2.50, and $2, now cost $5.85, $4.50, $4.35, $3.03, $2.58, $1.90, $1.31, $1.45, and $1.01.

Mr. DAWES. Each pair?

Mr. CULLOM. Each pair.

According to the grade or quality, very little over one-half in price now what it was when the Republican party came into power in 1861. The policy of the Republican party has given the people cheap blankets, and in doing it it has enforced a policy which has given good wages to tens of thousands of our own people—work at good wages by day and rest under cheap blankets by night.

Take another item. Take the article of binding-twine, in which our farmers are interested in connection with cutting grain, etc. The rate of duty on twine, as I understand, is in both bills alike, one being an ad valorem and the other a specific duty, but I understand that under the tariff laws as they are now binding-twine is sold at exactly the same price in this country that it is in the other countries of the world. I desire to ask the honorable Senator from Iowa, who knows more about this bill perhaps than almost anybody else here, to tell me whether I am right in stating that the duty is the same in both bills and whether the price is the same in this country as it is in others.

Mr. ALLISON. The duty is practically the same in both bills. The duty in the House bill is 15 per cent. ad valorem and in the Senate bill 7½ cents per pound.

Mr. VEST. Does the Senator say that it is the same?

Mr. ALLISON. I do. The price in the United States and in foreign countries is precisely the same now.

Mr. CULLOM. I so understood, but I desired to be made sure by the statement of the chairman of the subcommittee, who I knew was well advised.

Mr. ALLISON. There is no doubt about it.

Mr. CULLOM. Take another article. Take watches as another example of the operation of a protective tariff. It has not been a great many years since watches began to be manufactured in this country. As probably the country knows, we had a small duty on watches for quite a time, and an effort was made to manufacture them, but it failed, and finally the tariff was increased to such an extent that our manufacturers could run and we commenced the manufacture of watches.

The imports of watches from 1825 to 1858 amounted to $45,800,000. The tariff laws finally gave sufficient duty on imported watches to enable Americans to make watches and compete. We now have, I believe, fifty or sixty watch factories, or establishments engaged in the manufacture of watches proper or their cases, etc., employing many thousands of skilled workmen and other persons, men, women, boys, and girls, at good wages, and watches of American manufacture, good as are made anywhere, are so cheap that everybody has a watch, whereas thirty years ago a watch was a rare article in any country community. Take the article of borax. It is produced in California and Nevada. It used to sell at 32 cents. It now sells at 8, just one-fourth the amount, as a result of a duty upon it and competition in its production and sale. The Mills bill puts it on the free-list, and if the labor of producing it shall be interfered with after awhile we shall hear that the industry in this country is broken down, and the price of the article will then go up. Take chloroform. The duty on that article is 50 cents per pound. It is now selling at 40 cents. Home competition brought the price down and the tariff on the article is prohibitory. Take the article of salt, about which we hear so much. If you will listen to the appeals of Democrats for free salt, you will have difficulty in resisting the conclusion that the people are in distress for want of cheap salt. But let us see how the duty on salt of 12 cents per hundred pounds in barrels affects the price. I use here a statement compiled by Hon. JEHU BAKER from a memorial of the Saginaw Board of Trade of 1888:

Salt product of Michigan, 1860, 4,000 barrels; in 1887, 4,200,000; cost of salt along the Great Lakes, including a barrel worth 20 cents, in 1860, $2.25; in 1866, $1.80; in 1871, $1.46; in 1876, $1.05; in 1881, 95 cents; in 1886, 65 cents; in 1887, 58 cents.

Mr. FARWELL. Including the barrel.

Mr. CULLOM. Including the barrel, which costs 20 cents, literally about as cheap as dirt. Yet there is not a speaker in either branch of Congress on the other side or anywhere else who does not deal with the tax on salt as if it was just going to ruin the business of this country and starve the people for want of that prime necessity.

Mr. President, Sir Charles Tupper, the Canadian minister of finance, knew what he was doing when he congratulated the Canadian Parliament on the fact that if the Mills bill should become a law it would make free articles that Canada sends into the United States, on which last year the people of that country paid as customs to our Government $1,800,000. They know who pays the duty. Mr. Tupper knew that the $1,800,000 which they pay yearly comes out of their pockets and not the pockets of our people. The so-called Mills bill would help Canada a little as well as Great Britain a great deal.

The duties upon importations "raise the price to consumers of all articles imported and subject to duty by precisely the sum paid for such duties," says the President. Democrats all along the line echo the declaration. If they believe such statements and are anxious to put an end to such robbery, as they term it, why do they not take the duty off wheat and give to consumers cheap bread? The consumers are robbed, according to the modern apostles of free trade, for the benefit of the farmer.

There are only between seven and eight millions of farmers. They raise wheat to eat and sell, seldom buy it. There are over fifty millions of American people who buy bread and consume it. If the free-trade theory is sound, these fifty millions are taxed 20 cents on every bushel of wheat, 15 cents on every bushel of potatoes which they consume for the benefit of the seven or eight million farmers according to free-trade or revenue-reform theories. This is a most unjust and oppressive tax upon the masses, put upon them by "our vicious, inequitable, and illogical" tariff laws, simply for the enrichment of the farmer. And yet our Democratic friends do their best to make the agriculturist believe that the present tariff system fails to give any protection to the farmer. When the facts are found it is discovered that the farmer is protected as well as the manufacturer by the present law.

Why is it proposed by the Mills bill to protect wheat and not wool? If wool is to be placed on the free-list why not wheat? Everybody must eat whether well or poorly clothed; wheat can be purchased in India or in Canada for a less price than in the United States. Why not remove the duty and let wheat come in and force our farmers to take less price for their wheat? If cheap woolen clothing would be so great a blessing, why would not cheap bread be a greater one? Mr. President, the Democratic party dare not disturb the duty on wheat, and they know it; and while they do not do that they interfere with the tariff on wool for the purpose of making a discrimination, and only such a one as they think they can carry through when they know they would fail if they would undertake the other.

The Senator from Tennessee [Mr. BATE] yesterday used the expression "These advance taxes," as I caught it from his lips, "are felt at every meal." On that theory, why does he not take the tax off wheat while taking it off other things?

"The mills of the gods grind slowly," but Democracy would be ground to powder if that party should extend its doctrine so far. No, Mr. President, the doctrine of free trade or revenue reform will not do in this country.

The agriculturist is told that he of all men should stand for free trade, or oppose protection. The mechanic is promised cheap food and cheap clothing when free trade comes, and according to the declaration of the Senator from Missouri in his somewhat famous letter it will surely come if the Democratic party succeeds, for the Senator says:

The President has challenged the protected industries of the country to a fight of extermination. The fight is to the death.

I take it that our manufacturing industries are to be wiped out, to be exterminated, if the policy he states to have been enunciated by the President is to be carried out.

Mr. VEST. Mr. President——

The PRESIDING OFFICER (Mr. PALMER in the chair). Does the Senator from Illinois yield?

Mr. CULLOM. Yes, sir.

Mr. VEST. I had occasion once to make a statement in regard to this matter, and if the Senator from Illinois will indulge me I should like to make another, not that I think it is necessary, but because he has alluded to it again.

Mr. CULLOM. I do not hear the Senator.

Mr. VEST. I said that I had occasion once before to allude to this matter, and I expected that no such necessity, after what I stated then, would arise; but as the Senator has alluded to it again I want to make a statement now in justice to myself.

This was a private letter, as I stated then, written by me upon my desk here in the Senate during a debate. It is my custom, as that of other Senators, when my morning mail comes in to answer very frequently upon soft paper with a pencil the letters which I receive, either by full reply, as is sometimes the case, or by making memoranda which are afterwards type-written by my secretary. I wrote this reply to a friend, an intimate personal and political friend. I want the Secretary to read that reply exactly as it was sent; and its intent and meaning, I repeat to-day, absolutely and without any sort of qualification. If I had been under the impression or had the slightest suspicion that it would have been made public I should certainly have been more particular in framing the sentences and in the verbiage that I used; but to any fair man, to any fair-minded disputant, the letter shows my meaning plainly and unequivocally. I ask the Secretary to read it.

The PRESIDING OFFICER. The Secretary will read the letter.

The Secretary read as follows:

UNITED STATES SENATE, *Washington, D. C., June* 23, 1888.

MY DEAR CHARLEY: Yours of the 21st instant has been received.

I did not see the item in the Republican to which you allude, but would not have believed it if I had seen it. I know you too well to believe any such thing.

I sincerely hope that the club may be made permanent and that its membership may be largely increased. Whilst there is no possibility that Missouri will fail to give her electoral vote for Cleveland and Thurman, it is important, both for campaign purposes and as an educational instrumentality, that the organization should be continued.

We are entering upon the most fearful Presidential contest and the most important since that of 1800. Mr. Cleveland by his message, for which I sincerely honor him, has challenged the protected industries of the country to a fight of extermination.

The men who are accumulating immense fortunes under the present tariff laws are determined to defeat Cleveland if money and industry will accomplish it. It is the personal duty of every Democrat in this country to do everything in his power to sustain the President. Every agency which can possibly be used in this direction must be put actively to work.

It is useless for us to disguise the fact that the fight is to the death, and we would be idiots to ignore this fact.

Your friend,

G. G. VEST.

C. M. NAPTON, Esq.,
St. Louis, Mo.

Mr. VEST. I simply wish to state that any man who does not appreciate the difference between a letter written under the circumstances I wrote that to a political and personal friend who was assumed to understand my opinions and the position of the Democratic party, and a letter written to be submitted to the fierce criticism of political opponents and of a public canvass, will have no further explanation from me.

What I meant to say, and what that letter fairly construed does say, is that between the principles of absolute and unlimited protection, which I understand the Republican party to-day to advocate, and the position of the Democratic party, which is the raising of revenue for the support of the Government economically administered, and the proper adjustment of the revenue so to be raised with the taxes necessary to raise it, it is a fight to the death. I meant, and I repeat it, that we intend to wage a war of extermination upon the present system of taxation by which enormous fortunes are given to a few at the expense of the many.

Now, Mr. President, one single word, and I shall not interrupt the Senator further. One sentence in that letter without its context would seem to indicate that I put the President in the attitude of attacking all the industries of the country. It was carelessly written, but it was the system of unlimited protection which I meant and that alone. I have received from a friend——

Mr. TELLER (to Mr. CULLOM). He seems to favor a limited protection.

Mr. VEST. What does the Senator from Colorado say?

Mr. TELLER. I did not mean to interrupt the Senator.

Mr. CULLOM. I wish the Senator from Missouri would confine himself to the reading of the letter and to the explanation.

Mr. TELLER. Allow me to explain. I said according to the Senator's theory protection was right, provided it was a limited protection. I do not know that that is his theory.

Mr. VEST. I mean to say that every tariff, even if it be a revenue tariff, has incidental protection, and that protection and the tariff taxes ought to be justly distributed throughout the country.

If the Senator will permit me a further explanation, I shall not interrupt him further or allude to this matter again. A friend has sent me within the last few days the following garbled extract from this letter. I shall not use the language here which I would use outside of the Senate in regard to the man who has prepared this or the men who have put it upon the country. It would be absolutely indecent under parliamentary rules for me to denounce this infamy as it deserves:

A DEMOCRATIC SENATOR ON CLEVELAND AND FREE TRADE.

Many sincere men who do not desire to vote for free trade and against protection are deceived by the Democratic claim that Mr. Cleveland is not opposed to the industrial interests of the country. Read the following and judge for yourselves:

Now comes what purports to be my letter.

Mr. Cleveland by his message, for which I sincerely honor him, has challenged the protected industries of the country to a war of extermination. The fight is to the death.

GEORGE G. VEST.

In other words, they take two entirely distinct and separate portions of the letter, put them together, leave out the intermediate and explanatory sentences, and put it to the country as a genuine document. The man who did that would disgrace the striped clothes of a penitentiary.

Mr. CULLOM. I had never heard the Senator's explanation of his letter. I do not think that the explanation is much better than the letter itself. There is no mistaking the fact that he did say the President of the United States had challenged the protected industries of the country to a fight of extermination.

Mr. VEST. The President has made his own statement. Why does not the Senator criticise that?

Mr. CULLOM. I have, but I happened to see the Senator's letter, and I thought that was a very good explanation of the President's course and purpose, and that it perhaps ought to be criticised, too.

I do not desire to take issue in any way with the Senator or get into any controversy with him, but the Senator fails to say that he is in favor of protection of any kind to our American industries and American labor. In other words, he and his party stand upon the platform of a tariff for revenue only, without any reference to whether it gives protection to American labor or American industries.

I shall not refer to his letter further, but I have some other quotations which have been furnished me which I think will turn out to be correctly stated and to be genuine.

We demand tariff reform, and we set our faces in the direction of free trade.

That is one.

The Democrat who is not a free-trader should go elsewhere.

If the Senator from Missouri is not a free-trader, he had better come over and join the Republican party.

The conflict between free trade and protection is irrepressible and must be fought out to the bitter end.

The Democratic party, except in the person of imbeciles hardly worth mentioning, is not upon the fence. It is a free-trade party or it is nothing—

As I said almost in the beginning—

The black flag is up; no quarter will be asked and no quarter given.

The above extracts were taken from one of the great organs of the Democratic party, and doubtless penned by its chief editor, Mr. Watterson, who, I believe, is a member of the National Democratic Committee.

Mr. President, when the St. Louis convention was held it was the determination of that party to plant itself upon the doctrine of free trade, and when a member of that convention undertook to control it and to prevent its announcing extreme revenue-reform positions he was substantially sat upon by the convention.

So we are sure of free trade, if Democracy shall succeed at the approaching election. The black flag is up, and no quarter is to be given; it is to be a war of extermination against the protected industries of the country. The manufacturer is told that when the change takes place from protection to free trade the world's markets will be open to him; that his wares will find a ready market and wealth will fill his coffers. In the first place, under such a condition, his factory or mill would be idle and he would have no wares for sale. Mr. President, the world's markets are open now, and whether our wares are sold in them depends on the quality and cheapness of the article where it is wanted. We sell more to Great Britain now than does any other foreign country. And yet we are told by the Democratic party that we do not get into the foreign markets because we have a protective system here, while in competition with Great Britain, which announces itself in favor of free trade, we go into the markets and sell our wares to a greater amount than does any other country in the world.

The value of our manufactures amounts to eight billions of dollars, 98½ per cent. of which is consumed at home, and 1¾ per cent. is exported, amounting to $135,000,000.

The agricultural product of this country amounts to $7,500,000,000, five hundred million less than the manufactures, and 92 per cent. of it is consumed at home and 8 per cent. exported, and yet our Democratic friends seem more concerned about the little surplus we have to send away than to maintain our home industries. The idea seems to be that trading among ourselves does nobody any good. Mr. President, if the people of Illinois have corn and wheat and beef to sell to the people of New England, and they have cotton and woolen goods and boots and shoes and blankets to sell to the people of Illinois, why is not the Massachusetts manufacturer and the Illinois agriculturist each doing as well and enriching the country as much as if each sent his product out of the country? I expect the day to soon come when the

agriculturist of Illinois will find a market for every bushel of wheat and corn and every pound of beef and pork at home to supply the vast multitudes of that State who will be engaged in the stores, the factories, the mills of the great cities and the shops and the mines. The important market, Mr. President, for Americans is a home market.

Mr. President, the farmer has as much interest in maintaining the protective system in this country as any other class of our citizens. What we want and must have is diversified industry. We can not be and ought not to be all farmers, or all mechanics, or all engaged in any one pursuit. The desire of England always was from the early period of the colonies until now that the American people should be hewers of wood and drawers of water for Great Britain, that the American people should be an agricultural people and furnish Great Britain the breadstuffs, the beef, the pork, the lard, etc., and they furnish America with manufactures. The American people never consented to this programme, but insisted on doing as they pleased, and developing the resources of their own country in its manufactures, its commerce, its shipping, and generally securing independence as a people. The weakest nations are those with the least diversified industry.

America occupies a middle ground in regard to diversity of industry. Many of the weaker nations, as South America, Turkey, India, are more exclusively agricultural. In Great Britain the proportion of the population engaged in agriculture is much less than in America. But let us see further what the farmer's interest is in this contest. More than 90 per cent. of our agricultural product is consumed here. The cost of transportation is a great item to be taken into consideration, by farmers especially. In 1865 my own State was more largely a corn-growing State than it is now; it then had fewer mills and factories and mines and machine-shops being operated than it has to-day. She depended largely on consumers east of the Alleghanies for the disposal of her surplus either in the Eastern States or in Europe. It had to be moved from 800 to 3,000 miles, hence the cost of transportation came out of the price which the producer near the market received.

Illinois produced over 117,000,000 bushels of corn and received on an average that year only 29½ cents per bushel, while corn in Connecticut averaged $1.22½, showing that on the total 117,000,000 bushels the Illinois farmers lost nearly $105,000,000. How much more prosperous would the Illinois farmers have been with a market at their door, as it soon will be if the policy of encouraging the development of diversified industry is continued and stimulated.

It is said that "the base of all industry is agriculture—a foundation interest," but that fact does not justify everybody in turning his attention to farming. The interest of the farmer is that other business should be carried on with it and beside it in the interest of the best development of agriculture. The Democrat says we protect manufacturing and the farmer has to pay for it, and if the farmer believed the halt that is told him he would believe himself robbed and ruined by the tariff daily. In the first place the farmer's wheat is protected. There is an import duty upon corn, potatoes, wool, flax, meats, vegetables, and about everything that needs protection which the farmer produces; but if there were not it is the interest of the farmer that other industries should be prosecuted in this country.

John Quincy Adams advocated the harmony of industries. He said:

> The great interests of an agricultural, commercial, and manufacturing nation are so locked in union together that no permanent cause of prosperity to one of them can operate without extending its influence to all the others.

In Great Britain in 1881 the proportion of the population engaged in what are called industrial pursuits as distinguished from what are designated as commercial, agricultural, domestic, or professional, was 57 per cent., while those engaged in agricultural pursuits were 12.4 per cent.; while in this country the proportion of those engaged in industrial pursuits was only 22.1 per cent., and those engaged in agricultural pursuits was 44.1 per cent. The proportion engaged in agriculture will be reduced as the nation grows older if we encourage diversified industry.

As population increases in any community the value of the lands increases. In this country the States have been divided into classes, the first class having less than 30 per cent. engaged in agriculture; the second, with 30 and less than 50 per cent.; the third, those States with 50 and less than 70 per cent., and the fourth class, those States having 70 per cent. and over. Without going into a detail of figures, the facts show that in the first class of States, having less than 30 per cent. of those engaged in agriculture, the land is worth $38.68 per acre, while in the second class it is worth $30.55, in the third only $13.53, and in the fourth class, where 70 per cent. and over are engaged in agriculture, the land is valued at $5.18 per acre.

The statistics show that the value of lands increases as population not engaged in agriculture increases in the vicinity, and the reason for the increase in the value of land is because its produce finds a home market and better price. Illinois, the State which I have the honor in part to represent, according to the census of 1880 had about one million persons engaged in agriculture. The income from their labors was greatly enlarged by the great mills and factories and meat markets and grain markets of Chicago and other cities of the State. In Chicago to-day we have nearly or quite a million people consuming the product of the agriculturist. Such great industries and great cities scattered over our great country furnish a surer and better market than foreign markets sustained by the pauper labor of Europe.

The protective system is in line with the highest law of nature, namely, self-preservation. A man has a right to defend himself against assault, to preserve himself from bodily injury or to save his own life, to defend his home, his castle, his property against lawless attacks or intruders. So a nation or the people of a nation have the right—it is their duty—to protect, preserve, defend their own interests before looking to the welfare of other nations, especially when other nations are struggling to procure the adoption of a policy for the sole interest of their own producers who want to sell their wares in our market and do nothing to develop the resources of this country. They have nothing in common with us. They pay no taxes. They simply want the benefit of our markets.

Nations and cities alike make this principle of permitting outsiders to sell goods only on condition that they comply with such regulations as are made for a reasonable protection of the interests and rights of the citizens who pay taxes, and in every way assist in bearing the burdens of the community or government in which they live.

Now, Mr. President, I desire to have read by the Secretary an article from the London Morning Post, which I think will be found interesting and germane to the subject under consideration.

The Secretary read as follows:

AS AN ENGLISHMAN SEES IT—A LONDON PROTECTION PAPER SAYS THEY CAN NOT UNDERSTAND US.

[From the London Morning Post.]

According to our friends of the Cobden school, American commerce and American manufactures ought to be declining rapidly under the "withering influence" of a protective tariff. Instead of this, the statistics to which we refer show that in twenty years the population of the States has increased by 69 per cent., the hay crop has increased 106 per cent., the cotton crop 194 per cent., and the production of pig-iron over 386 per cent. Railway construction to the extent of over 21,000 miles was projected last year, and over 15,000 miles of it were actually constructed in the twelve months. What this means will be better understood when it is pointed out that the total mileage of railroads existing in the United Kingdom last year was under the 21,000 planned as a single season's addition to the tracks in the United States. New rails were required for nearly 20,000 miles of road, and upward of 3,000,000 tons of steel rails were turned out for the new lines in course of construction. This quantity is three times the entire turnout of rail of all descriptions, iron and steel, of all the mills of the United States in the year 1880.

Immigration last year was on an exceptionally large scale. On one day the number landed at Castle Garden depot exceeded eleven thousand—the highest figure ever recorded in the annals of the New York immigration bureau. In fact, the stream of new arrivals poured in so densely as to tax to the utmost the resources both of the numerous Atlantic steam-ship lines and the immigration authorities of the Eastern ports. Many of the lines were obliged to order their agents to cease booking "steerage" for a time. A feature, too, of last year's immigration was the unusual number of mechanics, brick-layers, plasterers, and masons, from Scotland, Wales, and the north of England, and who went out to the States in response to advices from the other side stating there were good openings there for such handicraftsmen. And yet there are scores of politicians here so blind to what is going on in the world as to stick to the old fetish formula that protection is more injurious to the country that adopts it than to the country against which the hostile tariffs are aimed.

But for the serious consequences entailed upon our British working classes, that feel every day more and more the pinch of foreign competition, it would be decidedly amusing to note how completely every one of the principles assumed by the one-sided free-trade school of this country is negatived by facts and falsified by the experience of common-place business men. We are constantly told that protection raises the cost of commodities; that a hostile tariff—as Mr. John Bright said but a few days back in a published letter to one of his correspondents—is only a tax which the community pays to support the particular industry benefited by it. As a matter of fact, what do we find in America? Why, their manufacturers can actually beat us out of the field on the score of mere cheapness only. So far from protection enhancing the cost of their goods, they can turn them out at rates at which we, with all our free trade, can not manage to compete.

The Yale lock-makers can afford to pay the carriage of their goods to England and yet undersell the Wolverhampton masters in the very heart of the lock trade, just as the Belgians can quote lower rates for angle-iron delivered in Derby than the local iron-masters of the Midlands. The Philadelphia engine-makers can turn out as serviceable locomotive as any English firm, and ship it all the way to New Zealand for £600 less than the English tenders. In South Russia the agricultural implement trade is said to be passing entirely into the hands of American exporters, in spite of English and German competitors, though the latter are nearer by 3,000 miles to the local market. With the exception of made-up clothing, which is dear because labor is highly paid, and not because the duty on stuffs is so heavy, there is not a single manufactured article produced in the United States, from carpets to cotton, from locomotive engines to steel axes, from agricultural implements to cutlery, and Yankee notions, as many little domestic appliances are called, which is not as cheap or even cheaper there than in this country.

Mr. CULLOM. Mr. President, I have yet said very little on the importance of maintaining our protective system to the laboring classes, or, as they are sometimes termed, the wage-workers of our country. After all, if one class of our citizens have more at stake in maintaining a protective tariff than any other, it is the class upon whom the nation depends for the development of its resources, the men who open up the country, who build the cities, who build and operate the factories, the mills, the railroads, develop and operate the mines; they, above all others, should be protected in good wages as against the cheap labor of other lands.

No man can gainsay the fact that the laborers of America are better paid than are the laborers of the Old World. No policy should be allowed to prevail in this country that by any possibility would operate to lessen the price of labor; rather a policy should be inaugurated to raise the price of wages. The people of this country are the Government. It should be the constant aim and effort of the men charged

with official duty to do that which will tend to lift up (instead of let down) the great body of the people into an atmosphere of higher enjoyment and higher civilization, and no policy should prevail which would require a sober, industrious laboring man to toil daily and still be unable to keep the wolf from the door; rather should such a wise policy prevail as would secure to every toiler a home, rest, advantages of schools for his children, society and churches for himself and family. The good of humanity requires this; the well-being of society and government demands it.

The mechanic and laborer are told by Democratic Senators and speakers in the States that they would do better under their revenue or free-trade policy than they do now. Let us see how wages in this country and in Great Britain compare.

FACTS AND FIGURES FOR WAGE-EARNERS.

The following tables, compiled from volume 20, United States Census, and from British official statements, give the average weekly wages in one hundred and two kinds of work, including manufactures, mechanical trades, and unskilled labor:

Weekly wages in one hundred and two employments.

Occupations.	Great Britain.	United States.
Boots and shoes:		
Cutters	$5.08	$13.85
Finishers	7.26	14.50
Gas, stokers	7.86	11.70
Hats:		
Finishers	6.29	10.60
Trimmers, women	3.15	8.65
Trimmers, girls	1.87	5.25
Dyers	4.96	13.50
Dyers, boys	2.66	4.25
Iron furnaces:		
Keepers	9.66	11.67
Keepers' helpers	4.86	8.82
Fillers	5.53	8.29
Enginemen	6.78	12.82
Iron foundries:		
Molders	7.66	13.76
Machinists	7.19	13.34
Machinery:		
Molders	7.23	13.67
Pattern-makers	7.46	15.46
Rolling mills:		
Puddlers	7.26	20.64
Helpers	4.35	11.02
Hammer men	14.52	27.00
Rollers	7.26	13.38
Roll turners	7.26	19.50
Rollers and bloomers	14.52	28.86
Hoppers	4.60	8.34
Roughers	6.05	13.44
Calciners	2.42	11.44
Wheelers	4.84	7.20
Wheelers, coal	4.84	9.60
Stock-takers	4.84	9.60
Laborers	4.11	7.80
Coal mining:		
Miners	5.75	11.45
Drivers	3.32	10.00
Engineers	6.78	13.84
Blacksmiths	6.41	11.00
Iron miners	5.52	11.70
Paper:		
Rag-sorters	2.54	4.75
Finishers	6.05	10.93
Finishers, women	2.90	4.65
Mechanics	7.38	13.88
Potteries:		
Plate-makers	7.70	20.30
Dish-makers	9.62	19.43
Cup-makers	9.92	19.67
Saucer-makers	7.93	18.58
Basin-makers	9.66	19.73
Hollow-ware jiggers	11.62	21.89
Hollow-ware pressers	8.14	17.90
Kilnmen	6.86	13.18
Sagger-makers	8.46	19.33
Mold-makers	10.23	20.79
Turners	8.00	16.97
Handlers	8.39	16.62
Printers	6.55	13.56
Carpets:		
Weavers	7.26	12.00
Winders, women	2.78	5.28
Dyers	8.87	11.50
Mechanics	6.90	12.00
Cotton goods:		
Printers	12.10	28.02
Apprentices	5.08	15.30
Boys	.85	3.90
Grinders	5.20	8.40
Strippers	4.45	6.37
Drawers, women	3.50	4.62
Mule spinners	6.96	9.21
Doffers, boys	2.18	4.14
Dyers	4.96	6.51
Dyers, boys	2.18	3.90
Finishers	6.20	9.36
Finishers, boys	2.90	4.26
Mechanics	6.78	12.54
Carpenters	6.41	11.66
Laborers	3.87	7.03

Weekly wages in one hundred and two employments—Continued.

Occupations.	Great Britain.	United States.
Silks:		
Winders	$2.96	$5.34
Weavers, power	5.40	11.50
Weavers, women	4.38	7.94
Designers	12.00	24.71
Lace-machine operators, male	9.11	14.75
Lace-machine operators, female	3.09	5.00
Dyers	7.00	12.77
Woolens:		
Sorters	6.47	10.40
Warpers, male	5.52	10.63
Warpers, female	2.90	5.76
Spinners, male	7.05	10.39
Spinners, female	2.72	5.13
Weavers, male	5.38	10.00
Weavers, female	3.78	5.80
Fullers	5.87	8.96
Dyers	4.90	7.52
Car-works:		
Makers	7.50	10.93
Coach-makers	8.11	12.05
Wood machinists	7.74	11.58
Smiths	8.11	12.47
Painters, coach	7.26	11.21
Painters, wagon	4.84	10.93
Laborers	4.36	6.90
Total, 93 occupations	578.49	1,106.83
Average weekly	6.22	11.90
Trades, general:		
Carpenters	6.94	11.84
Smiths	6.98	16.48
Masons	7.45	16.33
Tinners	7.32	14.76
Engineers	7.47	15.24
Mechanics	6.95	13.85
Painters	6.33	11.71
Copper-smiths	7.74	15.00
Laborers	4.37	7.70
Total, 102 occupations	640.04	1,229.74
Average weekly	6.27	12.05

These figures represent a wide range of occupations, from the rudest to the most highly skilled.

WAGES HERE AND IN GREAT BRITAIN.

In the Sixteenth Annual Report of Labor, by Mr. Carroll D. Wright, of Boston, at page 107 he says:

In the fall of 1883 we started upon an original investigation through personal agents of the bureau in Massachusetts and Great Britain, and through these agents we have gathered from original sources (meaning by "original sources" the pay-rolls of great manufacturing establishments, the official wage-lists agreed upon in England, so far as England is concerned, between trade societies and employers, and from other reliable sources) the rate of wages paid in the following twenty-four industries, which are common to Massachusetts and Great Britain:

Industries—1884.	Average weekly wages paid employés.	
	Massachusetts.	Great Britain.
Agricultural implements	$10.25	$8.85
Artisans' tools	11.80	4.89
Boots and shoes	11.63	4.37
Brick	8.63	4.16
Building trades	14.99	7.21
Carpetings	6.08	4.11
Carriages and wagons	13.80	4.89
Clothing	10.01	6.71
Cotton goods	6.45	4.66
Flax and jute goods	6.46	2.84
Food preparations	9.81	2.72
Furniture	11.04	7.96
Glass	12.28	6.94
Hats—fur, wool, and silk	11.01	5.51
Hosiery	6.49	4.67
Liquors—malt and distilled	12.87	12.66
Machines and machinery	11.75	6.93
Metals and metallic goods	11.25	7.40
Printing and publishing	11.37	5.52
Printing, dyeing, and bleaching cotton textiles	8.67	4.94
Stone	14.39	8.58
Wooden goods	12.19	5.67
Woolen goods	6.90	4.86
Worsted goods	7.32	3.60
All industries	10.31	5.86

Showing that wages in Massachusetts are almost double those in Great Britain, the schedule of prices of labor in Massachusetts and Great Britain speaks for itself and is doubtless according to the facts. I will not dwell longer on the subject of difference in the wages of the laborer in this country and in Great Britain. Every man is familiar with the fact that the wages of the skilled mechanic and the common laborer of

this country are nearly twice what they are in the countries of Europe or England. It can not be that the laborer is not in better condition in this country than he would be under a system of free trade or tariff for revenue only.

The history of our own country proves our position, the history of Ireland proves the correctness of our protective system. England, with its free trade and cheap labor and its hundreds of thousands of paupers, is a warning to the people of America against the policy which will soon and inevitably produce a similar condition here. England wants our doors opened that her manufacturers and merchants may bring their goods in free, so that she may give her people work and wages and let American laborers do the walking. Shall we open the doors to British goods free, or so near it, that they may fill our markets? I say no, if it shall interfere with our industries. Keep out foreign production sufficiently to enable us to keep up the price of labor and run our factories and mills and mines and build up our own people and country.

Mr. President, much has been said by our Democratic friends against the tariff plank of the Republican platform because it declared that—

Rather than surrender any part of our protective system at the joint behest of the whisky trusts and the agents of foreign manufactures we would favor the entire repeal of internal taxes.

There is no occasion at present for an entire repeal of internal taxes in order to preserve our protective system, and it will not be done. But what does the so-called Mills bill propose? It contains provisions the very purpose of which is to turn loose the little moonshine distillers of the South, which, so far as they have been able from the passage of the internal-revenue law to this hour, have violated law and have destroyed the lives of many brave men engaged in the enforcement of the law. The passage of the Mills bill would, as some one has said—

Leave Uncle Sam, like a blind beggar with a contribution-box, waiting for the distillers to chip in whatever they desired for the support of the Government.

The proposed amendments were designed to benefit the Southern States, where the little distilleries were found up the hollows. The regulation of distilleries of certain capacity allowing them to be operated without storekeepers or gaugers, modifying the law in relation to arrests, and many other provisions which can not be otherwise than in the interest of the manufacture of spirits without the payment of the tax. The provisions of the Mills bill in relation to internal taxes are constructed to enable the moonshine distillers to manufacture without the payment of the tax all the whisky they choose, while the great establishments in the North, which are running according to law, are surrounded by all the agents of the Government needed to secure it in the payment of the tax on every gallon manufactured according to law.

Mr. President, the bill reported as a substitute for the Mills bill by the Senate Finance Committee will reduce the duty on imported sugar one-half. I am inclined to believe it ought to be put upon the free-list, but a reduction of one-half the present duty will, I trust, be of value to the country. The production of sugar from cane in this country has seemed to have been almost a failure with all the protection that has been given it. The quantity produced in the United States has not increased, but seems rather to be decreasing.

If it can not be produced in reasonable quantities in this country with protection, it would seem contrary to public policy or the policy of a protective tariff to impose heavy import duties upon the article here to supply the demand of our people; there is but a small per cent. of the amount used in this country produced here. The amount consumed in 1887 was 3,130,077,440 pounds, while of the amount consumed we only produced 6.11 per cent. I will ask to insert in the RECORD as part of my remarks a table showing the amount produced in this country since the beginning of 1865 up to and including 1887, the amount imported in same period, and the total amount of duty paid on imported sugar, which would seem to be an extraordinary amount, yet the statistics doubtless give the amount correctly. The amount of duties paid on sugar brought in to supply our markets in twenty-three years beginning with 1865 and ending with 1887 was $860,226,531.46—a vast sum of money to pay for protecting an article produced here in so small quantities, and which so far has not prospered even with a heavy duty on imported sugar as a protection to this industry.

EXHIBIT A.

Year ending June 30.	Production in Louisiana.	Other Southern States.	Imports of sugar.			Average cost per pound in foreign countries.
			Quantity.	Average specific rate of duty.	Duty collected.	
	Pounds.	*Pounds.*	*Pounds.*	*Cents.*		*Cents.*

EXHIBIT B.

Total duties collected on sugar in twenty years (Statistical Abstract, 1887)		$860,226,531.46
Sugar consumed in the United States in 1887	pounds	3,130,077,440
Sugar produced (1887) in Louisiana	pounds 181,123,872	
Other Southern States	do 10,158,400	
		191,282,272
Addition to cost of sugar consumed in 1887 as proposed by the Mills bill		$45,217,282.41
Value of entire sugar crop of the United States in 1887 (191,282,272 pounds), at 5 cents per pound on plantation		$9,564,113.60
Percentage of total consumption of sugar in the United States, produced in the United States, 1887		6.11

Mr. President, the Mills bill places on the free-list a large number of articles chiefly products of the Northern and Western industries which are protected by the present law. If the bill as passed by the House should pass the Senate, many of the industries would probably be destroyed. It provides an ad valorem duty in many instances where it should be specific in the interest of an honest enforcement of the law. We hear much about the frauds in the custom-houses of the country, and many industries since this Administration came into power have been broken down and many others seriously injured in their business by fraudulent invoices which have practically established free trade in this country on some articles of like kind manufactured here. Better have no tariff laws for protection than to have them so framed as that they may be easily evaded by the importer, so that the producer of this country can not know what to rely upon in his business in competition with importations.

I desire to say, in connection with this, that I see by an examination of the two bills, that in the Mills bill, as it is called, there seems to have been an effort to place everything dutiable upon an ad valorem basis, while the other side of the question is taken by the committee on the part of the Senate, making every duty specific, so far as it could consistent with what information it had, so that we may know and the business man may know exactly the amount to be paid upon every article.

The Mills bill makes but slight reduction of the duty upon rice, while vegetables (including potatoes) are put upon the free-list. I ought to say here, perhaps, that there seems to be a doubt in the minds of Senators and others whether or not the Mills bill actually places potatoes upon the free-list. There certainly is a doubt about it. If I am mistaken, I ask the Senator from Iowa [Mr. ALLISON] to correct me. They do not seem to be mentioned as being upon the protected lists, so far as I can see.

The Mills bill touches lightly the duty upon sugar, which had a protective duty of over 80 per cent., while the sugar trade of the country is in the hands of a trust or combine which is forcing the people to pay enormous prices for the article, and have been in the last few days, by order of Havemeyer, the president of the trust, closing up refineries to prevent overproduction and keep up the price, and turning away thousands of working people in pitiable poverty upon the charities of the public. While sugar and the sugar trust are tenderly cared for, the great wool interest of the North, aggregating in this country 300,000,000 pounds annually, and valued at $100,000,000, which, as stated in the report of the Committee on Finance of the Senate upon the tariff bill, "supplies nine-tenths of the clothing wool used by American manufacturers, and has raised the United States to the first rank among the wool-producing nations of the world—this great and important industry or product is put upon the free-list to struggle on in competition with wool importations from South America or Australia, or perish and

be remembered as one of the elements of wealth in America, killed off by the Mills tariff bill, if it should become a law.

Mr. President, I have seen it charged that our manufacturers of reapers and other agricultural implements are selling their manufactures abroad at less price than they sell the same articles at home. I have made some inquiries to ascertain whether the charge is true and find that it is not, so far as I have made inquiry. In proof that such is not the fact, I will read the testimony of Col. A. L. Conger, a manufacturer of reapers in Ohio, as to the sale of reapers on the subject of wages, etc.

ANOTHER LIE NAILED—THE AMERICAN REAPER TRADE AS COMPARED WITH THE FOREIGN.

The Chicago Daily News and several Western papers having published a statement that American manufacturers are selling reapers at $50 each less to the foreign trade than to American farmers, the question was referred to Col. A. L. Conger, of Akron, Ohio. Colonel Conger is a prominent manufacturer of Ohio and president of the Whitman & Barnes Manufacturing Company, which has large business connections with every State and Territory in the Union, as well as a large foreign trade. He is intimately connected with the reaper business of the United States and knows whereof he speaks. In reply to the inquiry Colonel Conger said:

"The statements contained in the articles, so far as the reaper trade is concerned, are absolutely and unqualifiedly false. There is no reaper establishment in the United States that could afford to entertain such a proposition. On the other hand, as a rule, the manufacturers of agricultural implements in the United States are able to get very satisfactory prices for their goods abroad, and generally in excess of prices received in our home market, and in most cases they get cash before the goods leave New York City, while in this country reapers are usually sold on one, two, and in some instances three years' time. The reason why American manufacturers are enabled to get higher prices for their goods over those manufactured abroad is because of the superiority of our implements. The free-trader is slow to admit this, but nevertheless it is true.

"We pay twice as much for labor in this country as is paid abroad, therefore we get twice as good results from that labor. Labor which receives poor pay brings poor results. Our principal competition in farm machinery for the foreign trade comes from England. In South America, Australia, as well as France, Germany, and Russia, the American manufacturers are building up a splendid trade in farm machinery. If we can do this under our present system of protection, how foolish it would be to break down this system and reduce American labor to the level of the pauper labor of Europe, and at the same time reduce the standard of our manufactured goods, which must necessarily follow. I do not know how this story originated, but I think it was set afloat by English manufacturers, with whom we have to compete. They are very jealous of American manufacturers, and especially of the superiority of our goods.

"We have a million men in this country whose brains are occupied night and day in making improvements in farm machinery, and the wonderful progress and improvements they are constantly bringing forth challenge the admiration of all other countries, and they are looking to America to supply their wants. Let me give you another illustration. I met a gentleman from London a short time since who came in possession of a famous drill made in this country, known as the Morse twist drill, which is known to every American machinist. He had come to this country to get the exclusive agency for the sale of this tool in the English market. This is only one of hundreds of instances which go to show how we can maintain our own manufactories without giving up the great advantage we now hold over all other countries with our laws of protection, which now bring such great prosperity to the American laborer and to our country."

I have also received a letter from the secretary of Messrs. Deere & Co., of Moline, in Illinois, on the question of foreign trade; also the extent and character of the manufacturing interests of that growing city, which I will submit to the Senate:

OFFICE DEERE & CO., *Moline, Ill., September* 7, 1888.

DEAR SIR: Your esteemed favor of the 2d instant to Mr. C. H. Deere finds him absent, and therefore I take occasion to answer your inquiries as to the character and extent of the manufacturing interests of Moline.

Kinds of goods.	Hands employed.	Volume of business.
(Number of establishments, 2.)		
Steel plows and cultivators	1,200	$2,200,000
Wagons	300	700,000
Corn-planters, rakes, etc	150	500,000
Flouring-mill machinery	150	300,000
Machinery	50	100,000
(Number of establishments, 2.)		
Malleable iron	150	100,000
Scales	25	50,000
Pipe-organs	25	50,000
Pumps	50	150,000
Saddlery hardware	50	150,000

In regard to the second point you make, the competition in the manufacture of plows is so great that the margin of profit has been reduced dangerously low, so that there is no object or opportunity to sell our goods to the foreign at less prices than we do to the home trade. We have done a considerable business with Canada in times past and are still doing some there, and our discounts have been so large, or in other words, our prices so low, that in one instance the Canadian authorities refused to accept our invoice as the true one, but raised the price. We convinced them, however, that the price was the same that we were selling our goods in like quantities to our home trade; but nevertheless it seemed entirely too low to our Canadian neighbors. We have some trade with Australia, New Zealand, South Africa, and the Argentine Republic, but our prices to all our foreign trade are always the same as to our home jobbing trade, never any lower.

I might remark that our foreign trade could be extended indefinitely if we had regular lines of steamers to South American ports and to Australia and New Zealand. As it is now, the only way we can reach the Argentine Republic is by chartering sailing vessels, which occupy on a voyage ninety days on the average from New York to Buenos Ayres. Our plows, United States harvesting machinery, and various other kinds of tools are preferred by the English colonists in the countries named, and also by the South American people, to those of European manufacture. At the little town of Grinnell, in Iowa, there is a small harvester manufactory whose trade in the Argentine Republic increased from ten in 1884 to eight hundred in 1888, they having shipped 80 car-loads of their harvesting machines called headers from Grinnell to the Argentine Republic by the way of New York during this past year.

The eastern plow manufacturers have done a large business with the Argentine Republic for many years in cheap, low-priced plows, and we are just getting a foot-hold there with our better class of American plows. These facts are positive proofs that American farmers are furnished with the tools necessary for carrying on farming operations at a very much less price than any other agricultural country in the world. I mentioned the Grinnell harvester factory because the extent of their foreign trade has come immediately under our notice, but in addition to this there are half a dozen other manufacturers of harvester machinery who are also doing large foreign trade. I think it would be a good idea for you to get the statistics of exports of farm machinery for the past few years from G. W. Silcox, No. 60 Barclay street, New York, as these statistics are open to the public. I mentioned George W. Silcox because he is the agent for our export trade, and might be able to procure them for you as well as anybody else.

The charge that American farm machinery is being furnished to foreign countries at a less price than to our own farming community is a "bald assertion," probably founded on the assumption that all manufacturers make lower prices to their foreign trade than they do to their home. But this is impossible to be true where competition has reduced prices to the lowest possible point consistent with safety, and then all countries that have a tariff protect their own people from undervaluation by stringent rules and regulations.

Yours, truly,

S. H. VELIE, *Secretary Deere & Co.*

Hon. S. M. CULLOM,
United States Senate, Washington, D. C.

Mr. President, the letter just referred to shows how under our protective system our manufacturing interests are growing, the manufactures are carried to foreign countries and placed on the market and sold in competition with like manufactures of other countries, and at the same time furnishing our own people the cheapest and best agricultural implements, especially, in the world. How weak and absurd is the policy that would change this condition. These manufacturing cities in our prairie State give life and vigor to our trade and commerce, and all interests are benefited. The success of one business depends in a measure upon other business around it. Business interests in a community are mutual.

I desire also to present another letter received from a business man in Peoria, Ill., upon the same subject, the selling of agricultural implements abroad:

[Letter from M. Kingman of the firm of M. Kingman & Co., of Peoria.]

PEORIA, ILL., *September* 5, 1888.

Senator S. M. CULLOM, *Washington, D. C.:*

Yours of the 2d received, inclosing slip, which I herewith return. In answer to this will state that I am a stockholder in the Moline Plow Company, also in the Marseilles Manufacturing Company. Both of these concerns have an export and foreign trade, and the contracts for this foreign trade I am fully posted in, and I desire to say to you that this foreign trade pays the same price for their goods at wholesale as the American dealer does, and instead of giving them two, four, and six months' time, they pay the cash on receipt of bill of lading. This is also true of the business done by Kingman & Co. in Mexico for the last three years in the sale of various lines of goods in that republic.

What I stated above, applying to the Moline Plow Company, Marseilles Manufacturing Company, and Kingman & Co., is also true of all the agricultural manufacturers of the West.

We handle goods made at the following cities in Ohio: Dayton, Massilon, Tiffin, Springfield, Cincinnati, and Columbus. All of which sell largely abroad, and the managers of these different factories also have stated a number of times that they were making exactly the same terms that they were selling to these foreign countries, and hence the statement set forth in this slip is untrue in every particular.

If you desire to have a personal letter from the different factories showing these facts, I can obtain them for you.

Mr. President, it is often charged that the Republican party has been unwilling to reduce the tariff duties, and that the party favors retaining the war tariff. The war tariff has long since been modified; it was modified by the act of July, 1870. It was modified by the revision of March 3, 1883, so that the country has no war tariff. If the tariff laws which were in force from 1861 to 1870 had remained in force until now, the Government would have collected for 1887 $139,596,693.25 more than it did under the present law, according to the report of the Finance Committee of the Senate.

The tariff bill reported to the Senate as a substitute for the House bill disposes of the surplus and at the same time protects American labor and industries. If it shall become a law its honest enforcement will neither reduce wages nor will it close our mills, factories, and mines. It will aid in keeping them all open, and will strengthen our home market by retaining the money of the country at home by paying good wages for labor, thereby enabling the masses to buy more and live better than they could if times were hard and wages were reduced. The Senate bill is a complete revision of the revenue laws, reducing and increasing duties when and where in the judgment of the committee the facts demanded it should be done. It should become a law with such amendments as a full discussion may indicate should be made.

It should be so framed as the judgment of Congress shall deem for the best interests of the country, "free from Executive interference or dictation." We have had much dictation by the Executive for the last three years, notably in dealing with pension bills for the relief of disabled veterans of the Union Army in the late war and for widows and children of deceased Union soldiers. Many a brave soldier's heart has been stricken with grief to hear that the President of the nation, he, the veteran, fought four years to save, had vetoed a bill for his relief in his declining years.

One word more on the subject of pension vetoes. The present occu-

pant of the White House has exercised his doubtful power in such cases with an apparent delight, and in doing so, in vetoing two hundred and six cases, he has saved to the Government, according to an estimate made, the sum of $28,116 per annum.

I desire here to say that the Senator from Colorado [Mr. TELLER] furnishes me this information, and says he has made a careful estimate of the fact. In saving this little sum how many broken-down veterans of the Union Army have been turned away hungry, how many of the number are in the poor-houses of the country I do not know.

I want to relate an incident that occurred in connection with a pension case which was in charge of my honorable friend behind me, the Senator from Wisconsin [Mr. SAWYER], who we all know has been vigilant in season and out trying to protect the widows and the veteran soldiers of the late war in giving them the little pensions to which they are entitled. Through his efforts we passed a bill in the Senate and it passed the House and went to the President and was vetoed. After it was vetoed, the honorable Senator wrote a letter to the lady who was the beneficiary, and this is the language used in her family when she received the letter, containing in it a small remittance from that liberal-hearted Senator. The statement is, that when the mother opened the letter the little children were around her, and her little boy exclaimed, "Oh, mamma, let us go and get something to eat, now that we have got some money."

Those are the people, Mr. President, that the veto power has been exercised with reference to.

But, Mr. President, my purpose is simply, in view of the course of the President of the United States on this great question of the tariff, which has been one of interference and dictation from the time he gave us his December message until now, to call the attention of the Senate and the country to a provision in the Democratic platform of 1872, which declared in favor of remitting—

The discussion of the subject (the tariff) to the people in their Congressional districts, and to the decision of Congress thereon, wholly free from Executive interference or dictation.

How consistent. In 1872 condemning Executive interference, in 1888 the same great party following Executive dictation like an army of slaves.

Mr. President, the national Democratic convention at St. Louis adopted its platform and declared "that chief among its principles of party faith are the maintenance of an indissoluble Union of free and indestructible States," and a little further on it declares that "the Democratic party welcomes an exacting scrutiny of the administration of the executive power which, four years ago, was committed to its trust in the election of Grover Cleveland, and it challenges the most searching inquiry concerning its fidelity and devotion to the pledges which then invited the suffrages of the people." It is not my purpose to discuss the question of the sincerity of that declaration in the platform.

Chief among its principles are the maintenance of an indissoluble union of free and indestructible States.

It is fortunate that the Union is indissoluble; if it had not been the dominant element of the Democratic party would have destroyed it long ago. In the light of history that declaration as an introduction to a Democratic platform is really refreshing, and if the public could regard it as a serious announcement by that party, it would give confidence, at least, that we would have no more rebellions or civil wars in this country; but let us accept the welcome to an exact scrutiny for a moment.

You know, Mr. President, how the charge of extravagance was made all over the country against the Republican party four years ago. It was constant and denunciatory. On account of it some Republicans voted for Cleveland and reform, civil-service reform. Mr. Cleveland was declared elected. We have had a trial of reform, and the result is before the country. How delightful it has been for reformers to behold demoralized and unsatisfactory public service everywhere, the people who pay the taxes not satisfied, and the reform Administration costing them more than any of the administrations before it since the Government was founded.

The total of Mr. Arthur's administration for the years from 1882 to 1885, inclusive	$943,173,130.63
Mr. Cleveland's from 1886 to 1889, inclusive	1,038,476,184.20
Increase 1886 to 1889 over 1882 to 1885	95,303,053.57

Showing that this Jeffersonian simplicity civil-service Administration that welcomes an exacting scrutiny, cost the people nearly a hundred millions more, or will at its close, than the Republican administration just before it. There is another statement which I wish to make in pursuance of the invitation to make an exact scrutiny of the conduct of this Administration. It is this: The Administration admits that it has $60,000,000 loaned without interest to certain national banks. Perhaps the word "deposited" is used.

The money is in the banks, and to take it out might seriously affect the business of the country. But what has been the doctrine of the party? One of the most uncompromising convictions of the Democratic party has been in favor of a subtreasury and against the old national banking system. So thoroughly imbued with a spirit of opposition to the old national banking system was the Democratic party that when the war came on and it became necessary to establish the present national banking system the Democratic party opposed that, and much of the stock in trade of that party has been opposition to the national banks ever since. But now what do we witness? The subtreasury plan abandoned and a Democratic Administration filling the national banks with sixty millions of Government money, when the record shows that in 1840, in national convention, the Democracy declared—

That the separation of the moneys of the Government from banking institutions is indispensable for the safety of the funds of the Government and the rights of the people.

And this doctrine or declaration was reaffirmed by that party in 1844, 1848, 1852, and 1856.

The party has given up at last the only old doctrine it had left. It favored slavery, but says now it is delighted that it is gone. It favored secession, but says that the war killed that. It opposed the internal-improvement system, but it now favors that. It was against Executive dictation, but takes to that now with amazing unanimity. It was against national banks, but now, by the favor of this Administration, certain named national banks are plethoric with money which ought to be where the law requires it should be, either in the Treasury at the capital, or in some of the subtreasuries of the country.

Mr. President, I shall not pursue this fruitful theme further.

Mr. PLATT. Mr. President, the conspiracy against labor fills not a chapter merely, but pervades the whole volume of American history. Often it has seemed on the eve of victory, often it has apparently triumphed, but in the hour of its seeming victory it has been beaten down and baffled and overthrown, now by the ballots of laboring men aroused to a sense of their peril, and again by their bullets on fiercely contested fields. Sometimes this conspiracy has cloaked and disguised its purposes, sometimes it has boldly avowed them, but never since its first organization has it abandoned them for an hour. Whenever temporarily defeated, it has taken advantage of the security felt in its supposed overthrow to renew its plottings. The chief enemies of the country have been among its chief promoters. Early conspirators have perished; new ones have taken their places. The conspirators die, but the conspiracy lives.

This conspiracy against labor obtained early control of the Democratic party. Through the success of that party it hopes for the accomplishment of its purposes, and now but seemingly awaits the reelection of Grover Cleveland to carry out its ruinous designs. It is and always has been a sectional conspiracy, and its name is free trade.

Two systems of labor were established contemporaneously in this country. About a year before the Mayflower touched the Massachusetts shore, a ship landed at Jamestown, Va., loaded with slaves. From that time these two labor systems have been antagonistic forces in the country, and all our woes and troubles and conflicts have been occasioned by "the irrepressible conflict" between these two labor systems. One system involved the idea that labor should be unpaid and ignorant. At first it involved the idea that capital should own the laborer, but always to this day the idea that labor shall be poorly paid and ignorant. The other system involved the idea that labor should be well paid and should be intelligent.

The Southern system, if I may so call it without disrespect, was based upon the idea that the laborer should have no status in society, that he should have no political rights, no civil rights, no "inalienable rights." The other was based upon the idea that the laborer should have an equal status in society with every other man; that he should have political rights and civil rights; that he should be one of the citizens of the Government, responsible for its administration and responsible for its progress; that he should be in the broadest sense a freeman; and so in the States where this grand system of labor was domiciled the oath which an elector was required to take in order to cast his vote, to participate in governmental and State affairs, was called "the freeman's oath." Labor was dignified and the laborer was dignified by his participation in all the functions of government and society. There were indeed slaves in the North at first, but there was no room for them in the labor system which obtained there, and they went out, disappeared by the inevitable operation of the laws which governed that system. The Southern system, where the laborer was unpaid, where he was kept ignorant, where it was a criminal offense to teach him to read even the Scriptures, was adapted only to the rudest cultivation of the soil. The Northern system, where the laborer was well paid and intelligent and free to engage in the "pursuit of happiness," inevitably tended to the diversification of industries.

These two labor systems determined where manufactures should first be planted in the United States. It was not the enterprise of capitalists; it was solely and purely the character of labor which spread over these different sections of the United States which determined where manufacturing should spring up and flourish.

North Carolina by all its natural resources, and the same is true of the other Southern States, was just as much adapted to the establishment of manufacturing enterprises as was Rhode Island. The New England States, where this labor system was first planted, could but attempt to engage in manufacturing. The Southern States, where the ignorant and unpaid system of labor prevailed, could only engage in the raising of cotton, sugar, tobacco, and like agricultural products.

Skill, education, and aspiration in the laborer make agriculture not only more profitable, but are absolutely essential to even the rudimentary development of mechanical industries.

To have supposed that manufacturing could at that day have found a foothold in the Southern section of this country was to suppose that you could reverse a universal law of political economy. The one system involved caste; the other equality. The one involved the idea that man should go up, and the other involved the idea that he should go down. Those are two pregnant words in our language, Mr. President, those two little prepositions, "up" and "down." They belong to the language of the Aryan race. Their counterpart is to be found in no other language. We may trace them back through every migration to the home of the Aryan race in Central Asia.

First, they signified simply the measuring of an expanse upward or downward. Soon they came to have a meaning with regard to human character, with regard to human aspiration, with regard to human progress; and so in our language, when we speak of a man's going "up," we mean everything that is implied in the idea of human progress, and when we speak of a man's going "down," we mean everything that is implied in the idea of human degradation.

This labor system of the North could not but elevate man, could not but elevate the laborer. The labor system of the South could only drag him down until such time as the Northern idea of labor should permeate the South, and he should be in some degree emancipated, not from the actual fetters and manacles of slavery, but from the manacles of this labor system.

The necessities of the Government immediately after the adoption of the Constitution obtained the acquiescence of both sections of the country to the protective system, to the system which was to encourage and protect and to stimulate manufacturing in the United States. Until that time we were practically an agricultural community, both North and South, but immediately upon the adoption of the Constitution it was found necessary to raise money for the expenses of government, and coincident with the idea of revenue came the idea of the establishment, encouragement, and protection of manufacturing industries in this country. No one questioned the constitutionality, the morality, the expediency, or the beneficence of protection then.

So, at the first Congress after the adoption of the Constitution, on the first anniversary of our National Independence after the adoption of the Constitution, George Washington signed his name to the first protective tariff bill July 4, 1789. It was a second declaration of independence, a declaration of industrial independence for the United States; and in these later years when we are having centennial celebrations nothing could be more appropriate than that on the next 4th of July, when we have rounded out a full century of protection to American industries, we should celebrate that event.

There was no objection made in any quarter until after the war of 1812, when we still needed additional revenue, nor indeed was serious objection interposed until the really vigorous protective tariff of 1828 was adopted. Prior to that time the South had not discovered that it was impossible to establish manufactures in the South. It had not discovered that the labor system on which it had undertaken to build its civilization was of a character which made manufactures an impossibility; but it had discovered about that time that the diversification of industries at the North, consequent upon protection and the status of the Northern laborer, impossible to the South by reason of the status of its laborers, had given the Northern States a growth in wealth, in power, in strength, in energy, by which they were entirely outstripping the Southern States.

Calhoun, who in the early history of the Government had been as strong a protectionist as any Northern man, was among one of the first to discover that under the diversification of industries consequent upon the enactment of protective tariffs the North was making great strides. Other South Carolinians, McDuffie notably, joined with Calhoun in raising the cry against protection. The conspiracy then was organized, and from that day to the present time it has existed. Its chief conspirators have always had their home in the same section of the country. It started in South Carolina. Its desire was twofold:

First. To extend the Southern labor system.

Second. To curtail the Northern labor system.

First. To extend that system where labor should be unpaid and ignorant.

Second. To circumscribe and limit that section where intelligent, virtuous, self-respecting, and respected labor should have its home.

One of three things was inevitable, either the Southern labor must be freed, educated, and elevated; or, second, that Northern labor must be degraded, checked in its onward progress; or, third, that the Northern States would become more powerful in wealth, numbers, and political power.

So men came to talk earnestly in the South and constantly about preserving the "balance of power." It was thought, indeed, at that time by superficial observers that this phrase meant preserving the balance of power between slavery and freedom, but slavery was only an incident of the contest. It was to preserve the "balance of power" between the labor system of the South and the labor system of the North. It was to prevent the Northern growth under its labor system and to keep it checked, so that the South should, with its labor conditions, progress equally with the North.

The means by which this was to be accomplished was free trade. The idea of protection was abandoned in the South. It was supposed that it was against the interest of the cotton-grower, and cotton suddenly assumed immense importance in the Southern mind. It was elevated to Kingship. It was felt that free trade would help cotton-growing, and therefore the Southern leaders became free-traders.

What do I mean by free trade? Let us have no difference of understanding upon this subject. There is no difference of understanding among commercial men upon the meaning of this term. Among honest political economists and honest politicians it means only one thing.

Free trade does not mean the abolition of custom-houses. Free trade does not mean that no revenue is to be collected by customs duties. If it meant that, it would have no place in the language of the civilized world, for there is not a civilized country upon the globe that does not have its custom-houses and its collected revenue from customs duties. The man who says that the Democratic party is not in favor of free trade, meaning thereby that it is not in favor of abolishing custom-houses and abolishing customs duties, attempts willfully to mislead. The term has no such significance anywhere. Nobody claims that the Democratic party does not intend to raise revenue by the collection of customs duties. I mean by free trade just what all commercial nations mean by it. I mean what Lord Salisbury means by it, who defines a free-trader as one who is opposed to protection. I mean what Mr. David A. Wells means by it, who said recently—I quote his language as used in the report of the Finance Committee:

> Free trade, as an economic principle or politico-commercial system, is the direct opposite to the so-called principle or system of protection.

That is all any Republican means when he charges the Democratic party with being a free-trade party. There is not a leading Democrat in the United States to-day in full communion with his party, enjoying the confidence of this Administration, who dare say that he is a protectionist. Whatever of protection sentiment and courage there was in any leading Democrat in this country has been crushed under the iron heel of this Administration.

In 1832 this free trade or anti-protection—I shall use the two terms synonymously—sought to destroy the Union. It passed the nullification act of South Carolina, and whatever may have been subsequently claimed to be the grievances of the South, it claimed no grievance then except the tariff-protection act of 1828. It proposed to set up a government for itself because the Congress of the United States had enacted a law which protected and encouraged manufactures, and which tended to the greater diversification of industries and the greater prosperity of the country. That demonstration against the Union was checked. Nullification did not become an accomplished fact. Actual secession and the actual erection of a government independent of and hostile to the United States did not take place. But what was it that prevented it? It was the courage and firmness of Andrew Jackson, doing what a President should do, maintaining and executing the laws of the United States.

But there was another cause, and that was the promise of other Southern leaders who had thereto been protectionists that the scheme of protection should be gradually abandoned. It was the knowledge that the tariff compromise of 1833 was to be enacted, quite as much as the firmness of Andrew Jackson, which prevented that early attempt at secession.

Free trade scored a victory then through the cowardice of the friends of protection. Free trade scored a victory then by the demonstration which it had made towards the overthrow and destruction of the Union; and the compromise measure of 1833 providing for a gradual reduction of protection until there should be no longer protection, was incorporated into a law. The year 1837 brought retribution for that cowardice—brought such disaster as has always followed the abandonment of the protective principle in the United States.

Whenever protection has been abandoned at the instance or at the threats of the men representing the Southern system of cheap and ignorant labor, ruin and bankruptcy have followed.

I wish to quote the words of one who will be regarded as good authority by all the laboring men of the country, whom they will believe, however much they may distrust the statement of politicians. The venerable Peter Cooper, the friend of labor during his long life, rising to eminence and wealth as the result of his own hard labor, in his later years used this language:

> I have noticed in my own business life, extending over a period of nearly seventy years, that every reduction of the tariff (or the tariff-for-revenue-only plan) has brought wretchedness and ruin. It is the natural effect from such a cause. Nothing is more certain than that the advocacy of free trade comes from foreigners who want to break up our industries. They have done it several times already and they want to do it again. The laborers of the Old World get barely enough to keep body and soul together, and that is the condition in which the advocates of free trade are trying to place our laborers, and it behooves every man to do all he can to deter Congress from the endeavor.

The widespread ruin and desolation, the bankruptcy, the suffering of labor, the hunger and wretchedness and despair of laborers wrought a change. They caused the abandonment of the free-trade idea of 1833. They always will when labor asserts itself; and I say to the

Democrats in this Chamber, and to the Democrats throughout the land, that if by the means which they are now employing, if by the deception which they are now practicing, if by the imposture which they are now attempting, they secure the votes of laboringmen, workingmen in the North, and re-elect Grover Cleveland, when those men see the consequences of that they will rise in their might once more and put down free trade and demand protection. But it will be a sad experience for them to go through.

But in 1842 protection triumphed again and prosperity returned. Up to that time the conspirators had not fully obtained control of the Democratic party. In the campaign of 1844 they did obtain entire control of the Democratic party. They resorted to the same tactics which they are now employing. The situation was not vastly different then from what it is now. The Presidential election turned on Pennsylvania, a protection State. The Senate was a tie. To-day the Presidential election will turn, it is supposed, on New York, or Connecticut, or New Jersey, and the Senate will be a tie. The Democrats went into that campaign in Pennsylvania with the rallying cry "Polk, Dallas, and the tariff of '42." The result of it was that the tariff of 1846, which I think the most unblushing of Democrats can not say was not a free-trade tariff, was enacted through the casting vote of the Vice-President, George M. Dallas, thus elected. That tariff brought ruin to the country, ruin delayed for some years by the discovery of gold in California, but though not swift, sure, as every failure to maintain the protective principle will surely, soon or late, bring disaster and ruin.

In 1857, the low tariff having produced a redundant revenue, it was still further reduced; and the parallel between that day and the present may be, I think, instructive. In December, 1855, and in December, 1856, the Secretary of the Treasury, Mr. Guthrie, a Southern free-trader, reported to Congress that there was a surplus in the Treasury which must be disposed of. He recommended still further reductions of the tariff duties for the purpose of reducing the revenue. The surplus in the Treasury was then as large, considering the requirements of Government, its receipts and expenditures, as our present surplus. The Treasury Department had been buying bonds not due at a premium running all the way from 8 to 20 per cent. In 1856 there were $20,000,000 of surplus in the Treasury notwithstanding the purchase of bonds which had been going on.

The Secretary of the Treasury insisted upon still further reducing the free-trade tariff of 1846, and on the last day of the session, on the 3d of March, 1857, that reduction act was passed and Senators and Members of the other House went home. They came here again in December, 1857, to find that the result of that further reduction of the tariff was that the United States had no surplus in the Treasury, and had not money enough to pay members of Congress with, and the very first act passed in December, 1857, was to issue $20,000,000 of Government notes; and printing presses were set running as quickly as possible in order to print notes by which the members of Congress might be paid in time for the Christmas holidays.

This shows that it is not well to be too hasty in dealing with a surplus, certainly by the means proposed by the President and the Democratic party to-day. The first result of any such action is revulsion in business. I have no doubt that if it were possible to pass the bill of the House called the Mills bill, within the next six months importations would so fall off in consequence of depression in business, of a disturbance in business, of inability to purchase foreign goods, that we should have to resort to loans as the first result of such an act. If the country could recover from such disaster the subsequent effect of the bill would be to increase the revenue from customs duties.

I said that in 1844 these conspirators captured the Democratic party. The Democratic platform for 1840 declared for a tariff for revenue only. In 1844 that declaration was reaffirmed, and in 1848, after having passed the free-trade act of 1846, the Democratic National Convention congratulated itself in this way, after reaffirming a "tariff for revenue only:" "That the fruits of the great political triumph of 1844 which elected James K. Polk and George M. Dallas President and Vice-President of the United States have fulfilled the hopes of the Democracy of the Union * * * in the noble impulse given to the cause of free-trade by the repeal of the tariff of 1842."

This was a party declaration in favor of free-trade quite as notable as the later declaration by the National Democratic Convention of 1856, which boldly declared—

> The time has come for the people of the United States to declare themselves in favor of free seas and progressive free trade throughout the world.

In 1856 the South, united in its demand for free trade, was conspiring for disunion if free trade could not be forced upon the whole country. It was able to declare it to be one of the cardinal tenets of the Democratic party.

From 1857, of which I have spoken, to 1861, the real purpose of the conspiracy against labor was to superficial observers overshadowed by the prominence of the slavery agitation. Slavery *per se* was but an incident of the controversy. It was the old controversy between antagonistic labor systems that was going on; it was the attempt to extend the labor system of the South, to curtail the labor system of the North, to keep labor degraded all over the country; but more attention was given to the incident of the extension of slavery into the Territories than to the character of the labor which was involved in that proposition.

But the war was not for slavery alone. It was fought for that underlying system of labor which the cotton States determined to preserve. It was that which brought the South into rebellion. If any one thing is needed to prove that more than another, it is to be found in a clause of the Confederate constitution, article 1, section 8:

> The congress shall have power, first, to lay and collect taxes, duties, imposts, and excises, for revenue to pay the debts, provide for the common defense and carry on the government of the Confederate States. But no bounty shall be paid from the treasury; nor shall any duties or taxes on importations from foreign nations be laid to promote or foster any branch of industry; and all duties, imposts, and excises shall be uniform throughout the Confederate States.

It shows that the leaders in establishing the Confederate constitution understood perfectly well what "the irrepressible conflict" was; that it was not an irrepressible conflict between races, between black men and white men, between slavery and freedom alone, but that it was an irrepressible conflict between two labor systems.

Alexander H. Stephens, speaking of the Confederate constitution in his "Constitutional View of the War between the States," on page 336, says:

> The question of a "protective policy," as it was called under the old constitution, was put to rest under the new by the express declaration that no duties or taxes on importations from foreign nations should be laid to promote or foster any branch of industry.

Let me refer to what Jefferson Davis, the President of that Confederacy, said in his work entitled the "Rise and Fall of the Confederate Government." Speaking of the Confederate constitution, he says:

> Protective duties for the benefit of special branches of industry, which have been so fruitful a source of trouble under the Government of the United States, were altogether prohibited.

Mr. President, I may refer to another authority. I refer to the opening sentences in a work entitled "Destruction and Reconstruction," by Richard Taylor, lieutenant-general in the Confederate army, familiarly known as General "Dick" Taylor. I ask the Secretary to read it.

The Secretary read as follows:

> The history of the United States, as yet unwritten, will show the causes of the "civil war" to have been in existence during the Colonial era and to have cropped out into full view in the debates of the several State assemblies on the adoption of the Federal Constitution, in which instrument Luther Martin, Patrick Henry, and others insisted that they were implanted. African slavery at that time was universal, and its extinction in the North, as well as its extension in the South, was due to economic reasons alone.
>
> The first serious difficulty of the Federal Government arose from the attempt to lay an excise on distilled spirits. The second arose from the hostility of New England traders to the policy of the Government in the war of 1812, by which their special interests were menaced; and there is now evidence to prove that but for the unexpected peace an attempt to disrupt the Union would then have been made.
>
> The "Missouri compromise" of 1820 was in reality a truce between antagonistic revenue systems, each seeking to gain the balance of power. For many years subsequently slaves, as domestic servants, were taken to the Territories without exciting remark, and the "nullification" movement in South Carolina was directed entirely against the tariff.

Mr. PLATT. "Antagonistic revenue systems" were the result of antagonistic systems of labor, "each seeking to gain the balance of power."

To show more clearly and distinctly what the author last quoted means, let me refer to something which he has recently said, for which General Butler is authority, in his late Boston speech. He quotes General Taylor as saying, and it has never been denied that I have heard of:

> We made two great mistakes. Had we avoided them we should have conquered you. The first was that we did not substantially destroy the protective features of the tariff in the winter session of 1857 and 1858, by an act which provided a rapid sliding scale to free trade. * * * We could have passed such a law and held it tight on you till it closed the furnaces, workshops, woolen and cotton mills, and steel and bar-iron works of the whole North and West, and scattered your workmen over the prairies and Territories. When the war was ready for you, you would not have been ready for the war. You could not have armed and equipped and put into the field a large army nor built a large navy. You would have been without supplies, machinery, and workmen, and you would have been without money and credit.

I cite these extracts to show that the war itself, the attempt to overthrow the Union, was to establish free trade as much as to preserve slavery.

And now I wish to quote from the Charleston Mercury of May 15, 1861, its views on the Confederate constitution, as follows:

> And first and foremost let us congratulate the people of this great Confederacy that this constitution contains the first acknowledgment in the fundamental law of any people of the great principle of equal and just taxation.

In the light of that I think we may understand what is meant when we are told that our present tariff system is "unjust and unequal taxation."

> That system of partial legislation in the imposition of the taxes which has been the prime cause of all the corruption and sectionalism which have finally overthrown the Union of the United States, is repudiated by this constitution.
>
> Protective tariffs are at an end if this constitution is rightfully administered with all the villainies they spawned upon the country.

The New York Herald, then as now, a Democratic free-trade paper, was in ecstacies over the insertion of this clause in the Confederate constitution. I read some extracts from an editorial article in the New

York Herald of March 19, 1861, in which, speaking of the constitution of the Confederate States, it is said:

The ultimatum of the seceded States is now before the Government at Washington, in this new constitution, adopted by the congress at Montgomery, Ala.

* * * * * * * *

In their unrestricted discretion to shape a Federal Constitution for themselves, the seceded States have unquestionably provided all those securities, checks, and balances which they regard essential for the maintenance of their peculiar institutions. Thus our Northern politicians and the administration at Washington are furnished the conditions upon which the Union may be re-established or definitely divided, without war and without trouble.

This new Southern constitution is the Constitution of the United States, with various modifications, and some very important and most desirable improvements.

And then it goes on to state what is provided on the question of slavery, which I will omit in order not to encumber my speech, and then it says:

Such are the provisions of this Southern constitution, which we may accept as the ultimatum of the seceded States on the subject of slavery. Upon some other questions, however, there are certain stringent provisions in said constitution which it would be extremely difficult to persuade our Northern fishermen, manufacturers, and lobby corruptionists to swallow, even to re-establish the Union. These provisions include—

1. The absolute prohibition of all bounties from the Federal Treasury, and all duties or taxes on imported goods intended to promote or foster any branch of home industry.

Then it speaks of the prohibition of federal appropriations for internal improvements, the restriction by Congress of a majority vote to certain appropriations, the holding of contractors to the strict letter of their contracts, and the Post-Office Department to pay its own expenses, and then goes on to say:

These are excellent constitutional provisions. If they had been in force in Washington during the last ten years they would have prevented the wasteful squandering in swindling lobby jobs, contracts, etc., of three, four, or five hundred millions of public money and public property that have been squandered to the enriching of the lobby-jobbers, and the general demoralization of our Northern political parties and politicians to the lowest level of moral debasement and corruption.

The two classes of amendments indicated upon slavery and upon these other important subjects comprehend the peace offering of the seceded States to the border slave States, to the Government at Washington, and to the Northern States. They are radical propositions of change and reform. They inaugurate a revolution upon the questions involved, whether the final result shall be two confederacies or one.

Now, I beg attention to this:

We are free to say also that the invaluable reforms we have enumerated should be adopted by the United States with or without a reunion with the seceded States, and as soon as possible. But why not accept them with the propositions of the Confederate States on slavery as a basis of reunion? Practically to the North these slavery abstractions amount to nothing, while the reforms indicated are indispensable to the existence of our Government for any length of time, with or without the seceded States.

But, Mr. President, in further support of my proposition that the South in this war upon the labor system of the North had captured the Democratic party, I propose to read at length from another editorial article in the New York Herald of March 19, 1861, as I said before, then and now a Democratic free-trade paper. It is headed "The Two Tariffs, North and South:"

THE TWO TARIFFS, NORTH AND SOUTH.

We publish to-day the tariff recently adopted by the Northern Congress at Washington, and the one virtually agreed upon by the Southern Congress at Montgomery, both *in extenso*, and they present, we think, a fair contrast between the legislative capacity of these two bodies. It is impossible to deny to the Southern tariff an exemplification of statesmanship, enlightenment, wisdom, and a knowledge of governing a great and enterprising people which are wholly wanting in the other document.

The two measures, in fact, differ as much in spirit as the eighteenth and nineteenth centuries; they are as widely different as the legislation of the Mountain in revolutionary France, or the Puritan legislation of the old Commonwealth of England, and the legislation of these two countries at the present day, as any commercial man who understands the subject may see by comparing the one with the other.

The tariff of the Washington Congress—

Meaning the Morrill tariff—

is the most ignorant, useless, plundering, and pernicious enactment that ever was concocted for the avowed purpose of bettering the interests of the country. On the contrary, the tariff of the Montgomery congress—

Adopted, as we observed, under that provision of the constitution which prohibited the fostering of any branch of industry—

is a sound, practical, and intelligible measure, and as such it will command the admiration of the statesmen of England and France and all the commercial nations of Europe. They will discover from the comparison that the art of government is with the South and not with the North, and they will be guided by that conviction in their policy as regards the two sections.

For the last forty years a set of stockjobbers and speculators in the North, and especially in New York, New England, and Pennsylvania, have been using Congress on this question of tariff and revenue for their own benefit and for purely stockjobbing operations, just precisely as they operate in their corner gatherings in Wall street, and they have readily found such men as MORRILL, who represents some grogshop hole and corner interest in Vermont to do the business for them in Washington. The country has suffered many times from ill-judged tariffs got up to suit the stockjobbing and other individual interests, as, for example, from the tariff of 1828, which was settled in 1832, but not before it almost drove South Carolina into nullification and secession; and now that the negro agitation had driven intelligent and practical Southern members out of Congress, the abolitionists and stockjobbers got affairs into their own hands and we see the result in this most iniquitous measure, the Morrill tariff.

I think there is where the phrase "iniquitous measure," applied to the Morrill tariff, came from. I do not recollect that it was ever used before.

The combined effects of these two tariffs must be to desolate the entire North, to stop its importations, cripple its commerce, and turn its capital into another channel; for, although there is specie now lying idle in New York to the amount of nearly forty millions of dollars, and as much more in the other large cities, waiting for an opportunity of investment, it will soon be scattered all over the country wherever the most available means of using it are presented, and it will be lost to the trade of this city and the other Northern States. There is nothing to be predicted of the combination of results produced by the Northern and Southern tariffs, but general ruin to the commerce of the Northern confederacy. France and England, in view of these two measures, will find but little difficulty now in recognizing the independence of the Confederate States of the South. The statesmen of these nations care nothing for our eternal nigger question. Their own commercial interests abroad are all in all to them; and, indeed, upon the subject of negroes, both the American Governments stand now upon an equal footing, inasmuch as the Southern as well as the Northern constitution prohibits the African slave trade.

The tariff of the South opens its ports upon fair and equitable terms to the manufacturers of foreign countries which it were folly to suppose will not be eagerly availed of; while the stupid and suicidal tariff, just adopted by the Northern Congress, imposes excessive and almost prohibitory duties upon the same articles. Thus the combination of abolition fanatics and stock-jobbers in Washington has reduced the whole North to the verge of ruin, which nothing can avert unless the Administration recognizes the necessity of at once calling an extra session of Congress to repeal the Morrill tariff and enact such measures as may bring back the seceded States and reconstruct the Union upon terms of conciliation, justice, and right.

I have read this extract from the New York Herald, Mr. President, in proof, if any proof were needed, of my assertion that the thing in controversy between the South and the North was the question of free trade and protection, it being deemed necessary to have free trade in order to protect the Southern system of labor and protection in order to uphold and benefit the Northern system of labor.

Then came the struggle. Men were arrayed in arms. The Democratic party divided in 1860 in its national convention, but the South consolidated under its Southern wing. It was a conspiracy against Northern labor, I repeat, which made war upon the Union, and it was the Northern labor system which, in defending itself, preserved the Union intact. Wherever met the contending parties, there met these two antagonistic labor systems, and there met these two antagonistic revenue systems. Whoever had eyes to see might have read upon the bars of the Confederate flag, as it was seen in the smoke of battle, these words: "Slavery and free trade;" and whoever had eyes to see might have read between the stripes of the Union flag, these words: "Freedom and protection."

Those were the issues involved in that contest. We had a right to suppose that free trade surrendered at Appomattox, but it did not.

During reconstruction times the conspirators were silent, but they showed their hand again in 1876–'77. The South had then practically become solid. It had acquiesced in the abolition of slavery, it had acquiesced in striking off the visible fetters which had encircled the ankles and wrists of the slave, but it had not acquiesced in the idea of his emancipation from the industrial system of the South.

As soon as reconstruction was over and the excitement of the electoral count had subsided, they began anew their plottings to force free trade upon the country. The laborer was still despised, caste was still maintained, labor was still a badge of inferiority. From that day to this they have talked about a race issue in the South, but the only issue is the issue of labor. It is the question of whether the laborer shall be a man and have the rights of a man, to grow and develop, to be respected, and to take part in government. It is not because the man is black that he is not accorded his place in the government, his right to vote; it is because the South is determined to keep that labor system which was introduced when the ship with its cargo of slaves landed at Jamestown.

They have found two kinds of sympathizers at the North who agree with them in their free-trade "crusade." They are the *doctrinaires*, the professors of the colleges, who know nothing whatever of practical statesmanship, of practical business, or of practical political economy; and the spoilsmen of the North who seek, by adhesion to the free-trade fortunes of the solid South, to get office for their friends and to maintain themselves in a triumphant party. "Northern men with Southern principles."

The essentials of success now are the deception of the masses of Northern Democrats, for if you draw this line in Connecticut as you draw it here in the Senate, if you will avow in Connecticut as you avow here in the Senate that you are opposed to the principle of protection, Connecticut will vote 20,000 majority against the Democratic party. The laboringmen of Connecticut understand the benefits of protection. It is only when they are deceived by the pretense that it is not free trade which is aimed at by the Democratic party, that they stand by that party.

To return to history, and recent history at that. In the Congress which met in October, 1877, in extra session, towards the close of the session there was an overt act of the conspiracy well to be remembered. The present author, sponsor, and father of the House tariff bill of this session, Mr. MILLS, of Texas, on the 1st day of December, 1877, asked for a suspension of the rules of the House to enable him to submit the following resolution for passage:

Resolved, That the Committee on Ways and Means be instructed to so revise the tariff as to make it purely and solely a tariff for revenue and not for protecting one class of citizens by plundering another.

And yet he is making speeches up in Connecticut in this campaign in defense of the "Mills bill," in which by indirection he denies that he is a free-trader. He is endeavoring to secure votes in Connecticut

to help elect Grover Cleveland by making the laboringmen of Connecticut, who believe in protection, think that he does not intend to destroy it and has not endeavored to destroy it in the bill which he has passed through the House of Representatives.

In 1878, at the next session of the same Congress, came the Wood tariff bill, a bill which the late lamented President of the United States, James A. Garfield, denominated a "horrible monster." It was a Democratic measure in that House. It did not receive the support of all the Democratic members. The enacting clause was struck out by a vote of 134 to 120, 18 Democrats voting with the Republicans to strike out the enacting clause—18 protection Democrats in 1878 in the House of Representatives. All honor to them!

That proposition gave us the Forty-seventh Congress, during which we passed the tariff-revision act of 1883, after which came one of the saddest incidents in the history of American politics. It became necessary as a part of this conspiracy to ostracize, crush, and destroy SAMUEL J. RANDALL, who stood with the protectionists. He had been elected Speaker at the second session of the Forty-fourth Congress on the death of Mr. Kerr, and also Speaker of the Forty-fifth and Forty-sixth Congresses.

In the Forty-seventh Congress he was the head of the minority of the Ways and Means Committee. That entitled him, if the Democrats again obtained control of the House, to go to the head of the committee as its chairman. In the Forty-eighth Congress there came the question of who should be elected Speaker. Mr. RANDALL was a protectionist; Mr. CARLISLE was a free-trader. The result might have been foreseen when the Democratic party was in control of the House. A protectionist can no more be elected Speaker of the House of Representatives when the Democratic party has control of the House than he can be translated to heaven; and just as long as the Democratic party controls the House of Representatives, just so long there will be a free-trade Democrat in the Chair to control the organization of the committees and to recognize whomever he pleases to move for the consideration of bills in the House. The Northern protection Democrats supported Mr. RANDALL; but there were not enough of them.

Mr. CARLISLE became Speaker, and he was re-elected in the Forty-ninth and the Fiftieth Congress, when this unique spectacle was presented—the necessities of the free-trade conspirators requiring it—the election of a Speaker whose seat was contested, and whom every laboring man in this country at that time believed from the bottom of his heart was never elected to this Congress.

How did Mr. CARLISLE, the Speaker, constitute his Committee on Ways and Means? When first elected, all the rule of the House required that Mr. RANDALL, a protectionist, should be made the chairman of that committee if he desired it. It had been given out that he did not desire it, that he desired the chairmanship of the Committee on Appropriations, but no one who has read the doings of those times but knows that he was left off from the Committee on Ways and Means and was not permitted to be its chairman because it was understood that he was to some extent a protection Democrat.

How was that committee constituted? Five Southern and two Northern free-traders, together with Abram S. Hewitt, who, I think I do no injustice in saying, was either a protectionist or a free-trader according to his idea of individual revenue, constituted the majority of that committee. Four Republican protectionists were put upon it. There were eight Democrats, not one of whom, unless it was Abram S. Hewitt, could be supposed to be a protectionist, and there were four Northern Republican protectionists put upon that committee. The Democratic members were Morrison, chairman; Mills, of Texas; Blount, of Georgia; Blackburn, of Kentucky; Herbert, of Alabama; Jones, of Arkansas; Hewitt, of New York, and Hurd, of Ohio; and the Republicans were Kelley, of Pennsylvania; Kasson, of Iowa; Hiscock, of New York, and Russell, of Massachusetts. That committee gave the House what was known as the "horizontal reduction bill," voted upon April 15, 1884. The first test vote was on consideration. The objection to consideration was made by William W. Eaton, of Connecticut, who was to some extent a Democratic protectionist. The vote was for consideration 140 to 138 against. It was carried by two majority. Mr. RANDALL and thirty-eight Democrats with him voted "nay."

Then Mr. Converse, of Ohio, moved to strike out the enacting clause. That was carried by 159 to 155, Mr. RANDALL and 37 Democrats with him voting "yea" to strike out the enacting clause. That was in 1884.

In the fall of that year Mr. RANDALL was pressed into the service of the Democratic party to go on the stump, as was Mr. Eaton. They were both in Connecticut, saying, "We are protectionists, we are as good protectionists as any Republicans, and we are Democrats, and you can safely elect Grover Cleveland; you can trust us to prevent the free-trade portion of the Democrats from passing any free-trade bill through the House of Representatives;" and those professions elected Grover Cleveland—I do not call them professions—those statements elected Grover Cleveland.

I have not heard that Mr. RANDALL, or Mr. Converse, or Mr. Eaton is on the stump this year asking Democratic protection laboringmen to vote for Grover Cleveland. Indeed, from the best of my information and belief, I state that they are at present indulging in a good deal of silent meditation upon the compound ingratitude of Grover Cleveland and the Democratic party.

The platform of 1884 was made to appear a straddle. It became necessary now, in the effort to destroy Mr. RANDALL, to more fully capture the President of the United States and win him over to the plan of the free-trade conspirators. As long as Mr. RANDALL was a power in the House of Representatives there was no chance to pass a free-trade bill through that House.

I will not speak of the constitution of subsequent committees until I come to the committees of the Fiftieth Congress.

After the defeat of the Morrison horizontal bill there came the Morrison bill of 1886, which was very much like the Mills bill of 1888. It set out, if I remember, to put coal and iron ore and a variety of things of that sort upon the free-list. They found they had to abandon it in order to get votes to pass it. The result was to put wool and lumber on the free-list and a reduction of duties all along the protected articles. On the question of the consideration of that bill the yeas were 140, nays 157. Mr. RANDALL and 34 Democrats voting "nay." As I said a moment ago, the conspiracy halted. It had come against an obstacle which must be removed. That obstacle was SAMUEL J. RANDALL and his little faithful band of protection Democrats in the House of Representatives standing by him. Only RANDALL and his protection adherents were judged to prevent this cheap, ignorant labor system of the South from overthrowing the labor system of the North. It became necessary to win the President over to the plan of this conspiracy. He was won over, and the bait with which he was captured was the promise of a renomination, which he had pledged himself not to accept. The message which he had prepared for the information of Congress upon the state of the Union was thrown to the waste-basket and a message which gave what information he had on the subject of revenue reform and protection and free trade and unjust taxation and surplus was sent to Congress with the promise that possibly we might have something after that time, a promise which has not been fulfilled.

Mr. CARLISLE constituted his committee after that message was sent. No Northern man at the head of it any more, as Fernando Wood and William R. Morrison had been. A Northern free-trader would not do, and the ranking members on that committee are MILLS of Texas, MCMILLIN of Tennessee, BRECKINRIDGE of Arkansas, BRECKINRIDGE of Kentucky, TURNER of Georgia, and WILSON of West Virginia. The first five are from States where this cheap, ignorant labor is deemed essential for prosperity. Out of two billions of dollars, in round numbers, produced by the protected industries of this country, the States from which these six ranking members of that committee come, as has been shown to the Senate, produce only $56,000,000 annually. There was no representative from the great State of New York, to say nothing of New England.

I shall never expect a chairman of any important committee from New England while the Democrats have control of the other House. This seems to be as in olden times a raid on New England. We have it thrown in our faces here that protection is a New England theory; that it is for the benefit of New England, and against all the rest of the States. I want to tell those Senators who indulge in that talk that they are mistaken; that the line which separates New England from New York is obliterated; that the center of manufacturing in this country is west of the Alleghany Mountains, and that their taunt of manufacturers will be felt not so particularly in New England as in some other States of the Union.

Mr. RANDALL had power in Pennsylvania in the Democratic party. The control of the State Democratic Committee of Pennsylvania was favorable to Mr. RANDALL. A majority of its members were his friends. Mr. Saunders, a personal and political friend, was its chairman. The edict went forth that Mr. RANDALL had to be stripped of power in his own State. It was necessary to degrade him or the free-trade conspiracy could not prevail, and the President's "next friend" was deputed to destroy Mr. RANDALL'S influence with that committee. Mr. WILLIAM L. SCOTT, by means which, if the secret history of the transaction were written, would shock even the sensibilities of the Democratic party, persuaded the friends of Mr. RANDALL on that committee to depose Mr. Saunders from its chairmanship and to appoint Mr. Kisner as its chairman. What then occurred? Every follower of SAMUEL J. RANDALL in the House of Representatives was given to understand that the price of Presidential favor was a vote for the Mills bill. It was openly proclaimed that "for every SOWDEN there should be an Allentown."

Talk of iniquitous taxation! Look at this iniquitous Administration. The Mills bill was concocted by conspirators in the dark. It was caucused upon and made an administration measure. Votes were purchased for it by yielding partial protection to articles from which protection had been wholly withdrawn if it was necessary to do so in order to secure such votes. Men who had been elected by protection constituencies were cajoled, coaxed, threatened, and driven into its support by this Administration.

The vote was taken. Four Democrats only stood with SAMUEL J. RANDALL. Four only "faithful found among the faithless." Mr. SOWDEN was beaten for a renomination in his district by the influence exercised by the next friend of the Administration upon his constituency. Mr. HOGG, of West Virginia, paired with Mr. RANDALL, then stretched upon a bed of sickness, which it was feared might prove a bed of death. From that bed he wrote to Mr. HOGG, a friend

of the Mills bill, asking him to pair with him on that measure, and Mr. HOGG did so. Influences from the city of Washington defeated Mr. HOGG for a renomination in his district for that act.

Four Democrats only stood with SAMUEL J. RANDALL. The time which Republicans predicted had come: the time when Mr. RANDALL could no longer prevent the passage of a free-trade bill by the House of Representatives. Protection was vanquished and destroyed in the Democratic party the day that the Mills bill passed the House of Representatives.

Could political malignity go further than it has gone in the persecution of that honest friend of intelligent and enlightened labor? I said it was the saddest picture in American politics. The hounding of SAMUEL J. RANDALL to his political and almost to actual death presents the most shocking picture in American politics except that other companion picture, the ruin and death of John Roach, compassed by the Democratic Secretary of the Navy because he was a protectionist and a Republican.

Where do we stand, Mr. President? What is now essential to the complete triumph of these conspirators, to the complete passage of such a free-trade measure as has been sent to us from the House of Representatives? I have already stated what was considered essential, namely, the re-election of Grover Cleveland and the election of Allen G. Thurman to occupy that chair which, Mr. President, you now occupy, give the casting vote in the Senate to the passage of a bill in which the moderation of the present House bill spoken of by the President in his letter of acceptance will be discarded, and the purpose of the conspiracy will be, if possible, more completely incorporated.

There is one other thing that is essential to it, and that is to again deceive the laboringmen of the North who are in the Democratic party. That process is going on, or the attempt is made to secure that result. To this end the President says he is not engaged in a "free-trade crusade." To this end the free-traders on the Ways and Means Committee are trying to make Democratic workingmen believe them to be their best friends. The free-trade war-paint has been washed off as much as possible since the Oregon and Maine elections by these free-traders. It is about as difficult now to find a free-trader as it was for Diogenes to find an honest man in Athens although he hunted in daylight for him with a lantern.

Where are the members of the Ways and Means Committee? They are not in the House of Representatives, but, representing a labor system and a civilization which has neither a just conception of labor nor a respect for laborers, they are perambulating the North to try to make citizen laborers believe that they are their best champions. Since the day when Jacob put on his goat-skin mittens and stole away the birthright of Esau there has been no such imposture attempted. This masquerade in which free-traders promenade in protection costume, in which Democratic monopolists affect the workingman's blouse and carry the workingman's tin-can, is very striking and very suggestive. Like the Apostle Paul, they have determined to become all things to all men in the hope that thereby they may be able to gain some.

A feature of this system of deception, early resorted to, was the pretended antipathy and objection of the Democrats in Congress to what are known as trusts. We heard long and loud declamations here against trusts and upon the duty of Congress to prohibit and to punish all those engaged in them. Has any bill come to us from the House of Representatives dealing with trusts and combinations and syndicates? No. Since it has been ascertained that the gentleman whom the Senator from Tennessee yesterday denominated as a "Corsair" is for Grover Cleveland, and since it has been understood that the great sugar trust is a Democratic institution and is contributing liberally and munificently to the Democratic national campaign committee, and since it is understood that Jay Gould and the members of the National Democratic Committee are among the great railroad monopolists of this country and are all supporting Grover Cleveland and aiding his election, the war against trusts by the Democratic party has degenerated into a paper war. We hear nothing more about it. We shall hear nothing more about it except on the stump, where Democratic protection laboringmen will be told that the Republicans are the monopolists, and that all these trusts are the result of Republican combination and the terrible protective tariff!

Mr. President, many things which I had intended to say must be omitted on account of time. Although I had intended to speak of the necessity of protection to the laborer of this country, of the relation of protection to all that he holds dear in life, I am content to leave what I have to say upon the simple historical statement of this conspiracy. I tell the men who are engaged in it that they will not delude the Democratic laborer of the North. He loves his party, but he loves his country better. He loves the Democratic party, but he loves republican citizenship better. He will follow his party a long way, but into free trade never.

You are making the mistake now which you made in 1860–'61. When you had captured the Democratic party you counted upon the allegiance of the Northern Democratic laborer to that party to stand by and defend you in your supreme effort to force free trade upon this country, or to secede and set up a confederacy of which it should be the corner-stone. You counted without your host. The Democratic laborer of the North was true to his country then, was true to his labor system then, was true to his republicanism then; he enlisted in the army of National defenders. He went side by side with the Republican laborer to defend the system which had made him all he was, and by which alone he hoped for future progress and advancement. You will be disappointed now. He will not follow the Democratic party into free trade. He will stand by protection. He will defeat Grover Cleveland's re-election.

Mr. CHACE proceeded to address the Senate. [For the speech complete see the succeeding day's proceedings.] Having spoken for some time,

Mr. HOAR said: I should like to inquire of the Senator from Rhode Island if he desires to finish his speech to-night. It is getting very dark, and it is late.

Mr. CHACE. I find my throat getting somewhat sore, and if Senators will indulge me, I should prefer to conclude my remarks in the morning.

Mr. HOAR. With the leave of the Senator from Rhode Island, I move that the Senate do now adjourn.

The motion was agreed to; and (at 4 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Friday, October 12, 1888, at 12 o'clock m.

SENATE.

FRIDAY, *October* 12, 1888.

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. WILSON, of Iowa, presented a petition of the Grand Army of the Republic, Department of Iowa, at Des Moines, Iowa, praying that an appropriation of $200,000 be made to furnish the number of headstones for marking the graves of Union soldiers that will be required to fill the requisitions of the coming year; which was referred to the Committee on Appropriations.

REPORTS OF COMMITTEES.

Mr. DAVIS, from the Committee on Pensions, to whom was referred the bill (S. 1311) granting an increase of pension to Samuel J. Murphy, of Marengo, Iowa, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported adversely thereon; and they were postponed indefinitely:

A bill (S. 863) granting an increase of pension to Samuel J. Murphy, of Marengo, Iowa; and

A bill (S. 2035) granting an increase of pension to Samuel J. Murphy, of Marengo, Iowa.

Mr. WALTHALL (for Mr. HAWLEY), from the Committee on Military Affairs, to whom was referred the bill (S. 1455) for the relief of Mark Tomlinson, reported it with an amendment, and submitted a report thereon.

CONDITION OF THE CIVIL SERVICE.

Mr. MANDERSON. I am directed by the Committee on Printing to report back favorably with amendments the resolution for printing the report of the Select Committee to Investigate the Operations of the Civil Service. I ask for its present consideration.

The PRESIDENT *pro tempore*. The resolution will be read.

The Secretary read the resolution submitted by Mr. HALE October 11, 1888, as follows:

Resolved by the Senate, That there be printed 10,000 copies of the report of the Select Committee to Investigate the Operations of the Civil Service, and 1,000 copies of the report and testimony, one-half for the use of the committee and one-half for the Senate.

The PRESIDENT *pro tempore*. The amendments of the committee will be stated.

The SECRETARY. The Committee on Printing report to amend the resolution so as to make it read:

That there be printed 12,000 additional copies of the report of the Select Committee to Investigate the Operations of the Civil Service, and 500 additional copies of the report and testimony, one-half for the use of the committee and one-half for the Senate.

Mr. MANDERSON. The resolution is amended in order to bring it within the rule as to the cost not exceeding $500. Twelve thousand copies can be printed of the report and 500 of the report and the testimony.

The amendments were agreed to.

The resolution as amended was agreed to.

ANIMAL INDUSTRY REPORT.

Mr. MANDERSON, from the Committee on Printing, to whom was referred the concurrent resolution submitted by himself October 4, 1888, reported it without amendment, and it was considered, by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring therein), That there be printed 50,000 copies of the fourth annual report of the Bureau of Animal Industry, for the year 1887, of which 13,000 copies shall be for the use of the mem-

bers of the Senate, 27,000 copies for the use of members of the House of Representatives, and 10,000 copies for the use of the Commissioner of Agriculture; the illustrations to be executed under the supervision of the Public Printer, in accordance with the directions of the Joint Committee on Printing, the work to be subject to the approval of the Commissioner of Agriculture.

NAVAL ASTRONOMICAL OBSERVATIONS.

Mr. MANDERSON, from the Committee on Printing, to whom was referred the following concurrent resolution, submitted by himself October 4, 1888, reported it without amendment, and it was considered by unanimout consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That the annual volumes of the astronomical observations of the Naval Observatory for 1886, 1887 and 1888 be printed, and that 1,800 additional copies of each report be printed, of which 300 copies shall be for the use of the Senate, 700 copies for the use of the House of Representatives, and 800 copies for the use of the Navy Department.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the Speaker had appointed Mr. PENINGTON in the place of Mr. O'NEALL, of Indiana, as one of the managers on the part of the House on the bill (H. R. 6514) for the allowance of certain claims reported by the accounting officers of the United States Treasury Department.

The message also announced that the House had passed the bill (S. 2802) to fix the number of unbound and bound Journals of the Senate and House of Representatives, and to provide for their distribution.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6514) making appropriations for certain claims reported by the accounting officers of the Treasury Department.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President *pro tempore:*

A bill (H. R. 4601) to amend the naval record of Nickolas Leuschen, Peter Leuschen, and Loth Possum;

A bill (H. R. 9447) to restore certain money to the fund for erecting a public building at the city of Detroit; and

A bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

BILLS INTRODUCED.

Mr. PLATT introduced a bill (S. 3630) granting increase of pension to William H. Dougal; which was read twice by its title, and referred to the Committee on Pensions.

Mr. HOAR (by request) introduced a bill (S. 3631) increasing the pensions of certain disabled veterans of the United States Navy; which was read twice by its title, and referred to the Committee on Pensions.

Mr. HAWLEY introduced a bill (S. 3632) for the relief of Mrs. Fannie Moore, widow of Maj. Gen. Marshall Frank Moore; which was read twice by its title, and referred to the Committee on Pensions.

MINERAL CLAIMS.

Mr. MITCHELL submitted the following resolution; which was considered by unanimous consent, and agreed to:

Whereas it is alleged the current uncontested business relating to the application for patents to mineral claims in the mineral division of the General Land Office is in arrears about thirty-three months: Therefore,

Resolved, That the Committee on Mines and Mining be, and are hereby, instructed to inquire into the cause of such arrears in such current business, and what legislation, if any, is necessary to correct the evil, and report at the next session of the present Congress.

FOURTH OF JULY CLAIMS.

Mr. SPOONER. I ask the Chair to lay before the Senate the action of the House of Representatives on House bill 6514.

The PRESIDENT *pro tempore*. The resolution of the House of Representatives will be read.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *October* 12, 1888.

Resolved, That the House concur in the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6514) for the allowance of certain claims reported by the accounting officers of the United States Treasury.

Mr. SPOONER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6514) making appropriations for certain claims reported by the accounting officers of the Treasury Department, having met, after full and free conference have agreed to the amendments made by the Senate, and do recommend to their respective Houses the bill as amended.

JNO. C. SPOONER,
GEO. F. HOAR,
JAMES K. JONES,
Managers on the part of the Senate.
W. J. STONE,
J. B. PENINGTON,
G. W. CROUSE,
Managers on the part of the House.

The PRESIDENT *pro tempore*. The question is on concurring in the report of the committee of conference.

The report was concurred in.

MARINE-HOSPITAL SERVICE.

Mr. DOLPH. The bill (S. 1786) to regulate appointments in the Marine-Hospital Service of the United States passed the other House with an amendment. The bill and amendment were referred to the Committee on Commerce and reported back by the Senator from Illinois [Mr. CULLOM], with a request for a conference. Some one suggested that it be placed on the Calendar. I wish to have a conference appointed. I think the Senate has already disagreed to the amendment.

The PRESIDENT *pro tempore*. The report of the Committee on Commerce was a recommendation that the Senate disagree to the amendment of the House of Representatives, and ask for a conference thereon. No action was taken and the bill went on the Calendar. If there be no objection, the recommendation of the committee will be agreed to. It is so ordered.

By unanimous consent, the President *pro tempore* was authorized to appoint the conferees on the part of the Senate; and Mr. DOLPH, Mr. SAWYER, and Mr. COCKRELL were appointed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the following resolutions; in which it requested the concurrence of the Senate:

A resolution for the printing of the report of the Director of the Mint on the production of the precious metals in the United States for the year 1887 and 9,000 extra copies; and

A resolution for the printing of 5,000 copies each, in cloth binding, of the first and second annual reports of the Commissioner of Labor, for the use of the Department of Labor.

The message also announced that the House had appointed Mr. WHEELER, and Mr. HENDERSON of Iowa managers of the conference on the part of the House on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasonton with the rank and grade of colonel, instead of Mr. TOWNSHEND and Mr. GEAR.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes; and it was thereupon signed by the President *pro tempore*.

IMPROVEMENT OF WILLAMETTE RIVER.

Mr. DOLPH submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of War be directed to furnish the Senate as soon as practicable an estimate of the cost of the improvement of the Willamette River between Portland and Oswego, in Oregon, by the removal of bars and deepening the channel so as to admit of the navigation of the same by deep-draught vessels.

TESTIMONY IN LA ABRA SILVER MINING CLAIM.

Mr. MORGAN. I offer the following resolution, and ask for its present consideration:

Resolved, That in the taking of testimony in the matter of the claim known as the claim of La Abra Silver Mining Company before a subcommittee of the Committee on Foreign Relations, the depositions of witnesses who are physically unable to attend the meetings of the subcommittee or who live at so great a distance from Washington that their attendance would be unduly expensive to the Government may be taken when it is so ordered by such subcommittee.

Such depositions may be taken under oath before a notary public to be named by order of said committee, and may be certified under his official seal.

The examination of such witnesses shall be upon interrogatories in writing, propounded by the subcommittee or by either of the parties in interest, lodged with the clerk of the committee. And the counsel for the claimants and counsel opposing the claim shall be allowed ten days from the date of the service of copies of such interrogatories upon them to propound additional questions to such witnesses, and the testimony so taken shall be received and reported by such subcommittee in the same manner as if said witnesses had been in attendance and had testified before them, and subject to the same exceptions and obligations.

The PRESIDING OFFICER (Mr. PASCO in the chair). Does the Senator from Alabama ask for the immediate consideration of the resolution?

Mr. MORGAN. Yes, sir.

Mr. HALE. I do not rise to object to the resolution but I did not catch the committee to which it refers.

Mr. MORGAN. The Committee on Foreign Relations.

The resolution was considered by unanimous consent, and agreed to.

COMMITTEE ON ADDITIONAL LIBRARY ACCOMMODATIONS.

Mr. COCKRELL. I asked the other day that the resolution reported, I believe, by the chairman of the Committee on Contingent Expenses in regard to the Senate Select Commiteee on Additional Accommodations for the Library of Congress might be laid over. I have since looked at it, and the Senate can take it up and act upon it; it will take but a moment.

The PRESIDING OFFICER. Does the Senator ask to have the resolution taken up now?

Mr. COCKRELL. The Senator who reported it is absent, and I ask that it be now taken up. He wanted it considered at the time when it was reported, and asked that it might be adopted. I intended to call it up early this morning. Let it be acted on now.

The PRESIDING OFFICER. The resolution will be read.

The Secretary read as follows:

Resolved, That the Select Committee on Additional Accommodations for the Library of Congress be, and it is hereby, authorized to sit during the coming recess of Congress, and any necessary expenses shall be paid out of the contingent fund of the Senate, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution was considered by unanimous consent, and agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasonton with the rank and grade of colonel.

ALFRED PLEASONTON.

Mr. COCKRELL submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate on the bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasonton with the grade and rank of colonel having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate and agree to the same.

C. K. DAVIS,
F. M. COCKRELL,
Managers on the part of the Senate.
CHAS. E. HOOKER,
D. B. HENDERSON,
JOS. WHEELER,
Managers on the part of the House.

The PRESIDING OFFICER. The report requires no action on the part of the Senate.

THE REVENUE LAWS.

The PRESIDENT *pro tempore*. Is there further morning business? If there be none, that order is closed, and the Calendar under Rule VIII is in order.

Mr. CHACE. I move that the Senate proceed to the consideration of the House bill 9051, the unfinished business.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. CHACE. Mr. President, I hold in my hand a book entitled The Campaign Text-Book of the Democratic Party of the United States for the Presidential Election of 1888. On page 304 of that book, chapter 25, I find a very extended reference to the claim of what has been accomplished by Democratic administration of the Post-Office. In italicised heading to the chapter I find the following:

The railway mail, the star-route, and the steam-boat branches all show increased efficiency and extraordinary expansion. Decline in the number of depredations and defaulters among postmasters and other postal employés.

Further on they claim—

Expedition and accuracy have reached a degree of progress never before attained. The standard of competency of all employés is higher than ever before, and the complaints of the service are fewer than ever before.

Having served during this Congress as a member of the Committee on Post-Offices and Post-Roads, and also as a member of the Special Committee to Investigate the Administration of the Civil Service by the present Administration, I think I am qualified to judge and to discuss the merits and the truthfulness of this claim. It strikes me as the most monstrous assumption that has ever come to my notice.

In regard to their claim that there has been less complaint, Senators will remember that the Senator from Kansas [Mr. PLUMB] and others some three months ago had read at the Clerk's desk a large number of extracts from Democratic newspapers in different parts of the country, particularly in the West and South, but also some from the East, making most strenuous complaints of the inefficiency of the administration of the postal and railway mail service of the country.

I shall not detain the Senate by rereading these newspaper extracts, but with the consent of the Senate print them with my remarks in order that they may show whether it is true that there have been any complaints made of deficiency in the postal service.

The postal service comes nearer to the people than any other branch of the Government. It visits every fireside in the land, and ministers to the social and business concerns of every citizen. The manner in which it is conducted for the time being readily impresses itself upon the people, and furnishes them with a criterion by which to a great extent they judge the capacity of the Government for dealing with public affairs. Recitals from the history of the service never fail to awaken public interest.

DEMOCRATIC ADMINISTRATION FROM 1853 TO 1861.

Upon the advent of the Republican party to power in 1861, after eight years of Democratic administration under Pierce and Buchanan, the postal service was in a wretchedly demoralized condition. Its facilities were meager and unsuited to the public wants; its machinery was inadequate, cumbersome, and inefficient. Official delinquencies were of constant occurrence, and the postal revenues were squandered with reckless prodigality. State laws claiming the right to examine and suppress the mails were sustained by Federal authority, and the Postmaster-General in 1859 not only permitted but instructed a postmaster within sight of the National Capitol to destroy newspapers and pamphlets arriving in the mails which were distasteful to the political sentiments of the community.

Though the rates of postage were high, nearly one-half of the postal expenditures were paid out of the general Treasury, and the deficiency in the postal revenue was constantly and rapidly growing. The departmental reports contained no suggestions for the improvement of the service, and the statute-books were left almost barren of postal legislation. The rates of postage on all classes of matter in 1861 were substantially the same as in 1851, when letter postage was reduced to 3 cents under the Whig administration of President Fillmore. Cheaper postages were not favored, but on the contrary there was a clamor from the Department for a return to higher rates. In his report for 1854 the Democratic Postmaster-General recommended a large increase in the charges for newspapers.

In 1856 he said it was—

fair to conclude that low rates of postage have ceased to stimulate the correspondence of the country.

In the report for 1858 he felt—

bound to say that the last reduction [of letter postage] below 5 cents, and the discount allowed on the greatly reduced rates on printed matter, have greatly curtailed the usefulness of the Department.

And he—

respectfully submitted to the superior wisdom of Congress whether one uniform rate of 5 cents for all distances would not enlarge the usefulness of the Department, diminish, if it did not entirely prevent, such heavy drafts upon the Treasury, and best promote the interests and convenience of the people.

The inefficiency of the service and the abuses to which it had been subjected were eloquently attested by the departmental reports. In 1859 the Democratic Postmaster-General made the following statement:

The expense attending the distribution of letters, even where honestly performed and the legitimate and proper commissions only charged, abstracts no inconsiderable sums from the postal revenues, and this is much swollen by the second and third process of the kind to which they are exposed, often by necessity, sometimes by accident and ignorance, and more frequently, it is feared, by design. * * * For the year ending June 30, 1859, the excess [of expenditures over receipts] amounted to $6,996,009.26. This unfortunate condition of things has involved the Department in imputations of extravagance as disparaging as they have been undeserved. Its present embarrassments which have so crippled its efficiency and clouded its reputation are not the fruit of its own voluntary action. * * * Without entering into the details of the delinquencies and depredations alleged to have occurred in connection with the postal service during the past year, it may suffice to state that its moral aspects are still unsatisfactory.

In concluding the report, the Postmaster-General says of the condition of the postal service:

The country has constantly manifested the most intense solicitude for the preservation of its purity and the prosperity of its administration, and it can not now be disguised that the guilty abuses of its administrations and the reckless waste of its hard-earned revenues, connected with the humiliations to which it has in consequence been exposed, have deeply and sadly impressed the public mind.

While admitting the faults of the Government, the Postmaster-General was disposed to lay a part of the blame to the public when he said:

If embarrassments ensue, it is but proper that they should fall upon those by whose willful or heedless conduct they have been superinduced. Ignorance so defiant at all attempts at its enlightenment, or indifference so insensible alike to duty and to interest, may well be permitted to suffer annoyance and even loss without even exciting any serious concern. Were the duty of the public in reference to its correspondence as faithfully performed as is that of the Post-Office Department, much of the complaint now heard of its irregularity and mismanagement would cease.

REPUBLICAN ADMINISTRATION, 1861 TO 1885.

A great civil war—the legacy of the Democratic party—did not furnish an auspicious period in which to inaugurate reforms in the methods of administering the Government. Nevertheless, the work of regeneration was not delayed, and the brilliant career of the postal service from 1861 to 1885 resulted with other great achievements from the patriotic, enlightened, and progressive spirit of the Republican party. The supremacy of the National over State authority in the control of the mails was immediately asserted and firmly established after four years of bloody war, and a repetition to-day by the Postmaster-General of the edict of his predecessor in 1859 would raise a storm of popular indignation that would drive him out of office within twenty-four hours.

Letters to soldiers were forwarded without prepayment of postage, and special provision was made for sending them clothing and other articles at low rates of postage. The mail-carrier visited every camp and followed upon every march.

The machinery for conducting the postal service was improved in all its details, and new facilities were introduced to increase its usefulness. It will be necessary to mention only the four great features of the postal service, features which specially distinguish it to-day: the registry, the free-delivery, the money-order, and the railway-mail systems.

The registry system was first put into operation in 1855. The receipts from this source had fallen from $31,000 in 1856 to $25,000 in 1860. In

the latter year the discontinuance of the system was recommended by the Democratic Postmaster-General for the reason—

That correspondents have become convinced that in registering their valuable letters they have been but holding a light for the depredator, instead of darkening his way or embarrassing him in the commission of his crime.

Fortunately the recommendation was not carried out, but instead the system was, a few years subsequently, under Republican administration, put upon a new and secure footing, and in 1885 it yielded a revenue of about $1,000,000. In 1885 the Treasury Department alone committed to the registered mails about $500,000,000 in currency, bonds, etc., not a dollar of which was lost. In 1878 the privileges of the registry system previously confined to letters were extended to all classes of mail-matter.

The free-delivery or letter-carrier system was introduced in 1863 under a Republican administration. In 1885 it was in operation in 178 cities with over 4,000 carriers, who handled nearly 1,750,000,000 pieces of mail-matter.

The money-order system, also a Republican improvement, was introduced in 1864. In 1885 it was in operation at more than 7,000 offices, which issued about 8,000,000 orders, amounting to nearly $125,000,000.

But the great innovation was the railway-mail service, which was inaugurated in 1864. By this system mail-matter is kept in continuous transit without going into post-offices for distribution, thus greatly facilitating the dispatch of matter and economizing the cost of handling it. In 1885 the system was in use on nearly 110,000 miles of railroad, over 4,000 clerks were employed, and they handled about 5,000,000,000 pieces of mail-matter. The "Fast Mails" probably had never even been dreamed of by a Democratic administration prior to 1861.

The methods of collecting and disbursing the postal revenues were radically changed, leading to greater simplicity, certainty, and security. Out of a total of nearly $400,000,000 collected for the seven years prior to 1885 at about 50,000 post-offices, less than $30,000, or say one dollar out of every ten thousand, was lost to the Government—a record that no private or corporate business establishment in the world can boast of. In 1860 the Government lost $170,947.67 by the defalcation of a single postmaster, Isaac V. Fowler, the Democratic postmaster at New York City, and not a single penny was ever recovered.

The great improvements in the service were attended by frequent and important reductions in the rates of postage and a greater liberality in the treatment of mail-matter. The extra charges for long distances were abolished in 1863, and uniform rates were established for all distances. In 1866 provision was made for forwarding letters without additional postage from one post-office to another at the request of the party addressed; also for the return to the writers free of charge of undelivered letters bearing a request to return. At the same time the charge for returning letters from the Dead-Letter Office and the penalty of double postage on partially prepaid letters were abolished.

In 1874 the postal-card was introduced, permitting a written message to be sent at a charge of 1 cent. The number of cards grew from about one hundred million the first year to nearly four hundred million in 1883. By the act of March 3, 1883, letter-postage was reduced from 3 cents to 2 cents per one-half ounce, and this was shortly followed by a reduction of 2 cents for a full ounce under the act of Congress of March 3, 1885, signed by President Arthur on the last day of Republican administration. The postage on an ounce of written matter sent from New York to San Francisco was 20 cents in 1861; in 1885 it was only 2 cents. Letters to foreign countries came in for a full share of the reductions. Postal-union arrangements were made fixing uniform rates, and the charge of 5 cents in 1885 was less than one-sixth of the average rates in 1861.

On newspapers and periodicals sent by publishers to subscribers the charges in 1861 were regulated by weight, distance, and frequency of issue, and they were collected of the subscriber. In 1863 the charges were reduced and made uniform for all distances. In 1874 the rates were fixed at 2 cents per pound for newspapers and 3 cents per pound for periodicals, to be paid by the publishers instead of by the subscribers. In 1878 the rate on periodicals was reduced to 2 cents a pound. By the Republican act of March 3, 1885, the charge on newspapers and periodicals was reduced from 2 cents to 1 cent per pound. This rate is less than one-sixth of the average charge in 1861 for like quantities of matter. On newspapers sent by others than publishers and news agents the charge since 1884 has been 1 cent for each 4 ounces. In 1861 under Democratic administration it was 1 cent for each ounce.

In 1861 the postage on books was 1 cent an ounce for 3,000 miles, and 2 cents an ounce for greater distances. In 1885 it was 1 cent for 2 ounces to all distances. In 1861 corrected proof-sheets and manuscript copy of the same passing between author and publisher were subject to letter postage; since 1863 they have been sent at printed rates, the charge in 1885 being 1 cent for each 2 ounces. In 1861 many articles, such as hand-bills, posters, lithographs, engravings, photographic views, etc., were also charged at letter rates. The present charge for all this matter is 1 cent for each 2 ounces. Much new matter was admitted to the mails. Provision was made for carrying unsealed parcels containing articles of every conceivable description not above 4 pounds in weight at a charge of 1 cent an ounce. The wide extension of postal facilities and the important reductions in the rates of postage from 1861 to 1885, though designed for the public benefit rather than to profit the postal revenue, were attended by the most excellent financial results, abundantly vindicating the liberal and progressive policy by which they had been prompted. All these improvements were by Republican administrations.

The immediate effect of the reduction of letter postage in 1851 was to leave a deficiency of revenue that was equal to nearly one-fourth of the amount of the postal expenditures. Instead of diminishing, the deficency continued on an ascending scale until 1861, when, as already stated, nearly one-half of the expenditures were paid out of the general Treasury. The suspension of mail service in the Southern States in 1861 removed a large share of the burden, so that in 1865 there was a small excess of receipts over expenditures. The restoration of mail facilities in the South at the close of the war again left the postal service with a deficiency of revenue, more than one-third of the expenditures in 1868 having been supplied from the Treasury. From this time the receipts gained steadily upon the expenditures, and in 1882 the postal service yielded a surplus of over $1,000,000. The reduction of letter postage to 2 cents followed in 1883. The revenue had grown from eight and one-third millions in 1861 to forty-five and one-half millions in 1883, and the increase in the volume of mail-matter was in a vastly greater proportion. What a wonderful growth do these figures represent in the development and prosperity of the country during twenty-two years of Republican control of the Government.

The immediate loss of revenue by the reduction of letter postage to 2 cents left the Treasury to bear about one-twelfth of the postal expenditures in 1884. A recovery was delayed by the severe depression of general business in the next year, the total revenue for 1885 being about half a million dollars less than for 1884, and it was reserved to the future to realize the benefits resulting from the stimulus of a lower rate of postage. Still the deficiency of the revenue in 1885 was not more than about one-seventh of the expenditure, and this deficiency was relatively not much more than one-third of that of 1861 at the close of Democratic administration.

While the credit of the great advances made in the postal service belongs to the Republican party, the official records show that the burdens of maintaining the service fall most unequally upon Republican shoulders. In the CONGRESSIONAL RECORD of March 3, 1881, is published a table exhibiting in separate columns the postal receipts and expenditures for the year ending June 30, 1880, of the States that voted respectively for Garfield and for Hancock in the last-mentioned year. The table was compiled from the report of the Postmaster-General for 1880. It includes only the expenditures chargeable directly to each of the several States, omitting those of a general nature not apportionable by States and Territories.

Nineteen States cast their electoral votes for Garfield and nineteen States voted for Hancock. Of the nineteen States voting for Garfield, ten States yielded a surplus of revenue over expenditure. Of the nineteen States voting for Hancock, only two States—New Jersey and Delaware—had an excess of revenue over expense. The revenue in the nineteen Garfield States amounted to $24,245,790.74, and in the nineteen Hancock States it amounted to $7,914,245.14. The expenditures in the Garfield States amounted to $22,257,446.45, and in the Hancock States they amounted to $11,599,937.44. The net surplus of revenue in the Garfield States was $1,988,344.29, and the net deficiency in the Hancock States was $3,685,692.30. The Garfield States contributed 75.3 per cent. of the total revenue, and the Hancock States 24.6 per cent.

Of the total expenditure 65.7 per cent. was in the Garfield States and 34.2 per cent. in the Hancock States. For every dollar expended in the Garfield States $1.08 of revenue was returned. For each dollar expended in the Hancock States only 68 cents of revenue was returned. The Garfield States, which contributed 75.3 per cent. of the total revenue, had a proportionate share of only 57.7 per cent. in the electoral college. The Hancock States had a proportionate share of 42.2 per cent. in the electoral college, while contributing only 24.6 per cent. of the postal revenue. Thus it appears also that the political representation of the Republican States is not in a fair proportion to the intelligence and business needs of their people as manifested in the use of the mails.

Six Presidential terms intervened from 1861 to 1885, and every one of them left the impress of some highly beneficial measures upon the history of the postal service. The record of the last four years of Republican administration, from 1881 to 1885, includes the reduction of letter postage, first to 2 cents a half ounce, and then to 2 cents an ounce; the reduction of postage on newspapers and periodicals from publishers to subscribers from 2 cents to 1 cent a pound; the reduction on transient newspapers and periodicals from 1 cent for 2 ounces to 1 cent for 4 ounces; and the introduction of the postal-note and special-delivery systems. And notwithstanding all of these changes the deficiency in the postal revenue was not much greater in 1885 than in 1881.

THE POST-OFFICE UNDER MODERN DEMOCRACY.

On the 4th of March, 1885, the control of the Government again passed into the hands of the Democratic party. Nearly four years have passed, and President Cleveland's term is rapidly drawing to a close. For good or evil its doings will soon pass into history. What does the

chapter devoted to the postal service show? Not a single important feature added to facilitate the public convenience or to improve the workings of the service! Not a single effort towards lessening the burden of postal charges to the public! The Administration would be false to the traditions of the Democratic party in favoring a reduction of postages. The only change in this direction was a very recent one lowering the rate on seeds and plants, and that was brought about by the action of the Republican Senate.

The motives which inspired the policy of the Administration are transparent. The reduction of letter postage in 1883 had left some deficiency in the revenue. This might be overcome, and the glory gained of restoring the service to a self-sustaining basis. The gap could be closed from both directions. Without any reduction of the postal rates the revenue would naturally grow faster than the expenditure, and the growth of the expenditure might be restricted by withholding new accommodations and by curtailing those already enjoyed by the people. To the glory of a self-sustaining postal service might be added a shining reputation for economy. Was the public convenience to be allowed to stand in the way of such ambitions as these? The Treasury is, however, still left to bear a goodly share of the postal expenditures.

FALSE DEMOCRATIC CLAIMS.

The "Campaign Text-Book of the Democratic Party for 1888" devotes more than twenty pages to what is alleged to have been accomplished in the postal service during the first three years of the present Administration. The statements bear undoubted evidence of having been prepared in the Post-Office Department, and, without raising the question of the propriety of employing the time of public servants under a "Reform Administration" in the preparation of political literature, it may be well to examine some of the averments contained in the book. It is not claimed that there were any radical changes in the functions and methods of the service, but great credit is taken for an unusual growth in all the branches of business, for greater honesty among employés, and for a higher standard of efficiency in the conduct of the service.

It is not true that—

the service has been extended far beyond precedent in the history of the Department for any similar period of time, and, indeed, for any period of double the time—

And that—

the revenues have in like proportion increased, and the proportionate cost has in like manner decreased.

The actual revenue for 1885 is given at $42,560,843.83, and the estimated revenue for 1888 at $53,233,579.13, an increase of $10,672,735.30, or 25 per cent. The departmental reports show that the revenue for 1880 was $33,315,479.34, and for 1883, three years later, it was $45,508,692.61. This was an increase of $12,193,213.27, or nearly 40 per cent., 25 per cent. increase for three years of Democratic administration and 40 per cent. increase for three years of Republican administration.

The text-book gives the expenditures for 1885 at $49,782,619.09, and the estimated expenditure for 1888 at $55,250,000, an increase of $5,087,380.91, or 10.9 per cent. The report of the Auditor of the Treasury for the Post-Office Department gives the expenditure for 1880 at $36,542,803.68, and for 1883 at $43,282,944.43, an increase of $6,740,140.75, or about 18 per cent. If there was greater proportionate expenditure during this period it was recompensed by a much greater proportionate gain of revenue. The estimated gain of revenue over expenses from 1885 to 1888 was 14 per cent.; from 1880 to 1883 the actual gain was 22 per cent., being a net gain of 8 per cent. in favor of the last-mentioned period under Republican administration.

The increase in the number of pieces of registered matter handled for 1888 over 1885 is given in the text-book at 13.4 per cent.; the increase of the same matter shown by the official reports for 1883 over 1880 was 51.4 per cent. For the money-order service the statistics for 1888 are not given by the text-book in advance of the official report. An examination of the reports, however, shows that the increase in the amount of orders issued for 1887 over 1885 was at the rate of less than 1.5 per cent. The increase for 1882 over 1880 was 15.6 per cent.

The text-book claims an increase for 1888 over 1885 of a little over 19 per cent. in the length of railway-mail routes, and of 22 per cent. in the number of miles traveled. The official reports show that from 1880 to 1883 there was an increase of very nearly 30 per cent. in the length of railway-mail routes, and of about 34 per cent. in the number of miles traveled.

The text-book is silent as to the number of pieces of mail-matter handled by postal clerks; but from the official reports it appears that from 1885 to 1887 the increase was a little less than 18 per cent., while from 1880 to 1882 the increase was about 30 per cent.

One branch of the postal service will sustain the claim of an undue "expansion" since 1885, and that is the Dead-Letter Office. The increase in the number of pieces of dead mail-matter received at that office in 1885 over that received in 1882 was about 13 per cent., while the increase for 1888 over 1885 was nearly 27 per cent. Had the postal service become less efficient or had the public become less intelligent and careful?

With respect to the alleged greater honesty of employés, it will be sufficient to say that the Postmaster-General found it necessary in 1887 to ask for an increase in the appropriation for post-office inspectors from $200,000 to $300,000, to provide for overhauling the postmasters. The increase was granted. At the time fully two-thirds of all the postmasters in office had been appointed by the present Democratic Administration. Not a single uncharitable suggestion came from Republican sources that this great increase of inspectors might be wanted to provide traveling agents to assist in working up at the public expense the perpetuation of the Administration.

The claim of a greater efficiency in the service is not borne out by the facts. The proper and expeditious dispatch and delivery of mail-matter depend largely upon the accuracy of its distribution in post-offices and on the lines of the railway mail service. The work requires a degree of expertness and technical skill that comes only from special adaptation and long experience. The force employed up to 1885 had been carefully selected; it was well trained and highly efficient. Violent changes were sure to result in a serious derangement of the mails.

The departmental reports contain tabular "Statements of errors in the distribution and forwarding of the mails." The record includes in appropriate columns the "Number of incorrect slips returned," the "Number of errors on incorrect slips returned," the number of "missent" and "misdirected" packages of letters, pouches, and sacks, and the number of "errors checked" against other employés. Separate tables are given for the postal clerks and for postmasters at the Presidential post offices.

As to errors made by postal clerks, the footings are 429,373 incorrect slips, with 958,478 errors, in 1883; 396,746 incorrect slips, with 887,704 errors, in 1885, and 697,513 incorrect slips, with 1,734,617 errors, in 1887. For "missent" letter packages, pouches, and sacks, the number was 14,544 in 1883, 14,841 in 1885, and 27,275 in 1887. Is that increased accuracy? For "misdirected" letter packages, pouches, and sacks there were 2,420 in 1883, 2,558 in 1885, and 4,824 in 1887. For errors checked against other employés, the number reported was 1,861,534 in 1883, 1,742,540 in 1885, and 2,873,379 in 1887.

With regard to the errors by postmasters, the incorrect slips were 236,194, with 489,879 errors, in 1883; 215,352 slips, with 415,429 errors, in 1885, and 341,712 slips, with 669,034 errors, in 1887. The "missent" letter packages, pouches, and sacks were 4,623 in 1883; 4,700 in 1885, and 8,432 in 1887. The "misdirected" letter packages, pouches, and sacks were 2,723 in 1883; 2,543 in 1885, and 4,278 in 1887. Is that a degree of accuracy never reached before?

Of the total number of pieces of mail-matter handled by postal clerks there was one error to every 4,153 pieces during the year ending June 30, 1883; one error to every 5,574 pieces during the year ending June 30, 1885, and one error to every 3,373 pieces during the year ending June 30, 1887. A decrease of more than 25 per cent. in errors and a corresponding increase of efficiency from 1883 to 1885 during the last two years of Republican administration, and an increase of nearly 40 per cent. in errors and a proportionate decrease of efficiency from 1885 to 1887, during the first two years of Democratic administration! As the removal of Republican postal clerks has been greatly accelerated since the 1st of July, 1887, to satisfy the pressing political necessities of the Administration, what will the "record of errors" for 1888 and 1889, the last two years of Democratic administration, show?

These figures are not a part of "a general and widespread movement among Republican papers showing concert of action to attack the efficiency of the mail service;" but they are taken from the official reports of the Post-Office Department. They tell their own story. If, as alleged, there has been a decline of complaints, then there has certainly been a great increase of public forbearance with regard to the workings of the mail service. The fault, however, will be shown to be due to the condition to which the postal service had been reduced by the removal of old, tried, and good officials, and the appointment in their places of persons without regard to their fitness for the positions, but for partisan considerations.

DEMOCRACY USING THE POST-OFFICE TO FAVOR FOREIGNERS.

Great credit is claimed by the Democratic text-book for "initiating" parcels-post conventions with certain foreign countries for the exchange of parcels of merchandise. Upon examining this so-called reform it will be found that the Administration, pursuing the general policy and practices of the Democratic party, has been guilty of discriminating in favor of privileged classes in this country and of the citizens of foreign countries against our own people, for whose accommodation and at whose expense the postal service is maintained. One of the advanced steps of the Republican party was to throw open to the people the use of the mails for obtaining from the marts of trade the minor articles of necessity and comfort that enter so largely into life. This was of especial benefit to the country people and to the pioneers of civilization on our frontiers, who are not visited by the express companies and who are unable to procure the desired articles at home.

A great incidental advantage of the system was that it operated as a wholesome check upon the express companies in keeping down their charges to the people. The system was nurtured for the primary reason that it accommodated the people. If incidentally it benefited trade and manufactures, that was regarded of secondary importance in comparison with the convenience it affords the great masses. The law fixed the postage on unsealed parcels sent by domestic mail at 1

cent an ounce or 16 cents a pound and limited the weight of packages to 4 pounds. The idea crept into the head of the Democratic Postmaster-General that it would redound to the glory of his administration to extend this system to foreign countries. The first suggestion to this end apparently was made to him by Great Britain, whose Government is ever alive to advantages to be gained of other nations. On pages 22 and 23 of his report for 1885–'86 the Postmaster-General says of this suggestion:

> The postmaster-general of Great Britain has recently solicited the opening of negotiations with this Department looking to the establishment between the two countries of the convenient parcel-post system in general European use. No other answer was admissible except that our legislation has not yet authorized the employment of postal facilities for such objects.

The Postmaster-General, it will be observed, assigned no reason for not complying with the proposition of the British Government except that the law did not authorize him to do so. If he was influenced in his refusal by the reason that the system would facilitate the introduction of British products to compete with our own manufactures, he failed to give expression to any such reason. The pronounced tendencies of the Democratic party render it improbable that he was governed by motives looking to the protection of home industries.

The idea was not abandoned, however, for the lack of legal authority, the Postmaster-General stating, on page 62 of his report for 1887, that he had entered into a parcels-post convention with Jamaica and Barbadoes, both British colonies, it having been found "permissible to fix by such convention a higher limit of weight and size on articles to be admitted to such mails than that provided by law for domestic mails." The newly found authority did not come from express legislative enactment, but it had its origin in a legal opinion manufactured to order. For the first time in history the administrative branch of the Government assumed the right to fix the mailability of matter and vary the rates of postage—a right that Congress had ever jealously reserved to itself.

The swaddling-clothes of the infant prodigy were cut in dimensions of extraordinary generosity. While parcels to domestic address were restricted to 4 pounds in weight, the limit fixed for packages for *foreigners* was 11 pounds. While the rate on parcels exchanged between our own people, no matter how short the distance conveyed, is 16 cents per pound, goods intended for foreigners may be sent through the entire extent of the domestic mails and over a vast expanse of sea besides, at a charge of only 12 cents per pound. The domestic parcels are dumped into the mails without any formalities and left to take their chances of going safely to destination. The parcels sent abroad, on the contrary, are surrounded with unusual precautions. The sender is given a certificate of mailing and a customs declaration is attached to the parcel, which must also be accompanied by an invoice. There are three distinct blank-forms to be provided and filled out at the Government expense. To the cost of this special machinery is added the extra expense of sea transportation to swell the disproportion of revenue between foreign and domestic parcels.

The system has since been extended to Honduras and the Bahamas, both, like Jamaica and Barbadoes, British colonies. The principal exports of all these countries are sugar, cotton, salt, rum, molasses, rice, coffee, rubber, pine-apples, and oranges. Will our people make use of the mails to procure these articles? The merchants may be benefited and the foreigners may be accommodated by the system, but it furnishes no advantages to the people at large, for whose accommodation the postal service is provided. It would be vastly more to the advantage of our merchants and manufacturers to encourage the use of the mails for the conveyance of their products to our own people, and more in keeping with the objects for which the postal service was created.

The consumers in this country may now procure an article by mail from one of the British colonies named at a lower cost for postage than he could have it sent from any post-office near to his place of residence.

Foreign countries allow the use of the international mails for the promotion of their commerce, but they do so at a charge proportioned to the cost of service rendered; but the discriminations of the mails are made in favor of their own people. The German rate for parcels to the British colonies mentioned is about seven times the amount charged on domestic parcels, and the French rate to the same colonies is about four times the amount of the domestic rate. In using the domestic mails for parcels our people are compelled to pay a charge that is just a third more than the rate at which the mails may be used to send merchandise abroad. And while the charge on our domestic parcels is just one-half the rate for domestic letters, parcels are carried to foreign countries at about one-thirteenth of the rate charged on letters to the same addresses.

While dealing thus liberally with the citizens of foreign countries, has the Democratic Administration taken any steps to encourage the use of the domestic parcels-post? Let us see. Recognizing the discriminations made against our own people in the use of the mails for the carriage of parcels, and appreciating the public utility of an efficient domestic parcels-post, I had the honor on the 16th day of July to introduce a bill in the Senate proposing to merge the third and fourth classes of mail-matter into one class at a uniform charge of 1 cent for 2 ounces, or 8 cents a pound. This in effect would reduce the rate on domestic parcels one-half; and, besides the relief it would afford to the people, the proposition had many advantages in the way of simplifying the workings of the mail service and in saving annoyance and delay to the public. The bill was promptly referred to the Senate Committee on Post-Offices and Post-Roads. It was duly reported back to the Senate with a recommendation favorable to its passage. It is now on the Calendar awaiting a suitable time for action by the Senate. One attempt to secure its passage was antagonized by the senior Senator from Kentucky [Mr. BECK].

A similar bill was introduced in the Democratic House of Representatives on the 11th day of June by Representative ALLEN, of Massachusetts, a Republican. The bill was smothered by the Democratic Committee on the Post-Office and Post-Roads, most probably at the inspiration of the Democratic Post-Office Department. Perhaps the Democratic opposition to the measure comes from something more potent than the lack of desire to benefit the people; and that is a wish not to interfere with the monopoly enjoyed by the express companies, the Postmaster-General stating on page 61 of his report for 1887 that—

> Parcels-post conventions have never been hitherto negotiated with other countries, nor have any domestic arrangements of the kind been set on foot. It has been our policy to leave to express companies and other carriers the transportation of all parcels above the mailable weight of 4 pounds, and no general demand for any change in this policy has ever arisen, such service by private hands having apparently been hitherto accepted as satisfactory. This, however, has little or no relation to the interchange of small parcels of merchandise with foreign countries. The restrictions of the tariff laws, not only in the duties imposed, but still more in the troublesome and expensive requirements attending the passage through the custom-house and the forwarding of articles, have to a great degree prevented the purchase here by persons residing abroad, or their sending hither, the smaller goods in retail, which within our borders are freely purchased, though long distances intervene between the buyer and seller.

The Democratic party while professing great opposition to corporations is ever tender in taking any action to interfere with their privileges.

The Post-Office Department is awaiting a demand from the people before doing anything to favor them in the transportation of parcels by mail. Was there ever any organized demand from the people for postal reforms? Was the reduction by the Republican party of letter postage to 2 cents demanded by the people? If the Democratic party wishes to test the public appreciation of that measure, let it propose to restore the letter rate from 2 cents for a full ounce to 3 cents for a half ounce. Then the people would be heard from, and in a way to make the Democratic ears tingle. It is the business of the postal administration and of Congress, and not of the people to devise measures of public relief and improvement in the postal service.

The desire of the Democratic administration to favor foreign interests, and particularly British interests, was further illustrated by its action with reference to the importation of merchandise from Canada. Under arrangements made by the Administration the articles could be mailed in Canada to any address in the United States at a charge of only 4 cents a pound, just one-fourth the rate of the charge when mailed in this country. So long as it benefited only the people of Canada the Administration was content, but when some of our seedsmen living on the frontier took advantage of the situation to freight their goods across the line and mail them at Canadian post-offices to their customers in this country the Administration awoke to its blunder through a manifestation of popular discontent.

Democratic legislators hastened to introduce bills to reduce the domestic rate on seeds to one-fourth or one-half the existing rate, but there were no signs that the Democratic Administration looked for a remedy through any reduction of postages. Instead of that the Post-Office Department posted an agent off to Ottawa, who succeeded, by the complaisance of the Canadian Government, in restoring the old arrangement by which parcels mailed in Canada to the United States were subject to the same charges as though mailed in this country. Then Democratic interest in the matter ceased in Congress, and it was left to the Republican Senate to secure an amendment to the Post-Office appropriation act making a reduction of one-half in the domestic rate on seeds, bulbs, and plants. Thus the Democratic party was extricated from its blunder, and it had preserved the consistency of its record in opposing all reductions of domestic postage.

DEMOCRATIC DISCRIMINATION AGAINST BUSINESS MEN.

The spirit which animated the Post-Office Department in dealing with the public was illustrated by a stroke of policy which entailed serious consequences to the business public. An act of Congress passed in 1879 defined the permissibility of the printing on the wrappers or unsealed parcels and on envelopes inclosing circulars. The statute was liberal and it had been liberally construed by the Department. The Postmaster-General stumbled upon this statute in the summer of 1887, and he questioned the generous interpretation which had been put upon it. The sanction of eight years of precedent and the interests and convenience of the public did not permit him to wait a short time and submit his doubt to Congress for decision; but instead he issued a peremptory mandate restricting the quantity of printing previously allowable on the matter in question, and imposing the penalty of a charge of letter-postage rate for violations of his order.

Business men were caught in an embarrassing dilemma. They had on hand ready for use greater or less quantities of the forbidden wrappers and envelopes, which were rendered unserviceable, and no time was afforded for obtaining a new supply. Worse than all, correspondents

were compelled to pay letter postage on matter which had been admitted at printed rates, and sent prior to or in ignorance of the order. A storm of indignation broke out through the public press, and the Postmaster-General realized, probably for the first time, the full extent of the mischief he had done. He insisted that his order was correct; but at the same time he suggested means for its evasion in special cases. He promised to ask Congress to restore the previous condition of things. This promise he kept in his annual report in December last; a special act was promptly passed, the evil was corrected, and once more "quiet reigned in Warsaw."

DEMOCRATIC CIVIL-SERVICE REFORM IN THE POST-OFFICE.

The President came into office with loud professions in favor of civil-service reform. All his public utterances pledged his devotion to that object, and they deluded many voters into casting their suffrages for him. Efficiency and fidelity in the discharge of their duties were to be the tests in the retention of the public servants, and vacancies were to be filled solely with reference to the fitness of the appointees. The manner in which he has carried out his pledges finds no better illustration than in the postal service, where least of all the branches of the Government could changes be made without serious impairment of the public welfare. Of all the tried and faithful subordinates who had aided in elevating the service to its high pedestal but very few, if any, of prominence are in the service to-day.

The first efforts of the Democratic Postmaster-General appear to have been directed to securing the most expeditious means of supplanting Republican office-holders with those of approved Democratic faith. To deceive the public with the belief that the Administration was not false to its civil-service reform pledges "offensive partisanship" was assigned as the cause for making the desired removals. The farce was enacted of requiring the guilt to be established by documentary proof. It was a "star-chamber" proceeding, the accused being afforded no hearing and no opportunity to furnish testimony in rebuttal, if indeed he was made aware of the existence of the charge. Discords were fomented in communities and the sordid motives of human nature were excited to lead neighbor to testify against neighbor. So long as the Administration sustained its pretensions of civil-service reform, and the rewards of political services were bestowed upon its adherents, what mattered it that innocent persons were forced to go out of office resting under the odium of charges which they had not been allowed to refute?

The difficulties and delays in making out a plausible showing were displeasing alike to the Postmaster-General and to the horde of hungry office-seekers knocking at his doors. Accordingly, within a few weeks after his induction into office the Postmaster-General addressed a "confidential" circular to the Democratic Senators and Representatives in Congress from certain of the States, seeking their aid in the accomplishment of his purposes, and saying, among other things, the following:

Am impatient to assist our people in securing relief to which they are justly entitled from partisan postmasters. Suggest method which if adopted will give substantial relief. I will require no more proof of partisanship than affirmation of a Representative or Senator, or affidavit of some person whom the Representative can affirm to be of unquestioned credibility.

The greater simplicity of the new method was not without its desired fruit, and changes proceeded with a greater rapidity. The reports of the Postmaster-General show that there were 51,252 post-offices in existence on the 30th of June, 1885. Of the incumbents of these offices 12,150, or nearly one-fourth of the whole number, were removed or suspended, and 15,975, or nearly a third of the whole number, were displaced by resignation, voluntary or involuntary, or by expiration of commissions between July 1, 1885, and June 30, 1887.

Nearly seven-twelfths, or somewhat more than one-half, of the whole number had been displaced within a period of two years. The removals and resignations (!) had exceeded in point of numbers all the post-offices at which the postal revenues were more than $100 annually. Death intervened to save 1,176 postmasters from the chances of removal. Six thousand five hundred and twenty-four newly created post-offices were filled with Mr. Vilas's selections. The official reports do not show how many changes were effected between March 4 and July 1, 1885. Civil-service reform had evidently been practiced with a vengeance in the Post-Office Department.

In the railway mail service, the most important branch of this Department, the general superintendent and every division superintendent have been removed. The last one, R. C. Jackson, at the head of the division including the Middle States, with headquarters in the city of New York, a man whose fitness, earnestness, and faithfulness to duty is unquestioned, and against whom no charge can be sustained, was removed about three weeks since to make a place for a partisan of the present Administration. The outcry which was raised against this removal simply called out the reply that the Post-Office Department were dissatisfied with his record. But what was his record? He commenced in 1874 as a clerk in the Department on a salary of $1,200 a year, and has worked his way up by honest promotion to the highest position in the railway mail service. And I challenge the Department, or any person, to show any ground for his removal, except the desire on the part of the Administration to put in his place a partisan who might be serviceable in promoting the re-election of the President. In the great scramble for office and the haste of this Administration to reward its partisans there have been a great number of bad appointments. The list includes drunkards, and keepers of drinking saloons, of gambling-houses, embezzlers, defaulters, and jail-birds; and as an evidence of this I print in connection with my remarks a list of such appointments, cut almost without exception from Democratic newspapers, or papers supporting the re-election of the President.

In order to be sure that no injustice may be done, I have stricken out the names and left a blank space.

I will begin the list with the head of the railway mail service, who has charge of all the postal clerks.

—— Appointed collector at Port Huron, Mich.; worker for "Boss" Dickinson (1885, June 19; The Tribune, 5). Brother-in-law of Senator Conger; charged with treachery to the Democratic party as chairman of the committee; called an outspoken Copperhead (1886, July 20; New York Sun, 2). Accused of dishonesty in building the Chicago and Port Huron Railroad and of bad record as collector under President Johnson (1886, May 5; The Tribune, 2). Charges filed in June, but no consideration from President (1886, April 16; New York Herald, 4). Adverse report: charges not met; rejected (1886, August 5; New York Sun, 7). Appointed Superintendent of the Railway Mail Service; first important appointment made by Postmaster-General Dickinson, though he had been rejected by Senate for cause, Democratic Representative having protested with charges affecting his integrity. How Dickinson found a way of rewarding a friend without the intervention of a Senate committee (1888, May 16: The Tribune, 3. Also, 1888, May 15; New York Times, 3).

—— Postmaster at Delaware City; defaulter in sum of $2,171 on sales; committed in default of bail (1886, August 1; New York Times, 3).

—— Postmaster at Shenandoah; shortage in accounts, $1,300; appointed two years ago (1887, April 22; New York Sun, 2).

—— Appointed postmaster, Springfield, Ill., Senate committee reports, because of services as the editor of the leading Democratic paper and manager of the Democratic State committee (1886, June 25; New York World, 4). Resolution adopted by Democratic State committee requesting Administration to investigate —— connection with corrupt State printing, and that he be dismissed as unfit for trust or honor (1887, September 3; New York Sun, 2).

—— Appointed postmaster at McCook, Nebr., *vice* Scott, removed, but was in nine months dismissed as defaulter (1886, August 12; New York Times, 4).

—— Postmaster at Oconto, Wis.; arrested for robbing mails (1887, January 27; New York Sun, 1).

—— Post-office clerk at Waterbury; arrested for robbing the mails (1887, August 16; New York Times, 1).

—— Appointed clerk of railway mails. Under three indictments for forgery; was arrested three times at Cincinnati for getting money under false pretenses; once in Texas for robbery; twice for theft in Kentucky; recommended by Comptroller Durham. It was predicted he would steal something in a month; did steal money-order for $163; was traced to St. Louis, and was arrested at Santa Fé; awaiting trial (1885, September 2; New York Sun, 1).

—— Appointed postmaster at Vinson, Iowa, in place of one-legged Union soldier, S. A. Marine, who was turned out; —— proved to have been indicted and convicted of violating pension laws, and was removed (1886, May 27; New York Sun, 2).

—— Appointed assistant postmaster at Indianapolis. Testimony of Foulke; reported to have been attached to gambling house Indianapolis, and said, "It was better for the boys to resign than to have us trump up charges against them" (1888, March 29; New York Times, 2).

A "CLEAN SWEEP" DEMORALIZES THE SERVICE.

—— Appointed postmaster at Indianapolis. "Generally believed that if —— was appointed, Mrs. Hendricks's brother, S. W. Morgan would be really postmaster, thus providing a good place for a relative" (1885, March 23; New York Times, 1). Reward for party services rendered many years ago (1885, March 27; New York Times, 1). Disregards civil-service law and charges preferred, "facts President will hardly ignore;" —— removed assistant postmaster and put in broken-down politician; replaced cashier with his own son; removed stamp clerk; removed chief of registry and put in Hendricks's nephew, a boy of twenty-two, clerk in drug store; replaces chief of repair department by pork inspector; discharged janitor and put another son of his own in that place; turned out four poor women engaged in repairing mail-sacks, and put in three male Democrats. Among persons discharged were one ex-general Union Army, one Union veteran, one soldier's widow, and a niece of General Burnside; no complaint save that they were Republicans. "I had promised their places to Democrats. I don't know what the last election meant if it did not mean that Republicans were to be turned out" (1885, July 27; New York Times, 4). Investigation by commission (1885, July 29; New York Times, 5). Appeals to President (1885, August 7; New York Times, 5). Investigation confined to violation of rules, had nothing to do with laborers and workmen or with declarations of postmaster; charges of merciless partisan proscription, outside the part of the service governed by rules, not investigated (1885, August 11; New York Times, 4). Letter of Swift Civil-Service Reform Association, "clear that spirit and intent of law violated in discharge employés classified service because Republicans, and in case of one Wilmington, the postmaster concocted a clumsy and easily exposed falsehood to justify his action" (1885, August 19; New York Times, 1). Demoralization postal service hard to realize; express money-orders have increased 40 per cent. because of postal inexperience; some appointees can hardly write their own names; one mail-carrier, Noe, caught rifling letters in his possession, pardoned by President; Democratic paper says "Congressman BYNUM kept busy appointing felons to office and obtaining pardon for their crimes" (1886, July 18; New York Times, 5). "Dismissed every man and woman in sack department, including four women who had others depending on them, with no charges against any; removed janitor, watchman, engineer, and elevator boy also, declaring because they were Republicans, and men appointed in their places were active political workers." Testimony Foulke, president Indiana Civil Service Reform Association (1888, March 29; New York Times, 2).

—— Appointed postmaster at Kearney, Nebr.; was intemperate; admitted had been twice roaring drunk since appointment; once when appointed (1886, May 29: New York Sun, 2).

—— Railway mail agent; recommended by Morrison; took much needed pledge; got tight at Chicago before starting on route; put flask of whisky into mail-bag, which broke, and whisky-soaked letters were refused by Prohibitionists; discharged (1886, November 24; New York Times, 2).

—— Postmaster at Sandusky, Ohio. Arrested for abstracting letters from the mails; proof in his own handwriting (1887, February 15; New York Times, 3).

INCOMPETENT, DISHONEST, AND A JAIL-BIRD.

—— Appointed postmaster at Sioux City, Iowa. Convicted in United States court at Yankton, Dak., and sentenced to penitentiary. Appointed in place of most efficient postmaster; Democrats send letters protesting, and declaring him "incompetent, dishonest, and a jail-bird; thought the President meant what he said about retaining worthy and capable officers until their terms expired, and had not therefore recommended anybody." Appointment secured by office broker who knew Vilas at Madison; predecessor removed on charge offensive partisanship, signed by two men (1885, August 5; The Tribune, 2).

—— Was arrested for stealing $1,000 worth of goods at Racine, Wis., and confessed and held in bonds for $500; forfeited bond and ran away; writes after long absence from Northern Dakota that he has been appointed postmaster (1886, December 10; The Tribune, 1).

—— Postmaster at Peoria. Alleged dismissed from Army for certifying false muster-roll; indicted several years ago for violation internal-revenue laws; pleaded statute of limitations; certified copy of indictment and record sent to President before appointment (1885, November 25; New York World, 4).

—— Postmaster at Newberry, Mich. Arrested with his deputy, C. W. Huer, charged with embezzlement; was active politician and a Democratic county treasurer (1888, May 7; New York Times, 1).

—— Postmaster at Flambeau, Wis. Convicted of robbing town treasury; turned Cleveland Democrat and became candidate for Indian agent, and then for postmaster (1886, February 1; New York World, 1). Protest of people finally prevented appointment.

—— Postmaster at New Holland, Pa., absconded; accounts bad; notes protested (1885, December 11; New York Times, 1).

—— Appointed postmaster, Fort Dodge, Iowa. Appointment secured by J. H. Dunscombe, who, according to affidavit, required Cain to pay $400 yearly out of salary received for support of Democratic paper edited by Dunscombe's son (1886, May 25; New York Sun, 2).

—— Appointed mail agent Union Station, Ind. Was sentenced in 1872 to the penitentiary for two years for grand larceny; pleaded guilty of robbery in 1887 and was sentenced for two years; indicted for riot in 1879 and found guilty; in the same year he was indicted for robbery; and also in 1883 for assault and battery (1886, January 24; New York Times, 7). Full recommendation by Congressman BYNUM, with signatures of Governor Gray, Judge Niblack, Auditor Rice, Attorney Board, and Secretary Myers (1886, January 31; New York Times, 2).

—— Appointed janitor money-order division, Cincinnati: "colored man who was sent for three years to State prison for stealing gold watch and chain" (1885, July 3; New York Times, 1). Case investigated; found that —— served three years in prison but behaved well since (18 5, July 21; New York Times, 3).

—— Railway mail service, Indiana. Mail car allowed to go to Lafayette without messenger, and mail brought back. He was prominent political worker; appointed for that reason, and had boasted that he had bribed three members of council to vote for a street railroad. Testimony of Foulke, president Civil Service Association (1888, March 29; New York Times, 2).

APPOINTED WHILE IN JAIL.

—— Appointed postmaster at Lincolnville Centre, Me. Now serving out an eight months' sentence in jail for stealing postal money as deputy at that same place; petition signed by more than one hundred Democrats, and approved by the chairman of the Democratic State committee (1885, August 8; New York Times, 4). Appointment asked by Chairman Brown (1885, August 11; New York Sun, 2). Brown declares that he knew nothing about the appointment; was not in the list secured when he was at Washington (1885, August 12; New York Herald, 3).

—— Appointed postmaster at Columbus, Kans.; convicted in Cherokee County of forgery in second degree; was Democratic candidate for auditor of State two years ago; plan of fraud was to use fictitious deed of real estate as basis for loans on notes to fictitious persons (1886, July 24; The Tribune, 1).

—— Appointed postmaster at Kearney, Nebr., while serious charges were under consideration by Senate; discovered by inspectors to be a defaulter, and name withdrawn (1886, May 29; New York Sun, 2).

—— Appointed postmaster at Atlanta; was impeached as State treasurer in 1870 for malfeasance, but escaped conviction, vote in senate lacking two of the necessary two-thirds; suit brought to recover $27,000 corruptly received while in office, according to his own confession; all the facts placed before the President by Georgia Democrats prior to nomination (1886, February 17; The Tribune, 2).

—— Assistant postmaster at Coshocton, Ohio. Arrested embezzlement Government funds; failed to account or remit (1887, June 26; New York Sun, 2).

—— Appointed postmaster at Flatbush at request of F. Campbell; arrested for malfeasance in office, appropriating money passing in registered letters (1887, July 10; New York Times, 2).

—— Appointed postmaster at Lansing, Mich.; a professional lobbyist; Democrats indignant that man of his character appointed; Knights of Labor charged that —— received a big fee to look after their bill and then betrayed them; since appointment has compelled employés to contribute money to bear expenses of campaign; personal character unanimously reported unfit, and rejected without opposition (1886, August 5; New York Sun, 7).

—— Money-order clerk at Reading, Pa., short of $1,000; fast young woman in case (1887, June 17; New York Times, 1).

—— Postmaster at Huntington, Conn.; arrested for robbing mails (1887, January 21; New York Times, 1).

—— Appointed postmaster at City Island, N. Y.; a defaulter; borrowed of many friends and fled; said to be woman in case; office cleaned out of money and stamps (1888, April 13; New York Sun, 3).

—— Appointed postmaster Fairfield, Ill.; never settled accounts as clerk of court, Wayne County; refused to surrender books; rejected (1886, June 18; New York Sun, 2).

—— Nephew of Congressman SPRINGER; appointed postmaster at Jacksonville, Fla., two days before Congress met; got commission and qualified after Congress met in violation of law; charged with insulting and obscene comments on soldiers' reunion, and on the wife of chairman of the committee of arrangements; a prominent citizen, ——, a crony of ——, was made deputy, and charges that —— compelled him to divide pay; makes affidavit that —— was author of obscene paper above named; supported by other affidavits; all employés and postmaster neglected duties of office for four weeks in SPRINGER'S interest (1886, July 15; New York Sun, 1). Charges proved, and was rejected (1886, July 22; New York Sun, 1).

JAIL-BIRDS FOR PLACES OF TRUST.

—— Appointed postmaster at Fort Dodge, Iowa. Appointment secured by ——, who, according to affidavit, required —— to pay $400 yearly out of salary received for support of Democratic paper edited by ——'s son (1886, May 25; New York Sun, 2).

—— Appointed postmaster at Ithaca, N. Y. Office used as partisan headquarters; service in a state of chaos; chronic delays of New York mail; letter and wedding invitations delayed for days or weeks; reprimanded from headquarters (1886, December 17; New York World, 4).

TWO CONVICTS CHOSEN—ONE-LEGGED SOLDIER OUSTED.

—— Appointed postmaster at Vinton, Iowa; under indictment for violating State liquor law; a saloon-keeper and man of intemperate habits and general bad character; one-legged soldier turned out to make place vacant, and predecessor, ——, first appointed, but removed by Vilas because indicted and convicted (1886, May 27; New York Sun, 2). Rejected Democrats concurring (1886, June 17; New York Sun, 1).

—— Appointed postmaster at Hoboken. Man of questionable associations and deplorable illiteracy. It was alleged that Governor Abbett had refused to appoint him to a minor office in his gift on account of educational deficiencies. Was he appointed that he might learn to read and write? (1886, July 14; New York Times, 4).

—— Appointed postmaster at Dennison, Iowa; a saloon-keeper, violating State law by selling whisky and beer; appointment the result of arrangement between —— and himself to furnish money for starting a German Democratic paper; —— had offered to start such a paper, if appointed, from the salary, but had been rejected (1886, May 28; New York Sun, 2). —— rejected; found to be mere "dummy" for —— (1886, June 25; New York Sun, 2).

—— Appointed postmaster at St. Louis; thrashed Mr. Joseph Pulitzer in street, Star, November 12 (1885, November 13; New York Sun, 2). St. Louis dispatch to Sun says: "Appointments are stench in nostrils of decent people. In vain did Congressman GLOVER tell Executive his nominee for postmaster was a common drunkard, his nominee for surveyor a rascal, his nominee for collector of internal revenue but one remove from imbecile; appointing in face of burning protests notorious drunkards, embezzlers, dark-lantern politicians, helpless imbeciles, at the beck of cross-roads Confederate Senators, bargaining with them for a packed convention. If Manning's machine attempts renomination, the next national convention will not be held in St. Louis (1886, August 1; New York Sun, 8).

—— Appointed postmaster at Chicago, well-known Copperhead (1885, May 7; The Tribune, 1). Reported since his appointment has been active in Senatorial contest just ending. Offense which merits dismissal in fourth-class postmaster can not properly be overlooked in postmaster of first class (1885, May 21; New York Times, 4). Lawyer of feeble health, lacks experience: physical energy, mental quickness desired. In responsible minor offices men were placed by him whose unfitness led one into United States court as defendant in action for malfeasance. He claims he was persecuted because he had shown up gross inefficiency of Chicago postal service. Discontent at Chicago widespread; business some divisions uniformly behind; takes New York papers longer to travel 2 miles in Chicago than all the way from New York (1888, January 13; New York Sun, 1).

—— Appointed postmaster at South Salem, in place of ——, who had held office twenty-two years; removes post-office to his house, a mile and a half from the village; boycotted by the people (1885, December 14; The Tribune, 1).

—— Appointed postmaster at Webster City, Iowa. Had charged incumbent —— with partisanship, but said in application he was editor of a Democratic paper and chairman of the Democratic committee; that he had made speeches in campaign, and wanted office as a reward; that salary would enable him to do more work for his party than ever. Made eighteen speeches and continued on committee; has been even more offensive partisan himself (1886, April 10; New York Sun, 1.)

—— Appointed postmaster at Lynchburgh. Editor, who, after appointment, called Sherman "first-class fraud, miserable mountebank, unscrupulous scoundrel, uncharitable dog;" and Logan "semi-civilized Illinois ourang-outang, his dirty diatribes;" and Hoar white-livered, onion-eating, nasal-twanged old hypocrite; and Conger "a slang-wanger," etc. (1886, May 15; New York Sun, 2). Rejected, but again reappointed; charged with tissue-ballot frauds, offensive partisan, and intense hostility to civil-service reform (1886, August 10; New York World, 4).

—— Appointed postmaster at Dennison, Iowa, in place of ——, removed for partisanship, but —— was editor Democratic paper, member Democratic committee, delegate in convention, made stump speeches after appointment and took part actively in Democratic campaign. He was appointed by Postmaster-General, as documents show, as reward for party services, and his own letters to President show that usefulness to party would be greatly increased by appointment (1886, March 26; New York Sun, 3). Wrote to Postmaster-General that he would devote his salary to establishment of German Democratic paper (1886, May 27; New York Sun, 2). Adverse report on above facts (1886, March 26; New York Times, 5).

—— Appointed postmaster at Vicksburg; approved assassination of Matthews, advocating use of extreme measures to secure Democratic success; advised murder of Republican sheriff; in April, 1883, his paper, The Herald, said: "White Democrats should direct attack at white Republican bosses and kill them when necessary" (1886, January 20; New York Sun, 2).

JAIL-BIRDS.

Washington Post says: "Federal patronage in Cincinnati employed to elevate most disreputable and odious characters. No less than four criminals hold Government places in Ohio to-day as direct result of Democratic dispensation. Recent subordinate appointments Ohio in Treasury service include three notorious malefactors, one chronic work-house inmate, one in penitentiary for theft, another indicted for murder, but escaped because principal witness disappeared" (Washington Post, 1885, November 8). Rhode Island postmaster had been arrested nine times in three months for violation of liquor law. Pennsylvania clerk of mint confessed writing a forged letter of Neal Dow to influence German votes in Ohio (1885, September 8; New York World, 4). Maine postmaster appointed while in jail (1885, August 23; The Tribune, 5).

THE BRUTAL REVILER OF GRANT.

—— Appointed postmaster at Meridian, Miss.; business manager and principal editor of Mercury which published editorial "coarsely assailing the memory of General Grant; appointed in place of Hancock, removed as offensive partisan. No man who is such a fool as to write an article of the kind is fit to be a postmaster;" disavowal of ——; declares not personally responsible (1885, August 10; New York Times, 4). Had been indicted in United States court for unlawfully conspiring to evade civil-rights law (1885, September 3; New York World, 4). Was leader of bulldozers, whose paper advocated use of violence to carry Democratic ticket; after Grant's death articles published of most brutal character (1886, January 20; New York Sun, 2).

—— Appointed postmaster at Berlin, Wis.; arrested for embezzlement; $30,000 borrowed as if for firm (1886, May 18; New York Sun, 1).

—— Appointed postmaster at Philadelphia; was chairman of Democratic city committee. Crosby states could be no more serious violation of spirit of law than removal of Huidekoper, a postmaster of especial merit, supported by many Democrats. (1885, November 26; The Tribune, 2). Complaint of civil-service association that he distributed appointments equally among election districts of city, appoints men who can not write or speak grammatically, dismisses men without charges, and examinations of appointees alleged to be fraudulent. (1886, November 10; New York Times, 5). Complaints challenged by —— and by local board (1886, November 13; New York Times, 5). Testimony Senate committee that only three or four clerks were retained out of four hundred or five hundred, and only four dismissed for cause. Huidekoper removed after Vilas had told him his office was the best managed in the United States (1888, April 5; The Tribune, 1).

—— Appointed postmaster at Natchez; chairman Democratic committee, manager election frauds in 1884; details of reasons for rejection (1885, August 7; The Tribune, 2; August 16, The Tribune, 1, and September 8, New York World, 4). Nevertheless confirmed (1886, June 4; The Tribune, 2). Chairman Republican committee removed for offensive partisanship; chairman Democratic committee appointed, who manipulated election returns so that district having great Republican majority is represented by Democratic Congressman; political activity while postmaster (1886, January 20; New York Sun, 2).

—— Postmaster at Monroe, Ind.; also Gray, postmaster at Portland, Ind., seated on platform at eleventh district Democratic Congressional convention; Daniel Krisher, postmaster at North Manchester, chairman delegation; Postmaster R. L. Seaton and William Mertz, postmaster at Vera Cruz; in all, fifty postmasters present, pernicious activity (1886, September 1; New York World, 4).

—— Appointed Superintendent Railway Mails; formerly discharged as Republican for inefficiency; constant complaint of business men; notorious Indiana partisan, appointed in place of ——, one of the most efficient officers in the Department.

—— Appointed postmaster at West Point in place ——, many years postmaster; no one there knows him (1888, May 30; the Tribune, 1).

The condition of the post-office in Chicago has been a scandal and a disgrace. The outcry became so great at last that the Department was forced to send a commission out there to make an examination, the result of which was the removal of a number of subordinate officers. But still the trouble was not remedied. Corning S. Judd, the postmaster, was a lawyer of some ability; a well-known copperhead; a man against whose private character I have no charges to make, but he was in feeble health; lacking in experience and the necessary qualifications for such a position; lacking in physical energy and those mental qualities and aptitudes which are essential to such a position. At last the complaints were so loud and deep that he has been removed.

The post-office at Indianapolis, occupied by Aquilla Jones, has been a very sink of political corruption. Postmaster Jones openly declared that he set at defiance all the civil-service professions of the President; that he should remove officers and appoint others in their places solely for political consideration.

The Philadelphia post-office, which had been managed for eight years by General Huidekoper, was admitted on all hands, I believe, to have been the best managed post-office in the world, not even excepting the celebrated London office. General Huidekoper had conducted his business purely upon civil-service-reform principles. There was no charge, there could be no charge, made against his management of the office. He was removed and one Harrity, chairman of the Democratic city committee of Philadelphia, put in his place. No such record of inefficiency can be found in the history of the management of any great office in the country. Delays innumerable have occurred in the transmission and the delivery of letters ever since his advent to the office. Illiterate and drunken men have been substituted for carriers in the place of excellent men. Carriers have been seen reeling through the streets with the mail-bags on their backs. Letters have been scattered along the sidewalk; mail-boxes not visited for twenty-four hours at a time, and numerous instances in which letters directed from one part of the city to another have been days, and in some instances weeks, before reaching their destination. It is notorious that the employés of the office spent a large portion of their time in carrying out the behests of Harrity in the great Democratic factional fight against SAMUEL J. RANDALL. All these things are amply proved in evidence taken before the Committee to Investigate the Civil Service. As a specimen of some of the irregularities in that office, I submit the following testimony of Edward J. Frysinger, in which he says that a printing-press was put into that office by Harrity, and Frysinger employed as a printer to print Democratic notices on Government paper:

TESTIMONY OF EDWARD J. FRYSINGER.

Edward J. Frysinger, having been duly sworn, was interrogated as follows:

By the CHAIRMAN:

Q. Where do you live?
A. At 13 Madison street, Chester.
Q. Have you been in the post-office at Philadelphia as an official lately, and if so, when?
A. Yes, sir; from the 21st of April to the 1st of September, 1887.
Q. By whom were you appointed?
A. By Postmaster Harrity.
Q. How did you leave the office?
A. I sent in my voluntary resignation.
Q. What place did you hold in the post-office?
A. I was printer.
Q. Is there a printing establishment in the office?
A. I understand there is yet. I opened the establishment when I went there.
Q. There had been none there before?
A. No, sir; I laid it out.
Q. The men were appointed and you set them to work?
A. Yes, sir.
Q. And you had charge of the printing department in the post-office?
A. Yes, sir.
Q. Which was a new feature?
A. Yes, sir.
Q. What kind of printing did you do?
A. Principally the work of the Department.
Q. And of the office?
A. Yes, sir.
Q. How had that hitherto been done?
A. At the Government Office in Washington.
Q. Do you think it is less expensive?
A. It is more convenient to have it there.
Q. Yesterday Mr. Watrous produced a copy of a political circular which was printed in the Press, with which he is connected as editor, which circular was read before the committee. It purports to have been printed at the office by you, or under your direction. Have you knowledge of any such transaction?
A. I printed a circular of that character there.
Q. In the post-office?
A. Yes, of the character he referred to. There was a fac-simile of it in the Press. I suppose that is what he referred to.
Q. Have you the original with you?
A. I have a written order for it. Yes, sir.
Q. Will you produce it?
(The witness produced the paper called for.)
The CHAIRMAN. Please read it.
The WITNESS (reading):

"By request of the Democratic city executive committee you are invited and expected to attend a meeting of the Democratic executive committee of the Twenty-ninth ward, to be held at Quantrell's Hall, Eighteenth and Ridge avenue, on Wednesday evening, June 1, 1887, at 8.15 o'clock, sharp, purpose for the of organization. Please be present.

"Yours, etc.,

"R. C. LLOYD,
"*Chairman Ward Committee.*"

Q. Is there any indorsement upon that in the corner?
A. The directions to me are written in the corner, as follows:

"Mr. FRYSINGER:

"Please set to size of postal-card.

"J. J. V.

"5, 27, '87."

Q. Did you print that circular in the post-office printing department?
A. Yes, sir.
Q. How many of those did you print?
A. I think I printed about seventy of those circulars. The order was for postal-cards, but we afterwards used circulars.
Q. For circulation in this district?
A. I don't know what was done with them.
Q. By whose direction did you print it? Why did you print this political circular, which had nothing to do with the post-office, on the Government printing-press in that office? Did you do it of your own motion, or by direction?
A. By direction.
The WITNESS. He told me to print that first circular and destroy all proof and evidence. I did so; I destroyed all evidence; I took it upstairs to Mr. Vogel, at his desk, and told him that this was rather a dangerous business, and he said no, he did not know that it was. Prior to that, though, downstairs, he had told me it was by authority of Postmaster Harrity and Mr. Drake. I asked him who Mr. Lloyd was, the name that was signed to it, and also to the first one. I said, "Is he liable to disclose anything like this any day?" He said, "Oh, no; he owes his position as magistrate (I think it was) to Mr. Harrity's influence, or to his help." I told him he might change his views some day and become angry, or something of the kind; any way, there the conversation stopped. Postmaster Harrity at that time was in Atlantic City. In about three days Mr. Vogel came down into my room and told me there would be no more work of that character, as Postmaster Harrity had forbidden it, fearing it would leak out; and I supposed it would stop. But in several weeks' time after that this written order was sent down in an envelope.
Q. The one you have here?
A. Yes, sir; and I printed these and took them up to Mr. Vogel, and told him that I understood all that kind of work was to stop. "Well," he says, "Postmaster Harrity is willing we shall print it, only it is to be sent from this room, so that in case it should leak out he can say—Mr. Harrity can—that he had nothing to do with it; that is all."
Q. Mr. Vogel told you this?
A. Yes, sir.
Q. And he, you say, is the personal clerk of the postmaster?
A. He does considerable of the personal writing of Postmaster Harrity.
Q. Upon that you printed it?
A. I printed it upon that authority, deeming that, of course, it was by the authority of the postmaster himself.
Q. You remember the conversation distinctly?
A. Yes, sir; very distinctly.
Q. What are your politics?
A. I am a Democrat.
Q. You have always been a Democrat?
A. Yes, sir.
Q. And are now?
A. Yes, sir; just as much as ever.

By Senator MANDERSON:

Q. How much of a printing plant is there in the office?
The WITNESS. Do you mean in full?
Senator MANDERSON. Yes.
The WITNESS. The material when I was there was worth from $1,000 to $1,200.
Q. Do you mean to say that all of the printed blanks are now printed here in the office?
A. I do not know what they do now. At the time I was there any of the blanks were printed there. There are forms used in the Government Departments, and we have to have a great many of one form, and it pays best to ship those here. But this was more for the convenience of the Department, and was to print notices, etc., that they wanted immediately, and ordinary blanks.
Q. How is the paper that is used supplied?
A. It is supplied from Washington.
Q. Furnished from the Post-Office Department?
A. Yes, sir; from the Department at Washington.
Q. And all you do here is the mechanical work upon your own type and press?
A. Yes, sir.
Q. What presses had you?
A. I had a quarter-medium improved Gordon.
Q. What is the power?
A. It is without power; it should not have been, but I was compelled to do it.
Q. And you think that is a more economical method of furnishing blanks?
A. I think, considering the convenience to the Department, it is good policy to have it there.
Q. The economy is in the time of obtaining matter needed, rather than in expense?
A. The majority of the work that was done there for the Department could be done as economically, and especially at the salary that I was paid, as it could be in Washington.
Q. Have you any familiarity with the Government Printing Office at Washington?
A. I have some familiarity with the salaries paid. I never worked there, but I am posted on such things.
Q. You speak of two different circulars. How many were issued of the first one, the printing of which you protested against?
A. The first were postal-cards. There were about fifty of those, I think; I can not recollect exactly.
Q. And about seventy of the second lot of circulars?
A. Yes, sir.
Q. By whom was the postal-card material and circular material furnished?
A. The postal-cards were sent down to me from upstairs, and as to the paper I really do not recollect whether I used it from the room or whether it was sent down from upstairs.
Q. But it came to you in the usual manner that postal-cards or paper would come to you?
A. Yes, sir; the cards were sent down.

By Senator BLODGETT:

Q. Did you have any conversation with Postmaster Harrity in reference to the printing of these documents?
A. No, sir.

Q. None at any time?
A. Not that I recollect of.
Q. Have you had any correspondence with Postmaster Harrity on the subject?
A. Yes, sir.
Q. Will you please state what it was?
A. I wrote to him something to the effect that I had done as he knew, printed matter that was not proper; I can not recollect the words exactly, but something to that effect.
Q. Did you refer to the printing of that letter, and are you quite sure that you referred to that?
A. I have a copy of the letter at home.
Q. From your recollection did you refer to this special case in your letter?
A. I referred to that printing I had done that, as he knew and as I stated in it, I had no right to do.
Q. What did you ask him to do?
A. I spoke to him—I did not ask him to do anything, I think.

Thus adding proof that the Democratic officials are using not only the subordinate officers under their employ, in the pay of the Government, to do the labors to print Democratic circulars on the printing-presses of the Government, but using the Government paper and postal-cards for that purpose.

Below I submit some extracts from papers showing complaints from different parts of the country:

Mr. PLUMB. I ask now that an extract from the Topeka Capital, commencing with the marked part, be read.

The Chief Clerk read as follows:

"Let us consider for a moment what would be the result if the proposed investigation should be made as asked for by Mr. PLUMB in the Senate and Mr. PERKINS in the House. The Post-Office Committee, after thorough inquiry, would find that the heads of the Postal Department were engaged in a censurable effort to serve the public with postal arrangements entirely inadequate, utterly refusing to recognize the fact that the entire West was being flooded with a vast increase of mail-matter without corresponding increase of force to handle the same. The said committee would moreover find that these Department heads had full knowledge that this was the cause of the whole trouble and that it was entirely in their power to accomplish a speedy remedy if their purblind meanness was not too deeply rooted.

"From among the thousand cases of willful neglect to serve the people properly the committee might take the condition of the Kansas City and Pueblo run on the Atchison, Topeka and Santa Fé with which to illustrate their report. This run received at Kansas City on the 1st day of July, 1886, 11,653 pounds of mail-matter, to handle which, as well as other pouches taken on *en route*, the run employed a force of 40 men. On the 1st day of August, 1887, the same run received at Kansas City 23,000 pounds and the force has been augmented by 8 new men. In other words, 48 men were expected to handle 23,000 pounds of mail, while one year before 40 men had all they could do to properly handle 11,653 pounds, or an increase of over 100 per cent. in labor and of one-sixth per cent. in laborers. And even this small addition was not given till the old force had struggled with the work till they fainted at the rack.

"Moreover, the committee would find that as a result of the rapid filling up of Kansas, and the States and Territories west of her, that the mail received on this run has increased since August 1, 1887, at a greater rate than at any time in the past, till now it is absolutely impossible for the present force to extricate from the pile of pouches under which they are buried every day.

"R. M. Thomas, superintendent of the railway mail service in the seventh division, in a desperate effort to expedite matters, divided this run at Dodge City, ordering the east end to work Kansas and New Mexico, Arizona and what is known as No. 3, leaving Colorado and Utah for the west end.

"With four men to a car the east end is not able, at present, four days out of the week to get through with Kansas alone, and all the rest is left for the west end to handle when there is only two men to the car, making it necessary to throw off New Mexico and Colorado at La Junta most of the time. Very often the east end can not work No. 3, then the west end has it to do first, so that frequently over 100 pouches of Colorado mail is left to be worked during a run of 65 miles, a greater part of which, of course, is thrown off at Pueblo unopened. A large portion of this is daily papers. The transfer clerk does the best he can with it, and sometimes gets it started back within forty-eight hours. The committee would find that the remedy for the evils on this run was very simple.

"Let it be restored to its former condition when the men ran through, thus saving three or four hours which is now lost in tying out racks and rehanging and in receipting for twenty or thirty pouches of registered mail; put four men to a crew and two helpers from Kansas City to Newton, making fourteen new men in all, and any mail could be handled to the entire satisfaction of the public.

"Chief Clerk Hunter, at Kansas City, and Superintendent Thomas, at St. Louis, know well enough what the trouble is, and have, no doubt, asked for sufficient force, but it has not and will not be given them. These gentlemen also know that the old men are being so overworked that they are becoming discontented, and a large number of them are making arrangements to leave the service. New men can not stand it to take their places, so that the situation seems to be growing more deplorable every day.

"If the committee should be of a particularly prying turn of mind it might find, hidden away somewhere, a private circular which a certain head of a Department thought necessary to issue to the postal clerks, instructing them not to talk with any one excepting the head of their own department in regard to any trouble in the mail service whatsoever, or to ventilate any 'supposed' grievances on account of overwork or otherwise, to a newspaper man or any one else, and that any knowledge of a violation of the order would be followed by immediate dismissal from the service. Thus deliberately they write themselves egregious asses and complacently wave their ears over that solemn truth."

Mr. PLUMB. I also send up a slip from the Emporia Daily Republican, which I ask to have read.

The Chief Clerk read as follows:

"The Soldiers' Tribune, of Lyons, Kans., joins the plaint against the inefficiency of the present mail service. Says the Tribune: 'The Emporia Republican and Newton Republican frequently come straggling in from the west, tired, weary, and as much the worse of the wear as though they had been on a health-seeking tour to Colorado or New Mexico.'"

Mr. PLUMB. I send up another extract, from the Topeka Daily Capital, which I ask may be read.

The Chief Clerk read as follows:

"HOW LONG, O LORD!

"How long must the people of Kansas endure the present infamous and outrageous mail service?

"Every day complaints come to this office from subscribers of the Capital in Kansas, asking if something can not be done to remedy the existing evil. We have called attention to this miserable service repeatedly, our Congressmen have presented the complaints of Kansas people to the Democratic House only to be ignored and ridiculed. Every effort possible has been made to correct the miserable manner in which the mail-matter is handled, and yet no relief comes.

"Yesterday one of our subscribers at McPherson wrote us that the Capital never reached that place on the day of publication, and that two or three days' mail would be dumped in there at one time. There can be no excuse for this delay. The Capital is mailed in the Topeka post-office each morning, and it should leave on the 1 o'clock train in the afternoon for McPherson, and reach that place by 4 or 5 o'clock.

"The rotten mail service in Kansas and the entire West is enough to damn the present Democratic Administration. It has shown itself wholly incompetent to handle this most important Department of the public service, and when the time comes there will be a rising up among the outraged people of the West against this Administration that will relegate it to a deserved oblivion.

"Speed that day."

Mr. PLUMB. Now I ask that there be read a letter from the manager of the Kansas City Journal, which covers a point mentioned in a speech of the Senator from Texas yesterday about the fast mail.

The Chief Clerk read as follows:

"KANSAS CITY, MO., *February* 1, 1888.

"DEAR SIR: Thanks for your efforts in behalf of a public wearied with hopeless waiting for an improvement of methods and reform in the administration of that Department of the Government which comes into the daily business and social life of every intelligent citizen of the West.

"I wish, without lengthening my story, to give a phase which can not be charged up to inefficient subordinates. Upon a railroad to Smith Centre, Kans., which has been in full operations three months, there is no mail service. Upon the authority of a post-office official, I state that on the Chicago, Kansas and Nebraska (Rock Island system in Kansas and Nebraska) nothing beyond a pouch service is yet in operation, and this not until long after the road had been in business.

"The Chicago, Milwaukee and Kansas City Railroad, after long delay in bridging the Missouri River at this place, put on their freight trains last November and passenger trains about the 1st of December. There is no mail service on that road yet, and our papers for Excelsior Springs, about 35 miles from here, are sent out on a freight train. The opening of such lines must be known months before such opening actually transpires, yet no move is made to use them as postal routes until after in operation. Usually three to four months' time elapses then before the Department begins to make an expense, and saves so much to enter up as political capital. The service when begun, badly as it is managed, is not more disreputable than the beggarly management at headquarters. 'Like master like man' finds its exemplification in the postal service of the United States. A 'barren ideality,' the fast train upon whose movements thirteen roads wait here at Kansas City, detains the sending of two-thirds of all mail going from this vicinity into Kansas from two to four hours.

"The local force at Kansas City, and every city of the Missouri Valley, is seriously inadequate; to serve a 'penny wise and pound foolish' economy.

"Yours, respectfully,

"J. A. MANN.

"Hon. P. B. PLUMB,
"*United States Senate, Washington, D. C.*"

Mr. PLATT. Will the Senator from Kansas allow me to put in an extract from a letter which I received yesterday while the Senator from Texas was speaking?

Mr. PLUMB. I will.

Mr. PLATT. I wish to show that this complaint is not confined to the West. Indeed, scarcely a day passes that I do not receive from my constituents writing me on other subjects complaints of the inefficiency of the mail service in Connecticut. This letter is from the Henry Bill Publishing Company, of Norwich, and I read that portion of it which relates to the mail service; it is dated February 11, 1888:

"NORWICH, CONN., *February* 11, 1888.

"DEAR SIR: We are very much annoyed and troubled by the apparent disorganization of the whole postal system of this country, caused, as we believe, by the removal of experienced postal-route agents and others and putting inefficient men in their places. Our entire mail matter is very much delayed. We do not receive letters from any part of the country as quickly by twenty-four hours as we used to, and from many parts it is delayed for days. Besides this, large numbers of letters that we send out are never received by the parties to whom they are sent, and the same with letters sent to us.

"We are the largest patrons of the post-office in this city, sending out about one-ninth of all mail-matter that goes from here, and our business extends over the entire country, and has to be transacted almost entirely through the mails, and the delays and other things that we have spoken of are very serious losses to us. A letter sent to us from Palmer, Mass., a distance of less than 60 miles, did not reach us for more than a week after it was sent, and this is a sample of a large number of similar cases that we could mention. But our greatest trouble is in so much mail-matter being lost, and we think the trouble is that the mail-route agents, being inefficient and not able to do the work that the thoroughly skilled and efficient route agents have been doing, are tempted to destroy the matter, as they can not distribute it.

"I presume it is useless for us to make this complaint, but think it best to let you know how we are bothered.

"Hon. ORVILLE H. PLATT,
"*United States Senate, Washington, D. C.*"

The Chief Clerk read as follows:

"The time has come, in fact it came long ago, for the United States postal authorities to do something for the Western mail service. We do not know whether the rank service which we have been receiving is due to incompetency or lack of sufficient help, but one thing we do know, that it is about as weak as the people are going to stand by and accept without kicking vigorously. Day after day, week in and week out this office has received numerous and repeated complaints of failure to receive papers. We have traced the matter down and find that it is due to the rotten mail service. We are possessed of ordinary patience, but the time has gone by for us longer to remain silent. Yesterday morning at 3.30 the greatest outrage that has ever been perpetrated upon a daily newspaper in Kansas since the State was admitted into the Union was served the Gazette by the route agent who worked the mail going west on train No. 203, either through ignorance, drunkenness, imbecility, or maliciousness, we know not which."

To the foregoing I now add an extract from the Memphis Avalanche, a Democratic newspaper. It is headed "The Cause of the Trouble:"

"There can be no doubt that Senator PLUMB had a partisan object in asking for an investigation of the mail service of the West and South, which was declared to be inefficient. But it is to be regretted that it did not pass. The service is not what it should be. There can be no doubt of the truth of that proposition. Complaints are numerous and well-grounded, but the cause is not that ascribed by Mr. CHACE, who claimed it was due to the fact that 90 per cent. of the employés had been dismissed. Upon investigation it will be found that the trouble does not come from the ninety Democrats recently put in office, but from the ten Republicans who are allowed to remain."

I shall not make any remarks about the comparison between the strength and virtue and so on of ten Republicans as compared with that of ninety Democrats.

"Every one of them would be glad to see a change, and few of them would hesitate, in a quiet and unobtrusive way, to put a spoke in the wheel of the Democratic wagon. By all means let us have an investigation of the affairs of the Post-Office Department as administered in the South."

I have also an extract from the St. Joseph Gazette, one of the leading Democratic papers in Western Missouri:

"A postal clerk, who is not employed on the Central Branch, informed an Atchison Champion reporter lately that the principal cause of irregularities in the mail service on that road is the lack of car-room and facilities. He says the letter mail is amply provided for, but this requires nearly all the available space in the cars, and there is no room to handle the newspaper mail. The Gazette would like to believe that numerous and constantly recurring irregularities in the newspaper-mail service of the territory in which it circulates depend upon causes so easily remedied as the one reported from the Central Branch. This would at least lend to a very damaging annoyance continually suffered by the press the hope that the trouble is not altogether irremediable."

It will be seen that the complaints are pretty evenly distributed between Democratic and Republican newspapers, and the Senator from Texas will have his labor for his pains if he seeks to make the people of the West and the South believe that they are having a good mail service when they know very well they have not.

Mr. PLUMB. Mr. President, I thought I had presented sufficient newspaper extracts. But having been reproached by the Senator from Texas with partisanship, I will contribute now the Democratic quota to the complaints against the Department. I will read first from a paper published at Pine Bluff, Ark., vouched to me as being a Democratic paper:

"The large crowd in front of the post-office every morning waiting for a turn at the general-delivery window shows that the amount allowed by the Government for clerical help is certainly inadequate to the needs of the office. The niggardly style in which the postal affairs are run is not at all satisfactory to the public. Congress should do something to rectify this condition, and failing to do it, it will have some vicious things said about it. It is a serious thing for the laboring people of this city to be compelled to wait hours for a chance to get their mails. No blame can attach to Mr. Alexander, as we understand it, for this state of affairs, but the trouble lies in the small allowance made for clerical help. Pine Bluff is no village now. She is a city of about 15,000 people and growing fast."

Mr. PLUMB. I ask the Secretary to read in this connection the article which I have marked, being an extract from a leading Kansas paper, the Daily Capital of Topeka, and which appears also in the CONGRESSIONAL RECORD of the 22d of this month.

The PRESIDENT *pro tempore*. The Secretary will read the paper, if there be no objection.

The Chief Clerk read as follows:

"THE MAIL SERVICE OF KANSAS.

"Never at any time in the history of Kansas has there been in the United States mail service such an utter disregard of the rights of the people as at this time. Notwithstanding the great increase in population, the stupid attempt on the part of the Administration to make a record for economy has cut down the clerical force necessary to properly distribute the mails at large offices and in the mail trains, and it is consequently too small to do the work. Tons of mail-matter pass through Kansas on the train westward that can not be disposed of by the force allowed by the Post-Office Department. The result is that it is carried past the towns where it belongs, and brought back after two or three days' absence in Colorado or New Mexico. It is not the fault of the railway clerks, because the Department asks of them a task that it is not possible for them to perform. The people of Kansas have been patient, and the press has been lenient over this Democratic folly. Mails going west are so heavy that men working to the extent of their strength, doing more than double duty, can not handle them.

"Appeals to the Department at Washington for adequate help to take care of this important public service are unheeded. The railway mail service through Kansas has become criminally neglected, and it is time this attempt of the Democratic party to make capital by a show of false economy should be brought to the attention of Congress. In reply to continued appeals for the Department to send a man to examine the railway mail service in Kansas, a man came, and overlooking the tons of mail that could not be distributed in time to be thrown off at the towns where it belonged, he succeeded in having two or three clerks fined for not having the regulation gold-lace band on their caps, and thus civil-service reform was indorsed and the record of the party for economy maintained."

Mr. PLUMB. I offer also a letter received a day or two since from the secretary and business manager of the Kansas City Journal, one of the leading daily papers of the West, on the same subject.

The Chief Clerk read as follows:

"KANSAS CITY, MO., *January* 28, 1888.

"DEAR SIR: Is it possible to bring to bear such pressure, by means of a Senate committee on investigation of Western mail service in Missouri and Kansas, as will rectify the present demoralized condition of said service?

"Our relations to this service are such that we suffer more perhaps than any other line of business and know more of its delinquencies than those engaged in other vocations.

"I can say after eighteen years' continuous labor in this one office, with full facilities for learning as to general efficiency of the mail service, that it was never so bad nor so badly administered as during the past year, and that the tendency at this time is toward a down grade. Can you give this attention and bring it before the people in such manner as to lead to a reform?

"Very repectfully,

"J. A. MANN,

"*Secretary and Business Manager Kansas City Journal.*

"Hon. P. B. PLUMB, *Washington, D. C.*"

Mr. PLUMB. To meet the possible suggestion that the information contained in the newspaper article already read and the letter from the business manager of the Journal may be colored, being from Republican sources, I send to the Clerk's desk to be read an article from a paper claiming to be the leading Democratic paper of Kansas, and the official organ of the party in that State, which will show that complaints are not confined to Republican sources. The article is from the Abilene Gazette, a daily paper published at Abilene, Kans.

The PRESIDENT *pro tempore*. The paper will be read, if there be no objection.

I have very carefully avoided putting into the RECORD anything that was said of a partisan character in regard to this matter. In sending up to be read slips from newspapers I have carefully eliminated all possible which had any partisan tinge whatever, including only that which contained a bold narration of the facts connected with the mail service in the West. I should like to add a little to the record, and directly in the line of the defense set up by the Senator from Texas. In a particular case, that of a Democratic newspaper in Kansas which made complaint of the service, the Senator from Texas alleges that it was due to a failure on the part of the publisher of the paper to get the required certificate from the postmaster. That is simply an incident in the general complaint; it is not the substance of it at all. I will ask to have read from the same paper, the Abilene Gazette, another specification; it being, as I have said before, a Democratic paper.

The PRESIDENT *pro tempore*. The article will be read.

The Chief Clerk read as follows:

"Junction City is 25 miles from Abilene. The trains leave here at noon and arrive there at 1 o'clock. The fifty subscribers of the Gazette at Junction City received three days' papers at once, and yet they wonder why we are old before our time. They think it strange that we kick. Call it indiscretion if you want to, but even Job would murmur if he ever had such an experience as this.

"The Gazette reaches Junction City, 25 miles from here, by way of Kansas City. Now, this seems strange, but it is a fact. The route agents prefer to do this way, and while it is some little inconvenience to the public and to us, still we will stand it.

"After all, the old-fashioned mail system was pretty fair. It had its conveniences, and you knew just when a letter or a paper would reach its destination when it was once mailed.

"The Topeka Commonwealth has not been received at Abilene for four days. We will receive a bundle perhaps in a few days. They will come via Denver by fast freight."

Mr. PLUMB. I now ask to have read a letter written by a subscriber to the Atchison Daily Champion, and published in that paper a few days since.

The Chief Clerk read as follows:

"WHITE CITY, KANS., *February* 6, 1888.

"GENTLEMEN: Is there no remedy for the irregularity of the mails?

"I commenced to take the Daily Champion some three months since, because I like it better than any other State or Kansas City daily, and have taken it some twelve years; but I am almost discouraged. My papers come to me from two to four days old; for instance, I got my paper dated February 2 this morning, February 6, just four days in transit. The Department had better put on the old overland stage, drawn by faithful mules; would then get it in two days at least. We have two railroads, the Chicago, Kansas and Nebraska and Missouri Pacific, and get mail four times daily.

"T.

"ATCHISON DAILY CHAMPION."

Mr. PLUMB. I will state that the point at which that letter was written is about 75 miles distant by rail in a direct line from the place where the paper is published. It took, as the writer says, four days for the paper to get that distance of 75 miles, and there are four trains a day.

I now ask that there be read an extract from the Atchison Daily Champion on the same subject, commencing with the marked part.

The Chief Clerk read as follows:

"It is an undeniable fact that never in the history of the country has the Post-Office Department been so inefficient as under the present Administration. There has been one unbroken series of delays and inexcusable blunders in the transmission of the mails, and in the different post-offices of most of the States, especially Kansas, gross and almost criminal carelessness has been the rule for the past two years. Newspapers, letters, and packages, plainly addressed, have either been delivered to the wrong parties, or remailed to other points, or piled up in the offices, where they were deposited and not delivered at all. In some cases the fault of all this is with the Department at Washington, the authorities not providing clerical help; in other and most cases the fault is in the local offices, where ignorant and incompetent help is employed.

"Not only have the mails been badly managed, and the business of the country been embarrassed in consequence, but the rulings of the Department, in nearly every instance where postal questions have been submitted, have been distinguished for their stupidity and want of a broad and intelligent appreciation of the needs and rights of the public.

"A case in point is that recent order requiring all letters mailed on a train to be put off at the first office to be canceled by the postmaster, the postal clerks not being allowed to cancel stamps, which subjects business men to unnecessary inconvenience and loss of time, and an indication that the Department is not disposed to accommodate the public when it can be done as well as not and without additional expense. The same style of doing business characterizes every other order that has been issued by the Department for the last two years. It all shows that the Post-Office Department is now in incompetent hands and that it and all the other Departments of our Government have outgrown the limited capacity of the Democratic party."

Mr. PLUMB. I now ask that there be a paragraph read from the Orange City Free Press of date of February 4, 1888.

The Chief Clerk read as follows:

"WORSE AND MORE OF IT.

"Friday morning all newspaper mail from the east destined to this office was carried on west or eaten up by the route agent. No mail of any description was received from the west. If this thing keeps on people will be obliged to transmit their mail by private carriers. Let us hear from the Abilene Gazette again. The Gazette, by the way, has not been received at this post-office now for three days."

Mr. MANDERSON. Mr. President, I must confess my surprise at the charge made by the Senator from Texas that this is in the nature of making political capital rather than an earnest and honest desire to correct an existing evil. Certainly nothing that was said by myself the other day would warrant that assertion. I sought simply to present a defect in the administration of postal affairs in the State that I have the honor in part to represent.

I read letters that had been received by me from the editors of newspapers. I stated, not, perhaps, at such length as I should at the time, some of the personal complaints that had come to me, not only from those editing public journals, political journals, but from those engaged in all trades and in all professions. I perhaps should have gone further and should have said that my attention had been called to the matter by personal knowledge of the administration of the postal affairs of my own State. I am giving nothing at second hand, but I could very properly give here, if time would admit, my own experience as to the defects of the postal service west of the Missouri River.

I indulged in nothing in the way of complaint or censure of the Post-Office Department, but it is marvelous to me that in the presence of this record showing the character of the debate that occurred here the Senator from Texas should indulge in this sort of remarks. Why, Mr. President, I turn to the debate that was had here on the 1st day of February and I find that the distinguished Senator from Alabama [Mr. MORGAN], not a Republican, but one in political accord with this Administration, followed in the line of the suggestions made by the Senator from Kansas [Mr. PLUMB], and expressed his gratification that this resolution had been introduced recognizing that there were evils which demanded attention. I read one or two extracts from the speech of the Senator from Alabama. He said:

"The clerical force to do this work has not kept pace with the increase of all mail-matter carried over our lines, nor have the salaries that belong to the inferior officers in the service of the Government of the United States been increased sufficiently to enable them to do this additional amount of work."

Again he said that we not only ought to increase the pay, but we ought to provide for the increase of the number of these postal clerks.

The Senator from Kentucky [Mr. BECK] said:

"Mr. President, I should like to say a word, if I may be allowed. I have looked into this matter with some care of late, and I am glad that the resolution is offered, and hope it will be adopted, because it is going to develop a great many things."

Again he said:

"I hope all this will be gone into and developed, and then let us do something which will make the service good and efficient."

Here is pretty fair Democratic recognition, it seems to me, that the present service is bad and inefficient; and it is not that we desire to censure the present Post-Office authorities, but because we want to remedy these existing evils, that we press this matter. The Senator from Texas, authorized so to do by the Post-Office Department, in his speech delivered yesterday spoke of the complaint that was made by Mr. Rounds, who at the time of his death was one of the proprietors

and one of the editors of the Omaha Republican, a Republican journal published in Nebraska. I do not think that Mr. Rounds in this presence needs anything in the way of indorsement. Every man here knows him from personal association with him to have been a truthful, honest man. I read from a letter by him in which he complained of the difficulties under which his journal labored along with other citizens of that town. I am told that all the foundation there was for that complaint was that some young men, three in number, one being discharged after another, who were employed by the Omaha Republican Company to attend to its mailing-list, had neglected to place the address on the wrappers of the newspapers, and they had been thrown in the waste-basket, and in that way had miscarried.

It is quite likely that that complaint was made, but that complaint was made on the 16th day of June, 1887. The investigation immediately followed, and the report from which the Senator from Texas read is dated the 6th day of July of that year. But the letter I called the attention of the Senate to and that I read in part was dated the 26th day of November, 1887, and this is the complaint that it made:

"Without any disparagement of our present post-office officials"—

And so we say here. We do not disparage the competency of the gentlemen who are in charge of the Post-Office Department; we do not attempt to give the reason for this abuse, but we enter our protest in this, as we claim, the proper place for the entering of such complaints.

"Without any disparagement of our present post-office officials, everybody knows and complains of the mail service here. Especially is this true as regards our paper, and, we presume, the others in this city, and we are in constant receipt of complaints from subscribers of the non-receipt or irregular and late receipt of their papers."

And I read a corresponding complaint from Mr. Hitchcock, the editor of the Omaha Journal, in which he said, after speaking of his own difficulties:

"What is true of the newspapers is true of bankers, wholesale merchants, and others having heavy mails. The service is abominable, but the postmaster is not to blame. He and his force are up to their ears in mail-bags, overwhelmed with work, and crowded into inadequate quarters."

AN OPEN LETTER—THE SHAMEFUL MANNER IN WHICH BUSINESS IS TRANSACTED AT OUR POST-OFFICE.

OFFICE OF THE H. P. HUBBARD COMPANY,
New Haven, Conn., October 10, 1888.

FRIEND BEN.: September 19th we wrote an important letter to the Providence, R. I., Dispatch, a new Republican daily; not getting any reply, we wrote again on the 24th. Patiently we waited until October 2, when, entirely out of patience, we telegraphed them for an answer, collect, thinking it was their fault. They answered, saying that they had not received either letter. We then wrote on the 5th, repeating our former letter, and, to make reasonably sure of their receiving it, we paid you 10 cents and registered it. Your receipt is dated the 4th (evidently an error), and yet, allowing this one day, how is it that it should take four days for the letter to be delivered to them? We hold the return registry card signed by them on the 9th. Omitting Sunday for rest, the highly intelligent reformer, to whom, in the line of your duty, you intrusted this registered letter, must have walked over, making an average of 68 miles a day. Has he returned yet, and is he tired?

I have not as much objection to the victors enjoying the spoils (while they can), but as a pure matter of business do seriously object to this sort of employés. The Department should appoint competent men, or else not discharge those who are faithful.

With great regret at the disorganized condition of the service, as evidenced by frequent blunders and delays,

I am yours, truly,

H. P. HUBBARD.

BENJAMIN R. ENGLISH, *Postmaster*.

I have received from a friend in Pasadena, Cal., a letter from which I read the following extract, the letter written to this party having been sent to Pasadena and returned reinclosed to them. I quote:

I regret very much that it [the letter] should have been so long in reaching me and should have made a fruitless trip across the continent and back. It is entirely due to our bad post-office here. About the time that letter came the state of our mail could hardly have been worse, and I think it really is a very serious drawback to living here. Only those people who had lock-boxes were sure to get anything, and they even missed letters and scarcely received any papers. The papers were just neglected and set about the post-office in sacks, and any one who wished or had the opportunity helped themselves to them. We have had a lock-box all the time, but a registered letter with the full address and box number on it lay in the office nearly a month before we received it. I am told it was even worse at San Diego, where the postmaster deliberately had several loads of unassorted mails carted off and dumped into the bay, because, he said, there was no time to sort it.

These are only samples of a few of the complaints that have come from the newspapers and individuals all over the country. I might fill the RECORD with them. At first the people complained, then they became angry, and at last the thing has become a standing jest, and the people use the United States mail as the standard of comparison for slowness, inefficiency, and uncertainty.

HOPES FOR THE FUTURE.

The record for the past thirty-five years proves that the hope for the highest measure of prosperity for the postal service lies in the success of the Republican party. The first important reduction of letter postage in this country was made less than fifty years ago, during the term for which General William Henry Harrison was elected President. At that time the postage on an ounce letter from New York to Pittsburgh was $1. In 1888 the Republican Presidential candidate, General Benjamin Harrison, is pledged by the platform upon which he was nominated to an effort to secure the carriage of an ounce letter anywhere within the wide extent of the country at a charge of 1 cent.

Such is the wonderful transformation of the postal service within two generations, and such the record of the two parties in the management of this great Department.

Mr. CALL. Mr. President——

Mr. DOLPH. I ask the Senator from Florida to give way for a few moments until I can put a question to the Senator from Iowa, who reported the bill.

Mr. CALL. Certainly.

Mr. DOLPH. I learn that there is an anxiety among some of the people on the North Pacific coast in regard to the provisions of the Senate substitute as to the tariff on coal. I should like to ask the Senator from Iowa if the substitute puts coal upon the free-list in any form, and what the provisions of the substitute are in regard to coal?

Mr. ALLISON. I have had several inquiries in the same direction. "Coal-slack or culm of coal" is put by the substitute upon the free-list; but that is one of the mistakes of the measure, and really it should have been corrected before it was reported. However, it is the intention of the committee, at least of the majority of the committee, that coal-slack or culm shall pay a duty as now.

Mr. DOLPH. Will the Senator explain what the article is that he now mentions?

Mr. ALLISON. It is refuse coal which passes through, I believe, a half-inch screen, by regulation of the Treasury Department; but it is difficult to distinguish between coal and coal-slack. The committee propose to put all coal upon the dutiable-list at the rate now provided by law—75 cents a ton for coal, and slack at 30 cents a ton, as now. I will say to the Senator that is one of the amendments the committee will propose when the bill is taken up by paragraph for amendment.

[Mr. CALL withholds his remarks for revision. See APPENDIX.]

Mr. HAWLEY. Mr. President, I have taken the floor upon the pending bill known as the tariff bill, and have brought my notes and documents here with the intention of making what is commonly called a speech, perhaps of an hour and a half; but I shall frankly confess, Mr. President, that I have not the courage. My heart fails me, and partly because my heart is in another place. I am to speak in Connecticut to-morrow night, and I think I belong there.

I am very glad this Senate tariff bill has been reported. I think it in the main a very good bill; perhaps the best first draught that was ever submitted to Congress. It is the result of diligent, I may say intense, labor for some months on the part of the Republicans of the Senate Finance Committee. It is the result of a search for information from all the sources they could think of best qualified to inform them. It is built upon a definite principle in the maintenance of the old doctrine of protection, which, excepting at intervals, broken at times for a short period by acts that resembled a free-trade tariff, has been the doctrine of the country; and also the doctrine of all the large civilized nations of the world with one single exception, and that exception is a country which can not possibly afford to adopt such a tariff. It is absolutely out of the power of Great Britain to make the protective tariff that we contemplate, because we have (what Great Britain has not) within our limits, somewhere between the Atlantic and the Pacific, the northern lakes and the southern gulf, nearly every possible element that is needed for the support, the progress, and the glory of the nation; everything in the mines, everything in the field, every textile fabric. All these things are laid before us, and the possession of these wonderful resources of this great variety of climate—this very possession of itself intimates a command from the Divinity that we should improve it and build up a great people here.

Our duty is at home as a nation, not in any narrow, contracted, illiberal, or unchristian spirit; but in a great and broad sense our duty is at home. No such task was ever laid upon a race of people or upon a continent as is placed upon us here.

Why, sir, we hear a demand that we shall seek a foreign market and not limit ourselves to the confines of our own land. Gentlemen forget that the marvelous growth of this country is such as to tax all its own marvelous powers. Seek a foreign market, sir! We shall bring into this country in this decade by the natural increase and by immigration a body of people equal in numbers to the whole of Spain. Sixteen or seventeen millions of people are coming here, being born here, to grow up here and have homes. Their houses are to be built, their furniture is to be built, the iron ware is to be furnished, their farming implements, their fences are to be put down, their churches and their schoolhouses are to be built, and their clothing is to be made, and all this is to be done for sixteen new millions of people between 1880 and 1890, and in the next decade it will be done for 18,000,000 of people. We need not be disturbed about foreign markets, neither need we be seeking for work to be done outside. We shall find foreign markets and work, but we have a great work at home.

We are reproached for the lack of a foreign commerce. We built in the year 1887, if Mr. Poor, an established authority, is to be accepted, 12,000 miles of railway. Our book of statistics says it costs $65,000 a mile to build and thoroughly equip a railroad. If that be true, and if it be true that Mulhall is right in saying that steam-ships cost from £16 to £24 per ton, then, accepting the highest of these figures, we find that the railways built in 1887 in the United States cost twice as much as all the steam-ship tonnage of Great Britain, and we have in one year a means of commerce that more than doubles the three millions tonnage of steam-ships which is the boast of that nation and the admiration of the free-trader.

That is where the resources of this nation go, where the savings and the earnings of this people go, to building up the nation. If by any legislation of ours we can erect such barriers, such dikes, such breakwaters as to protect our people, in all this grand transformation, from sudden inroads from without, from unjust and unwise competitions, it

is an obvious duty to do it. There is no Christian duty to-day resting upon us to leave our well-paid labor here open to the rush of illimitable quantities of goods from an overcrowded market dumped in upon us to the derangement of our industries. We are under no obligation to do that.

It is a misfortune, if you please, of many other nations that their people are ill-paid and ill-fed and ill-clothed; that they are not as productive, man for man, as ours. It is the inheritance from previous bad government. No matter from what fault or what reason, there are the facts. It is moreover a fact that you can not scale down the wages of the American to the wages of the European by any legal process or by any effort that man can put forward, because this nation, on this continent of illimitable resources, has great demands for labor, and will have for generations. There is a greater demand here than anywhere else, and the rewards of labor will continue higher than elsewhere. But yet a breaking down of our industries by legislation, by a reversal of the old legislation, would cause, undoubtedly, a lowering of those wages, while it could not bring them to the figure where they could successfully compete in foreign markets for a great many of the manufactures of the world.

We are nearer an honest and honorable trial of this great question than ever before. The jury is ready. Twenty-five days from this the question will be decided. The issue is free trade against protection, not frankly even now as I wish it to be made, yet I have in my eye at this very moment, in this Chamber, men who do not disguise it. Every free-trader in the United States understands perfectly on which side of this contest he belongs. The Free Trade League at its last annual meeting, in its resolutions, set forth almost precisely, indeed precisely, the course that has been pursued in the preparation of the Mills bill.

It is their programme for the advancement of the cause, not that we should undertake now directly to apply to ourselves the tariff which Great Britain has, but that we should sap and undermine by beginning, for example, with what some of them call raw materials, disregarding the fact that what is raw material to one man is the finished product of another, and that we shall begin also by an assault upon weak spots here and there that we may break and divide the forces of protection. For example, by making salt and wool free—making wool free in an endeavor to divide the manufacturing forces of New England, New York, and Pennsylvania.

So the issue is truly made. The question is whether we shall begin a course of entire economic reconstruction of the United States and pass through years of disturbance and readjustment. If the free-traders shall have their own sweet will by the possession of the executive and both branches of the legislative department, it is not to be supposed that they will begin with the British tariff. Indeed they would soon throw themselves out of power by that. Mongredien, one of the ablest writers in behalf of free trade, lays down the policy for a nation in our circumstances, if it is to undertake this economic revolution. He advises that it begin as the Mills bill begins and as the Free-Trade League advised, with one thing or a few things at a time, hoping that a change in that way might not be violent and permitting men released from one industry to easily turn themselves with their capital to another.

But, sir, as I said, I do not intend to enter fully into this argument. I am going where the jury is. The bill has been presented; its purposes and general character have been set forth by the authors of it. Those who desire to speak here upon it can do so, but the people are not looking this way nor caring much what we say or do now. No one supposes that the bill can be discussed item by item, as it must be and as its friends wish to have it discussed before the final vote is taken. That work must inevitably go over until December. It is my humble judgment that the best service that the Congress of the United States can do is to go home, and I do not think I am deserting duty by saying that, for one, I am going.

Mr. REAGAN. Mr. President, I think the country is to be congratulated on the fact that in the pending political contest there is submitted to the people a great political issue which affects all the interests of the country, and which calls for the determination by the people themselves of the true principles which should govern in the levying and collecting of taxes for the support of the Government.

On the one side it is proposed by the theory of the Senate Finance Committee's bill to levy a tax upon the people of this country for the protection of domestic industries, and making the collection of revenue an incident and not the principal object of its collection. On the other side the proposition is that we shall levy and collect taxes for the support of the Government as provided for in the Constitution, allowing such protection as is incident to the collection of revenues for the support of the Government.

I am not prepared to say that if separately submitted I would vote for all the items in the tariff bill which was sent us from the House of Representatives, nor am I prepared to say that if separately submitted I would vote against all the items in the substitute bill of the Finance Committee of the Senate. But I do most earnestly approve the theory of the House bill which proposes to reduce the burdens of taxation on the people, and to reduce the surplus of revenue in the Treasury by reducing the rates of taxation on the necessaries of life. And I am as earnestly opposed to the theory of the Senate bill which proposes to reduce the surplus of revenue by reducing the tax on such luxuries as tobacco and whisky and raising the taxes on the necessaries of life, such as clothing, iron, steel, implements for use in agriculture and the mechanic arts, salt, lumber, etc., so as to exclude them wholly or in large part from importation and thus increase the cost to consumers.

I should have liked to present an analysis of these two bills and to call attention to the compound rates of duty imposed by the Senate bill, and to show how it increases duties above what is required by the present law and over those proposed by the House bill. But I can not do this unless I had tables reducing the mixed rates of the Senate bill to ad valorem rates. Such tables have not yet been prepared; nor can I now have time to make a satisfactory analysis of these bills.

I desire to express my preference, however, for ad valorem rates, which all can understand, to mixed specific and ad valorem rates which no one but an expert can understand, and which serves to hide from the public the extent to which they are taxed.

My principal object in the remarks I shall now submit is to make some reply to the remarks of the honorable Senator from New York [Mr. HISCOCK]. That Senator is one of the Senators who represent the most populous State in the Union, which contains much greater wealth than any other State in the Union, which controls a much larger internal and foreign commerce than any other State in the Union, which contains the great commercial and cosmopolitan metropolis of the Union, and in which is concentrated the great mass of the capital of this country employed in domestic and foreign commerce, in railroads, the telegraph and express business, in shipping, in mining, etc. He is one of the Senators from a State whose commercial and social relations are blended with those of the people of every other State in the Union, and whose commerce extends to every country on the globe. He is one of the Senators representing a State whose business and prosperity depend on the industries, commerce, and good will of the other States of the Union, and which is usually national and fraternal in its politics and organization.

In view of these facts we would naturally and reasonably expect those representing that great State and its vast and varied interests to be broad, liberal, national, and fraternal in their political views.

With the friendliest feelings personally for that Senator, and with a purpose to be entirely fair, I think it a duty to offer some criticisms on his speech of Tuesday last. In that speech he says:

> It is the same question that divided the North and South and incited a bloody and expensive war and the division is on the same agricultural and geographical lines. It is another great struggle on the part of our Southern friends for cheap and degraded labor and against the industrial system of our Northern States.
>
> There are several causes which have tended to increase the value of labor for the last twenty years in this country. The two most prominent are the manufacturing industries of the North and the abolition of slavery in the South. Democracy acquiesced in the latter, but is making its final struggle for the destruction of the former.

Further on the Senator makes the following statement:

> In this connection I refer to a startling feature of the Mills bill. I have before me a list of the principal products of the manufactories of the United States. The value and places of manufacture are taken from the census report of 1880, and doubtless there has been some increase since, but there has been little or no change in respect to the location or percentage of product in the respective States. I am assured. The list contains about one hundred lines of goods, all now protected. The aggregate value of the product for the last census year, 1879, was nearly two thousand million dollars. Of this amount less than 5 per cent. was manufactured in those States which composed the late Southern Confederacy, and a little more than 95 per cent. was manufactured and made chiefly outside of the States which contributed their quota to the Confederate service. This is a startling fact, but I have something still to add more remarkable. The Mills bill envelops them all within its cuttle-fish folds and provides a 38 per cent. reduction in the protection now afforded them by law.
>
> I have a table before me from which I desire to quote:
>
> Soap and candles, $26,260,792 worth made in the Northern States, and only $291,935 in value made in the Confederate States—placed on the free-list.
>
> Bags, other than paper, $9,635,300 worth made in the Northern States; $91,300 made in the Confederate States.
>
> Glass manufactures, $21,154,571 in value made in the Northern States; none in the Confederate States, and there is a reduction upon some of the grades or classes.
>
> Stone and earthen ware, $7,814,027 in value made in the Northern States; $129,702 made in the late Confederate States.
>
> Confectionery, a luxury, $23,880,672 in value made in the Northern States; $1,756,361 made in the late Confederate States, and a reduction of 20 per cent. of the duties or in the protection.
>
> Brushes and brooms, $10,272,527, the value of the products made in the Northern States; $288 328 made in the Confederate States; and a reduction from 20 to 33 per cent. in the protection.
>
> Iron-work, architectural (structural), $2,084,287 worth made in the Northern States, and $23,250 made in the Confederate States, and 11 per cent. reduction made by the Mills bill.
>
> Files, $2,486,533 worth made in the Northern States, and none made in the Confederate States, and a reduction of duty of 40 per cent. by the Mills bill.
>
> Nails and spikes, $5,629,240 worth made in the Northern States, none made in the Confederate States, and a 20 per cent. reduction made by our Confederate friends.
>
> Carriages and wagons, $100,463,044 worth made in the Northern States, and $4,278,292 made in the Confederate States, and a reduction of 14 per cent. made by their representatives.
>
> Furniture, $75,885,045 worth made in the Northern States, and $1,960,680 worth made in the Confederate States, and the Mills bill reduces the protective duties nearly one-half.
>
> Hardware, as classified in the census report, $22,644,793, worth made in the Northern States, and $8,900 worth made in the Confederate States, and a reduction of 11 per cent. is made by the Mills bill.
>
> But, Mr. President, I will not weary the Senate with calling attention to these various items.

Mr. HAWLEY. Will the Senator allow me to make a statement right there so

that it may go in in this place? I perceive that the majority of the Committee on Ways and Means which made up that bill is composed of Democrats from Confederate States in the proportion of six Democrats from Confederate States to two from Northern States.

Mr. REAGAN. If the Senator from New York will allow me, I desire to inquire in which class he puts the States of Maryland, West Virginia, Kentucky, and Missouri?

Mr. HISCOCK. I will say in reference to that that these products are largely in the Northern States outside of those States. The comparison I speak of here, however, is between the Confederate States and the others.

Mr. REAGAN. The aggregate, then, will embrace the States of Maryland, West Virginia, Kentucky, and Missouri?

Mr. HISCOCK. Yes, sir.

A word in reference to Texas. Perhaps it is proper that I should make this statement in view of the expression I shall quote from the remarks of the Senator from Texas [Mr. COKE]. We will take the products of Texas on this list. They are:

Brick and tile	$448,418
Carriages and wagons	301,800
Lumber, planed	456,600
Lumber, sawed	2,673,449
Oil, cotton-seed, and cake	276,450
Sash, doors, and blinds	416,500
Foundry and machine-shop products	532,778
Tin-ware, copper-ware, and sheet-iron ware	491,420

Of the products of those industries I have indicated Texas contributed $5,597,415 in value only.

Something has been said in respect to the constitution of the committee that reported the House bill. Texas was most prominently represented there, and the share she has had in the formulation of the bill it is unnecessary for me to refer to.

This statement is made by the honorable Senator to show that as the eleven States to which he refers, and which he designates as comprising the late Southern Confederacy, manufacture so little as compared with the other twenty-seven States that they ought not to have a potential voice in the enactment of laws regulating the duties on imports. It will be observed that the Senator excludes the States of Maryland, West Virginia, Kentucky, and Missouri from the list of Southern States, and adds their manufactures to those of the Northern States, doubtless for the purpose of showing the greatest possible disparity between the manufactured products of the Northern and Southern States.

These figures, so unfavorable to the Southern States, he tells us, were taken from the census of 1880, and he adds, "Doubtless there has been some increase since, but there has been little or no change in respect to the location or percentage of product in the respective States, I am assured."

To show that the Senator is not as well informed on this subject as he usually is, I present a statement showing the increase of population, the aggregate and the per capita increase of wealth, the increase in railroad mileage, in the number of manufacturing establishments, in the capital invested in them, in the number of employés in them, in the value of their products, in the value of mineral products, in the value of farm products, in the number of schools, the number of children who attend them, and in the expenditures for public schools in the Southern States between the years 1880 and 1888.

Items.	1888.	1880.	Per cent. of increase.
Population	18,942,858	14,639,714	29.4
Gross wealth	$3,240,774,722	$2,164,792,795	49.8
Wealth per capita	$171,111	$148,142	15.6
Railroad mileage	35,679	17,808	100.0
Number of manufacturing establishments	59,185	34,563	71.4
Capital	$426,597,000	$179,366,230	143.5
Number of hands	440,253	215,245	112.8
Value of products	$585,058,103	$315,924,794	85.4
Value of mineral products	$25,482,600	$3,347,445	760.6
Total value of farm products	$793,098,293	$611,697,048	29.7
Schools	62,038	45,031	37.8
Children in attendance	2,402,117	1,832,620	36.7
Expenditures for public schools	$11,742,.07	$8,415,706	83.2

Mr. ALDRICH. Will it interrupt the Senator from Texas if I ask him a question?

Mr. REAGAN. No, sir.

Mr. ALDRICH. I should like to ask the authority of the table he submits.

Mr. REAGAN. I will state the authority. I am indebted to the Washington Post of September 16 for this table, as copied from the New Orleans Times-Democrat. And the Post accompanies it with the statement that—

It is certain that in no other portion of the world has such a record been made in the past eight years as these figures contain.

I will state to the Senator that while I have not the papers before me, yet from having seen publications in the Manufacturers' Record of Baltimore, the table evidently came from that paper. It makes a specialty of collecting these statistics.

Mr. ALDRICH. I had a double purpose in asking the Senafor the question: In the first place, to find out the authority for an elaborate statement like that, which, if it could be made off-hand, would certainly save the country many million dollars in the collection of the census; and, second, whether he undertook to say, or was meant to be understood as saying, that the South had increased more rapidly in manufactures from 1880 to 1888 than the North.

Mr. REAGAN. I have no doubt it has.

Mr. ALDRICH. In manufactures?

Mr. REAGAN. Proportionately it has increased more rapidly. I mean the percentage of increase has been much greater in the South than in the North, in my opinion.

Mr. ALDRICH. Then the Senator's idea in making the statement is not to show that the South has suffered from a protective system?

Mr. REAGAN. That is not my object. The Senator may give that construction for his purposes if he chooses; but I made the statement to show that that increase has occurred in spite of a protective and oppressive tariff.

From the table I have presented it is seen that in that time the increase of population in these States has been 29.4 per cent., the increase of aggregate wealth 49.8 per cent., the increase of wealth per capita 15.6 per cent., the increase of railroad mileage 100 per cent., the increase in the number of manufacturing establishments 71.4 per cent., the increase of capital invested in manufacturing establishments 143.5 per cent., the increase of hands employed in them 112.8 per cent., the increase in the value of manufactured products 85.4 per cent., the increase in the value of mineral products 760.6 per cent., the increase of farm products 29.7 per cent., the increase in the number of schools 37.8 per cent., the increase of attendance in schools 36.7 per cent., and the increase of expenditure for public schools 83.2 per cent.

I desire, also, to present two tables copied from the Fort Worth Gazette of October 8, 1888, which were confessedly taken from the Manufacturers' Record. I desire to say in reference to that publication that it makes a specialty of obtaining information as accurately as it can as to the progress of manufactures in the Southern States, and I apprehend that it is reasonably accurate in its presentation of these statistics and facts.

The following table illustrates the increasing diversity of the new enterprises. We give the following comparison, showing the number organized during the first nine months of each of the last three years:

Enterprises.	First nine months of—		
	1888.	1887.	1886.
Iron furnace companies	15	26	8
Machine-shops and foundries	101	80	56
Agricultural implement factories	12	17	8
Flour-mills	114	98	71
Cotton-mills	59	59	9
Furniture factories	55	41	19
Gas-works	23	29	19
Water-works	73	65	21
Carriage and wagon factories	53	32	12
Electric-light companies	122	53	23
Mining and quarrying enterprises	361	444	114
Lumber mills, including saw and planing mills, sash and door factories, stave factories, etc	626	512	362
Ice factories	46	76	42
Canning factories	211	60	11
Stove foundries	4	3	5
Brick-works	128	141	43
Miscellaneous iron-works, rolling-mills, pipe works, etc.	28	56	16
Cotton compresses	35	33	11
Cotton-seed oil mills	23	15	3
Miscellaneous enterprises not included in foregoing	853	754	322
Total	2,942	2,594	1,175

Here is an increase in the first nine months of this year of 358 new enterprises compared with the same time in 1887, and of 1,767 compared with the same time in 1886.

Summing up the amount of capital and capital stock represented by our list of new enterprises and the enlargement of old plants for the first nine months of 1888 we have:

FIRST NINE MONTHS OF 1888.

Alabama	$19,939,000
Arkansas	6,900,000
Florida	2,946,000
Georgia	9,388,000
Kentucky	22,101,000
Louisiana	5,259,000
Maryland	6,059,000
Mississippi	1,591,000
North Carolina	5,254,000
South Carolina	3,850,000
Tennessee	8,060,000
Texas	14,836,000
Virginia	8,929,000
West Virginia	5,703,000
Total	121,415,000

I know that it is the habit of gentlemen who rely upon sectional prejudices, and whose interest and disposition it seems to be to disparage the South, to try in every way to discredit the progress of that country. They need but look at the extent of territory there, the character of that territory, its resources, both agricultural and mineral, its water power, its genial climate, and that energy which has enabled its citizens to do what they have after utter prostration and poverty, to see that in a few more years the people of the South intend to command the respect of even the fanatics of New England.

When it is remembered that at the close of the war between the States, twenty-three years ago, those States were desolated by a most

destructive war, their social and industrial systems overthrown; that a very large proportion of their men, in the vigor of manhood, had fallen in battle or died of disease in camp or hospital; and that for about four more years they underwent a process of political reconstruction, which, under the manipulations of the military, provost-marshals, Freedmen's Bureau officers, camp followers, and lawless plunderers exhausted the most of what little property the war had left them, with a servile race, for the most part wholly unfitted for the duties and responsibilities of citizenship, enfranchised and made the ruling class, the wonder to thoughtful men would be not that such a people were as poor as the Senator from New York would represent them to be, but rather that they had been able to reorganize society and re-establish civil government and make such wonderful industrial progress.

In reference to the poor figure the Senator makes Texas cut as a manufacturing State, if he had been as anxious to place her in a creditable light before the Senate as he seems to have been to discredit her enterprise, he would have recognized the fact that she is a new State, with no such accumulations of capital as exist in the older States; and a very little inquiry would have enabled him to ascertain that she is now the first cotton-producing State in the Union, produces about one-eighth of all the cattle in the Union, is now the first sheep-growing State in the Union.

Mr. DOLPH. Will the Senator from Texas permit me to ask him a question?

Mr. REAGAN. Yes, sir.

Mr. DOLPH. Did I understand the Senator to say that Texas was the largest sheep-producing State in the Union?

Mr. REAGAN. I will say to the Senator from Oregon that when the census was taken in 1880 California and Ohio exceeded Texas, but three years ago Texas had passed them in the race and had more sheep than either of them.

Mr. DOLPH. How many has Texas now?

Mr. REAGAN. Something over six million.

Mr. DOLPH. California has over six million, probably seven million.

Mr. REAGAN. The Senator has doubtless seen, as I have seen, from time to time, tables of this kind placing Texas ahead of all the other States as a sheep-raising State. Texas has more horses than any other State, except Illinois, and is steadily coming to the front in the production of corn and wheat, with farms of the value of at least $300,000,000; and besides these, has in money and land the largest school fund of any State in the Union or of any government in the world.

If the Senator had chosen to inquire he could have known that Texas cattle furnish a very large amount of the beef which feeds the good people of New York. And if he had chosen to consult the merchant princes of New York they could have told that their business was annually swelled by the receipts of the larger part of a million and a quarter bales of cotton, sent there from Texas, worth more than $60,000,000, and that Texas merchants buy probably more than that sum annually of merchandise in New York. And they would doubtless be able to tell him they have more respect for the people of Texas and of the South than he manifests.

The Senator from Connecticut [Mr. HAWLEY] having interjected into the speech of the Senator from New York the statement which I have quoted, that the majority of the Committee on Ways and Means, which made up the House tariff bill, is composed of six Democrats from the Confederate States—I am glad the Senator from New Hampshire [Mr. BLAIR] was not here to reprimand a brother Senator for using the term "Confederate States"—the Senator from New York proceeds as follows:

Something has been said in respect to the constitution of the committee that reported the House bill. Texas was most prominently represented there, and the share she has had in the formulation of the bill it is unnecessary for me to refer to.

I think Arkansas, as one of her Representatives was so prominent in the formation of the bill, should be referred to. That State manifestly should indicate the policy that should control or shape this country in respect to manufacture and protection. I have searched through this list and I find that Arkansas contributed of those products in sawed lumber $1,793,848 worth, and oil, cotton-seed, and cake, $590,000 worth, making $2,383,848 in value as her total manufacture of the products I have indicated. And Arkansas will be potential in shaping the financial or the economic policies of the Government if the House bill is accepted by the country.

A Representative of Tennessee has had something to do with the House bill. Tennessee made of brick and tile a little more than half a million dollars' worth; of carriages and wagons a little more than a million dollars in value; of foundry and machine-shop products a little more than a million dollars' worth. She furnished some lumber, some cotton goods, and the aggregate of her contribution to the volume which I have given is valued at $12,068,481.

West Virginia speaks through this same bill. The Senator from Texas has inquired whether she was represented in the list to which I have called attention. She is to the extent of having contributed $5,385,296 in manufactnred goods.

Georgia, I think, has done better than the others, for her people make some cotton goods, and with her cotton manufactures the aggregate is $15,083,046.

Kentucky contributed to more items upon the list than any other of the Southern States, and the total of her manufactures in these lines of goods (I do not speak of her whisky) amounts to $18,156,335.

I suppose whisky was not mentioned, because it contributed a very much larger revenue, and it would not do to credit the South with a larger revenue.

I have them aggregated together, so that I can give the figures here. The measure which was forced through the House and in favor of which the Democracy pronounce in the Senate was formulated by gentlemen who represent the States named, and by those gentlemen alone, I may say, for they had the control of the Committee on Ways and Means.

This, with what preceded and followed these remarks, could have had no other purpose than to raise a sectional issue and revive the passions and prejudices of the war, in the absence of and to supply the place of legitimate argument based on the respective merits of these two bills, and sustained by patriotic devotion to the best interests of the whole country.

It will be remembered that when the Senator from New York was showing how little manufacturing had been done in the late Confederate States he omitted the States of Maryland, West Virginia, Kentucky, and Missouri, and placed their products in his aggregates for the Northern States. Now, the Senator from Connecticut, in order to show that six of the Democrats of the Ways and Means Committee were from the late Confederate States, includes West Virginia and Kentucky among them, as there are only six members from all the Southern States on that committee, embracing the two from West Virginia and Kentucky, the other seven being from Northern States; and the Senator from New York accepts this new classification, because it aids his sectional view while it conflicts with his previous statement.

However misrepresentations might be allowable to deceive either enemies or friends in war, it is hardly to be expected of great statesmen in the most important and responsible positions when discussing a public measure for the benefit of a common country and Government.

The Senator from New York then presents the following table and statement:

They aggregate as follows:

Texas	$5,597,415
Georgia	15,083,046
Kentucky	18,156,335
Tennessee	12,068,481
West Virginia	5,385,296
Arkansas	2,383,848
Total	58,674,461

These States contributed of the manufactured goods enumerated in the schedule to which I have referred the value of $58,674,461 out of an aggregate of $1,867,392, and these Representatives assume to speak for the industries of the country, to shape the economical policy of the country, and to provide the markets for the wage-army employed by and capital invested in manufacture.

Here, again, the Senator from New York embraces West Virginia and Kentucky, but forgets to mention Maryland and Missouri, these two States having, as shown by the census of 1880, 195,111 persons employed in manufacturing establishments, while all the States named by the Senator had only 201,742 persons so engaged, being but 6,631 more than in the two States so omitted to produce sectional effect.

With no malice or unkindness of feeling, but for the purpose of subserving the ends of justice and fairness, I have made this criticism on the part of the speech of the Senator from New York to which it refers. His high position and the great State he in part represents made it necessary that his effort to influence the action of the Senate on so great a question by such questionable means should be exposed. What must be thought by fair-minded people, who feel a patriotic pride in the welfare of their whole country; and what must be thought by just people of the great State of New York, much the largest recipient of the commercial advantages and blessings of the whole Union, when they see that one of their Senators has employed appeals to sectional and war prejudices in order to influence the adjustment of a great economic question in which all the American people are equally interested without reference to the parts of the country in which they live?

The Senator from New York says:

It is the same question that divided the North and South, and incited a bloody and expensive war, and the division is on the same agricultural and geographical lines.

Can the Senator suppose any one but himself will believe this to be true? Its nearest approximation to truth consists in the fact that protection barons and millionaire manufacturing corporations are by our tariff legislation robbing all other classes of the people by the levy of an average tax on them for their benefit of nearly one-half the value of all the goods they buy of the kinds of taxed imports; and if this shall be continued it must in the end enslave the great mass of the people.

In the statement above quoted the Senator makes the implied admission of a fact which he and other protectionists have been trying to keep out of view—that is, that the interests of the agricultural States were different on this question from those of the manufacturing States. But he fails to draw the line between the two classes of States at the right place. If his hypothesis were true, then the States south and west of Pennsylvania would certainly be classed as agricultural States, while those north and east of that State might be classed as manufacturing States. But I submit that his whole statement is incorrect, and assert that the division of interests in this respect is not by State lines and sections of the country, but by vocations. The protected manufacturer, wherever he is, in whatever part of the Union, in whatever State he may be, gets his share of the unjust tax levied on all the other people of the country, whether they are in the South, the West, or in the East, and whether they be farmers, mechanics, artisans, laborers, merchants, lawyers, doctors, or preachers; and they extort this tribute from

their own employés and operatives just as they do from all others who are required to pay this monstrous tax on the necessaries of life.

Another fallacy presented, at least inferentially, by the speech of the Senator, is that the people of the States where but little manufacturing is done are not entitled to an equal influence in the determination of the tariff question with those of States where more manufacturing is done. This assertion, it is fair to presume, is made on the principle that the citizen who meets a highwayman has not as much interest in his money and watch as the robber has. But this monstrous doctrine is in full harmony with the essential principles and action of the protectionists, who maintain in effect that the more the masses of the people are taxed for the benefit of the few the richer they are, and that a tax unnecessarily collected, as is now done under existing law, of $600,000,000 a year off of the people at large for the benefit of the barons of protection, is a public blessing, resulting from the blessed beneficence of a protective tariff.

And this accords with the Republican policy as demonstrated in their acts of legislation and practices of exempting capital from its share of the burden of supporting the Government, and of levying upon agriculture and labor the tribute which is building up a class of millionaires and increasing the hosts of tramps and paupers.

Mr. ALDRICH. Mr. President——

The PRESIDENT *pro tempore*. The Senator from Rhode Island appeals to the Senator from Texas.

Mr. REAGAN. Certainly; I yield.

Mr. ALDRICH. Do I understand the Senator from Texas to say that we are collecting $600,000,000 for the benefit of manufacturers in addition to the amount which is paid at the custom-houses?

Mr. REAGAN. I will give the Senator the exact figures, so that there can not be any mistake. I do affirm substantially what the Senator supposes, and I will show him the process by which I reach that conclusion, so that he may at his leisure make any criticism he may see proper, and see whether he can overthrow my position or not.

Mr. ALDRICH. If the Senator from Texas will permit me, I will state my reasons for asking the question.

The PRESIDENT *pro tempore*. Does the Senator from Texas yield?

Mr. REAGAN. Yes, sir.

Mr. ALDRICH. I understand the Senator to say that $600,000,000 are added annually to the price of the domestic manufactured products of this country by the operation of the tariff.

Mr. REAGAN. No, I did not say that. I said much worse than that about it.

Mr. ALDRICH. What is the Senator's statement?

Mr. REAGAN. I do not know that I can turn at once to the statement that I made on the 16th of August, but I there show the amount of imports for the year ending the 30th of June last, the portion of those imports which are taxed, the portions which are not taxed, with the average rate of duty upon the taxed imports. I will read a few paragraphs from my remarks on a former occasion, which will answer the question:

> The value of our imports for the year which ended June 30, 1888, was $723,873,630. Of this sum the taxed imports amounted to $479,805,362; the remainder, $244,068,268, being imported free of duty. The average rate of duty on the taxed imports was 47.10 per cent. and yields a gross revenue of $225,988,225. Now, let us see what it costs the consumers of the country, the farmers, laborers, artisans, professional men, and others, to obtain this $225,988,225 of gross revenue. The value of manufactured products in the United States for the year 1880, as shown by the census, was $5,369,579,191. It is fair to assume that when we tax imports $47.10 on the $100 worth of imported goods this enables the makers of domestic products of the same kinds to add 47.10 per cent. on the dollar to the price of their fabrics, and still to undersell importers by the amount of the cost of transportation from foreign countries to this. This may not be strictly accurate, but it is near enough correct to illustrate the view I am presenting.
>
> A tax of 47.10 per cent. on the amount of our domestic manufactures of 1880 (and they are considerably more now) would yield $2,527,071,798 of revenue. But let us deduct $2,000,000,000 from the $5,369,579,191 as the assumed proportion our free-list bears to the taxed imports and we still have $3,369,579,191 of domestic fabrics of the kinds of our taxed imports. A tax of $47.10 on the $100 of this sum would show that to obtain $225,988,225 of gross revenue for the support of the Government from imports we are taxed $1,587,071,798, which does not go into the Treasury, but is transferred by law from the consumers to the manufacturers of these goods.
>
> But this sum should be reduced by the amount of a reasonable average tax, say 30 per cent. A tax of 30 per cent. on $3,396,579,191 would yield $1,010,873,757 of revenue. Deduct this sum from $1,587,071,798 and still the consumers of our domestic manufacturers would be unnecessarily taxed the sum of $576,198,044 a year. This is the sum annually transferred, according to this calculation, from the consumers to the manufacturers of these fabrics.

That is the answer I make to the Senator, with this additional statement, that I have placed it at $576,000,000. Most other statisticians—most statisticians, I should say, for I do not claim to be one—place it at at least $600,000,000. I have placed it at the lowest estimate of any one I have ever seen make the calculation.

Mr. ALDRICH. My purpose in asking the question was to get, if I could, some accurate statement from a representative Senator upon the other side of the Chamber as to the cost of the protective system to the people of this country. I understand the Senator from Texas to state it variously at $600,000,000, $1,600,000,000, and $1,800,000,000 per annum. He stated in the first speech from which he read, but which he asked the Reporter to omit as he thought he was reading from the later speech, that the amount would exceed $1,800,000,000 annually, being 47 per cent. upon four thousand million dollars' worth of manufactured products. In the next statement he makes it $1,600,000,000, but reduces that a thousand million as the amount which would be added by what he considers a moderate revenue tax.

My purpose in asking the question was this: If $600,000,000 was correct, that is only 10 per cent. of the value of our manufactured products instead of 47 per cent. If $1,800,000,000, which was the Senator's first statement, is correct, the people of this country under a protective system have been obliged to pay the manufacturers for twenty-seven years $1,800,000,000 a year. They have thus paid $48,600,000,000 since 1861, or $5,000,000,000 more than the whole wealth of all the people of the United States.

Mr. REAGAN. I do not know that I precisely understand the Senator's suggestion. The first estimate I made without making the deduction. I took $1,578,000,000 as the amount, and then deducted 30 per cent. upon the proportion of taxed imports.

Mr. ALDRICH. Why should we raise a thousand million by taxation, then?

Mr. REAGAN. I do not say that; I say we transfer. I say that in raising $225,000,000 for the Government we transfer, according to this calculation, $1,587,000,000 to the manufacturers, which does not go into the Treasury, and after deducting from this sum $1,010,873,757 as the amount of a tax of 30 per cent. on the $3,369,379,191 of manufactured fabrics, there would still be $576,198,044 unnecessarily transferred by law from the consumers to the manufacturers.

Mr. ALDRICH. Let me see if I understand the Senator. Do I now understand him to say that if we had a revenue duty with an average of 20 per cent. we should then put into the pockets of the manufacturers of the country a thousand million dollars?

Mr. REAGAN. No, sir; that is not my position.

Mr. ALDRICH. What is it then?

Mr. REAGAN. If we impose the tax upon three billion three hundred and odd million a year of the $5,300,000,000, we throw off two billion for the purpose of meeting the average of what would be the free-list.

Mr. ALDRICH. When it is a thousand millions, what is it deducted for?

Mr. REAGAN. The Senator, I expect, will have to look at the figures as I give them. A tax of 30 per cent. on $3,396,000,000 would yield $1,010,000,000 of revenue.

Mr. ALDRICH. Does not the Senator mean to say that if we had an average ad valorem tariff of 30 per cent. it would result in putting a thousand million dollars into the pockets of the manfacturers?

Mr. REAGAN. No, sir; it would simply result in saving to the people $576,198,044 of their own money that is now transferred from them to the manufacturers by law.

Mr. ALDRICH. As this is a matter of some importance and has been long a contested question, and we seem now to be on the point of arriving at some accurate settlement of the subject, I pursue the inquiry with perhaps what may seem a little pertinacity. I understand the Senator to say that under our existing tariff we do pay either $1,600,000,000 or $1,800,000,000, according as you assume the basis for computation.

Mr. REAGAN. I do not say that. The Senator will see when he reads my speech that I do not say anything like it. I say we obtain a revenue of $225,000,000, and to obtain that amount we levy a tax upon the people and transfer from them to the manufacturers $1,587,071,798 that do not go into the Treasury; but we simply transfer it from one class of people to another, without consideration.

Mr. ALDRICH. One thousand million dollars?

Mr. REAGAN. One billion one hundred and eighty-seven million seventy thousand seven hundred and ninety-eight dollars.

Mr. ALDRICH. Will the Senator please repeat the basis on which he places his deduction of $1,600,000,000 or $1,800,000,000, as the case may be?

Mr. REAGAN. I will ask the Senator to read my remarks. My statement was clear. He will certainly understand it, and I do not care to repeat over and over the statements I have made.

Mr. HOAR. Will the Senator from Texas allow me to put a question to him?

Mr. REAGAN. Certainly.

Mr. HOAR. I understand the Senator to say that for every dollar of a tariff tax there goes into the pocket of the manufacturer an equivalent if his manufacture is a protected article?

Mr. REAGAN. I assume that.

Mr. HOAR. I understand the Senator does; and he thinks there goes into the pockets of the manufacturers about $500,000,000 in that way, after making allowance for what ought to be imposed as a necessary and proper tariff tax, an average tariff tax.

Mr. REAGAN. Yes, that is the assumption I made.

Mr. HOAR. If there goes into their pockets in addition to that a similar sum for the necessary tariff tax (whether the tax is necessary to the Government would not of course matter here in considering how much you transfer to the manufacturer), then the Senator would make out a sum equal to about one thousand eight hundred million dollars, if I understand him correctly.

Mr. REAGAN. About one billion five hundred and eighty-seven million seventy-one thousand seven hundred and ninety-eight dollars.

Mr. HOAR. The question I want to put is this: The manufacturing capital of this country in round numbers is three thousand million, or three billion dollars. So, according to the Senator's statement, there is transferred from the pockets of the people a sum equivalent, if it be $500,000,000, to 16⅔ per cent., or if it be a thousand million dollars and a little over, equivalent to 33⅓ per cent. of their entire manufacturing capital, saying nothing of their ordinary lawful, legitimate, and proper profits. Can the Senator explain how it is that if, since the high tariff of 1862 and so on, the manufacturing capital of this country has been getting in addition to all its lawful, proper, legitimate profit, a plunder from the people equivalent in one point of view to 33⅓ per cent. and in another to 16⅔ per cent. of their entire capital, the Government bonds all this time can be purchased and are greedily purchased at a rate which pays about 2.17 per cent.? Will the Senator explain that extraordinary fact?

Mr. REAGAN. I do not know that I comprehend the question which the Senator puts to me.

Mr. HOAR. I will repeat it. The Senator says that the manufacturers of this country, in addition to all lawful, proper, and reasonable profits, get in the way of plunder a sum of certainly $500,000,000, as he says, taking the sum which the Government ought reasonably and properly to have received of course. That would create an increased profit to manufacturers, whether the Government tax is proper or not, equal in one case to five hundred millions, and in the other equal to one thousand millions; that is, in one case 16⅔ per cent., and in the other 33⅓ per cent. of the entire manufacturing capital of the country.

I wish to know how it is that if since 1860 property invested in manufactures has been getting in this country as a regular and ordinary thing from 16⅔ to 33⅓ per cent. on the capital, at the same time Government bonds will realize in the market only a sum which will pay the purchasers about 2.17 per cent. interest? That seems extraordinary.

Mr. REAGAN. I think my proposition is a little misunderstood by the Senator. The only proposition which I made was that according to the basis of calculation which I made $576,000,000 more was collected under the present law than was necessary to be collected under a tax of 30 per cent.

Mr. HOAR. And that goes into the manufacturers' pockets?

Mr. REAGAN. I say that it is a transfer of that sum from the consumer to the manufacturer.

Mr. ALDRICH. May I trespass upon the patience of the Senator for one moment?

The PRESIDENT *pro tempore*. Does the Senator from Texas yield?

Mr. REAGAN. Yes, sir.

Mr. ALDRICH. If under a revenue tariff of 30 per cent. $1,000,000,000, according to the Senator's theory, would be added to the price of our domestic products, that would increase the cost of the manufactured products annually to this extent for the benefit of the manufacturers. If that is true, and if a revenue tariff would do this, I do not see any difference between a revenue tariff and a protective tariff as a system of robbery. It is only a question of degree. The legitimate, logical result must be that the Senator himself and every Senator who believes with him should be in favor of absolute free trade and the abolition of all custom-houses.

Mr. REAGAN. I do not know that I know what the Senator means by free trade. If he means a revenue tariff as contradistinguished from a protective tariff, then I want to be set down as a free-trader.

Mr. ALDRICH. In this particular case I meant the abolition of the custom-houses and of customs revenue absolutely; because if it would cost a thousand million dollars with a revenue tariff of 30 per cent. and cost a certain other amount if the duty were protective, I certainly should be in favor of a protective tariff; but I can not see how the Senator can be in favor of a revenue tariff if that is robbery to the extent of $1,000,000,000 to the people of this country.

Mr. REAGAN. The Senator has no choice in that. To talk about doing away with custom-houses is to talk about a thing that comes into nobody's mind, as there is universal assent to the collection of revenues necessary to support the Government by duties on imports. If the Senator means that, I suppose he will not find a free-trader in the United States, at least not one in a thousand certainly.

Mr. ALDRICH. I used the term "free trade" in a very narrow and technical sense. Every country from the beginning of civilization to the present time has collected some part of its revenue from customs, and there is no such thing actually as free trade in that sense.

Mr. REAGAN. I am glad at any time to yield to any explanation or question of a Senator, but I should like to proceed now and close my remarks. I am very sure that I will never convince the Senator that it is not right to tax the farmers of Texas one-half the value of their purchases for the benefit of the manufacturers of Rhode Island. I could not convince him of that until I could convince him that he ought not to want more money than belongs to his people. He may convince me, because I do not profess to be an adept in things of this kind as he is.

HOME MARKETS.

The Republicans assume that a protective tariff is justified because it furnishes a home market for agricultural products; and to sustain this view they refer to the much larger amount of farm products which are consumed in this country than are exported to foreign countries. The mode of presenting that question is both illogical and misleading. The true criterion is not how much of agricultural products our people consume at home, but how much, after supplying the home market, we export. During the last fiscal year, after supplying all our home markets required, our people sent to foreign markets $523,073,798 worth of agricultural products. There was that vast amount more than our home markets required, which but for our international exchange of commodities would have been lost to the farmers of the country, and its loss would have bankrupted the whole country.

The Republicans tell us their policy for reducing the surplus of revenue in the Treasury is to reduce the tax on tobacco and on other articles not produced in this country, and to so increase the duty on such imports as compete with American products as to reduce the imports and thereby reduce the current revenues. This policy of restricting trade, of commercial non-intercourse with other countries, is against the enlightened spirit of the age, is a reactionary policy which would destroy our foreign commerce and ruin all classes of business men and people. A suspension of our trade with foreign countries for one year would bankrupt all, whether farmers, merchants, or manufacturers. We can not sell abroad if we refuse to buy. A partial suspension of our foreign trade would be injurious to all exactly to the extent to which it might be carried.

Even without foreign trade, if the Republican policy of making all we need at home were carried out, we can not increase our home markets by increasing manufacturing establishments, for the reason that by the stimulus of high protection our people have more money invested in manufacturing and more machinery employed in that business than are necessary to supply the needs of our own country; and on account of the high price of living and material in this country, created by a high protective tariff, our manufactured fabrics cost so much that we can not sell them in foreign markets, and so have no inducement to build more manufactories to increase the home market.

One of the results of the excessive investment in manufactories is that the mills can not be run on full time, and laborers are often thrown out of employment by shutting down these establishments, and they and their families are made great sufferers because glutted markets require the suspension of manufacturing.

It is urged as an argument in favor of protection that it has been the cause of a great increase of the wealth of the country. That each new manufacturing establishment is an addition to the wealth of the country is certainly true, just as it is true that each new farm or workshop or office is an addition to the general sum of property. It is also true that the diversification of employments tends to increase wealth. In these senses the claim that manufactures increase wealth is justly made. But the general assumption that the great increase of wealth in this country is due wholly or mainly to its manufacturing interests is not warranted, though certainly they have contributed their fair proportion to it. The increase of wealth in this country is due to many causes, such as—

First. The great extent of territory.

Second. Its great fertility.

Third. Its great variety of productions.

Fourth. The extraordinarily rapid increase of population.

Fifth. The boundless mineral resources of the country.

Sixth. The superior facilities for transportation both by land and water.

Seventh. The improvements in chemistry during the last half century.

Eighth. The improvements in the mechhanical arts.

Ninth. The improvements in tools and machinery.

Tenth. And of late years the large exportation of agricultural products and the large importation of gold in return for these exports.

Eleventh. Improved mechanical skill and improved organization.

It ought also to be said that from causes I have heretofore stated during this session, and need not now repeat, that this increase of wealth is not generally diffused among the people, but has to a large extent gone into the possession of the great corporations of the country or into the hands of a few rich men, while the great mass of the people have not increased their wealth, and it is pretty certain a majority of them have grown poorer during the last ten or twenty years.

Such a question as that of the revision of the tariff, which affects every business interest and vocation in the country, ought to be discussed with candor and fairness. So much of interest is involved and so many people are interested in it, and so much intelligence has been and will be brought to bear on it, that sophistry and deceit and misrepresentation must all at last give way to truth. And the mere advocates of special interests will have to yield to the matured and honest judgment based on facts, which will sooner or later settle this great question in accordance with the best interests of the whole people.

I was led into this reflection in considering the monstrous fallacy which Republican politicians generally are trying to get the American people to believe, and in which they have to some extent succeeded, that a high tariff secures high wages for labor.

That the manufacturing capitalists and their agents have threatened and do threaten their operatives with a reduction of wages if the tariff

should be reduced, in order to control their votes, is no doubt true; and that many of the poor workmen are made to believe their wages are to be reduced on account of tariff reduction is no doubt equally true. This is not the convincing of their judgments by facts and reason, but is plainly fraudulent intimidation and coercion.

It can not truthfully be said that the rate of wages depends on the rate of tariff duties. If this were so, and a given rate of duties on imports would secure to the manufacturer a net profit of 10 per cent. and which enable him to pay his operatives $1 a day, and the law should change the rates of duties so as to enable him to realize a net income of 30 per cent., he should pay them $3 per day. No such thing ever happened or ever will happen. The employer will pay his operatives the sum which the labor market requires him to pay. No more and no less, whatever the duties on imports may be. If there are more laborers seeking employment than are required by the factories, their wages will be low, whether the duties on imports be high or low. If the amount of labor is not sufficient to supply the demands of the factories the price of labor will be higher and the rates of duties will not in either event affect the wages of labor. All men know this to be incontrovertibly true.

If times are dull, wages will be lower. If times are prosperous, wages will be higher, without reference to the rates of duty on imports. If money is scarce, wages will be lower; if plentiful, they will be higher, and the tariff will not in either case affect them. Wages, like every other marketable commodity, are to a greater or less extent governed by the law of supply and demand. The every-day experience and observation of the operatives in the manufacturing establishments demonstrates to them the fact that the employers demand their services at the lowest terms they can be had for without reference to the tariff. Of late years they often strike for higher wages, or to prevent the reduction of their wages, and in many cases it has happened that their employers, who have so much love for them and so much care for their interest just now when their votes are needed, have turned them adrift and employed cheaper labor, imported under contract from the oppressed and starving populations of Europe.

It must require a great deal of cheek in protectionists to argue that the rates of the wages of labor depend on the rates of tariff duties, and surely none but the most stupidly ignorant will believe them.

The idea that manufacturers are so greatly interested in the increase of the wages of their operatives, which would of necessity reduce their own profits, must cause a broad and knowing smile on the face of each of them when he looks into the face of another, and no doubt sometimes leaves them in doubt as to whether their political or hired advocates are sincere fools or hypocritical cheats.

Much stress is laid on the necessity of protection to manufactures which will enable our manufacturers to compete with those of European countries. While the wages of labor are as a rule lower there than here, there are other circumstances which go far towards equalizing the conditions of manufacturers in the two countries. In the first place, we have unlimited raw material for most manufactures without the expense of importation, while the cost of transportation, commissions, etc., of foreign-made goods 3,000 miles across the ocean, and the cost of exchange, give our manufacturers a decided advantage over them, and especially so in all heavy or bulky articles.

Besides this, Senator EVARTS, when Secretary of State in 1879, in an official report as Secretary of State, and Hon. James G. Blaine, in 1881, in an official report as Secretary of State, basing their statements on the reports of our foreign consuls, tell us that American laborers work more hours than those of Europe, are more efficient, and produce a larger amount of commodities for a given amount of wages than the laborers of Europe. And they assume that this, with our advantages in the possession of raw material, goes far towards equalizing, if it does not equalize, the condition for manufacturing in the two countries. And these two distinguished men were then speaking as Americans and not as partisans desiring to control the result of an election.

I ought to have mentioned here (which I believe some gentleman has referred to) that if high tariff makes high wages, it becomes necessary to explain how it is that in Russia, in Austria, in Germany, and in France, with high tariffs, labor is so much lower than it is in what is called "free-trade England," a country with lower duties.

All things considered, it is safe to assume that such a moderate tariff as will insure sufficient revenue to carry on the Government, pay pensions, meet the interest on the public debt, and gradually extinguish its principal, would place our manufacturers at advantage over those of Europe.

The pretense that the advocates of a high tariff are advocating an American and that the advocates of a revenue tariff are advocating an English policy is an insult to revenue reformers and an outrage upon truth and decency. It is the merest clap-trap, based on fraud and deceit.

The policy of the Republican party on this question is in harmony with its history as a party. It boldly affirms the doctrine of protection for the sake of protection, and treats the collection of revenue for the support of the Government as an incident to the assumed constitutional power to protect domestic manufactures, by taxing the people nearly one-half the value of the articles they are obliged to buy, and thus impoverishing them, in order to exclude foreign manufactures from our markets, and to make millionaires of a limited number of men and corporations.

The policy of that party, from the time it came into power, has been to stimulate and foster class interests and monopolies of every kind, and to plunder the many for the benefit of the few. And it has at all times been faithful and true to that policy, except when a State and national political convention meets, or in speeches, not in action, in a session of Congress preceding a Presidential election.

On those occasions it is profuse in resolutions and speeches in favor of the interests of the people, and especially of the laboring people of the country. It is then the greatest friend and special champion of popular rights, so far as resolutions and speeches can make it their champion. But what measure of policy, what act of Congress, can they point to as their work, which is not for class interests and against the interests of the people at large, and especially against the interests of workingmen and women? And notwithstanding all their late pretensions to interest in the welfare of the people and of labor, I make the prediction, and call their attention to it now, that when the approaching election is over they will direct their efforts as usual to the building up of class interests and monopolies, and that we will hear no more from them about popular rights and the rights of labor until the coming of another popular election.

I have on former days of this session pointed out the class legislation and monopolies built up and sustained by Republican policy, and will not restate them now.

Their bold advocacy of protection for protection's sake is in plain, palpable violation of the Constitution. But they have never allowed this instrument to stand in the way of their policy of centralization, of promoting class interests and of plundering the masses of the people for the benefit of the few. The Constitution provides that—

Congress shall have power to lay and collect taxes, duties, imposts, and excises.

And the purposes for which they may be collected are specified, and according to the Constitution they can be collected for no other purpose, are specified in the same clause and in the same sentence of the Constitution, and are—

To pay the debts and provide for the common defense and general welfare of the United States.

The words "general welfare of the United States" are held by the ablest and best expounders of the meaning of the Constitution to be not a separate grant of power, but rather a limitation upon the specific grants of power. If this interpretation of the Constitution is correct, as I believe it to be, where are we to find the power to pass laws for the protection of domestic manufactures? Certainly not in the power "to pay the debts" or "to provide for the common defense."

But independently of the question as to the absence of the constitutional warrant for such legislation, no principle is better settled in the State and Federal Constitutions and in the general policy of the country than that every citizen shall be protected in the ownership and enjoyment of his private property; and that he shall not be deprived of it except for public uses, and not then without just compensation. This right, with the necessary exception as to the taxes which must be contributed for public use, is hedged around and guarded and protected by many constitutional provisions, State and Federal.

A tax for protection is not to pay the debts of the United States, is not for the support of the Government, is not for the common defense, it is for no purpose for which we can impose a tax; but it is plainly and solely a tax to transfer the property of some private citizens to other private citizens arbitrarily and without compensation. It is to impoverish a part of the people by means of a law of Congress in order to enrich another part of the people by the same law. It is unwarranted, arbitrary, unreasonable, and unjust. It creates monopolies on the one side and destitution and oppression on the other. And its necessary outcome, if persisted in, will be to destroy our present system of Government and build up privileged classes and an aristocracy of wealth.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

A bill (H. R. 6246) for the relief of Samuel Fels;

A bill (H. R. 9949) for the relief of Patrick C. McQueeny; and

Joint resolution (H. Res. 229) to print the Agricultural Report for 1888.

ADJOURNMENT TO MONDAY.

Mr. DOLPH. I move that when the Senate adjourn to-day it be to meet on Monday next.

Mr. ALLISON. If there are any Senators who are ready to speak to-morrow we may as well have a session. If there are none, of course I make no objection to adjourning over.

Mr. DOLPH. I have made inquiry in reference to that matter, and I can not find that any Senator is prepared to speak to-morrow on the tariff bill.

The PRESIDING OFFICER (Mr. PASCO in the chair). The question is on agreeing to the motion of the Senator from Oregon.

The motion was agreed to.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had, on the 8th instant, approved and signed the act (S. 2411) for the relief of C. A. Williams and others.

PRINTING OF GOVERNMENT SECURITIES.

Mr. COKE. I move that the Senate proceed to the consideration of executive business.

Mr. GEORGE. I ask the Senator to withdraw his motion for a minute that I may give a notice.

Mr. COKE. I withdraw the motion for that purpose.

Mr. GEORGE. I do not see any member of the Committee on Finance here, but there was a bill referred to that committee in which I feel some interest. I have been written to concerning it by a great many men who are in the interest of labor. The bill was passed by the House of Representatives on the 29th day of August, 1888, read twice, and referred to the Committee on Finance on the same day. It has not been reported. It is a bill "to provide for printing Government securities in the highest style of art," and it provides:

That from and after the passage of this act all Government securities, bonds, notes, and internal-revenue stamps shall be printed in the highest style of the art of plate-printing from hand-roller presses.

I desire to give notice that if that bill is not reported from the committee by Monday next I shall move to discharge the committee from its further consideration and ask that it be put on its passage.

The PRESIDENT *pro tempore*. The Senator from Mississippi asks unanimous consent that the unfinished business may be informally laid aside, and that the Committee on Finance may be discharged from the further consideration of the bill named by him.

Mr. GEORGE. No; I said I would make that request if the bill was not reported by Monday next.

Mr. SPOONER. What bill is that?

The PRESIDENT *pro tempore*. Will the Senator from Mississippi again state the title of the bill at the request of the Senator from Wisconsin?

Mr. GEORGE. Yes, sir; it is a bill (H. R. 9623) to provide for printing Government securities in the highest style of art.

Mr. ALDRICH subsequently said: I understand that in my absence and in the absence of the chairman of the committee the Senator from Mississippi [Mr. GEORGE] desired to ask a question of some member of the Finance Committee.

Mr. GEORGE. Yes, sir. I gave notice that on Monday I should move to discharge the Committee on Finance from the further consideration of the bill which has passed the House of Representatives (H. R. 9623) to provide for printing Government securities in the highest style of art. That is a bill which requires such printing to be done by hand-labor and not by machinery.

Mr. ALDRICH. I will say that that bill upon its reception by the Finance Committee was referred to a subcommittee, consisting of the Senator from Tennessee [Mr. HARRIS] and the Senator from New York [Mr. HISCOCK], who commenced an investigation of the subject which has not yet been completed, and they have not reported their conclusions to the full committee.

REPORTS OF COMMISSIONER OF LABOR.

The PRESIDENT *pro tempore*. Before submitting the motion of the Senator from Texas [Mr. COKE], the Chair lays before the Senate a concurrent resolution from the House of Representatives; which will be read:

The resolution was read, and referred to the Committee on Printing, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 5,000 copies each, in cloth binding, of the first and second annual reports of the Commissioner of Labor for the use of the Department of Labor.

REPORT ON PRODUCTION OF PRECIOUS METALS.

The PRESIDENT *pro tempore* laid before the Senate the following concurrent resolution from the House of Representatives; which was read, and referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring), That the report of the Director of the Mint on the production of the precious metals in the United States for the year 1887 be printed, and that 9,000 extra copies be printed, 4,000 copies for the use of the House of Representatives, 2,000 copies for the use of the Senate, and 3,000 copies for the use of the Director of the Mint.

HOUSE BILLS REFERRED.

The bill (H. R. 6246) for the relief of Samuel Fels was read twice by its title, and referred to the Committee on Claims.

The bill (H. R. 9949) for the relief of Patrick C. McQueeney was read twice by its title, and referred to the Committee on Claims.

The joint resolution (H. Res. 229) to print the Agricultural Report for 1888 was read twice by its title, and referred to the Committee on Printing.

INNOCENT PURCHASERS OF PATENTED ARTICLES.

Mr. GEORGE. I desire to call the attention of the Senator from Connecticut [Mr. PLATT] to a bill which was referred to the Committee on Patents some six or eight months since, and to which I called his attention about a month ago, to protect innocent purchasers of patent rights, and to ask him at what time we may expect the bill to be reported to the Senate?

Mr. PLATT. The Senator from Mississippi seems to be going for all the committees of the Senate this afternoon, I should judge. [Laughter.] I have not been able to report that bill yet, and it is probable now, with the Senate thinned to its present numbers, and the Senator from Mississippi knowing that I propose to go home to-morrow, that I shall not be able to report it at this session.

Mr. GEORGE. I simply desire to say that I feel a good deal of interest in that bill. I am not after the committees at all, but about a month or six weeks ago I called the attention of the Senator from Connecticut to the bill, and I think he promised to give it attention and report it at some early day.

EXECUTIVE SESSION.

Mr. COKE. I renew my motion.

The PRESIDENT *pro tempore*. The question is on the motion of the Senator from Texas, that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 4 o'clock and 45 minutes p. m.) the Senate adjourned until Monday, October 15, 1888, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate October 12, 1888.

UNITED STATES CONSUL.

E. P. Earle, of Alabama, to be consul of the United States at Cognac, *vice* Oscar Malmros, appointed commercial agent at St. Étienne.

CONFIRMATIONS.

Executive nominations confirmed by the Senate October 12, 1888.

POSTMASTERS.

Lawrence Smith, at Gadsden, Etowah County, Alabama.
William R. Kelly, Fernandina, Nassau County, Florida.
Benjamin S. Chase, Natchez, Adams County, Mississippi.

WITHDRAWAL.

Executive nomination withdrawn by the President October 12, 1888.

PROBATE JUDGE.

J. R. Wilkins, of Beaver County, Territory of Utah, to be judge of probate in said county.

HOUSE OF REPRESENTATIVES.

FRIDAY, *October* 12, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of the proceedings of Wednesday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BARNES, indefinitely, on account of important business.

To Mr. STOCKDALE, indefinitely, to commence on Monday, October 15.

To Mr. ANDERSON, of Mississippi, indefinitely, to begin on Monday next, on account of important business.

To Mr. ROWLAND, indefinitely, on account of important business.

To Mr. DUNN, for the remainder of the session, on account of bad health and important business.

To Mr. OSBORNE, on account of personal engagements.

To Mr. MCKENNA, indefinitely.

To Mr. HOLMES, indefinitely, on account of important business.

To Mr. HITT, indefinitely, on account of important business.

Mr. JACKSON. In that connection, Mr. Speaker, I desire to ask ten days' leave of absence for the gentleman from Indiana [Mr. CHEADLE] on account of a desire on his part to visit his constituents. [Laughter.]

The SPEAKER *pro tempore* (Mr McMILLIN in the chair). Without objection the leave will be granted.

There was no objection, and it was so ordered.

ENROLLED BILLS SIGNED.

Mr. KILGORE, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled bills of the following titles; when the Speaker signed the same, namely:

A bill (H. R. 4601) to amend the naval record of Nickolas Leuschen, Peter Leuschen, and Loth Possum;

A bill (H. R. 9447) to restore certain money to the fund for erecting a public building at the city of Detroit; and

A bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

FOURTH OF JULY CLAIMS.

Mr. STONE, of Kentucky. Mr. Speaker, I offer a privileged report from a committee of conference.

The Clerk read the report, as follows:

The committee of conference of the two Houses on the amendments of the Senate to the bill of the House 6514, making appropriation for certain claims reported by the accounting officers of the Treasury Department, having met, after full and free conference have agreed to the amendments made by the Senate, and recommend to their respective Houses the bill as amended.

W. J. STONE, of Kentucky,
JOHN B. PENINGTON,
G. W. CROUSE,
Managers on the part of the House.
JOHN C. SPOONER,
GEO. F. HOAR,
JAS. K. JONES,
Managers on the part of the Senate.

Mr. STONE, of Kentucky. I move the previous question on the adoption of the report.

Mr. NELSON. I should like a statement as to the amendments. A verbal statement is sufficient.

Mr. STONE, of Kentucky. I will make a verbal statement. It is the usual 4th of July bill, carrying the appropriation for claims allowed by the Quartermaster's Department, and passed upon by the accounting officers of the Treasury. It passed the House and went to the Senate. There it was found that by a mistake in printing a small claim had been left out that had been allowed. That was included, and the Senate amended the bill by attaching another claim to it of the very same character.

Mr. NELSON. As that is all, I waive the request to have the statement read.

The SPEAKER *pro tempore*. The Chair will state that it is customary to have the statement of the House conferees read.

The Clerk read the statement, as follows:

These amendments are agreed to by the conferees of the House because the claims covered have been exhaustively examined by the Committee on War Claims of the House and the Committee on Claims of the Senate, and the recommendations of the War Department, the Quartermaster-General, and Commissary-General have been adopted by both said committees.

As precedents for these amendments to this bill, the House agreed to precisely similar amendments in the Forty-eighth and Forty-ninth Congresses.

The previous question was ordered, and under the operation thereof the conference report was agreed to.

Mr. STONE, of Kentucky, moved to reconsider the vote by which the report had been agreed to; and also moved to lay that motion on the table.

The latter motion was agreed to.

Mr. EZRA B. TAYLOR. Regular order.

LEAVE OF ABSENCE.

Mr. HOLMES. I ask leave of absence for Mr. J. R. BROWN, of Virginia, for ten days, on account of important business.

The SPEAKER *pro tempore*. If there be no objection, the leave will be granted.

There was no objection.

NAVAL RESERVE.

Mr. WHITTHORNE. Will my friend from Ohio [Mr. EZRA B. TAYLOR] indulge me in asking the House for the privilege of assigning a day during the next session for the consideration of a bill which I regard as important, and which has the approval of all parties in the country. I ask it now as I am going to leave the city. I want to fix December 12 next for the consideration of the bill. It is for the organization of the naval reserve. I very seldom in any way interfere with the business of the House, and never but to promote its regular and orderly dispatch.

Mr. DINGLEY (to Mr. WHITTHORNE). There is no objection here.

Mr. WHITTHORNE. Mr. Speaker, the gentleman from Ohio withdraws the call for the regular order, and I ask that Wednesday, December 12, be set apart for the consideration of the bill (H. R. 10622) reported from the Committee on Naval Affairs, being a bill to organize the naval reserve.

The SPEAKER *pro tempore*. Is there objection?

Mr. KILGORE. What is the bill?

Mr. WHITTHORNE. It is a bill to organize the naval reserve. It has been reported unanimously by the Committee on Naval Affairs and has general approval.

Mr. KILGORE. There is very serious objection to having twenty or thirty men fixing the order of business here for the next session. I have no objection to the bill of the gentleman from Tennessee, but I have uniformly objected to that proceeding, and I would occupy an inconsistent position if I were to treat the gentleman from Tennessee in any way different from the manner in which I have treated other gentlemen.

Mr. WHITTHORNE. Will my friend let me claim age and other personal reasons? [Laughter.]

Mr. KILGORE. Does anybody else want that kind of privilege?

Mr. WHITTHORNE. Nobody else wants to make a similar request. I have been impressed as far as any man could be by the gentleman's courtesy and by his urbanity and by every impulse he has exhibited for the dispatch of business.

Mr. KILGORE. Are you talking to me? Is all that for me?

Mr. WHITTHORNE. For the House and for you.

Mr. KILGORE. If there be no other objection, I will be willing, but as a general proposition I am opposed to days being set for bills in advance.

Mr. DUNN. Before consent is given I desire to know if the gentleman excepts from his order bills to raise revenue?

Mr. WHITTHORNE. Yes.

Mr. OATES. What is the proposition?

The SPEAKER *pro tempore*. The gentleman from Tennessee [Mr. WHITTHORNE] asks to fix a day, December 12, for the consideration of the bill for the organization of the naval reserve.

Mr. BRECKINRIDGE, of Kentucky. What is the bill?

Mr. WHITTHORNE. A bill for the organization of the naval reserve.

Mr. EZRA B. TAYLOR. I object.

The SPEAKER *pro tempore*. The regular order is demanded.

ORDER OF BUSINESS.

Mr. RICHARDSON. Mr. Speaker, I hope the gentleman from Ohio will withdraw the demand for the regular order until I can obtain consent for the passage of a resolution to print the agricultural report for this year, and the report of the Commissioner of the Bureau of Labor, which have not been printed.

Mr. EZRA B. TAYLOR. I withdraw the demand for the regular order for that purpose.

REPORT OF COMMISSIONER OF LABOR.

Mr. RICHARDSON. It is simply to make the usual order for the printing of these documents.

The Clerk read the title of the resolution, as follows:

Substitute for House joint resolution 203, a joint resolution providing for printing the first and second annual reports of the Commissioner of Labor.

Resolved by the House of Representatives (the Senate concurring), That there be printed 5,000 copies each, in cloth binding, of the first and second annual reports of the Commissioner of Labor.

The substitute was adopted, and the resolution as amended was ordered to be read a third time; and it was accordingly read the third time, and passed.

Mr. RICHARDSON moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

Mr. RICHARDSON. I ask that the original resolution lie on the table.

There was no objection, and it was so ordered.

AGRICULTURAL REPORT FOR 1888.

Mr. RICHARDSON. I now ask consideration of the joint resolution (H. Res. 229) to print the Agricultural Report for 1888.

The Clerk read the report, as follows:

The committee having considered the resolution to print the Agricultural Report for 1888, direct me to report the same back with the recommendation that it do pass.

The previous question was ordered on the passage of the resolution, and under the operation thereof the resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. RICHARDSON moved to reconsider the vote by which the resolution was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

REPORT OF DIRECTOR OF THE MINT FOR 1887.

Mr. RICHARDSON. I now ask consideration of the resolution to print 9,000 copies of the report of the Director of the Mint for 1887.

The report (by Mr. RICHARDSON) was read, as follows:

The committee have considered the resolution and direct me to report the same back to the House with the recommendation that it do pass. The estimated cost of the printing is $2,484, taking the report of 1886 as a basis.

The resolution was adopted.

Mr. RICHARDSON moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

PRINTING GOVERNMENT PUBLICATIONS FOR SALE.

Mr. RICHARDSON. I ask consideration of the bill (S. 3162) providing for the printing of Government publications upon private orders.

The title of the bill was read.

The report (by Mr. RICHARDSON) was read, as follows:

The committee have considered Senate bill 3162, providing for printing of Government publications upon private orders, and direct me to report the same with the recommendation that it do pass. There are two sections in the bill. The first only changes the title of the person formerly known as Congressional Printer so as to make it conform to the existing law, wherein he is called Public Printer, and providing that when Congress is not in session the books may be published under direction of the Secretary of the Interior, which is also to

make the provision agree with the existing law. The new legislation in the bill is in section 2, which provides that at any time after books or documents have been printed the Public Printer may have printed from the stereotype plates in the Government Printing Office said books or documents for any person desiring the same whenever the number desired will justify putting the plates to press, the same to be paid for at the estimated cost thereof and 10 per cent. thereon, to be paid in advance. The section also provides for the Public Printer making proper report to Congress of any such sale.

Mr. FARQUHAR. Mr. Speaker, from the reading of that report I very much question the policy of this bill. To my mind, the present law is liberal enough in its provisions for permitting printing to be done at the Government Printing Office for private parties. Under that law any person who chooses can order any publication he desires while the publication is going through the press upon paying the cost and 10 per cent. in addition, and that is quite as far as we should go. It never was the intention, in founding the Government Printing Office, to permit any private printing to be done there. The idea was that, as the employés of the office and all its material are employed and paid for out of the Government Treasury, the work done should be for the benefit of the people generally and not for individuals, and for one, I have always deprecated the policy of permitting private parties to have any printing done there.

I think it is unfair to American printers and publishers who have large investments in plants of their own, who employ printers and bookbinders and pay them good wages, that the Government should enter into competition with them. The policy is entirely wrong, and while I suppose there have been reasons for permitting it to a certain extent, I certainly do not think it ought to go any further. There appears to be no necessity for passing a bill of this kind, and until we have a good, thorough investigation of the whole subject I think no such bill ought to pass. If there were an opportunity to curtail the amount of printing that is done at the Government Printing Office I should be one of the first members on this floor to favor such a reform. As I have already said, I think sufficient latitude is allowed by the present law which permits parties to get as many copies as they want of any Government publication upon paying 10 per cent. over the cost, and giving their orders while the work is going on, so that the Government shall not be put to the extra cost of keeping forms or any other expenses of that kind. I certainly am not willing to go beyond that, and I think the better plan is to lay this bill over for the present.

Mr. RICHARDSON. Mr. Speaker, I shall not insist upon passing the bill at this time if the gentleman persists in his opposition to it after I have made a statement. This is a Senate bill which I understand has been passed by the Senate unanimously. The bill as it comes to us makes only this change in the existing law. At present any private party who desires extra copies of a Government publication by paying 10 per cent. above the cost to the Public Printer can have extra copies of such publication, provided he gives his order pending the printing of the document; indeed, I believe the order must be given before the document goes to press. Now, valuable Government publications are often put to press in the Government Printing Office before the public know that they are even contemplated, and this bill simply provides that after such a publication has been made, if any person desires to have it duplicated or to have extra copies printed, and if the number desired is sufficient to justify the Public Printer in putting stereotype plates to press again, he may do so upon the party paying the cost and 10 per cent. in addition. The only difference between this bill and the present law is that the bill would allow a new edition of a document to be printed, instead of requiring the order to be given before going to press.

Mr. FARQUHAR. That is exactly the policy that I utterly condemn. Let me illustrate the objection to it. Take for instance the Greely report. A Hartford firm has published that for a year or two past, but now that report is published by the United States, and under this bill any bookseller or any private individual could come in and use the United States Government Printing Office to put a new edition, an official edition, of that report into the market in competition with the edition of the Hartford man after he has gone to all the expense of printing the work and making his plates and all the other expenses incident to such an enterprise. I tell you, gentlemen, the very first opportunity that occurs I shall, as a printer and as a Representative, do my best to have a reform made in the Government Printing Office in this respect, so as to prevent the Government of the United States from entering into competition with private firms in the printing business. That policy has gone too far already. Originally when this 10 per cent. privilege was granted it was understood that it was only to be used for the benefit of the Departments and of members of Congress. It never was intended that the general public should come in and procure the Government publications in that way, and then go out and sell them as against private publishers. The policy is bad, and instead of being extended it ought to be curtailed. I am totally opposed to this bill.

Mr. RICHARDSON. I had not quite concluded the statement I desired to make.

Mr. FARQUHAR. One word more. Is the gentleman [Mr. RICHARDSON] aware that the publishers of this country by formal resolution, and the International Typographical Union, have condemned this policy?

Mr. RICHARDSON. I was not aware of it.

Mr. FARQUHAR. Well, they have; and they, as the men most interested, have a right to be heard.

Mr. HOLMES. I wish to ask the chairman of the committee [Mr. RICHARDSON] if it is not more important that the people of this country should be heard than the publishers?

Mr. RICHARDSON. I should think so. I should think that the people would have at least as much right to be heard on this question as the publishers who desire to make a profit out of them upon these publications. But, Mr. Chairman, to show the desirableness of such a law as this, take, for instance, such a publication as the Medical and Surgical History of the War of the Rebellion. That is a very valuable publication, but it is hardly of sufficient commercial value to justify private parties in reprinting it. Now, it is possible that if such a law as this were passed, inasmuch as the Government Printer has the stereotype plates on hand, private parties having a demand for that publication in the trade would avail themselves of the law to have a new edition printed, and thus be enabled to supply the demand of the public outside of orders given to the Public Printer or the distribution made through members of Congress.

It seems to me it would be a great accommodation to the public to enable them to get books of that character in this way. I do not know that the Government Printing Office does work any cheaper than the printers and publishers of the country, but certainly the public would be accommodated by a law like this in cases such as that which I have suggested. However, I shall not oppose the bill at this time. It is a Senate bill; it did not originate in our committee, and I am perfectly willing to let it lie over, if the gentleman from New York [Mr. FARQUHAR] desires.

Mr. FARQUHAR. I do.

Mr. RICHARDSON. I will withdraw the bill and let it go upon the Calendar.

The SPEAKER *pro tempore*. It will be referred to the Committee of the Whole on the state of the Union.

DISTRIBUTION OF CONGRESSIONAL JOURNALS.

Mr. RICHARDSON. I have only one other bill to present from our committee. I am directed by the Committee on Printing to report back favorably the bill (S. 2802) to fix the number of unbound and bound Journals of the Senate and House of Representatives, and to provide for their distribution. I ask that this bill be now put on its passage.

The bill was read, as follows:

Be it enacted, etc., That there shall be printed of the Journals of the Senate 1,055 copies, and of the Journals of the House of Representatives 1,174 copies.

Of the Senate Journals there shall be bound 1,025 copies, which shall be distributed as follows: To the office of the Secretary of the Senate, 78 copies; to the Senate library, 36 copies; to the Senate document-room, 25 copies; to the Senate folding-room, 43 copies; to the House document-room, 337 copies; to the Department of State, 10 copies; to the Department of the Interior, 435 copies; to the Library of Congress, 52 copies; to the Court of Claims, 2 copies, and to the library of the House of Representatives, 7 copies. Of the Journals of the House of Representatives there shall be bound 1,124 copies, which shall be distributed as follows: To the office of the Secretary of the Senate, 78 copies; to the Senate library, 36 copies; to the Senate document-room, 25 copies; to the document-room of the House of Representatives, 348 copies; to the Department of State, 10 copies; to the Department of the Interior, 435 copies; to the Clerk of the House of Representatives (for governors of States), 123 copies; to the Library of Congress, 52 copies; to the Court of Claims, 2 copies, and to the library of the House of Representatives, 15 copies. Of the unbound Journals of the Senate there shall be printed 30 copies, which shall be distributed as follows: To the Secretary of the Senate, 6 copies; to the office of the Clerk of the House of Representatives, 5 copies; to the document-room of the House of Representatives, 5 copies; to the Public Printer, 4 copies; to the library of the House of Representatives (for file copies), 5 copies; and to the library of the Senate (for file copies), 5 copies. Of the unbound Journals of the House of Representatives there shall be printed 50 copies, which shall be distributed as follows: To the Secretary of the Senate, 6 copies; to the office of the Clerk of the House of Representatives, 25 copies; to the document-room of the House of Representatives, 5 copies; to the Public Printer, 4 copies; to the library of the House of Representatives (for file copies), 5 copies; and to the library of the Senate (for file copies), 5 copies.

SEC. 2. That all laws in conflict with this bill are hereby repealed.

The report of the committee was read, as follows:

The committee have considered the bill to fix the number of unbound and bound Journals of the Senate and House of Representatives, and to provide for their distribution, and report the same back with the recommendation that it pass. The committee herewith submit the report made to the Senate April 26, 1888, upon this bill by Mr. MANDERSON, showing the reasons for the passage of the bill, and make the same a part of this report.

"The Committee on Printing, having made full investigation into the matter stated in the foregoing title, recommend the passage of the accompanying bill.

"It was learned by your committee that there were more of the unbound Journals of both branches of Congress printed and distributed in signatures or parts, semi-monthly, than were needed, and hence the number has been reduced. Since the CONGRESSIONAL RECORD has been made so complete by its index there seems to be little demand for the semi-monthly issue of the Journals, the former containing the same information in better form.

"Your committee, by correspondence and personal interview, endeavored to ascertain the exact number of bound Journals required for the good of the public service and to meet every reasonable demand. The result of this investigation is presented in the bill. By a mistake in the revision of the United States Statutes of 1878, the number of bound Journals was increased 1,550 copies. There being no need of continuing this duplication of the usual number, it was deemed in the interest of economy to cut it off. Wherever the committee has found it possible to reduce the number of Journals printed under old law or custom by fitting the issue to the exact requirements, it has been done. The following

tables will show in convenient form the distribution of the number of copies of the Journals proposed to be printed in the bill:

Unbound copies in signatures.

	Senate.	House.
Office of the Secretary of the Senate	6	6
Office of the Clerk of the House	5	25
Document-room of the House	5	5
Public Printer	4	4
Library of the House (file copies)	5	5
Library of the Senate (file copies)	5	5
Total	30	50

Bound copies of Journals.

	Senate.	House.
Office of the Secretary of the Senate (for Senators)	78	78
Senate library	36	36
Senate document-room	25	25
Senate folding-room	43	43
House document-room (for members)	337	348
Department of State	10	10
Department of the Interior (for States)	435	435
Clerk of the House (for governors of States)		123
Library of Congress (for foreign exchange)	52	52
Court of Claims	2	2
Library of the House of Representatives	7	15
Total	1,025	1,124

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. RICHARDSON moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ALFRED PLEASANTON.

The SPEAKER *pro tempore* (Mr. MCMILLIN). On a former day of the session the gentleman from Mississippi [Mr. HOOKER], the gentleman from Illinois [Mr. TOWNSHEND], and the gentleman from Iowa [Mr. GEAR] were appointed conferees on the part of the House upon the bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasanton with the rank and grade of colonel. Since that time the gentleman from Illinois and the gentleman from Iowa have left the city. The Chair therefore appoints in their stead the gentleman from Alabama [Mr. WHEELER] and the gentleman from Iowa [Mr. HENDERSON].

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had agreed to the report of the committee of conference on the bill (H. R. 7547) granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota.

The message also announced that the Senate had passed without amendment House bills of the following titles:

A bill (H. R. 2196) for the relief of S. T. Marshall;

A bill (H. R. 11107) to amend an act entitled "An act to authorize the Fort Smith and Choctaw Bridge Company to construct a bridge across the Poteau River in the Choctaw Nation near Fort Smith, Ark.;"

A bill (H. R. 11152) for the relief of the legal representatives of Eliza M. Ferris; and

A bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act.

The message also announced that the Senate had passed with amendments, in which the concurrence of the House was requested, House bills of the following titles:

A bill (H. R. 2579) authorizing the President to appoint and retire Andrew J. Smith, late colonel of the Seventh United States Cavalry and a major-general of volunteers; and

A bill (H. R. 7935) for the relief and civilization of the Chippewa Indians in the State of Minnesota.

The message also announced that the Senate had passed with amendments House bills of the following titles, requested a conference with the House on said bills and amendments, and had appointed as conferees on said bills respectively Mr. VEST, Mr. SAWYER, and Mr. CULLOM:

A bill (H. R. 11262) to authorize the construction of bridges across the Kentucky River and its tributaries by the Richmond, Nicholasville, Irvine and Beattyville Railroad Company; and

A bill (H. R. 11338) to authorize the construction of a bridge across the Coosa River at Gadsden, in the State of Alabama.

The message also announced that the Senate had passed bills and joint resolution of the following titles; in which the concurrence of the House was requested:

A bill (S. 3348) for the relief of George K. Otis;

A bill (H. R. 3351) for the relief of Samuel Hein;

A bill (S. 3612) donating condemned cannon and small-arms to Naval Post No. 400, Grand Army of the Republic, Department of Pennsylvania;

A bill (S. 3621) for the payment to the widow of the late Chief-Justice Morrison R. Waite the balance of a year's salary; and

Joint resolution (S. R. 113) concerning the conference to be held in Washington December next to consider the best means of preventing the introduction of yellow fever and other epidemic diseases into this country.

ORDER OF BUSINESS.

The SPEAKER *pro tempore*. The regular order having been demanded, the first business in order is the call of committees for reports.

Mr. LANHAM. I desire to submit a motion to dispense with that call, and will, as preliminary thereto, ask unanimous consent that gentlemen having reports to present may file them in the usual manner with the Clerk.

The SPEAKER *pro tempore*. If there be no objection, that order will be made.

There was no objection.

FILING OF REPORTS.

The following reports were filed by being handed in at the Clerk's desk:

PUBLIC DOCUMENTS ON PRIVATE ORDERS.

Mr. RICHARDSON, from the Committee on Printing, reported back favorably the bill (S. 3103) providing for the printing of Government publications on private orders; which was referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

I. T. HOUZE.

Mr. BLISS, from the Committee on Pensions, reported back with amendment the bill (H. R. 11571) granting a pension to I. T. Houze; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

E. C. PASCHAL.

Mr. BLISS also, from the Committee on Pensions, reported back with amendment the bill (H. R. 11566) granting a pension to E. C. Paschal; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

SELMA AND MERIDIAN RAILROAD COMPANY.

Mr. MASON, from the Committee on Claims, reported back favorably the bill (H. R. 4521) for the relief of the Selma and Meridian Railroad Company; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

JULIA A. NUTT.

Mr. STONE, of Kentucky, from the Committee on War Claims, reported back favorably the bill (H. R. 11580) for the relief of Julia A. Nutt, widow and executrix of Haller Nutt, deceased; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

The SPEAKER *pro tempore*. The question is now on the motion of the gentleman from Texas [Mr. LANHAM] to dispense with the morning hour for the call of committees.

The motion was agreed to.

ALLEGED CORRUPTION IN REFERENCE TO LIBRARY BUILDING.

Mr. RICE. I desire to call up a privileged report—the report of the special committee appointed to inquire whether any member of the House of Representatives has by improper means sought to influence the action of the architect of the new Library building.

The report was read, as follows:

The special committee appointed in pursuance of a resolution of the House of Representatives of the 4th of September, instant, which directed said committee to inquire into and report to the House whether any member of the House, acting for himself or in concert and combination with others, has sought by persuasion, intimidation, or other corrupt and improper means to influence or control the action of Mr. J. L. Smithmeyer, the architect of the new Library building, in the selection, acceptance, or approval of interior or improper materials to be used in the construction of said building; and the further resolution of the House of Representatives of September 17, directing the said committee to inquire into and report to the House whether any member of the House, acting for himself or others, or in connection with any person acting for or in the interest of others, and with the knowledge of any member, or acting for or with the knowledge and in the interest of any company, person, or individual with whom any member of the House is interested or associated in any business, directly or indirectly, has sought by persuasion, intimidation, or any undue or improper influence to direct or control or influence the action of Mr. J. L. Smithmeyer, the architect of said building, in the selection or acceptance, or in procuring to be selected or accepted, material to be used in said building, or in the management, control, or construction of said building, beg leave to report that they have had the same under consideration; that charges were placed before the committee against Hon. WILLIAM G. STAHLNECKER, a member of the House of Representatives; that counsel in support of the charges and in opposition thereto appeared before the committee and were heard in conducting the investigation; that the sworn testimony of witnesses was taken, and the same is herewith submitted to the House, together with the charges above mentioned.

The testimony is very full, and the examination was given considerable latitude, greater, perhaps, than the matter at issue would strictly warrant in support of the charges.

The committee is unanimous in the opinion that the evidence does not sustain the charges, and there is no impression upon the mind of any member of it that Mr. STAHLNECKER is not fully exonerated from all charges of any improper attempt by persuasion, intimidation, or other corrupt means to influence or control the action of Mr. J. L. Smithmeyer, the architect of said Library building, in the selection or acceptance of any material to be used in the construction thereof, nor does his action in connection therewith in any way reflect or leave a shadow of suspicion upon his honor, or upon the dignity and honor of the House of Representatives.

They desire also to say, in conclusion, that they are satisfied from the investigation that the distinguished gentleman who offered these resolutions and set on foot this inquiry was actuated by the most honorable motives and a sincere desire to vindicate the integrity of the House of Representatives.

They recommend that the report, charges, and testimony be printed for the use of the House.

Mr. RICE. If no gentleman desires to discuss this report, I ask for a vote upon its adoption.

The question being taken, the report was adopted.

Mr. RICE moved to reconsider the vote by which the report was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

Mr. LANHAM. Mr. Speaker, owing to the fact that it has been stated with great earnestness and positiveness by the gentleman from Ohio [Mr. EZRA B. TAYLOR] that no further business shall be done during this day, or perhaps during the remainder of the session—a sentiment which perhaps is joined in by other gentlemen—I shall not make the motion customary on Friday morning that we go into Committee of the Whole for the consideration of private business. Believing that the statements which have been made so earnestly in reference to this matter will be carried out, I move that when the House adjourns to-day it adjourn to meet on Monday next.

Mr. HOOKER. Before the Chair puts that motion I beg to make a suggestion in reference to the course which the gentleman from Texas [Mr. LANHAM] indicates his purpose to pursue. We have heretofore on private bill day called the roll of members up to a certain point; and I think there ought to be no objection to completing the call. We have gone as far as the letter M or N; and I think it would be a very great hardship on gentlemen whose names have not yet been reached if we should not now complete the call. I do not see any reason why we should not go into Committee of the Whole in order to do so.

Mr. LANHAM. I fully appreciate what the gentleman from Mississippi has stated, and if the matter were left to me I would proceed in the usual manner. But the statements to which I have referred having been made, and I take it having been made in earnest, it would seem unnecessary to consume the time of the House if there can be no business done.

The present motion, however, does not interfere with that question.

Mr. HENDERSON, of Iowa. That does not interfere with the order for the evening?

Mr. LANHAM. Not at all.

The SPEAKER *pro tempore*. The question is on agreeing to the motion of the gentleman from Texas, that when the House adjourns today it adjourn to meet on Monday next.

The motion was agreed to.

Mr. O'NEILL, of Pennsylvania. Mr. Speaker, I now desire to interrupt the gentleman from Texas for a moment. What the gentleman from Mississippi has stated is true, and it bears hard upon those of us whose names are lower down on the list. Our names have been nearly reached—those whose names begin with "O" [laughter]; we have been here for several Fridays waiting to be reached, and I have a little bill here which is of importance to one of my constituents, and I would like very much to have an opportunity of considering it.

Mr. LANHAM. Mr. Speaker, with a view to fixing the responsibility where it may properly rest, I will submit the motion that the House resolve itself into Committee of the Whole House on the Private Calendar.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole, Mr. ROGERS in the chair.

Mr. LANHAM. Mr. Chairman, I now ask unanimous consent that we may adopt the same order of procedure observed on last Friday; that is to say, that the names of members be called alphabetically, beginning where we left off on the last call of the roll, and as each member's name is reached that he may have the privilege of calling up one bill, the same right of objection by five members being permitted as has heretofore been adopted.

Mr. DUNN. I presume that means to take up the unfinished business, if that is adopted.

Mr. LANHAM. Of course that would have to come up first.

Mr. STOCKDALE. Is it understood that if a member calls up a bill when his name is reached and objection is made, he may have the right to take up another?

Mr. LANHAM. That would be a change in the order.

The CHAIRMAN. The Chair is advised that the Nicaragua bill was before the committee at its last session and is the unfinished business.

Mr. LANHAM. I renew my request now, Mr. Chairman, that we may proceed in the same manner as heretofore, and that the same rule as to objection shall be adopted.

Mr. STOCKDALE. As I understand it, if a member calls up a bill and it is objected to, he then has the right to call up another.

The CHAIRMAN. That has not been the order heretofore. If a member withdraws a bill he has been granted the right to call up another; but if the bill is objected to, that right does not attach.

Mr. STOCKDALE. I ask unanimous consent that that order be adopted.

Mr. BACON. I understand that the last request, that of the gentleman from Mississippi, is one for unanimous consent.

The CHAIRMAN. It is in the nature of an amendment to the motion of the gentleman from Texas.

Mr. BACON. But I presume that both require unanimous consent.

Mr. OATES. I hope the gentleman from Mississippi will not undertake to change the rule that has heretofore prevailed and which is fair to all members. No one gentleman ought to have an advantage over any other in that respect.

Mr. BACON. As I understand from the Chair, the request of the gentleman from Mississippi requires unanimous consent.

The CHAIRMAN. It was put in the nature of a request for unanimous consent, but is an amendment.

Mr. BACON. If unanimous consent is required, I object to it.

The CHAIRMAN. It does require unanimous consent.

Mr. BACON. Then I object.

Mr. McMILLIN. I wish to submit a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. McMILLIN. I believe this order would not interfere with the unfinished business?

The CHAIRMAN. The Chair understands the Nicaragua Canal bill is the unfinished business, and would come up first.

Is there objection to the request of the gentleman from Texas?

There was no objection, and it was so ordered.

NICARAGUA CANAL COMPANY.

The CHAIRMAN. The Clerk will now report the title of the unfinished business coming from the last meeting of the committee.

The Clerk read as follows:

A bill (S. 1305) to incorporate the Maritime Canal Company of Nicaragua.

Mr. FULLER. What is the status of that bill?

The CHAIRMAN. The motion is pending to lay the bill aside to be reported favorably to the House.

Mr. DUNN. I understand the gentleman from Iowa [Mr. FULLER] desires to offer some additional amendments, and if I may be permitted I yield to him for that purpose. The question before the committee was on laying the bill aside.

Mr. FULLER. I desire to be heard for a few minutes first on this question.

Mr. DUNN. I have no objection to that.

Mr. LANHAM. There was an amendment proposed by my colleague [Mr. CULBERSON] to this bill.

Mr. BAYNE. That was agreed to.

Mr. DUNN. It was adopted, and is now a part of the bill.

The CHAIRMAN. The Chair is advised by the Clerk that the parliamentary status of the measure is this, that the motion was pending to lay the bill aside and report it favorably to the House. The question was being taken on that motion, and upon it the gentleman from Iowa raised the question of no quorum. The parliamentary status of the bill, then, is upon that motion.

Mr. LANHAM. The amendment of my colleague [Mr. CULBERSON] had been adopted in committee.

The CHAIRMAN. It had been adopted, and the question was on laying the bill aside as amended.

Mr. DUNN. I hope now, Mr. Chairman, that no objection will be made to the motion to amend or to the privilege that the gentleman from Iowa [Mr. FULLER] asks, to offer amendments and to address the House.

The CHAIRMAN. The point of no quorum has not been withdrawn.

Mr. FULLER. I withdraw it temporarily until I can be heard.

The CHAIRMAN. The gentleman withdraws the point of no quorum temporarily, and I would submit to the gentleman from Arkansas that the proposition to lay the bill aside with a favorable recommendation should be withdrawn.

Mr. DUNN. I withdraw it.

The CHAIRMAN. Without objection, it will be so ordered. The Chair will recognize the gentleman from Iowa [Mr. FULLER].

Mr. FULLER. I call for the reading of the bill, and ask that it be printed in the RECORD as part of my remarks.

The bill is as follows:

An act to incorporate the Maritime Canal Company of Nicaragua.

Whereas to facilitate commercial intercourse by water between the Atlantic and the Pacific States, as well as with foreign nations, it is deemed desirable for the public interest of the United States that a ship-canal be constructed between the Atlantic and Pacific Oceans, on what is known as the Nicaragua route: Therefore,

Be it enacted, etc., That Frederick Billings, Charles P. Daly, Daniel Ammen,

Francis A. Stout, Horace L. Hotchkiss, Edward F. Beale, Hiram Hitchcock, C. Ridgley Goodwin, A. C. Cheney, J. F. O'Shaughnessy, H. C. Taylor, J. W. Miller, A. S. Crowninshield, A. G. Menocal, Charles H. Stebbins, T. Harrison Garrett, Jules Aldige, R. A. Lancaster, Alfred E. Mills, Gustav E. Kissell, Horace Fairbanks, George H. Robinson, Alfred B. Darling, Joseph E. McDonald, James Roosevelt, Christian Devries, Frederick F. Thompson, Henry A. Parr, and such other persons as may be associated with them and their successors are hereby constituted and created a body corporate and politic in deed and in law, by the name, style, and title of "The Maritime Canal Company of Nicaragua," for the construction, equipment, management, and operation of a ship-canal from the Atlantic to the Pacific Ocean, either entirely through the territory of the Republic of Nicaragua or through Nicaragua and in part through the territory of the Republic of Costa Rica with such collateral, connecting, or cross canals as may be necessary to connect therewith, and to exercise such other powers as have been conferred by the Government of Nicaragua by the concession of that republic to the Nicaragua Canal Association, through Mr. A. G. Menocal, its representative, and dated the 23d day of March, A. D. 1887, and finally approved by the legislative and executive authority of the Republic on the 20th, 23d, and 24th days of April, A. D. 1887, and such powers as the Republic of Costa Rica may confer of the same kind as those named in said concession; and the said Maritime Canal Company of Nicaragua by that name shall have perpetual succession; may sue and be sued, plead and be impleaded, defend and be defended in all courts of law and equity within the United States; may make and have a common seal; and shall have and possess the rights, powers, and privileges usually possessed by similar companies. It may receive, purchase, hold, and convey such real and personal estate, property, and rights of property, or concessionary rights as may be necessary to carry into effect the purposes of this act (may issue stock to the amount of the value thereof in payment therefor, and the stock so issued shall be declared and taken to be full-paid stock and not liable to any further calls or assessments); may do all lawful things to secure the full enjoyment of the powers, privileges, rights, benefits, and grants contained in any canal concession so made by the Republic of Nicaragua or to be made by the Republic of Costa Rica, as aforesaid; and to aid in the construction of said canal and to carry out the purposes of this act, the said Maritime Canal Company of Nicaragua is hereby authorized to issue its bonds, and to secure the same by mortgage on its property and rights of property of all kinds and descriptions, real, personal, and mixed, including its franchise to be a corporation. The principal office of said corporation shall be in the city of New York, and all legal process may be served upon the person who may at the time be in charge of said office or upon the attorney of said company, whose name and address shall be certified by the president of the company, and such certificate shall be filed in the office of the Secretary of State of the United States.

SEC. 2. That the capital stock of said company shall consist of not less than one million shares of $100 each, with the right to increase the capital stock to two million shares of $100 each, upon the vote of two-thirds of the stock of said company at any time outstanding, which shares shall in all respects be deemed personal property and shall be transferable in such manner as the by-laws of said corporation may provide. Five incorporators, who shall be chosen by a majority of the number from those named in this act, shall have power to open books of subscription to the capital stock of said company in the city of New York, and at such other places in the United States, Nicaragua, or elsewhere, as they may designate, who shall receive all subscriptions for stock; and no stock shall be transferable except upon the books of the company provided for that purpose. The said incorporators shall give thirty days' notice of the time and place of the opening of said books, by publication in one daily newspaper in New York City, and one newspaper in Managua, Nicaragua, and one in San José, Costa Rica, if the said canal should be in part in the territory of that Republic. Sixty days' previous notice shall be given of the payment required of the time and place of payment by publication in one daily newspaper in the city of New York and in one newspaper in Managua, Nicaragua, and one in San José, Costa Rica, if the said canal should be in part in the territory of that Republic; and in case any stockholder shall neglect or refuse to pay, in pursuance of such notice, the stock held by him may be sold to the highest bidder for cash, according to the regulations to be made therefor in the by-laws of said company. The directors hereinafter provided for may adopt regulations and by-laws not inconsistent with the provisions of this act.

SEC. 3. That the affairs of said company shall be managed by a board of directors, fifteen in number, who shall hold their office for three years and until their successors are duly chosen and qualified, and a majority of whom shall be citizens and residents of the United States. At the first election five shall be chosen by the stockholders for one year, five for two years, and five for three years, and at each annual election thereafter five shall be chosen by the stockholders for three years. The said board shall elect from its number a president, who shall be a citizen and resident of the United States, and one or more vice-presidents of the company, who shall hold office for such terms as the by-laws of said board may provide and until their successors are duly elected and shall have qualified.

SEC. 4. That for the management and disposition of the stock, property, estate, and effects of the said company the board of directors may make such by-laws, rules, and regulations as may conform to the authority granted in such canal concession or concessions, and not be inconsistent with this act or the laws of the United States or the existing treaty stipulations of the United States with the Government of Nicaragua or of Costa Rica, if the said canal should be in part in the territory of that Republic; and may fix the time for election of directors, and in case of vacancy in said board, caused by death, resignation, or otherwise, may fill the same. No person shall be a director who is not a stockholder, and any one ceasing to be a stockholder shall cease to be a director. All meetings of stockholders shall be held at the office of the company in the city of New York, and at least one such meeting shall be held in each year; but failure to elect directors on the day appointed by said by-laws shall not be deemed to dissolve said company, but such election may be holden on any day appointed thereafter by the directors first giving thirty days' notice thereof, in manner aforesaid. The directors, of whom eight, including the president, shall be a quorum, shall have full power touching the election or appointment of all officers of the company, and said officers shall hold office at the will and pleasure of said board.

SEC. 5. Nothing in this act contained shall be deemed or construed to in any wise restrict or impair any right of the United States under any treaty in force with the Republic of Nicaragua.

SEC. 6. That Congress shall at all times have the power to alter, amend, or repeal this act when in its judgment the public good may so require.

Mr. FULLER. Mr. Chairman, I objected to the passage of this bill on last Friday because it was private-bill day, when it was understood that bills of no great and general importance should be considered, and for the further reason that only a few members were present, and I believed that a bill of this magnitude should be considered in full House. I also felt that the bill was too loosely drawn and did not have incorporated those safeguards which should be inserted in a bill of this kind. The object of this measure is a desirable one, and, in my judgment, of very great importance to the country. I know that there is a very general wish on both sides of this Chamber to pass a measure at this session of Congress looking to the building of the contemplated canal. I shall insist, however, on the adoption of certain amendments, which I deem necessary to protect the public who may have business connection with this organization, and if these amendments are adopted I shall not object to the consideration and passage of the bill.

I regret that only two or three members of the committee (Commerce) having charge of this bill are present. Owing to the multiplicity of questions presented for our consideration, and the utter inability for want of time to personally examine the merits of each measure, I have depended largely for information to aid my judgment in the discussion by the committees reporting bills. I especially regret that my colleague [Mr. ANDERSON, of Iowa] is not present, who is a member of the Committee on Commerce, for I am well satisfied that he would insist on material amendment of this bill before its passage.

The history of corporations in this country the past twenty-five years is more than sufficient to satisfy any legislator that no charter should be given to any set of men, I care not how high their business standing, unless there are careful provisions against stock-jobbing, watering of stocks, and putting worthless and pretended stocks upon the market. The people of this country have suffered so much in this regard hat in most of the States, especially the Western States, the Legislatures have iunisted, in the granting of charters to corporations, on the insertion of the most stringent provisions to guard the interests of those who invested in the contemplated enterprises.

I would call attention to the Iowa, Kansas, and Colorado laws upon this subject. It is not of the general order of legislation for Congress to charter corporations to do business and own personal and real estate on foreign soil. I am aware bills similar to the present one and the bill known as the Tehuantepec Ship-Railway bill have been before Congress, but while they have passed the Senate they have not become laws. Up to the present time Congress has insisted on inserting all the necessary safeguards in the charters, but for some reason they are left out of this bill, and about all the reason I have heard given for their absence is because the present incorporators are honest men. This will not do in legislation.

I find this bill provides that the directors may adopt regulations and by-laws; but there is no provision for the approval of the stockholders, no provision in reference to amendment of the same, or any provision requiring a notice of meeting of stockholders.

This bill does not require the making of an annual report by the officers of the company or any penalty for not so doing, or any punishment for knowingly making a false report.

I find no provision for the payment of certificates for stock issued nor to prevent capital stock paid in from being withdrawn or returned to stockholders or diverted from the use intended; nor any penalty for so doing.

No statute of limitation is fixed for subscriptions for stock and amount to be paid thereon, nor is any time fixed for commencement of the construction of the canal, nor any time fixed for expiration of corporation by limitation, if work is not commenced by a certain time.

The important and necessary provision absolving the Government from all pecuniary liability is left out of this bill; but heretofore it has always been insisted on being inserted.

I will now call attention to some amendments which I deem necessary to perfect this bill, and which I shall offer at the proper time. But first I desire to call the attention of the gentleman having charge of this bill to section 1, commencing on line 41, to the words "may issue stock to the amount of the value thereof in payment therefor, and the stock so issued shall be declared and taken to be full-paid stock and not liable to any further calls or assessments." I would like an explanation of these words when the gentleman comes to explain the bill, for I find, commencing with line 52, that for the purpose of constructing this canal the company is authorized to issue bonds. Is it proposed to pay for construction in both bonds and stock?

The first amendment is as follows:

The directors hereinafter described, with the approval of the majority of the stockholders, may adopt regulations and by-laws not inconsistent with the provisions of this act. But no amendment to or change in the by-laws shall be made except by a majority vote of the stockholders, either personally or by proxy, and at a meeting called for the purpose. At least twenty days' notice of any such meeting shall be published in a newspaper of general circulation in the city where the principal office of the company is located.

Is it not a proper and necessary safeguard to the stockholders that a provision should be incorporated to prevent the directors from changing the by-laws except by a majority vote of the stockholders and at a meeting called on published notice?

Second amendment proposed:

Said company shall annually, within sixty days from the 1st day of January of each year, make a report in detail, showing the condition of said company on the 31st day of December and exhibiting the following, namely: First. The amount of the capital stock of the company. Second. The property or assets held by the company. Third. The liabilities of such company. Fourth. The receipts of the company during the preceding year. Fifth. The expenditures during the preceding year. Said report shall be under oath and signed by the president and at least five directors of said company, and shall be deposited in the office of the Secretary of State of the United States. Said company failing to make and deposit said report shall be subject to a penalty of $10,000 for every month that said company shall continue thereafter to transact business.

Third. If said report shall be false in any material representation, all the offi-

cers who shall have signed the same, knowing it to be false, shall be jointly and severally liable for all damages arising therefrom.

Mr. Speaker, in my judgment no corporation should ever be organized by a legislative body unless it requires an annual report to be made of all its business affairs and showing its condition in detail. This is due to all investors, and if report is false a punishment should follow.

Fourth. That no certificates for stock shall be issued till at least 10 per cent. of the same shall be fully paid for in money at the par value of said stock, and the money deposited in the treasury of said company; and said stock so subscribed shall not be assignable until the whole of the same shall have been so paid in; and no payment on account of the capital of said company shall be made except in money; and said company is hereby prohibited from returning or repaying any part of the money so paid. No bonds in excess of the amount of capital paid and received shall be authorized or issued until such paid capital shall amount to the sum of $5,000,000. No part of the capital stock paid in shall be at any time withdrawn or returned to the stockholders or in any manner diverted from the proper uses of the corporation. Every person violating or aiding in the violation of the foregoing provision shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $10,000, or by imprisonment not exceeding five years, or by both said punishments, in the discretion of the court.

Stock should be bona fide and represent something and have a value, and no pretended payment for stock should be permitted. It should not be huckstered about and traded for jackknives. It should represent the value of the property. You can not build a canal on wind or paper. A corporation should not be permitted to mortgage until there is a cash investment made on the part of the stockholders. Nor should the capital stock paid in be diverted into other channels, as in case of the Union Pacific Railroad Company. If such a provision as this had been incorporated in that bill, the scandals and crimes connected with the Credit Mobilier would have been avoided. It matters not how national the objects sought to be accomplished, or how high the personal and financial standing of the incorporators, the legislative body should in granting a charter protect the public from a misappropriation or improper use of the stock.

Fifth. That if stock to the amount of ten millions of dollars shall not be subscribed, and 10 per cent. thereof actually paid in, before the expiration of two years next after the passage of this act, or if the work of constructing said canal shall not be actually commenced before and be in progress at the expiration of four years next after the passage of this act, the said corporation shall be deemed to have expired by limitation, and all its franchises and privileges shall be deemed to have absolutely ceased and become determined.

It has been the rule for years in chartering corporations by Congress to insert a provision of this kind. It prevents the too frequent practice of obtaining a charter for the purposes of trade and merchandise. It gives the company four years in which to commence construction. In a company where capital stock is one hundred million it seems clear that requiring ten million of stock shall be subscribed and 10 per cent. thereof paid in is a provision which should be insisted upon as an earnest that the company is bona fide and means to take hold of, build, and finish this great enterprise.

Sixth. That nothing in this act contained shall be held or construed to in any manner involve the United States in any pecuniary obligations whatever, other than in respect of the payment of tolls as provided in this act.

This is a very important amendment. In the Forty-ninth Congress the substance of this amendment was incorporated by the Senate in the Tehuantepec Ship-Railway bill and also in the Maritime Canal Company charter. I know it is said by eminent authority that the United States assumes no liability without this amendment, but wise men differ. The chairman of the Judiciary House Committee (very high authority, in my opinion) thinks a liability is created by the terms of the present bill. In any event, it is a proper provision to insist upon, and it clearly defines the status of the United States.

Mr. Chairman, I have no doubt but that this great necessity to commerce will soon be completed. The time has arrived, in this day of wonderful progress and enterprise, when the waters of the Atlantic and Pacific will be united at or near the Isthmus of Panama or Nicaragua. Capital in aggregated form is seeking all the known recesses of the earth for investment, and the business men of America will not permit this great project to fail which promises such a rich return on the investment. The progress of civilization the last twenty-five years is almost beyond comprehension. One of the greatest achievements of modern times was the building of the Suez Canal. The proposed enterprise is equally of as great importance. It is a necessity to the age.

The discovery of Bessemer, invention of the compound (steam-ship) engine, telegraph, and telephone have in a great degree annihilated time and space, and the time is fast approaching when no country or set of men shall have a corner or monopoly in the products and markets of the world. No country can in this day of progress maintain or sustain itself with a Chinese wall about it, as has been intimated on this floor. True progress and development does not depend on iron-clad laws and restrictions, but on the virtue, integrity, and industry of the people. I trust this bill will be so amended as to protect the public, and that this great project will soon reach its consummation.

In case the foregoing amendments are adopted I shall interpose no further objections to the passage of the bill.

I understand that the bill is now before the committee for amendments.

The CHAIRMAN. It is.

Mr. FULLER. Then I offer the following amendment.

The Clerk read the amendment, as follows:

Strike out all after the word "company," in line 30, section 2, and add to said section the following: "The directors hereinafter described, with the approval of the majority of the stockholders, may adopt regulations and by-laws not inconsistent with the provisions of this act; but no amendment to or change in the by-laws shall be made except by a majority vote of the stockholders, either personally or by proxy, and at a meeting called for the purpose. At least twenty days' notice of any such meeting shall be published in a newspaper of general circulation in the city where the principal office of the company is located."

The CHAIRMAN. The question is on the amendment.

Mr. PHELAN. Mr. Chairman, I simply desire to answer what I think was a covert thrust made by the gentleman from Iowa [Mr. FULLER] at the gentleman from Iowa [Mr. ANDERSON], who is absent. If I clearly understood what the gentleman from Iowa [Mr. FULLER] said, he intended to convey the impression that Mr. ANDERSON, who is now absent, should be held somewhat responsible for inconsiderate action on the part of the Committee on Commerce in not having incorporated in the pending bill the amendments which he has proposed. I am not responsible for the gentleman from Iowa [Mr. ANDERSON], who is absent, but I merely wish to say in defense of him and the Committee on Commerce in general, that no doubt he was actuated by the action of the Republican members of the Senate, who, under the leadership of Senator EDMUNDS, the leading Republican lawyer of that body, passed the bill practically as it was reported from the Committee on Commerce.

For myself, I desire to say that I regard the amendments offered by the gentleman from Iowa [Mr. FULLER] as eminently judicious, and I shall vote for them, although I shall vote against the passage of the bill in its present position. The amendments which the gentleman suggests simply remedy some few of the radical defects of the bill. There are other defects in that bill which I regard as of such importance as to compel me to vote against the bill. I therefore shall vote for the amendments, but I shall reserve to myself the privilege of voting against the bill.

Mr. BAYNE. Vote! Vote!

MESSAGE FROM THE SENATE.

The committee informally rose, and Mr. MCMILLIN took the chair as Speaker *pro tempore*.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had passed a resolution authorizing the printing of the annual volumes of the astronomical observations of the Naval Observatory for 1886, 1887, and 1888.

The message further announced that the Senate had passed a resolution authorizing the printing of 50,000 copies of the fourth annual report of the Bureau of Animal Industry, for the year 1887; and requested the concurrence of the House therein.

MARITIME CANAL OF NICARAGUA.

The committee resumed its session.

Mr. DUNN. Mr. Chairman, I will say that I am not physically able to discuss this question if it were desirable to do so, but I do not think the House feels that there is necessity for an elaborate discussion. We all know and feel that we may safely accept a question of simple law coming from the distingushed Senator who is understood to have scrutinized carefully and mainly to have draughted this bill—I refer to the distinguished Senator from Vermont, Mr. EDMUNDS. All know his purity, his ability, and his great skill; and we know his entire freedom from all disposition to make improper and unsafe concessions to corporations. This company does not seek aid of the Government either directly or indirectly by grant or implication. They simply ask a charter. They desire the prestige of a national charter, granted by the Congress, enabling them to avail and to utilize the great and magnificent concessions made by the Government of Nicaragua to this company. Many of the points which have raised the apprehension of my friend from Iowa [Mr. FULLER] have been guarded and protected by the articles of concession from the Nicaraguan Government to this company. They guard against improper squandering and disposition of the stock of the company or the properties which that government grants to the company; and if there is any apprehension in the mind of any gentleman at all that this Government may by omission or laches of any kind be involved in any liability, or grant unrestricted power to this company, I will be glad for him to show it and to offer an amendment that will protect against it, for I am as far from desiring to do either of these things as any gentleman of the House can be.

I look and I may perhaps be dazzled by the magnificent prospect that lies before us, and the grand results which I foresee from the achievement of this great enterprise, the final great master-work in engineering that now remains to make the whole world close neighbors and to expedite and facilitate the world's commerce as has never been done before. The construction and opening of this canal will multiply the tonnage not only of this country, but of the whole world, by three, without the building of another ship. It will more than triple the capacity of the tonnage of the world. No one can to-day estimate the magnificent results which mankind must reap from its fulfillment. Therefore, if gentlemen have apprehensions, I beg that they will present such amendments as will relieve their own minds, and then let us

give to this company the small, naked privilege of availing themselves of this great concession, so as to go on and complete the last great remaining work of commerce and civilization.

Mr. RYAN. Mr. Chairman, the object of this measure will doubtless meet the approval of every member on the floor of this House, and of the entire country. The only question is whether the bill contains proper safeguards for the protection of the public. One of the greatest burdens laid upon labor in this country is that it has been obliged, and is obliged, under the system of incorporating transportation companies by the several States, to pay tribute largely to fictitious capital, capital which has never been invested at all. It is provided by the amendment which has been read that the stockholders of this company shall be required to pay in 10 per cent. of the capital, and, as I understand it, there is nothing requiring them to pay anything beyond that.

Mr. DUNN. The gentleman can not suppose that it would be possible to complete the work without paying for the stock?

Mr. RYAN. No; but I do suppose that it would be possible, by borrowing the money on bonds secured by mortgage, to complete the work without paying in more than 10 per cent. on the stock. I say such a thing is possible. Supposing that to be done, then the revenues derived from the canal must pay off that indebtedness and the interest upon it, after which the surplus would be devoted—to what? Why, to paying dividends upon the stock. Now, the question is whether this measure contains provisions to guard against the public being required to pay dividends upon capital only 10 per cent. of which has actually been paid in. Dividends might be declared upon the dollar of nominal capital when the capital really invested was only 10 cents. I am not familiar with the details of this bill, and I do not know but it contains ample provisions to guard against an imposition of that kind upon the products of labor which must be transported through this canal. I ask my friend who has charge of the bill whether it does contain such a provision?

Mr. FULLER. I think I can answer the gentleman, so far as the amendment which I have offered is concerned.

Mr. RYAN. Well, I desire that information.

Mr. FULLER. The amendment which I propose to offer prescribes, first, that 10 per cent. of the capital shall be paid in money; next, that the money shall be deposited in the treasury of the company; that the stock shall not be assignable until the whole of the capital shall be paid in, and that no payment on account of the capital of such company shall be made except in money. Further, it prohibits the company from returning or repaying any part of the money so paid in. Therefore, if the amendment is adopted, the money must stay in the treasury. Then there is a further provision that the company can not issue bonds until $5,000,000 have been paid into the treasury. It seems to me that the amendment covers very fully the questions raised by the gentleman from Kansas [Mr. RYAN].

Mr. RYAN. That was a difficulty I had in my mind in relation to this bill. I think that point ought to be amply guarded; and if it has been, and other safeguards are adequate, I am entirely satisfied with the bill and shall gladly support it; but having only heard read the amendment of my friend from Iowa [Mr. FULLER], I am not clear that it does not adequately provide against watered capital. We all know that the several States that created our great transportation corporations were greatly at fault in not providing such safeguards in their charters. The result is, as everybody knows, that the labor of our country is taxed heavily to pay dividends on fictitious capital.

There is scarcely a line of railway in this country that is not represented by pretended capital from 25 per cent. to 300 per cent. in excess of what it would cost to duplicate the same line of railway. The products of labor are taxed by some of our great railways to pay dividends upon $90,000 per mile, whereas the same line could be duplicated at a cost not exceeding $25,000 per mile. We hear a great deal about the wrongs committed against labor, and yet this, the greatest of all wrongs, is rarely mentioned. It is a system of robbery as wicked as it is insidious. It is one which is likely sooner or later to be assailed with the irresistible fury of a plundered public. It is a wrong of such gigantic and far-reaching consequences that there is sure in the near future to come from the people an imperative demand for its complete eradication.

Then shall we sit here and create a corporation to which the commerce of the world must pay tribute without providing adequate safeguards against such a perfidious system? A large share of that commerce, it is true, will be the products of the labor of foreign nations, but a goodly share of it will be the products of American labor. I insist that Congress shall never again create a transportation corporation with power to carry on such a system of piracy against the labor of this country. Out of abundance of caution I shall therefore offer as an amendment to the amendment of my friend from Iowa the following:

And no dividends shall be declared or paid on the stock authorized by this act in excess of 8 per cent. per annum on the amount actually paid to said company upon such stock.

I am as anxious for this measure to pass as anybody. It is one of great public importance. But I am not willing to create this corporation without such restrictions in the charter as shall adequately protect the public.

Mr. STOCKDALE. Mr. Chairman, I have examined this bill to some extent, though not very fully, but I am not willing, in dealing with such an important measure, to take it simply upon the statement that the gentleman who drew it up and advocated it was very able, because I have sometimes found it to be the case that the more able and astute the gentleman is who frames a measure of this kind, the less the Government is protected and the more the corporation is benefited.

I do not want to be understood as saying anything against corporations in general or against this particular corporation, but to speak briefly of the merits of this bill as it is framed and before the House. No member on this floor is more heartily in favor than I am of the scheme for establishing some communication—or as many lines of communication as you please—between the two oceans so as to aid the commerce of this country. I concur in all that has been or may be said as to the great commercial advantages of the scheme; and I think the Gulf States will probably be the first to realize those great advantages.

The gentleman from Arkansas has spoken of the large and liberal concessions made by Nicaragua. That gentleman is a lawyer well enough versed in the law to frame a bill of this sort, or any other, and I regard his legal opinion with great respect. But I do not consider the concessions made by the Nicaraguan Government very large or very liberal, though they are large enough in verbiage. In those concessions it is provided that the vessels of war of all governments that may be at war with the Nicaraguan Government shall be rigorously excluded from passage through this canal or entrance to it. As the canal will be on the soil of Nicaragua, such a provision is well enough; but it does not stop there. There is provision for excluding the vessels of any country that may be at war with Nicaragua or any Central American republic. Taking the family of republics down there, it would be a very easy thing for a powerful government to produce a state of war between some one of them and the United States Government. A declaration of war by any one of them would stop our vessels. In matters of war diplomacy is not always conducted upon the broadest and most magnanimous scale.

A government at war sometimes has very great influence over smaller governments; and the state of war contemplated by this provision might occur by the smallest Central American republic being declared in a state of war with the United States Government, and that might be done at the instance of some great country which might be at war or preparing for war with the United States Government. Who is to determine what a state of war is? Some of the ablest lawyers in this House, when we had under discussion the proposed settlement of the French spoliation claims, differed in opinion with reference to the question whether there was or was not at the period when those claims originated a state of war between France and the United States. The gentleman from Georgia [Mr. TURNER] made a very able historical and logical argument to show that there was a state of war between these two countries, and that, therefore, the Government of the United States was not liable to pay those claims. Other very able lawyers argued, probably as ably and logically, that there was no war. All parties will admit that there never was a gun fired between France and the United States during all that time, and that no war was ever declared by either Government. A war may exist without a declaration of war (as it did between the United States and Mexico) until fighting had been done. But in the case of France and the United States war was not declared nor a gun fired; yet gentlemen have insisted—very powerfully, I think—that a state of war did exist between the two countries.

Mr. MILLIKEN. The court decided the other way.

Mr. STOCKDALE. I am informed by my friend that the court decided the other way; but I think the gentleman is mistaken, unless he refers to the finding of facts of the Court of Claims in finding the facts at the instance of Congress, and the findings of that court can not be cited as decisions.

Now, who is going to say whether war exists or not? Shall our vessels stand at the mouth of this canal on the one side or the other until it is decided by some court whether war exists or not? And what court shall decide it, a court of the United States or a court of some of those southern republics? Suppose one court decides that there is war, and another decides that there is not; then what? What power is then to determine whether this rigorous exclusion shall be enforced, whether our vessels shall go through the canal or hover at the two entrances and view vessels of other countries pass them? This bill does not contain one line in the way of provision by which this Government will have any power, authority, or influence to say who shall go through that canal. United States vessels might go to the mouth of the canal on either the Atlantic or the Pacific side, and the Nicaraguan Government might say, "Your Government is at war with some one of the Central American republics," and our vessels would have to wait until that question was determined.

There is no provision by which the Government of the United States can exercise any control whatever. It yields power entirely, so far as there is a yielding of power, to this company. There is no grant of power by the United States Government, I admit, except this act of incorporation. This Government has no territorial jurisdiction to

grant, no authority to grant or withhold such jurisdiction except as it may be involved in the general doctrine which the people of this Government have adopted and which is embodied as a part of its policy, to which all parties assent, that our Government can not allow that canal to be dug or a railroad to be built across the Isthmus without having some sort of control there; at least to the extent of having that line of communication neutral for the benefit of nations. That is as little as we could ask; and this is a very important concession if we intend to maintain the Monroe doctrine, for is it not the inevitable sequence of the action of Congress in chartering this company that we accept and acquiesce in and indorse all the provisions contained in these concessions, misnamed, of the Nicaraguan grant?

If this bill should pass and be signed to-day there is nothing in it which would prohibit this company from selling out to-morrow every dollar's worth of its stock to the Government of Nicaragua or England or Germany or Kamchatka or to any company representing any foreign government. The company must have its office in New York, it is true.

Mr. DUNN. All the prohibitions which the gentleman intimates are necessary will be found in the articles of concession of Nicaragua.

Mr. STOCKDALE. I think the gentleman is mistaken in that; but if he be correct, to whom does the Nicaraguan Government make these concessions? Not to the United States Government, but to this company. And Nicaragua may buy out the company to-morrow: England, Germany, Egypt, or any other country may buy it out to-morrow; if these gentlemen want to sell, and I apprehend that gentlemen who produce a scheme like this would be willing to sell out for a profit, if they get this charter. They are business men, under no obligations to anybody.

The concession of the Nicaraguan Government is to the company. It is not a treaty. There are treaties, but I am speaking of the concessions, that they are not in the form of a treaty with the government, but in the form of voluntary concessions to this company for the purpose of producing that canal.

Now, I say, Mr. Chairman, that a scheme of this magnitude I believe can be so hedged about, if gentlemen are anxious to build it, that the Government of the United States will have some right and some power to interpose its voice if it be undertaken to be established in a manner inimical to the United States either in war or peace, either in commerce or in reference to its prestige upon the high seas.

This canal will be a part of the high seas physically, or in practical effect on commerce, if it shall be built. Yet it will be controlled by a private corporation, by this charter over, which no government will have specific control except Nicaragua.

Mr. FARQUHAR. Let me ask the gentleman from Mississippi if the primary condition of things in reference to the proposed construction of the Suez Canal was in any respect different from what is proposed in reference to this Nicaraguan Maritime Canal Company? I should like to know whether a governmental guaranty is needed to initiate or complete the work intended to be built by this Maritime Canal Company. Is there any more necessity in this instance that the Government of the United States should guaranty this company than there was in the case of the Suez Canal by the French Government? Its stock without such guaranty was floated in the money markets of the world, and one of the grandest commercial successes in modern times was accomplished with no governmental guaranty, and with no special protection of the kind indicated.

Now, let me say to my friend from Mississippi—and I do not intend to make a speech—the Nicaraguan Government has gone as far as it can go, and I can not see why the Government of the United States——

Mr. STOCKDALE. I hope, Mr. Chairman, this speech is not to come out of my time.

Mr. FARQUHAR. I wish, then, the gentleman from Mississippi would state just what kind of guaranty he deems necessary in this matter.

Mr. STOCKDALE. The gentleman has entirely misunderstood me.

Mr. FARQUHAR rose.

The CHAIRMAN. The gentleman from Mississippi declines to yield further.

Mr. STOCKDALE. I am willing to yield for a question, but not for a speech.

Mr. FARQUHAR. I wish to know what guaranty the gentleman would have different from that in the case of the Suez Canal?

Mr. STOCKDALE. I am not discussing this project on the basis of the Suez Canal, and I did not say anything about this Government guarantying this canal. If the Government were to undertake to guaranty the construction of this Nicaragua Maritime Canal Company, I would myself vote against the bill.

Mr. FARQUHAR. I do not mean any money guaranty, but I refer to a governmental guaranty as to the protection of the rights of the company.

Mr. STOCKDALE. Let me ask the gentleman from New York how long after the construction of the Suez Canal, under the concessions of the Egyptian Government, Great Britain had the controlling interest in it?

Mr. FARQUHAR. The controlling interest is in the hands of the French.

Mr. STOCKDALE. Great Britain was said to have acquired the controlling interest in the Suez Canal, and, so far as I understand, holds that control to-day.

Mr. FARQUHAR. It may possibly so far as the money interest. I know the French shareholders had to lay down their stock on the English stock exchange. But that was not governmental interference. Neither the English Government nor the French Government, as a government, has anything to do with it. It may possibly be the majority money interest was transferred.

Mr. STOCKDALE. Certainly, and with that transfer obtained the control of the canal. It occurs to me that the gentleman's illustration is a very bad one. If there is anything in the constantly expressed and reiterated policy of the United States Government, it is that nothing of so great a value shall pass from under the control of the Government, or in reference to which they shall not have some part in the control of this great water way. The prestige of the United States in the western waters and over the continent of America is one of the tenets of American political faith. If there is anything on which the Government of England prides itself, whether it be tangible or intangible, it is the prestige of Great Britain upon the high seas. And if the Suez Canal was constructed upon concessions not materially differing from the Nicaraguan concessions, nevertheless the English Government took good care that Englishmen had control of that canal shortly after it was finished. And if we pass this crude bill based upon these skillfully drawn concessions, we will find England controlling this canal in the near future, and the people of the United States will point with derision at the record of the Fiftieth Congress in this matter.

And who does not know that the money control of a great improvement like that means in effect the physical and supreme control of it? There is the condition to which I object, and now——

Mr. FARQUHAR. Will the gentleman permit an interruption? In section 3 of the bill he will find that the control—if he means the national control or the nationality of the members comprising the board of directors—is fixed, for it provides that it shall consist of fifteen directors holding office for three years, and that a majority of them shall be citizens and residents of the United States.

Mr. STOCKDALE. I am aware of that.

Mr. FARQUHAR. And therefore I do not see how we can possibly go any further than that, except to make the whole board of directors citizens and residents of the United States.

Mr. DUNN. I desire to save the gentleman from Mississippi unnecessary labor on that point. The gentleman insists that the company can sell its stock and property to another government.

Mr. STOCKDALE. To any other person or corporation that it pleases.

Mr. DUNN. But you said that it could sell it to a government; that it could sell it to any government. Is that the proposition?

Mr. STOCKDALE. I will hear you.

Mr. DUNN. You will hear me to see if you can sustain the proposition.

Mr. STOCKDALE. No, sir; I will hear you to submit a question; not to present an argument.

Mr. DUNN. Has the gentleman read article 8 of the concession?

Mr. STOCKDALE. I have read all of the concessions.

Mr. DUNN. Article 8 of this concession from the Nicaraguan Government expressly controverts the position that the gentleman assumes, and would prohibit the action that he seems to apprehend. It provides as follows:

> The present concession is transferable only to such company of execution as shall be organized by the Nicaraguan Canal Association, and in no case to governments or to foreign public powers. Nor shall the company cede to any foreign government any part of the lands granted to it by this contract, but it may make transfers to private parties under the same restrictions. The Republic of Nicaragua can not transfer its rights or shares by selling them to any government.

Does the gentleman understand that there is an absolute prohibition against the sale of the shares or of the property to any other government or power whatever?

Mr. STOCKDALE. That is a prohibition of sale as to governments. But the gentleman must see that it is no answer to my position, notwithstanding the air with which the gentleman claims to give me information. They can not sell under the concessions to a government as a government, but will the gentleman undertake to say as a lawyer that they can not sell to the citizens of a government, or to any corporation organized by any government or under the authority of any government on the face of the earth? It precludes the sale to a government itself as a government, but not to a citizen, or to the citizens or corporations of a government.

Mr. FARQUHAR. But if they did sell to the citizens of a government they would not have governmental rights. They would never have such rights as a government. They would have simply the right of investment. I do not see how you can strengthen the matter beyond what this bill proposes in that regard. No sale of this property can give any power beyond what the concession from Nicaragua gives to this company.

Mr. STOCKDALE. But that is the very point. This concession is to the company and not to the United States Government, and if at any time the Nicaraguan Government desires to so change her con-

cessions as to allow sales to be made directly to other governments, she would only have to get the consent of the corporation and this Government could not interpose an objection.

Mr. DUNN. Will you make an amendment that will improve that portion of the bill?

Mr. STOCKDALE. I am willing to do that if time be allowed. But will the gentleman permit me to proceed now in my own way? I do not think that the floor belongs to the gentleman from Arkansas.

Mr. DUNN. I am not claiming it.

Mr. STOCKDALE. There seems to be a great deal of impatience upon the right because I rise to discuss the question presented by this bill, which, on the information that I possess and on the best light that I can bring to bear on its construction, is a giving away of the rights of the American Republic to that prestige that it should have and has a right to claim on the high seas in that direction.

This is a concession of the Nicaraguan Government to this company, and the long reading of the article of concessions on the part of the gentleman from Arkansas, that they can not sell to any government, as a response to my argument is simply a begging of the question. They can sell to a corporation or to individuals of any government, and that was what I meant to say.

Mr. BAYNE. Will the gentleman yield to me for a question?

Mr. STOCKDALE. Yes, sir.

Mr. BAYNE. I understand you to concede that the bill might be so amended as to preclude the difficulties that you apprehend may arise?

Mr. STOCKDALE. I think it might be so amended.

Mr. BAYNE. That in other words the power rests in Congress to amend it?

Mr. STOCKDALE. I believe it does.

Mr. BAYNE. Now, has the gentleman read the fifth section of the bill?

Mr. STOCKDALE. Yes, sir.

Mr. BAYNE. That "Congress shall have at all times power to alter, amend or repeal this act"——

Mr. STOCKDALE. Yes, sir.

Mr. BAYNE. "When in its judgment the public good may so require?"

Mr. STOCKDALE. Yes; I am coming to that. There never was, Mr. Chairman, in my judgment, a more miserable catch-penny device inserted into any bill that went before an enlightened legislative body than that.

Mr. BAYNE. What? The reservation of the power to alter or amend?

Mr. STOCKDALE. What is the power? It is not the power to alter or amend only.

Mr. BAYNE. Oh, yes. I have quoted the language.

Mr. STOCKDALE. It is the power to repeal as well. I was about to add, I claim to understand the English language.

Mr. BAYNE. The bill itself provided that Congress shall have the power to alter or amend.

Mr. STOCKDALE. I do not say that that language is not contained in the bill. If the gentleman would do me the honor to listen to me with a little more patience, he would see that there is a very clear distinction in the point that I am trying to make. Congress by the sixth section of the bill reserves the power at all times to alter, amend, or repeal the act when in its judgment the public good may so require.

I say no company would invest a hundred millions with that saving clause in it, if they did not intend to sell out or transfer the stock so as to speedily put the company and the enterprise beyond the reach of the United States Government, where the repeal would not affect them.

I did not know that I would raise such a storm around me when I began to discuss the merits of this bill. Gentlemen seem to resent any infringement of it as though it were a child of theirs; but since the attention of the House has been called to this last section, I ask gentlemen on this floor who represent a constituency of business men if after they have granted these powers to the company, and after that company shall have gone on and expended a hundred millions of money—or after they have expended $200,000,000, as they have the right to increase the capital—by money or water, and if that company undertake to sell or do anything else with its property not inconsistent with the concessions of the Nicaragua Government and not inconsistent with this charter as it now stands, that Congress would have the temerity to go on and repeal the act and destroy their enterprise after they have, under the guidance or connivance of the Government, expended this large amount of money?

There is not a man on the floor who would vote to repeal the law as long as the company shall not act inconsistently with the bill or in violation of it. Laws may be repealed, and properly so; and I grant that the power exists here. There is no question about that. But the power to do a thing, and the good faith, the consistency, and the respectability of doing it, are two different things. I say that the powers proposed to be here granted will be on record to be read of all men, and will operate as an indorsement of the Nicaragua concessions, and the company will have the right to regard them as settled on the basis of good faith; for no respectable man can vote to repeal the law which would destroy their rights and property acquired under them, when the company shall have expended their money, unless they had violated the provisions of the bill or the concessions. That clause of the bill struck me with peculiar force, giving arbitrary power to Congress to repeal or alter a law, or to amend or change it, and thereby destroy the rights of property. But where is the policy of the Government expressed?

Mr. BAYNE. In the last section:

That Congress shall at all times have the power to alter, amend, or repeal this act when in its judgment the public good may so require.

Mr. STOCKDALE. That is a most singular proposition to come from a gentleman who represents a business community. These people who spend their money are not to be consulted at all. If the public good requires it then the owners are not to be consulted.

Mr. BAYNE. Oh, no.

Mr. STOCKDALE. That is what it says and means. What does it mean if not what it says? Who is to determine whether the public good requires the repeal of the charter? Why, this Congress is to determine it; and whenever it pleases it can determine that the public good requires the repeal of this law or the alteration or amendment of it without providing further to take any consideration of the interests of these parties who are to expend their money and construct this stupendous improvement; and this is another serious objection to the framing of this bill. What I said in answer to the gentleman is that Congress has power to make this bill as it ought to be, and should do so. I am not going into captious objections to it. If I was I would not make the remarks I have made.

I have not been an obstructionist and will not be now. I will abide by the vote of the House. But I believe that if this bill shall pass now, with all these powers in it and all these defects in it and these dangers in it—and every time gentlemen on the other side speak there is something new evolved to show that this company would be at the mercy of Congress under the power this last clause would give—that it will be disastrous to the success of this great enterprise of constructing that canal. For I say that in my opinion no set of men who have brains enough to have $100,000,000 are going to build a canal under such a provision as this, and particularly after this discussion of the powers of the Government as shown in this bill; and I doubt very seriously the good faith of the scheme when gentlemen say they will undertake to invest $100,000,000 on such a document as this. It is too uncertain, too vague, and too indefinite a document for business men to make an investment of $100,000,000 upon.

Therefore I say that men interested in such an enterprise as that embraced by this bill—and men who I am told control millions—if they will invest $100,000,000 on any such document as that under this concession of the Nicaraguan Government, it looks very much like a trading scheme or to get the United States Government committed to it and then proceed under the auspices of some other government. As I have said, these concessions can give no power, except so far as Nicaragua has the power to grant them, under that charter, and these people could sell to whom they pleased. They could sell to a citizen of Nicaragua their stock, notwithstanding the majority of the stockholders and the president also be citizens of the United States, and the general office may be in New York, and they may also have another office, or other offices, as they put it, in Europe or any other country.

The chief office may be where the president is; they may call that their chief office, and yet they may do all their business somewhere else and transmit it to the chief office. In other words, this concern, after being chartered by the Government of the United States, can pass out of their hands in less than a week, and the Government gives them the power to do what? Why, if I be correct in my understanding, it simply gives them the power to trade in the stock of this corporation which is to exist on paper.

Now, it may be said that that is harmless; but why should the Government of the United States do a thing simply because it may be harmless? This means something, or else these gentlemen would not want it, and I will tell you what I think it means to this Government. It means a giving away of power on the part of this Government to control or influence the construction of canals across the Isthmus, and when we do that we do not do a harmless thing. We do an extremely foolish thing when we raise up a barrier in our own way which will confront us when we undertake hereafter, as we may undertake, by treaty or by the advancement of money, to control the construction of a canal to connect the two oceans; and it is no argument to say we can escape this awkward attitude by an act of bad faith—the repeal of this charter after property rights have been acquired under it.

I do not think there has ever been any proposition relating to the crossing of the Isthmus, either by land or by water, which provided that the war vessels of the United States must stand at either end of the canal and wait if we shall happen to be at war with any South American republic. The Government of the United States is asked to charter this company, and if it does so, then I say that it can not, with any show of reason or justice, undertake to repeal that charter on the ground of public policy; and gentlemen who now advocate the passage of this bill would then cry out shame to the Congress that would destroy property rights that it had fostered and created. Whose public policy? The public policy of this Government?

We go to the governments of South America and of Europe and say, "Here is a charter providing for a canal across the Isthmus;" and then we turn around and say that that charter shall be repealed because of our public policy alone. Suppose we should repeal this charter after the company has sold out to some other country. What then? Why, we have marched up the hill, and can march down, if we choose. The company and canal will be under the protection of England or France. Who shall say when we are at war and when we are not? Who shall admit vessels to go through the canal when we are at war and who shall exclude them?

This bill ought to be amended, and if it can not be properly amended now, then, where there is so much at stake and so much difference of opinion, this House is too near the end of the present session and the attendance is too small to pass it. I do not mean by that remark that I am going to be factious or call a quorum, but I say the attendance in this House now is too small to consider and pass a bill of this importance. A few men are asked to legislate here upon a question that will affect every State and every hamlet in the Union, and they are asked to take this measure just as it is simply because the gentleman who framed it is very able.

I am, as I have said, as much in favor of the scheme as any man can be, and my constituents want it, but I want it and they want it on a basis that will be American, and with such concessions as will admit the United States to a voice in its control in the future; and it is because I am in favor of the canal that I oppose this scheme that will either defeat the building of the canal or exclude the United States from all participation in its control.

I hope to see the bill put in proper shape and passed and become a law, and I want to see the name of the United States in it somewhere; but I shall not be surprised at all if this company reject the charter and refuse to accept it whenever the bill is so framed as to retain to this Government any right to influence the action of the company.

Mr. LANHAM. I ask unanimous consent that all debate upon the pending bill be now closed.

Mr. RYAN. Will that include debate upon the amendment?

Mr. LANHAM. Upon the bill and amendments.

Mr. FULLER. There is only one amendment pending.

Mr. RYAN. I desire to offer an amendment to the amendment of the gentleman from Iowa [Mr. FULLER].

Mr. FULLER. The amendment to which the gentleman refers has not yet been offered.

Mr. RYAN. Well, I desire to offer an amendment to the amendment which the gentleman from Iowa [Mr. FULLER] proposes to offer.

Mr. LANHAM. I ask unanimous consent that all general debate upon the bill and amendments be now closed.

The CHAIRMAN. The Chair does not understand that the gentleman desires to cut off the five-minute debate.

Mr. LANHAM. I ask unanimous consent that all debate on the bill and amendments be closed in ten minutes.

Mr. STOCKDALE. I object to that.

Mr. RYAN. I hope the gentleman will not undertake to cut off the five-minute debate.

Mr. LANHAM. How much time does the gentleman want?

Mr. RYAN. About five minutes.

Mr. JACKSON. I want about five minutes, if the gentleman from Texas pleases.

Mr. LANHAM. Then, Mr. Chairman, I move that all general debate be now closed.

The motion was agreed to.

The CHAIRMAN. The question now is on the amendment of the gentleman from Iowa [Mr. FULLER].

ALFRED PLEASONTON.

Mr. HOOKER. Mr. Speaker, before that amendment is voted upon, I ask consent of the gentleman having charge of this bill to let the committee rise for a moment in order that I may present a privileged report and have it returned to the Senate.

Mr. DUNN. I yield to the gentleman.

Mr. HOOKER. I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose, and the Speaker *pro tempore* [Mr. MCMILLIN] resumed the chair.

Mr. HOOKER. Mr. Speaker, I submit a report from a committee of conference.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasonton with the rank and grade of colonel, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same.

CHARLES E. HOOKER,
D. B. HENDERSON,
JOSEPH WHEELER,
Conferees on the part of the House.

C. K. DAVIS,
F. M. COCKRELL,
Conferees on the part of the Senate.

Mr. HOOKER. I move that the report of the committee of conference be adopted.

The SPEAKER *pro tempore*. The Chair will call the attention of the gentleman to the fact that no statement accompanies the report, as the rule requires; but if there be no objection, the report will be accepted without it.

There was no objection.

Mr. HOOKER. I will simply say that the House passed a bill retiring General Pleasonton with the rank of colonel, but the Senate refused to agree to it, and finding the Senate conferees obstinate on that point, the conferees on the part of the House agreed to accept the Senate amendment.

The conference report was adopted.

Mr. HOOKER moved to reconsider the vote by which the conference report was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

MARITIME CANAL COMPANY OF NICARAGUA.

The Committee of the Whole House on the Private Calender resumed its session.

The CHAIRMAN. The question is on the amendment of the gentleman from Iowa [Mr. FULLER].

Mr. MCMILLIN. Let us have the amendment again read.

The Clerk read as follows:

Strike out all after the word "company," in line 30, of section 2, and add to the said section the following: "The directors hereinafter described, with the approval of the majority of the stockholders, may adopt regulations and by-laws not inconsistent with this act; but no amendment to or change in the by-laws shall be made except by a majority vote of the stockholders, either personally or by proxy, and at a meeting called for the purpose. At least twenty days' notice of any such meeting shall be published in a newspaper of general circulation in the city where the principal office of the company is located."

The question being taken on agreeing to the amendment, there were—ayes 23, noes 8.

Mr. TURNER, of Kansas, and Mr. LAWLER. No quorum.

Tellers were ordered; and Mr. TURNER, of Kansas, and Mr. DUNN were appointed.

The committee again divided; and the tellers reported—ayes 17, noes 5.

Mr. LAWLER. No quorum.

Mr. LANHAM. I move that the committee now rise.

Mr. O'NEILL, of Pennsylvania. Does the gentleman mean to have it understood by this motion that we are not to go into committee again to go on with the call of members for the bringing up of unobjectionable private bills?

Mr. LANHAM. As I have already said this morning, I believe it is the intention of some gentlemen here to prevent any bill being passed; that has been stated very deliberately.

Mr. O'NEILL, of Pennsylvania. I propose that we go on and test the disposition of gentlemen in reference to private bills which may be called up. There are a great many such bills which are unobjectionable and ought to be passed; and if we go on with the call of the roll in Committee of the Whole many of such bills may be considered. I do hope the committee will not rise.

Mr. LANHAM. But we are without a quorum, and the point is insisted upon.

Mr. O'NEILL, of Pennsylvania. That call applies only to the pending bill, and I very much regret it, for I think it is a bill which should be passed. But, Mr. Chairman, there are individual citizens who are asking for legislation which can not be objected to.

Mr. LANHAM. How are we going to reach such bills when the point of "no quorum" is insisted upon?

Mr. O'NEILL, of Pennsylvania. Other business may intervene and the question of no quorum may be waived.

The question being taken, the motion of Mr. LANHAM that the committee rise was agreed to.

The committee accordingly rose; and Mr. MCMILLIN having taken the chair as Speaker *pro tempore*, Mr. ROGERS reported that the Committee of the Whole House on the Private Calendar, having had under consideration the bill (S. 1305) to incorporate the Maritime Canal Company of Nicaragua, had come to no resolution thereon.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had disagreed to the amendment of the House to the bill (S. 1786) to regulate appointments in the Marine-Hospital Service of the United States; asked a conference with the House on the disagreeing votes of the two Houses, and had appointed as conferees on the part of the Senate, Mr. DOLPH, Mr. SAWYER, and Mr. COCKRELL.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the bill (H. R. 6514) for the allowance of certain claims reported by the accounting officers of the United States Treasury Department.

LEAVE TO PRINT.

Mr. RYAN. I ask unanimous consent to extend in the RECORD my remarks made to-day in Committee of the Whole on the bill in relation to the Nicaragua Canal.

There being no objection, leave was granted.

SAMUEL FELS.

Mr. STONE, of Kentucky. I ask unanimous consent that the Committee of the Whole House be discharged from the further consideration of the bill (H. R. 6246) for the relief of Samuel Fels, and that the bill be now considered.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Samuel Fels, of McCracken County, Kentucky, out of any money in the Treasury not otherwise appropriated, the sum of $2,333.62 for tobacco purchased by him from an agent of the United States Government, and afterwards recovered and taken from him by the owner.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this bill?

Mr. DINGLEY. Let the report be read.

The report of the Committee on War Claims (by Mr. STONE, of Kentucky) was read, as follows:

That the proof in this case shows that the claimant purchased five hogsheads of tobacco from John E. Woodward, as sold by him under military orders of General E. A. Paine, then commanding the Western District of Kentucky, and paid said Woodward therefor $2,333.62; that on February 20, 1865, E. A. Lindsay, by his suit against Mr. Fels in the Jefferson County circuit court of Kentucky, established his right to said tobacco as the owner thereof at the time it was seized and sold by order of General Paine. The court decided that the orders of General Paine in seizing and selling said tobacco were illegal, and that no title passed to Mr. Fels; and the claimant was forced to and did pay the owner of said tobacco, E. A. Lindsay, its value, being $2,504.85.

Your committee are of the opinion that Mr. Fels bought (and paid for) said tobacco in good faith from the military authorities of the United States without notice of said Lindsay's ownership thereof or claim thereto, and that he should be reimbursed for the amount he paid for it.

Your committee report back the bill and recommend its passage.

Mr. ALLEN, of Mississippi. I desire to ask the gentleman from Kentucky [Mr. STONE] how much of this money the Government received.

Mr. STONE, of Kentucky. Something over $2,300—the whole amount for which the tobacco was sold.

Mr. ALLEN, of Mississippi. The report does not show that that amount went to the Government; it says the tobacco was sold for that.

Mr. STONE, of Kentucky. The report does show that Mr. Fels paid $2,333.62 for the tobacco at a Government sale. Then the original owner of the tobacco brought suit against Mr. Fels in the circuit court at Louisville, and secured judgment against him for the value of the tobacco, $2,504, which Mr. Fels was obliged to pay, making nearly $5,000 in all which he paid for the tobacco.

Mr. ALLEN, of Mississippi. He paid this money, it seems, to somebody who sold the tobacco illegally; but is there any proof that the Government ever got the money?

Mr. STONE, of Kentucky. Yes, sir; this tobacco was sold by order of General Paine——

Mr. ALLEN, of Mississippi. Oh, a great many things were sold during the war by order of somebody; but the question is whether this money was received by the Government.

Mr. STONE, of Kentucky. The Government did receive the proceeds of this sale.

Mr. ALLEN, of Mississippi. Where is the proof of that?

Mr. STONE, of Kentucky. With the papers in the War Department and upon the records of the court in Louisville, Ky. [Cries of "Vote!"]

The CHAIRMAN. Is there objection?

Mr. JACKSON. I understand this is the sum paid to General Paine.

Mr. STONE, of Kentucky. It is.

Mr. JACKSON. And no more?

Mr. STONE, of Kentucky. And no more.

The CHAIRMAN. The Chair hears no objection.

There being no objection, the bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. STONE, of Kentucky, moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid upon the table.

The latter motion was agreed to.

BRIG TALLY-HO.

Mr. ROCKWELL. Mr. Chairman, I ask by unanimous consent to call up for consideration the bill (H. R. 6757) to refer the claim of the owners of the brig Tally-Ho to the Court of Claims.

The CHAIRMAN. The bill and report will be read subject to objection.

The bill was read, as follows:

Be it enacted etc., That the claim of the legal owners of the brig Tally-Ho, her cargo and freight, and of personal effects on board her, alleged to have been sunk by collision with the United States steam vessel of war Pinta, on or about the 3d day of October, 1883, be referred to the Court of Claims, to hear and determine the same to judgment, with right of appeal as in other cases.

Whereas the legal owners of said brig, cargo, freight, and personal effects, or some of them, did, on the 29th day of July, 1884, file in said Court of Claims, in the case referred to said court by the Secretary of the Navy, and then numbered on the docket of said court Department case numbered 16, their petition setting forth their losses by said collision, and whereas evidence has been taken upon said petition, both by said petitioners and by the United States, and said evidence has been filed in said court, the claim above referred to said court may be heard and determined by said court upon said petition already filed therein, and the said evidence already taken and filed by either party upon said petition may be used and referred to in said hearing and determination of said claim in all respects as if originally taken and filed for the purposes of the hearing and determination thereof provided for by this act.

The report (by Mr. MANSUR) was read, as follows:

The United States steam vessel of war Pinta, on the night of October 3, 1883, collided with and sunk the coal-brig Tally Ho, off the coast of Massachusetts. The Navy Department ordered a court of inquiry, which on investigation decided that the war vessel was at fault. Thereupon the Secretary of the Navy referred the case to the Court of Claims for investigation under the provisions of the second section of the act of March 3, 1883 (22 Stat. at Large, page 485), commonly known as the "Bowman act." Whereupon the legal owners of the said brig on the 27th of July, 1884, filed in the Court of Claims their petition setting forth the loss of said brig by said collision.

Pending a trial of the case, and after much evidence had been taken and filed in the cause, the said Court of Claims decided in another case, also pending in said court, of a collision between a United States vessel and the schooner Abbie Pitman, which case had also been referred under the "Bowman act," that collision cases could not be referred to the Court of Claims under that act, and, consequently, that the court had no jurisdiction over the case of the Abbie Pitman (20 Court of Claims Reports, page 253). This decision will necessarily require the dismissal of the claim in the case of the Tally Ho, but the bill now proposed, if it becomes a law, will enable the court to take jurisdiction of that case and proceed with the hearing and determination of the same upon its merits, in the same manner as if the reference of the case to the Court of Claims had been authorized by an act of Congress before any proceedings had been had therein in said court, and will permit the claimants to use the testimony already taken in the case.

Your committee recommend that the bill do pass.

Mr. WASHINGTON. I will not object to this bill if the gentleman from Massachusetts will consent we shall go on with the regular call and when his name is reached he will not ask to call up another bill. I am on the list myself, and as it is made up alphabetically, I am low down, and my people would like to have a chance as well as others.

Mr. ROCKWELL. I am willing to agree to that.

The CHAIRMAN. Is there objection?

Mr. KILGORE. This vessel and cargo were supposed to be worth how much?

Mr. ROCKWELL. By reference to the petition filed in the Court of Claims it appears the amount is about $15,000.

Mr. KILGORE. I understand the proposition here is to make the Government liable in damages for the negligence of its employés.

Mr. ROCKWELL. The proposition is simply to send the matter to the Court of Claims.

Mr. KILGORE. I understand the proposition here is to establish the principle that the Government of the United States is liable in damages for the negligence of its employés?

Mr. ROCKWELL. Let me answer the gentleman.

Mr. KILGORE. I can not agree to that. If any such principle were adopted it would impoverish the Government.

Mr. ROCKWELL. Let me answer.

Mr. KILGORE. I will hear the gentleman's answer, but it will have no effect, as I shall object.

Mr. ROCKWELL. As the report of the committee shows, this claim was referred to the Court of Claims. It is a case where the United States steamer ran into a coal-barge and ran it down, and never stopped to see whether anybody was injured or not.

Mr. KILGORE. They should have been tried and put in the penitentiary.

Mr. ROCKWELL. The Secretary of the Navy thought the best way for him to get rid of it was to let the matter be referred to the Court of Claims.

Mr. KILGORE. The Government of the United States should not be held responsible for the negligence of its employés.

Mr. ROCKWELL. I confess that might be a fair argument to apply to the House in discussing such a question, and I should be perfectly willing to meet the gentleman at any time upon that argument. But it ought not to be applied, and should not interfere here. It should not interfere with the passage of a bill where the Secretary of the Navy says that the officers of the Government were themselves to blame, and where the court was unable to take jurisdiction under the Bowman act.

Besides, Mr. Speaker, this is by no means a new question. There have been several precedents for it. It is not a new thing. It has been done several times before, and I can cite to the gentleman several instances where Congress has passed similar bills of relief. It is not out of the way at all. It is a bill based upon the idea that where a Government officer has been so negligent as not to respect the rights of a citizen, then Congress steps in and says that the citizen so aggrieved shall have some remedy. The gentleman will hardly deny that there should be a remedy for such wrongs. We ought to have some such relief on our coast; you ought to have it on the coast of Texas. I think, therefore, in view of the facts, that there can be no reasonable objection to this bill.

Mr. KILGORE. I want to say to the gentleman that if Congress has done this before, then Congress ought to draw the line now. If it ever did it before, it has done wrong. It ought not to have passed any such bill. And another thing I will say to the gentleman from New York——

Mr. ROCKWELL. Massachusetts, if you please.

Mr. KILGORE. Massachusetts; excuse me. [Laughter.] Congress does not derive its authority to legislate from precedents, but it derives it from the Constitution.

Mr. ROCKWELL. I am perfectly willing to concede that.

Mr. KILGORE. And precedent does not have any effect upon Congress, and ought not to have any, except possibly in determining the construction of a doubtful clause in the Constitution.

Mr. ROCKWELL. I am perfectly willing to concede all of that. Now, Mr. Speaker——

Mr. KILGORE. Now, we can shorten this, as there are other people who want to have recognition to ask unanimous consent. I am bound to kick upon this thing. [Laughter.]

The SPEAKER *pro tempore*. The gentleman from Texas objects.

Mr. ROCKWELL. I trust then, in view of the action of the gentleman, that I will not be bound by any promise I have made when my name is called on the list, if we shall proceed in that order.

Mr. LAWLER was recognized.

Mr. LANHAM. I move, Mr. Speaker——

Mr. TAULBEE. Let me interrupt the gentleman to make a request before he submits a motion, which I presume is a motion to adjourn. I wish to ask consideration of a bill carrying only $60, two months' labor, to a man employed by the Government, and who the Secretary of the Treasury said ought to have been paid, and would have been paid, but Congress failed to provide for it.

PATRICK C. M'QUEENY.

The SPEAKER *pro tempore*. The Chair had recognized the gentleman from Illinois to ask unanimous consent.

Mr. O'NEILL, of Pennsylvania. I want to ask unanimous consent too. I have some bills here involving small amounts——

Mr. LAWLER. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (H. R. 9949) for the relief of Patrick C. McQueeny.

The SPEAKER *pro tempore*. The bill will be read subject to objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Patrick C. McQueeny, late sergeant Company B, Seventeenth Regiment United States Infantry, out of any money in the Treasury not otherwise appropriated, the sum of $50, being for additional bounty due him.

There being no objection, the bill was considered, ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. LAWLER moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ENROLLED BILLS SIGNED.

Mr. KILGORE, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled a bill of the following title; when the Speaker signed the same, namely:

A bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes.

BATTELLE & EVANS.

Mr. JOSEPH D. TAYLOR. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (H. R. 506) for the relief of Battelle & Evans, and put it upon its passage.

The bill was read at length.

Mr. ROGERS. Let the report in that case be read, subject to the right of objection.

The report was read.

The SPEAKER *pro tempore*. Is there objection to the present consideration of the bill?

Mr. RICHARDSON rose.

Mr. MONTGOMERY. I object, unless there is some understanding in reference to what course is to be taken in regard to these matters.

The SPEAKER *pro tempore*. For what purpose does the gentleman from Tennessee rise?

Mr. RICHARDSON. I did not rise to object, but simply to state that I think we ought to go into Committee of the Whole and proceed in the regular order with the Private Calendar. Some of us whose names are on the list hope to be reached during the day.

The SPEAKER *pro tempore*. Does the gentleman move to go into Committee of the Whole?

Mr. RICHARDSON. I do not.

The SPEAKER *pro tempore*. It can only be done, as the gentleman is aware, by a motion.

Mr. RICHARDSON. I know.

Mr. LANHAM. Mr. Speaker, I will ask unanimous consent that when the House resolve itself into Committee of the Whole to consider business on the Private Calendar, the Nicaragua bill be laid aside, and that we may then proceed as heretofore determined upon.

Mr. KILGORE. I object.

Mr. RICHARDSON. I hope what I rose to say will not interfere with the consideration of the bill of the gentleman from Ohio which has been read.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Ohio?

Mr. JOSEPH D. TAYLOR. This bill does not take any considerable sum from the Treasury. It involves only a few hundred dollars, a small claim, going to a widow who needs the money badly.

Mr. HOOKER. I rise to a parliamentary inquiry. Is it necessary that there should be unanimous consent to go into Committee of the Whole?

The SPEAKER *pro tempore*. The Chair will state that no motion has been made to go into Committee of the Whole. The gentleman from Texas asked unanimous consent to lay aside the unfinished business in Committee of the Whole on which the point of "no quorum" was raised.

Mr. LANHAM. Because unless we can get rid of the Nicaragua bill there is no use of going into Committee of the Whole. It will confront us at once as soon as we go into committee.

The SPEAKER *pro tempore*. Is there objection to the consideration of the bill called up by the gentleman from Ohio?

Mr. MONTGOMERY. I object.

Mr. WASHINGTON. I will have to ask the gentleman from Ohio to state that when his name is called, if we go on in the regular order, he will give up his right, or else I shall be compelled to object.

Mr. JOSEPH D. TAYLOR. I desire to have my bill considered now; it will take but a moment, and I shall object to anything else.

Mr. WASHINGTON. If the gentleman will waive his right I shall not object.

Mr. MONTGOMERY. I object.

Mr. JOSEPH D. TAYLOR. I will waive the right to which the gentleman refers.

Mr. KILGORE. I do not understand the exact purpose of this bill or the amount it involves.

The SPEAKER *pro tempore*. The bill will be again read.

Mr. KILGORE. That is not the information I want. The bill does not contain any information as to the amount involved.

Mr. JOSEPH D. TAYLOR. It involves a very small amount, to pay for hide and tallow. The beef was paid for, and this is only to pay for the hide and tallow.

Mr. KILGORE. How much?

Mr. JOSEPH D. TAYLOR. I can not say. A few hundred dollars.

Mr. MONTGOMERY. I have a case here in which the beef has not been paid for yet [laughter], and shall retain my objection until there is a unanimous agreement that the members be called if we can not go into Committee of the Whole for unanimous consent for the consideration of bills.

The SPEAKER *pro tempore*. Is there objection?

Mr. KILGORE. I move that the House take a recess until 8 o'clock this evening.

The question was put, and the motion was not agreed to.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Ohio [Mr. JOSEPH D. TAYLOR]?

Mr. MONTGOMERY. There is objection.

Mr. TAULBEE. I would like to present a bill to pay a laborer $60 for work done which the Secretary of the Treasury would have paid but Congress failed to make an appropriation.

The SPEAKER *pro tempore*. The Chair will state to the gentleman from Kentucky [Mr. TAULBEE] that a gentleman on the left of the Chair has been recognized, and there being objection to the measure called up by him the Chair will be compelled to recognize another gentleman on that side, as there have been recognitions on the right of the Chair. [Cries of "Regular order!"]

Mr. TAULBEE. I appeal to gentlemen on the other side to let this bill pass, as it only involves $60. It is for work done by a laborer, and the Secretary of the Treasury had not an appropriation to pay for it.

The SPEAKER *pro tempore*. The regular order has been demanded.

Mr. TAULBEE. I ask the gentleman from Ohio to withdraw it for the purpose of considering this bill. [After a pause.] The gentleman has withdrawn the demand for the regular order.

Mr. RYAN. If the demand for the regular order be withdrawn we are entitled on this side to recognition.

Mr. ALLEN, of Mississippi. I expect we had better have the regular order.

Mr. TAULBEE. I understood the gentleman to say he withdrew it, so far as this bill was concerned.

The SPEAKER *pro tempore*. The Chair will state the condition of business. The Committee of the Whole House reported the Nicaragua Canal bill as not having been completed——

Mr. LANHAM. I move that the House do now adjourn.

Several MEMBERS. Oh, no; let us take a recess.

The question was put, and the Speaker *pro tempore* announced that the noes seemed to have it.

A division was demanded.

The House divided; and there were—ayes 19, noes 33; so the House refused to adjourn.

Mr. BACON. I now move that the House take a recess until 8 o'clock this evening.

The question was put; and the Speaker *pro tempore* announced that the ayes seemed to have it.

A division was demanded.

The House divided; and there were—ayes 42, noes 6.

Mr. WASHINGTON. No quorum.

The SPEAKER *pro tempore*. The Chair will appoint the gentleman from New York [Mr. BACON] and the gentleman from Tennessee [Mr. WASHINGTON] as tellers.

Mr. WASHINGTON (to Mr. BACON). Withdraw that motion. We are not going to sit here every Friday evening to pass pension bills and not have any of our bills passed.

Mr. RICHARDSON (pending the count). I rise to make a request. As it is evident there is no quorum here, I ask unanimous consent that the roll be called in alphabetical order for recognition in the House under the same regulations and conditions that applied to the call of the roll in Committee of the Whole on Friday, beginning where we left off on last Friday, and continuing up to the time to take a recess this evening at 5 o'clock.

The SPEAKER *pro tempore*. Is there objection?

Mr. KILGORE. I object.

Mr. RICHARDSON. I insist that under the rule a gentleman must rise to object.

Mr. KILGORE (rising). I object, Mr. Speaker.

Mr. TAULBEE. I would like now to get that little bill passed. It is only $60, and it is for a laborer.

The SPEAKER *pro tempore*. The Chair will state that that is not in order while the House is dividing.

Mr. TAULBEE. Is it in order for the gentleman from Tennessee [Mr. WASHINGTON] to withdraw the point of no quorum until this bill shall have passed? [Laughter.]

The SPEAKER *pro tempore*. The gentleman from Tennessee can withdraw the point; but if he does, the effect will be that the House will take a recess.

Mr. TAULBEE. Well, this bill is to pay a laborer for work done during the month of July. There was a law authorizing the work, but the appropriation bill when passed, after the performance of the labor, failed to make provision to pay for it. The amount is only $60. The Secretary of the Treasury has written a letter, which is incorporated in the report, saying that the only remedy is for Congress to give relief.

Several MEMBERS. Regular order.

Mr. OATES. I ask unanimous consent that I may have leave to print remarks in the RECORD on the tariff, a subject upon which I have not spoken during this session.

The SPEAKER *pro tempore*. The Chair is of the opinion that the general leave heretofore given would authorize the gentleman to print his remarks.

Mr. OATES. That order was made, I know, during the pendency of the bill, but I did not know that it was a continuing order.

The SPEAKER *pro tempore*. The Chair thinks the gentleman will be entitled to print under that order, but to save all question the Chair will put the request to the House.

Mr. OATES. Before the question is put I desire to say, because I do not want to abuse any of the privileges of the House, that what I want to print is not my own production, but is an essay, or pamphlet, written on the subject of the tariff by George W. Stone, chief-justice of the supreme court of the State of Alabama, which fully meets my approval in every respect.

Mr. DINGLEY. If we are going to permit the printing in the RECORD of essays upon the tariff, then we shall soon have a pretty large RECORD.

Mr. OATES. Well, I adopt this production.

Mr. DINGLEY. I shall have no objection if the same privilege is given for the printing of other essays on the other side, but I think we had better not enter upon that course. I am not going to make a formal objection myself, but I simply suggest that if the privilege is granted in one case, it must be granted in others, and it will probably lead to a great abuse.

Mr. BRECKINRIDGE, of Kentucky. Mr. Speaker, it may be a matter of some importance, as the question has come up, to know just what is the privilege under the order heretofore made. There was a general order made allowing the printing of speeches on the tariff, and it has been taken advantage of, I do not mean to say improperly, to print a letter of the President and also a letter of the Republican candidate for the Presidency, and a letter of Mr. McPherson, and other documents. I do not wish to be understood as criticising any gentleman who has so construed the permission and taken advantage of it to print these documents, but I think it is a matter of some importance that the House should now settle what is the privilege existing under that order.

Mr. RYAN. I have no doubt that the order is in operation and will be during the entire session.

Mr. OATES. I brought this to the attention of the House because I did not want to do anything that was not fully within the rules of the House. I will state, however, that the production which I propose to print is as much, or rather more, a legal argument than a political one.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Alabama [Mr. OATES].

Mr. O'NEILL, of Pennsylvania. Mr. Speaker, not desiring to object to the request of the gentleman from Alabama [Mr. OATES], I simply wish to say that when he took the floor I hoped, and I think members generally hoped, that he was going to bring up his resolution for the final adjournment of the House, to which I think there would be no objection. [Laughter.]

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Alabama [Mr. OATES]?

Mr. FARQUHAR. If the document that has been mentioned constitutes the "speech" which the gentleman wants to print, I object. We do not want any legal arguments on the tariff.

Mr. OATES. No; I am satisfied you do not.

Mr. FARQUHAR. Only two documents have appeared so far in the RECORD in this connection—the letter of President Cleveland and the letter of ex-Senator Harrison. Those are subject to the frank of members, but if we are to go into a matter of printing outside pamphlets we might as well print the Tariff Bulletin and the documents of the Democratic campaign committee at once.

The SPEAKER *pro tempore*. Does the gentleman object?

Mr. FARQUHAR. I do.

Mr. BRECKINRIDGE, of Kentucky. While the question is up, I think we ought to have some understanding as to whether the order of the House allowing speeches on the tariff to be printed still continues. If it does, I suppose the gentleman from Alabama [Mr. OATES] has the right to make such a speech as he pleases; and if it does not, we all ought to understand that fact.

The SPEAKER *pro tempore*. The Chair intimated awhile ago an opinion that the order did continue, but before making a formal ruling on the point the Chair would like to examine the question a little more fully, and will withhold his decision if the gentleman from Kentucky [Mr. BRECKINRIDGE] does not insist upon it now.

Mr. BRECKINRIDGE, of Kentucky. I would prefer that the Chair should take time to look into the matter.

Mr. JOSEPH D. TAYLOR. Mr. Speaker, the gentleman from Kentucky withdraws his objection to the consideration of the bill which I desired to call up awhile ago.

The SPEAKER *pro tempore*. Since the objection was made a motion to take a recess has intervened, and the House is now dividing upon that question.

Mr. JOSEPH D. TAYLOR. I ask unanimous consent that that be dispensed with, and that this bill be now considered. [Laughter.]

Mr. WASHINGTON. I withdraw the point of no quorum.

Mr. JOSEPH D. TAYLOR. I renew it.

Mr. ALLEN, of Mississippi. I move that the House adjourn.

The question was taken on the motion to adjourn, and the Speaker *pro tempore* declared that the ayes seemed to have it.

The question being taken on the motion to adjourn, it was disagreed to; there being—ayes 27, noes 34.

Mr. JOSEPH D. TAYLOR. I withdraw the point that no quorum voted.

The SPEAKER *pro tempore*. The gentleman from Ohio withdraws the point that no quorum voted. The Chair will announce the result.

Mr. OATES. What proposition is that?

The SPEAKER *pro tempore*. On the motion to take a recess.

Mr. OATES. I renew the point that no quorum voted.

The SPEAKER *pro tempore*. The point being renewed, the Chair will appoint the gentleman from Alabama [Mr. OATES] to act as a teller in conjunction with the gentleman from New York.

Mr. OATES (before the count by tellers was concluded). I call for the yeas and nays on the motion for a recess.

The SPEAKER *pro tempore*. On the motion for a recess, the tellers reported—ayes 42, noes 6. The gentleman from Alabama demands the yeas and nays.

The yeas and nays were ordered.

Mr. LANHAM. Mr. Speaker, I desire to inquire whether it is not the fact that, in the event no quorum should appear on the vote by yeas and nays, no legislative business can be done during the rest of this day.

The SPEAKER *pro tempore*. The Chair is of opinion that such would be the effect.

Mr. LANHAM. That being so, and there evidently being no quorum present, I move that the House adjourn.

The question being taken on the motion to adjourn, there were—ayes 24, noes 27.

Mr. BRECKINRIDGE, of Kentucky. I call for the yeas and nays on the motion to adjourn.

The yeas and nays were ordered.

Mr. JACKSON. I rise to a parliamentary inquiry. If the motion to adjourn should prevail, will it dispense with the session to-night for pension legislation?

The SPEAKER *pro tempore*. The Chair will state that it would have that effect.

Mr. JACKSON. Then all who vote for adjournment are in favor of dispensing with the session to-night.

The question was taken on the motion to adjourn; and it was decided in the negative—yeas 25, nays 43, not voting 256; as follows:

YEAS—25.

Allen, Miss.	Grimes,	Montgomery,	Sowden,
Anderson, Miss.	Hooker,	Neal,	Stockdale,
Breckinridge, Ky.	Hutton,	Oates,	Stone, Ky.
Clements,	Kilgore,	Peel,	Turner, Ga.
Dunn,	Lanham,	Richardson,	
Forney,	Latham,	Rogers,	
Gay,	Martin,	Sayers,	

NAYS—43.

Crain,	Hunter,	Randall,	Yardley,
Crisp,	Johnston, Ind.	Rayner,	Yoder,
Crouse,	Johnston, N. C.	Reed,	Yost.

So the House refused to adjourn.

Mr. ALLEN, of Mississippi (at the conclusion of the first roll-call). Mr. Speaker, is it in order to ask unanimous consent to dispense with the second call?

The SPEAKER *pro tempore*. The Chair thinks it would be very unusual.

The roll-call having been completed,

Mr. LANHAM. I ask unanimous consent to dispense with the reading of the names.

There being no objection, it was ordered accordingly.

Mr. LANHAM. I ask unanimous consent that the pairs be inserted in the RECORD without being read by the Clerk.

There being no objection, it was ordered accordingly.

The following-named members were paired on all political questions until further notice:

Mr. DARGAN with Mr. GROUT.

Mr. TOWNSHEND with Mr. SPOONER.

Mr. HOLMAN with Mr. JOHNSTON, of Indiana.

Mr. COBB with Mr. ANDERSON, of Kansas.

Mr. CARLTON with Mr. FUNSTON.

Mr. MCCREARY with Mr. CROUSE.

Mr. CARUTH with Mr. HUNTER.

Mr. HAYES with Mr. KERR.

Mr. BLOUNT with Mr. RUSSELL, of Connecticut.

Mr. FORAN with Mr. HIESTAND.

Mr. MAISH with Mr. LEHLBACH.

Mr. NEAL with Mr. HAYDEN.

Mr. BRICE with Mr. GAINES.

Mr. JONES with Mr. BOWDEN.

Mr. ELLIOTT with Mr. BINGHAM.

Mr. COLLINS with Mr. ALLEN, of Massachusetts.

Mr. BRECKINRIDGE, of Arkansas, with Mr. BROWNE, of Indiana.

Mr. SPRINGER with Mr. HENDERSON, of Illinois.

Mr. CAMPBELL, of Ohio, with Mr. KENNEDY.

Mr. COMPTON with Mr. GOFF.

Mr. OUTHWAITE with Mr. MCKINLEY.

Mr. HATCH with Mr. STEWART, of Vermont.

Mr. WILSON, of West Virginia, with Mr. MCCOMAS.

Mr. RANDALL with Mr. LODGE.

Mr. BLAND with Mr. BUTTERWORTH.

Mr. SCOTT with Mr. GROSVENOR.

Mr. MCMILLIN with Mr. BURROWS.

Mr. CRISP with Mr. REED.

Mr. COX with Mr. CANNON.

Mr. MATSON with Mr. HOVEY.

Mr. WILKINS with Mr. LONG.

Mr. MILLS with Mr. KELLEY.

Mr. FRENCH with Mr. STEPHENSON.

Mr. O'NEALL, of Indiana, with Mr. FINLEY.

Mr. MCCLAMMY with Mr. OSBORNE.

Mr. DAVIDSON, of Florida, with Mr. WEBER.

Mr. HENDERSON, of North Carolina, with Mr. FLOOD.

Mr. HOGG with Mr. SCULL.

Mr. ENLOE with Mr. PUGSLEY.

Mr. STEWART, of Georgia, with Mr. HARMER.

Mr. WILSON, of Minnesota, with Mr. ATKINSON.

Mr. BOOTHMAN with Mr. MCKINNEY.

Mr. CULBERSON with Mr. BAKER, of Illinois.

Mr. STONE, of Missouri, with Mr. WILLIAMS.

Mr. TAULBEE with Mr. FARQUHAR.

Mr. LAWLER with Mr. SEYMOUR.

Mr. DUNN with Mr. ROWELL.

Mr. ANDERSON, of Illinois, with Mr. DALZELL.

Mr. MACDONALD with Mr. JOHN R. BROWN.

Mr. O'NEILL, of Missouri, with Mr. CONGER.

Mr. CHIPMAN with Mr. ARNOLD.

Mr. LANDES with Mr. MCCORMICK.

Mr. VANCE with Mr. MOFFITT.

Mr. MANSUR with Mr. SAWYER.

Mr. WILKINSON with Mr. NICHOLS.

Mr. FISHER with Mr. BROWER.

Mr. ERMENTROUT with Mr. GALLINGER.

Mr. RAYNER with Mr. DE LANO.

Mr. NORWOOD with Mr. PARKER.

Mr. GLOVER with Mr. COOPER.

Mr. DIBBLE with Mr. BELDEN.

Mr. DOCKERY with Mr. WARNER.

Mr. COWLES with Mr. THOMPSON, of Ohio.

Mr. SIMMONS with Mr. BUNNELL.

Mr. NEWTON with Mr. FELTON.

Mr. GLASS with Mr. KETCHAM.

Mr. LATHAM with Mr. GEST.

Mr. SHIVELY with Mr. OWEN.

Mr. MCSHANE with Mr. LAIRD.

Mr. MAHONEY with Mr. BROWN, of Ohio.

Mr. MCADOO with Mr. BRUMM.

Mr. BACON with Mr. CASWELL.

Mr. LYNCH with Mr. YARDLEY.

Mr. WHITING, of Michigan, with Mr. HOUK.

Mr. RUSSELL, of Massachusetts, with Mr. COGSWELL.

Mr. PIDCOCK with Mr. PHELPS.

Mr. DARLINGTON with Mr. MOORE.

Mr. CUTCHEON with Mr. TARSNEY.

Mr. HOWARD with Mr. HOPKINS, of Illinois.

Mr. MORSE with Mr. WHITING, of Massachusetts.

Mr. BLANCHARD with Mr. THOMAS, of Illinois.

Mr. GRANGER with Mr. ROCKWELL.

Mr. BELMONT with Mr. DAVENPORT.

Mr. O'FERRALL with Mr. MASON.

Mr. BIGGS with Mr. MORROW.

Mr. CLARDY with Mr. WADE.

Mr. STEWART, of Texas, with Mr. DUNHAM.

Mr. FORD with Mr. GUENTHER.

Mr. SNYDER with Mr. YOST.
Mr. DAVIDSON, of Alabama, with Mr. PATTON.
Mr. RUSK with Mr. O'DONNELL.
Mr. GREENMAN with Mr. SHERMAN.
Mr. BYNUM with Mr. STEELE.
Mr. CANDLER with Mr. BREWER.
Mr. BOUTELLE with Mr. WISE.
Mr. SPINOLA with Mr. THOMAS, of Wisconsin.
Mr. TIMOTHY J. CAMPBELL with Mr. WEST.

The result of the vote was announced as above stated.

The SPEAKER *pro tempore*. The question recurs on the motion that the House take a recess until 8 o'clock, on which the yeas and nays were ordered.

Mr. NELSON. I make the point that the roll-call having disclosed the fact of no quorum, the only business in order is either a motion to adjourn or a motion for a call of the House. I submit that the motion for a recess is not now in order.

The SPEAKER *pro tempore*. The Chair was about to state the status of the business of the House. Of course the rule stated by the gentleman applies in all cases where the absence of a quorum is disclosed.

Mr. WHEELER. Mr. Speaker, three weeks ago, although a bill in which I was interested was on the very first page of the Calendar, I stood here and consented to the arrangement for a call of the roll, that members as reached might bring up their bills. The roll has now been called half through, and those members whose names have been reached are now seized with a sudden spirit of economy, and are trying to break up that arrangement. [Laughter.] I do not think it is fair. I submit we should now go on by unanimous consent, as I presume we can do, and call the roll in accordance with the agreement which was made three weeks ago.

The SPEAKER *pro tempore*. The Chair will state to the gentleman from Alabama [Mr. WHEELER] that as the record discloses the fact that no quorum is present nothing is now in order except a motion to adjourn or a motion for a call of the House—a proceeding which looks to the procurement of a quorum.

Mr. BRECKINRIDGE, of Kentucky. I move a call of the House.

Mr. ALLEN, of Mississippi. Pending that I move we adjourn.

Mr. JACKSON. I make the point of order that no business has intervened——

A MEMBER. A motion for a call of the House has been made.

The SPEAKER *pro tempore*. What is the point of the gentleman from Pennsylvania [Mr. JACKSON]?

Mr. JACKSON. I was about to make the point that no business had intervened since the vote upon the motion to adjourn, but I am now disposed to think the point would not be well taken.

The SPEAKER *pro tempore*. The Chair agrees with the gentleman. [Laughter.]

The question being taken on the motion to adjourn, it was disagreed to; there being—ayes 30, noes 32.

The SPEAKER *pro tempore*. The question recurs on the motion of the gentleman from Kentucky for a call of the House.

Mr. LANHAM. I rise to a parliamentary inquiry. The roll-call having disclosed the fact that there is no quorum present, can any other business be disposed of during this legislative day; in other words, can any business be transacted at the session of this evening?

The SPEAKER *pro tempore*. The evening session is but a continuation of the session of the day, and it has been uniformly decided, so far as the present occupant of the chair is aware—certainly it has been decided in a very large number of cases—that when the absence of a quorum has been disclosed by a yea-and-nay vote, it is not in order to entertain during the remainder of the same legislative day any other business except a motion to adjourn or a motion for a call of the House, looking to the procurement of a quorum.

Mr. LANHAM. Then I think we had better adjourn. Certainly we can do no good by meeting to-night if that is all we can do.

The SPEAKER *pro tempore*. The House has just declined to adjourn, and the motion of the gentleman from Kentucky for a call of the House is the only business that can now be transacted.

Mr. DUNN. Is it in order to move to reconsider the vote by which the House refused to adjourn?

The SPEAKER *pro tempore*. Although that motion would seem to defeat the object of the rule, the Chair is inclined to think that it would be in order, but would prefer to examine the question before deciding it.

Mr. DUNN. I am inclined to think that the House, on a reconsideration, might determine to adjourn in view of the fact that we can transact no business. I move to reconsider that vote.

Mr. RICHARDSON. And I move to lay that motion on the table.

Mr. OATES. I rise to a parliamentary inquiry.

The SPEAKER *pro tempore*. The gentleman will state it.

Mr. OATES. Is it in order to move to reconsider a motion for an adjournment? If the Chair will permit me, I think it is not; because if it was in order, that motion could be repeated indefinitely.

The SPEAKER *pro tempore*. The Chair has just stated that it would seem like a defeat of the rule itself; but will examine the precedents. [After a pause.] On an examination the Chair sustains the point of order of the gentleman from Alabama that it is not in order to reconsider a vote on adjournment, and in support of the ruling the Chair will have read from the Digest.

The Clerk read as follows:

A motion to reconsider a vote by which the House refused to adjourn is not in order.—*Journal second session, Forty-fifth Congress.*

The SPEAKER *pro tempore*. The question recurs on the motion of the gentleman from Kentucky for a call of the House.

Mr. ALLEN, of Mississippi. I move to lay that motion on the table.

Mr. LANHAM. Pending that, I move that the House do now adjourn.

The SPEAKER *pro tempore*. That motion has just been voted down.

Mr. LANHAM. But there has been some intervening business—a motion to reconsider that vote and a decision of the Chair, for instance.

The SPEAKER *pro tempore*. The Chair thinks that the gentleman may reach his object by voting down the motion for a call of the House. Besides, the Chair thinks that a ruling by the Chair on a motion not in order would not be such intervening business as comes within the meaning of the rule to permit the motion to adjourn to be repeated.

The question being taken on the motion of Mr. BRECKINRIDGE, of Kentucky, for a call of the House, it was rejected.

Mr. LANHAM. I now renew the motion that the House adjourn.

The question was taken; and on a division there were—ayes 38, noes 20.

Mr. JACKSON. Let us have the yeas and nays.

The yeas and nays were ordered, there being 12 in favor of and 39 opposed to the motion, the affirmative being more than one-fifth of the whole vote.

The question was taken; and there were—yeas 32, nays 30, not voting 262, as follows:

YEAS—32.

Allen, Miss.	Hiestand,	Montgomery,	Sayers,
Breckinridge, Ky.	Hooker,	Neal,	Sowden,
Campbell, T. J., N. Y.	Hutton,	Oates,	Stockdale,
Clements,	Kilgore,	Peel,	Stone, Ky.

So the motion was agreed to.

LEAVE OF ABSENCE.

Pending the announcement of the vote on the motion to adjourn, leave of absence was granted, by unanimous consent, as follows:

To Mr. GAY, for the remainder of the session.

To Mr. HOPKINS, of Illinois, indefinitely, on account of important business.

To Mr. TURNER, of Kansas, indefinitely, on account of political business.

To Mr. SYMES, indefinitely, on account of important business.

The result of the vote was then announced as above recorded.

And accordingly (at 3 o'clock and 50 minutes p. m.) the House adjourned until Monday at 12 o'clock.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. NELSON: A bill (H. R. 11585) to remove the charge of desertion from Thomas Calahan—to the Committee on Military Affairs.

By Mr. STONE, of Kentucky: A bill (H. R. 11586) for the relief of Stephen Williams—to the Committee on Invalid Pensions.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. CONGER: Memorial of the Grand Army of the Republic of Iowa, urging sufficient appropriations for supplying head-stones for the graves of ex-Union soldiers and sailors—to the Committee on Appropriations.

By Mr. HARMER: Petition of Charles F. Hansell, for reissue of pension—to the Committee on Invalid Pensions.

By Mr. LYMAN: Petition of the Grand Army of the Republic of Iowa, for an appropriation for head-stones for deceased Union soldiers—to the Committee on Appropriations.

By Mr. NELSON: Petition for the relief of Thomas Calahan, Company L, Fifth United States Artillery—to the Committee on Military Affairs.

By Mr. REED: Petition of 48 citizens of Saco, Me., for the relief of Miss Anna Ella Carroll—to the Committee on Invalid Pensions.

By Mr. W. L. WILSON: Petition of Jonathan J. Pettit, of Jefferson County, West Virginia, for reference of his claim to the Court of Claims—to the Committee on War Claims.

SENATE.

MONDAY, *October* 15, 1888.

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Friday last was read and approved.

SARAH A. WOODBRIDGE—VETO MESSAGE.

The PRESIDENT *pro tempore* laid before the Senate the following message from the President of the United States; which was read:

To the Senate:

I return without approval Senate bill No. 3276, entitled "An act granting restoration of pension to Sarah A. Woodbridge."

The first husband of this beneficiary, Anson L. Brewer, was an additional paymaster in the Army, and died February 2, 1866, from injuries received in an explosion of a steamer.

His widow, the beneficiary, was pensioned at the rate of $25 a month from the date of her husband's death until October 21, 1870, when she remarried, becoming the wife of Timothy Woodbridge.

Two children, who were minors at the time she was pensioned, became sixteen years of age in April, 1870, and July, 1874, respectively.

Upon the remarriage of the beneficiary her pension stopped under the law.

It is now proposed to restore her to the pension-roll, notwithstanding the fact that her second husband is still alive.

Many cases have occurred in which pensions have been awarded by special acts to the widows of soldiers who, having remarried, were a second time made widows and rendered destitute by the death of their second husbands. I have not objected to such charitable legislation.

But I think this is the first time that it has been proposed to grant a pension after such remarriage when the second husband still survives.

It seems to me that such a precedent ought not to be established. If in pension legislation we attempt to determine the cases of this description, in which the second husband can not or does not properly maintain the soldier's widow whom he has married, we shall open the door to much confusion and uncertainty as well as unjust discrimination.

I am glad to learn from a statement contained in the committee's report that this beneficiary, though in a condition making the aid of a pension very desirable, has a small income derived from property inherited from her mother.

GROVER CLEVELAND.

EXECUTIVE MANSION, *October* 12, 1888.

The PRESIDENT *pro tempore*. Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. DAVIS. I move that the bill and message be referred to the Committee on Pensions.

The motion was agreed to.

Mr. BLAIR. Would remarks on the motion to refer be in order?

The PRESIDENT *pro tempore*. The message having been referred, it can be recalled and the Senator then be recognized.

Mr. BLAIR. In connection with the reference of the veto message I wish to take the opportunity to offer a few remarks bearing upon the subject.

Mr. HOAR. Will my friend from New Hampshire allow me to put a question to the Senator from Alabama before he proceeds, which will take but one moment?

Mr. BLAIR. I will give way for that purpose.

INDEBTEDNESS OF PACIFIC RAILROADS.

Mr. HOAR. I desire, with the leave of the Senate, to call the attention of the Senator from Alabama [Mr. MORGAN] to the bill providing for funding and arranging the debt of the Union Pacific Railroad Company. That is a corporation in which, within the last four or five years, a very large number of persons in the State of Massachusetts, and among them my own immediate neighbors and friends, invested.

There was a time when a gentleman whose authority stands very high in railroad matters announced publicly that the stock of the Union Pacific Railroad Company would be a good 6 per cent. dividend, paying stock at par, and the holders of that stock who held it for speculative purposes sold an enormous amount of it, which was purchased by trustees, widows, and persons of small means, as being the only permanent investment they knew of which promised such a dividend as that. One banker in my own city is said to have placed $3,000,000 of that stock at that time among this class of persons.

Of course everybody knows that it has been for the last six weeks impossible to expect the attention of the Senate to that subject at this session; but I desire to ask the Senator from Alabama whether it might not be well to set the bill down for a hearing on the first Tuesday of the next session, or the first Wednesday. Of course it will then be in control of the committee and of the Senate, if they desire further to make any disposition of it. But I suggest whether it would not be well to get that order now.

Mr. ALLISON. I hope that no order will be made respecting any public business which will interfere with the consideration of the bill now before the Senate as the unfinished business. With that limitation, I have no objection.

Mr. HOAR. Subject, of course, to that limitation.

Mr. MORGAN. Mr. President——

The PRESIDENT *pro tempore*. The Senator from New Hampshire [Mr. BLAIR] is entitled to the floor.

Mr. MORGAN. I desire to respond to the Senator from Massachusetts.

Mr. BLAIR. I suppose briefly.

Mr. MORGAN. Yes.

Mr. BLAIR. Very well; I give way for that purpose.

Mr. MORGAN. Probably five or six weeks since, in the absence of the Senator from Maine [Mr. FRYE] who is chairman of the Select Committee on the Pacific Railways, I asked the Senator to state a time during the present session when we might proceed to consider that bill, and it was intimated privately to me that it was impossible to properly consider that bill during the present session of Congress. The importance of it has been well stated by the Senator from Massachusetts [Mr. HOAR], and it is a very urgent matter that that bill shall be considered by both Houses of Congress. A very large amount of money is at stake upon it, for which the United States is responsible and upon which it is making very large payments now every time interest on the bonds matures.

It is very fortunate, I think, that we are so near to a proper consideration of this question at least as that the committees of both Houses have unanimously agreed upon the same bill, and while there may be errors in the measure and it may be something that the Senate will debate at some little length, I conceive that we have at last fixed upon a principle by which these debts can be settled and the country be satisfied. So I shall very cheerfully indeed accord with the Senator from Massachusetts in asking the Senate to fix the first Tuesday in the December session of this body for the consideration of that bill, at the close of the morning hour.

Mr. HOAR. Subject to the tariff bill.

Mr. MORGAN. Subject, of course, as the Senator from Iowa has said, to the tariff bill, though, I suppose, we are ready to proceed with now and dispose of the tariff bill immediately. I think we are from all the indications.

Mr. HOAR. I suggest to the Chair to submit the request for unanimous consent that that order may be made.

The PRESIDENT *pro tempore*. It requires the consent of two-thirds of the Senators present. The Senator from Massachusetts asks that Senate bill 3401, known as the Union Pacific Railroad funding bill, may be made a special order for the Tuesday after the first Monday of December next, at 2 o'clock in the afternoon. Is there objection? The Chair hears none.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had, on the 10th instant, approved and signed the following acts and joint resolutions:

An act (S. 2519) to make enlisted men of the Signal Corps responsible for public property;

An act (S. 602) for the relief of James Millinger;

An act (S. 544) to authorize the construction of a highway bridge across that part of the waters of Lake Champlain which separates the islands of North Hero and South Hero, in the county of Grand Isle, in the State of Vermont;

An act (S. 2613) to amend an act approved June 15, 1882, changing the boundaries of the fourth collection district of Virginia;

An act (S. 249) to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia;

An act (S. 3168) regulating admissions to the Institution of the Association for Works of Mercy in certain cases, and for other purposes;

An act (S. 3098) concerning the settlement of the boundary lines between Connecticut and Rhode Island;

An act (S. 122) granting a pension to Samuel Lane;

An act (S. 330) granting a pension to Marion Vangordon;

An act (S. 654) granting a pension to Caroline Motz;

An act (S. 1264) granting a pension to Martha V. Coleman;

An act (S. 1766) granting a pension to Stephen Butler;

An act (S. 2321) granting a pension to John V. Hennessy;

An act (S. 2606) granting a pension to John B. Timberman;

An act (S. 3141) granting an increase of pension to Jonas Doering;

Joint resolution (S. R. 110) in aid of the sufferers from yellow fever; and

Joint resolution (S. R. 10) relating to the inclosure of certain points of especial interest on the battle-field of Gettysburgh.

MARY ANN DOUGHERTY VETO MESSAGE.

Mr. BLAIR. Mr. President, I am not familiar with the facts in the case which has been the foundation of the veto message laid before the Senate this morning, but upon the motion to refer it to the committee for further consideration I desire to offer a few observations at this time.

The President of the United States is certainly quite right in saying that it is not usual to grant a pension to the wife of a second husband, who was the widow of a soldier, during the lifetime of the second husband, but circumstances of a character which seem to make it equitable and just to grant a pension in such a case may, I think, be easily conceived. Such cases have arisen before this, and I presume that there must have been—an investigation will show how that was—circumstances in this particular case which seemed to take it out of the ordinary rule.

In connection with this general subject of the veto of private pension bills by the President, I wish to take advantage of the propriety of so doing on this occasion to offer some matter which should have been offered earlier in the session, bearing on a previous veto, still under consideration by the Senate, in the case of Mary Ann Dougherty. I submit the veto message in full in connection with what I am about to say, but I call special attention to certain remarks made by the Executive. Alluding to Mrs. Dougherty, after having stated the general grounds upon which the veto is based, the Executive proceeds to say what, it seems to me, was superfluous and unnecessary, since it can not possibly bear upon the question at issue between the United States and the applicant for a pension:

To the Senate:

I return without approval Senate bill No. 1547, entitled "An act granting a pension to Mary Ann Dougherty."

A large share of the report of the Senate committee to which this bill was referred, and which report is adopted by the committee of the House, as is usual in such cases, consists of a petition signed by Mary Ann Dougherty, addressed to the Congress, in which she states that she resides in Washington, having removed here with her husband in 1863 from New Jersey; that shortly after their arrival in this city her husband, Daniel Dougherty, returned to New Jersey and enlisted in the Thirty-fourth Regiment New Jersey Volunteers; that she obtained employment in the United States arsenal making cartridges, and that while so engaged she was injured by an explosion.

She also states that she had a young son killed by machinery in the navy-yard, and that at the grand review of the Army after the close of the war another son, six years old, was stolen by an officer of the Army, and has not been heard of since. She further says that her husband left his home in 1865 and has not been heard of since, and that she believes he deserted her on account of her infirmities.

It is alleged in the report that she received a pension as the widow of Daniel Dougherty until it was discovered that he was alive, when her name was dropped from the rolls.

The petition of this woman is indorsed by the Admiral and several other officers of the Navy and a distinguished clergyman of Washington, certifying that they know Mrs. Dougherty, and believe the facts stated to be true.

There is no pretense made now that this beneficiary is a widow, though she at one time claimed to be, and was allowed a pension on that allegation. Her present claim rests entirely upon injuries received by her when she was conceded not employed in the military service. If the pension now proposed is allowed her it will be a mere act of charity.

Her husband, Daniel Dougherty, is now living in Philadelphia, and is a pensioner in his own right for disability alleged to have been incurred while serving in the Thirty-fourth New Jersey Volunteers Of this fact this beneficiary has been repeatedly informed. And yet she states in her petition that her husband deserted her in 1865, and has not been heard of since.

It is alleged in the Pension Bureau that, in 1878, she succeeded in securing a pension as the widow of Daniel Dougherty, through fraudulent testimony and much false swearing on her part.

The police records of the precinct in which she has lived for years show that she is a woman of very bad character, and that she has been under arrest nine times for drunkenness, larceny, creating disturbance, and misdemeanors of that sort.

It happens that this claimant, by reason of her residence here, has been easily traced, and her character and untruthfulness discovered. But there is much reason to fear that this case will find its parallel in many that have reached a successful conclusion.

I can not spell out any principle upon which the bounty of the Government is bestowed through the instrumentality of the flood of private pension bills that reach me. The theory seems to have been adopted that no man who served in the Army can be the subject of death or impaired health except they are chargeable to his service. Medical theories are set at naught and the most startling relation is claimed between alleged incidents of military service and disability or death. Fatal apoplexy is admitted as the result of quite insignificant wounds, heart disease is attributed to chronic diarrhea, consumption to hernia, and suicide is traced to army service in a wonderfully devious and curious way.

Adjudications of the Pension Bureau are overruled in the most peremptory fashion by these special acts of Congress, since nearly all the beneficiaries named in these bills have unsuccessfully applied to that bureau for relief.

This course of special legislation operates very unfairly.

Those with certain influence or friends to push their claims procure pensions, and those who have neither friends nor influence must be content with their fate under general laws. It operates unfairly by increasing in numerous instances the pensions of those already on the rolls, while many other more deserving cases from the lack of fortunate advocacy are obliged to be content with the sum provided by general laws.

The apprehension may well be entertained that the freedom with which these private pension bills are passed furnishes an inducement to fraud and imposition, while it certainly teaches the vicious lesson to our people that the Treasury of the National Government invites the approach of private need.

None of us should be in the least wanting in regard for the veteran soldier, and I will yield to no man a desire to see those who defended the Government when it needed defenders liberally treated. Unfriendliness to our veterans is a charge easily and sometimes dishonestly made.

I insist that the true soldier is a good citizen, and that he will be satisfied with generous, fair, and equal consideration for those who are worthily entitled to help.

I have considered the pension-list of the Republic a roll of honor bearing names inscribed by national gratitude, and not by improvident and indiscriminate alms-giving.

I have conceived the prevention of the complete discredit which must ensue from the unreasonable, unfair, and reckless granting of pensions by special acts, to be the best service I can render our veterans.

In the discharge of what has seemed to me my duty as related to legislation and in the interest of all the veterans of the Union Army, I have attempted to stem the tide of improvident pension enactments, though I confess to a full share of responsibility for some of these laws that should not have been passed.

I am far from denying that there are cases of merit which can not be reached except by special enactment; but I do not believe there is a member of either House of Congress who will not admit that this kind of legislation has been carried too far.

I have now before me more than one hundred special pension bills which can hardly be examined within the time allowed for that purpose.

My aim has been at all times, in dealing with bills of this character, to give the applicant for a pension the benefit of any doubt that might arise and which balanced the propriety of granting a pension, if there seemed any just foundation for the application; but when it seemed entirely outside of every rule, in its nature or the proof supporting it, I have supposed I only did my duty in interposing an objection.

It seems to me that it would be well if our general pension laws should be revised with a view of meeting every meritorious case that can arise. Our experience and knowledge of any existing deficiencies ought to make the enactment of a complete pension code possible.

In the absence of such a revision, and if pensions are to be granted upon equitable grounds and without regard to general laws, the present methods would be greatly improved by the establishment of some tribunal to examine the facts in every case and determine upon the merits of the application.

GROVER CLEVELAND.

EXECUTIVE MANSION, *July* 5, 1888.

I also submit the report of the Senate committee, and of the House committee, upon the same case, together with a copy of the report of Senator Sewell in the last Congress in favor of the passage of the same bill:

[In the Senate of the United States, March 8, 1888.—Ordered to be printed.]

Mr. BLODGETT, from the Committee on Pensions, submitted the following report (to accompany bill S. 1517):

The Committee on Pensions, to whom was referred the bill (S. 1547) granting a pension to Mary Ann Dougherty, have examined the same, and adopt the report presented by the Senate in the first session of the Forty-ninth Congress, and recommend the passage of the bill. The following is the report:

The committee, having said petition under consideration, which is hereto appended and made a part of this report, and having in addition thereto examined the papers in her application for pension, are of the opinion that it is a deserving case, and one which merits the attention and aid of Congress.

The following is the petition referred to:

"*To the Senate and House of Representatives of the United States in Congress assembled:*

"As a petitioner for your favorable consideration of my claim for pension, I do most respectfully represent that I am a resident of Washington, D. C. I came here with my family in 1863 from Mount Holly, N. J., when, shortly after, my husband, Daniel Dougherty, returned thereto and enlisted in Company G, of the Thirty-fourth Regiment New Jersey Volunteers. I obtained employment in the United States arsenal making cartridges for the United States Army then in the field; that on or about the 28th day of June, 1864, while so employed and in the line of duty, as above stated, an explosion occurred, which killed and injured a number of the employés.

"Your petitioner was one of the victims. I was severely burned and internally injured, besides being mentally injured by the fall from the height to which I was thrown through the force of the explosion. My flesh was burned, as scars will show, and I inhaled the fire. My collar-bone was also broken. I was unconscious when found, and became insane from the injuries received.

"My son (the eldest), a bright boy, was killed by machinery in the United States navy-yard at Washington, where he was at the time employed, as the records of the Navy Department will show.

"At the close of the war, on the third day of the grand review of the Army, in the year 1865, my oldest surviving boy of six years was stolen by an officer of the Army and has not been heard of since.

"My husband, who served in the organization aforesaid, left his home in 1865,

and has not been heard from since. He deserted me, as I believe, on account of my infirmities.

"I have been accustomed to a comfortable home, and might have continued well and happy but for the war and its consequences. Prior thereto I was in perfect health, both mentally and physically.

"That, in view of the facts as aforesaid, she earnestly begs your consideration and prays that she may be placed upon the pension-rolls of the United States, subject to its provisions and limitations thereof.

"MARY ANN DOUGHERTY."

[Mary Ann Dougherty.—April 17, 1888.—Committed to the Committee of the Whole House and ordered to be printed.]

Mr. PIDCOCK, from the Committee on Invalid Pensions, submitted the following report, to accompany bill S. 1547:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1547) granting a pension to Mary Ann Dougherty, have had the same under consideration, and beg leave to submit the following report:

The facts in the case are substantially set forth in Mrs. Dougherty's petition, which is as follows:

"*To the Senate and House of Representatives of the United States in Congress assembled:*

"As a petitioner for your favorable consideration of my claim for pension, I do most respectfully represent that I am a resident of Washington, D. C. I came here with my family in 1863 from Mount Holly, N. J., when, shortly after, my husband, Daniel Dougherty, returned thereto and enlisted in Company G, of the Thirty-fourth Regiment New Jersey Volunteers. I obtained employment in the United States arsenal making cartridges for the United States Army then in the field; that on or about the 28th day of June, 1864, while so employed and in the line of duty, as above stated, an explosion occurred, which killed and injured a number of the employés.

"Your petitioner was one of the victims. I was severely burned and internally injured, besides being mentally injured by the fall from the height to which I was thrown through the force of the explosion. My flesh was burned, as scars will show, and I inhaled the fire. My collar bone was also broken. I was unconscious when found, and became insane from the injuries received.

"My son (the eldest), a bright boy, was killed by machinery in the United States navy-yard at Washington, where he was at the time employed, as the records of the Navy Department will show.

"At the close of the war, on the third day of the grand review of the Army, in the year 1865, my oldest surviving boy, of six, was stolen by an officer of the Army, and has not been heard of since.

"My husband, who served in the organization aforesaid, left his home in 1865 and has not been heard from since. He deserted me, as I believe, on account of my infirmities.

"I have been accustomed to a comfortable home, and might have continued well and happy but for the war and its consequences. Prior thereto I was in perfect health both mentally and physically.

"That, in view of the facts as aforesaid, she earnestly begs your consideration and prays that she may be placed upon the pension-roll of the United States, subject to its provisions and limitations thereof.

"MARY ANN DOUGHERTY.

"The undersigned respectfully represent that they are acquainted with Mary Ann Dougherty, believe the facts stated in the aforesaid petition to be true, and join her therein and ask consideration of same from your honorable body.

"DAVID D. PORTER, *Admiral.*
"MRS. GEORGE U. MORRIS.
"S. NICHOLSON,
"*Commodore, United States Navy.*
"W. A. LEONARD,
"*Rector of St. John's Parish.*
"E. C. WEAVER,
"*Late Captain United States Volunteers.*
"GEORGE W. ROUZER,
"*Correspondent Army and Navy Journal.*
"GEO. BANCROFT."

The claimant received a pension as the widow of said Daniel Dougherty, and continued to draw the same until it was discovered that the soldier was alive, when her name was dropped from the rolls. This pension was not obtained through fraud on her part.

There is no question of her abandonment by the soldier. Her injuries, as well as the afflictions under which she has passed, have completely shattered her nervous system, and for years she has been an object of charity in the city of Washington. Persons of the highest character have interceded in her behalf with your committee, and testified to her good character.

Believing that the relief asked for by this poor unfortunate woman should be granted, your committee report favorably on the accompanying bill, and ask that it do pass.

[In the Senate of the United States, July 20, 1886.—Ordered to be printed.]

Mr. SEWELL, from the Committee on Pensions, submitted the following report, to accompany petition and bill S. 2868:

The Committee on Pensions, to whom was referred the petition of Mary Ann Dougherty, asking for a pension, have examined the same, and report as follows:

The committee having said petition under consideration, which is hereto appended and made a part of this report, and having in addition thereto examined the papers in her application for pension, are of the opinion that it is a deserving case, and one which merits the attention and aid of Congress.

The following is the petition referred to:

"*To the Senate and House of Representatives of the United States in Congress assembled:*

"As a petitioner for your favorable consideration of my claim for pension, I do most respectfully represent that I am a resident of Washington, D. C. I came here with my family in 1863 from Mount Holly, N. J., when, shortly after, my husband, Daniel Dougherty, returned thereto and enlisted in Company G of the Thirty-fourth Regiment New Jersey Volunteers. I obtained employment in the United States arsenal making cartridges for the United States Army then in the field; that on or about the 28th day of June, 1864, while so employed and in the line of duty as above stated, an explosion occurred which killed and injured a number of the employés.

"Your petitioner was one of the victims. I was severely burned and internally injured besides being mentally injured by the fall from the height to which I was thrown through the force of the explosion. My flesh was burned, as scars will show, and I inhaled the fire. My collar bone was also broken. I was unconscious when found and became insane from the injuries received.

"My son (the eldest), a bright boy, was killed by machinery in the United States navy-yard at Washington, where he was at the time employed, as the records of the Navy Department will show.

"At the close of the war, on the third day of the grand review of the Army, in the year 1865, my oldest surviving boy, of six years, was stolen by an officer of the Army, and has not been heard of since.

"My husband, who served in the organization aforesaid, left his home in 1865 and has not been heard from since. He deserted me, as I believe, on account of my infirmities.

"I have been accustomed to a comfortable home and might have continued well and happy but for the war and its consequences. Prior thereto I was in perfect health both mentally and physically.

"That, in view of the facts as aforesaid, she earnestly begs your consideration and prays that she may be placed upon the pension-rolls of the United States, subject to its provisions and limitations thereof.

"MARY ANN DOUGHERTY.

"The undersigned respectfully represent that they are acquainted with Mary Ann Dougherty, believe the facts stated in the aforesaid petition to be true, and join her therein and ask consideration of same from your honorable body.

"DAVID D. PORTER, *Admiral.*
"MRS. GEORGE U. MORRIS,
"S. NICHOLSON,
"*Commodore, United States Navy.*
"W. A. LEONARD,
"*Rector of St. John's Parish.*
"E. C. WEAVER,
"*Late Captain, United States Volunteers.*
"GEORGE W. ROUZER,
"*Correspondent Army and Navy Journal.*
"GEO. BANCROFT."

The committee find that claimant made application for pension as the widow of Daniel Dougherty, and in 1878 received certificate for same; that shortly thereafter evidence was discovered showing that the husband was not dead, and had made a claim (No. 302,398) for a pension. The name of the claimant was thereupon dropped from the pension-rolls of the Department.

Since that period she has been trying ineffectually to obtain relief. But very poor, and suffering at times from absolute want, ignorant of the proper method of procedure, her bones broken and her system completely shattered by the explosion at the United States arsenal, wherein she was serving the Government, and in the line of duty when it occurred; her eldest son killed while working in the navy-yard; and insane for four years from the injuries received, and the afflictions under which she had passed, as set forth in detail in the foregoing petition, and her mind affected more or less from that time to the present, she has been unable of her own motion to get her case in shape to present to Congress for assistance. Kind friends have done this for her, and the names of Admiral Porter, Commodore Nicholson, Hon. George Bancroft, Rev. W. A. Leonard, and others to her petition are sufficient by their high character, to certify to her integrity and the merits of her claim.

The committee therefore report the accompanying bill, placing her name on the pension-roll at — dollars a month, and earnestly recommend its passage.

I do not care on this occasion to go particularly into the discussion of the general subject of the veto of special pension acts. That has been pretty thoroughly discussed already. It has been made apparent to the country that they are of comparatively trifling importance; that the entire amount saved annually by the vetoes of the Executive in those cases is hardly more than $50,000 a year. It has also, I think, been shown in a great many instances, and I have charged that in all cases where the vetoes were upon the merits and I charge it now upon the floor of the Senate, they have each and all been unjust. I say it has been shown in a very large number of them affirmatively that the action of the Executive has been unwise, ill-considered, ill-informed, and exceedingly and unnecessarily severe in its operation upon these applicants—severe not only in the deprivation of pension which they should receive, but in the defamation of character which has attended them as individuals and has been heaped unsparingly upon the soldiery of the country at large.

Mrs. Dougherty came to me, as she came to the members of the committee, with reference to the slanders and libels contained in the veto message upon her personal character. The chairman of the committee [Mr. DAVIS] some time since introduced and laid before the Senate the evidence then existing as to the character of this woman and the justice of her claim. He was called to another part of the country by reason of illness, if I recollect aright, in his family connections, and left a request that I should follow the matter up a little further, or as much further as I should be able to do, in the way of the collection of such evidence as might be brought to me bearing upon the charges of the Executive, these unnecessary and irrelevant charges of the Executive, even if they were true.

I have done so not to the extent that I see, from what I learn, the inquiry might be well and more successfully pursued, but as far as I could. Most of the work has been done by Mrs. Dougherty herself, who has evidently suffered mentally under these charges as acutely as could any woman in the land.

I believe from my investigation and knowledge of the matter that the charges were entirely unjust. I believe this poor woman to possess an excellent personal character, and that she has always possessed an excellent personal character; that she has been wrongfully and ruthlessly and wickedly assailed. However, the Executive may have been himself misled; there has been that carelessness and indifference in dealing with the reputation of this woman which deserves reparation, to say the least.

I ought in this connection to say further that at a time subsequent to the original discussion the Senator from Missouri on my left [Mr. COCKRELL] rose in the Senate and with great vigor charged that the allegations of fact upon which the favorable reports of the House and Senate committees had been based were untrue; that this woman's case was substantially and really a fraud from beginning to end; and he dared the further investigation of the claim. Therefore, although it would have been well for the Senator to have adduced his proof as well as to have made his charge, as the woman had been already assailed, it is doubly proper that I should lay before the Senate such matter as has come to my possession and leave the Senate and the country to judge between these parties, the assailant and the defendant.

If in this work I seem a little tedious to the Senator, who is smiling,

let me assure him that neither he nor the Senate has dealt with a more important matter at this session or is likely to do so. To my mind, the question of doing rank and infernal injustice to this woman is as serious as the question of the tariff, or the re-election of the President for another term, or the election of any other candidate to occupy that same high office; and I think that the Senator will be willing to give his attention without his sneers to what I have to offer. If not, I shall seriously misconceive the pleasure of the American people if they do not yield a more reasonable consideration to this matter than those who have made these charges.

I will first read what I believe was already put before the Senate on a former occasion, the original petition sent by several distinguished citizens of this country. It is as follows:

To the Senate and House of Representatives of the United States in Congress assembled:

As a petitioner for your favorable consideration of my claim for pension, I do most respectfully represent that I am a resident of Washington, D. C. I came here with my family in 1863 from Mount Holly, N. J., when, shortly after, my husband, Daniel Dougherty, returned thereto and enlisted in Company G, of the Thirty-Fourth Regiment New Jersey Volunteers. I obtained employment in the United States arsenal making cartridges for the United States Army then in the field; that on or about the 28th day of June, 1864, while so employed and in the line of duty, as above stated, an explosion occurred, which killed and injured a number of employés.

Your petitioner was one of the victims. I was severely burned and internally injured, besides being mentally injured by the fall from the height to which I was thrown through the force of the explosion. My flesh was burned, as scars will show, and I inhaled the fire. My collar bone was also broken. I was unconscious when found and became insane from the injuries received.

My son (the eldest), a bright boy, was killed by machinery in the United States navy-yard at Washington, where he was at the time employed, as the records of the Navy Department will show.

At the close of the war, on the third day of the grand review of the Army, in the year 1865, my oldest surviving boy of six years was stolen by an officer of the Army and has not been heard of since.

My husband, who served in the organization aforesaid, left his home in 1865 and has not been heard from since. He deserted me, as I believe, on account of my infirmities.

I have been accustomed to a comfortable home, and might have continued well and happy but for the war and its consequences. Prior thereto I was in perfect health, both mentally and physically.

That, in view of the facts as aforesaid, she earnestly begs your consideration and prays that she may be placed upon the pension-rolls of the United States, subject to its provisions and limitations thereof.

MARY ANN DOUGHERTY.

The undersigned respectfully represent that they are acquainted with Mary Ann Dougherty, believe the facts stated in the aforesaid petition to be true, and join her therein and ask consideration of same from your honorable body.

DAVID D. PORTER, *Admiral.*
MRS. GEORGE U. MORRIS.
S. NICHOLSON,
Commodore United States Navy.
W. A. LEONARD,
Rector of St. John's Parish.
E. C. WEAVER,
Late Captain United States Volunteers.
GEORGE W. ROUZER,
Correspondent Army and Navy Journal.
GEO. BANCROFT.

This is a paper that has been filed in the Pension Office. The George Bancroft referred to here was supposed at first to have been the historian. It is another gentleman of the same name, who is well known to citizens of the city of Washington. He is a man of high character and is concerned in the musical service of several of the churches here, and has been well known for many years.

In this connection I read the following certificate, and I invite the fullest investigation of the genuineness of these signatures, about which something was heard on former occasions:

WASHINGTON ARSENAL, *Washington, D. C., March* 9, 1880.

To all whom it may concern:

We, the undersigned, hereby certify that Mary A. Dougherty was employed at this arsenal and that while at her work on the second day of July, 1864, was severely burned by an explosion of powder. At said explosion several were killed.

JOHN MURPHY,
First-class Private of Ordnance.
F. WHYTE,
Captain, United States Army.
R. B. CLARK.
JOSEPH CAMPBELL,
Acting Sergeant Ordnance Department.
JAMES HARTWELL,
Sergeant of Ordnance.
GEO. W. McKEE,
Captain and Brevet Major, Commanding.

It will be observed that the date of this is in the year 1880, sixteen years after the occurrence. The genuineness of these signatures, I see, has been called in question in the public prints. I noticed some time since in the Philadelphia Times an assertion that these ordnance officers, at least Major McKee and Sergeant Campbell, repudiate the genuineness of their signatures. That was the substance of the statement made in the paper, but it is evidently merely a mistake on their part if they have done so. It will be observed that the certificate was made some sixteen years after the occurrence, and some of the details may have passed their mind since the year 1880, when it was made. I have had this paper examined at the Ordnance Department, or, at least, the signature of Major McKee especially, the one to which my attention was particularly called, and I have received the following certificate:

ORDNANCE OFFICE, WAR DEPARTMENT,
Washington, D. C., August 7, 1888.

SIR: I have the honor to acknowledge receipt of your letter of this date, inclosing a certificate, dated Washington Arsenal, D. C., March 9, 1880, signed by "George W. McKee, captain and brevet major, commanding," and five others, to the effect that Mary A. Dougherty was employed at said arsenal and while at work was severely burned by an explosion, etc., and requesting from me a certificate by myself or officers who may be able to recognize the handwriting of the signers, as to the genuineness of the signatures.

In reply I beg to say that I am familiar with Major McKee's signature, and have compared this with his signature on official papers in this office, and believe that his signature to the paper of Mary A. Dougherty is genuine. In regard to the other signatures on said paper I can not certify.

Respectfully, your obedient servant,

S. V. BENÉT,
Brigadier-General, Chief of Ordnance.

Hon. HENRY W. BLAIR,
Acting Chairman Committee on Pensions, United States Senate.

Others who are acquainted with several of the prominent signatures have assured me that they are genuine. There is not the slightest reason on the face of the earth to cast any suspicion on the genuineness of any of these signatures. If there is lack of recollection upon the part of any of them at the present time, it is easily to be accounted for by the lapse of seven or eight years or more since the certificate was given.

I caused a letter to be written to Major McKee who is at the Allegheny arsenal, at Pittsburgh. The letter was written by Mrs. Dougherty at my request, and this answer was received:

ALLEGHENY ARSENAL, *Pittsburgh, Pa., August* 23, 1888.

MADAM: I am in receipt of your letter asking if I could not refresh my memory with regard to the employés injured at the Washington arsenal explosion in 1864. Such a long time has elapsed it would be impossible for me to do so. I am sorry I can not assist you, if you are justly entitled to a pension, but the facts are as I have stated above.

Very respectfully,

GEO. W. McKEE.

Mrs. MARY ANN DOUGHERTY,
Washington, D. C.

This is an unquestionably genuine signature. The Senator from Missouri can compare it with that on the certificate and see that they are evidently the same signature.

I have here an affidavit by Mr. John Jordan, who is a resident of this city:

DISTRICT OF COLUMBIA, *City of Washington:*

Before me, S. A. Terry, a notary public in and for the District aforesaid, personally appeared John Jordan, who being duly sworn, deposes and says as follows: I am thirty years of age, and have known Mrs. Mary Ann Dougherty for over twenty-five years. The first I remember of her was when she was boarding at Mr. Jonabal's. I remember distinctly after that time that she was working at the arsenal, and was working there at the time of the explosion. I remember hearing my mother talk years ago of Mrs. Dougherty being hurt at the time of the explosion. I, however, did not see her wounds at the time, and can not say from personal knowledge that she was wounded there. I fully recollect that she was working there at the time and always understood she was injured by said explosion.

JOHN JORDAN.

Subscribed and sworn to before me this 3d day of September, A. D. 1888.
[SEAL.] S. A. TERRY, *Notary Public.*

I next read a certificate by Mr. H. B. Moulton of this city, well known to many as being a citizen of this city who takes a lead and often is before the committees of Congress in reference to prohibitory legislation for the District. He is a prominent gentleman, well known to thousands throughout the country. He says:

WASHINGTON CITY, D. C., *July* 26, 1888.

MY DEAR SIR: At the request of Mrs. Mary Ann Dougherty, I hereby certify that in the year A. D. 1864, I was the foreman of the laboratory in the United States arsenal, located in this city, and among the employés of that department of work was one Mrs. Mary Ann Dougherty; that in the month of June of that year an explosion occurred in which over twenty ladies were killed, and many others injured, and among the injured was Mrs. Mary Ann Dougherty.

Very respectfully,

H. B. MOULTON.

Hon. H. W. BLAIR,
United States Senate.

Subscribed and sworn to before me this 26th day of July, A. D. 1888.
[SEAL.] S. A. TERRY, *Notary Public.*

I will say that I have mislaid a more extended affidavit of Mr. Moulton, in which he goes on to say that he has frequently met this lady since that time. He was himself injured in the explosion. He met her soon after the explosion, when she had got out and he himself was about, and they talked over the subject between them, and from time to time since then he has met her and the subject of her injury has been frequently alluded to. He identifies her person fully as that of the woman who was injured in the explosion, and whom he has known ever since, and at whose request and in whose presence he made these statements. I have also the following:

WASHINGTON, D. C., *July* 11, 1888.

To whom it may concern:

It affords me pleasure to recommend the bearer, Mary Ann Dougherty, to the charitably disposed as worthy, meritorious, and of good moral character. Any courtesy extended to her will be appreciated and worthily bestowed.

Very respectfully,

GEO. BANCROFT, 611 *P street, northwest.*

I have another statement from him. Mr. Bancroft has been engaged and I think is now engaged as a claim agent in the prosecution of claims of this and perhaps of other kinds against the Government. He is a man whom I have seen personally several times, and he appears to be a very respectable gentleman, as I stated before. He says that for many years he has known this woman; that she has been in reduced circumstances; that he has had occasion from time to time to assist her with charity; and that he believes her to be a thoroughly worthy, upright woman, not an intemperate woman and not guilty of any immoralities.

I may say in passing that there appears to have been a little confusion

as to the dates when the explosion took place. I have been informed that there were two explosions at nearly the same time. I have not authenticated that statement, but think that it may have been true. I will read in connection with this remark a certificate made by the clerk of the Committee on Pensions, who at my request made some inquiries:

This is to certify that I have examined the files of the Evening Star, published at Washington, D. C., in reference to its report of the explosion which occurred at the United States arsenal at Washington, D. C., on the 17th of June, 1864.

In said report it is stated that two of the witnesses before the coroner's inquest, namely, Thomas B. Brown, superintendent of the building where the said accident occurred, and his assistant, Andrew Cox, both testified that all the books and rolls containing the names of the persons employed in said building were burned.

J. B. POTTER,
Clerk Committee on Pensions, United States Senate.

JULY 27, 1888.

The explosion in which Mrs. Dougherty was injured has been stated in one paper to be on or about July 2, and in another June 28. I think there must have been either more than one explosion or a failure in memory in fixing the date. It will be observed, too, that the records of the arsenal in one of these explosions were shown to be lost, by the matter taken from the Evening Star, and a statement which I have from one witness who was blown up with the rest was to the effect that the records of the arsenal at the time of the injury to Mrs. Dougherty were also destroyed, but the witness, Mr. Moulton, kept the roll. He had charge of the roll itself and knew positively in reference to the name of this particular, identical Mary Ann Dougherty being borne upon that roll, and being injured in the explosion. I have the following affidavit:

DISTRICT OF COLUMBIA, *ss:*

I, Elizabeth McConnell, being duly sworn in due form of law, deposes and says that she is a resident of this District, and has resided here for about forty years; that she is well acquainted with Mrs. Mary Ann Dougherty, and has known her since long before the explosion in the arsenal in 1864. That Mrs. Dougherty was injured in said explosion, and I have known her ever since said explosion; my brother, Sergeant Campbell, lived in the arsenal, and I visited said grounds frequently. That Mrs. Dougherty now present is the identical person who was injured in said explosion.

MRS. ELIZABETH McCONNELL.

Subscribed and sworn to before me this 20th day of September, A. D. 1888.
[SEAL.] S. A. TERRY, *Notary Public.*

It has been denied in the public prints, whether by Sergeant Campbell himself on account of lapse of memory I can not say, that the certificate signed by Major McKee and Sergeant Campbell was a genuine certificate. Here is the sister of Sergeant Campbell himself who signed that certificate and the sergeant who was employed in the arsenal at that very time when the explosion took place, who says she visited the arsenal often where her brother was, and swears positively to the identity of this very Mrs. Dougherty who was present when this affidavit was given, and which was brought to me. Here, I say, is the sister of the same Sergeant Campbell who establishes the essential facts which are controverted by the Senator from Missouri in his defiance to the committee and to all mankind to show that this case was otherwise than an absolute fraud upon the facts. I am glad to see that these papers now attract the attention of the Senator from Missouri, because I do not think that he would defame a woman unnecessarily even by telling the truth without an apology.

I will read the following:

GENERAL AFFIDAVIT.

DISTRICT OF COLUMBIA, *County of Washington, ss:*

In the matter of claim for pension and vindication of the character of Mary Ann Dougherty, pending before Congress.

On this 27th day of August, A. D. 1888, personally appeared before me, a notary public in and for the aforesaid county, duly authorized to administer oaths, James W. Rock, aged 39 years, whose post-office address is 819 Sixth street southwest, Washington, county of Washington and District of Columbia, well known to me to be reputable and entitled to credit, and who, being duly sworn, declares in relation to aforesaid case as follows:

On the 28th day of June, 1864, he was an employé of the Government and at work in the arsenal at the time of the explosion on that day. He remembers Mary Ann Dougherty, who was therein employed making cartridges, and recollects distinctly that she was severely injured in the accident and while in the discharge of her duties: that for some time thereafter she was confined to her house and bed under medical treatment therefor and to deponent's knowledge has never fully recovered therefrom; that she lost a son in the Government service, who was killed at the navy-yard in this city; that she is in reduced circumstances, an invalid, deserving, and merits the consideration of your honorable body. He further declares that he has no interest in said case and is not concerned in its prosecution.

JAS. W. ROCK.

CHAS. W. DARR.

DISTRICT OF COLUMBIA, *County of Washington, ss:*

Sworn to and subscribed before me this day by the above-named affiant, and I certify that I read said affidavit to said affiant, including the words erased and the words added and acquainted him with its contents before he executed the same. I further certify that I am in no wise interested in said case nor am I concerned in its prosecution, and that said affiant is personally known to me and that he is a creditable person.

[SEAL.] CHAS. W. DARR, *Notary Public.*

I call the attention of the Senate to this item of evidence bearing upon the very bitter assertion of the Senator from Missouri the other day, that this woman did not have any son blown up or killed in the navy-yard; that that claim was a fraud designed, as I suppose he would say, to excite the sympathy of the soft-hearted, and perhaps soft-headed, committees of Congress on the subject of pensions. But here is the evidence bearing upon that point, and perhaps there is more.

I will say, in passing, in reference to this matter of the boy being killed at the navy-yard, who at the time was the only support of this woman, who had several children and was herself already disabled, as previously stated, by a prior explosion, that a lady of the highest respectability in this city who was befriending Mrs. Dougherty went to the navy-yard, and she has informed me that she found the utmost difficulty in receiving even the ordinary courtesies to anybody from the officers there, and came away with the impression that the officers were exceedingly reluctant that information should be derived from any official source bearing in favor of this Mrs. Dougherty and against the declarations made by the Executive in regard to her. All the way through it has come to me from those who have been making these investigations, two persons or more, that like interference from some source has resulted in reluctance in giving the testimony which otherwise might be much more full and complete, the expression being used that the Dougherty case had become a political issue.

I will read a little fuller statement in the form of a letter. I am sorry I mislaid the affidavit, which was the same in substance, but a little more full:

WASHINGTON CITY, D. C., *July* 31, 1888.

Hon. H. W. BLAIR, *United States Senator:*

In answer to your letter of inquiry of the 27th instant I would say that the Mary Ann Dougherty who called upon me a few days ago in regard to the veto of her pension claim, and to whom I gave the statement addressed to you, is the identical woman who was in the year A. D. 1864 employed in the United States arsenal in this city. I knew her then, and remember her distinctly now, having frequently seen her and spoken with her from year to year since the explosion, in which I have always understood she was injured. I have been a resident of Washington since that time. When the explosion occurred I was clerk in the building in which it took place, and was myself severely injured. After my recovery I was made foreman. As clerk I kept the list of the employés, and there was no other person of that name employed there. Her husband was or had been, as I understood, in the Army.

Very respectfully,

H. B. MOULTON.

I have here something bearing upon this Mr. Moulton:

[Duplicate.]

WASHINGTON CITY, D. C., *July* 26, 1888.

MY DEAR SIR: At the request of Mrs. Mary Ann Dougherty I hereby certify that in the year A. D. 1864 I was the foreman of the laboratory in the United States arsenal located in this city, and that among the employés of that department of work was one Mrs. Mary Ann Dougherty; that in the month of June of that year an explosion occurred in which over twenty ladies were killed and many others injured, and among the injured was Mrs. Mary Ann Dougherty.

Very respectfully,

H. B. MOULTON.

Hon. H. W. BLAIR, *United States Senate.*

WASHINGTON, D. C., 604 B STREET, S. W., *July* 26, 1888.

I certify that H. B. Moulton was employed as foreman in the laboratory at Washington arsenal at the time he states. At that time and during the war I was employed as chief clerk at the arsenal, and was personally acquainted with Mr. Moulton.

The paymaster at that time was Military Storekeeper E. N. Stebbins, and his vouchers ought to be on file in the Second Auditor's office of the Treasury Department.

I am seventy-three years of age and am blind, and consequently unable to recognize Mrs. Dougherty.

F. WHYTE,
Captain United States Army, retired.

I have already made observation with reference to the vouchers. I understand that there has been search in the Treasury Department or Navy Department or somewhere where they ought to be, and I have been told that these vouchers were not found; but it appears altogether probable that in the explosions, as shown to have been the case in one instance, vouchers and papers were destroyed, which accounts for many of the mistakes about this case.

I have here a letter from a witness who sends a certificate:

WASHINGTON, D. C., *August* 27, 1888.

This is to certify that Mrs. May M. Doherty was a fellow employé at the time of the explosion at the arsenal, June 28, 1864, and was severely injured by said explosion.

She is a deserving woman and in reduced circumstances, being a widow. She has lost her son in the Government service, having been killed at the navy-yard in this city.

JAS. W. ROCK,
819 *Sixth street, southwest., city.*

The probability is that the common reports of the death of the husband leads this gentleman into a mistake as to his survivorship in some distant part of the country drawing the pension this woman ought to have if justice was done between the two parties. I have here a statement of facts drawn by Mrs. Dougherty, or by some one in her behalf, which is signed by James Mulloy, who certifies these facts are true. He is, or has recently been, in the employment of the police department of this city.

DISTRICT OF COLUMBIA, *City of Washington, ss:*

The affidavit was drawn and informally executed, and I will read it as it is:

DISTRICT OF COLUMBIA, *City of Washington, ss:*

Personally came before me, a notary public in and for the aforesaid city and District, ——— ———, aged — years, a citizen of the city of Washington, District of Columbia, reputable and entitled to credit, and who, being duly sworn, declares as follows:

That he became acquainted with Mrs. Mary Ann Dougherty in the year of 1863, and lived a near neighbor to her, and knows that she was employed in the United States arsenal in 1864, and knows that at the time of the explosion in June, 1864,

she was so engaged, and was one of the victims of said explosion. He further declares that he can well remember that after the explosion her son, a bright, intelligent youth, was given employment in the navy-yard, and that he was accidentally killed, while in the discharge of his duty, in the year of 1865; and further, that he has personal knowledge of the fact that at the time of the three days' review in May, 1865, she had a little son who disappeared, and to the best of his knowledge and belief, has not been heard—

So that she lost two of her sons in the way described—

from since. All that is herein stated is given from memory, of all the facts and circumstances; and he further declares that he has known the Mary A. Dougherty ever since, and can positively identify her as the same that was blown up in the arsenal, and suffered as herein stated. I have no personal interest in this matter, but give this testimony as an act of justice, and I am willing to be interrogated by any one whom this may concern.

Sworn to and subscribed to before me on this — day of August, 1888.

This is, as I said before, drawn by some one who knew the facts, and this man could state them with the expectation that his statement would be sworn to. It failed to be formally executed. I have here in his handwriting, the same as his signature, the following:

I hereby certify that the bearer, Mrs. Mary A. Dougherty—I have known her since 1863, and believe what she sets forth in the within to be true, and that she is truthful and honest, so far as I know.

Yours, respectfully,

JAS. MULLOY.

I will read a letter from Mr. Bancroft:

WASHINGTON, D. C., *July* 26, 1888.

DEAR SIR: Considerable controversy seems to be afloat regarding an act recently passed for the relief of one Mary Ann Dougherty, vetoed by the President, to whose petition therefor my name was signed, and not that of Hon. George Bancroft, the historian. Believing then, as I do now, that for her troubles and the injuries she had received while in the employ of the Government, I signed said petition after observing the names of the distinguished gentlemen that preceded mine, without ever thinking the act would be attributed to another. I am still of the opinion the case is meritorious, and instead of meeting with the vituperation of the Executive deserves the consideration of your honorable body.

Very respectfully,

GEO. BANCROFT.

Hon. C. K. DAVIS,
United States Senator.

Mr. Bancroft informs me that in the preparation of this case, the collecting of these papers, he was connected with the transaction before the Department, and since that Mrs. Dougherty herself or friends outside of his office have been the active parties, but he has known her and collected the correspondence with the office.

I have here a letter which I will read from Mrs. Kate Marr, 1827 Ninth street, in this city:

Mrs. WEAVER:

Mrs. Mary Ann Dougherty has been here; she is very sick and will go to the hospital for a few days. She wishes me to ask you if you will not go at once to the man whom you could not see on account of his being sick, the one who saw her boy killed. Get his affidavit and take it to Senator BLAIR by 2 or anyhow 3 p. m. to-day. She was due at the Capitol to-day but is not able to go. If more affidavits are necessary, she can obtain one from a Mrs. Moddus with whom she boarded when she worked at the arsenal, and she will be grateful for the kindness.

MRS. KATE MARR, 1827 *Ninth street.*

This is addressed to Mrs. Weaver, who is at the head of the Woman's Christian Temperance organization in this city, and was interested in this case, who, among others, made inquiries at the navy-yard. Here is a letter addressed by Mrs. Marr to myself:

TUESDAY.

SIR: Mrs. Mary Ann Dougherty, whom you have so kindly befriended in her efforts for relief, sent word to me this morning begging that I would write, stating that she was ill and not able to see you. I advised her to go to the hospital for a few days, as I found her afterwards in a very bad condition. The poor creature was a servant in my employ at one time, and I have always felt the greatest interest in her and sympathy for her; indeed, going far enough to find excuses for her failing that always seems to me more the lingering evidence of insanity than a nearer cause. I do sincerely hope that her matter will right itself, and feel encouraged.

Very respectfully,

MRS. KATE THYSON MARR,
1827 *Ninth street northwest.*

Senator BLAIR.

I do not know what the failing here referred to is. I know that it has been said to me that Mrs. Dougherty's mind was so affected by her sufferings at the time of the explosion and since that there are recurring periods when she manifests some mental aberration.

I will now read a certificate by quite a number of residents of the city who have known her:

We, the undersigned friends and old neighbors of Mrs. Mary A. Dougherty, hereby testify to her good moral character from a knowledge of her for many years.

The police officer has written this addition to his former certificate in his own hand:

From all I know of Mrs. M. A. Dougherty I believe to be a woman of good moral character.

JAMES MULLOY.
JOSEPH WILLIAMS, 2130 *Seventh Street Road.*
JAMES A. FULTON, *Seventh street Road.*
ROBERT CONDON, *Seventh Street Road.*
J. H. DAHL, *Seventh Street Road.*
JACOB MADERT, 1822 *Seventh street.*
THOMAS B. TURNER, 1702 *Seventh street.*
M. T. BRIDWELL, 363 *M street, S. W.*
JOHN F. QUIGLEY, 1102 *Seventh street, S. W.*

Then further:

I have known Mrs. Mary A. Dougherty for more than fifteen years, and have known her in connection with her pension claim. She has always been a truthful, honorable woman, and what I learned of her in the beginning has been reiterated ever since, and corroborated by others. I have always known her as feeble in body and mind, and from what I have learned is certainly the result of an injury received as claimed. Anything Mrs. Dougherty would tell me I would not dare to doubt.

LAVINIA C. DUNDORE,
717 *M street, N. W.*

I think that is the name—a good handwriting anyway.

I concur.

E. S. MORSE, 717 *M street, N. W.*
MRS. MARY GOCKLER, 721 *M street.*
MISS MARY STEWART, 1503 *Fifth street, N. W.*
MR. M. G. FOX, 1137 *Seventh street, N. W.*
M. FOLEY, 811 *Seventh street, N. W.*
W. K. MARTIN, 321 *I street, S. E.*
C. B. DOWDEN, 928 *Seventh, N. W.*

I will say here in passing that Mrs. Dougherty came to me a few days ago and informed me that Mrs. Logan, the widow of General Logan, would come to the Capitol and give me a statement or certificate in reference to the good character and good name of Mrs. Dougherty. It was a very stormy day and Mrs. Logan, as I understand, must have left the city the day following the one I was to have seen her, in order, as I learn from the public prints, to leave the country on a visit to Europe. I do not know anything further in regard to it. I know Mrs. Dougherty came to me feeling very much rejoiced that she would be able to bring to me, before it was necessary to present this to the Senate, a statement from Mrs. Logan. Mrs. Dougherty informed me that on a former occasion General Logan had acted very kindly to her in many ways, and I have come to believe pretty much what Mrs. Dougherty tells me without anybody back of her. I will read another affidavit:

DISTRICT OF COLUMBIA, *Washington City, ss:*

Statement made this the 14th day of August, 1888, by Martha A. Martin, residence No. 321 I street, northeast, Washington, D. C., in the pension claim of Mary Ann Dougherty, now pending in the United States Senate and which was recently vetoed by the President of the United States.

Have known Mrs. Dougherty since 1867. My husband kept a drug store and Mrs. Dougherty came there to get medicine. I heard it said at that time, when I first knew her, that she was one of the victims of the arsenal explosion, which occurred at the Washington arsenal in June, 1864. I have seen the scars upon her person which Mrs. Dougherty says are the result of said explosion. I was acquainted with several other persons who were in said explosion and they have told me that Mrs. Dougherty was injured in said explosion. Mrs. Dougherty commenced work for me in 1877 and remained with me for two years, and since that time she has visited me often, and I have gladly afforded her food and shelter when she was out of work and had nowhere else to go. I was keeping the O-street eating-house for the market people during the time that Mrs. Dougherty worked for me.

My son was nine years in the Navy as druggist, and was three years on the Wyandotte receiving-ship at the Washington navy-yard. I have heard him frequently speak of the accident at the navy-yard which resulted in the death of the son of Mrs. Dougherty, and have heard other persons speak of said accident, and have no doubt of the fact.

Mrs. Wells, whose husband was a surgeon in the Navy, and was stationed at the Washington navy-yard, has said to me that Mrs. Dougherty's son was killed there. Surgeon Wells and his wife are now both dead. I also knew George Sylvester, M. D., who was the physician who attended Mrs. Dougherty; and he came to my husband's drug store for medicine, and I have heard him speak of the said accident when Mrs. Dougherty received her injury. I believe that Mrs. Dougherty is a virtuous and respectable woman. I know nothing to the contrary. She is a poor, unfortunate person, and justly merits the charitable consideration of Congress.

MARTHA A. MARTIN.

Subscribed and sworn to before me this 14th day of August, A. D. 1888.
[SEAL.] R. B. NIXON, *Notary Public.*

WASHINGTON, D. C., *September* 11, 1888.

Hon. Senator BLAIR:

SIR—

This is a statement drawn up by Mrs. Dougherty. It is not in her hand-writing, but I have also her statement in her own handwriting. The people who have drawn these papers are lacking in clerical skill somewhat. I read oftentimes more than one document at the expense of a little repetition; but I do not feel any apprehension that the facts will be too definitely understood if I repeat.

WASHINGTON, D. C., *September* 11, 1888.

Hon. Senator BLAIR:

SIR: May I be permitted to approach you upon the subject of my unfortunate claim for a pension, which I might have obtained without the vilification that has been heaped upon me by the President's veto (had I been in a sane condition).

I beg to impress upon your mind that I am no common character. I was born in the county of Limerick, Ireland, on the 25th day of March, 1840, and was sent to the United States by my honored parents, for a twofold purpose, *i. e.*, that of an improvement in my health, and finish my education; my destination was Mount Holly Seminary, Mount Holly, N. J., where I remained until in the year 1853, when without the sanction of my parents I married my husband, Daniel Dougherty, the ceremony having been consummated at St. Mary's Roman Catholic Church.

I will say before proceeding further with this letter that Mrs. Dougherty, as I am informed by herself, is the daughter of a prominent physician in the old country. She came here, as she states, for the completion of her education, and for the benefit of her health, in her younger days. That she has had an unfortunate life, it is not necessary to observe, but she uses in the first part of this letter the expression that she is no common character, and I think the woman is a woman of as bright original promise as the average of women in this country.

At the breaking out of the war I was living in affluence, the fact of which I can produce evidence. Reverses came, and we came to Washington, and my husband enlisted in a regiment of New Jersey volunteers. Now, I had six children, four boys and two girls, all depending for support. Necessity forced it, and I sought and obtained a situation in the United States arsenal. I worked there for some months, when, about the latter part of the month of June, 1864, there was an explosion occurred, in which I was severely injured, receiving a

fracture of my skull, a broken collar-bone, and a severe burning to my flesh. The explosion herein alluded to can not be forgotten, as there is a monument erected in Congressional Cemetery to the memory of the unfortunate ladies torn to pieces at the time of my injury.

Sympathy for me led to the appointment of my eldest son to a situation in the navy-yard, where, in the line of duty, in the spring of 1865 he was accidentally killed by machinery.

My husband returned from the war a wreck of his former self, and we were living near the boundary in May, 1865, during the "Grand Army review." My second surviving son, a bright boy of six years, was kidnapped by some one, supposed to be an officer in General Thomas's corps, and though efforts were made, and the President, Andrew Johnson, offered a reward, I have never heard of him since.

As to my character, the President of the United States, I had thought, should be the last man to assail it, as I have had no personal knowledge of him, prior to the time when I went into the White House, holding in my hand a horse-shoe, and the President's first remark was, "What have you in your hand?" "A horse-shoe," I exclaimed, for "luck, nothing more," and then the President said to me, "I will remember your case and act consistently."

Now my character has been impeached as a ground for the veto. I was arrested, as all are liable to, but the records of the courts must show that I have been exonerated, and I am at a loss to know why I was not investigated before the veto of the President.

There are others whom I know could give positive evidence to the facts of my misfortunes, but they have personal considerations, as they hold office and fear—their names are sacred.

I wish to wrong no one, and even would help an enemy in distress, but at the same time I will protect and defend my family name, which is beyond reproach.

Very respectfully,

MRS. MARY ANN DOUGHERTY.

Hon. Senator BLAIR:

This matter has been condensed. We could say more if the situation demands it.

M. A. D.

As I said, this statement is not in her handwriting, but I have a statement in her handwriting. Some friends seem to have assisted in putting it as they thought in a more legible hand, I suppose.

In this connection I will read her own communication to me. This was drawn with the idea on her part in one or two places that there should be the insertion of some of the documents that I have been reading, but I will pursue the reading as it is.

MARY ANN DOUGHERTY.

I was born on the 25th of March, 1840, in the County Limerick, Ireland, and was brought to this country at an early age for the benefit of my health and to finish my education. I was put in Mount Holly (N. J.) seminary, and was married from that place in 1853, in St. Mary's Church, to Daniel Dougherty, and when I left there to come to Washington I had a family of six—four boys and two girls. When about three months in this city my husband enlisted in the New Jersey volunteers, and I heard nothing from him until after my injuries in the arsenal.

As I have just mentioned, I had obtained employment in the United States Government arsenal, through Colonel Benton, then in charge, and was there about three months when the explosion occurred, and I was so injured by this explosion as to be unable to work, and my son was put to work in the United States navy-yard to keep my family from starving. He was there but a short time when he was killed by an accident, and then, at the close of the war—the third day of the grand review—my second surviving son was taken by an officer of General Thomas's regiment by force, and I have never seen him since.

As for being such a character as represented by the President, I can say that I was arrested but once with any charge against me, that of beating a police officer with his own club while he was misusing his wife, and two others—which were dismissed—for selling liquor to soldiers of the Army during the war.

Which means these two other charges of selling liquor which she explains further on, and it seems she was dismissed without blame.

After getting better, before I was able to work, I went back to the arsenal where I worked about a year when the work was about finished. At the second time I went to the arsenal Major White was paymaster, and my name should be on the pay-roll at that time.

All these misfortunes were such that I was mentally prostrated and I was put in St. Elizabeth's.

I will call the attention of the Senator from Missouri to the fact that it appears this woman was before the explosion and has been up to her partial recovery employed, and for a while afterwards.

Mr. COCKRELL. About a year?

Mr. BLAIR. Yes.

I went back to the arsenal, where I worked about a year.

I suppose there was work done in that arsenal after the books were destroyed, and probably she did some of it. She says she did.

All these misfortunes were such that I was mentally prostrated, and I was put in St. Elizabeth's Insane Asylum and staid but a few weeks, when I was put in Providence Hospital, and from there I went to my home, which was being taken care of by my brother.

When able to work I went to the family of Dr. Harword, now in Philadelphia, and have been working in the families of several prominent people, well known here, and who will vouch for what I say here.

Perhaps the Senator can hunt that up. She says here that her name should be on the pay roll, but I will suggest to the Senator that he will find that probably one-half the miscellaneous pay-rolls used in the Army during the war have been destroyed, and I am informed that to a very large extent the pay-rolls, papers, and vouchers which had become useless by reason of the lapse of time have been destroyed in these very Departments.

[Here comes the application for a pension.] I have been from then until now trying to get a pension, and I am almost worn to death looking for evidence for my benefit.

I most earnestly hope and pray that I may succeed to it now, for I fear this will set me crazy again—the libeling of an honest woman by a man who has no business to say such things.

Yours, very respectfully,

MARY ANN DOUGHERTY.

I have another paper drawn by her in which she goes over the same ground.

MARY ANN DOUGHERTY—HER ARRESTS AND THE CAUSES.

I do as you bid me in writing out the statement of my arrests and the reasons therefor—

Before I forget it, as there is a good deal in this matter, I want to say that the police records have been very carefully examined all through every book, with the assistance of the clerk, by Mrs. Charlotte Smith quite recently, for I did not know that she knew anything about this case until I obtained this evidence, and she informs me that in going through this very large number of volumes of records down to the present time there is a variety of names very similar to that of this Mrs. Dougherty, and that serious charges are made against many of them and for aught I know they were proved, but this identical Mrs. Mary Ann Dougherty that we are trying to get a pension for seems to have carried all the way through an entirely innocent and unquestionable reputation—arrested, as she says, but exonerated in every instance; the first time for assisting to prevent a brutal and drunken police officer from killing his wife, and in the other two instances she now gives an account:

I do as you bid me in writing out the statement of my arrests and the reasons therefor. You know already the assault on the officer (for beating his wife) with his own club, in which case I was acquitted. This was the first.

When my husband left for the war I had no means of support, and my children had to be fed and my rent paid; so, as I saw others doing, I bought a half gallon of liquor, which was hardly in the house and before I had sold a drop, when an officer came in and took it from me, and I had to go with him and take my little children with me, as there was no one in the house to care for them. In the morning the case was dismissed, and when I returned to my home I found it had been robbed, as I had left no one in charge. (The police could watch where the liquor went but could not protect a person's property.)

After this, I applied to Colonel Benton, and through his kindness I succeeded in getting work in the United States arsenal. About a month after getting my situation, one evening a soldier came to my door and asked for a glass, which I gave him, thinking he wanted to get a drink at the pump opposite. He then took from his pocket a flask and then treated a companion, which was witnessed by an officer, who arrested them and me, and again I was obliged to stay all night with my little ones in a cell. In the morning the soldier swore I had sold him no liquor, and this case was dismissed.

In the next case I was employed at the Deaf and Dumb Institute and had come into town to make some purchases, and then went to a store to pay a bill, and when I left I forgot an umbrella (which belonged to my employer, Mr. Ballard) and the goods I had bought. I returned for them and was told that I had left nothing there; and when I attempted to remonstrate with the storekeeper he beckoned for a police officer, who arrested me under the impression that I was another person well known to the police; and this time also I was dismissed. (I have never seen the goods nor umbrella from that time since.)

This is the substance of my crimes (?).

You have asked me about my children. One boy is buried in Mount Olivet Cemetery, one in Mount Holly, N. J., and my son Johnny, who was killed in the navy-yard—I don't know where he is buried. I have one son now with my brother in the State of New Jersey, and my husband stole two from me while I was on a visit with him in Philadelphia, and I have never since seen them.

I have been to the reform school, and Mrs. Shallenberger says she will get a letter from the priest and send it to you, but I will go out Sunday again to make sure of it and bring it to you.

I have been unable to write before, as I have the rheumatism in my arm and fingers.

I hope this is satisfactory, and that you can make use of it.

Yours, most truly,

MARY ANN DOUGHERTY.

And inclosed is this:

I have heard no more about my husband and children until I received the dispatches of the death of my husband (whether he intended to get rid of me or not), and since then I have been trying to get enough to find my two children, but I am getting worse off, and now the President has fixed me altogether and I will have to wait till I get my money before I can look for them.

Mrs. Weaver, the lady I have referred to as prominent in the Woman's Christian Union of this city, gives me this statement:

WASHINGTON, D. C., *July* 7, 1888.

To whom it may concern:

This is to certify that I have known Mrs. Mary Ann Dougherty several years. Has been a servant in my family, and I believe her to be strictly honest and virtuous. She is industrious, and I believe the stories lately circulated to be without foundation. She has had a great deal of trouble, and has been more sinned against than sinning.

MRS. M. A. WEAVER.

Again:

WASHINGTON, *April*, 1888.

This is to certify that Mrs. Dougherty has lived with me for some time, until illness compelled her to leave, and we found her capable and honest. I sincerely hope she will find a home among good people.

ELIZABETH SHALLENBERGER.

I have here written on a piece of paper which relates to something connected with the case, dated December 24, 1879, something in regard to an application for employment on the back of it. It seems that as long ago as that she was making very consistent statements in regard to the loss of her children in seeking employment; but I read this particularly as a certificate from a clergyman who may be known in the city:

WASHINGTON, D. C., *July* 8, 1888.

This is to certify that Mrs, Mary Ann Dougherty was employed as a servant in our family four years ago and served in that capacity several months. We found her industrious and faithful in her duties.

MELVILLE BALLARD.

I have known Mrs. Dougherty for some time past, and believe that she is deserving and can be trusted.

JOHN VAUGHAN LEWIS.

ST. JOHN'S CHURCH, *December* 24, 1879.

The pastor of St. John's Church in this city at that time. As it appeared from these papers that Mrs. Dougherty is a Catholic, I insisted that she should bring me some testimony from the clergy of her own denomination, for I suppose everybody understands that no Catholic clergyman will give his certificate or his indorsement from personal

knowledge or from investigation in a case of this kind unless he knows he is right; and she has brought me the following:

GONZAGA COLLEGE, *Washington, D. C., July* 11, 1888.

From the many references shown me by Mrs. Mary Ann Dougherty, I should judge her to be a person of a trustworthy character and capable of performing whatever she undertakes in her line of usefulness.

P. J. O'CONNELL, S. J.

Another pastor of hers to whom she has ordinarily confessed she told me, and who has known her longer and known her better, sends me the following from the same college:

WASHINGTON, D. C., *September* 16, 1888.

To whom it may concern:

Mrs. Mary Ann Dougherty, whose case can not fail to arouse the sympathy of every one who hears it, has been spoken well of to me by truthful persons who have known her for years and who have employed her. I think the aid she asks from Government is fairly and justly due her.

E. A. McGURK, S. J.,
Pastor St. Aloysius.

Mr. President, I have read these items of evidence at length because I think they ought to go upon the records of this country along with the veto which assailed this woman. I think that it can hardly be claimed that this woman is not vindicated. That the assault upon her reputation grows out of no primary malevolence towards her it would be entirely unfair to claim; but the thing has happened that this woman has been injured, she has been deprived of her pension when in a reasonable discretion she ought to have had it. Beyond that, she has been deprived of her character that has stood well in this community evidently for a quarter of a century, and I submit that it calls upon all those who have been instrumental in doing this injury that they make reparation. I trust the Executive will do so in as public a manner as he attacked her by a communication to both Houses of Congress to place upon the eternal files of this Government forever as an antidote to the injury which has been perpetrated by the veto, an injury to reputation as well as a deprivation of an all-important pecuniary right which this woman was entitled to in the judgment of the Congress of the United States.

I might in this connection make some other remarks bearing upon the general topic of these vetoes, but I wish this matter to be considered without politics and apart from politics. It is a personal affair which ordinarily could be adjusted in the courts, but which could not in this case be adjusted in the courts. It is a matter that appeals to everything just and natural in the most ordinary human nature, and that there may be no excuse for the reiteration of these charges or efforts of ingenuity and investigation in some way to impeach or weaken the force of this irrefragable testimony as to this particular woman, no effort to conceal the force of the testimony and to do this woman the justice that evidently upon the basis of these facts belongs to her, and that there may be no excuse to mix this case up with the politics of the country, I will forbear upon this occasion the general remarks which at some time I shall be glad to offer to the Senate.

Mr. COCKRELL. Mr. President, the President of the United States, as a matter of course, in vetoing this bill had no personal feeling in the matter, and could not have been actuated by any personal ill will. He vetoed it because he believed it was right to do so and because he believed that it was a fraud.

Some time ago the Senator from Minnesota [Mr. DAVIS] made an onslaught upon the President on this very case, and it was then that I challenged the Committee on Pensions to bring in a report in favor of passing this bill over the President's veto, and to-day that challenge stands unanswered.

Now, in order to avoid that the Senator from New Hampshire has come in here with a volume of hearsay testimony. He quotes what two of the ministers of the Catholic Church say, and comments upon it by asserting that they are always very careful in such matters. That is true, and now in each one of these certificates they do not speak upon any personal knowledge, and they so state.

Mr. BLAIR. To what does the Senator refer?

Mr. COCKRELL. To those two letters the Senator read from Catholic clergymen.

Mr. BLAIR. But the facts are sworn to by witnesses who assert facts positively.

Mr. COCKRELL. I am talking about the two Catholic priests whose letters the Senator read. Here is one:

GONZAGA COLLEGE, *Washington, D. C., July* 11, 1888.

From the many references shown me by Mrs. Mary Ann Dougherty I should judge her to be a person of a trustworthy character and capable of performing whatever she undertakes in her line of usefulness.

P. J. O'CONNELL, S. J.

He does not know a thing about it; but she has gone there and spread a parcel of names before him, and to get rid of her he gives that kind of a certificate.

Mr. BLAIR. Will the Senator assent to an interruption?

Mr. COCKRELL. Certainly.

Mr. BLAIR. Let me say to the Senator that this woman tells me as to the certificate of the priest last read that he has very frequently been her confessor, and the other priest knows her well. It is not to be expected that these priests have employed this woman in their families or can give certificates as to her character from that process of association as the other parties did; and the Senator knows, as we all know, that no Catholic priest would ever seemingly indorse any bad woman.

Mr. COCKRELL. There is no seeming indorsement about it at all. He just says she has presented good names and good testimonials, and ought to be a good woman. The statement of the other priest is to the same effect. All this is mere trash, the veriest bosh, the veriest secondary and hearsay testimony ever submitted.

Now, mark the point. This woman in her long and diffusive letters to the Senator states that she was employed in the arsenal several months before the explosion in which she was injured, but she recovered; and she was employed in there again for a year. That settles this case. If she was in that arsenal, her name is upon the records and pay-rolls; and the attempt to make the impression that those records were destroyed is entirely wiped out by the fact she alleges that she was there a year afterwards.

Mr. BLAIR. Will the Senator allow me to interrupt him?

Mr. COCKRELL. Certainly.

Mr. BLAIR. There is nothing but the naked, bare assertion of the Senator from Missouri to show that her name is not upon the record.

Mr. COCKRELL. Well, I am not through yet; wait——

Mr. BLAIR. Except the fact that the records were burned up.

Mr. COCKRELL. That is just what I wanted the Senator to state. I have some papers that I will read in a few minutes, and they will show where her name is.

Mr. SPOONER. Will the Senator allow me to ask him a question?

Mr. COCKRELL. Certainly.

Mr. SPOONER. I do not remember the details or the facts bearing upon this case, but I would like to ask the Senator what there is in the case bearing on this woman's right to a pension which involves her character. If she was not employed there, if she was not entitled to a pension for that reason, in what way did it become either necessary or proper by way of veto to impeach her character and place upon the record these charges against her moral character?

Mr. COCKRELL. She based her claim to a pension upon the ground that she was a Government employé in the arsenal and was injured in that explosion.

Mr. SPOONER. Very well.

Mr. COCKRELL. Now I will show that that is false.

Mr. SPOONER. Very well.

Mr. COCKRELL. And a fraud, and that all the rest of her conduct is in accordance with that fraud.

Mr. SPOONER. There comes the point of my question. Concede it to be false, and that for that reason the woman was not entitled to a pension, the point as I understand it made by the Senator from New Hampshire is that the veto should have proceeded upon that ground without any slander or impeachment of the woman and her antecedent and moral character.

Mr. COCKRELL. There is no slander of the women, not a particle. The President did not tell half the truth about her character.

Mr. BLAIR. He did not tell any of it.

Mr. COCKRELL. He told only a part, and not half the truth about her.

Mr. BLAIR. He did not tell any of the truth about her.

Mr. COCKRELL. He stated only a part, and every word he said was the truth—every solitary word. There never was such an effort made on the face of the green earth to bolster up a fraud as this is.

Now, I speak plainly. The Senator from New Hampshire has nailed the point. He tried to make the impression that the arsenal records were destroyed in the explosion, but now Mrs. Dougherty comes in and says she was there twelve months after the explosion. Mark that point. She now says she had a son killed afterwards in the navy-yard. She can tell where all the other sons who are dead are buried, but unfortunately the grave of that son can not be found. She does not know where he was buried. How did it happen that she knows so well where the others were buried and not that son? I say the son was never killed there. I reiterate and repeat everything I said with redoubled emphasis when I challenged the Senate Committee on Pensions to bring in the evidence. I have got this case narrowed down to the exact point.

The name "George Bancroft" signed to her affidavit is not the name of the distinguished historian, but he is a claim agent, a pension agent, a pension shark.

Mr. BLAIR. I assert he is as honest a man as either of us.

Mr. COCKRELL. All right; I have his record right here. I hold in my hands a report of the Committee on Expenditures in the Interior Department accompanied by the testimony—House report 189, Forty-fifth Congress, third session, the investigation of the frauds that were attempted upon the soldiers of this country by a pack of claim agents very soon after the arrears of pension bill was passed. Here is a circular that was issued and sent to every soldier in the country whose name and address could be found. This circular is on pages 8 and 9; I will not read it all.

To the pensioners of the country:

The undersigned pensioners of Washington, D. C., having been more thoroughly identified with the prosecution of the arrears of pension bill than any others resident here, desire to present you notice of the fact that Capt. R. A. Dimmick, of this city, who came here three years ago for the sole purpose of securing the passage of this measure, the credit is entirely due for management

and organization in pressing the matter upon the attention of Congress and in educating the public, the press, State Legislatures, and other bodies; and while others who have no claim to credit are now seeking to create an impression that they have been first and foremost in this work, it is our duty to recognize Captain Dimmick not only as the prosecutor of this measure, but as the one without whose effort the measure would never have been pressed upon Congress. He put in the first petition from New York, and has been the means of having nearly every petition and every letter sent to Congress the past three years, and his work has covered from Maine to California. He has placed before the country over one hundred thousand pamphlets, petitions, and documents, and his compilation of statistical information, embracing the most unanswerable arguments, being the result of much study and work, has been the main means of enlightening the public and Congress as to the justice and merits of the claim. Senators, Representatives, and other officials here frequently call for these pamphlets.

He has done an immense work against heavy opposition and discouraging circumstances in various ways, and has frequently been obliged to assume necessary obligations, being at present indebted to the extent of $152, which we trust pensioners will not only relieve him of, but come forward and show in a generous manner their appreciation of his work; for not a pensioner in the land to-day would be entitled to receive the benefit of this law had it not been for his labors. Our assertions are fully corroborated by the attorneys of this city. As we have sought an act of justice and obtained it through the especial instrumentality of Captain D——, let us now perform an act of justice toward him in appreciation of the effort, knowing, as we do, that he has never received any compensation for the labors of the past three years. Let it not be said that pensioners were ungrateful to one to whom they owe so much, and a debt which can never be paid. We have started the movement here towards a generous testimonial by those pensioners whose homes will now be made more comfortable and happier, and not only appeal to you to return the inclosed subscription blank filled out in accordance with your appreciation of the benefits you will receive, but induce all others interested, who have the spirit of manhood and generosity, to do likewise.

Your fellow-pensioners,

J. C. S. BURGER, *War Department.*
H. H. BROWER, *Interior Department.*
W. L. TREMBLY, *War Department.*

On the back of this circular is the following:

"CERTIFICATION.

"WASHINGTON, D. C., *January* 27, 1879.

"As a matter of justice I desire to state that three years ago this month Capt. R. A. Dimmick came direct from New York to my house, and remained with me for some time, and that on his arrival he announced his intention, that he had come on for the express and sole purpose of prosecuting the arrears-of-pension bill before Congress; that he has worked unremittingly on behalf of this measure until the present, often engaged until midnight and often from midnight until morning. I do not hesitate to state that the pensioners, as well as many others of this city, know that Captain Dimmick has done an immense work with but small means, and with difficulty securing help to assist him here, even from those interested, the large majority of whom have never lent even a helping hand. I am free to say that, from the knowledge I have of the prosecution, there is not a pensioner in the land who will reap the benefit of this law but owes to Captain Dimmick, especially, a great debt of gratitude; for without his constant efforts and organization and direction of the prosecution, it is well known that not a pensioner would ever have received his just dues from the Government.

"GEO. BANCROFT."

The undersigned, pension attorneys, of Washington, D. C., desire to state that to Capt. R. A. Dimmick, of this city, is entirely due the management and direction of the prosecution of the arrears of pension bill which has become a law, and to him especially every pensioner is indebted for the success which has crowned his efforts.

T. W. TALLMADGE.
L. LOWE.
GEO. BANCROFT & CO.
L. BINGHAM & CO.
McNEILL & BIRCH.
WILLIAM CONARD & CO.
R. W. WALKER.
E. P. HALSTEAD.
R. S. & A. P. LACY.
L. H. BURSLEY.

And that circular was sent out under the name of George Bancroft, and thousands probably thought it was Hon. George Bancroft, the patriot and historian. This is the man who has been engaged in that kind of business, sending out circulars to pensioners, inviting them to make subscriptions to be paid to a fellow claim agent. So much for George Bancroft.

Now, we come down to Mary Ann Dougherty and her work in the arsenal. She was there two or three months before the explosion, and she was there a year afterwards, she says.

Mr. BLAIR. Will the Senator have the whole of that document printed?

Mr. COCKRELL. Not the whole of the document, only those two letters.

Mr. BLAIR. The Senator said he was not reading it all.

Mr. COCKRELL. The Reporter will print the whole of it. We have now got the whole case in a nut-shell. She was there in the explosion; she was blown up; and she afterwards got well and went back to work at the arsenal over a year, so she alleges. Then her son went to the navy-yard after she was blown up, and was killed there. There certainly ought to be a record of his employment. This is the first time that I have ever been able to get the date of his employment there.

Now we come to Mary Ann Dougherty. Rolls are kept and are in the Auditor's Office to-day which show who was there, who was drawing money. Not only that, but Congress passed a law appropriating $2,000 for the benefit of the persons who were injured by the arsenal explosion, and that money was paid and receipts taken from every one who was injured. I say that if Moulton and these other humanitarians who are manifesting so much sympathy for this poor woman permitted that $2,000 to be paid out without her getting any of it they were frauds, too. What were they doing that they did not see that Mary Ann Dougherty got her share of that $2,000? It was appropriated by Congress after the explosion, and a record was kept of those who received any part of it, of those who were injured. Now I will read:

ORDNANCE OFFICE, WAR DEPARTMENT,
Washington, D. C., July 19, 1888.

SIR: I have the honor to return letter from Senator COCKRELL, asking for information in regard to Mary Ann Dougherty, whose pension bill (S. 1547) was vetoed by the President July 5, 1888, and to report:

In the petition herewith embodied in the Senate report accompanying Senate bill 1547, Mary Ann Dougherty states:

* * * * * * *

"I obtained employment in the United States arsenal, making cartridges for the United States Army then in the field; that on or about the 28th day of June, 1864, while so employed and in the line of duty, as above stated, an explosion occurred, which killed and injured a number of the employés.

"Your petitioner was one of the victims. I was severely burned and internally injured, besides being mentally injured, by the fall from the height to which I was thrown through the force of the explosion. My flesh was burned, as scars will show, and I inhaled the fire. My collar bone was also broken. I was unconscious when found, and became insane from the injuries received."

* * * * * * *

The records of this office have been carefully examined. It is true that on the 17th of June, 1864 (not the 28th June, as stated in the memorial) an explosion occurred at the Washington arsenal in this city (now the Washington barracks) by which twenty-one employés were killed and many were wounded.

A close examination of the monthly pay-rolls of the arsenal from October, 1863, to December, 1864, nine months before and six months after the date of explosion, fails to show the name of Mary Ann Dougherty on the rolls as an employé.

On July 4, 1864, the President approved joint resolution appropriating $2,000 for the relief of the sufferers by a late accident at the United States arsenal in Washington, D. C., to be distributed to the persons injured by the explosion. The commanding officer of the arsenal made the distribution.

The commanding officer of the arsenal made the distribution, and this was after the explosion. The law was not passed until the 4th of July. The explosion occurred on the 17th of June, consequently it must have been nearly a month after the explosion before this money was paid out.

The commanding officer of the arsenal made the distribution. His accounts, now on file in the Second Auditor's office, have been carefully examined, and the name of Mary Ann Dougherty does not appear among the one hundred and twenty persons relieved by the distribution of the money.

There is nothing to be found in the records to show that Mary Ann Dougherty was then employed or was injured at the arsenal, as claimed by her in the inclosed memorial.

Very respectfully, your obedient servant,

S. V. BENÉT,
Brig. Gen., Chief of Ordnance.

Hon. SECRETARY OF WAR.

Mr. President, these are indisputable facts. They will overcome all the hearsay that can be piled up by these pitiful solicitations of Mary Ann Dougherty to kindly disposed people in this city. There is nothing in it. She never was employed in the arsenal, and her son never was, so far as I have been able to ascertain, killed at the navy-yard.

I have a letter of the Secretary of War, but I will not consume the time in reading it, which simply states that he transmits the letter of the Chief of Ordnance, which I have read.

I have also a letter here from the Secretary of the Navy in regard to this boy being killed, which is as follows:

NAVY DEPARTMENT, *Washington, July* 21, 1888.

SIR: I have the honor to acknowledge the receipt of your letter of the 17th instant in reference to the pension bill of Mrs. Mary Ann Dougherty, vetoed by the President, and asking to have a thorough search made, and advise you "whether any son of Mrs. Dougherty was employed in the navy-yard, and, if so, when and for what time and his full name, and whether any one of that name was ever killed in the navy-yard by machinery or otherwise, and, if so, when and where and under what circumstances, etc., and give me (you) any further information in regard to the subject-matter."

So far as can be judged from the petition to Congress of Mary Ann Dougherty, a copy of which you furnished for my information, her son, if she had one so employed in the navy-yard, was so employed at some time in the years 1863, 1864, or 1865. The name of her son is not stated, and as, during the war, there was a very large number of employés at the navy-yard, it would be almost impossible without better information to ascertain whether she had a son among the number.

The commandant of the navy-yard was directed to inquire and report whether the records of the yard showed that a lad by the name of Dougherty was killed by machinery in the yard at any time between 1863 and 1866, or whether any one employed in the navy-yard had knowledge of such a circumstance. I inclose herewith, for your information, a copy of the report of Captain Meade, commandant of the yard, and copies of the several papers which accompanied it. These do not sustain the statement that a boy by the name of Dougherty lost his life at the navy-yard.

If, however, Mrs. Dougherty will furnish the Department with the name of her son, and state as well as she can recollect at what time he was employed, and when and the circumstances under which he was killed in the navy-yard, further examination and inquiry will be directed to be made.

Very respectfully,

W. C. WHITNEY,
Secretary of the Navy.

Hon. F. M. COCKRELL,
United States Senate.

Here is a letter of Captain Meade:

UNITED STATES NAVY-YARD, WASHINGTON,
Commandant's Office, July 20, 1888.

SIR: The records of this yard seem to be very imperfect between the years 1860 and 1867; but from all I can gather, no such person as Dougherty was "killed by machinery" during the time specified in your telegram of the 19th instant. No one here has any recollection of such accident between 1863 and 1866.

I inclose all the letters on the subject except the surgeon's. He says there is no record in his office of such an occurrence.

Very respectfully,

R. W. MEADE,
Captain United States Navy, Commandant.

Hon. SECRETARY OF THE NAVY,
Navy Department.

This is from A. G. Kellogg, commander, United States Navy:

EQUIPMENT OFFICE, NAVY-YARD, *Washington, July* 20, 1888.

SIR: Referring to the telegram dated the 19th instant, from the honorable Secretary of the Navy, making inquiry as to a boy named Dougherty, said to have been killed by machinery in this yard some time between 1863 and 1866, I respectfully state that there is no record of such an occurrence in this Department; neither have I been able to learn of any upon inquiry among the old employés, one of whom was Mr. James Wilson, who at that time was foreman of the anchor shop.

Very respectfully,

A. G. KELLOGG,
Commander, United States Navy, Equipment Officer.

Capt. R. W. MEADE, U. S. N.,
Commandant.

Here is another from Commander McCormick:

ORDNANCE OFFICE, UNITED STATES NAVY-YARD,
Washington, D. C., July 20, 1888.

SIR: Referring to your indorsement of yesterday on the Department's telegram, regarding an accident to a boy named Dougherty, I beg leave to inform you that no mention is made in the records of this Department of any such accident, and persons employed here during the period named have no recollection of it.

I am, sir, your obedient servant,

A. H. MCCORMICK,
Commander United States Navy, Inspector of Ordnance.

Capt. R. W. MEADE, U. S. N.,
Commandant Navy-Yard, Washington, D. C.

Another letter from William H. Butler:

CHIEF ENGINEER'S OFFICE, UNITED STATES NAVY-YARD,
Washington, July 20, 1888.

I remember a man by the name of "Noble" fell while rigging a smoke-stack of ordnance foundry in this yard about thirty years ago, and he died soon after the fall and before he was removed from the yard. I was well acquainted with him and worked with him frequently. I never heard of him as Dougherty, and I do not remember of a man by the name of Dougherty being killed in the navy-yard about that time.

WILLIAM H. (his x mark) BUTLER.

Witness of signature:
GEO. F. WATERS.

Here is one from Christopher Lewis:

CHIEF ENGINEER'S OFFICE, UNITED STATES NAVY-YARD,
Washington, July 20, 1888.

I came to work in the navy-yard in the year 1854. I remember hearing of a man having been killed by falling from the ordnance smoke-stack about a year before I came to work in the yard as an employé.

I was driving for a man by the name of Riley in 1853, and my work brought me in the yard frequently, and I was shown where the man fell soon after the occurrence. I was told at that time that the man who was killed was named Noble Dougherty.

CHRISTOPHER (his x mark) LEWIS.

Witness of signature:
GEO. F. WATERS.

Mr. BLAIR. It shows that there was a man killed named "Noble Dougherty."

Mr. COCKRELL. Yes.

Mr. BLAIR. When?

Mr. COCKRELL. The man states—

I came to work in the navy-yard in 1854.

This was before the other Dougherty came there.

Mr. BLAIR. Eighteen hundred and sixty-four I suppose is meant.

Mr. COCKRELL. This says 1854.

Mr. BLAIR. There is no subject-matter of investigation back that far.

Mr. COCKRELL. This statement goes back to the time when this man first came there to show how long he had been connected with the navy-yard.

Mr. BLAIR. Does he state when Noble Dougherty was killed?

Mr. COCKRELL. Yes.

I was driving for a man by the name of Riley in 1853, and my work brought me in the yard frequently, and I was shown where the man fell soon after the occurrence. I was told at that time that the man who was killed was named Noble Dougherty.

Mr. BLAIR. The other testimony is to the effect that this smoke-stack fell during the war, so that your date is evidently wrong. It should be 1864 instead of 1854.

Mr. COCKRELL. All right; it is immaterial about that.

Mr. BLAIR. If the Senator will permit me I will reply.

Mr. COCKRELL. Certainly, I will hear the Senator if he wishes to speak.

Mr. BLAIR. At 2 o'clock I wish to say a few things.

Mr. COCKRELL. Here is a letter from J. A. H. Wilmuth:

UNITED STATES NAVY-YARD, *Washington, D. C., July* 20, 1888.

SIR: I respectfully report that log-book J (from 1863 to January 1, 1865) is missing. It has never been in my charge since I have been in the office.

Very respectfully, your obedient servant,

J. A. H. WILMUTH, *Mate, U. S. N.*

Capt. R. W. MEADE, U. S. N.,
Commandant.

Now, Mr. President——

The PRESIDING OFFICER (Mr. FRYE in the chair). The hour of 2 o'clock having arrived the Chair is obliged to lay before the Senate the unfinished business, being the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. ALLISON. I do not wish to interfere with the Senator from Missouri in his elucidation of this question or with the Senator from New Hampshire, and of course I will not interrupt them.

Mr. COCKRELL. I shall only detain the Senate for a few minutes.

Mr. BLAIR. I shall want four or five minutes to reply.

Mr. COCKRELL. I hold in my hand a letter from the Secretary of War of August 20.

WAR DEPARTMENT, *Washington City, August* 20, 1888.

SIR: I have the honor to acknowledge the receipt of your letter of the 2d instant, inclosing a clipping from the Pittsburgh Dispatch relative to the case of Mrs. Mary Ann Dougherty, and requesting to be furnished with such information as the records of this Department afford relative to Captain Whyte and H. B. Moulton, who are mentioned in the article, and also that application be made to the Navy Department for information relative to a son of Mrs. Dougherty, who is alleged to have been employed in the Washington navy-yard and subsequently crushed to death in the machinery in one of the shops.

In reply, I beg to inclose a report of the 9th instant, from the acting Chief of Ordnance, giving the desired information relative to Captain Whyte and Mr. Moulton.

With reference to Mrs. Dougherty's son and his alleged employment in the Washington navy-yard, a letter was sent to the Secretary of the Navy, under date of the 13th instant, inclosing a copy of your letter and an extract from the newspaper clipping, with the request that he would communicate with you upon the subject.

With reference to your request for any information which can be obtained as to whether the George Bancroft who signed the petition of Mary Ann Dougherty is a nephew of the historian Bancroft, I beg to state that it is believed that the person referred to is George Bancroft, formerly a clerk in the Internal Revenue Bureau of the Treasury Department, and at present a member of the firm of George Bancroft & Co., pension claim agents, No. 635 G street, northwest, this city.

This George Bancroft is borne on the Blue Book as having been born in England and appointed from Iowa. He was in the division of which Mr. Charles A. Bates was chief. Mr. Bates is still a chief of division in the Internal Revenue Bureau, and can doubtless furnish other information in regard to Mr. Bancroft.

The inclosure contained in your letter is returned herewith as requested.

Very respectfully,

R. MACFEELY,
Acting Secretary of War.

Hon. F. M. COCKRELL,
United States Senate, 1518 R street, northwest, Washington, D. C.

That inclosure was taken from the Pittsburgh Dispatch, to which the Senator has referred, and which I will have the Reporter copy and insert in my remarks.

Mr. BLAIR. What is the substance of that article in the Dispatch? I did not refer to it. I referred to the Philadelphia Times. What is this article about?

Mr. COCKRELL. It is an interview with Major McKee. I will ask the Reporter to copy it and insert it in my remarks.

The article is as follows:

[The Pittsburgh Dispatch, Pittsburgh, Sunday, July 29, 1888.]

NOT ON THE BOOKS—A VERY CURIOUS FEATURE OF THE NOW FAMOUS MARY ANN DOHERTY CASE—HER NAME NOWHERE TO BE FOUND AMONG THE VOUCHERS OF THE PAY-ROLLS OF THE WASHINGTON ARSENAL—HER STORY STRAIGHT AS A STRING, BUT THE WHOLE BUSINESS SHOWS A REPREHENSIBLE LOOSENESS OF AFFAIRS.

WASHINGTON, *July* 28.

The one curious and mysterious feature of the Mary Ann Doherty case is that no record of the woman's name can be found on the books of the Second Auditor's Office, where the vouchers of the pay-rolls of the arsenal are kept. When Senator COCKRELL said, in uttering his defiance to Senator DAVIS, that he would undertake to show from the records that no such person was employed in the arsenal in 1864, many thought that it was a mere bluff. But COCKRELL is not that kind of a man. He is famous for posting himself in regard to the smallest details of a case, yet no one seemed to know whether the Senator had searched the records or not.

At the Second Auditor's Office to-day no one knew of the search having been made in regard to the Doherty case. Thereupon the Dispatch correspondent procured from Secretary Fairchild a note to the Second Auditor, directing that a thorough search be made for the name of Mary Ann Doherty among the vouchers of 1864. As the examination was about to begin it was learned that a week ago Mr. John Cook, chief clerk of the Ordnance Department, had made some investigation of the matter. Repairing to Mr. COOK the correspondent was informed that at the instance of Senator COCKRELL he (Mr. Cook) had, with another clerk, made a most searching examination of the vouchers from October, 1863, to December, 1864, and that the name Mary Ann Doherty was not to be found. Neither was it among the list of names of beneficiaries from the $2,000 appropriated for the relief of those wounded by the explosion.

The undoubted fact of the absence of the name from existing records was the chief basis of the President's veto of the bill passed by both branches of Congress.

Now for the other side. Mary Ann herself, who is 53 years old, tells a very straight story, and Captain Whyte is convinced that he and other officers signed the certificate dated March 9, 1880, only after they had ample evidence from persons acquainted with the facts that there was nothing fraudulent in the application of Mrs. Doherty. H. B. Moulton, a lawyer of unquestioned veracity, made affidavit that he was foreman of the cartridge department at the arsenal June 17, 1864, when the explosion occurred; that Mary Ann Doherty worked under him, and that he knew her; that she was badly injured by the explosion. He has no doubt that the Mary Ann applying for a pension is the Mary Ann who was blown up.

There was plenty of evidence that not long after the explosion the young son of this Mrs. Doherty was given a situation at the navy-yard, at the solicitation of citizens, on account of the injuries and impoverished condition of the mother, and that this boy, who was about 9 years of age, was caught in the machinery of one of the shops and crushed to death.

Mrs. Doherty's story is indorsed by Admiral Porter, George A. Bancroft, a nephew of the historian, and other gentlemen of equal reputation, who learned the story years ago, before this application for a pension was thought of. Yet with all this testimony, involving H. B. Moulton's positive assertion of the employment of Mrs. Doherty at the arsenal at that time, no such name appears on the pay-rolls, and that is unaccountable, except upon two theories, either that she was appointed the 1st of June and was blown up before the first day—in which case her name would not appear on the rolls—or else, admitting Moulton's affidavit to be correct, she was known to Moulton as Mary Ann Doherty and drew her pay under another name.

One fact that seems to have been generally overlooked is that the case was given among others to a subcommittee of the Committee on Pensions, of which Senator BLODGETT, of New Jersey, is chairman. Senator BLODGETT investigated the case and made a favorable report. It was upon the strength of this report that the bill was passed, and therefore BLODGETT is really responsible for all the

wrangling that has been indulged in, the epithets that have been hurled at the President, and the almost bloody encounter in the field of honor between BLAIR, the Puritan, and BUTLER, the Fire-eater.

It has certainly become a very interesting as well as perplexing case, and all the more interesting because both sides are preparing to fight it out on the lines already marked. As for Mary Ann Doherty personally, she is not an attractive individual. She has worked herself into a condition of excitement over her pension which unfits her for work. She does nothing but gad about—often none too sober—and bore every one she meets with her story. But that has nothing to do with the truth or justice of the matter, and so the battle will be fought just as though she were the most charming woman in the world.

I will next read a letter of General Macfeely, Acting Secretary of War, dated the 21st of August, inclosing a copy of the communication from the Chief of Ordnance, which simply shows that Captain Whyte is a retired officer of the Army and was chief clerk at the arsenal, and that Moulton was employed at the arsenal.

WAR DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, August 21, 1888.

SIR: In response to your telegram of this date I have the honor to inclose herewith a copy of a report of the 9th instant from the Acting Chief of Ordnance in the case of Mary Ann Dougherty, which was inadvertently omitted from Department letter of the 20th instant.

Very respectfully,

R. MACFEELY,
Acting Secretary of War.

Hon. F. M. COCKRELL,
United States Senate, 1518 R street, northwest, Washington, D. C.

ORDNANCE OFFICE, WASHINGTON, *August* 9, 1888.

Respectfully returned to the Secretary of War.

The Captain Whyte referred to is a retired officer of the Army, and at the time of the explosion (June 17, 1864) he was the chief clerk at the Washington arsenal. In regard to H. B. Moulton, our records show that he was employed at the Washington arsenal in the capacity of laboratorian during the months of May, June, August, September, October, November, and December, 1864, at wages of $2, $2.25, $2.50, and $2.75 per day, respectively. The records prior to May, 1864, were not examined, nor were they after December, 1864.

The names of all Government employés at the arsenal would necessarily appear on the monthly pay-rolls, and the absence of the names of any persons from the pay-rolls would be evidence that they were not employed at the arsenal.

CHAS. S. SMITH,
Captain Ordnance Department, United States Army,
Acting Chief of Ordnance.

These papers prove beyond the power of controversion that Mary Ann Dougherty was never employed in that arsenal and was never blown up in the arsenal, and never received one dollar of the $2,000 appropriated and paid out to the one hundred and twenty persons who were injured in that explosion, and there the records stand, and they can not be impeached or overthrown by the hearsay, flimsy, whimsical statements that have been introduced here of men, women, and children in the city of Washington.

Mr. GEORGE. The Senator will permit me to ask him, are the rolls of employés in the Department for the year and month in which this explosion took place in this arsenal now perfect?

Mr. COCKRELL. They are, and the names of the one hundred and twenty people who received the $2,000 are all there upon the rolls.

Mr. BLAIR. The Senator will permit me a word right there. He has produced no evidence whatever that at the particular period covered by the explosion the records exist at all. He has produced general letters, but no records within that time.

Mr. COCKRELL. I have produced a letter that a search of the rolls in the Department shows that her name is not upon them, and that a search of the roll containing the 120 names of persons to whom the $2,000 was distributed shows that it does not contain her name; and that is all anybody can state.

Mr. BLAIR. The Senator simply proves that this woman has received an additional wrong in not getting her share of the compensation awarded.

Mr. COCKRELL. It is wonderful with Moulton and all her friends at her back and $2,000 distributed out that she did not get any share of it. That is too thin.

Mr. BLAIR. I will reply to the Senator.

Mr. COCKRELL. Do.

Mr. BLAIR. The Senator has demonstrated a capacity that no human being ever possessed before or undertook to claim; that is, that he can prove a negative. We have brought here the affirmative evidence of witness after witness of the highest character, unimpeached and unimpeachable, and they swear to personal and direct knowledge of every fact that was alleged in this woman's petition, and to every fact that is in controversy in this case before the Senate. The Senator knows that, and although he has exhibited a great deal more of modesty and of quietude of manner in the way in which he has offered this testimony than he did when he made the charges the other day, I submit that even now there is a greater amount of vigor in the manner in which he undertakes to perpetrate this fraud upon the country in the innocence of his soul than there ought to be.

How is the testimony of these witnesses to be impeached? How are you to meet the testimony of the Admiral of the Navy and the dozen other high citizens of this country who made their certificates to the essential truth of all the facts contained in this woman's petition, which contained all the facts in controversy here before the Senate? How are you to meet the assertions of Major McKee and Sergeant Campbell, and four or five others, several of whom had personal knowledge and were there at the time, and swear that this identical woman worked for the Government and was blown up and her life almost destroyed, and that she suffered from insanity for years afterwards, being able, however, in view of the destitution of her children, to render some service for about a year, but from the explosion until now an injured, a suffering, and poor, distressed, unfortunate woman, who is deserving of sympathy instead of this effort of a great Government to fugle itself into four more years of position by assailing a laboring woman, sick and poor woman, like Mrs. Dougherty.

I did not anticipate just this style of meeting a case of this kind before the Senate. Let me remind the Senator from Missouri that if his sneers are sincere, the President himself did not put his veto upon the ground that the woman's assertions of fact were not true; but when he was met in the Senate and in the country, before he was met in the Senate with the protest of all decent people that he had no right to villify this woman, even though she was an outcast, assuming the truth of all that has been charged and not proven, and which has been asserted after it was demonstrated to be false—assuming the truth of the whole of it, the President is an infamous libeler when he uses the great constitutional power he has to hand this poor woman's name down to remotest posterity defamed and libeled unnecessarily. Her character was not in issue at all, and when this was called to the attention of the Senator and the President how did they meet it? They go to work and undertake to prove that this woman is a fraud, and after all this testimony has been offered they come in with this infamous charge sustained by negation, without any evidence at all.

I suppose there is a better nature in every man; and if I fail to find that better nature, if I fail to reach it in the Executive, I shall infer that it is a minus quantity and not there. I come here and discard all secondary evidence, all general comments, all outside matters, and confine myself to the evidence in this particular case, and I have produced here nothing but legal evidence, such as is made use of in the establishment of claims before the Departments—the positive, direct, sworn testimony of witnesses who knew about this case, and who are not to be discarded and put aside by the fact that certain records of this Government have been carelessly kept or carelessly guarded, blown up or destroyed by fire. When I produce that kind of testimony, confined to the specific issue, how does the Senator meet it? He gets up and denounces not only this woman and her case as a fraud, but everybody connected with it as having come here and lied under oath, or lied in another way quite as guilty, by their letters and affirmations in writing.

Here are persons whose characters are assailed besides Mrs. Dougherty. Mrs. Weaver is or has been at the head of the Woman's Christian Temperance Union of this city, a woman of as good character as there is on the face of the earth, and she told me, as I understood her, that in her efforts to get information in regard to the death of this boy in the navy-yard she was treated discourteously by the officers, and was informed that this was getting to be a political issue and they must keep quiet. Mrs. Dougherty told me in regard to an all-important piece of testimony of a man who knew of the facts about the explosion, now employed under this Government, that he did not dare to tell the truth about it, because he had been warned by emissaries of the Government to keep still, that it was a political issue, and they must be careful what they said or they would lose their places. The disgrace, the mantling disgrace of this whole line of statements of this kind that come to me is shameful. I hope to Heaven they are not true. There could be no motive whatever for these parties to come to me with asseverations of this kind.

Now, what does it amount to that certain officials do not find the records in the Treasury Department? I doubt whether if they were there they would find them. I doubt very much if they were there that they would find them. I doubt whether they would find records of this kind without some difficulty and prolonged search, and it would be the easiest thing in the world to overlook them if they were under their very eyes.

I have come to believe, what I would not at one time have stated but for this persistence in face of the proof I have adduced, that there has been an amount of connivance and trickery and fraud perpetrated by those in the employment of the Government to victimize this woman, and put her in the wrong as against the veto of the President, that would shame the very denizens of the pit itself.

The Senator inadvertently dropped out the word and told me the date was 1854, as though it was not a mistake in the writing as to when the falling of the smoke-stack occurred. The other witnesses speak of it as something that occurred during the war, as I recollect.

But he would put that occurrence long before the occurrence of another fact in controversy here. But here it seems was a man who remembered "Noble Dougherty," who was injured in this way by the falling of the smoke-stack, and the name is Dougherty. It would be marvelous if the name had been preserved in the records in any case, but here is this man's recollection, a recollection coming from the other side, and along with that is the testimony of half a dozen witnesses who knew personally about this matter; and this evidence, which will appear in the RECORD to-morrow, I commend to the careful examination of every lawyer, yes, of every person of ordinary common sense who can get access to it.

The Senator says he does not find anything down there in the records of the surgeon. In my belief—I do not know anything in regard to that—it does not follow that the boy was ever taken care of. Possibly under the pressure of affairs in this Dougherty family he may have been dumped into the water and be lying at the bottom of the Potomac to-day. The woman says she does not know where he was buried, and the Senator sneers at her because in her insanity, in her illness and confinement in an asylum and under the treatment of the physicians there, at her home and elsewhere, she does not know what has become of the body of her child. God may have buried that boy's body, and it may be found in the future under the guardianship of the same great Being who buried Moses on the mountain top; and the Senator may find possibly that this defamation to which he has made himself a party will be a very serious matter in some other tribunal where the boy will confront him and those who do injury to his mother, as does the Senator in his effort to defend his chief.

The Senator begins a reply to this evidence by reading from some old manuscript or document the complimentary allusions made by soldiers in the employment of the Government to the services of one Captain Dimmick in obtaining the passage of the arrears-of-pension law. He does seem to have been exceedingly efficient, and these men sent out their request for contributions to a testimonial, Mr. George Bancroft indorsing it on the back. Do you suppose these soldiers, in their efforts to procure suitable testimonials to Captain Dimmick, himself a soldier, would attempt to palm off on the whole United States of America the name of a single man and the name of one man only, George Bancroft, whose indorsement was not that of an honest man, calculated to give credence and support to their circular? The Senator says, undoubtedly the whole country believed that that was George Bancroft, the historian. Is it any disgrace to this man to wear the name of George Bancroft, the historian? Is he to go about the country explaining that he is not George Brancroft, the historian?

There is nothing upon the face of the paper signed by Mr. Bancroft in this case which would make it improper for a man to affix or sign his name to it. I thought it very likely it was George Bancroft, the historian. I sent for him, and he did not pretend that he was somebody else; he put on no airs. I then made inquiry outside, and I found that this same George Bancroft is a man of most excellent character in the city of Washington, whose associates are among the religious people, the churches of this city, and who stands, so far as I can learn, as well as any of them or any of us, and there is not the slightest reason on the face of the earth to suppose that he is in any way misconducting himself in connection with this case; moreover, the evidence shows that he had nothing to do with getting it up, more than to present it to the Department.

And so it comes to pass that these officers of the Government who claim to have personal knowledge that this woman has been blown up and was injured, and then these various other officers who know this by repute, having lived here in the city, understanding about it, make their certificate in regard to it, and the Senator would reply to all that mass of evidence by saying this man is not George Bancroft, the historian. He may be a much better man, though I have high respect for George Bancroft, the historian, and no more honorable name exists in that great American history which he has written than the name of the author at the beginning of it.

But the Senator took out the Pittsburgh Dispatch and was going to read it, but his astute eye was arrested, and I thought he was not going to read it, and did not read it. He said he would have it printed—some of it—and I desired to know if it was to go into the RECORD. So I took the paper from the Senator myself, and now I will read it.

The Pittsburgh Dispatch. Pittsburgh, Sunday, July 29, 1888.

It will be borne in mind that this bears on the effort of the Department after the tumult had been raised to discredit the testimony of McKee and the rest of them, and to get them to say they never signed any such paper, and that it was a fraud, an imposition. A big business for the Administration! Undoubtedly that is where the large part of the surplus has gone to. [Laughter.]

NOT ON THE BOOKS—A VERY CURIOUS FEATURE OF THE NOW FAMOUS MARY ANN DOUGHERTY CASE—

There was a twang in the Senator's tone. I can not imitate that, but I will ask the Senate to consider that the twang is in as well as the contents of the paper.

[The Pittsburgh Dispatch. Pittsburgh, Sunday, July 29, 1888.]

NOT ON THE BOOKS—A VERY CURIOUS FEATURE OF THE NOW FAMOUS MARY ANN DOUGHERTY CASE—HER NAME NOWHERE TO BE FOUND AMONG THE VOUCHERS OF THE PAY-ROLLS OF THE WASHINGTON ARSENAL—HER STORY STRAIGHT AS A STRING, BUT THE WHOLE BUSINESS SHOWS A REPREHENSIBLE LOOSENESS OF AFFAIRS.

Not on the part of Mary Ann Dougherty though. No looseness in the affairs of Mary Ann Dougherty, a woman of unexceptionable character. But there is no record here to prove the character of her assailants in that respect. They stand equal before the country, and I submit it is time to produce affidavits in support of the veto and those who defend it against the charge of looseness in affairs.

[Special telegram to the Dispatch.]

WASHINGTON, *July* 28.

The one curious and mysterious feature of the Mary Ann Doherty case is that no record of the woman's name can be found on the books of the Second Auditor's Office, where the vouchers of the pay-rolls of the arsenal are kept. When Senator COCKRELL said, in uttering his defiance to Senator DAVIS, that he would undertake to show from the records that no such person was employed in the arsenal in 1864, many thought it was a mere bluff. But COCKRELL is not that kind of a man. He is famous for posting himself in regard to the smallest details of a case, yet no one seemed to know whether the Senator had searched the records or not.

At the Second Auditor's Office to-day no one knew of the search having been made in regard to the Doherty case. Thereupon the Dispatch correspondent procured from Secretary Fairchild a note to the Second Auditor, directing that a thorough search be made for the name of Mary Ann Doherty among the vouchers of 1864. As the examination was about to begin it was learned that a week ago Mr. John Cook, chief clerk of the Ordnance Department, had made some investigation of the matter.

Right here I want to ask the Senator to bear in mind that the certificates he has produced cover all the records of the time from 1861 to 1865, and they say in regard to all these records that there was no Mary Ann Dougherty.

Mr. COCKRELL. Not a bit of it.

Mr. BLAIR. Between those months. I apologize. It was from nine months before to six months after the accident.

Mr. COCKRELL. That is it.

Mr. BLAIR. It is in proof here and demonstrated by the concurrent account in the testimony given in the investigation, a sworn copy of which I have put in from the Evening Star, that the records were blown up in one of these explosions and destroyed, and yet there is no exception made, and these papers do not show that any portion of the records are absent. If there were not two explosions, there being only a little inaccuracy as to date, then it was demonstrated that the records were not on file at all, for they could not be and never were there, for they went in the air before they could be filed at all, and if there were two explosions, what reason is there to suppose that they were not as likely to go into the air in the second explosion when twenty people were killed and a large number wounded, as in the first explosion that occurred, in which it is proved that the records were destroyed? Then, of what use are these certificates that the Senator produces here when they fail directly to note that any records whatever were destroyed, and carry to the country the impression that all records during the period in question were placed on file, and that therefore the name of Mary Ann Dougherty ought to appear?

I submit that these records and these letters produced by the Senator, which at best could only undertake to prove a negative, are so far impeached and invalidated by this pretense to cover everything, when it is demonstrated that there is much that they can not cover, because they were never there, that they should all be wiped out of the case. But to go on with the Pittsburgh Dispatch:

Repairing to Mr. Cook, the correspondent was informed that at the instance of Senator COCKRELL he (Mr. Cook) had, with another clerk, made a

MOST SEARCHING EXAMINATION

of the vouchers from October, 1863, to December, 1864, and that the name Mary Ann Doherty was not to be found. Neither was it among the list of names of beneficiaries from the $2,000 appropriated for the relief of those wounded by the explosion.

Now, right on that point the Senator makes an argument, as though it could be an argument of any consequence to meet this direct and positive and overwhelming testimony from a dozen witnesses, based on the circumstance that she failed to get the money that belonged to her. Does not the Senator know that in cases of this kind scarcely one-half of those who deserve and should receive reparation get any, and here this woman sick, in the insane asylum, and unable to attend to her affairs, and Mr. Moulton injured, and for many months unable to attend to anything, and these other workmen having enough to attend to to get a living for themselves they were not likely to hunt up this woman, nor were they in any sense responsible for her at all.

The undoubted fact of the absence of the name from existing records was the chief basis of the President's veto of the bill passed by both branches of Congress.

That was not so, because the veto discussed the facts as found by Congress and rejected the claim upon those findings, and then when we said the woman's claim was good notwithstanding the veto, and when I and others criticised the fact that the President defamed the woman unnecessarily, even if she had no right on the facts to the pension, then it was that the Senator from Missouri came in and charged that all the proofs were frauds, the admitted facts sworn to by everybody, found by both Houses of Congress in this Congress and by the committees which reported on the case at the last Congress and a re-examination at the Pension Office, and nothing at the Pension Office ever developing anything to the contrary of the truth of all these three principal facts, the injury to this woman, the loss of one son by death in the navy-yard, and the kidnapping of the other. I say the Senator then came in and charged that what everybody had before, including the President in his veto, taken to be true was a fraud.

Now for the other side, and I will observe that the correspondents have a sense of justice and give both sides. That is the great saving feature of our American journalism; it plays the mischief with both sides and gets at the truth in the end.

Now for the other side.

Mary Ann herself, who is fifty-three years old, tells a very straight story, and Captain Whyte—

The man who was there in charge as chief clerk, and now a retired Army officer, and, as I understand, a graduate of West Point, blind,

seventy-three years old, whose statement is here in the proof I have presented—

and Captain Whyte is convinced that he and other officers signed the certificate dated March 9, 1880, only after they had ample evidence from persons acquainted with the facts that there was nothing fraudulent in the application of Mrs. Doherty.

I do not wonder when the Senator's alert eye crept over this article from the Pittsburgh Dispatch that he was anxious to withhold it; that he exhibited no anxiety to read it, and the more he examined it the less likely it seemed that we should ever get it, and I made my advance to the Senator's desk, and I, perusing it, found it to be a most important piece of evidence for Mrs. Dougherty's side.

H. B. Moulton, a lawyer of unquestioned veracity—

That is what I said about him; the Senator said he was a fraud—

a lawyer of unquestioned veracity, made affidavit that he was foreman of the cartridge department of the arsenal June 17, 1864, when the explosion occurred; that Mary Ann Doherty worked under him, and that he knew her; that she was badly injured by the explosion. He has no doubt that the Mary Ann applying for a pension is the Mary Ann who was blown up.

There was plenty of evidence that not long after the explosion the young son of this Mrs. Doherty was given a situation—

Did the Senator from Missouri know that there was plenty of evidence right here in his possession from these witnesses that he produced and put on record?—

There was plenty of evidence that not long after the explosion the young son of this Mrs. Doherty was given a situation at the navy-yard at the solicitation of citizens—

They can not find that petition of the citizens either, I suppose—

on account of the injuries and impoverished condition of the mother, and that this boy, who was about nine years of age, was caught in the machinery of one of the shops and crushed to death.

There is plenty of evidence—these correspondents find it and Mrs. Dougherty said the same thing—a great inventor Mrs. Dougherty!—has invented all this history and got all the responsible members of the Army and Navy, nearly, in this city to certify that her story is true; and yet it is a falsehood!

Mrs. Dougherty's story is indorsed by Admiral Porter, George A. Bancroft, a nephew of the historian.

It seems in my conversation with Bancroft something of that kind did drop out, that he was a remote connection—he did not emphasize that he was one at all. I asked him what this George Bancroft business meant. He said it was a good name and belonged to him and he used it, and I could not see why he had not the right to his own name. But I found out that he led the singing in several of the churches, that he stood first rate in the Sunday schools, and I thought he might possibly tell the truth, even if he was not the historian Bancroft himself.

A nephew of the historian—

I state this on the authority of the correspondent now—

and other gentlemen of equal reputation, who learned the story years ago, before this application for a pension was thought of.

Just think of that, all these people are inventing this story to perpetrate a fraud upon the country long before the perpetration of the fraud was throught of!

Yet with all this testimony, involving H. B. Moulton's positive assertion of the employment of Mrs. Doherty at the arsenal at that time,

NO SUCH NAME

appears on the pay-rolls—

The name went up in the same smoke in which disappeared the pay-rolls themselves—

and that is unaccountable, except upon two theories: either that she was appointed the 1st of June, and was blown up before the first day, in which case her name would not appear on the rolls; or else, admitting Moulton's affidavit to be correct, she was known to Moulton as Mary Ann Doherty and drew her pay under another name.

What is to be said of that? Moulton states that she was known as Mary Ann Dougherty; he put her name upon the pay-roll; and the other solution which is suggested here is perhaps the true one. Of the other two theories which I suggest, either one would account for it. One is that the clerk in his search at the Department failed to find her name on the roll, if the name was there, and the second is, that in the second explosion rolls were as likely to be destroyed as in the first, and it is demonstrated that in the first the rolls were destroyed. And these Government certificates fail to take notice of any destruction of rolls whatever, yet the Senator from Missouri would have us believe they have got all the names of persons that were in the employment of the Government during that period, notwithstanding the proven destruction of a part of the rolls in at least one explosion, and undoubtedly in both, if there was more than one.

One fact that seems to have been generally overlooked is that the case was given, among others, to a subcommittee of the Committee on Pensions, of which Senator BLODGETT, of New Jersey, is chairman. Senator BLODGETT investigated the case and made a favorable report.

It might have been said that it was also investigated in the last Congress, and Senator SEWELL made a favorable report also.

It was upon the strength of this report that the bill was passed, and therefore BLODGETT is really responsible for all the wrangling that has been indulged in—

Perhaps that accounts for what is said to be the difficulty over in New Jersey—

the epithets that have been hurled at the President, and the almost bloody encounter in the field of honor between BLAIR, the Puritan, and BUTLER, the Fire-eater.

Comment is unnecessary on that.

It has certainly become a very interesting, as well as perplexing case, and all the more interesting because both sides are preparing to fight it out on the lines already marked. As for Mary Ann Doherty personally, she is not an attractive individual.

Perhaps this correspondent, if he had been blown up in that arsenal twenty-five or thirty years ago, been insane a good part of the time ever since, and had passed through the distress and suffering which mark the countenance of this woman, whose body was burned in many places almost to a cinder, would not be so very charming.

She has worked herself into a condition of excitement over her pension which unfits her for work. She does nothing but gad about—often none too sober—and bore every one she meets with her story. But that has nothing to do with the truth or justice of the matter.

Thank God here is a correspondent who has struck the point in the case at last.

And so the battle will be fought just as though she were the most charming woman in the world.

And that is the way it ought to be fought.

Mr. President, I have no more to say. If the President of the United States and the Senator from Missouri and the country can leave this matter where it is, I am content; but Mary Ann Dougherty is vindicated. There is nothing against her but the unsustained and libelous assertion of the President in his veto message, made unnecessarily, irrelevantly, and wrongfully, and the effort of the Senator from Missouri to bear him out in the false position which he has assumed.

JAMES M. WILLBUR—VETO MESSAGE.

Mr. VEST. I rise to morning business.

The PRESIDENT *pro tempore*. Before morning business can be entertained by the Chair it is his duty to lay before the Senate a message from the President of the United States, which will be read.

The Chief Clerk proceeded to read the message.

Mr. BROWN. Mr. President——

The PRESIDENT *pro tempore*. Does the Senator from Georgia rise to the question that has just been before the Senate?

Mr. BROWN. I rise to ask the Senator in charge of the tariff bill to yield to me a few moments until I present a petition, and I want to submit a few remarks in connection with it.

The PRESIDENT *pro tempore*. The Chair can not entertain morning business until the messages of the President, now on the table, are laid before the Senate. The reading of the message will proceed.

The Chief Clerk resumed and continued the reading of the message, as follows:

To the Senate:

I herewith return without approval Senate bill No. 1044, entitled "An act authorizing the Secretary of the Treasury to state and settle the account of James M. Willbur with the United States and to pay said Willbur such sum of money as may be found due him thereon."

The claim mentioned in this bill grows out of alleged extra work done by the claimant in the construction of the post-office and court-house building in the city of New York.

The United States, in September, 1874, entered into a contract with Messrs. Bartlett, Robbins & Co., by which they agreed to furnish and put in place certain wrought and cast iron work and glass for the illuminated tiling required for the said building according to certain specifications and schedules which formed a part of said contract. The work was to be of a specified thickness, and the contractors were to be paid for the same at certain rates per superficial foot. The approximate estimate for the entire work was specified at $35,577.56. Samples of the tiling to be put in were submitted to the Supervising Architect and accepted by him.

In August, 1874, the claimant entered into an agreement in writing with Bartlett, Robbins & Co. to do this work as subcontractor for them at certain prices for each superficial foot of said tiling put in place.

In neither contract was the weight of the tiling mentioned.

The work was, under the contract with Messrs. Bartlett, Robbins & Co., completed, and after such completion and the measurement of the work the said firm of Bartlett, Robbins & Co. were paid by the Government the sum of $35,217.57, in full satisfaction of their contract with the United States.

It appears that after the completion of the work the claimant gave notice to the Government that he had a claim against Bartlett, Robbins & Co., growing out of said work, for the sum of $8,744.44, and requested that payment be withheld from said firm until his claim against them was adjusted.

The fact that said claim had been made having been communicated by the Supervising Architect to Bartlett, Robbins & Co. on the 22d day of August, 1876, they responded to the Supervising Architect as follows:

"DEAR SIR: We inclose copy of our account against Willbur and the Illuminated Tiling Company and a copy of Willbur's assignment to the tile company, which includes a copy of his agreement with us; and when the Department settles the measurement of the work the items in the contract will show just what the amount is, and, as we have repeatedly assured him, he will have all the measurements the Government gives us.

"If any one has cause of complaint in this case it is us. Four times the work came to a stand, or nearly so, and our Mr. B. was compelled to go to New York and stay until it was moving again, charging his expenses by Willbur's request, and finally it had to be finished by others, etc. We know this does not interest you particularly, as you do not know him in the matter, but there has been so much willful misrepresentation we thought silence might be misconstrued.

"It is charitable to think Willbur must be crazy.

"Very respectfully, yours,

"BARTLETT, ROBBINS & CO."

In an opinion of the Solicitor of the Treasury concerning this claim, dated November 30, 1883, I find a statement that on the 20th day of October, 1876, a paper was filed by the attorneys of the claimant, in which his claim for extra work and material in performing his contract was alleged to be $21,857.94. It is further stated that this claim was hastily drawn by one of Willbur's attorneys, and without consultation with him.

On or about the 20th day of March, 1877, Mr. Willbur himself filed a statement

of such extra work and material, in which he claimed for the same the sum of $42,685.20.

Another statement made by Willbur, in February, 1878, presents a claim on account of the same matters, amounting to $47,159.62.

This claim, so variously stated, is based upon the allegation that tiling and frames of greater thickness than were required by the contract were put in the building. Although it is insisted by the claimant that these thicker tiles and frames were directed to be put in, or at least accepted by the person having charge of the construction of the building for the Government, I hardly think it will be seriously contended that the claimant has any legal claim against the United States.

But, with a view of discovering whether, upon equitable grounds, the claimant should be paid anything by the Government for glass and iron of greater thickness than its contract with Bartlett, Robbins & Co. required, and which had been put in its building by their subcontractor, the Secretary of the Treasury in 1884 appointed a committee of three persons to examine and report upon this claim of Willbur's, "with a view of determining what portion, if any, it is proper for the Government to pay."

On the 24th day of January, 1885, this committee made a report, by which they determined that there should be paid to the claimant on account of the matters alleged the sum of $1,214.90.

This report was based upon the measurements, examinations, and estimates of two experts, one selected by the claimant and the other by the committee. The report was transmitted to the House of Representatives by the Secretary of the Treasury and an appropriation asked to pay the amount awarded.

But Mr. Willbur was not satisfied, and on the 6th day of January, 1885, addressed a communication to the Secretary of the Treasury, in which this passage occurs:

"I shall insist on a remeasurement of the entire work, as this is vital to my claim. The excess which I furnished can only be ascertained by weight instead of by measuring the thickness of the plates and frames."

At the second session of the Forty-ninth Congress and early in 1886 this claim was before the Senate Committee on Claims, and at the instance of the committee this work was again examined by experts, who came to the conclusion that the claimant was entitled to the sum of $45,615.67 for the extra work which he had performed and materials furnished.

It is only alleged that the glass tiling and frames actually put in the building were slightly thicker than those required by the contract, and this alleged increased thickness seems to be fairly represented in a general way by the claim that some of the glass and frames which were required to be 1 inch thick were actually put in 1¼ inches thick.

Upon this statement it must be admitted that the sum above stated as the value of this extra thickness is somewhat startling. In the language of the report upon this bill by the Supervising Architect, "a claim of $47,159.02 for such slight excess on work, the price of which was $35,217.57, is hardly entitled to consideration."

The claim, as well as the award of the experts last named, reach their astonishing proportions by the application of weights to the question in the following manner: A certain area is measured. A square foot of the tiling actually put in is weighed, and a square foot of the tiling required by the contract is also weighed. Both these weights are multiplied by the area. The lesser aggregate weight is deducted from the greater, and the difference is divided by the weight of a square foot of the lightest tiling, thus reducing it to square feet of such lightest tile. These square feet are multiplied by the price agreed to be paid by the contract for each superficial foot, and an item of extra work is determined. Thus additional weight in constructed and finished tiling is converted, as far as price and measurement are concerned, into finished tile, which more than doubles the quantity actually laid down.

This can not be right. And yet the bill herewith returned directs the Secretary of the Treasury to settle this claim for extra work upon the basis of the report of the experts who have adopted this mode of adjustment; or, if not satisfied with their report, he shall within thirty days from the passage of the act cause a reweighing of said material to be made by two sworn experts, one to be appointed by him and one by the claimant, and a third to be appointed by these two, in case they can not agree. The bill further provides that he shall then pay to said Willbur the difference of excess in weight and superficial measurement as found by said experts between the illuminated tiling and frames furnished and that contracted for at the contract prices for such work and material.

There are features of this claim which suggest suspicion as to its merit. In any view of the matter I regard the claimant as seeking equitable relief. He is not entitled to dictate the rule by which his claim is to be adjusted; and he should be quite satisfied if the officers of the Government charged with the settlement of such matters are permitted by the Congress to afford equitable relief according to such rules and methods as are best calculated to reach fair results.

GROVER CLEVELAND.

EXECUTIVE MANSION, *October* 12, 1888.

The PRESIDENT *pro tempore*. Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. EVARTS. I move that the bill and message be referred to the Committee on Claims.

The motion was agreed to.

MARY K. RICHARDS—VETO MESSAGE.

The PRESIDENT *pro tempore* laid before the Senate the following message from the President of the United States; which was read:

To the Senate:

I return without approval Senate bill No. 3306, entitled "An act granting a pension to Mary K. Richards."

The beneficiary named in this bill applied for a pension on the 14th day of November, 1878, and the same was rejected in April, 1879. Her claim has lately been re-examined, and since the passage of the bill herewith returned she has been allowed a pension by the Pension Bureau, it having been there determined that the former rejection was a manifest error.

With this action of the Pension Bureau I entirely concur.

I therefore venture, notwithstanding the persistent misrepresentations of my action in similar cases, to disapprove this bill upon the ground that this deserving beneficiary will receive under the action of the Pension Bureau a much larger sum than she would if such action was superseded by the enactment of the proposed special statute in her behalf.

GROVER CLEVELAND.

EXECUTIVE MANSION, *October* 15, 1888.

The PRESIDENT *pro tempore*. Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. BLAIR. Mr. President, there are some observations in this veto message upon which I wish to comment. The President of the United States reiterates his former assumption of unusual anxiety for the rights of soldiers in like cases, as he states, by saying that he vetoes this bill in order that the applicant may receive a still higher reward from a grateful country.

This is a case where a rejection has occurred, and in consequence of that rejection application is made to the two Houses of Congress. The investigation by the two Houses of Congress in this case calls the attention of the Pension Office to the injustice it has wrought, and rather than submit further, as in many instances, to the admonition and sometimes severe reproof contained in the reports of the two Houses of Congress, the Pension Office reviews its previous act of injustice, admits its error, and allows the claim. Meanwhile the matter proceeds in the halls of legislation. At last, when it reaches the President he makes the result at the Pension Office, which is caused by this action of the legislature of the country, the basis of claiming an unusual virtue in himself. It is not the first time that this has been done. It is not the first time that the President himself has gone to the country upon this improper pretense.

I wish to call attention to a similar case reported in the last Congress—the case of Newcomb Parker—which I had occasion to review. I shall read the report in that case upon the veto message. We have found it impossible to obtain the two-thirds vote in former Congresses in these vetoed cases, and that is the reason why the time of the Senate is not taken up by the reporting of them back and the interminable discussions which never could result, no matter how just the case, in securing the two-thirds vote necessary in the two Houses of Congress.

The majority of the Committee on Pensions, to whom was referred the message of the President of the United States, returning Senate bill No. 1077, granting a pension to Newcomb Parker, with his objections to the passage of the same, have considered the message, and reconsidered the bill and the evidence in support thereof, and report:

This is really an interesting case. The claimant *filed his declaration* January 7, 1880, six months before the expiration of the limitation for arrears, so that if granted he would be pensioned from the incurrence of the disability, and become entitled to considerable money. He proved that he had suffered from a broken ankle received in line of duty, and there was no doubt about it.

Two special examiners successively reported in favor of the claim. There must have been parties in the Pension Office who resented these favorable reports of their own agents. If two favorable reports result in rejection, how many are necessary to secure the admission of a claim under the rules of the Pension Office? Where the reports continue in a man's favor why should the office interrupt the flow of good results by interposing a rejection? It would seem that the best chance of success is to have a bad case, since verdicts for the plaintiff turn him out of court.

This is not an obscure case either, for the certificate of disability shows that claimant was discharged for this very permanent hurt "by reason of an old irreducible dislocation and fracture of right ankle-joint, received at Fort Totten, District of Columbia. Is unfit for duty in Invalid Corps."

A permanent incurable hurt, contracted in the service, is proved by their own records, and then proved again by two reports of their own agents, who must have known better than to do justice if it could be avoided when their work had to run the gantlet of such official supervision at Washington.

Well, the result of all this demonstration was the rejection of the claim November 10, 1885, on the ground that claimant "is unable to prove that he contracted or had any disability in the service that he did not have prior to enlistment," and the claimant was notified accordingly. Whereupon, January 14, 1886, Senator EDMUNDS introduced the following bill (S. 1077):

"That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Newcomb Parker, late of Company K, Eleventh Regiment of Vermont Volunteers."

Which, on the 15th day of April, was reported by the Committee on Pensions to the Senate without amendment, and the following statement of facts submitted in support of the bill:

[Senate Report No. 561, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 1077) granting a pension to Newcomb Parker, have examined the same, and report:

The claimant, Newcomb Parker, late private of Company K, Eleventh Vermont Volunteers, enlisted August 14, 1862, and was discharged February 8, 1864. He made application for pension January 7, 1880, alleging dislocation of right ankle by a falling stockade at Fort Slocum, District of Columbia, about January 1, 1864. The claim was rejected November 10, 1885, on the ground that the claimant is unable to prove that he contracted or had any disability in the service that he did not have prior to enlistment.

It appears from the report of the Adjutant-General that this soldier was disabled by reason of lameness from the fracture of ankle-joint December 31, 1863, and that on February 8, 1864, was discharged for disability, but when and where fracture of ankle occurred the records do not show. The certificate of disability for discharge is, however, on file, and states that he was found unable to perform the duties of a soldier because of old and irreducible dislocation and fracture of right ankle-joint received at Fort Totten, District of Columbia, and unfit for duty in Invalid Corps, discharged at his own request, disability one-quarter.

The last examination by a medical board, August 6, 1885, rates the disability by reason of injury to right ankle at total.

The claimant has entered evidence of several parties who knew him before enlistment, showing that he was then a sound man and had no difficulty with his ankles, and also testimony as to the incurrence of the disability in the service.

The report of a special examiner, dated October 23, 1885, which closes as follows, is also on file:

"From the testimony in this claim I am of the opinion it is one of merit, and therefore respectfully recommend it for admission."

The report of another special examiner, in which a large amount of testimony was taken, dated August 4, 1885, is also on file in which he states:

"I think there is merit in the claim for injury of right ankle, and that on that account it may be admitted."

It would seem from this evidence that there can be no doubt that this disability was incurred in the service, and that this case should properly have been admitted as recommended—as recommended by the special examiners—in the Pension Office. Why it was not so admitted does not appear from the papers.

Your committee recommend the passage of the bill.

On the 21st of April—

I ask attention to the dates, to see how an effort is made by the veto

message to put Congress in a false position, just as I doubt not is the case now before us—

On the 21st of April the bill passed the Senate, and on the 12th of June it passed the House of Representatives, was enrolled June 14, and went to the President for his approval on the 21st of June, whereupon such proceedings were had as the following letter indicates to be usual in such cases. It will be observed that enrolled bills can not come to the possession of the Interior Department save from the custody of the President, who receives them from Congress.

"[From letter in other cases, June 14, 1886.]

"DEPARTMENT OF THE INTERIOR.

"SIR: I send hereby enrolled bills as follows: * * * Please cause the same to be critically examined and report to this Department whether in your opinion any objections to their approval are known to exist. In cases where objections exist they should be specifically set forth.

"Very respectfully,

"H. S. MULDROW,
"Acting Secretary.

"The COMMISSIONER OF PENSIONS."

Does the President review the evidence for himself, asking the Senate for it? If he saw fit to do so, he could get the papers from the Senate, although we find it impossible for us to get public documents from the Executive when they are essential to the performance of public duty. We have asked for them and hunted for them carefully for some years and have failed to get them. If he asked he would readily get the additional evidence often in possession of the Pension Committees of Congress. These bills coming to him, enacted by both Houses of Congress, instead of reviewing them for himself or appointing some independent tribunal that has not already been overruled, he sends them back to the very source of the injustice that is complained of, and asks the Pension Office to say whether they can find any objection to the action of Congress, when that action is a re-proof of their inaccuracy or their own wrong.

February 6, all the papers on file in the Pension Office in this case were called for and sent to the Senate committee, and April 15 were returned to the Pension Office.

Being now in possession of the Senate report and of the papers from and after April 15, and of the enrolled bill from the President, and his demand for the facts, the Commissioner overhauls the performances of his subordinates in this case, and the following report of the evidence on file is the result. It will be observed that this document itself proves that it is made after the Senate action took place, and was known to the Commissioner, who personally examined this case, as a document printed herewith, containing, as it does, these words: "The papers were sent to the Senate Committee on Pensions February 6, 1886, and returned April 15, 1886."

[No. 335797. Newcomb Parker, Company K, Eleventh Vermont Volunteers.]

Claim was rejected November 10, 1885, on the ground that claimant is unable to prove that he contracted or had any disability in the service that he did not have prior to enlistment.

Soldier enlisted as private August 14, 1862, and was transferred to One hundred and twenty-ninth Company, Second Battalion Invalid Corps, December 31, 1863, at Clifburn Barracks, by reason of lameness from fracture of ankle-joint and flat foot. Discharged February 8, 1864, for disability.

Certificate of disability shows that he was discharged by reason of an "old irreducible dislocation and fracture of right ankle-joint, received at Fort Totten, District of Columbia, is unfit for duty in the Invalid Corps, and is discharged at his own request; disability, one-fourth."

Regimental records not on file.

Claimant alleges in declaration filed January 7, 1880, that about January 1, 1864, at Fort Slocum, District of Columbia, he had his right ankle dislocated by the falling of a stockade.

In deposition before special examiner he states that as near as he can remember, it was in October, 1863, at Fort Slocum, District of Columbia, a detachment of his company were engaged in strengthening the earthwork by driving a stockade. He was on top of the parapet handling one of the timbers, when he slipped and fell into the ditch, and the timber came down on him and crushed his right ankle. Was picked up by his comrades and taken to regimental hospital, which was between Fort Totten, where Company K was stationed, and Fort Slocum. Never had any trouble with his feet or ankle prior to enlistment, and has never received any injury to right foot or ankle since discharge, but admits an injury to left hip by being squeezed between two cars in 1873 or 1874. Was stripped and examined at enlistment.

Special examiner reports not reliable.

Moses Demarse, late private Company K, Eleventh Vermont Volunteers, testifies that in the fall of 1863, at Fort Totten, he had just come off of picket duty and he saw claimant lying in his bunk, and he had crutches made for him. He said, and they all said, that he was hurt coming off the bomb-proof at Fort Totten. He was all right when affiant went on pickett duty, and was lame when he returned. His ankle was not broken, for it was not in splints, but it was badly swollen, and a kind of black color and bruised. His foot was kind of flat when he enlisted, but he used it perfectly well, only it turned out a little more than the other. Can not say which foot it was.

Reputation good, by special examiner.

Nathan K. Martin testifies that he was a member of Company K, Eleventh Vermont Volunteers, and claimant seemed all right at enlistment, except that he had a twisted ankle and flat foot. Claimant was examined at enlistment at same time affiant was. Remembers that in the fall of 1863, when the defenses of Washington were being strengthened, claimant was at work, and in some way got his ankle strained. He was in line of duty. Does not remember the circumstances of the injury, only that he was at work on the fortifications.

Julius Gaudant testifies that he was a private in Company K, Eleventh Vermont Volunteers, and knew claimant from boyhood, but had not seen him for several years prior to enlistment. Did not notice that he had any trouble with his foot or a peculiar walk at enlistment. Remembers that late in the fall of 1862 (same year they went out) they were building stockade barracks, and in some way claimant got his foot, ankle, or leg hurt, and it made him lame for a long time. Did not see him when he was hurt, but did see him five minutes afterwards, and he said his foot or leg was hurt, and started away, limping. Claimant was made lame in 1862, and laid around camp for more than a year, doing nothing. Claimant's allegations were read to affiant, and he states that he does not remember the injury at all that way, and only recollects his statement above. Remembers that when claimant was hurt somebody said, "Newk's leg is broken;" and the boys said, "He is only fooling to get rid of work." But affiant did not afterwards, for he would not have kept it up so long, and he kept getting worse.

Allen S. Fleury testifies that he was a member of Company K, Eleventh Vermont Volunteers, and has known claimant ever since he was a child, and knows that as a boy and young man he was an active, athletic fellow, and never noticed any difficulty in getting around. Can not say from his own personal knowledge that claimant received any injury in the service; knows that he was transferred to the Invalid Corps for lameness, and that he was lame around camp for a considerable time before he was transferred. While he has no personal knowledge of how he became lame, yet there is an impression on his mind that he was hurt somehow at Fort Slocum in the fall of 1863. Whether that impression was made from facts within his own knowledge, or from having this matter talked up to him, he can not say.

At Fort Totten they used to play ball a good deal, and claimant was quite active; but there was a time when he did not play on account of lameness. Claimant's statement was read to affiant, and he states he does not remember any feature of the narrative.

"Good."

George H. Soules, late lieutenant, Company K, Eleventh Vermont Volunteers, states, in a reply to a letter from this office, that he remembers claimant was off duty at Fort Totten in 1863 on account of his foot and ankle being bad. As to his being sound at enlistment, knows that he was stripped and examined, and he supposed that was good evidence of soundness.

M. S. Lillie, late private Company K, Eleventh Vermont Volunteers, states, in reply to a letter from special examiner, that he remembers Parker, and was on duty with him when he was injured, and he never did any duty afterwards.

Thinks it was his hip or ankle that was injured by a small tree hitting him, but can not recall the particulars to mind.

The surgeons of the regiment have been corresponded with, but they fail to remember claimant.

Henry C. Hill, postmaster, Isle La Motte, Vt., testifies that he has known claimant since he was a boy, and prior to 1862 he seemed to have some trouble with his ankles and he had a flat foot. He walked with the right foot more turned than the left and it was flat, broken down in the instep so that there was no hollow; sold him boots from the time he was old enough to wear them until he enlisted, and he walked on the "inner side" of his feet, but he turned the right foot more than the other, wore it out on the inner side of the sole, and broke down the shank directly. It is reported that he has met with two or three accidents on the railroad since the war. He has no bias or prejudice in this matter.

Polly A. Goodsell testifies that she is claimant's sister, and that when he was a boy eight or nine years old he fell off a car and sprained his ankle; it was not broken, and he got well in a little while, and never was a cripple until he came home from the war. He never had a flat foot until he came home from the Army, and always wore his boots as straight as any of the other boys, and nothing was the matter with his feet when he enlisted; remembers of two accidents received since the war. Last winter he got jammed in coupling cars, and hurt his stomach, and about sixteen years ago he had his shoulders squeezed.

Elizabeth Parker testifies that she is claimant's mother, and that when he was about fifteen years of age, in attempting to get off a train while it was in motion the heel of his boot dragged along the ground as he hung on, and turned his right ankle and sprained it. In two weeks he was walking around again, and he never had any more trouble with that foot until he went into the Army. Both feet were alike when he enlisted, and he walked as well as ever he did; had no flat foot and did not break down the shank of his boot. He got doubled together on the cars about fifteen years ago and dislocated his right hip. Is certain that it was his right hip because we have spoken about it a good many times; that all the injuries he has received have been on that limb. Has noticed that his foot has changed since then.

He had a lump on his ankle as big as her fist when he came from the Army, but she did not see that his foot was any different from what it was when he enlisted; but since he got that hip hurt she can see a change in his foot, and it is flattened out and turned sideways. He has met with two other accidents on the railroad since, and both of them to the right limb, and of course that goes to affect the foot and ankle. He said when he returned that he was digging a trench at Fort Slocum, and fell in and broke his ankle. Knows the bones were broken because they had to straighten the ankle by bandages.

Ezra Fleury testifies that he has known claimant since he was a boy, and used to employ him a good deal. He always had a flat foot from boyhood, and a peculiar gait which gave him the appearance of slight lameness, but it did not interfere with him, and he was always ready to scuffle or wrestle with anybody who came along, and was an expert at it. Has seen him swimming, and seen his bare legs, and should say, so far as his ankles were concerned, he was a sound man in 1862.

The papers were sent to the Senate Committee on Pensions February 6, 1886, and returned April 15, 1886.

Medical examination by the Plattsburgh board, held August 6, 1885, shows as follows:

The internal malleolus of the right foot is extra prominent. Immediately below this malleolus is another bone, one of the tarsus, which is nearly as prominent as the malleolus. Below this other bone is a large callus of the integument. The ball of great toe and the internal border of the same toe are also the seat of hard calluses of the integument. The foot is everted so that he walks on the internal border of this foot. The arch of this foot is entirely obliterated. His boot shows that he walks constantly on the internal border. There is considerable motion of the ankle, and the motion of the toes is not interfered with.

Rated total for injury of right ankle.

So all that had been done in Congress had got back through the President into the possession of the Commissioner of Pensions, and thereupon he made a report, and a favorable report.

The wrapper or jacket in which the papers were kept has the following indorsement (we call especial attention to that which shows that a special act was pending):

Returned from S. C. (Senate committee) April 15, 1886.

[Indorsed on jacket.]

"No. 335797.
"Newcomb Parker; P. O., Rouse's Point, N. Y.
"Service: Co. K, 11th Vt. Vols.
"Enlisted July 14, 1862.
"Discharged Feb'y 8, 1864.
"Application filed Jan'y 7, 1880.
"Alleges dislocation of right ankle.
"Attorney: George L. Clark, Plattsburgh, N. Y.

Another of these "wretches" known as claim agents. This man is a leading member of one of the churches of the city, I happen to know.

"Nov. 19, 1885, Clark informed rejected; claimant is unable to prove any dis. in service he did not have prior thereto.
"June 22, 1886, date and cause of rejection to claim't through Hon. H. G. Burleigh.
"Ret'd from S. C. April 15, 1886.
"June 24, 1886, letter to Att'y Clark (see copy)."

In the indorsement of April 15 the letters "S. C." are used for "Senate committee" by the custom of the office, and indicate, of course, to any one examining the papers that the papers have been in the possession and on that date returned from possession of that committee.

June 24, the Commissioner makes the order indicated by the following paper now among the files:

"[335797. Newcomb Parker, Company K, Eleventh Regiment Vermont Volunteers.]

"Mr. MACK, *Chief, Eastern Division:*

"The honorable Commissioner directs that this claim be allowed under his ruling No. 181.

"EVANS, *Re-rev'r.*

"JUNE 24, 1886."

This allowance of the claim, this long report in favor of it, was made after two rejections, and after, in consequence of those rejections, this man had come to Congress, got his bill through Congress, gone to the President, and the President had sent it down to the Pension Office to see if they could not find some objection to it, and finding that there was objection they could make to it, to specifically note it in their reply. They make the examination, reverse all their former action, report in favor of the claim June 24, and the Commissioner orders the claim to be allowed June 24, 1886.

Prior to June 29 all these things have taken place at the Pension Office, the bill and the action of the Pension Office considered by the Executive, and on the 29th the President of the United States sends the following veto message to the Senate:

[Senate Ex. Doc. No. 194, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1077, without his approval.

To the Senate:

I hereby return without approval Senate bill numbered 1077, entitled "An act granting a pension to Newcomb Parker."

This claimant filed an application for a pension in the year 1880.

Before the passage of the bill herewith returned, the Commissioner of Pensions, in ignorance of the action of Congress, allowed his claim under the general law. As this decision of the Pension Bureau entitles the beneficiary named to draw a pension from the date of filing his application, which, under the provisions of the special bill in his favor, would only accrue from the time of its passage, I am unwilling that one found worthy to be placed upon the pension-rolls by the bureau to which he properly applied should be an actual loser by reason of a special interposition of Congress in his behalf.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June* 29, 1886.

Now note that all these things have taken place at the Pension Office, the bill and the action of the Pension Office have been considered, and on the 29th the President sends the veto message to the Senate, which is so like the form employed in the conclusion of the present veto message, which suggested this case to me, with very slight alteration. I call attention to the similarity in the conclusion of the veto message before the Senate and the one to which I have reference.

See the deadly parallel.

To the Senate:

I return without approval Senate bill No. 3306, entitled "An act granting a pension to Mary K. Richards."

The beneficiary named in this bill applied for a pension on the 14th day of November, 1878, and the same was rejected in April, 1879. Her claim has lately been re-examined, and since the passage of the bill herewith returned she has been allowed a pension by the Pension Bureau, it having been there determined that the former rejection was a manifest error.

With this action of the Pension Bureau I entirely concur.

I therefore venture, notwithstanding the persistent misrepresentations of my action in similar cases, to disapprove this bill upon the ground that this deserving beneficiary will receive under the action of the Pension Bureau a much larger sum than she would if such action was superseded by the enactment of the proposed special statute in her behalf.

GROVER CLEVELAND,

EXECUTIVE MANSION, *October* 15, 1888.

To the Senate:

I hereby return without approval Senate bill No. 1077, entitled "An act granting a pension to Newcomb Parker."

This claimant filed an application for a pension in the year 1880.

Before the passage of the bill herewith returned the Commissioner of Pensions, in ignorance of the action of Congress, allowed his claim under the general law. As this decision of the Pension Bureau entitles the beneficiary named to draw a pension from the date of filing his application, which, under the provisions of the special bill in his favor, would only accrue from the time of its passage, I am unwilling that one found worthy to be placed upon the pension-rolls by the bureau to which he properly applied should be an actual loser by reason of a special interposition of Congress in his behalf.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June* 29, 1886.

The following letter of the Commissioner, addressed to the committee, dated February 6, 1886, proves that as early as that date he was informed of the action going on in Congress; that from and after that date he was not in ignorance of the proceeding for a special act, and that up to that date, when he transmitted the papers to the Senate, nothing had been done in the way of reconsidering the case, and as a matter of fact nothing was done until in the month of June last.

"DEPARTMENT OF THE INTERIOR, PENSION OFFICE,
"*Washington, D. C., February* 6, 1886.

"SIR: In response to your request, I have the honor to transmit herewith the papers in the claim for pension of Newcomb Parker, late private of Company K, Eleventh Vermont Volunteers, original number 335797. The claim was rejected on the ground that the claimant is unable to prove that he contracted or had any disability in service that he did not have prior to enlistment.

"Very respectfully,

"JOHN C. BLACK, *Commissioner.*

"Hon. JOHN I. MITCHELL,
"*Chairman Committee on Pensions, United States Senate.*"

The Senate kept the papers until the bill was reported and returned to them April 15. During the time the papers were in possession of the Senate nothing would have been done by the Commissioner. The bill passed the House on the 12th of June. It was in possession of the House from and after its passage by the Senate, April 21, up to June 12. It was reported to the House some days earlier, on May 11, and after the House report was made the papers, if the House had called for them, would have been returned to the Pension Office. Accordingly, on the 12th of June, we find the Pension Office astir, as by the following appears:

"BOARD OF RE-REVIEW, *June* 12, 1886.

"[No. 335797. Newcomb Parker, Company K, Eleventh Regiment Vermont Volunteers.]

"Respectfully referred to the medical referee.

"Please look over this case and state whether, in your opinion, claimant's present condition is due entirely to injury of right ankle and flat foot, shown to have existed prior to enlistment; or whether, if it is accepted that he received an injury to said ankle in the service, you can separate the two, and rate for the disability which may be due to the service, as per Commissioner's ruling No. 181.

GEO. O. EVANS, *Re-reviewer.*

"Approved:

"F. W. POOR, *Acting Chief Board Re-review.*"

"[No. 335797. Newcomb Parker, Company K, Eleventh Regiment Vermont Volunteers.]

"MEDICAL DIVISION, PENSION OFFICE,
"*Washington, D. C., June* 14, 1886.

"Respectfully returned to Mr. Poor, acting chief board of rereview.

"To say exactly what degree of disability is due to the injury received before enlistment and to that alleged to have been received in service is impossible, but if the alleged injury is accepted legally, then it is, in my opinion, the duty of the medical division to separate the injuries received before and after enlistment, and grant a rating for the injury as legally accepted.

"GEORGE P. DU BOSE, *Medical Examiner.*

"Approved:

"P. H. BARTON, *Acting Medical Referee.*"

This completes the light thrown upon the subject by the records, except as by the following unsigned document, which comes to us among the files:

"[No. 335797. Newcomb Parker, Company K, Eleventh Vermont Volunteers.]

"DEPARTMENT OF THE INTERIOR, PENSION OFFICE,
"*Washington, D. C., June* 23, 1886.

"SIR: In reply to your communication of recent date relative to the above-entitled claim, I have the honor to state that I have caused the evidence to be carefully examined and have personally considered the same.

"You are informed that the case is now under consideration with a view to its allowance, and certificate will be issued as soon as the exigencies of the work of this office will admit.

"Very respectfully,

"——— ———, *Commissioner.*"

"GEORGE I. CLARK, 916 *F street, City.*"

Now, we submit in this connection the French proverb that "he who excuses accuses," and also the legal maxim, "unusual clauses always induce a suspicion." With all the rest, why does the President in his message suppress the fact that this claim had been formally rejected by the Pension Office, so that the claimant had no remedy but in the interposition of Congress? Why does he take pains to say that "in ignorance of the action of Congress" the Commissioner had allowed the claim under the general law? Why does he proceed to express his anxiety to save the claimant from the loss of arrears of pension by the action of Congress when such action would have no such effect, not in the least impairing his right to the allowance of the arrears, save by the force of a recent unaccountable ruling of the present Commissioner, reversing all previous practice and violating all equity, and, we believe, all legal right, made apparently as a punishment to those who dare to apply to Congress for relief, no matter what the outrage they may have suffered in the toils of the office?

Why does the President so write this message as to place Congress (whose action was based upon the rejection of the claim by the Commissioner), himself, and the Commissioner before the country in a light favorable to himself and the Commissioner and unfavorable to the legislature of the country?

Can any one believe that the Commissioner of Pensions reversed his own deliberate action rejecting this claim without a particle of further evidence or any trace of reason save as the result of the proceedings in Congress, of which it is simply absurd or worse to deny his knowledge, or at least knowledge of those who reviewed and reversed his previous action, and allowed this claim just in season to enable the President to write this peculiar veto which places Congress in the attitude of inflicting hurt to the claimant by its meddlesomeness?

The President could not have been familiar with the facts in this case; all he knows of them comes from the Commissioner of Pensions or from his office.

Who told him that the Commissioner had reversed the rejection and allowed the claim in ignorance of the action of Congress? That assertion must have come from the Commissioner, for no one else could have known of his want of knowledge. The Commissioner decided June 23 to allow the claim. June 21 the enrolled bill went to the President. Was the enrolled bill in possession of the Commissioner before he decided to allow this claim? However that may be, is it conceivable that, with the office stirred up by this pension controversy and the constant watchfulness of the office over the proceedings of Congress and the correspondence going on between committees and the office, the overhauling and transmission of files, and the special attention thus called to each case, besides the public proceedings, reports, passage of bills recorded in our Congressional daily, which goes in numbers to all Executive Departments, to say nothing of the omnipresent newspapers of the land, that the eyes of the men who do the work in the office were not fixed upon their unjust and unreasonable decision in this case, and that whether or not those who were urging the claim in Congress called the attention of the Commissioner to it, the allowance of this claim is not wholly due to the action of Congress and not "in ignorance" of that action?

There can be no good cause assigned for this ruling of the Commissioner, refusing, by reason of special acts, the right to prosecute under the general laws for arrears justly due, except in the few cases where Congress makes express or plainly implied provision that the pension granted is in lieu of all claims whatsoever. Even then, when the claim is for a vested right under existing and general laws, which is the fact in this and nearly all other cases, the action of the legislative power would fail, for a vested right can not be taken away by act of Congress, and pensions due by virtue of laws existing when the contract of enlistment should be held to be, in effect, vested rights protected by all subsequent legislation.

In closing this report it is proper to observe, as the result of a careful re-examination, that in the whole twenty-five vetoes of special pension acts, originating in the Senate, not one "bogus," or fraudulent, or ill-considered claim, so far as Congress is concerned, has been developed. Nor, in the belief of your committee, is there one, except the case of Mrs. De Krafft, in which there was a clerical error in the bill, doing no one any harm, in which the defeat of the pension by the exercise of the veto power has not worked great wrong, and in most cases, suffering to the soldiers or their dependent and needy relatives in whose favor the Congress had exercised the legislative power.

This report is prepared and submitted under the following order of Senate committee:

"At a regular meeting of the Committee on Pensions, June 29, 1886—

"*Ordered*, That the several veto messages of the President be referred, respectively, to the members of the committee who reported the bills vetoed, with instructions to examine and report the same back to the Senate, submitting any questions to the committee for advice and re-examination which they think necessary, and that any member of the minority of the committee have leave to present dissenting views."

I think this report, made upon just such a case as I presume that before the Senate to be, so far as the claim of the President is concerned, is pertinent and should go along with the message of the President, which is made part of the records of the country.

I wish in this connection to have printed the first, second, third, fourth, and part of the fifth pages of Senate report No. 1424, Forty-ninth Congress, first session, being the general report made by the Committee on Pensions, or made by myself by their direction upon the pension vetoes which were referred to the committee. It is the general matter preceding the reports upon a large number of vetoes of Senate bills in the last Congress:

Mr. BLAIR, from the Committee on Pensions, submitted the following report, to accompany bill S. 2005, returned by the President with his objections thereto.

The Committee on Pensions, to whom was referred the message of the President returning Senate bill 2005, granting a pension to Mary J. Nottage, widow of Thomas Nottage, late a sergeant of Company F, Third New Hampshire Volunteers, with the Executive disapproval, have considered the same, and have re-examined and reconsidered the evidence in support of the claim of this soldier's widow for a pension.

The committee report the veto message back to the Senate and recommend the passage of the bill, the President's objections to the contrary notwithstanding.

It is said that never since the foundation of the Government has there been an Executive veto of a private pension bill, save in a single instance, until the present session. How that may be is of no consequence, but so great has become the number of such vetoes interposed by the present Executive, all within a few weeks past, and so extraordinary the censure, sometimes rudely expressed, and in nearly every instance severely implied, of the action of the two Houses of Congress and of their committees, upon whom has devolved the wearisome and generally unappreciated labor of investigating these claims, accompanied in many cases by such ridicule of, and evident disgust with, the claims themselves, that your committee feel that they are justified in a brief review of the circumstances involved.

In doing this a strong effort will be made to restrain a not unnatural feeling of indignation, which, if permitted to assume the proportions which the provocation justifies, would wholly destroy those respectful forms of expression which must be maintained in official intercourse between the different officers and Departments of the Government. This becomes the more necessary in proportion as it is rendered the more difficult by reason of the unjust and unexampled style in which some of the messages of the President are expressed. It shall be the effort of the committee to get on in this difficult matter without violating the courtesies of official intercourse by imitating an example which, so far as we are aware, is without precedent and which, so far as we are concerned, shall remain so.

We have caused an examination of the files of the two Houses of Congress to be made, and we think with a substantially accurate result, including the first session of the Forty-ninth Congress from its commencement to the 26th day of June.

There have been 3,788 bills for private pensions, or for increase of private pensions already granted, introduced in the House, and 764 in the Senate; 530 House bills and 88 Senate bills have passed both branches and gone to the President for his approval.

The President has vetoed so far forty-five House bills and twenty-three Senate bills, or 25 per cent. of the Senate bills and 8½ per cent. of the House bills which have been submitted for his approval. These vetoes have been accompanied with declarations of distrust of the merits and good faith of the mass of other legislation which he can not veto for want of time.

It is necessary to state the facts, although your committee is not insensible to the special condemnation with this disparaging contrast between the proportion of Senatorial ill-work as compared with that of the House inflicts upon them. Each House, however, is responsible for every bill which reaches the Executive. The actual work done in the way of passing bills by the Senate is as follows: House bills passed by the Senate 530, Senate bills 292. There would seem to be unacted upon or rejected by the House of bills introduced in the House about six-sevenths of the whole number, while the Senate has acted favorably upon about three-eighths of the whole number of bills originally introduced in that body thus far during the session.

It will also be observed that but a small proportion of those introduced are reported by either House. It is, in fact, impossible to investigate them generally and fully, and it is all that mortal strength can perform to act upon those which are believed to be clearly just. It is but an idle waste of time to write up adverse reports, as a rule, and only those who have comparatively little else to do can spend time in making reports against doubtful claims which are likely yet to be made good ones by testimony which may be produced later in the same or in subsequent sessions.

We observe further, that whatever may be said to the contrary, it is very seldom that a member of the House or Senate will introduce any bill in the slightest degree tainted with fraud. Very few bills are introduced without some knowledge of their merit on the part of those who introduce them.

A computation as careful as your committee is able to make without the full examination of each bill—and even if that were done it would still remain to deduct the pension already being paid in cases of increase (a very large proportion of the total named in the bill)—satisfies the committee that up to this date, June 26, the whole amount of money called for annually by all the private pension bills passed by Congress this session, including those struck down by the President, the character of which will appear further on, is not more than $150,000, and $200,000 would cover the total possible raid by Congress had it been permitted to pursue its scandalously extravagant career unchecked to the end of the session. The vetoes have covered not far from $20,000, or perhaps $25,000, and applicants for special relief are expected to know better than to press Congress and the President further for a redress of their wrongs.

These sums of money are not to be despised by this nation, but it would be a comfort to know that it rightly belongs to us—or, at least, that if withheld wrongfully it did not cost health and life to those and the dependent relatives of those whose valor and sacrifices preserved our institutions and made the official existence possible which has saved this cash to the surplus in the Treasury. The present population of this country is at least 60,000,000 souls, and our wealth not less than $60,000,000,000. We have also, let us feel grateful to Providence, a most encouraging prospect for the future.

Much criticism has been indulged in by the President of the methods of legislation pursued by the two Houses of Congress, and however uninformed he may be upon the subject, and however unintentionally by reason of want of knowledge he may have misrepresented to the country the methods of legislation which have been pursued in like cases ever since congresses and parliaments have existed, and which have, since parliaments became free, been safe from kingly and presidential interference, all the same the people are misled by the unwarranted statements of the President as to the manner in which legislation upon pensions, claims, and the like is, and of necessity must be, conducted.

A claim or a private pension act can be discussed in committee and debated in the Senate as long as an appropriation bill; and therefore the conduct of affairs compels on the part of Congress, if not on the part of any other department of the Government, some attention in the division of time and labor to the relative importance of the interests involved. Pension claims always require the investigation of questions of fact and appeal to motives of justice, humanity, gratitude, sound public policy, patriotism, admiration for noble deeds, the love of glory, and the perpetuation of the Republic. It is not necessary that this investigation of the facts be made by a full jury of 76 Senators, nor by the whole 325 members of the House of Representatives, nor by both Houses in full assembly concurring. It is essential that at least one capable and honest mind should examine thoroughly each case in each House of Congress, and in all cases of doubt and difficulty or of unusual features that the committee and the House should do the same.

That we aver to be the usual and ordinary course of the transaction of the pension business of the Senate, and to have been so during the session, all statements to the contrary notwithstanding. The printed reports of the committee have been on the personal files of every Senator for days, and in some cases for months, on all the bills which have been passed by the Senate. Alert objectors from the ablest Senators not on the committee have watched its work and the progress of these bills through the Senate, objecting and discussing whenever they believed there was cause to do so in the careful and proper discharge of their duty. And if formal headings and phrases common to all bills have been sometimes omitted, and in consequence of long delays there have been, when an opportunity finally came, many cases rapidly passed when there was no ground for opposition, it was only a convenient dispatch of public business, hurtful in no way, usual always, and to be commended by any intelligent observer.

The pension business of the Senate has never been better done than during this session. Those members of the committee who have performed the most have been as careful as any, and derision of their patient, conscientious, and exhausting labors to help along these noblest and best portion of God's poor and the country's benefactors can originate only in a wise and noble nature which is misled, or in one that, if informed, sadly needs reconstruction or re-creation.

There has been from year to year an accumulation of this work, and both Houses of Congress have this session made great exertions to perform that which came from their predecessors as well as the increase from more recent rejections by the Pension Office, together with new cases arising outside the jurisdiction of that institution.

Still the President is wrong when he attempts to stigmatize the industry of this Congress as a reckless and scandalous disregard of public duty and waste of the public treasure, and says that there have already been three times as many pension bills passed as at any former session; but we are informed that 381 such bills were passed in the second session of the Forty-eighth Congress—a short session—nearly two-thirds instead of one-third as many as during the present session. Not very important, to be sure, but when a dazed Congress is struggling to preserve a decent reputation it may be justified in pointing out an occasional error on the part of the accuser.

The files of papers in these vetoed cases, which are now in possession of your committee, contain the letter of the Assistant Secretary of the Interior, under date of June 14, 1886, stating that he incloses enrolled bills as follows, enumerating 118 House bills and 11 Senate bills, and instructing the Commissioner of Pensions as follows:

"Please cause the same to be critically examined, and report to this Department whether, in your opinion, any objections to their approval are known to exist. In cases where objections exist they should be specifically set forth."

This indicates, of course, unmistakably that the President relies upon the Commissioner for his facts.

Any one who knows the prolonged and critical examination required would at once discredit the pretense of thorough personal investigation in the large number of cases which go to the Executive. It is, of course, impossible.

In every, or nearly every, vetoed case, Congress, by the action of both Houses, has overruled the action of the Commissioner of Pensions. Thereupon the President calls upon the Commissioner, whose physical condition is well known, to sustain the action of his office, and he naturally does so to the best of his ability. It should not be forgotten that oftentimes the reports of the two Houses contain severe and deserved reprimand of the action of the Pension Office.

Why the President should initiate this game of shuttlecock and pelt a coordinate department of the Government with vetoes based upon the review of the action of Congress by some subordinate of the Commissioner of Pensions is a topic which will bear thought, but perhaps may be left without discussion. Why the finding of the two Houses of Congress should be discredited and attributed to unworthy motives, indifference, or incapacity, while the reassertion by the pension clerk that he is right and Congress wrong is accepted as the basis of fact in these numerous vetoes, it is hard to perceive. But all through these vetoes there seems to run the fallacy that the power of Congress to grant pensions is limited to what may already be done by the Pension Office under the general law.

It is difficult to write in that rudimentary way upon the nature of pensions and the various grounds of compensation, charity, and public policy which is necessary in order to remove this impression. It is sufficient to observe that the jurisdiction of the legislative power of this Government is larger than that of the Commissioner of Pensions, and that sooner or later, although it may cost the country a prolonged and steady effort, this truth will become apparent.

But it should be remembered that in a very large number of these bills passed by Congress important original written evidence is filed with the committees or presented verbally, as in hearings before other committees upon all public questions which come before legislative bodies; and often the applicant is present with his statement and his palpable disabilities. This evidence is not available to the Executive, at least without the asking, and never has been in possession of the Pension Office. Consequently, in nearly every case the Congressional statement stands upon stronger proof than the finding of facts which the President sets up in disapproval of the bill.

The several pension bills vetoed by the President, with the evidence in each case, have been re-examined by the member of the committee who submits this report, and it is his belief that in every instance—twenty-three in number—the veto of Senate bills granting relief to claimants of pension has wrought injustice to them, and that the statement of facts submitted by the Senate committee in support of the bills was true upon the evidence, and that the statements of fact in the veto messages, so far as they conflict with finding of Congress, is untrue and wrong. Such brief notes upon each case as may facilitate further examination of the evidence, together with the Senate report and the veto of the President, are herewith submitted.

Further and more particular reports in the several cases will be submitted by

the members of the committee to whom the bills are referred, or in the Senate when they are called up for action.

In the particular case—that of Mary J. Nottage—in which this general report is respectfully submitted, there is a reprint of the evidence, that there may be a full opportunity for the people to examine and judge for themselves on the premises. This case is selected because of the comparative brevity of the testimony, and is by no means one of exceptional merit or hardship.

In this connection I ask leave to have printed the special report accompanying the case of Harriet Welch and James E. O'Shea. There are many others, but I can not cumber the RECORD to too great an extent:

No. 5.—HARRIET WELCH.

The principal facts upon which this claim is based are set forth in the previous report of this committee, which is hereto appended. The reason alleged by the Pension Office for the rejection of this claim is that the death of the soldier did not result from the service. The following newspaper account of his death appeared at the time:

"Syreannous Welch (or Deuney, as he was generally called), a veteran and pensioner of the last war, was killed on the track of the Wisconsin Central Railroad, about 4 miles north of this place, on Wednesday night or Thursday morning last, and was mangled in a fearful manner, his head having been cut into just above his eyes and his brains scattered along the track. He had been to Green Bay attending to some business relating to his pension and returned on the 11 p. m. train. He was known to have left Hilbert, but was not known to have ever reached Chilton, and it is supposed that he fell from the 11 p. m. train and was lying on the track when the 1 a. m. train going north killed him. An inquest was held by Esquire Green, of this city, and a verdict rendered in accordance with the facts. The deceased was an industrious and hard working man and was an engineer at Zech Brothers' mill, and leaves a wife and seven small children to mourn his loss."

No question is raised as to the legality of the marriage, which seems to have resulted in long cohabitation and the birth of seven children. The claimant was married to the soldier June 7, 1868. There is nothing in the evidence to justify the slur which the President casts upon the chastity of this widow and the legitimacy of her seven fatherless children. Pensions have heretofore frequently been granted in cases similar to this. Human nature cries out aloud for the allowance of pension in such a case, and if this woman, with her seven small children, is to be deprived of it, your committee at least are glad that the responsibility rests elsewhere.

We print the Senate report and the veto of the President, and recommend the passage of the bill, the veto to the contrary notwithstanding.

[Senate Report No. 293, Forty-ninth Congress, first session.]

Harriet Welch is the widow of Syreannous Welch, private Company C, Thirty-eighth Regiment Wisconsin Volunteer Infantry, who was pensioned for gunshot wound of his left leg, received in the military service and in the line of his duty. The rate of pension was increased from one-half to three-quarters because of increasing disability in the wounded leg. Again applying for increase of pension, he was directed to report for examination before the examining board of surgeons convened at Green Bay, Wis. Returning from Green Bay, Wis., he fell from the cars and was killed, September 7, 1877.

John Harmer filed affidavit May 22, 1884, that "soldier's leg was so crippled that he could not depend upon it, and that it gave way many times and caused him to fall." That it is his belief in attempting to pass from one car to another while returning from Green Bay his leg gave out and caused him to fall between the cars, when he was crushed to death.

In view of all the facts, the committee believe it to be their duty to report in favor of this bill, and recommend its passage, with the following amendment: Strike out in the seventh, eighth, and ninth lines the words "at the rate of $8 per month, and $2 per month for each of her children under the age of sixteen years," and insert "and her minor children" in lieu thereof.

To the Senate:

I return without approval Senate bill No. 1333, entitled "An act granting a pension to Harriet Welch."

The beneficiary named in this bill asks for a pension as the widow of Syreannous Welch, who was wounded in 1864 while in the service, and was pensioned therefor in 1867. In 1876 his rate of pension was increased. In 1877 he appears to have applied to have his pension again increased. It is alleged that upon such application he was directed to appear before an examining board or a surgeon at Green Bay., Wis., for examination, and in returning to his home from that place on the 7th day of September, 1877, he fell from the cars and was killed, his remains having been found on the track the next morning.

No one appears to have seen the accident; but it is claimed that he could not depend upon his wounded leg and that it "gave way many times and caused him to fall." From this statement the inference seems to have been indulged that his death was attributable to the wound he had received thirteen years before.

The widow's claim based upon this state of facts was rejected by the Pension Bureau on the ground that the accident resulting in death was not the result of his military service; and on an appeal taken to the Secretary of the Interior from that determination the same was sustained.

Though this widow admits that prior to her marriage with the deceased soldier she had married another man whom she could only say she believed to be dead, I believe her case to be a pitiable one and wish that I could join in her relief. But unfortunately official duty can not always be well done when directed solely by sympathy and charity.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June* 22, 1886.

No. 14.—JAMES E. O'SHEA.

A re-examination of the evidence in this case satisfies your committee that the original report made by them is just, and that the statements therein are fully borne out by the testimony. It would seem that this soldier was a very brave and trustworthy man, a scout and prisoner of war, who rendered dangerous and most efficient service. He has many wounds and is a completely broken-down man. We have seen him. He is now in the Soldiers' Home in this District. Instead of being a deserter the records prove that although tried he was found "not guilty." The report of this committee is right, and the sneers of the veto uncalled for. Apparently there can have been no examination whatever of the evidence by the author of the veto in person. To veto this brave and patriotic soldier into history as a deserter in addition to all the rest is a carelessness to say the least of which your committee has not been guilty. Here is food for thought and an opportunity for reparation.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE.
Washington, March 12, 1886.

MY DEAR BOB: The bearer, James E. O'Shea, is an old soldier of the Volunteer Army. From a careful examination of his case I am satisfied that he has been unjustly treated, and if you can do anything to assist him until his case (application for pension) in Congress is settled, it will be appreciated and fully deserved.

He was charged on the records with desertion. I found the facts to be that he was tried for desertion, but found not guilty. I therefore removed the charge, and his bill will doubtless pass both Houses of Congress in due time. General Logan, I understand, has charge of it.

Yours faithfully,

THOMAS WARD,
Assistant Adjutant-General, United States Army.

Capt. ROBERT CATLIN,
Deputy Governor Soldiers' Home, Washington, D. C.

DECEMBER 19, 1885.

To the Governor of the Soldiers' Home, Washington, D. C.:

Your petitioners would respectfully represent that the bearer of this petition, James E. O'Shea, late of Company F, Twenty-third Illinois Volunteers, is an old soldier who is trying to get a pension by reason of disabilities which he claims were contracted while doing duty as a soldier. He is in very needy circumstances and is a worthy man.

We respectfully ask that you will admit him to the privileges of the Home while he is prosecuting his claim for pension.

THOMAS WARD, *A. A. G.*
CECIL CLAY,
Bvt. Brig. Gen., U. S. A., Chief Clerk Dept. of Justice.
JOHN W MAHAN,
Formerly Major Ninth Mass. Vols., and Bvt. Lt. Col. U. S. V., Vice-Pres., representing Fifth Corps Society Army of Potomac, 1878.

I concur.

JNO. A. LOGAN.

We print the Senate report and the veto:

[Senate Report No. 607, Forty-ninth Congress, first session.]

The committee ascertain from the record report that this claimant enlisted in April, 1861, and was discharged in October, 1864. He asks to be pensioned for disability, occasioned by a gunshot wound in the leg, which was disallowed on the ground of want of evidence that he received the wound in the line of duty. The examining surgeon finds the wound, and describes the entrance and exit of the ball; also, a wound or scar in the head, and the nearly total loss of sight of one eye. The report of the Surgeon-General shows that the soldier was in hospital more than once, but the record does not give the cause for which he was treated. The Adjutant-General's report shows that the man was under discipline for some irregularities, but, notwithstanding this and the lack of the required proof that he was wounded in the line of duty, the committee are of the opinion that, situated as he was, he was very liable to, and very probably did, receive the wound from which he had suffered and is still suffering.

The fact that the records of the War Department are often imperfect works great hardship to men who apply for pensions, and where there is reasonable proof to substantiate a claim the committee are of the opinion that the absence of record testimony should not deprive him of relief.

Inasmuch as there is proof that the soldier received the wound, and that he is badly disabled from it and other causes shown by the medical examiners, and that he is old and destitute, the bill is reported favorably with a recommendation that it do pass.

[Senate Ex. Doc. No. 161, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 337 with his objections thereto.

June 3, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

I return without approval Senate bill No. 327, entitled "An act granting a pension to James E. O'Shea."

From the report of the committee to whom this bill was referred I learn that the claimant enlisted in April, 1861, and was discharged in October, 1864.

He filed a claim in the Pension Bureau alleging that he received a saber wound in the head March 7, 1862, and a gunshot wound in the left leg in the autumn of the same year.

It appears upon examination of his military record that there is no mention of either disability, and that he served two years after the time he claims to have received these injuries. So far from being disabled, it is reported as an incident of his Army life that in the year 1864 this soldier was found guilty of desertion and sentenced to forfeit all pay and allowances for the time he was absent.

The report of the committee, in apparent explanation of the lack of any official mention of the injuries alleged, declares that "the fact that the records of the War Department are often imperfect works great hardship to men who apply for pensions;" and his conviction of desertion and the lack of proof to sustain his allegations as to his injuries are disposed of as follows in the committee's report:

"The Adjutant-General's report shows that the man was under discipline for some irregularities, but, notwithstanding this and the lack of the required proof that he was wounded in the line of duty, the committee are of the opinion that, situated as he was, he was very liable to, and very probably did, receive the wound from which he suffered and is still suffering."

I am convinced that there exists serious difficulty on the part of the claimant, instead of in the record of the War Department; that the kind of irregularity for which he was under discipline is calculated to produce a lack of confidence in his merits as a pensioner; and that the fact of his situation being such as to render him liable to receive a wound is hardly sufficient to establish his right to a soldier's pension, which is only justified by injuries actually received and affirmatively proven.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June* 2, 1886.

Taking the case of James E. O'Shea, I will say, notwithstanding all the trouble we had about it since the last Congress, this faultless institution, the Pension Office of this country, has taken it up again and allowed the pension to James E. O'Shea from the beginning.

I shall ask consent to put in another case like the case of James E. O'Shea, if I can find the name. After having been passed by Congress and rejected by the Executive veto in the Forty-ninth Congress, it has been passed again in both branches of the present Congress, and has been signed by the President; and, as I have been informed by those who have examined the case, there is not a single particle of additional or different evidence from that which existed years ago, and which was upon the files of the Pension Office for years.

I also ask leave to insert the case of J. D. Haworth, on page 47 of the report:

No. 15.—J. D. HAWORTH.

A careful re-examination of the evidence in this case will convince any fair mind that the report heretofore made by the committee (Senate Report No. 633)

does not state the claimant's case as strongly as it should be. The ground alleged for the rejection of this case is that the disease of the eyes from which claimant suffers existed prior to enlistment. In regard to that we are of opinion that although there may have been a hereditary tendency to weakness of the eyes, yet it appears clearly that the serious development of this trouble was almost wholly attributable to his service, and that it has continued ever since. The soldier rendered long and faithful service, and the rejection of his claim on the ground that the disability was contracted before entering it works exceeding hardship and injustice. This man is old, poor, and blind, and the country which he served so well and faithfully ought to help him in this extremity. It will help him if there is any soul left in it.

We append hereto in further explanation the petition of his citizens and comrades respecting the veto, as well as the Senate report containing a statement of the facts, and the message of the President.

HEADQUARTERS CHARLTON POST, No. 143, G. A. R.,
Richland, Iowa, June 14, 1886.

Whereas a bill pensioning our comrade, James D. Haworth, has passed both branches of Congress; and

Whereas Grover Cleveland, President of the United States, has vetoed the same, thus depriving a worthy, honored, and a deserving ex-soldier and comrade of the benefit of the action of the said Congress, which is his just dues; and

Whereas we, as citizens and comrades, have known said comrade, James D. Haworth, intimately and well, some of us from a time dating before the late war, and believing that a great injustice has been done our comrade, leaving a stigma upon his character, that of perjury: Therefore, be it

Resolved, That we earnestly condemn the action of the President in said veto, and believe that he was not properly informed in the case; that we ask, and earnestly insist that the United States Senate and House of Representatives, and each member thereof, to use their best endeavors to pass the same over the veto of the President that justice may be done to our comrade, neighbor, and friend, who served in the Army for three years.

Resolved, That comrade James D. Haworth has our permission to furnish the Senate Committee and Committee of the House on Pensions, also such members of Congress, a copy of these resolutions at his pleasure.

Unanimously adopted by Charlton Post No. 143, June 14, 1886.

S. E. JOHNSON, *Commander.*
Attest: LEWIS HORTON, *Adjutant.*

[Senate Report No. 633, Forty-ninth Congress, first session.]

That the records in this case show that the claimant was a sergeant in Company H, Thirty-third Regiment Iowa Volunteers, and that he served with the regiment until about the month of April, 1863, when he began to complain of "sore eyes," and was treated for sore eyes by Assistant Surgeon William Scott, of the Thirty-third Iowa Volunteers, and that he excused claimant from duty at Little Rock, Ark., in the spring or summer of 1863, because of "blindness in right eye and weakness of left eye;" and there is evidence to show that he did not continue in his regiment after this time, but was transferred to Company H, Twenty-first Regiment, Veteran Reserve Corps, where he remained until the expiration of his term of service, when he returned to his home.

Declaration for pension filed February 20, 1879, in which claimant alleges "sore eyes, with complete loss of right eye, and injury to the left eye." Claim rejected November 4, 1880, on the ground that there is "no satisfactory proof that the affection of the eyes is due to disability arising from service, but existed prior to service."

The affidavits of the claimant's mother, two sisters, and a brother, clearly show that the claimant could not see out of his right eye from early childhood, and was called "blind" in that eye, although their testimony shows that he could see a little out of that eye, but not much.

One sister testifies that claimant did use an "eye-water" to bathe his eyes with occasionally when they became "sore," and that it was the same eye-water as his father used, who was said to have the same trouble with his eyes.

It appears from the testimony, therefore, that the claimant had "sore eyes," and that the sight of the right eye was much impaired even in childhood, so that it can not be said that the disease originated from causes growing out of the service.

There is abundance of testimony to show that the claimant's eyesight has failed since he entered the service, and is not now as good as it was before he enlisted.

The committee believes that it is the object of the Government to pension all who are deserving and who have been impaired in health by faithful services performed, and it is shown by the record that claimant is not able to perform manual labor, and often requires help to enable him to get about, and that in consequence of his infirmity he is very poor. It is also shown that the disease is steadily progressing and it will not be long before claimant may become totally blind.

Taking into consideration the evidence on file in this case, your committee believe it to be their duty to report in favor of this bill and recommend its passage.

[Senate Ex. Doc. No. 158, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1253, with his objections thereto.

May 28, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

I hereby return without approval Senate bill No. 1253, entitled "An act granting a pension to J. D. Haworth."

It is proposed by this bill to grant a pension to the claimant for the alleged loss of sight in one eye and the impairment of the vision of the other.

From the information furnished me, I am convinced that the difficulty alleged by this applicant had its origin in causes existing prior to his enlistment, and that his present condition of disability is not the result of his service in the Army.

GROVER CLEVELAND.

EXECUTIVE MANSION, *May* 28, 1886.

Mr. President, the tariff can wait until another year, if necessary, but I want to speak upon this assumption of kindness and virtue on the part of the Executive and the Pension Office. I will do the Pension Office the justice to say that I think in many respects they have transacted their business with commendable celerity and for the benefit of the soldiers of the country. There are undoubtedly abuses, and many of them, I think, are very great abuses, which have not yet been reformed. But I believe that the management of the office has been conducted in some respects for the direct purpose of political advantage. If necessary, I will give my reasons for that, but I think the country understands it; and if I have done anybody any injustice I will be the sufferer and not the Department. Many of the claims to superior merit are unfounded, with no right to special credit, and I think while the present Commissioner, a man of energy and vigor, has administered his office well and efficiently in many respects, he has done as well for his party as he has for the soldiers.

The President and the Democratic party set up an incessant clamor that by reason of having signed so many of these bills the President has demonstrated an exceedingly and unusually friendly animus toward the soldiery of the country, the men who preserved the Union by their valor, their sacrifices, and oftentimes by their lives. But it is to be considered with reference to these special acts, first, that they had been accumulating for years; that the rejections had been accumulating for years; that efforts had been making for a long period of time to get reviews and more favorable action, and at last these cases came in a large body to the Houses of Congress. It is true that for a long time they failed to be considered with favor, but they are now considered in the Senate committee by both parties as represented on that committee. I take pleasure in saying—it is nothing but an act of justice to the Senate committee as now constituted—I think its members of both parties act with friendly feeling and just favor toward pension claims and in pension legislation. I express this feeling, not that it is a compliment to anybody, for it is simply a discharge of duty, but I think it an act of justice to the Senate committee as it is now constituted of both parties.

But this has not always been so. In the last Congress, the Forty-ninth Congress, when the flood of claims came to us which had been rejected year after year or failed to be in anywise acted upon, the illness of the chairman of the committee cast upon me the labor of acting chairman. I determined that those bills should be acted upon. We proceeded to do it, and it was from impulses emanating from that committee-room that these numerous cases found their way to the Presidential mansion and the great number of vetoes took place of cases as meritorious as those that were signed, and a large number were signed and did meet with the Executive approval. But the vetoes and the approvals were without discrimination as to the merits of the claims.

I wish to read now a statement of the number of reports made by the members of the Committee on Pensions of the Forty-ninth Congress:

By Mr. SAWYER, 542.

He stands pre-eminent in the list. His work is a monument more to be desired than the one of Washington; a monument which will endure for all time in the gratitude of the defenders of our country.

Reports made by Committee on Pensions, Forty-ninth Congress.

Mr. Sawyer	542
Mr. Blair	363
Mr. Sewell	108
Mr. Van Wyck	80
Mr. Aldrich	23
Mr. Mitchell	17
	1,133

It is proper to say that the Senator from Pennsylvania [Mr. Mitchell] was sick nearly all the time, and the Senator from Rhode Island [Mr. ALDRICH] was very largely engaged on another committee. The reports made by Republican members of the committee aggregate 1,133, while those made by the Democratic members were as follows:

Mr. Whitthorne	30
Mr. Camden	10
Mr. Jackson	7
Mr. Colquitt	3
	50
Total	1,183

I have here a statement which covers like data for several Congresses. It is not all of it so unfavorable to the Democratic efforts to pass these bills—some of it is perhaps as much so—but I read the list for the last Congress because that is the Congress which has been particularly criticised, and I know the evil, if it be one, originated in the Senate committee-room, and that I am myself responsible to a considerable extent for this work, whatever be its desert.

Statement of private pension bills reported by the Committee on Pensions, United States Senate, during the Forty-sixth, Forty-seventh, Forty-eighth, and Forty-ninth Congresses, and the first session of the Fiftieth Congress.

By Democratic members of the committee:	
Forty-sixth Congress reported	235
Forty-seventh Congress reported	192
Forty-eighth Congress reported	198
Forty-ninth Congress reported	50
Fiftieth Congress reported	285
Total	960
By Republican members of committee:	
Forty-sixth Congress reported	179
Forty-seventh Congress reported	155
Forty-eighth Congress reported	637
Forty-ninth Congress reported	1,133
Fiftieth Congress reported	702
Total	2,806

In regard to pension legislation that has been proposed and that has been enacted during the last Congress and the present Congress, comprising a period of time covered by the Democratic administration, I have in my hand a list of all the important bills, I think of all the bills of a general character, which have been introduced.

A bill (S. 2263) to amend the pension laws, and for other purposes.

Passed the Senate but failed in the House.

A bill to amend the pension laws, and for other purposes.

Be it enacted, etc., That the act entitled "An act relating to claim agents and attorneys in pension cases," approved June 20, 1878, is hereby repealed.

SEC. 2. That sections 4768, 4769, 4786 of the Revised Statutes are hereby made applicable also to all cases filed with the Commissioner of Pensions since June 20, 1878, and which have not been heretofore allowed.

SEC. 3. That section 4785 of the Revised Statutes is hereby re-enacted and amended so as to read as follows:

"SEC. 4785. No agent or attorney or other person shall demand or receive any other compensation for his services in prosecuting a claim for pension or bounty land than such as the Commissioner of Pensions shall direct to be paid to him, not exceeding $25; nor shall any agent, attorney, or other person demand or receive such compensation, in whole or in part, until such pension or bounty land claim shall be allowed."

SEC. 4. That section 4786 of the Revised Statutes is hereby amended so as to read as follows:

"SEC. 4786. It shall be the duty of the agent or attorney of record in the prosecution of the case to cause to be filed with the Commissioner of Pensions, for his approval, duplicate articles of agreement, without additional cost to the claimant, setting forth the fee agreed upon by the parties, which agreement shall be executed in the presence of and certified by some officer competent to administer oaths. In all cases where application is made for pension or bounty land, and no agreement is filed with and approved by the Commissioner as herein provided, the fee shall be $10, and no more. And such articles of agreement as have been heretofore or may hereafter be filed with the Commissioner of Pensions are not authorized nor will they be recognized except in claims for original pension, claims for increase of pension on account of a new disability not before alleged, in claims for restoration where a pensioner's name has been, or may hereafter be, dropped from the pension-rolls, on testimony taken by a special examiner of this office, showing that the disability or cause of death on account of which the pension was allowed did not originate in the line of duty, and in cases of dependent relatives whose names have been, or may hereafter be, dropped from the rolls on like testimony upon the ground of non-dependence, and in such other cases of difficulty and trouble as the Commissioner of Pensions may see fit to recognize them: *Provided*, That no greater fee than $10 shall be demanded, received, or allowed in any claim for pension the cause of which originated prior to March 4, 1861; nor in any claim for pension or bounty land granted by special act of Congress; nor in any claim for increase of pension on account of an increase of the disability for which the pension had been allowed: *And provided further*, That no fee shall be demanded, received, or allowed in any claim for arrears of pension or arrears of increase of pension allowed by any act of Congress passed subsequent to the date of the allowance of the original claims in which such arrears of pension or of increase of pension may be allowed.

"The articles of agreement herein provided for shall be in substance as follows, to wit:

"ARTICLES OF AGREEMENT.

"Whereas I, ——— ———, late a ——— in company ———, of the ——— regiment of ——— volunteers, war of 1861 (or if the service be different, here state the same), having made application for pension under the laws of the United States:

"Now, this agreement witnesseth, that for and in consideration of service done and to be done in the premises, I hereby agree to allow my attorney, ——— ———, of ———, the fee of ——— dollars, which shall include all amounts to be paid for any service in furtherance of said claim, and said fee shall not be demanded by or payable to my said attorney, in whole or in part, except in case of the granting of my pension by the Commissioner of Pensions, and then the same shall be paid to him or them in accordance with the provisions of the act of Congress approved ——— ———.

"Having heretofore paid my said attorney in part for his services herein the sum of ——— dollars, that amount is to be deducted from the sum above stipulated to be paid.

"(Claimant's signature.)

"(Two witnesses' signatures.)

"STATE OF ———, *County of* ———, *ss:*

"Be it known that on this the ——— day of ———, A. D. 188—, personally appeared the above-named ——— ———, who, after having had read over to ——— in the hearing and presence of the two attesting witnesses the contents of the foregoing articles of agreement, voluntarily signed and acknowledged the same to be ——— free act and deed.

"(Official signature.)

"And now, to wit, this ——— day of ———, A. D. 1880, I (or we) accept the provisions contained in the foregoing articles of agreement, and will, to the best of my (or our) ability, endeavor faithfully to represent the interest of the claimant in the premises.

"And I (or we) hereby acknowledge that I (or we) have heretofore received from the claimant the sum of ——— dollars, and no greater sum, and agree that that amount shall be deducted from the sum herein stipulated to be paid.

"Witness my (our) hand the day and year first above written.

"(Signature of attorney.)

"STATE OF ———, *County of* ———, *ss:*

"Personally came ——— ———, whom I know to be the person he represents himself to be, and who, having signed above acceptance of agreement, acknowledged the same to be ——— free act and deed.

"(Official signature.)

"And if, in the adjudication of any claim for pension in which such articles of agreement have been or may hereafter be filed, it shall appear that the claimant had, prior to the execution thereof, paid to the attorney any sum for his services in such claim, and the amount so paid is not stipulated therein, then every such claim shall be adjudicated in the same manner as though no articles of agreement had been filed."

A bill (S. 2208) to provide pensions for certain invalid soldiers and sailors who have been discharged from the Army or Navy of the United States after three months' service therein during the war of the rebellion, and for the widows and dependent parents of deceased pensioners, and to increase the rate of pension in certain cases, and for other purposes.

This is a proposition in substance the same which I had the honor originally to present in previous Congresses.

Added as an amendment to House bill No. 5667. Failed in the House.

A bill (S. 2208) to provide pensions for certain invalid soldiers and sailors who have been discharged from the Army or Navy of the United States after three months' service therein during the war of the rebellion, and for the widows and dependent parents of deceased pensioners, and to increase the rate of pension in certain cases, and for other purposes.

Be it enacted, etc., That every person specified in the several classes enumerated in section 4693 of the Revised Statutes of the United States, and the amendments thereto, who served in the military or naval service, as mentioned in said section, for the period of three months during the war of the rebellion, and has an honorable discharge therefrom, and who is or shall become disabled from any cause not the result of his own gross carelessness, disreputable conduct, or vicious habits, and shall also be dependent, wholly or in part, upon his own labor or upon pecuniary assistance from others for the means of comfortable support, shall, upon making due proof of the facts, under such regulations as may be prescribed by the proper authority, be placed upon the list of pensioners of the United States, and be entitled to receive a pension during the continuance of such disability at a rate proportionate to the degree thereof; and such pension shall commence at the date of filing an application therefor. The highest rate of pension granted by virtue hereof, which shall be for total incapacity to perform any manual labor, shall be $30, which is hereby made divisible upon that basis for any less degree of disability: *Provided*, That no person entitled to or receiving an invalid pension under existing laws, or such as may be hereafter enacted, granting pensions for disabilities contracted in the military or naval service of the United States and line of duty, greater than that provided for herein, shall receive the benefits of this act. But any such applicant for invalid pension having an application therefor pending, or who shall hereafter file his application for such pension, may, by a declaration over his own signature, at any time elect to prosecute his said claim under this act or under the general laws; and his pension, when allowed, if prosecuted under this act, shall commence from the date of such election, except as above provided.

SEC. 2. That all widows of soldiers or sailors who, as such widows, are now receiving, under existing laws or a special act of Congress, the sum of $8 per month, by reason of the death of such soldiers and sailors from a disability contracted in the military or naval service of the United States, and in line of duty, since the 4th day of March, 1861, shall, from and after this date, be entitled to and receive the rate of $12 per month in lieu of said rate of $8; and all such widows who shall hereafter be found to be entitled to the rate of $8 per month under existing laws shall be entitled to and receive the rate of $12 in lieu of said rate of $8.

SEC. 3. That if any invalid pensioner pensioned under pre-existing laws has died or shall hereafter die, or if any pensioner under section 1 of this act shall die, leaving a widow or minor child under sixteen years of age, or both, at the date of the death of such pensioner, such widow and minor children shall be held to be entitled, in the order of succession named, to an original pension in their own right, under existing laws, without being required to prove that the death cause of such pensioner was due to his military or naval service of the United States, and shall receive the rates now allowed by law, except that such as may be found to be entitled to $8 per month shall receive in lieu thereof $12 per month.

SEC. 4. That pension granted such widows on account of such minors shall be continued without limit as to age, provided it shall appear that such minors are of unsound mind or physically helpless, so as to render them incapable of earning a subsistence: *Provided*, That such widow retains the care, custody, and control of such minors; and in the event of the death or remarriage of such widow, or abandonment by her of such minors, then the pension shall be continued to them in their own right, without limit as to age, payable to a duly constituted guardian.

SEC. 5. That in considering the claims of dependent parents the fact and cause of death and the fact that the soldier left no widow or minor children having been shown as required by law, it shall be necessary only to show by competent and sufficient evidence that such dependent parent is without other present means of support than his or her own manual labor, or the contributions of others not legally bound for his or her support; and such as may be found to be entitled to $8 a month under existing laws shall receive in lieu thereof $12 a month from the date of this act.

SEC. 6. That in all applications under the general pension laws, including this act, where it appears by record evidence that the applicant was regularly enlisted and mustered into the service, that fact shall be sufficient *prima facie* evidence that he was then in good health and free from the disease or cause of disability for which he claims a pension; but such evidence shall be subject to rebuttal by record or other satisfactory evidence of the prior existence of such disease or cause of disability.

A bill (H. R. 5667) granting pensions to soldiers and sailors of the Mexican war, and for other purposes.

Passed the Senate with amendments. Failed in the House.

An act granting pensions to the soldiers and sailors of the Mexican war and for other purposes.

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll the names of the surviving officers and enlisted men, including marines, militia, and volunteers of the military and naval services of the United States, who, being duly enlisted, actually served fourteen days with the Army or Navy of the United States in Mexico or on the coasts or frontier thereof or *en route* thereto in the war with that nation, or were actually engaged in a battle in said war and were honorably discharged, and to such other officers and soldiers and sailors as may have been personally named in any resolution of Congress for any specific service in said wars, although their term of service may have been less than sixty days, and the surviving widows of such officers and enlisted men as were married to such officers or soldiers or sailors prior to the discharge of such officers and enlisted men: *Provided*, That such widows have not remarried: *Provided*, That every such officer, enlisted man, or widow who is or may become sixty-two years of age or who is or may become subject to any disability or dependency equivalent to some cause prescribed or recognized by the pension laws of the United States as a sufficient reason for the allowance of a pension, shall be entitled to the benefits of this act; but it shall not be held to include any person not within the rule of age or disability or dependency herein defined, or who incurred such disability while in any manner voluntarily engaged in or aiding or abetting the late rebellion against the authority of the United States.

SEC. 2. That pensions under section 1 of this act shall be at the rate of $8 per month, and payable only from and after the passage of this act, for and during the natural lives of the persons entitled thereto, or during the continuance of the disability for which the same shall be granted: *Provided*, That section 1 of this act shall not apply to any person who is receiving a pension at the rate of $8 per month or more, nor to any person receiving a pension of less than $8 per month, except for the difference between the pension now received (if less than $8 per month) and $8 per month.

SEC. 3. That before the name of any person shall be placed on the pension-roll under this act proof shall be made, under such rules and regulations as the Secretary of the Interior may prescribe, of the right of the applicant to a pen-

sion; and any person who shall falsely and corruptly take any oath required under this act shall be deemed guilty of perjury; and the Secretary of the Interior shall cause to be stricken from the pension-roll the name of any person whenever it shall be made to appear by proof satisfactory to him that such name was put upon such roll through false and fraudulent representations, and that such person is not entitled to a pension under this act. The loss of the certificate of discharge shall not deprive any person of the benefits of this act, but other record evidence of enlistment and service and of an honorable discharge may be deemed sufficient: *Provided*, That when any person has been granted a land-warrant, under any act of Congress, for and on account of service in the said war with Mexico, such grant shall be *prima facie* evidence of his service and honorable discharge; but such evidence shall not be conclusive, and may be rebutted by evidence that such land-warrant was improperly granted.

SEC. 4. That the pension laws now in force which are not inconsistent or in conflict with this act are hereby made a part of this act, so far as they be applicable thereto.

SEC. 5. That it shall be unlawful for any attorney, claim agent, or any other person to demand or receive a fee greater than $10 for services rendered in behalf of a claimant under this act, which shall not be demanded or received until such claim is allowed; and any person violating the provisions of this section shall be subject to the provisions of section 5485 of the Revised Statutes of the United States.

SEC. 6. That section 4716 of the Revised Statutes is hereby repealed so far as the same relates to this act or to pensioners under this act.

SEC. 7. That the provisions of this act shall not apply to any person while under the political disabilities imposed by the fourteenth amendment to the Constitution of the United States.

SEC. 8. That every person specified in the several classes enumerated in section 4693 of the Revised Statutes of the United States, and the amendments thereto, who served in the military or naval service, as mentioned in said section, for the period of three months during the war of the rebellion, and has an honorable discharge therefrom, and who is or shall become disabled from any cause not the result of his own gross carelessness, disreputable conduct, or vicious habits, and shall also be dependent on his own labor for support, shall, upon making due proof of the facts, under such regulations as may be prescribed by the proper authority, be placed upon the list of pensioners of the United States, and be entitled to receive a pension during the continuance of such disability at a rate proportionate to the degree thereof; and such pension shall commence at the date of filing an application therefor. The highest rate of pension granted under this section, which shall be for total incapacity to perform any manual labor, shall be $24, which is hereby made divisible upon that basis for any less degree of disability: *Provided*, That no person entitled to or receiving an invalid pension under existing laws, or such as may be hereafter enacted, granting pensions for disabilities contracted in the military or naval service of the United States and in line of duty, greater than that provided for herein, shall receive the benefits of this act; but any such applicant for invalid pension having an application therefor pending, or who shall hereafter file his application for such pension, may, by a declaration over his own signature, at any time, elect to prosecute his said claim under this act or under the general laws, and his pension, when allowed, if prosecuted under this act, shall commence from the date of such election.

SEC. 9. That all widows or minor children of soldiers and sailors who as such are now receiving, under existing laws, general or special, the sum of $8 per month, by reason of the death of such soldiers and sailors in service or from a disability contracted in the military or naval service of the United States, and in line of duty, since the 4th day of March, 1861, shall, from and after this date, be entitled to receive the rate of $12 per month in lieu of said rate of $8; and all such widows or minor children who shall hereafter be found to be entitled to the rate of $8 per month under existing laws shall be entitled to and receive the rate of $12 in lieu of said rate of $8.

SEC. 10. That if any invalid pensioner pensioned for a disability contracted in the military or naval service of the United States, and in the line of duty, has died or shall hereafter die, leaving a widow or minor child under sixteen years of age, or both, at the date of the death of such pensioner, such widow and minor children shall be entitled, in the order of succession named, to an original pension in their own right, under existing laws, without being required to prove that the death of such pensioner was due to his military or naval service of the United States, and shall receive the rates now allowed by law, except that such as may be found to be entitled to $8 per month under existing laws shall receive in lieu thereof $12 per month.

SEC. 11. That pensions granted widows on account of minor children shall be continued without limit as to age, whenever it shall appear that such minors are of unsound mind or physically helpless, so as to render them incapable of earning a subsistence: *Provided*, That such widow retains the care, custody, and control of such minors; and in the event of the death or remarriage of such widow, or abandonment by her of such minors, then the pension and additional pension shall be continued to them in their own right, without limit as to age, during the continuance of such disability, payable to a duly constituted guardian.

SEC. 12. That in considering the claims of dependent parents the fact and cause of death and the fact that the soldier left no widow or minor children having been shown as required by law, it shall be necessary only to show by competent and sufficient evidence that such dependent parent is without other present means of comfortable support than his or her own manual labor, or the contributions of others not legally bound for his or her support; and such as may be found to be entitled to $8 a month under existing laws shall receive in lieu thereof $12 a month from the date of this act.

SEC. 13. That in all applications under the general pension laws, including this act, where it appears by record evidence that the applicant was regularly enlisted and mustered into the service, that fact shall be *prima facie* evidence of soundness at the time of his enlistment; but such presumption shall be subject to rebuttal by record or other competent evidence.

House bill 5667 was sent to us by the House, and the Senate amended it by adding Senate bill 2203. This bill being thus attached to the Mexican pension bill, the whole went back in the Forty-eighth Congress to the House, and rather than pass this bill a Democratic House defeated both, and thus the Mexican pensioners went to the wall likewise, and only found their remedy in the Forty-ninth Congress, when action was had upon the two propositions, the Mexican pensioners on the one hand and the soldiers of the war of the Union on the other, in two separate bills, and the Mexican pension bill got through and the Union soldiers' bill was killed in the House.

A bill (S. 1526) amending sections 4756 and 4757 of the Revised Statutes, relating to pensions to certain disabled persons who have served in the Navy or Marine Corps.

Passed the Senate and House and became a law.

An act amending sections 4756 and 4757 of the Revised Statutes, relating to pensions to certain disabled persons who have served in the Navy or Marine Corps.

Be it enacted, etc., That section 4756 and section 4757 of the Revised Statutes of the United States be, and the same are hereby, amended by inserting the words "or as an appointed petty officer, or both," after the words "as an enlisted person" in the former section, and after the words "as an enlisted man" in the latter section.

A bill (introduced by Mr. BLAIR) (S. 1886) for the relief of soldiers of the late war, honorably discharged after three months' service, who are disabled and dependent upon their own labor for support, and of dependent parents of soldiers who died in the service or from disabilities contracted therein.

Passed the Senate, but failed in the House.

A bill for the relief of soldiers of the late war, honorably discharged after three months' service, who are disabled and dependent upon their own labor for support, and of dependent parents of soldiers who died in the service or from disabilities contracted therein.

Be it enacted, etc., That every person specified in the several classes enumerated in section 4693 of the Revised Statutes of the United States, and the amendments thereto, who served in the military or naval service, as mentioned in said section, for the period of three months during the war of the rebellion, and has an honorable discharge therefrom, and who is or shall become disabled from any cause not the result of his own fault, and shall also be dependent upon his own exertions for support, or upon the contributions of others not legally bound thereto, shall, upon making due proof of the facts, under such regulations as may be prescribed by the proper authority, be placed upon the list of pensioners of the United States, and be entitled to receive a pension during the continuance of such disability and dependence at a rate proportionate to the degree of such disability; and such pension shall commence at the date of filing an application therefor. The highest rate of pension granted under this section, which shall be for total incapacity to perform any manual labor, shall be $24 per month, which is hereby made divisible upon that basis for any less degree of disability: *Provided*, That no person entitled to or receiving an invalid pension under existing laws, or such as may be hereafter enacted, granting pensions for disabilities contracted in the military or naval service of the United States, and in line of duty, greater than that provided for herein, shall receive the benefits of this act; but any applicant for such invalid pension having an application therefor pending, or who shall hereafter file his application for such pension, may, by a declaration over his own signature, at any time, elect to prosecute his said claim under this act or under the general laws, and his pension, when allowed, if prosecuted under this act, shall commence from the date of such election: *Provided further*, That no pension paid under any law hereafter shall be rated at less than $4 per month.

SEC. 2. That in considering the claims of dependent parents, the fact and cause of death and the fact that the soldier left no widow or minor children having been shown as required by law, it shall be necessary only to show by competent and sufficient evidence that such dependent parent is without other present means of comfortable support than his or her own manual labor, or the contributions of others not legally bound for his or her support; and such as may be found to be entitled to $8 a month under existing laws, as modified by this section, shall receive in lieu thereof $1 a month from and after the approval of this act.

SEC. 3. That in all applications under the general pension laws, including this act, where it appears by record evidence that the applicant was regularly enlisted and mustered into the service, that fact shall be conclusive evidence of the soundness at the time of his enlistment, except in case of fraud.

SEC. 4. That no person shall be entitled to more than one pension at the same time under any or all laws of the United States, whether such pension shall have been already obtained or shall be hereafter obtained, unless the act under which such pension is claimed shall specially so declare.

That bill passed the Senate, was reported to the House, but did not pass the House; it died in the House. It was the most important bill that has ever been pending with any possibility or probability for the time being of its passage since the arrears-of-pension bill. It is a bill which covered the entire list of all the soldiers of the Union who were in need of assistance from their Government, those who under the general laws were not pensionable. The bill in substance had passed in the previous Congress. It had been asscciated with the Mexican pension bill. I am stating matters that I am conversant with and was a part of. I had urgently sought that the two measures might go together, and that the two might become part of the statute law of the land, that being great acts of justice to the soldiers in two great wars they might proceed with equal step; but it was fated not so to be.

The soldiers of the country will recognize this bill if I do not stop, being short of time for a more specific setting forth of its merits; but it would have covered some two hundred and fifty thousand undoubtedly of the meritorious and disabled soldiers of this country. If anybody had cared to do a service to the soldiers of this country who were in want and destitution and disabled from gaining a livelihood by manual labor, it would have been easy to have passed that bill and to have used some of the surplus in giving their just dues to these men, their widows, their orphans, and their parents, but it failed.

A bill (S. 2056) to amend the pension laws by increasing the pensions of soldiers and sailors who have lost an arm or leg in the service.

Passed the Senate and House and became a law.

An act to amend the pension laws by increasing the pensions of soldiers and sailors who have lost an arm or leg in the service.

Be it enacted, etc., That from and after the passage of this act all persons on the pension-rolls, and all persons hereafter granted a pension, who, while in the military or naval service of the United States and in line of duty, shall have lost one hand or one foot, or been totally disabled in the same, shall receive a pension of $30 a month; that all persons now on the pension-rolls, and all persons hereafter granted a pension, who in like manner shall have lost either an arm at or above the elbow or a leg at or above the knee, or been totally disabled in the same, shall receive a pension of $36 per month; and that all persons now on the pension-rolls, and all persons hereafter granted a pension who in like manner shall have lost either an arm at the shoulder-joint or a leg at the hip-joint, or so near the joint as to prevent the use of an artificial limb, shall receive a pension at the rate of $45 per month: *Provided*, That nothing contained in this act shall be construed to repeal section 4699 of the Revised Statutes of the United States, or to change the rate of $18 per month therein mentioned to be proportionately divided for any degree of disability established for which section 4695 makes no provision.

A bill (S. 2482) to restore pensions in certain cases.

Passed the Senate, reported in the House, but did not pass the House.

An act to restore pensions in certain cases.

Be it enacted, etc., That the act entitled "An act to restore pensions in certain cases," approved June 9, 1880, shall be construed so as to include within its provisions all officers and enlisted men in the Army, and their widows and minor children.

A bill (S. 181) granting pensions to ex-soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to dependent relatives of deceased soldiers and sailors.

Passed the Senate March 8, 1888.

An act granting pensions to ex-soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to dependent relatives of deceased soldiers and sailors.

Be it enacted, etc., That in considering the pension claims of dependent parents, the fact and cause of death, and the fact that the soldier left no widow or minor child or children, having been shown as required by law, it shall be necessary only to show by competent and sufficient evidence that such parent or parents are without other means of support than their own manual labor or the contributions of others not legally bound for their support: *Provided*, That all pensions allowed under this section shall commence from the date of the passage of this act, or from the date of subsequent dependence, and shall continue no longer than the existence of such dependence.

SEC. 2. That all persons who served three months or more in the military or naval service of the United States during the late war of the rebellion, and who have been honorably discharged therefrom, and who are now or who may hereafter be suffering from mental or physical disability, not the result of their own vicious habits, which totally incapacitates them from the performance of manual labor, and who are without other adequate means of self support, shall, upon making due proof of the fact according to such rules and regulations as the Secretary of the Interior may provide, be placed upon the list of invalid pensioners of the United States, and be entitled to receive $12 per month; and such pension shall commence from the date of the filing of the application in the Pension Office, after the passage of this act, upon proof that the disability then existed, and shall continue during the existence of the same: *Provided*, That persons who are now receiving pensions under existing laws, or whose claims are pending in the Pension Office, may, by application to the Commissioner of Pensions, in such form as he may prescribe, receive the benefits of this act; and nothing herein contained shall be so construed as to prevent any pensioner thereunder from prosecuting his claim and receiving his pension under any other general or special act: *Provided, however*, That no person shall receive more than one pension for the same period: *And provided further*, That rank in the service shall not be considered in applications filed thereunder.

SEC. 3. That if any invalid pensioner has died, or shall hereafter die, leaving a widow, minor child, or children under eighteen years of age, or in case there be no widow, or minor child or children, a dependent mother or father, such widow, minor child or children, or mother or father, shall be placed upon the pension-roll at the rates established by law for widows, minor children, and parents, without regard to the cause of death of such pensioner: *Provided*, That said widow was married to the deceased pensioner prior to the passage of this act. All pensions granted to widows under this or any other general law shall take effect from the date of the death of the husbands of such widows, respectively, but not dating back of the passage of this act. That the increase of pensions for minor children shall be at the rate of $5 per month instead of $2 per month, as now provided by law, and in case a minor child is insane, idiotic, or otherwise helpless, the pension shall continue during the life of said child, or during the period of such disability.

SEC. 4. That any agent, attorney, or other person instrumental in prosecuting any claim under section 2 or 3 of this act who shall, directly or indirectly, contract for, demand, receive or retain, for his services or instrumentality in presenting and prosecuting such claim, a sum greater than $10 (payable only upon the order of the Commissioner of Pensions, by the pension agent making payment of the pension allowed), or who shall wrongfully withhold from a pensioner or claimant the whole or any part of the pension or claim allowed and due such pensioner or claimant, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall, for every such offense, be fined not exceeding $500, or imprisonment at hard labor not exceeding two years, or both, in the discretion of the court.

SEC. 5. That section 4716 of the Revised Statutes is hereby modified so that the same shall not apply to this act: *Provided*, That this act shall not apply to those persons under political disabilities. And no person shall be pensioned under this act for any disability incurred while engaged in any military or naval service against the United States.

SEC. 6. That all laws and parts of laws which conflict with the provisions of this act be, and the same are hereby, repealed.

Senate bill 181 is similar in some respects to Senate bill 186 of the last Congress, but provides for only about fifteen thousand, who, as it is supposed, are in the poor-houses of the country or directly sustained by charity such as is given only to the very helpless and very poor. That bill has been passed by the Senate. It is a very modest bill. It left out the two hundred and twenty-odd thousand cases which Senate bill 186 included. It has gone to the House, there to sleep the sleep of death. So that even the soldiers of the country in extremest need, God's poor and our saviors in war, are not to receive any assistance from a Democratic House nor from the Executive who controls that body with an arm of iron power.

A bill (S. 373) for the relief of women enrolled as Army nurses, etc.

On Senate Calendar.

A bill for the relief of women enrolled as Army nurses, etc.

Be it enacted, etc., That all women regularly enrolled in the United States service as Army nurses or sanitary agents during the late war of the rebellion, and who rendered six months' service in the hospitals, diet kitchens, or on the battle-fields, and who have been honorably discharged therefrom; or who, prior to the completion of the period named, were disabled in the line of duty and honorably discharged, shall, upon making due proof of the fact, according to such rules and regulations as the Secretary of the Interior may provide, be placed on the list of pensioners of the United States and entitled to $25 per month; and such pensions shall commence from the date of filing the application in the Pension Office after the passage of this act: *Provided*, That persons who are now receiving pensions under special enactments may, by making application to the Commissioner of Pensions, in such form as he may prescribe, receive the benefits of this act: *Provided*, That no person shall receive more than one pension for the same period.

SEC. 2. That any agent, attorney, or other person instrumental in prosecuting any claim under this act who shall, directly or indirectly, contract for, demand, receive, or retain for his services or instrumentality in presenting and prosecuting such claim, a sum greater than $10 (payable only upon the order of the Commissioner of Pensions, by the pension agent making payment of the pension allowed), or who shall wrongfully withhold from a pensioner or claimant the whole or any part of the pension or claim allowed and due such pensioner or claimant, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall, for every such offense, be fined not exceeding $500, or imprisonment at hard labor not exceeding two years, or both, in the discretion of the court.

SEC. 3. That all laws and parts of laws which conflict with the provisions of this act be, and the same are hereby, repealed.

Amendment intended to be proposed by Mr. BLAIR to the bill (S. 373) for the relief of women enrolled as Army nurses, etc., namely: Strike out all after the enacting clause and insert the following:

"That all women who volunteered or were registered in the United States service under medical authority as Army nurses, or hospital agents during the late 'war of the rebellion,' and who rendered six months' service in the hospitals, or on the battle-fields, or who, prior to the completion of the period named, were disabled in said service and honorably discharged by reason of such disability, or on showing present necessity, upon making proof of service rendered, from surgeons, or others having personal knowledge of the same, which may be verified, as far as possible, by any records on file in the War Department, according to such rules and regulations as the Secretary of the Interior may provide, shall be placed upon the pension-roll, and entitled to $25 per month, during life; such pensions to commence from the passage of this act: *Provided*, That persons who are now receiving pensions under special enactments, or under general laws, who are entitled to the benefits of this act, may, by making application to the Commissioner of Pensions, as herein provided, receive the above sum in addition to their present pension as an increase.

"SEC. 2. That any agent, attorney, or other person instrumental in prosecuting any claim under this act who shall, directly or indirectly, contract for, demand, receive, or retain for his services or instrumentality in presenting and prosecuting such claim a sum greater than $10 (payable only upon the order of the Commissioner of Pensions, by the pension agent making payment to claimant of the pension allowed) shall be deemed guilty of a misdemeanor, and upon conviction thereof shall, for every such offense, be fined not exceeding $500, or imprisonment at hard labor not exceeding two years, or both, in the discretion of the court.

"SEC. 3. That all laws and parts of laws which conflict with the provisions of this act be, and the same are hereby, repealed."

My genial friend from Missouri [Mr. COCKRELL] I have plied twenty or thirty times to know if he was ready to take up this bill, and I suppose he is waiting yet for papers from the Department of War.

Mr. COCKRELL. He needs more information.

Mr. BLAIR. He nods assent, and as to when these Army nurses will get their claim nothing save some power possessed of the power of prophecy can give any indication; but I will assure the Senator that if there were a quorum here and we could do business at all, I would not fail to move its consideration.

Mr. MORGAN. Is there no quorum here?

Mr. BLAIR. I should think there would be, listening to one of my speeches. They are in the Democratic committee-rooms, it may be.

A bill (S. 379) to allow soldiers and sailors in the United States service who have lost both hands an increased pension.

Passed the Senate March 21, 1888.

An act (S. 379) to allow soldiers and sailors in the United States service who have lost both hands an increased pension.

Be it enacted, etc., That from and after the passage of this act all persons who, in the military or naval service of the United States and in the line of duty, have lost both hands shall be entitled to a pension of $100 per month.

Amend the title of the bill so as to read: "A bill to increase pensions in certain cases."

A bill (S. 509) authorizing an increase in pensions in cases of deafness.

Passed the Senate and House and became a law.

An act authorizing an increase in pensions in cases of deafness.

Be it enacted, etc., That from and after the passage of this act all persons on the pension-rolls of the United States, or who may hereafter be thereon, drawing pensions on account of loss of hearing, shall be entitled to receive, in lieu of the amount now paid in case of such disability, the sum of $30, in cases of total deafness, and such proportion thereof in cases of partial deafness as the Secretary of the Interior may deem equitable; the amount paid to be determined by the degree of disability existing in each case.

A bill (S. 998) to restore pensions in certain cases.

Passed the Senate March 21, 1888.

An act to restore pensions in certain cases.

Be it enacted, etc., That the act entitled "An act to restore pensions in certain cases," approved June 9, 1880, shall be construed so as to include within its provisions all officers and enlisted men in the Army, and their widows and minor children.

A bill (S. 1000) to increase the pensions of certain soldiers and sailors who are utterly helpless from injuries received or diseases contracted while in the service of the United States.

Passed the Senate February 2, 1888.

An act to increase the pensions of certain soldiers and sailors who are utterly helpless from injuries received or diseases contracted while in the service of the United States.

Be it enacted, etc., That from and after the passage of this act all persons who are or who may become totally helpless from injuries received or diseases contracted while in the military or naval service of the United States shall be entitled to receive a pension of $72 per month.

SEC. 2. That the increase allowed by this act to those persons who may hereafter become totally helpless shall be made to commence in strict conformity with section 4698½, Revised Statutes.

A bill (S. 1529) to amend paragraph 3 of section 4693 of the Revised Statutes, and for other purposes.

Passed the Senate March 31, 1888.

A bill (S. 1529) to amend paragraph 3 of section 4693 of the Revised Statutes, and for other purposes.

Be it enacted, etc., That so much of paragraph 3 of section 4693 of the Revised Statutes as provides that no claim of a State militiaman on account of disability from wounds or injuries received in battle with rebels or Indians, while temporarily rendering service, shall be valid unless prosecuted to a successful issue prior to the 4th day of July, 1874, is hereby repealed.

SEC. 2. That the claims of all such persons now pending, or which may be hereafter filed, shall be adjudicated in the same manner as claims of persons who have been regularly enlisted in the United States military service. This act shall include claimants wounded or disabled in any Indian war prior or subsequent to the passage of this act.

A bill (S. 1567) to give a pension of $100 per month to persons who, in the military or naval service of the United States, and in the discharge of duty, have lost both hands, or the use of both hands.

A bill (S. 1567) to give a pension of $100 per month to persons who, in the military or naval service of the United States, and in the discharge of duty, have lost both hands, or the use of both hands.

Be it enacted, etc., That from and after the passage of this act all persons who, in the military or naval service of the United States and in line of duty, shall have lost both hands, or lost the use of both hands, so as to require the regular personal aid and attendance of another person, shall be entitled to a pension of $100 per month; and this shall not be so construed as to reduce any pension.

That bill has not been acted upon as yet. The subject-matter has been considered. The Senate committee has several important bills as yet not acted upon on its files, for the reason that our work seems to go for nothing. If we do pass these bills in the Senate, they die almost invariably and inevitably in the House. The records show how that is. It is not at all strange that the committee is discouraged in doing this important and interminable work merely to provide material for the agencies of destruction in other departments of the Government.

A bill (S. 1596) in relation to oaths in pension and other cases.

Passed the Senate March 31, 1888.

A bill (S. 1596) in relation to oaths in pension and other cases.

Be it enacted, etc., That any and all affidavits and declarations to be hereafter made or used in any pension or bounty cases, or in claims against the Government for back pay or arrears or increase of pension, or for quarterly vouchers, or oath of allegiance, may be taken by any officer authorized to administer oaths for general purposes in the State, city, or county where said officer resides. If such officer has a seal and uses it upon such paper, no certificate of a county clerk, or prothonotary, or clerk of a court shall be necessary; but when no seal is used by the officer taking such affidavit, then a clerk of a court of record, or a county or city clerk, or prothonotary having a seal shall affix it thereto, and shall certify to the signature of said officer, to the effect that such certifying officer believes his signature is genuine.

A bill (S. 1626) to amend the act of March 3, 1877, entitled "An act amending the pension law so as to remove the disability of those who, having participated in the rebellion, have, since its termination, enlisted in the Army of the United States and become disabled."

Passed the Senate March 31, 1888.

An act to amend the act of March 3, 1877, entitled "An act amending the pension law so as to remove the disability of those who, having participated in the rebellion, have, since its termination, enlisted in the Army of the United States and become disabled."

Be it enacted, etc., That the act of March 3, 1877, entitled "An act to amend the pension law so as to remove the disability of those who, having participated in the rebellion, have, since its termination, enlisted in the Army of the United States and become disabled," be, and hereby is, amended to read as follows:

"That the law prohibiting the payment of any money on account of pensions to any person, or to the widow, children, or heirs of any deceased person, who in any manner engaged in or aided or abetted the late rebellion against the authority of the United States, shall not be construed to apply to such persons as afterward voluntarily enlisted in the Army or Navy of the United States, and who, while was in such service, incurred disability from a wound or injury received or disease contracted in the line of duty."

That is an evidence of the ultra determination of the representatives of the people of the North to inflict some indignity, some species of mal-action, some terrible blow to the feelings and the prosperity of our friends of the South. We will get it up and pass it at any time unless, indeed, it should meet with that sort of opposition which I met with when I tried to do a little something for the confederate soldiers in getting them employment instead of its being given to confederates who were not soldiers, to disabled men instead of men who were not disabled, men who were to render an equivalent for all they got, because whatever they received would be simply the wages which would be paid to somebody and would go in any event to somebody who was in the service of the so-called Confederate States.

A bill (S. 1770) granting pensions to soldiers and sailors confined in Confederate prisons.

On the Senate Calendar.

A bill granting pensions to soldiers and sailors confined in Confederate prisons.

Whereas many officers, soldiers, and sailors of the Federal Army and Navy were confied in so-called Confederate prisons for an unusual length of time, suffering great hardships, and contracting disease hard to prove under the existing pension laws: Therefore,

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll the names of such officers, soldiers, sailors, and marines who, while in the service of the United States and while in the line of their duty, were taken prisoners of war, and as such confined in so-called Confederate prisons, between the 1st of May, 1861, and the 1st of May, 1865, as follows: All who were prisoners of war two months and less than six months, one-half pension; those who were prisoners of war six months and less than twelve months, a three-fourths pension; and all such as were prisoners of war twelve months and more than twelve months, a total pension; and, furthermore, such surviving prisoners of war shall receive $2 a day for each and every day's confinement in said Confederate prisons: *Provided*, That such pension shall in each case begin from the date of the passage of this act, and shall be paid at the same time and in the same manner as other pensions are now paid: *Provided further*, That this act shall not entitle any person to draw more than one pension, but that such survivors of the so-called Confederate military prisons as are entitled to and are receiving a pension at the time of the passage of this act shall be entitled to the increase of their pension which this act may grant them.

A bill (S. 2381) to so amend section 9646 of the Revised Statutes as to allow the pensions of officers of the Army and Navy, their widows and dependent parents, to be rated as of the rank held by such officers at the date of discharge.

On the Senate Calendar.

A bill to so amend section 9646 of the Revised Statutes as to allow the pensions of officers of the Army and Navy, their widows and dependent parents, to be rated as of the rank held by such officers at the date of discharge.

Be it enacted, etc., That in all cases in which application for a pension is now pending, or shall hereafter be made, by any officer of the Army or Navy, or the widow or dependent parent of the same, where the proof shows that the person on account of whose disability application is made incurred the disability for which, or in consequence of which, the pension is claimed in the line of duty, but nevertheless remained in the service, and was afterward promoted and mustered into service in good faith, the claimant, whether officer, or widow, or dependent parent, shall be entitled to receive the same pension that would have been allowed in case such disability had been received while such officer held the rank which he occupied when discharged from the service.

SEC. 2. That in any case where a pension has been heretofore granted to any such person, or widow, or dependent parent, in which by this act a higher rating is provided for, the Secretary of the Interior shall, upon due application and proof, increase such pension according to and on the basis prescribed by this act.

Amend the title so as to read: "A bill to allow the pensions of officers of the Army and Navy, their widows and dependent parents, to be rated as of the rank held by such officers at the date of discharge."

That bill has passed the Senate, and a more just bill in its way, though comparatively unimportant, can not be conceived. Here is a man who when he is a corporal or a private loses his physical powers by wounds or by other disability, yet he is sufficiently serviceable by reason of his intellectual qualities, it may be—at all events he is so necessary to the service that he remains in the service, and in spite of all this discomfort and disability, the ill conditions under which he continues in the service of his country, he wins promotion. That man may become a general by his service in camp and in field, and yet if after his discharge he applies for a pension he will only receive one in proportion to the pay which he received at the time the injury was inflicted. The bill is designed to give him pension as of the rate belonging to the rank which he held at the time of his discharge.

A bill (S. 2446) granting an increase of pensions in certain cases therein mentioned.

Passed the Senate May 16, 1888.

An act granting an increase of pensions in certain cases therein mentioned.

Be it enacted, etc., That section 4698 of the Revised Statutes of the United States be, and the same is hereby, amended so as to allow to all persons who are now paid, or may hereafter be found entitled to, a pension for the loss of one eye or the sight thereof, under existing laws for such disability, a pension of $16 per month in lieu of any lesser sum now by law provided therefor, the increase herein provided to take effect only from the passage of this act.

SEC. 2. That nothing herein contained shall deprive a pensioner of the right to a higher rating by reason of his rating for total disability, as is now provided for by existing laws.

SEC. 3. That the Commissioner of Pensions is hereby required and authorized to proportionately divide the rate for a partial loss of sight of either or both eyes, upon the basis of the rate for the loss of one eye herein provided for.

I submit these measures for the examination of the future if not of the present, in order that the public records may contain the evidence upon which a just conclusion can be arrived at as to the proposition of the President and the Democratic party that they are specially the friends of the soldiers of the war for the Union; that they have done as much, and always what they could, to secure justice to these servants of the public. I submit that the record is against them, as the result of the war was against them.

The single bill, Senate bill 1886, had in it more of good than all the other pension legislation that has taken place or that has been proposed during the last four Congresses by any party whatsoever, and not only have we failed to secure a consideration of it, not only has that bill in the various forms in which it has been pending for years been destroyed in the House, but an exceedingly imperfect and comparatively useless and unimportant and a troublesome sort of bill in administration, which would nevertheless have done some good, was vetoed by the President in the Forty-ninth Congress. In this Congress the Senate has passed a bill, introduced by Senator MANDERSON at request of the Grand Army, including or supposed to include only 15,000 of the 250,000 or more cases that Senate bill 1886 would have relieved—a bill which we passed simply because we could not pass anything better with hope of its favorable consideration by the executive power.

That went to the House a long time ago. Senators will remember the debate we had upon it, that it was a mere pretense of relief, but we took it simply because we had no hope of getting more. The Grand Army came here entreating for the passage of just this little measure of relief for men that were absolutely in suffering and abject poverty in this country, men but for whom there would have been no country to-day, no Treasury, no surplus, no existing taxing power whatever, no unity, no nation at all. They appealed to us that these men might receive a mite to ease the suffering of their remaining lives. That bill has gone to the House. No action has been had upon it, not even by the Democratic committee.

It has not even been returned, as I understand, to the House. Certainly it has not been considered, and if considered nobody believes it would ever be approved by the Executive, who comes to us in the message which draws from me these remarks and postures before the country as one determined that no defender of his country shall suffer by reason of the hostile action of the Senate of the United States. I have shown that but for the special act which has been vetoed there never would have been any reconsideration, much less reversal of their own

unjust action in the Pension Office; there would never have been any allowance of the claim. Tell the truth.

The PRESIDENT *pro tempore*. The bill, with the message of the President, will be referred to the Committee on Pensions, and printed.

WILLIAM S. BRADSHAW—VETO MESSAGE.

The PRESIDENT *pro tempore* laid before the Senate the following message from the President of the United States; which was read:

To the Senate:

I herewith return without approval Senate bill No. 3208, entitled "An act granting a pension to William S. Bradshaw."

The beneficiary mentioned in this bill was mustered into the military service as first lieutenant on the 28th day of October, 1861.

About eight months afterwards, and in June, 1862, he resigned from the service, his resignation being based upon a surgeon's certificate which he procured, and which is as follows:

"William S. Bradshaw having applied for a certificate to accompany his resignation, I do hereby certify that I have carefully examined this officer and find that his disease is of a chronic pleuritic character, contracted (previous to his entering the service) four years since from an injury received in shoeing a fractious horse, in consequence of which he was laid up for a number of weeks with a severe attack of pleuritis; that he has never been able to endure severe labor since; that since entering the service active drilling or marching has invariably developed severe pleuritic pains about his chest and underneath his sternum, rendering him totally unfit for duty."

It is entirely evident that the statements contained in this certificate are of such a nature that they must have almost entirely been communicated to the surgeon by the officer himself. It will be observed that there is an absolute lack of any intimation that his disabilities were attributable in their origin to army service, and he surely can not ask us to believe that a man with the intelligence fitting him to be a commissioned officer in the Army, and having this certificate in his possession, did not know what it contained.

It furnished the reason for his honorable discharge in the dark days of his country's need and operated as an exemption from further military service.

And yet in September, 1883, more than twenty-one years after his discharge, he applied to the Pension Bureau for a pension, alleging lameness of breast and back, contracted in the service.

After an examination of all the facts, I can not believe that this is a case in which a pension should be granted.

GROVER CLEVELAND.

EXECUTIVE MANSION, *October* 15, 1888.

The PRESIDENT *pro tempore*. Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. SAWYER. I move that the bill and message be referred to the Committee on Pensions.

Mr. BROWN. I object to the reference at this time. The Senate is not in a condition at this time where it has power to pass an order making the reference. Upon that question I desire to be heard for a few moments.

The PRESIDENT *pro tempore*. The Chair can not hear the Senator on that question.

Mr. BROWN. Not on a motion to refer?

The PRESIDENT *pro tempore*. If the Senator objects upon the ground he states, the Chair will have to ascertain whether the Senate is in a condition to refer the bill and message or not.

Mr. BROWN. I will just conform to the ruling of the Chair, and simply object without giving my reason.

The PRESIDENT *pro tempore*. That being the case, the message and bill will lie on the table.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 11262) to authorize the construction of bridges across the Kentucky River and its tributaries by the Richmond, Nicholasville, Irvine and Beattysville Railroad Company.

The message further announced that the House had passed a bill (H. R. 3715) for the relief of the State National Bank of New Orleans, formerly Louisiana State Bank; in which it requested the concurrence of the Senate.

The message also announced that the House insisted upon its amendments to the bill (S. 1786) to regulate appointments in the Marine-Hospital Service of the United States, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. PHELAN, Mr. LAGAN, and Mr. O'NEILL of Pennsylvania managers at the conference on the part of the House.

SARAH C. TAYLOR.

Mr. TURPIE. I ask the Presiding Officer to lay before the Senate the amendment of the House of Representatives to the bill (S. 1482) granting a pension to Sarah C. Taylor. The effect of the amendment is to reduce the allowance made by the Senate bill from $25 to $12 per month.

The PRESIDING OFFICER (Mr. FRYE in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 1482) granting a pension to Sarah C. Taylor; which was, in line 6, before the word "dollars," to strike out "twenty-five" and insert "twelve."

Mr. TURPIE. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

PETITIONS AND MEMORIALS.

The PRESIDENT *pro tempore*. Is it the pleasure of the Senate now to receive morning business?

Mr. BROWN. I present the petition of the Woman's Christian Temperance Union of the State of Georgia, praying for the repeal of the internal-revenue laws. I move its reference to the Committee on Finance, and desire to make some remarks on the motion.

The PRESIDENT *pro tempore*. If there be no objection, the petition will be received, and the Senator from Georgia will be recognized as entitled to the floor as soon as other morning business is through.

Mr. TURPIE presented the petition of Thomas H. Shelton and other citizens of Green Oak, Ind., praying that a widow's pension be granted to Mrs. Elizabeth New; which was referred to the Committee on Pensions.

REPORTS OF COMMITTEES.

Mr. TURPIE, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 2707) granting a pension to Baker Saine;

A bill (H. R. 8549) granting a pension to Louisa Rogers;

A bill (H. R. 8521) for the relief of William A. Mathes; and

A bill (H. R. 10199) for the relief of William E. Springstein.

Mr. SAWYER, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 3608) to grant an increase of pension to William E. Prince;

A bill (H. R. 4887) granting a pension to Charles E. Scott;

A bill (H. R. 4648) granting a pension to Jemima Sterling; and

A bill (H. R. 2236) granting a pension to Eli Yamgheim.

Mr. SAWYER, from the Committee on Pensions, to whom was referred the bill (S. 3628) granting an increase of pension to Emma Riddle, reported it with an amendment, and submitted a report thereon.

COMMITTEE ON EPIDEMIC DISEASES.

Mr. DAVIS. I have been requested by the chairman of the Committee on Contingent Expenses to present on his behalf a favorable report upon the resolution submitted by the Senator from South Carolina [Mr. HAMPTON] October 10, 1888, and to ask for its consideration.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That the Committee on Epidemic Diseases have leave to sit during the recess of Congress, and any necessary expenses shall be paid out of the contingent fund of the Senate.

WASHINGTON AQUEDUCT TUNNEL.

Mr. HALE. With the approval of the members of the Committee on Appropriations who are present I report a joint resolution and ask for its immediate passage. It will speak for itself.

The joint resolution (S. R. 116) authorizing the Secretary of War to protect the Washington Aqueduct tunnel, was read the first time at length, as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized and directed to use so much of any unexpended balance of appropriations for the work of the Washington Aqueduct tunnel, District of Columbia, as may be necessary, for the purpose of protecting and preserving the work already done upon said tunnel.

Mr. HALE. Under the rulings of the Comptroller no work can be continued on this tunnel after the 1st of November, and there is now no fund that can be used by the Secretary of War for preserving and protecting this great work. The resolution provides simply that from the unexpended balances which have not yet been used, the Secretary may for that purpose, and for that alone, use such sums as may be necessary to protect and preserve the work.

By unanimous consent the joint resolution was read the second time and considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Mr. VEST introduced a bill (S. 3633) for the relief of the legal representatives of Samuel A. Craddock, late of Audrain County, Missouri; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. BLACKBURN introduced a bill (S. 3634) granting a pension to Mrs. Nancy Smith; which was read twice by its title, and referred to the Committee on Pensions.

Mr. SAWYER introduced a bill (S. 3635) granting a pension to Persis L. Hall; which was read twice by its title, and referred to the Committee on Pensions.

Mr. CHACE (by request) introduced a bill (S. 3636) for the relief of William McClain; which was read twice by its title, and referred to the Committee on Pensions.

HOUSE BILL REFERRED.

The bill (H. R. 3715) for the relief of the State National Bank of New Orleans, formerly Louisiana State Bank, was read twice by its title, and referred to the Committee on Claims.

EXHIBITS AT PARIS EXPOSITION.

Mr. MORGAN. Mr. President——

The PRESIDENT *pro tempore*. Does the Senator from Georgia yield to the Senator from Alabama?

Mr. BROWN. I will yield to the Senator from Alabama, but I shall not yield further. My remarks will not be lengthy.

Mr. MORGAN. I desire to call up the joint resolution (S. R. 115) authorizing the Departments of the Government to use articles in their possession for exhibition at the Paris exhibition of 1889.

The PRESIDENT *pro tempore*. Is there objection to the present consideration of the joint resolution?

Mr. HOAR. Let it be read for information.

Mr. MORGAN. I offer a substitute for it.

Mr. HOAR. Let the substitute be read.

The PRESIDENT *pro tempore*. The amendment will be read.

The SECRETARY. It is proposed to strike out all after the resolving clause and insert:

That the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Postmaster-General, the Secretary of the Interior, the Attorney-General, the Commissioner of Agriculture, the Secretary of the Smithsonian Institution, the Director of the National Museum, the Commissioner of the Fish Commission, and the Commissioner of Labor be, and they are severally hereby, authorized, in their discretion, to use for exhibition at the Paris Universal Exposition of 1889 such articles as may be available for said exposition, and that any unexpended balances of the appropriations for the Cincinnati Exhibition of 1888 may be applied for that purpose.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The PRESIDENT *pro tempore*. The question is on agreeing to the amendment proposed by the Senator from Alabama [Mr. MORGAN].

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

WASHINGTON AND WESTERN MARYLAND RAILROAD.

Mr. SPOONER. The Senator from Georgia kindly yields to me for a moment. I move that the bill (H. R. 9418) to incorporate the Washington and Western Maryland Railroad Company be recommitted to the Committee on the District of Columbia.

The motion was agreed to.

WILLIAM S. BRADSHAW—VETO MESSAGE.

The PRESIDENT *pro tempore*. Does the Senator from Georgia object to the reference of Senate bill 3208 and the veto message of the President to the Committee on Pensions?

Mr. BROWN. No, sir.

The PRESIDENT *pro tempore*. It will be so ordered, if there be no objection.

BUSINESS OF THE SESSION.

Mr. BROWN. Mr. President, the Constitution of the United States in Article I, section 5, says:

Each House shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, etc.

Neither House of Congress has the right to do business in the absence of a quorum, and Congress has certainly no right to do business in the absence of a quorum in either House. I suppose I may without transcending proper bounds say truthfully that there has not probably been a quorum in the House of Representatives, as shown by the different divisions called for and published, at any time within the last ten days or two weeks. And while I do not demand a call of the Senate at present, I suppose I may say with equal truth that there is not probably a quorum of the Senate now present, either in this Chamber or in the city of Washington, and that there is no reasonable probability that there will again be a quorum of either House present answering to their names before the first Monday in December.

It follows therefore that neither can do any business that is objected to by a Senator in one case or a Representative in the other. I submit, then, that we can do no legal act as a Congress in the present state of affairs, and that there is but one thing left that ought to be done, and that is, that Congress shall adjourn at the earliest day possible; and it might be much more convenient in getting away from here, if the adjournment should take place before there has been a formal test of the question whether there is a quorum present.

Now, why this extraordinary proceeding? We have already protracted the session to a greater length than was ever reached by any other Congress from the commencement of the Government to the present day. We ought to have a good excuse before our constituents for this protracted session, and we ought to be able to show something substantial that we have accomplished during ten and a half months of constant session.

It may be said that our salaries are the same whether Congress is in session or not; but the expense of Congress is very different when in session to the expense when Congress is not in session. Every day that we stay here we are wasting in salaries and hire of clerks, messengers, doorkeepers, printers, and other expenses, to say nothing of the bills that we are passing illegally without a quorum, large sums of money that ought not to be expended in the present state of things.

Now, why all this irregularity and this extraordinary conduct on the part of the Congress of the United States?

It all grows out of the fact that there is a Presidential campaign pending; that the two parties are jealous of each other, and each is constantly fearing that the other will get some advantage, and it grows out of the further fact that the two parties are divided on the tariff question, and while they both profess to be in favor of a reduction of revenues, so as to rid the country of the surplus in the Treasury and send it back into the proper channels of trade, still each party is afraid that the other will get the advantage in the manner of conducting the campaign by the legislation which may be enacted.

In the House of Representatives, which alone has the power to originate a revenue bill, the Democratic party is in the majority and controls the House. That party, from the time of the organization of the committees, which I believe was in January, down to the latter part of July, was occupied in considering, preparing, reporting, and passing a tariff bill looking to a reduction of the revenues and of the surplus in the Treasury. The House passed a bill and sent it to the Senate more than two months ago. The Republicans having a majority of the Senate, took up this question, by its Finance Committee, and a subcommittee took probably some two months in preparing a bill to be offered as a substitute for the House bill. This bill gives the Republican plan of reducing the revenues and disposing of the surplus in the Treasury. I do not think the Democrats in the House consumed more time than was necessary, in view of the great task that was before them, and I do not think the Republicans have consumed more time in the Senate than the necessities of the case required, or more than was necessary to do the labor of preparing a bill for a thorough revision of the tariff.

The Democratic House having fully discussed the measure, the Republican Senate was certainly entitled to reasonable time for discussion; but when we take into the account the fact that for the last sixth months or more the question has been almost constantly discussed in one branch or the other of Congress, and in the public press, and by politicians in every portion of the Union, it can hardly be expected that much that is new can be produced in the discussion in the Senate at the present time. Distinguished Senators have already made able speeches on the question, throwing much light upon it; and able and distinguished Senators may still follow and discuss the same question in different forms and under different headings, but after all the argument must be substantially the same that we have already heard.

Now, in this state of the case, with no quorum of either House present, I do not think any one will say that it is possible to pass a tariff bill at this session of Congress. Suppose the Senate should remain in session and discuss the bill for another month, or until the first Monday in December; and taking it by sections it would probably take that length of time, as it took more than that length of time in the House to discuss it in detail by sections. Then, if the Senate should pass its bill and send it back to the House as a substitute for the House bill, the question must go to a conference committee, and there would be no reasonable probability, pending the Presidential campaign, that the two Houses would agree upon a bill that would become a law. In this state of the case what earthly use is there for continuing the session?

There certainly is no good excuse for its continuance for another day, unless it is claimed that the Republican party in the Senate has not had an equal chance with the Democratic party in the House for the discussion of the question. But there is certainly no reason why the debate should be as protracted in the Senate as it was in the House, when we have the able debate in the House by the leading orators of both parties before us for our information. Now I see no reason why an adjournment should not be agreed upon at once, unless the Republicans will state that they do not feel that they can safely go to the country on their substitute without further discussion, or that they believe they can pass a tariff bill at this session.

Let it be borne in mind, however, that the question has been very ably discussed by the chairman of the committee, Mr. SHERMAN; and Mr. ALLISON, who has the bill in charge, made a lengthy and at the same time a very able presentation of the views of his party on the question. He has been followed by the Senator from New York, Mr. HISCOCK, the Senator from Illinois, Mr. CULLOM, the Senator from Rhode Island, Mr. CHACE, and the two Senators from Connecticut, who have ably expounded their side of the question.

On the other hand, the Democratic side has been very ably presented by the Senator from North Carolina, Mr. VANCE, the Senator from Tennessee, Mr. BATE, the Senator from Florida, Mr. CALL, the Senator from Texas, Mr. REAGAN, and others are still to be heard.

It seems to me, when two weeks have been taken in the able presentation of the case by the distinguished orators on both sides whose names I have just mentioned, that there is little left for others to say.

I do not by these remarks intend to be understood as claiming for either party an advantage over the other in the discussion, and I do not say that the Republicans with propriety might not continue the discussion and attempt to pass their bill if there was a quorum present.

Let it be borne in mind, however, that a majority of the Senators belonging to each of the political parties, including several of the most distinguished leaders on each side, are now absent.

In this state of the case I take it that no vote can be had upon the bill, and no good can come from protracting the discussion. If we can not at this session pass a tariff bill, we ought without further delay to adjourn *sine die*, and let the bill go over until the December session. I do not believe, after the long discussion that has already been had on the question, both in and out of Congress, that either party is making a single vote by protracting this debate in this Chamber.

The intelligent people of the United States have no doubt made up their verdict on this question, and they only wait for the election to make up the record. If anything can be done to influence them either way, it will be better done by meeting the people face to face and discussing the question in their hearing than it can be done by sending out speeches from this Chamber, which, by the time they are now prepared, printed, and sent out, will not be generally read, and would not probably influence to any great extent the popular verdict.

The most that can be done by either party in the short remaining period of the campaign will be to see to it that they get their people to the polls.

I do not propose to demand a call of the Senate, or to make any point to test the question of quorum or no quorum for the present, as I understand there are two or three Senators who have already prepared tariff speeches that they desire to deliver; but I do not believe that other legislation ought to be proceeded with until there is a quorum present to take part in the deliberations of the Senate, and to cast their votes on all questions that come before the body, and to discharge their duty as Senators.

A majority of the Senate have no right to leave their seats in this Chamber and go home to engage in the campaign or in other business, and leave a minority here to protract the session, which has already been longer than the people of this country approve.

Now, Mr. President, I desire to ask the Senator from Iowa [Mr. ALLISON], who has the bill in charge, if he sees any possible chance to pass a tariff bill at the present session of Congress and in the present state of things, when there is not a quorum of either House present and no probability that we can get a quorum before the December session?

Does the Senator from Iowa expect under any state of the case to be able to pass the bill through both Houses in any shape at the present session of Congress? If there is to be a tariff bill passed by the Fiftieth Congress, is it not now inevitable that it must be done by the next and not by the present session of Congress?

Mr. COCKRELL. Mr. President, I——

Mr. BROWN. I desire to have the Senator from Iowa answer my question.

Mr. COCKRELL. I yield to the Senator from Iowa.

Mr. ALLISON. Mr. President, the Senator from Georgia [Mr. BROWN], I think, in the main has very well stated the situation, and therefore it is hardly worth while for me to answer in any great detail the specific questions submitted by him.

I do not now see, I will say frankly to the Senator from Georgia and to the Senate, that it is possible to pass through the Senate during the remainder of this session the revenue bill under the circumstances which surround us. Three weeks from to-morrow we have a Presidential election. I think it will be conceded by all that Senators should have an opportunity of going home in a reasonable time for the purpose of participating in that election. So, unless we are to sit here continuously until the 1st of December without a recess or adjournment, I do not think it possible to pass this bill through the Senate.

The next question is, whether I believe if we should stay until the 1st of December or until such time as we should get this measure fully and intelligently presented, that then the bill could pass the other House? As I understand, the rules of the House will require that the bill when returned shall go to the Committee of the Whole. Therefore should the bill go through it would result in some weeks of discussion, and should there be at once a conference ordered, it seems to me that under the circumstances it would be impossible to complete the bill before next December.

There is another thing which I ought to mention, and that is that we should have in the consideration of this bill a full Senate, and without saying anything respecting why we have not a full Senate I think Senators will all agree with me that that is impracticable and impossible for the next few weeks. I do not believe that Senators will remain here in session for the next three weeks to consider this bill pending the Presidential election, nor do I believe that we are called upon to do so.

The Senator from Georgia states that this is the longest session known in our history; but it is a fact that to this day and to this hour, laying aside this tariff question entirely and absolutely, this Senate and this Congress are not ready to adjourn. That is a most extraordinary circumstance.

Mr. GEORGE. Will the Senator repeat that statement?

Mr. ALLISON. I say, laying aside the question of the tariff entirely, this Congress is not this day and this hour ready to adjourn if it discharges fully the duties which are required of it. We have the most extraordinary situation as respects the appropriation bills. One of the important appropriation bills of this session, one affecting a vast number of people, and in many instances very many poor people, the general deficiency bill, has not yet received the signature of the President of the United States. It was only transmitted to him, I think, last Friday or last Saturday. Therefore, whatever may be said as respects the discussion of the tariff bill or its consideration in the other House or in this Chamber, there has never yet been a moment when either House could afford to adjourn on account of the appropriation bills which are necessary to carry on this Government. The most important appropriation bill in the whole list was signed, I believe, only one week ago. Clearly, then, whatever delay has occurred at this session of Congress has not occurred in this Chamber because of the consideration of the tariff bill or the want of that consideration.

Mr. President, the appropriation bills have been considered in this Chamber as they came to us with all the diligence that was possible under the circumstances and in the situation that surrounded us. We have given in the Committee on Appropriations such consideration as we could to those bills and reported them promptly to the Senate of the United States. Therefore, whatever may be the situation now, it does not arise in this Chamber from the consideration of the tariff bill. It arises wholly, so far as we are concerned, from the fact that the appropriation bills did not come to us as they usually come to us, in the early period of the session, and as under the former rules of the House of Representatives and the universal custom of that House they heretofore come to us. So this delay in the appropriation bills is the primal cause of the situation as respects the Senate to-day.

The Senator from Georgia says that the House of Representatives considered the tarift bill and sent it to us during the last week of July. That is true, and it is also true that the Senate Committee on Finance took up the bill with all the care and diligence possible, and reported it to this Chamber at the earliest day practicable. It is also true that since that report has been made we have been engaged here in a general discussion of it, and I know perfectly, as the Senator from Georgia knows, that other gentlemen desire still to be heard upon the measure on both sides of the Chamber.

So I concur with him in the view that it is not possible for us to take up the tariff bill, beginning even to-morrow, and consider it under the ten-minute rule, to pass it, as this bill should be passed, before we return to our respective States for the great Presidential election which is pending.

Now, whether we should take a recess and come back here within a few weeks after that election and go on with this bill, I leave very much to the judgment of Senators on both sides of the Chamber. It has fallen to my lot to have charge of this bill. It is my purpose, I will say to Senators, to pursue it with whatever facility it can be pursued in this Chamber until it is finally disposed of. I am willing to allow a reasonable time for general debate upon it, but after a reasonable time I shall ask both sides of the Chamber to consent that we shall take up this bill paragraph by paragraph, and debate it under the ordinary five or ten minute rule respecting each paragraph.

Whatever we may do now, whether we adjourn to-morrow or next day or next week, we ought to have an understanding in this Chamber that when we return here this shall be the first and the primal business for our consideration, whether it be in November or December, and that we shall give vigilant care and attention to it in order that it may go to the House of Representatives before the Christmas holidays, and if I have my way I shall undertake to pursue this bill to the exclusion of all other business in order that that may be accomplished.

Therefore, Mr. President, having said thus much upon this bill and upon the other questions that have detained us here, I am willing to submit to the judgment of the Senate as respects its further consideration.

THE REVENUE LAWS.

The PRESIDENT *pro tempore*. House bill 9051 is the unfinished business.

Mr. COCKRELL and Mr. VEST addressed the Chair.

The PRESIDENT *pro tempore*. Does the senior Senator from Missouri yield to his colleague?

Mr. COCKRELL. Yes, sir.

Mr. VEST. Does the Senator from Iowa desire that we should go on with the discussion this afternoon? I should like to make a motion to go into executive session.

The PRESIDENT *pro tempore*. The Chair will recognize the Senator for that purpose. Does the Senator submit the motion?

Mr. ALLISON. I know the Senator from Missouri [Mr. COCKRELL] does not wish to proceed to-night, but perhaps some other Senator who does not wish to occupy much time is ready to go on this evening. If so, I should prefer we should go on for some time to come.

Mr. VEST. Mr. President, I will go on.

Mr. COCKRELL. I hope my colleague will yield unless the Senator from Wisconsin [Mr. SPOONER] desires to speak.

Mr. ALLISON. I understand the Senator from Wisconsin is ready to go on this evening. We can have an executive session at a later hour.

Mr. VEST. I had just as lief speak now.

Mr. COCKRELL. Very well. I will not make the motion I was about to submit.

Mr. VEST. I have no prepared speech on the tariff. The issue has been made up and has gone to the country. What I desire to submit in a very few moments will be upon some questions which have arisen in the current debate on the report and bill that have come from the majority of the Finance Committee.

The Senator from Iowa [Mr. ALLISON], who represents the majority of the committee, has just stated that the delay in disposing of tariff legislation has come from the House of Representatives. My reply to that is simply this, that in the Forty-ninth Congress the Democratic party in the House tried to consider the tariff question with a view to readjusting the tariff and diminishing the rates of duty now imposed. The Republican party, with a unanimity never seen before upon any great question, assisted by a few Democrats, succeeded in postponing entirely the consideration of this question. That record is an answer to the Senator from Iowa, complete and irrefutable.

The country understands this whole arrangement; the country understands that the Republican party does not wish to pass any tariff bill. The manufacturers in the East are to be told that they will receive additional protection, if necessary, and the grangers in the Northwest are to be deluded with a promise of a reduction of duty upon the necessaries of life. That is the status of this question to-day, and no amount of assertion or eloquence or argument will change the conviction of the people of the United States in that regard.

But, Mr. President, what I desire particularly to notice is a charge made in the national platform of the Republican party to the effect that this Administration has placed with pet banks $60,000,000 of the public money when that amount should have been applied to the purchase of bonds and the reduction of the bonded debt of the country. The majority of the Committee on Finance have gone away from the logical and I might almost say the legitimate discussion of the tariff question to make this charge, that the Democratic Administration has taken $60,000,000 of the public money and for purposes of favoritism has put it in certain national banks throughout the country.

There has not been a speech made in this Chamber which pointed toward a political subject within the last five months where this charge has not been reiterated. "The uncrowned king of America" with his characteristic aggressive eloquence has recently stated that Mr. Cleveland had put this money into the pockets of certain rich Democrats in Wall street—a charge of corruption, a charge that should damn this Administration in all history and for all time to come, if true.

Now, Mr. President, I propose to show what there has been of favoritism toward pet banks in this country. I propose to investigate the question whether or not enormous amounts of money have been put into the pockets of Democrats by this Administration as charged upon this flocr and in the public prints and by stump-speakers throughout the country.

Mr. Blaine, with his characteristic indifference to actual figures and facts, and with that glittering sort of spasmodic eloquence which characterizes his effusions, recently stated that this Administration was putting in the pockets of its favorites $3,000,000 every year, being 5 per cent. upon $60,000,000 deposited with the national depositories; and he was pleased to observe in a speech lately made in which he is said by his friends to have annihilated the Postmaster-General, Mr. Dickinson, quoting from Charles James Fox, that ignorance in a Cabinet minister was utterly inexcusable. Now, if ignorance in a Cabinet minister be inexcusable, what must be or what could be the excuse for certain statements made by the ex-premier of a Republican administration and an ex-candidate for the Presidency?

Mr. Fairchild, in his speech on Saturday last in New York, so effectually disposed of Mr. Blaine's argument that I will quote his remarks in full:

WHAT BANKS EARN ON DEPOSITS.

Mr. Fairchild here quoted Mr. Blaine's assertion that with money at 5 per cent. a deposit of $60,000,000 would be a gratuity to the national banks holding the money of $3,000,000 a year.

This is not true. There are a number of banks with deposits of a million and over. I have in mind a half dozen where I know the officers to be prominent and zealous Republicans, and I can think of but one where the officers are Democrats of prominence. So much for the politics; now for the profits. Mr. Blaine says that a deposit of $1,000,000 is worth to the depository $50,000 a year. Let us see. A deposit of $1,000,000 would require $910,000 of 4 per cent. bonds as the security, which at 125 would have cost $1,137,500. This money, loaned at 5 per cent., would have given the bank $56,875 if the bank had not become a depository, but being a depository, it must keep 25 per cent. of the deposit as a reserve, so it can loan but $750,000, which produces $37,500 interest. Now add the interest on the United States bonds, which Mr. Blaine, with horror, says that the banks are allowed to collect—4 per cent. on $910,000 is $36,400—and you have $73,900 received by the depository. But from this should be deducted 1½ per cent., the yearly proportion of the 25 per cent. premium, which the owner of the bonds must lose when the bonds are paid at maturity, twenty years from date of purchase, and there is left $62,525, the difference between which and $56,875, is $5,650, not $50,000 as stated by Mr. Blaine.

So that, Mr. President, by the plainest rules of arithmetical calculation, instead of a profit of $3,000,000 a year which exists in the imagination of "the uncrowned king of America," the profit on the whole amount of the deposit, even putting it at $60,000,000, which it never was, would amount to $339,000 a year instead of $3,000,000, a mere bagatelle of two million and some six hundred thousand dollars, but it is as near exactitude as "the uncrowned king of America" ever reaches when attacking the Democratic party.

If Senators will take the trouble to look at Executive Document No. 248, they will find a list of the national depositories which have received from the Treasury fifty-eight million and some hundred thousand dollars of deposits of the public money. It is said that this money was put out through the country to favorites and pet banks. I have here a list made out with absolute exactness of the amount of money that is now in the depositories of the United States, amounting in the aggregate to $58,527,076.78 to this date. I have here a statement of the amount of money placed in the depositories of each State, and the State of Massachusetts, hopelessly Republican beyond any sort of peradventure, has more money in its national depositories in proportion to population than any State in the entire Union. Take the State of Ohio, also a hopelessly Republican State judging from all its political antecedents, and Ohio has $7,014,055.21, and Massachusetts, as I omitted to state, has $6,668,831.68.

The largest State in the Union and the great financial State of the entire country, in which is located Wall street and where is the financial heart of the United States, has $13,354,618, with her enormous population, while six millions and some hundred thousand dollars are in Massachusetts with one-fourth of the population, and $7,000,000 and more in the hopelessly Republican State of Ohio, whilst in the Southern States there is a mere pittance, because, Mr. President, under the operation of the tariff system the money of the country is in the North and in the East and not in the South and West. The national debt and the bonds of the Government are held in the nine manufacturing States in a proportion outside of all legitimate proportion as to population and territory. This system has put the money of the country there, and the national banks are found in a larger proportion in those States than elsewhere.

But, Mr. President, I propose to look into this question of favoritism to pet banks. This is not the first time that the national banks in this country have been used as fiscal agents of the Government. They are by law made the fiscal agents of the people of the United States, although they have at times forgotten that agency and assumed to be the master and to control the moneyed interests of the people who own them.

In 1879, when the Treasury of the United States under a Republican administration desired to sell the 4 per cent. bonds and to fund the outstanding bonds of the Government issued before that time at a larger rate of interest than 4 per cent., an institution in the city of New York, the First National Bank, was in intimate relations with the Treasury Department of this Government, and I have taken the pains to collect from official sources the remarkable exhibit which is now upon record in the Treasury Department in regard to that institution.

Recollect, Mr. President, that now there are $58,000,000, speaking in round numbers, of public money in the national depositories scattered all over this country—North, South, East, and West. From the account current which I hold in my hand it appears that the First National Bank of New York owed the Government of the United States on April 16, 1879, $185,270,787.95; on May 1, 1879, $180,344,941.75; on June 1, $151,076,952.94; on August 1, $57,963,086.50; and on the first of the next month, September, it owed the Government $20,065,014.39.

This was not for money deposited, but it was for bonds sent to that bank, it being indebted, according to this account current for the months I have stated, the enormous amounts which its officials controlled and managed as a matter of course for the benefit of their stockholders.

My friend from Alabama [Mr. MORGAN] asks me what security was given. None. The money that is now out in the hands of depositories is secured by a deposit of United States bonds, and not one dollar of it is put into a depository until the bonds are placed by that depository in the national Treasury.

Mr. ALLISON. Shall I understand the Senator to say that there was no security in the case of the First National Bank of New York?

Mr. VEST. Not that I know of. Will the Senator state what security there was?

Mr. ALLISON. United States bonds for every dollar of it. It was secured by United States bonds.

Mr. VEST. As I understand the transaction, the First National Bank of New York was made a fiscal agent of the Government to dispose of the 4 per cent. bonds. They were permitted to pay in bonds of the Government, which we sought then to refund, instead of money, and the only security that the Government of the United States had was in the fact that these bonds were paid over or cash was paid over on this current account from time to time. I propose to put the account in the RECORD, and the Senator from Iowa will see that they paid, for instance, in the city of Washington a large amount, $256,135, and so on from day to day in bonds, bonds of the Government that were to be refunded, and then in another column is their cash account.

There are two accounts, one of the First National Bank of New York

as a corporation, and the other of the syndicate which they represented, but in either event they sent orders by telegraph for bonds, one of those telegrams being for the enormous sum of $190,000,000 of bonds. When these telegrams were received the bonds were sent and the bank was charged with the amount. I will insert the accounts in the RECORD:

Statement showing the payments made by the First National Bank of New York from April 16, 1879, to October 17, 1879.

Date of payment.	Account No. 1—General.		Account No. 2—"Syndicate."		Total payments as per transcripts.	Balances.
	Cash paid in New York.	Called bonds paid in Washington.	Cash paid in New York.	Called bonds paid in Washington.

*San Francisco.

Mr. HOAR. May I ask the Senator a question?

Mr. VEST. Certainly.

Mr. HOAR. Does the Senator understand that the First National Bank of New York received that money as an ordinary deposit or had any right whatever to use it or make any money out of it itself? Was it not a mere agency between the persons who surrendered the old bonds and the persons who took the new bonds through a Government establishment in New York for public convenience?

Mr. VEST. We shall see about that.

Mr. HOAR. That is the question I put.

Mr. VEST. The question is a question of actual fact about which I know nothing. I only judge from the record. Here is an account current which shows a vast indebtedness from that bank to the Treasury of the United States. I do not pretend to say that that money was deposited as this present money is deposited in national depositories, but the effect has been just the same; the only difference is in the profits which have been gathered in the one case and in the other from the money of the Government.

Here is a great fiscal necessity resting upon the Government of the United States. It must use these national banks. What has this Administration done? It has publicly, openly, without sectional feeling, without prejudice, without oppression, scattered this money all over the country in different national depositories, and as I have shown from the record without any political purpose whatever.

But what was done by the Republicans when in power? Instead of putting the money all over the country so as to give every section a just proportion of the benefits, these gentlemen who now talk about pet banks, put enormous amounts of money under the control of the First National Bank of New York, and I will show beyond any sort of question that such profits were made out of that transaction as are unknown in the financial history of the whole world.

Mr. ALDRICH. Will the Senator allow me to ask him a question right there?

Mr. VEST. Certainly.

Mr. ALDRICH. Does he think that this distribution of the public money under any circumstances among the national banks is justifiable?

Mr. VEST. If I had my choice I would not put one dollar of the public money in these banks—not one dollar, speaking for myself; but Mr. Fairchild stated in his answer to a resolution of Congress the reasons for having pursued this course.

We were confronted, as the majority of the Finance Committee stated in their report, with a surplus of at least $60,000,000 which was increasing day by day. What were we to do with it? "Buy bonds," says the Senator, and yet the reports of the transactions in bonds, which I have here, show that the Government when it made a purchase of bonds advanced abnormally and extravagantly the premium upon those bonds in the open market.

No more delicate operation could have been undertaken by any administration than the purchase of bonds at enormous premiums. When these purchases commenced bonds were bought at 25 per cent. premium, and ran up at once to 26, 27, and 28, which was an enormous advance in public securities. The Secretary of the Treasury was forced to refuse large numbers of bonds, because nobody knows better than my friend from Iowa that if he had gone into the market and offered to take an enormous amount of bonds, approximating to the whole of the surplus, they would have immediately gone to a premium which would have put them beyond the reach of any Secretary of the Treasury unless a lunatic. Mr. Fairchild explains this fully.

Forty-eight million dollars of bonds have been purchased, and they must have been purchased with a view to the financial condition of the country. The Secretary could only purchase so as not to pay an enormous premium and at the same time relieve the money market from the stringency which was then existing. If he had gone in without regard to the condition of the country, if he had thrown the whole of this surplus into the bond market at once, there would have been an advance in the premium unprecedented in the financial history of this country.

Mr. CHACE. Will the Senator allow me a question?

Mr. VEST. What is it?

Mr. CHACE. Did not the Secretary of the Treasury decline bonds that were offered to him?

Mr. VEST. As a matter of course he declined.

Mr. CHACE. And could he not have bought those bonds so as to save the Government a large amount of interest?

Mr. VEST. The Senator will give me time to explain why in my judgment it would have been inexpedient and imprudent for him to have done that thing. Suppose the Secretary of the Treasury had taken all the bonds that were offered, he knew very well that Wall-street speculators were attempting to force the Treasury to buy the bonds so as to increase the premium.

Mr. CHACE. But if he had taken the bonds he would have saved the interest on them.

Mr. VEST. He would have saved some of the interest beyond any sort of question, but what would he have lost to the people of the United States in the increased premium, because every time he purchased the premium increased?

Mr. CHACE. Did he get any interest on the money he put in the banks?

Mr. VEST. I do not know that he got any interest upon it, and there is no pretense that he did.

Mr. CHACE. Then is it not the fact that he refused to buy bonds with the Government's money when by buying them he could have saved interest, and put the money in the banks and got no interest?

Mr. VEST. I would prefer that the Senator should make his own speech in his own time. He is simply making an argument in the guise of a question.

Mr. HOAR. Will the Senator allow me to ask him one question and then I will promise not to ask another? Did not the Secretary when he lent these $60,000,000, or $58,000,000, to the banks, as the Senator has just stated, compel those banks to purchase bonds for security and thereby raise the price of bonds just as much as if he had bought them himself?

Mr. VEST. That matter is fully discussed in Mr. Fairchild's report.

Mr. HOAR. I should like to hear the Senator's view.

Mr. VEST. He says that in his judgment that was not the result. But it is impossible to arrive at anything except an approximate answer to that question.

Mr. HOAR. The banks bought the bonds and got currency for those bonds?

Mr. VEST. That was a question for the banks to determine. If they wanted the public money deposited with them, they were compelled to deposit the bonds; and if they did not have them, to purchase them and deposit them as security for the bonds.

Mr. HOAR. That put up the bonds.

Mr. VEST. What was the effect of the purchase of these bonds it is impossible for me or any other living man to answer. The bond market was manipulated in the city of New York and by interests which in a monetary sense were adverse to the Treasury. The Treasury of the United States was simply in the condition of any other purchaser of bonds in the market; it was compelled to consider the existing circumstances. It was compelled to watch its monetary adversaries, and it was compelled to keep down enormous premiums and at the same time to prevent a panic in monetary circles.

Mr. TELLER. Will the Senator allow me to ask him a question?

Mr. VEST. Certainly.

Mr. TELLER. I should like to have the Senator tell the Senate and the country how many of these bonds were rejected at 26¼, at 26½, and at 26¾ premium to be subsequently bought at 28, 29, and 30?

Mr. VEST. I have a full statement here. It is accessible to the Senator, and I will put it in the RECORD.

Mr. TELLER. I want the Senator to tell us——

Mr. VEST. I am not able, because——

Mr. TELLER. The Secretary's statement does not show it.

Mr. VEST. It does show it; it does show the purchases which were made and the premium that he paid on every bond purchased. I admit, and that is my statement here over and over again, that with every purchase that was made by the Treasury Department the premium on the bonds advanced, and that was the trouble in this whole transaction. It was not the plain, open purchase without any other result except that one man took the bonds and another took the money, but the Secretary was compelled to watch the condition of the money market and bond purchases in the city of New York.

Mr. TELLER. Will the Senator allow me to ask——

The PRESIDENT *pro tempore*. Does the Senator from Missouri yield?

Mr. VEST. I prefer that Senators would answer me afterwards, but I am a yielding man.

Mr. TELLER. Does the Senator yield?

Mr. VEST. Oh, certainly.

Mr. TELLER. I want to ask the Senator if he is not aware of the fact that when the Secretary of the Treasury said he would take bonds at 124 he was receiving a large number of bonds at 124 when he discontinued the purchase, and that no bonds went up until he had given to those bonds a fictitious value by allowing the depository banks to become the holders of Government money?

Mr. VEST. I do not know that fact.

Mr. TELLER. Then I will take occasion to enlighten the Senator.

Mr. VEST. Very good. Let the Senator do that. This is an open debate with a fair field and no favors asked. You can show it.

I say in this whole transaction, and I have gone through it as carefully and as patiently as I could, the Secretary of the Treasury has honestly endeavored to administer the functions of his great office without favors, and certainly without any personal consideration as to himself.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., October 11, 1888.

Statement of bonds purchased under circular of April 17, 1888, *to June* 30, 1888.

	Bonds.	Premium.
Four per cent	$18,282,100	$4,839,578.71
Four and one-half per cent	8,337,550	579,247.87
Total	26,619,650	5,418,826.58

Bonds purchased October 9 *and* 10, 1888.

	Bonds.	Premium.
Four per cent	$4,473,200	$1,297,228.00
Four and one-half per cent	7,161,650	608,740.25
Total	11,634,850	1,905,968.25

It is very well known, and Mr. Fairchild stated it frankly, that the President of the United States had doubts in regard to his power to purchase bonds, and it is an open secret that the Attorney-General gave him the opinion that he did not have that power beyond any question, but it was a doubtful power at best, and Mr. Cleveland in accordance with his character and antecedents as President of the United States, refused to exercise a doubtful power and openly declared that he would not purchase bonds until Congress had authoritatively given him the power to do so, or made an expression of its opinion in regard to that law. All of us are familiar with the legislation that was had on that account, how a resolution that came from the House of Representatives was attempted to be amended by the Senator from Kentucky [Mr. BECK], and finally passed in the shape of a declaration of opinion by the Senate and House of Representatives that the power existed. I believed that that power existed, but there were lawyers better than myself who did not believe it.

Mr. ALLISON. Will the Senator allow me to interrupt him there to make a historical statement respecting that bill?

Mr. VEST. Certainly.

Mr. ALLISON. That bill came to us from the House of Representatives and the Senator from Kentucky put on it an amendment.

Mr. VEST. I recollect it.

Mr. ALLISON. And that amendment passed here, but it went back to the other House and slept the sleep of death there.

Mr. VEST. As a matter of course the record shows it and I am obliged to my friend, but there was no necessity for the information.

The point I make in the whole matter in regard to the action of Congress is this, that the overwhelming sentiment of both Houses and of the lawyers of both Houses was to the effect that the power existed, and when Mr. Cleveland was satisfied that this was the opinion of the lawyers in Congress and the overwhelming opinion of the legal profession throughout the country, he immediately ordered the purchase of bonds, and the purchase commenced within two days afterwards as the record shows, and $48,000,000 of bonds have been purchased since that time.

I have heard it stated that the Treasury Department purchased bonds before Congress had passed this resolution or considered it. It is not true, Mr. President. No bond was purchased, except for the sinking fund, prior to the time that Congress passed upon this resolution, and the first circular was issued on April 17, two days after the resolution had been considered in the Senate and the House.

But the Senator from Massachusetts asked me if in 1879 the First National Bank of New York was not acting simply as a fiscal agent of the Government, and if it had any right to make money out of the transactions between it and the Government of the United States, under which it bought bonds and transferred them to the Secretary of the Treasury in exchange for 4 percents, or paid cash.

Mr. HOAR. The Senator, I think, misunderstood my question. My question was whether it had a right to make money out of this fund.

Mr. VEST. I do not know whether it had the right or not; I know it did; and that is the point I am coming to. I am coming to the point that is made in every speech and in every Republican newspaper in the country, that there are pet banks in New York. I want to show a pet that was petted and caressed as never was any dainty darling before. I want to show a pet that was the pet of pets, and nothing like it has ever been seen in the financial history of the world.

I have made a compendium of the history of this bank. I do not blame the bank; I do not blame its officers; their business is to make money. I am talking now about a system adopted by a Republican administration, whose supporters taunt us with having pet banks in the city of New York to put money into the pockets of rich Democrats.

The First National Bank of New York—I speak from the record—was organized in July, 1863. The capital stock, at first $200,000, was increased to $300,000 in December, 1863, and in April, 1864, to $500,000, at which figure it has remained ever since. Up to the end of 1877 the bank had paid moderate dividends and had gradually accumulated a surplus of over $700,000, so that it began the year 1878 with a little over $1,200,000 working capital. The total profits of 1878, according to the table, were $466,000, to which must be added dividends of 52 per cent. on $500,000, which somehow do not appear in the Chronicle's tables, making $260,000 more, or over $700,000 profits in one year, about 60 per cent. on $1,200,000. The stockholders got $320,000 in dividends, and the stock of the bank is quoted in the Chronicle January, 1879, at $400 per share of $100.

At the beginning of 1879 the surplus was $1,760,000, making the working capital $2,260,000, and the profits of that year amounted to $1,225,000, which is nearly two-and-a-half times the capital proper and 60 per cent. of the compounded capital and surplus.

Starting with an investment of $1,236,700 on the 1st of January, 1878, this fortunate institution in five years realized $4,486,000 in profits. Of this amount $2,740,000 was added to its surplus, and $1,746,000 was paid in cash dividends.

Since 1882 the profits have not been so conspicuous, but in 1886 they run up very near to $1,000,000.

It is a fact that commencing with $200,000 capital, which was increased in April, 1864, to $500,000, this bank has realized in net profits over $10,000,000, which is 80 per cent. per annum for twenty-five years on $500,000.

Mr. TELLER. Will the Senator allow me to ask him a question?

Mr. VEST. Certainly.

Mr. TELLER. Does the Senator mean to say that the bank made those profits on Government deposits?

Mr. VEST. I mean to say that the basis of their enormous profits was laid in 1879 through this relation with the Government.

Mr. TELLER. That is not the question. I want the Senator to answer it.

Mr. VEST. I will not yield any further. I prefer to make my own argument in my own way, and the Senator can criticise it afterwards.

Mr. TELLER. If the Senator declines to yield, it is all right.

Mr. VEST. I want to be entirely fair, and certainly not ill-natured, but I should like to proceed with my statement consecutively.

I do not mean to say that all this was made out of Government money, but I say this bank, which had only made ordinary dividends up to 1879, in that year laid the basis of all the profits which its stockholders have since received. I will show it from the record. In 1878 that bank made 12 per cent.; in 1879 it made 120—think of it—120 per cent., and it only made it after these bond transactions with the Treasury of the United States. Here is a list of its dividends taken from the record: In 1873, 15 per cent.; in 1874, 14 per cent.; in 1875, 11 per cent.; in 1876, 12 per cent.; in 1877, 12 per cent.; in 1878, 12 per cent.; in 1879, 120 per cent.

Table showing capital, surplus, dividends, etc., of the First National Bank, New York City, at the dates named, the items being taken from the New York Financial Chronicle.

* Investor's supplement.
† The figures in these three columns are obtained by computation from those given by the Chronicle.

Mr. TELLER. Will the Senator now tell us how much deposits they had in 1879?

Mr. VEST. I do not know how much deposits they had.

Mr. TELLER. I mean Government deposits.

Mr. VEST. They handled $120,000,000 of 4 per cent. bonds, I know, as shown by this account, in 1879. They subscribed at one time by telegraph for $190,000,000 of 4 per cent. bonds, and the telegram is on file now in the Treasury Department; but they got $120,000,000, and the bank which the year before and all the years before had only declared 12 per cent. dividend declared 120 per cent.

Mr. BLAIR. Was that the result of commissions for placing the bonds?

Mr. VEST. I do not understand anything about it. Here is the account, and that is all I know.

Mr. BLAIR. I am glad you do not know anything about it.

Mr. VEST. Let the Senator attend to pensions. I am now on this question and I want to get through it as intelligently as I can with my poor capacity.

Mr. TELLER. I do not like to interrupt the Senator.

Mr. VEST. I will yield.

Mr. TELLER. Does not the Senator know that the profit was not made out of the Government, but that this bank acted as the banker for a large syndicate of people who were purchasing bonds, and that the profit was made out of those people and not out of the Government?

Mr. VEST. I understand Mr. Blaine to say that the $3,000,000 a year on the $60,000,000 of Government money is made out of the people of the United States, and he used the expression in his speech at Grand Rapids, picking out some old granger in the crowd as an exemplar of the horny-fisted yeomanry of the country, and said, "My friend, your money and mine is being loaned out by these banks at 5 per cent. interest."

Mr. TELLER. The Senator will allow me to say that that is no answer to my question. The Senator is dealing with this question as a Senator, and he is dealing in the presence of the American people, and I want to know whether he, as a Senator on this floor, dares to charge that they made this large amount of money out of the Government of the United States, or any money out of the United States, because that is the only point with which we are concerned, not what they made out of other bankers.

Mr. VEST. It is hardly necessary for the Senator to inform me that I am in the presence of the American people, and that I am dealing with this as a Senator.

Mr. TELLER. It did seem so to me.

Mr. VEST. I do not undertake to say that this money was paid out of the Treasury of the United States directly. I am talking about the question of pet banks.

Mr. TELLER. Was it so made indirectly?

Mr. VEST. I say it was made by reason of the favoritism shown to that bank in its fiscal operations with the Treasury of the United States, and the record shows it.

Mr. TELLER. Does the Senator mean to say that that bank had any privilege not granted to every other bank in the United States?

Mr. VEST. Certainly, as a matter of course, Mr. President, or my speech would not be worth anything. I mean to say that this enormous dividend was not declared by any other bank.

Mr. TELLER. That is not the question. Did the Government extend to this bank privileges it did not extend to any other? I want to know whether the Senator will say that.

Mr. VEST. As a matter of course, because they made this bank the fiscal agent and gave them the privilege of buying other bonds and they accepted for the 4 percents, and the account current here shows that the Treasury allowed an enormous amount to be overdue for months from this bank. That was not a good year for national banks either. I want to read from the remarks of the then Secretary of the Treasury, who is now Senator from Ohio [Mr. SHERMAN], for 1879, the year that this bank declared 120 per cent. dividend. Here is what he says:

> The effect of the business depression prevalent from 1873 until the resumption of specie payments upon the national banks is shown in the losses which they have sustained and the dividends which many have been compelled to pass; also by the noticeable diminution, from year to year, in the aggregate surplus.

But this was an oasis in the financial desert. Instead of their having diminished profits the profits were enormous beyond anything known in financial history for the amount of capital invested.

But, Mr. President, we are told by our friends on the opposite side of the Chamber that the responsibility for this condition of the Treasury of the United States rests upon the Democratic party. I have alluded to the fact that the Democrats in the House of Representatives twice attempted to consider this matter of the tariff, and were defeated by the solid Republican vote, with a few recalcitrant Democrats. Why did not our friends on the other side offer a tariff bill in the House if they wanted to reduce the surplus, as they said they intended to do in their national platform of 1884? Why did they make no attempt to reduce it? Instead of considering the question at all they voted it down, and then taunted the Democratic party with the fact that they had sent no bill to the Republican Senate from a Democratic House of Representatives.

Mr. ALDRICH. I will answer the question, if the Senator wants an answer.

Mr. VEST. I prefer to let the Senator answer it afterwards. I have no doubt he is entirely competent to do it. I will listen to my friend from Rhode Island with a great deal of pleasure. No one has a higher opinion of his ability than I have, especially his ability on tariff questions, and if he wants a certificate from me, I will tell the people of Rhode Island that he is the most valuable Senator they have ever had on this floor. If they were to defeat him for the Senate, after reading this bill which he has reported here, they would deserve to be blotted out from the list of States. The fine Italian hand of my friend from Rhode Island is evident in every line of this bill. I say it with the kindest feeling to him. He represents his people and I am representing mine. The difference between us is that he is getting an undue proportion of the money of the country at the expense of my constituents, in my opinion.

Mr. President, I have taken the trouble, through the most valuable expert, I think, in the Treasury Department, to reduce to a reasonable compass the Senate substitute for the Mills bill, and I want to show what the reduction of taxation has been. I will ask to put these tables into the RECORD so that they can be open to inspection and criticism, but I want to give the result of the reduction of taxation which has been promised us by the Republican party on the necessaries of life as found in the following statement: This is "the values of and duties collected on the below-named manufactured articles entered for consumption in the United States during the year ending June 30, 1887, with the estimated amounts of duty accruing on like imports under the provisions of House bill 9051 and the Senate substitute; also showing the excess in amounts of duty under the Senate substitute over like amounts under the present laws and House bill 9051," which is the Mills bill.

This, I take it, is valuable. All theoretic discussions have closed, and we come now to actual results. We want to see which party has attempted to reduce the import duties on the necessaries of life.

Take up the first schedule—but I will pass the schedules; they are here and they can be inspected by my friends on the other side. I was anxious to see certain specific articles manufactured in New England—for that is the milk in the cocoa-nut—and the ever-present hand of New England is seen in this bill.

Take woolens, cloths. The excess of duties under the Senate substitute over the present tariff is 6.75 per cent.; it is 87.88 per cent. over the Mills bill. It is 8.23 per cent. on dress goods over the present tariff, and it is 95.05 per cent. over the House bill. It is 14.50 per cent. excess over the present tariff on knit goods, and it is 79.44 per cent. over the Mills bill. It is 67.51 per cent. excess over the present tariff on shawls, and it is 70.67 over the House bill. It is 64.71 over the present tariff on yarns, and 186 per cent. over the Mills bill on yarns.

Now, take cotton, another New England manufacture. On thread, not on spools, it increases the rate of duty over the present tariff 10.09 per cent., and over the Mills bill 31.39. On cloths it increases the duty over the present tariff 9.88 per cent., and 24.95 over the Mills bill.

Mr. ALDRICH. Will the Senator allow me to ask him one question?

Mr. VEST. Well, I prefer to get through with the table, and then the Senator can explain.

Mr. ALDRICH. I want to ask whether this is a list of the necessaries of life?

Mr. VEST. Certainly, most of them are.

Mr. ALDRICH. I call attention to the next two or three items.

Mr. VEST. If they are not, they can very easily be pointed out. I rather think woolens are necessaries of life. My impression is that if any man would try a blizzard up in my country he would come to that conclusion very rapidly. I think that cottons, shawls, yarns, knit goods, and dress goods generally are necessaries of life.

Now, we come to flax, hemp, and jute, brown and bleached linens; the increase in the Senate substitute over the present tariff is 14.29 per cent., and over the Mills bill 62.94 per cent. On laces and embroideries it is 66.67 per cent. over the present tariff and 66.67 over the Mills bill. On yarns the increase over the present tariff is 14.29 and over the Mills bill 166.66 per cent.

On steel in forms not specified the increase over the present tariff is 33.42 per cent., and over the Mills bill the same. On railway bars, which is the only reduction on anything that can be called necessaries of life—perhaps I state it too strongly, but I mean to say that the only decrease of duty, outside of sugar, of any prominence in the Senate bill is upon railway bars, and there the decrease under the present tariff is 24.69 and over the Mills bill an increase of 42.35 per cent.

I now present this analysis:

Values of and duties collected on the below-named manufactured articles entered for consumption in the United States during the year ending June 30, 1887, with the estimated amounts of duty accruing on like imports under the provisions of House bill 9051 and the Senate substitute; also, showing the excess in amounts of duty under the Senate substitute over like amounts under the present laws and House bill 9051.

*Minus.

NOTE.—The amounts of duty stated as "collected" under House bill and Senate substitute are estimated upon the imports of 1887.

Now, Mr. President, in a few words, what is the result of this operation? The only substantial decrease in the whole of this bill is upon sugar, and sugar is made the stalking-horse for an increase upon all the necessaries of life manufactured in New England. Sugar, a Southern product, is made to bear the burden of this reduction for the purpose of concealing the increase upon cottons and woolens which are manufactured in the factories of New England, and it is a remarkable fact that our friends whose shibboleth politically is protection to infant industries should attack sugar at the very time when it is struggling into life upon the prairies of the great Northwest. In your State, Mr. President, and mine the sugar industry to-day promises to furnish enough sugar to supply every man, woman, and child in the whole United States. The Commissioner of Agriculture reports that in the culture of sorghum the seed and cane fed to stock will pay for the manufacture of the sugar. So it is a clear profit to the people upon these prairies who go into the culture of sugar on the stalk.

I have my personal opinions in regard to the sugar tax, and if isolated from this bill and from any other consideration, I should express them here to-day very freely, but I call the attention of my friend from Iowa, whose people can raise sorghum as well as mine, that at this particular juncture when the principle of protection to the infant industries should be applied by the Republican party, if ever, they take it away from the sugar industry, for the only substantial reduction in the entire bill on duties is made upon sugar.

Comparative statement showing the operations under the present tariff laws, under House bill No. 9051, and under the Senate substitute, respectively based upon the quantities and values of dutiable merchandise entered for consumption in the United States during the year ending June 30, 1887.

NOTES.—This table shows a deficiency of $330,050.37 in the value of, and of $220,791.41 in the duty collected on dutiable merchandise in 1887, as reported in the annual report of the Chief of the Bureau of Statistics. This difference is principally due to the omission from this table of dutiable merchandise ($177,909.59) withdrawn free of duty from warehouse and of merchandise not dutiable under any of the schedules. If these amounts had been included, the average ad valorem rate of duty under the present laws would be 47.10 instead of 47.07 per cent.

The interpretation of House bill 9051 is that of the Committee on Ways and Means, House of Representatives, as published by the clerk of that committee, and of the Senate substitute that of the Senate subcommittee on tariff.

The values and duties under both House bill and Senate substitute are computed on the importation of 1887, without speculating upon any possible increase or decrease consequent upon a decrease or increase in the rates of duty imposed by the proposed bills. The computations have been made as accurate as practicable, but in many cases under the Senate substitute a calculation was made impossible by the change from an ad valorem to a specific rate of duty. In such cases no account has been taken of the proposed change.

TREASURY DEPARTMENT, *Bureau of Statistics, October* 9, 1888.

WM. F. SWITZLER, *Chief of Bureau.*

Hon. F. M. COCKRELL, *United States Senator.*

Mr. President, I do not care to go further into the argument of the details of this bill. I want to make one single observation and I am done. I wish to discuss this bill fairly. I am glad the time has come when the people of the United States are brought face to face with great industrial and financial questions, and when they must be determined by intellectual effort and fair argument. I want to discuss these questions fairly, if I know myself.

The Senator from Iowa, for whom I have the greatest regard, made a statement in his opening speech which I doubted and which I am satisfied is not correct. He said that the cost of the manufacture of steel from pig-iron into rails was over $9. I challenge that statement here now. I say it is not true as a matter of fact. I say that in the compromise or agreement which was made between the Knights of Labor and the Edgar Thomson Steel Works a year and a half ago—a deliberate sealed agreement which I can produce here in the Senate, if necessary—it was agreed between the workmen and the owners of those works that the price of labor in steel rails from the condition of pig-iron was $4.09 to the ton. Yet the Senator deliberately asserted, and I have no doubt honestly, that it was over $9 to the ton.

I shall not waste any time before the Senate of the United States or any other intelligent audience by arguing the absurdity of putting all the costs of the iron from the time it comes out of the ground until you get pig-iron into this calculation. It is answered by the simple statement that it is a finished product in the shape of pig-iron when it reaches the hand of the steel-rail manufacturer. Suppose it was intended to protect the tailor who made this coat for me, would you consider all the labor in the raising of sheep, shearing the wool, spinning and weaving, until it became the finished cloth in the hands of the tailor, in the question of protection to him? It reaches him a finished product, it comes to his hands finished, and the only protection he is entitled to legitimately is the protection on his labor in connection with the finished product.

Senators quote here a statement of Mr. Hewitt that the cost of labor in steel rails was 90 per cent. Read it again and you will find that Mr. Hewitt says it depends upon what stage in the process you start with your calculation in order to meet the ratio of labor as put into the product. It is a finished product when it reaches, in the shape of pig-iron, the steel-rail manufacturer, and the only protection he can ask is upon the basis of $4.09 in labor to the ton.

Mr. ALDRICH. Why do you support a bill that proposes to levy a duty of $11 a ton, if that is true?

Mr. VEST. Because I believe that $11 a ton is amply sufficient to

give a margin of profits of $5 at least on the ton to the steel-rail manufacturers. The duty is $17 under the present tariff law. It is reduced by the bill of the Senate to $15.68. My assertion is, and I challenge contradiction upon it, and it is a question of fact, that the cost of the labor that changes pig-iron into steel rails is $4.09. I say the protection is ample at $11, and when you give the manufacturers $15.68 protection you give them more than they are entitled to. That is all I desire to say.

Mr. ALLISON. Mr. President, I desire to detain the Senate just a few moments in noticing one or two points made by the Senator from Missouri [Mr. VEST].

As to the last point made, I do not want him to quarrel with me respecting the matter of steel rails. I quoted the Senator from Ohio [Mr. PAYNE], his colleague on that side of the Chamber, who gave me the cost of steel rails, and stated that that statement of cost was taken from the books of a company in his own city, and he vouched to me for the integrity and intelligence of the men who furnished that information. Therefore I supposed I had some right to rely upon that information, and I inserted it in my remarks.

I shall not undertake now to go into detail as to the particular point at which protection begins, but I had supposed that if an American steel-rail maker was compelled to buy his pig-iron that paid a duty first upon the ore and next upon the pig, and so on through all the processes, he would be compelled to buy the pig-iron at such a cost as would enable him to compete with people on the other side who paid no duty upon their raw material. But I do not intend to discuss that question now.

I wish to call the attention of the Senator from Missouri to his criticisms respecting the surplus in the Treasury for a moment. I do not want him to get away from the primal consideration of my criticism, although I notice that he called attention to what was said by Mr. Blaine at some remote point. I do not want him to get away from the proper criticism of the conduct of the Secretary of the Treasury as respects the surplus by calling attention to the fact that some pet bank in 1879 made a large percentage. The Senator from Ohio [Mr. SHERMAN] has over and over again explained in this body the situation of 1879. That had no relation to the question of the surplus money in the Treasury. The deposits quoted from the books of the Treasury, or from whatever books the Senator quoted, were deposits made in the operation of refunding $600,000,000 of the public debt from a 6 per cent. bond into a 4 per cent. bond, and the First National Bank of New York, to which he alludes, was one of a number of banks in New York City which subscribed for that loan.

What was the condition of the law then? It was that the man who held a 6 per cent. bond could not be required to surrender it until the expiration of a period of ninety days. Then in the operation of the syndicate it was necessary that there should be some intermediary as respects the situation between the bonds subscribed for and the bonds redeemed in order that the entire monetary business of our country would not be disturbed. The Senator from Ohio has made that explanation over and over again. I shall not undertake to defend him. He needs no defense in this regard.

But the statement made as respects the present situation is that the Secretary of the Treasury has money out of the Treasury which belongs to the people, as the Senator says Mr. Blaine said to the old farmer who was sitting in the audience. Where does this $57,000,000 come from, I ask the Senator from Missouri, and I will await his reply, that is now deposited in certain national banks of our country?

Mr. VEST. It comes from excessive tariff taxation.

Mr. ALLISON. Very well; it comes from excessive taxation; but this $57,000,000 comes out of the Treasury of the United States, where it belongs, having been paid in there by the tax-payers of the country.

Now, the criticism upon Secretary Fairchild and this Administration is that here were bonds that they could have purchased with this money, but instead of doing that they loan it to certain banks without interest.

Mr. MORGAN. Will the Senator from Iowa allow me to call his attention to an act with which I know he is entirely familiar?

Mr. ALLISON. Yes, sir.

Mr. MORGAN. It is the act of 1882 for the extension of time for the reorganization of the national banks, which was thoroughly debated here in the Senate. In section 9 of that act it is provided:

That not more than $3,000,000 of lawful money shall be deposited during any calendar month for this purpose.

That is, for the purpose of taking up a bank's bonds, the object being to protect the Treasury by keeping the money in circulation. The Secretary of the Treasury has no right to receive from the national banks bonds that would reduce the circulation generally in the United States more than $3,000,000 a month.

Mr. ALLISON. Is it possible that the Senator from Alabama is connecting that ninth section of the act of 1882 with anything I am talking about?

Mr. MORGAN. I think so.

Mr. ALLISON. It has no more relation to it than an eclipse. It has no possible connection with the question I am considering. My point is that the Secretary of the Treasury had $57,000,000 of United States money in the Treasury of the United States that had been collected and put there by means of taxation.

Mr. MORGAN. The Senator was also complaining, if he will allow me, that the Secretary of the Treasury was not buying the bonds with this money. He can not buy from the national banks more than $3,000,000 a month.

Mr. ALLISON. It has no relation, I will say to the Senator, to the purchase of bonds. It has relation to the surrender of circulation.

Mr. MORGAN. But every bond that is bought by the United States Government to-day is canceled the moment it is bought.

Mr. ALLISON. What I am saying has no relation now to the relations of the national banks. Here is the point, and it is a point Senators on that side of the Chamber can not get away from. Here were $57,000,000 in the Treasury that should have been used in the purchase of United States bonds, thereby saving to the United States more than 2 per cent. interest per annum, and the Secretary of the Treasury or the President of the United States, instead of using this money for that purpose, which was a legitimate and lawful purpose, authorized by law, put the money into the hands of certain national banks without interest. That is the point I make against the Senator from Alabama and those who uphold this Administration, and I am not to be answered that the Secretary of the Treasury could not buy these bonds from the national banks. He could buy them wherever they were to be purchased in the open markets of the country, with more than $700,000,000 of them for sale of one kind of bonds, and $250,000,000 of another, with a very small portion in the national banks for any purpose whatever.

It is a mere subterfuge, I will say, with all due respect to the Senator from Alabama, to quote upon me the ninth section of the act of 1882. Here was lawful authority to buy bonds. The Secretary of the Treasury could have bought them and saved from 2½ to 2.35 per cent. interest per annum to the Government of the United States. Instead of doing that he put this money into banks from the Treasury.

It will not do for the Senator from Missouri to tell me that the effect of buying these bonds was to enhance the price of bonds. The Secretary of the Treasury became the biggest bull in the market (if I may use that expression here as respects these bonds) when he authorized the national banks to receive $1.10 for every dollar of par value of bonds put into the Treasury. In other words, he said to a national bank, "You deposit here $100 of 4 percents and I will loan you without interest $110 for them."

The Secretary of the Treasury makes a fallacious calculation when he talks about a bank going into the markets and buying bonds. The presumption, and the natural presumption, is that these banks have the bonds and they are drawing 4 per cent. interest upon them at the time that these deposits are made. In nine cases out of ten they do not buy the bonds. They are holding them in the vaults of their banks, and the Secretary of the Treasury says to the banker, "If you will transfer these United States bonds that you hold in your vaults from your vaults to the Treasury vaults, I will not only pay you the 4 per cent. interest that I am paying you now, but I will loan you $1.10 for each dollar in order that you may loan that money to the people of the United States at the current rate of interest."

Mr. VEST. Does the Senator mean to say that the national banks are holding the 4 per cent. bonds when there is not a place in the United States they could not loan their money out at 5 and 6 per cent.? Why would they hold dead bonds, you might term them, at 4 per cent.?

Mr. ALLISON. The Senator from Missouri knows, as I know, that the great banks of our country keep on hand a certain amount of Government bonds as indemnity or security against their current deposits. They keep them in that form, first, for immediate conversion, and secondly, for the purpose of securing interest upon them. There is not a national bank in any of our great cities that does not in its assets show a considerable amount of bonds carried.

Mr. SPOONER. Could they not borrow them from their customers and then divide the interest they made, the difference?

Mr. ALLISON. As they have done in many cases, as I am told, on account of this enormous stimulus given to them by the Secretary of the Treasury. Therefore this fallacious statement of the Secretary of the Treasury made in Wall street will not do, because it assumes that before the banks receive the deposits they go into the markets and buy the bonds. They have these bonds, and they have them for banking purposes, and having them, the Secretary of the Treasury says to them, "Deposit your bonds in the Treasury and I will not only pay you the interest which you are receiving now, but the people will pay you whatever the current rate of interest is."

The fundamental objection to that, however, rises far beyond this question of interest. The interest is a mere surface question. I want to suggest a case to the Senator from Missouri. Suppose we were now, instead of being about the 1st of October, 1888, about the 1st of October, 1891, and these $57,000,000 on deposit were in the hands of national banks. Although our 4½ per cent. bonds would then be due, the Secretary of the Treasury could not call them in. Why? A sudden call of $57,000,000 from the banks would create a panic throughout this country. The objection that I have to these loans for redeposit in the Treasury for the purpose of paying current expenses or for the purpose of redeeming

the national debt is that a sudden call would at once create a panic throughout the United States.

So the Secretary of the Treasury in order to avoid that made a most extraordinary obligation to these banks when these deposits were made. I will read one of them, and I want to call the attention of the Senator from Missouri to this statement. It is a letter from Secretary Fairchild and was introduced into a debate in the other House by one of my colleagues, General WEAVER, from my State. I assume it to be absolutely genuine, as it was introduced in debate on the 1st of March. It is a letter addressed to the Treasurer by the Secretary.

SIR: The Western National Bank of New York City—

We know what bank that is—

SIR: The Western National Bank of New York City has been designated a United States depository, and the security fixed for the present at $1,000,000 of United States 4 per cent. bonds. In order to avoid the usual delay in obtaining a balance by accumulating revenue deposits, I will thank you, when the bonds are received, to cause to be transferred to said bank from national-bank depositories other than those in New York City such amounts as may be deposited therein to the credit of your general account in excess of their authorized balances, until the sum of $1,100,000 is reached, which amount the Western National Bank will be authorized to hold as a fixed balance.

Respectfully, yours,

C. S. FAIRCHILD, *Secretary.*

What does that mean? It means that the Western National Bank is to have $1,100,000 of Government money, and that it is to be there as a fixed balance which it can loan to its customers. Therefore the Treasury is in the attitude now of having this money not only in the hands of these national banks, but in the hands of people which may be liable to a sudden call. So, I say, for public reasons aside from the 2 per cent. to be made per annum upon this vast amount of money, it would have been better for the Secretary of the Treasury to have purchased these bonds and allowed the money thus to go into circulation among the people.

That is my criticism upon the conduct of the Secretary of the Treasury as respects these deposits. Of course, a certain amount of deposits in the ordinary transactions of Treasury affairs must be kept in national banks. It runs from $10,000,000 to $15,000,000 and $20,000,000 under ordinary circumstances, but here is now $57,000,000 beyond that amount. There are in the monthly statements that come to us to the credit of disbursing officers $38,000,000 in addition to these $57,000,000, these $38,000,000 being very largely in the hands of the national banks subject to the drafts of the disbursing officers.

Mr. TELLER. Practically altogether.

Mr. ALLISON. Practically altogether, as the Senator from Colorado tells me. So there is practically $57,000,000 plus $38,000,000 in these national banks. I tell the Senator from Missouri he can not get away from this criticism by alluding to Treasury operations in 1879, which were necessary or proper, at least in a large degree, for the purpose of refunding the interest-bearing debt then bearing 6 per cent. to an interest-bearing debt of 4 per cent.; and it will not do either for the Secretary of the Treasury to shield himself behind the fact that there was no law which allowed bond purchases to be made. That law was as clear and distinct and explicit as any law upon the statute-book.

Mr. ALDRICH. No law has been since passed.

Mr. ALLISON. No law has been passed since, as the Senator from Rhode Island suggests, but a mere opinion, expressed intelligently by the two Houses of Congress; and thereby also hangs a tale, which I should think would not be a very agreeable one to the Senator from Missouri, or to the Senator from Kentucky, or Senators on that side of the Chamber. A bill came here from the House of Representatives, and a majority of the Senate put upon it a provision that for every million dollars of national-bank notes withdrawn there should be a million dollars of silver certificates issued. It went back to the House with that amendment, for the purpose of preventing a sudden withdrawal of the circulating medium of our country. That amendment was so hostile and offensive to this Administration that with that amendment the bill now sleeps the sleep of death. It has never been met by any responsive appeal in the House of Representatives.

It has been the policy of this Administration, so far as the effect of that policy is concerned, to pile up money in the Treasury by one pretext and another, so as to furnish an excuse for having $130,000,000 in the Treasury, in order to break down the protective system of our country, which was called the other day an "infamous system" by the Senator from Missouri.

Mr. President, I do not intend, so far as I am concerned, that the Administration shall get away from a just and proper criticism of their conduct in putting this money into the hands of banks, whether pet or otherwise, rather than to have saved the interest to the people by purchasing bonds which must be presently paid, because the bonds must be paid in 1891.

I made the prediction in my remarks a few days ago, and I repeat it now, that this very money, or the greater portion of it, will be in the hands of these identical banks, if the present policy is pursued after the 4th of March, 1889, when the 4½ per cent. bonds mature in October, 1891.

Mr. TELLER. Mr. President——

Mr. HOAR. Does the Senator from Colorado desire to proceed now?

Mr. TELLER. I desire to reply to some things which have been said. I do not care about continuing at this late hour of the day.

Mr. HOAR. If the Senator will yield to me, I will move that the Senate adjourn.

The PRESIDENT *pro tempore.* Before submitting the motion to adjourn, in responding to an interrogatory of the Senator from Missouri [Mr. COCKRELL], the Chair feels bound to state that the senior Senator from Missouri [Mr. COCKRELL] had been recognized to proceed upon the pending bill, being the unfinished business. The Chair understood him to yield informally, as is frequently done, to his colleague, retaining his right to the floor. The debate has proceeded by unanimous consent since, but by the practice which prevails in the Senate, the Chair thinks the Senator from Missouri will be entitled to proceed whenever he demands the floor.

Mr. ALLISON. I give notice that immediately after the ordinary routine business in the morning I shall move to take up the bill.

Mr. TELLER. I wish to say that I dissent from the ruling of the Chair that any Senator has a right to yield the floor and have a debate go on all the legislative day and then resume it, especially when the Senator was not speaking. I do not want to be technical about it and insist on making some remarks to the Senate at this time or even to-morrow, but as a matter of principle I want to enter my protest against the ruling of the Chair.

Mr. VEST. I hope the Senator from Colorado will be permitted to speak to-morrow, and I hope my colleague will give him an opportunity.

The PRESIDENT *pro tempore.* The Chair was merely stating what had been the uniform practice and custom and usage in the body.

Mr. TELLER. It does not seem quite right that a Senator should launch this class of debate upon the Senate, and then shut off the other side.

Mr. COCKRELL. Have I shut off the other side?

Mr. TELLER. Not at all; I am not quarreling with the Senator from Missouri; I was criticising the ruling of the Chair.

Mr. COCKRELL. I yielded to my colleague [Mr. VEST], who was compelled to be absent. Before he got through the Senator from Iowa requested to be recognized. I believed it was but fair and just and right to let him reply to my colleague.

Mr. TELLER. Certainly.

Mr. COCKRELL. I yielded the floor to him. Now, if the Senator from Colorado wants to make an additional reply I will yield to him for the purpose, or I will yield to him to-morrow; but I do not propose to be cut out of my right to control the time.

Mr. TELLER. I was just about to say, if I had been allowed to proceed, that if the Senator from Missouri insisted upon going on, of course I would defer my remarks; but I was not allowed to say that. I am not very particular whether I go on to-night or to-morrow morning, or whether I defer my remarks until after the Senator from Missouri gets through. I shall simply claim the floor at some time.

Mr. HOAR. May I make a suggestion to the Senator from Missouri?

Mr. COCKRELL. My colleague will be here in the morning, and I will yield to the Senator from Colorado in the morning; but I want it to be understood that I have the floor, and I shall not permit every other Senator who wants to speak on the bill to go on and speak.

Mr. TELLER. I am not particular about it.

Mr. COCKRELL. I shall take the floor as soon as the Senator from Iowa calls up the bill, and if he does not call up the bill the first thing after the morning business I shall do so myself.

Mr. BLAIR. At what hour? At 2 o'clock?

Mr. COCKRELL. Oh, no.

Mr. ALDRICH. In the morning hour.

Mr. BLAIR. Is there any agreement by unanimous consent to that effect? I inquire because it is necessary for me, as I shall have to be absent from the Senate, to occupy five or ten minutes at some time. I can do it to-night.

Mr. HOAR. I withdraw the motion to adjourn.

Mr. BLAIR. It is not upon this subject, but it is upon one where I am under a certain necessity to say a word.

The PRESIDENT *pro tempore.* The motion to adjourn being withdrawn, the Senator from Missouri yields to the Senator from New Hampshire.

RELATIONS WITH CANADA.

Mr. BLAIR. I ask unanimous consent that the joint resolution introduced by me on the 6th of August may be read.

The PRESIDENT *pro tempore.* If there be no objection, the joint resolution will be read.

The Chief Clerk read as follows:

A joint resolution (S.R.101) requesting the President to open negotiations with the Government of Her Britannic Majesty with a view to the political union of the Dominion of Canada, or any of the provinces or subdivisions thereof, and the United States, and for other purposes.

Resolved, etc., That the President be requested to open negotiations with the Government of Her Britannic Majesty, in which the Dominion of Canada and the several political subdivisions thereof shall be represented, with a view to the settlement of all differences between Her Majesty's Government and the United States, and especially to the arrangement of terms mutually just, honorable, and satisfactory for political union between the Dominion of Canada, or between any of the several provinces or subdivisions of the Dominion of Can-

ada, and the United States, subject to the approval of the people of the Dominion of Canada, or of the people of any province or subdivision thereof who may be included in such arrangement, and to ratification by the United States in such manner as Congress may prescribe; such political union to be republican in form and in accord with the Federal system and the Constitution of the United States; and the negotiations may embrace such further treaties, compacts, and alliances as shall be deemed necessary for the future peace, happiness, security, and general welfare of Her Majesty's Dominions and of the United States.

Mr. BLAIR. I have certain information derived from a careful and prolonged course of investigation by a very intelligent gentleman traveling in Canada for some three or four months, purposely in the pursuit of intelligence as to the public opinion of the Dominion of Canada upon the question of political union between the two countries, and as I have felt an interest in that subject and there is pending in the Committee on Foreign Relations the joint resolution bearing upon that topic introduced by myself, I wish to have this information printed, which has been prepared and condensed at my request and addressed to me as chairman of the Senate Committee on Education and Labor. It is, I think, about ten pages of matter, written with a type-writer. It is collected and prepared by Mr. Charles T. Thompson, a correspondent of the New York Tribune, a very intelligent gentleman, who made this investigation in pursuance of his own inclinations and also at the request of others who desired to ascertain as nearly as possible the exact condition of public sentiment upon this great international question.

If the Senate will give permission to have this paper printed, I will not trouble the Senate to read it *in extenso*.

The PRESIDENT *pro tempore*. The Chair hears no objection, and leave to print the paper in the RECORD is granted.

The paper is as follows:

SIR: The matters affecting the relations between Canada and the United States which your committee now has before it, and your interest in advocating the political union of the two countries lead me to lay before you the following practical facts bearing on the matter of a political union:

As a newspaper correspondent I was recently commissioned to go through Canada and ascertain the wishes of the Canadian people as to a political union with this country. The tour was an exhaustive one, across the entire country, through every province, in the important commercial cities as well as small agricultural districts, giving an opportunity to talk with representative men, members of Parliament, business men, farmers, and laborers on the matter of a political union.

So little is known or understood on this side as to the sentiment on this subject in Canada that a brief statement of the facts may be of value in your consideration of the matter. It appears to be particularly relevant to the present discussion, for the wishes of the Canadian people, for or against a political union, would be an important factor in any move which this country would take in that direction.

First. Canada is ready for a political union. This is sometimes asserted as an abstract proposition, but I will undertake to prove it. In a trip covering three months, from end to end of Canada, it was found that every community, large and small, had the nucleus of a political union party in it. They came from both parties, Tories and Grits, the sentiment not being founded on any party reasons, but solely in the belief that a political union with the United States would lead to Canada's prosperity.

The reasons assigned were various, as the succeeding statements of representative men will show. Some took the broad ground that the two countries had a common language and common interest and should be governed in common; some that Canada had grown too great to be a mere colony of Great Britain; some that the control exercised by Great Britain was a monstrous and unnecessary expense; and some that a political union was the only solution of grave social and religious problems which have arisen in the province of Quebec and are spreading to Ontario.

These feelings are best shown by extracts from the views of leading men through the Dominion, representing a diversity of localities and interests.

In the towns immediately along the border the sentiment is particularly strong. At Amherstburg, for instance, many of the leading business men and bankers are the most radical in the movement. Hon. Mr. Balfour, member of Provincial Parliament from that riding, says he has found many of his colleagues in Parliament openly advocating annexation, and that the number of these advocates has grown surprisingly of late. At Windsor, opposite Detroit, the leading banker, Mr. Curry, is one of the heads of the sentiment, and he even goes so far as to be ready to advance a considerable sum of money, $10,000 or more, to help bring Canada into the Union. The master workman of the Knights of Labor of Windsor also expresses sentiments equally as strong, and says that political union is desired by the laboring masses of Canada. At Essex Center, the central point of the agricultural community of Essex County, the feeling was thus stated by Hon. James Brien, member of Parliament:

"A great many are beginning to favor annexation. It is only within the last few years, too, that the annexation talk has become so general. Formerly the man who whispered in favor of annexation was denounced as a rebel, but it has become too common now to treat in that way."

This expression is readily borne out by talking with the people of the locality. Hon. Brien's partner is an open advocate of political union, while the storekeepers and business men are almost a unit for it. At Chatham, further up the border, the views of Mr. Charles Northwood fairly reflect many similar views:

"Political union," said he, "would be a great benefit to both sides. It is said that England would not favor it, and that such a course would be disloyal. I think, however, that mother country would like the arrangement for several reasons. It would establish a more cordial relation between the mother country and the United States, and England's trade and real interests are larger to-day with the States than with Canada. Then, it would relieve the mother country from harassing irritation over fishery disputes. That is patched up for a time, but it will come out again, and the way to stop it for ever is to have a political and commercial union. Annexation, too, would help to bring about a closer relation between all English-speaking people, by which a federation of their nations would eventually rule the world, advancing civilization and Christianity."

Along the shores of Lake Ontario, where Canadian towns with admirable harbors are without sail or shipping, there is a longing for political union as the means of restoring their commerce. For instance, Dr. Clark, the leading physician of Cobourg, Ontario, thus expresses it:

"They asked me what party I belonged to," said Dr. Clark, "but I've told our politicians I belong to neither of their parties. My party is the one representing annexation. When they put up a man representing that feeling he will have my support. We should send our representatives to Washington, not to Ottawa. I used to be called rebel for such views, but that time is gone by now. There are too many of the same way of thinking. When I talk of annexation now the only answer is that the time has not come yet. There is no longer any talk of rebel or of the impossibility of annexation. A secret ballot taken here would show a surprising result, and I believe annexation might carry. There are many of our leading merchants who would support it, although they would not say so openly. It is a strong feeling throughout Canada, too. Hon. Ebenezer Perry, who was a member of the Canadian senate, told me that he had found the leading men of Montreal and Kingston in favor of annexation.

"It would be of vast benefit in improving Canada. Property would advance in value. American enterprise and capital would come in here, and that's what we need. Look at the towns across the line and compare them with the stagnated condition of the towns on this side. Great Britain is thousands of miles away, and has no real interest in us. Annexation is what Canada needs, and must have to revive her."

This is not a random opinion, but is one which is in line with many others, the names and expressions being at hand, but withheld for purposes of brevity.

Going further back, into the manufacturing communities, the same sentiment prevails. At Hamilton, Ontario, one of the chief manufacturing points of the Dominion, the political union sentiment is very prevalent. The president of the Conservative Club, a leading organization, is one of the chief advocates of the step, and he is followed by merchants and manufacturers almost without number. At Ingersoll, another manufacturing point, Hon. A. McKay, member of Parliament, thus expressed his view:

"What I wish to see," said he, "is absolute independence from England, and I can foresee that end coming. I would not want to live in a country if I thought it were always to be a mere colony. The United States framed their declaration of independence when they had only 3,000,000 of people, and we have about 5,000,000 now. Canada has all the elements to make up a prosperous and independent country. It would be of vast benefit to us in the way of stimulating immigration. The emigrant now comes from a monarchy, and wants to get under an independent form of Government. For that reason the United States system of universal suffrage draws the emigrant there and gives him an interest in the country. He can not see the same advantages here, where we are part of the same sort of monarchy he has left. There would be no drawback to independence, such as fear of maintaining a standing army. Canada will always be too close an ally of the United States to ever have a war with her."

There is a class bearing titles and much devoted to English customs who treat any expression of political union as disloyal to the mother country. But these are comparatively few, and the general desire is to first consider Canada's interest. This idea was thus stated by Mr. John Craig, head of the agricultural society of Oxford County, Ontario, and one of the best known and conservative citizens:

"No one could well accuse me of disloyalty," said he, "for I was in the mother country for forty years before coming here, and therefore had all my predilections formed toward her. But I do not regard annexation as a disloyal feeling. The Bible doctrine is that the son must turn from his father and mother and cleave to his wife; and that's the case with us here; it means no disrespect or disloyalty to the parental roof, however. On a previous issue the cry was raised that the mother country would be injured. 'Then so much the worse for the mother country,' answered Sir John Macdonald. That's the answer now. If annexation will hurt the mother country, why, 'so much the worse for her.' That is the practical view being taken of the matter now."

In the farming communities a similar wish for political union is general. At an agricultural fair in one of the best agricultural districts I talked with leading farmers on the subject. James Anderson, a leading farmer and reeve of his locality, thus emphatically stated his observations of the farmer sentiment for political union. He was asked if there were one thousand annexationists in his locality.

"Yes," said he, "not only that, but nine-tenths of our farmers are for out and out annexation. If you will drive through the farming district in my township you will discover the remarkable prevalence of annexation sentiment. They are all for it, not alone commercial union, but political, moral, geographical, and religious union. Wipe out the dividing line absolutely—that's what they want—and make us a political part of the United States. There is but one condition imposed, and that is that the new State of Ontario shall retain her local laws, the State's rights doctrine. That could readily be arranged. New York has her own State laws and is not governed by United States Federal laws, except on Federal questions. Ontario would have the same right to make her own laws for all State questions. That overcomes the objection frequently raised that Ontario would have to surrender her good laws for the inferior ones of the United States.

"Annexation means an arising from the stagnant condition of Canada's cities and industries to-day. Why is it that Detroit has grown to a metropolis while Windsor has languished? Why is it that Woodstock here is not the size of Utica, N. Y., and other inland towns in the States? The places here have fully as many natural advantages. They are the centers and supply points for fully as rich a farming country. The products, cheese, etc., are fully as abundant. And yet they struggle along as dwarf villages, unable to progress. The reason is not in the people or the imaginary line that divides them, but in the Canadian Government and institutions. We need an infusion of American ways and means. Annexation would make Woodstock a city of 40,000 inhabitants in the next fifteen years. It would build us up with population and capital.

Going into the province of Quebec, which is largely French, the expression for political union is even more pronounced. The French have no ties of love for Britain, and they would gladly break away from the yoke put on at the Plains of Abraham. Even the monument erected by the British in memory of Wolfe, which stands in the suburbs of Quebec, on the Plains of Abraham, is pelted by the French, until it has to be rebuilt frequently. All of the cities and towns are French, not English, including Montreal, Quebec, and St. Hyacinthe. The latter is an average Quebec community, with a population of about 7,000. There are scarce 100 English-speaking people. Not only is their language French, but all their inspirations are the same, and there is not even a faint bit of sentiment of loyalty for the English Crown.

The only flag flying is the tricolored flag of France, over the skating rink. "God save the Queen" is not heard, but the "Marseillaise" rings out at the festive gatherings. As one glances over the album of M. Bernier, M. P., the pictures of Bonaparte and Josephine, Napoleon III and Eugenie are most conspicuous. They do not look to London for their ideas, but to Paris. Merely in name is it part of the English Empire. It is not even Canadian, but French. Their most cherished friend is the States, and it would take but little to arouse such people into enthusiasm for annexation. Judge William T. Mitchell, of Port Huron, the United States consul there, told me that there were constant demands for his Stars and Stripes to be used on public occasions. They seek it to fly over the race-course, to decorate the Wamaska club-house, and even to lower to half-mast on the death of a distinguished citizen.

In such communities, having no ties to Britain, but many attractions towards this country, the feeling towards political union is particularly strong. It was thus expressed by Hon. M. E. Bernier, member of the Dominion Parliament:

"If you were to go from house to house, and the people were to give a free expression of their views, you would find nine out of every ten of them in favor of annexation. I am sure of it. The idea that the clergy would oppose it is largely erroneous. The priests recognize the fact that on the other side they would not be so completely under the control of their superiors, but would have more liberties. I have heard priests compare the prosperity of their colleagues who had gone to the States with their own lack of it."

The remarkable prevalence of feeling for a union with the States was shown by Le Progres de l'Est, the leading paper of Sherbrooke, province of Quebec. This was secured through questions directed to the Canadian subscribers of a paper. The responses disclosed the surprising result of nearly two to one in favor of annexation in both the provinces of Ontario and Quebec. Here are the figures:

Provinces.	For annexation.	Against annexation.
Ontario	132	70
Quebec	18	10

Singularly, however, little Nova Scotia turned the scale the other way. But Nova Scotia's voice would be weak indeed against the two larger provinces in a general struggle. Le Progres says of this test vote, the following being a translation:

"This table is very instructive. In Ontario there has been found two to one in favor of annexation. Where, then, is all the boasted loyalty of the sister province? In the province of Quebec the result is not surprising, for there has always been as many French-Canadians for annexation as against it."

Further expressions could be multiplied indefinitely, but they would appear to be merely reiterations. They would show that the leading men—members of Parliament, journalists, business men, farmers, and workmen—are ready and anxious to become a part of an American union extending from the Gulf to the Arctic. It is not meant to state that such feeling is unanimous, for it is not; but it is substantial in all classes and communities, and merely waits the hoped-for opportunity in order to fan it into an overwhelming and irresistible movement towards a political union with the United States.

I am, sir, very respectfully,

CHARLES T. THOMPSON.

Hon. HENRY W. BLAIR,
Chairman Senate Committee on Labor and Education.

Mr. BLAIR. For my own part, I am entirely opposed to the idea of anything like retaliation or resort to unnecessary force, either of word or of action, in the discussion or in the elucidation of the relations between the Dominion and this country. I think we need the union as much as Canada needs the union, and that the line of peace for the future, the relations of these two great sections of the continent, and of the people who now and are hereafter to inhabit them, lies in the direction of conciliation and of unity, and that the project should never be put forth between these two great countries as one specially for the advantage of either, but for the unquestionable advantage of both.

I do not believe that these peoples can develop, can exist alongside of each other for any great length of time unless united, if they are to live in peace. I do not mean this as a menace, for I think, with the best disposition in the world, there will come inevitably those international conflicts, those wars, those destructive relations in the future which have existed on the continent of Europe, and which might well be avoided now that both countries are comparatively without population and without development, Canada very much more so, of course, than we. If now there could be a unity between these really homogeneous peoples and the institutions of each become homogeneous and united, and their development go on in such a symmetrical and united condition for the future as that we should be really, when there shall be 500,000,000 in the territory of the now separated nationalities, one nation, united as we are ourselves on the southern side of the line, and far more so, than Canada and Canadians ever can be unless in some way the whole is fused in one.

I believe it is as much to the advantage of this country that there should be union, and it is no just way of putting the subject when we speak in anything of an offensive sense of annexation.

Mr. HOAR. May I suggest to my honorable friend (I suppose he is speaking somewhat for the sake of having Canada hear what he says) that I think there are people in this country who believe that Canada has an objection to our annexing her, but are entirely willing that she should annex us, of course adopting our Constitution.

Mr. BLAIR. I am not willing to do that. I am willing to be united with Canada and that Canada should be united with the United States, but I am not willing that the idea of inequality upon either side should find its way into these considerations. It is nothing but political union that suits my mind, and there is a great deal in these matters of sentiment. Most of the wars of the world have been the result of matters of sentiment, and sentiment really controls the history of mankind far more than do questions of actual material development and of material consequence.

It is useless at this time to enter upon the broad field of general discussion, and I only called the subject up because I am desirous that this printed and carefully prepared matter which is given to me by Mr. Thompson may be spread before the country, and that on our side of the line we may be really informed of the general and strong inclination of the masses of the people, as this information demonstrates undoubtedly a majority of the people of Canada are to-day desirous of union with the people of the United States. I feel for one that that inclination is most earnestly and harmoniously reciprocated by the sixty-five million who make up the American nation.

Mr. HOAR. I renew my motion.

The PRESIDENT *pro tempore*. The Senator from Massachusetts moves that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 53 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, October 16, 1888, at 12 o'clock m.

HOUSE OF REPRESENTATIVES.

MONDAY, *October* 15, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of Friday's proceedings was read and approved.

NAVAL ASTRONOMICAL OBSERVATIONS.

The SPEAKER *pro tempore* (Mr. MCMILLIN in the chair). The Chair will lay before the House bills and resolutions from the Senate. It is not usual to do this on Monday morning, but being near the close of the session, the Chair will lay them before the House.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES, *October* 12, 1888.

Resolved by the Senate (the House of Representatives concurring), That the annual volumes of the astronomical observations of the Naval Observatory for 1886, 1887, and 1888 be printed, and that 1,800 additional copies of each report be printed, of which 300 copies shall be for the use of the Senate, 700 copies for the use of the House of Representatives, and 800 copies for the use of the Navy Department.

The resolution was read a first and second time, referred to the Committee on Printing, and ordered to be printed.

BRIDGES ACROSS THE KENTUCKY RIVER AND TRIBUTARIES.

The SPEAKER laid before the House the bill (H. R. 11262) to authorize the construction of bridges across the Kentucky River and its tributaries by the Richmond, Nicholasville, Irvine and Beattyville Railroad Company, with amendments.

Mr. ROGERS. Mr. Speaker, Governor MCCREARY on leaving requested me to ask that these two formal amendments be accepted by the House. They are purely formal, and I ask the concurrence of the House in the amendments. One is relative to a footway over the bridges, and the other requires that any changes in the construction of the bridges be approved by the Secretary of War.

The SPEAKER. The Clerk will read the amendments.

The Clerk read as follows:

On page 1, line 12, after the word "passengers," insert "provided that the rates of toll charged by said company shall be first approved by the Secretary of War;" on page 1, line 12, after the word "passengers," strike out [,], and in page 2, line 7, after the word "war," insert "and if the Secretary of War shall at any time think any changes necessary in the plan of said bridge or bridges, or that the said bridge or bridges should be entirely removed, the said alterations or removal shall be at the expense of the company."

The amendments were agreed to.

Mr. ROGERS moved to reconsider the vote by which the amendments were agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ANDREW J. SMITH.

The SPEAKER laid before the House the bill (H. R. 2579) authorizing the President to appoint and retire Andrew J. Smith, late colonel of the Seventh United States Cavalry and a major-general of volunteers, with amendments.

Mr. WARNER. I ask that the title of the bill be again read.

The title was again reported.

Mr. WARNER. Mr. Speaker, that is a mere formal amendment, and I hope it will be acted upon at this time.

Mr. WHITE, of New York. It merely changes the rank.

Mr. WARNER. It is a mere formal amendment.

The Clerk read the amendment, as follows:

Strike out the words "brigadier-general" and insert "colonel of cavalry."

Mr. MCMILLIN. What is his rank?

Mr. WARNER. The Senate amendment reduces the rank from brigadier-general to colonel.

Mr. MCMILLIN. There was no proposition to retire him as a brigadier-general?

Mr. WARNER. The bill originally introduced was to retire him with the rank of brigadier-general. The Committee on Military Affairs of the House amended the bill and proposed to retire him with the rank of colonel, the rank that he held in the regular Army at the time of his resignation. It went to the Senate and in the Senate it was believed that the language used in the amendment was not sufficiently clear, and therefore they struck out the words suggested in the amendment and left it at the same rank as the bill passed the House, precisely.

Mr. MCMILLIN. Let it lie over for the present and I will look at it if it meets the approval of the House. I ask that it lie on the Speaker's table for the present.

There was no objection, and it was so ordered.

MARINE-HOSPITAL SERVICE.

The SPEAKER also laid before the House the bill (S. 1786) to regulate the appointment in the Marine-Hospital Service of the United States.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES, *October* 12, 1888.

Resolved, That the Senate disagree to the amendments of the House to the bill of the Senate 1786 and request a conference of the House on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. DOLPH, Mr. SAWYER, and Mr. COCKRELL be the conferees on the part of the Senate.

The SPEAKER. This bill has reached a stage at which it is privileged. If there be no objection, the House will insist upon its amendments and agree to the conference asked.

There was no objection, and it was so ordered.

GEORGE K. OTIS.

The SPEAKER also laid before the House the bill (S. 3348) for the relief of George K. Otis; which was read twice, and referred to the Committee on Claims.

SAMUEL HEIN.

The SPEAKER also laid before the House the bill (S. 3351) for the relief of Samuel Hein; which was read twice, and referred to the Committee on Claims.

CONDEMNED CANNON FOR THE GRAND ARMY OF THE REPUBLIC.

The SPEAKER also laid before the House the bill (S. 3612) donating condemned cannon and small-arms to Naval Post No. 400, Grand Army of the Republic, Department of Pennsylvania; which was read twice, and referred to the Committee on Military Affairs.

WIDOW OF CHIEF-JUSTICE WAITE.

The SPEAKER also laid before the House the bill (S. 3621) for the payment to the widow of the late Chief-Justice Morrison R. Waite the balance of a year's salary; which was read twice.

The SPEAKER. Unless there be objection, this bill will be referred to the Committee on the Judiciary. An objection would send it to the Committee on Claims.

Mr. MCMILLIN. I think that is where it ought to go. It stands on the same basis as any other claim.

The bill was referred to the Committee on Claims.

YELLOW-FEVER CONFERENCE.

The SPEAKER also laid before the House a joint resolution (S. R. 113) concerning the conference to be held in Washington in December next to consider the best means of preventing the introduction of yellow fever and other epidemic diseases into this country.

Mr. DOUGHERTY. I ask unanimous consent that that resolution be read and considered at this time. It does not make any appropriation.

Mr. EZRA B. TAYLOR. I object.

APPOINTMENTS IN MARINE-HOSPITAL SERVICE.

The SPEAKER appointed as managers of the conference on the part of the House on the disagreeing votes of the two Houses on the bill (S. 1786) to regulate appointments in the Marine-Hospital Service of the United States Mr. PHELAN, Mr. LAGAN, and Mr. O'NEILL of Pennsylvania.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BACON, indefinitely, on account of important business.

To Mr. POST, indefinitely, on account of important business.

To Mr. LAWLER, indefinitely.

To Mr. NEAL, indefinitely, on account of important business.

To Mr. LYMAN, indefinitely, on account of important business.

To Mr. STRUBLE, indefinitely.

BRIDGE ACROSS THE COOSA AT GADSDEN.

The SPEAKER also laid before the House the bill (H. R. 11338) to authorize the construction of a bridge across the Coosa River at Gadsden, in the State of Alabama, with amendments of the Senate thereto.

Mr. FORNEY. I move that the House concur in the Senate amendments. The changes are immaterial. I ask that the amendments be read.

Mr. EZRA B. TAYLOR. I object.

Mr. FORNEY. I hope the gentleman will not object to this. It is simply a House bill in which the Senate has made some immaterial amendments.

Mr. EZRA B. TAYLOR. I have already given notice that there shall be no more legislation in this House this session.

Mr. FORNEY. Then you ought to have stopped it some time ago. Why do you draw the line on this bill?

Mr. EZRA B. TAYLOR. I draw it this morning on this bill.

Mr. FORNEY. You ought to have drawn it earlier. [Laughter.]

ORDER OF BUSINESS.

The SPEAKER. This being Monday, the regular order is the call of States and Territories for the introduction of bills and resolutions.

Mr. WHEELER (when the State of Alabama was called) offered a preamble and resolution in relation to the Senate tariff bill, which was read in part.

Mr. DINGLEY (before the completion of the reading). Mr. Speaker, I desire to ask if that is either a bill or a resolution within the meaning of the rule.

The SPEAKER. It seems to be a resolution.

Mr. DINGLEY. It seems to be a caucus resolution providing what the Democratic party should do, or will do.

The SPEAKER. The gentleman from Alabama [Mr. WHEELER] in his place on the floor offered the resolution when his State was called.

Mr. WHEELER. I have offered it in the regular order.

Mr. DINGLEY. It is not in the form of a resolution.

Mr. WHEELER. The second resolution provides for the discharge of a duty I regard as incumbent upon members of Congress.

Mr. DINGLEY. It might be very proper in a caucus, but not here.

Mr. WHEELER. I think it is eminently proper for this body.

Mr. FARQUHAR. Mr. Speaker, I suggest that that resolution is for the Democratic party and is leveled against another party, and therefore it is properly a caucus matter.

The SPEAKER. The Chair, of course, has no control over the character of resolutions offered by members, except to see that they are respectful to the House and to the other branch of Congress.

Mr. FARQUHAR. Independent of the bad taste of that resolution it is bad sense. [Laughter.]

The SPEAKER. The preamble is no part of the resolution.

Mr. DINGLEY. Does the resolution propose legislation?

The SPEAKER. It does not.

Mr. FARQUHAR. Then what is the use of it?

The SPEAKER. That is not a question for the Chair. A gentleman may introduce a proposition on any subject. The Chair has no control of the matter; but the House may take such action as it pleases. It may move to lay the proposition on the table, or it may refuse to receive it.

Mr. DINGLEY. I would like to have the rule read which relates to the introduction of bills and resolutions under this call.

The SPEAKER. The Clerk will read the first clause of Rule XXIV.

The Clerk read as follows:

RULE XXIV.

ORDER OF BUSINESS.

1. Each Monday morning during a session of Congress, immediately after the Journal of the proceedings of the last day's sitting has been read and approved, the Speaker shall call all the States and Territories in alphabetical order for bills and resolutions for printing and reference without debate, on which call joint and concurrent resolutions and memorials of States and Territorial Legislatures may be presented and appropriately referred; and, on this call only, resolutions of inquiry directed to the heads of the Executive Departments shall be in order for reference to appropriate committees, which resolutions shall be reported to the House within one week thereafter.

Mr. DINGLEY. I make the point of order that this is neither a joint nor a concurrent resolution, within the meaning of the rule.

The SPEAKER. The Chair will state that this rule originally provided for the presentation on this call of joint and concurrent resolutions only. At the beginning of the Forty-ninth Congress the rule was so changed by the House as to embrace all resolutions; and words "joint and concurrent" as now embraced in the rule have reference only to resolutions of State and Territorial Legislatures, as the gentleman will see if he will examine the language of the rule.

Mr. WHEELER. I ask unanimous consent to strike out the word "Democratic" before "members." I hardly expected any aid from the other side of the House, as every member I see there to-day voted and spoke against the relief for the people which is sought to be secured by this resolution.

Mr. DINGLEY. I submit that the time of the House should not be occupied by the presentation of a resolution of this kind, which is evidently not within the intention of the rule.

The SPEAKER. The Chair will state to the gentleman from Maine that a resolution presented under this call does not necessarily go into the RECORD because it is read. It requires unanimous consent——

Mr. DINGLEY. But the time of the House is being improperly occupied by the reading of a caucus resolution.

The SPEAKER. The resolution, the Chair supposes, will go to the Committee on Rules, as it does not propose any legislation, but simply declares the sense of the House upon certain propositions.

Mr. WHEELER. The resolution was not read through.

The SPEAKER. The Clerk will conclude the reading of the resolution without the preamble. The preamble is no part of the resolution.

The Clerk resumed and concluded the reading of the resolution.

The SPEAKER. This resolution will be referred to the Committee on Rules.

Mr. FARQUHAR. I desire to know whether this resolution becomes a matter of record—whether as read it goes into the CONGRESSIONAL RECORD.

The SPEAKER. It does not, except by unanimous consent of the House.

Mr. FARQUHAR. All right, then. I made the inquiry simply because the gentleman who offered the resolution is a friend of mine; and for his own good name, as well as for the credit of the House, I did not wish the resolution to appear in the RECORD.

Mr. WHEELER. I am very thankful to the gentleman for expressing a desire to take care of my good name, but I will endeavor to discharge that duty myself without the aid of any one.

I asked unanimous consent to have the word "Democratic" stricken out, because I was delighted to see gentlemen on the other side of the House indicate a willingness to unite with us in the continued effort to lighten the burdens now borne by the tax-payers, and that is the only thing to which the resolution proposes to commit the House.

Mr. EZRA B. TAYLOR. It would spoil the resolution if that word were stricken out.

Mr. FARQUHAR. It would be like the play of Hamlet with Hamlet left out.

AMENDMENT OF REVISED STATUTES.

Mr. STONE, of Kentucky, introduced a bill (H. R. 11587) to amend sections 851, 856, 857, 858, 861, and 862 of the Revised Statutes of the United States relating to the District of Columbia; which was read a first and second time, referred to the Committee on the District of Columbia, and ordered to be printed.

BRIDGE ACROSS HUDSON RIVER.

Mr. FARQUHAR (by request) introduced a bill (H. R. 11588) authorizing the building of a bridge across the Hudson River, connecting the States of New York and New Jersey, and making it a post-route; which was read a first and second time, referred to the Committee on Commerce, and ordered to be printed.

PUBLIC BUILDING AT EASTON, PA.

Mr. SOWDEN introduced a bill (H. R. 11589) for the erection of a public building at Easton, Pa.; which was read a first and second time, referred to the Committee on Public Buildings and Grounds, and ordered to be printed.

LAND BOUNTY FOR SOLDIERS, ETC.

Mr. SOWDEN also introduced a bill (H. R. 11590) granting a bounty of 160 acres of land to all non-commissioned officers, private soldiers, and sailors who served in the Army, Navy, or Marine Corps of the United States during the late war of the rebellion, and to the heirs and legal representatives of those who were killed in battle or died while in the service; which was read a first and second time, referred to the Committee on the Public Lands, and ordered to be printed.

PENSIONS.

Mr. SOWDEN also introduced a bill (H. R. 11591) granting a pension to all honorably discharged soldiers and sailors who served in the late war of the rebellion and who are mentally or physically disabled and dependent, either wholly or in part, upon charity for support; which was read a first and second time, referred to the Committee on Invalid Pensions, and ordered to be printed.

Mr. SOWDEN also introduced a bill (H. R. 11592) providing for the payment of pensions to all honorably discharged soldiers and sailors who served in the military or naval service of the United States during the late war of the rebellion, upon attaining the age of sixty-five years; which was read a first and second time, referred to the Committee on Invalid Pensions, and ordered to be printed.

GOVERNMENT PRINTING OFFICE.

Mr. RICHARDSON introduced a bill (H. R. 11593) to provide additional accommodations for the Government Printing Office; which was read a first and second time, referred to the Committee on Public Buildings and Grounds, and ordered to be printed.

TIME FOR MEETINGS OF CONGRESS.

Mr. WHEELER introduced a bill (H. R. 11594) to designate the time for the convening of Congress; which was read a first and second time, referred to the Committee on the Judiciary, and ordered to be printed.

CONFERENCE COMMITTEES.

The SPEAKER. The call of States and Territories for the introduction of bills and resolutions is now completed.

Mr. JACKSON. Mr. Speaker, my attention has been called by the Senate Committee on Pensions to the fact that upon the bill for the relief of Margaret S. Heintzelman, widow of General Heintzelman, the Chair appointed as conferees on the part of the House the gentleman from Michigan [Mr. CHIPMAN] and the gentleman from Ohio [Mr. THOMPSON] and the gentleman from California [Mr. THOMPSON], neither of whom is now in the city. I call the attention of the Chair to this fact in order that other conferees may be appointed.

There is another case to which my attention has been directed by the same memorandum, sent to me by the Senate committee. Upon the bill with reference to the pension of the widow of General Kilpatrick the report of the committee of conference was agreed upon, but the gentlemen representing the House on that committee have left the city without filing the report. I bring up these questions as a matter of courtesy; I am not interested personally in either of the bills.

The SPEAKER. The Chair will take proper action in the cases referred to.

ORDER OF BUSINESS.

The SPEAKER. The regular order is the call of committees for motions to suspend the rules; but there is a motion pending made by the gentleman from Missouri [Mr. WARNER], which has priority, if insisted upon. The Chair thinks, however, that on the first Monday of this month, during the absence of the present occupant of the chair, a motion to suspend the rules was also made by the gentleman from Arkansas [Mr. DUNN], by consent, which motion is also pending. But if the gentleman from Missouri insists upon his motion, it has priority.

Mr. WARNER. The motion of the gentleman from Arkansas [Mr. DUNN] was withdrawn.

The SPEAKER. At any rate the motion of the gentleman from Missouri has priority. A second was demanded and no quorum voted. The gentleman from Missouri [Mr. WARNER] has been appointed as one of the tellers, and the gentleman from Georgia [Mr. BARNES] not being present, the Chair will appoint in his place the gentleman from Georgia [Mr. CLEMENTS].

FINAL ADJOURNMENT.

Mr. OATES. I desire to offer the following resolution:

The SPEAKER. Is it privileged?

Mr. OATES. It is.

The Clerk read as follows:

Whereas the present session of Congress has continued longer than any other held in the history of the Government; and

Whereas there is much less than a quorum present in the Senate and House of Representatives, so that no legislation can be constitutionally enacted; and

Whereas there is no probability of a quorum being present in either of the said Houses of Congress during the time which the present session may by law continue: Therefore,

Be it resolved by the Senate and House of Representatives, That the President of the Senate and the Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on Wednesday the 17th day of October, at 12 o'clock m.

Mr. OATES. Mr. Speaker, I desire the indulgence of the House while I say a few words in explanation of my action in offering the resolution at this time. I understand full well the difficulty of arriving at an agreement, both among Senators and Members of the House in respect to this matter of adjournment. It is well known to the whole country that there is not a quorum present in the House, and has not been for weeks. It is also known there is not a quorum present in the Senate. It is well known to every one that this House has been waiting the action of the Senate on the tariff bill, and that they have reported a substitute for the House bill, and have it under consideration. But at the same time we have not a sufficient number present legally and constitutionally to adopt a single amendment to it if the question is made, as in my judgment it ought to be made, on every important question when there is not a quorum present in either House.

It was certainly contemplated by the framers of the Constitution that at least a quorum should be present to do business, and when it is business of such an important character a quorum should pass upon it, and nothing less than a quorum.

I would ask the reference of this resolution to the Committee on Ways and Means, which is the usual course to take, but for the fact that it is known to all of us that there is not a quorum of that committee present. No committee of this House can muster a quorum of its members, and unless there be present a quorum of the committee they can not take any legal action upon it under the rules of the House. And in the absence of such a quorum the only thing to do is for every member to act for himself, or defer action on the matter until members of the majority can get together and hold a caucus and resolve on the subject.

I am perfectly willing it should take this course. I do not wish to force a vote on it. I know it is a question of privilege and if demanded gentlemen can have a vote on it now. I am not disposed to press it, but if the House or a considerable number of gentlemen want further time, either Members of the House or Senators, I am perfectly willing the resolution I have offered may lie upon the table to give such an opportunity.

Mr. LANHAM. The recital in the preamble of the gentleman's resolution discloses the fact there is neither a quorum in this House nor in the Senate. The question I desire to ask, Mr. Speaker, is whether under the rules of the House, and I presume it is the same under the rules governing the Senate, it is competent for the House without a quorum to pass a resolution to adjourn *sine die?*

The SPEAKER. The Chair thinks not if the point is made.

Mr. LANHAM. The resolution declares in the preamble there is no quorum present.

Mr. MCMILLIN. That shows the impossibility of doing the thing which is proposed.

The SPEAKER. The Chair will cause the provision of the Constitution to be read.

Mr. WHITE, of New York. I hope the gentleman from Alabama will have unanimous consent of the House to withdraw the preamble of the resolution.

The SPEAKER. The Chair will cause the Clerk to read that provision of the Constitution which prescribes what a less number than a quorum of either House may do.

The Clerk read as follows:

ARTICLE I.

SECTION 5. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner, and under such penalties as each House may provide.

The SPEAKER. Less than a quorum, therefore, can do nothing except to adjourn from day to day and compel the attendance of absent members.

Mr. KILGORE. I take it, Mr. Speaker, that less than a quorum could adjourn, unless the point of no quorum is made.

The SPEAKER. The Chair has so stated, but the resolution itself recites in the preamble the fact that a quorum is not present.

Mr. KILGORE. I hardly think that is a part of the resolution.

The SPEAKER. The gentleman from Alabama, the Chair understands, does not ask immediate action on the resolution.

Mr. EZRA B. TAYLOR. I would suggest that the gentleman from

Alabama strike out the preamble of the resolution and let it be adopted now.

Mr. OATES. I have no objection whatever to striking it out, as it is only a part of the argument in support of the motion.

The SPEAKER. Does the gentleman desire an immediate vote upon the resolution?

Mr. HENDERSON, of Iowa. I would suggest to my friend from Alabama that he had better let this go over until to-morrow.

Mr. OATES. I have no objection. [Cries of "Vote!" "Vote!"]

Mr. McMILLIN. Mr. Speaker, I would suggest that the question of the final adjournment of the session is one that in the present state of the Senate, there being no quorum there, could only be accomplished in the absence of any objection that might require a quorum to pass the resolution. So far as the recitation of the preamble of the resolution is concerned, about the absence of a quorum in the House as well as at the other end of the Capitol, I think it is just to the House to say that it is known here and throughout the country that the House is simply waiting to give the Senate an opportunity to act upon the bill passed by the House for the reduction of taxation, a bill that we sent to that body some months ago. We are now and have at all times been ready to act. I think I would not eulogize this House too much were I to say that there is no day upon which it may become necessary that a quorum shall be present to pass a bill for the reduction of taxation that a quorum will not be found present ready to transact that legislation. The House has done its whole duty, and only waits to force the Senate to act.

Mr. LANHAM. Will the gentleman from Tennessee permit me to ask him if it has not been demonstrated beyond question to the satisfaction both of the House and the country that that bill will not pass at this session of Congress?

Mr. McMILLIN. That, of course, is a matter about which the record shows all that can be known, either by myself or the gentleman from Texas.

Mr. LANHAM. Still I think it must be recognized that there is no prospect of reaching a conclusion upon the bill at this session.

Mr. McMILLIN. There were reasons satisfactory to the members of the Committee on Ways and Means which prevented the introduction of a resolution of this purport to-day. What they were is perhaps not properly a subject to present to the House at this time. I know the members around me will concur with me in this. I will content myself with the statement I have made, and let the House take such action upon the resolution as it may see proper.

The SPEAKER. The gentleman from Alabama asks consent to let this resolution lie over until to-morrow. Is there objection?

There was no objection, and it was so ordered.

ORDER OF BUSINESS.

The SPEAKER. The tellers will take their places——

Mr. WARNER. Mr. Speaker, permit me a moment, as I wish to make a statement or suggestion in that connection. If there is any business that can be done in the House to-day, I do not want to stand in the way, because we know from past experience that this can not be seconded unless a quorum is present. Hence it would be taking up the time of the House unnecessarily in going through the form of counting by tellers. If, therefore, this bill can retain its present status——

The SPEAKER. It will retain its place.

Mr. WARNER. Then I do not wish to obstruct any other business that may be transacted. If there is anything else that can be transacted without the presence of a quorum, I do not object.

Mr. McRAE. If the gentleman will permit me, I would like to submit a little bill for consideration from the Committee on the Public Lands.

Mr. WARNER. Certainly; I yield for that purpose.

The SPEAKER. The Chair will state that the next committee to be called is the Committee on Naval Affairs, then the Committee on the Post-Office and Post-Roads, after which the Committee on the Public Lands will be called.

Mr. McMILLIN. Mr. Speaker, the gentleman from Ohio has announced that no legislation can be had and no business transacted in the absence of a quorum of the House; and in view of that fact, and for that reason only, I move that the House do now adjourn.

Mr. McRAE. Will the gentleman permit me a moment? I do not think the gentleman from Ohio will object to this bill.

Mr. EZRA B. TAYLOR. I adhere to the position I have taken.

The SPEAKER. The gentleman from Ohio assents to the statement of the gentleman from Tennessee, and declines to withdraw his objection.

Mr. McMILLIN. I have no desire to intervene with this motion to defeat the passage of the bill which the gentleman from Arkansas desires to call up, or any other legislation, and only make the motion in view of the statement of the gentleman from Ohio, and because if the measure of the gentleman from Arkansas [Mr. McRAE] is called up, all further business of the House will be blocked by the gentleman from Ohio, as he has stated.

Mr. EZRA B. TAYLOR. I wish to modify my statement to this extent, to say that I shall not object to a report from the Labor Committee.

Mr. McRAE. I would like to have the title of the bill read at least, and let the gentleman from Ohio state whether or not he will object to its consideration. It is a matter involving no appropriation. I am not personally interested in the matter. It pertains to Washington Territory, the Delegate being now absent——

Mr. WHEELER. And involves laboring men.

The SPEAKER. If there be no objection, the Clerk will report the title.

The Clerk read as follows:

A bill (S. 3475) granting the use of certain lands in Pierce County, Washington Territory, to the city of Tacoma for the purposes of a public park.

Mr. EZRA B. TAYLOR. I object.

Mr. McMILLIN. Mr. Speaker, as there is evidently no quorum, all we can do is adjourn, however much we desire to consider measures of other committees.

The SPEAKER. The question is on the motion of the gentleman from Tennessee [Mr. McMILLIN], that the House do now adjourn.

Mr. McMILLIN. The gentleman from Florida [Mr. DOUGHERTY] desires to make a motion relative to a privileged matter, and I withdraw my motion temporarily to enable him to make that motion.

Mr. DOUGHERTY. I entered a motion to reconsider the vote by which the bill (S. 3620)—I think that is the number—relative to the electoral count was passed. I now move that the motion to reconsider be laid on the table.

The SPEAKER. The motion is pending.

Mr. DOUGHERTY. I desire to make a motion to lay the motion to reconsider on the table.

The SPEAKER. That motion was made, the Chair thinks, by the gentleman from Kentucky [Mr. BRECKINRIDGE], and a vote was being taken by tellers.

Mr. DOUGHERTY. I withdraw the demand for a further count.

The SPEAKER. Then the ayes have it, and the motion is laid on the table.

Mr. PLUMB. I wish to inquire whether it would be in order to proceed with the unfinished business.

The SPEAKER. The gentleman from Tennessee [Mr. McMILLIN] has moved that the House adjourn.

Mr. OATES. Before that motion is put, there was a question made on Friday last and not determined by the Chair that I would like to have disposed of. That was as to my right to print in the RECORD under a former order of the House some matter touching on the tariff, and whether it was competent for me to do it. I stated to the House that the matter I wished to publish was not of my own production, but was by an essayist.

The SPEAKER. That is a question for the House to determine, and not the Chair.

Mr. OATES. The question was whether the former order of the House was broad enough to cover the matter I desired to have printed.

The SPEAKER. The Chair can state his own recollection of the former order, and that is that there was an order allowing gentlemen to print remarks upon the subject of the tariff, or upon the bill commonly known as the Mills bill. The Chair supposes that gentlemen can incorporate in their remarks extracts from the writings of other parties.

Mr. OATES. The question is as to whether it could be done under the former order. I do not want to transgress the rules of the House. I understand that in printing speeches upon any subject, a member can incorporate in his speech whatever he deems proper.

The SPEAKER. That has been the practice; but the Chair would state that it is always under the control of the House. The House may decline to permit anything to be printed in the RECORD except what was actually spoken or read on the floor; and, therefore, the Chair thinks this is a question for the House alone, and not for the Chair.

Mr. OATES. I was calling the attention of the House to the fact that there is a continuing order allowing members to print remarks on this subject.

The SPEAKER. The Chair is aware of that.

Mr. OATES. Now, the question is whether I can adopt and print the substance of an essay as my remarks under that order of the House.

The SPEAKER. The Chair, under the law and under the rules of the House, has no control whatever over the RECORD. It is the duty of the Chair simply to revise the Journal as kept by the Clerk of the House and see that it states correctly the proceedings of the body; but the RECORD itself is in the exclusive control of the House, and the Chair has no power at all to decide or to direct whether the matter shall or shall not be printed in the RECORD. If a gentleman prints in the RECORD, under an erroneous construction of an order made by the House, any matter that ought not to have gone into it the House has the power to strike it out; but the Chair has no power in advance to decide what matter can go into the RECORD.

Mr. WHITE, of New York. I ask unanimous consent that the gentleman from Alabama [Mr. OATES] be given leave to print.

Mr. DINGLEY. I have no objection to that, provided I may also have the right to print a certain letter relating to foreign wages and the condition of foreign labor.

The SPEAKER. Is there objection to the request of the gentleman from Maine [Mr. DINGLEY]?

Mr. MANSUR. I object. [Laughter.]

Mr. KILGORE. Mr. Speaker, I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. KILGORE. I desire to ask the Chair whether the motion to adjourn *sine die* is not a privileged question?

The SPEAKER. It is.

Mr. KILGORE. And that a vote can be demanded at any time?

The SPEAKER. It can.

Mr. KILGORE. I want to give notice that a vote will be demanded on that to-morrow.

The SPEAKER. The question is on the motion of the gentleman from Tennessee [Mr. MCMILLIN] that the House do now adjourn.

Mr. WASHINGTON. Pending that motion, I move that when the House adjourn to-day it be to meet on Wednesday.

Several MEMBERS. Oh, no!

Mr. PLUMB. I object.

Mr. FARQUHAR. I rise to a parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. FARQUHAR. What is the status of the electoral-count bill, after to-day's proceedings?

The SPEAKER. It has passed both Houses, and the motion to reconsider has been laid on the table. The gentleman from Tennessee [Mr. WASHINGTON] moves that when the House adjourn to-day it be to meet on Wednesday.

Mr. PLUMB. I shall raise the point of order and will object to that motion.

Mr. WASHINGTON and others. You can vote it down.

The question was put; and the motion was not agreed to.

The SPEAKER. The question now recurs on the motion of the gentleman from Tennessee [Mr. MCMILLIN] that the House do now adjourn.

The motion was agreed to; and accordingly (at 12 o'clock and 53 minutes p. m.) the House adjourned.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. MORRILL: A bill (H. R. 11595) for the relief of William McClain—to the Committee on Military Affairs.

By Mr. PLUMB: A bill (H. R. 11596) for the relief of Jane Johnson, widow of Moses Johnson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 11597) for the relief of Eliza J. Preston, widow of Albert W. Preston—to the Committee on Invalid Pensions.

Also, a bill (H. R. 11598) for the relief of Jane Payden, widow of John Payden—to the Committee on Invalid Pensions.

Change in the reference of a bill improperly referred was made in the following case, namely:

A bill (H. R. 11586) for the relief of Stephen Williams—from the Committee on War Claims to the Committee on Invalid Pensions.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. D. B. HENDERSON: Resolutions of the Grand Army of the Republic of Iowa, relative to head-stones for deceased soldiers—to the Committee on Appropriations.

By Mr. WASHINGTON: Petition of Eliza J. Ezell and of Mrs. M. B. Winbourn, of Davidson County, Tennessee, for reference of their claims to the Court of Claims—to the Committee on War Claims.

SENATE.

TUESDAY, *October* 16, 1888.

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

The PRESIDENT *pro tempore* presented a petition adopted at a meeting of the Society of Friends in session at Lawrence, Kans., representing a membership of over 8,000 members, praying for the passage of a joint resolution proposing an amendment to the Constitution prohibiting the manufacture and sale of alcoholic liquors in the United States; which was referred to the Committee on Education and Labor.

Mr. COCKRELL. I move to dispense with the call for the morning business.

The PRESIDENT *pro tempore*. That can only be done by unanimous consent.

Mr. COCKRELL. I ask unanimous consent.

The PRESIDENT *pro tempore*. If there be no objection——

Mr. FRYE. Will the Senator allow me to present a memorial?

Mr. PASCO. I have a paper which I desire to present.

The PRESIDENT *pro tempore*. It requires unanimous consent to suspend the order of morning business.

Mr. COCKRELL. I yield for petitions.

Mr. PASCO. I present a paper relating to the claim of the successors in the interst of Messrs. Boyd and Monroe in aid of the petition of Mary E. Boyd, of Florida, in regard to certain land entries in Florida. I move the reference of this paper to the Committee on Claims, to which committee the petition has already been referred.

The motion was agreed to.

Mr. FRYE (by request) presented the petition of Marion Guild Walport, of Washington, D. C., claiming that her family is of royal descent, that there is a conspiracy against them in which President Cleveland and foreign diplomats are implicated, and praying for an investigation of the facts; which was referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. WILSON, of Maryland, from the Committee on Pensions, to whom were referred the following bills, submitted adverse reports thereon; which were agreed to, and the bills were postponed indefinitely:

A bill (S. 1120) to increase the pension of John L. Kirk; and

A bill (S. 2891) granting a pension to Mrs. N. H. Lambdin.

BILLS INTRODUCED.

Mr. EVARTS introduced a bill (S. 3637) granting an increase of pension to Amos Cross; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 3638) granting a pension to George McCreedy; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 3639) granting a pension to Magdalen Harper; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

A. J. M'CREARY.

Mr. SPOONER. Before the Senator from Arkansas [Mr. JONES] left the city he requested me to call up during the session, stating that it was quite important, the bill (H. R. 7924) for the relief of A. J. McCreary, administrator of the estate of J. M. Hiatt, deceased, and for other purposes; and I have been requested by the Senator from Iowa [Mr. ALLISON], whose constituents are interested in it, to ask the Senate to consider the bill. It has been unanimously reported by the Committee on Indian Affairs, and I think it will only take a moment to pass it; but if the Senator from Missouri objects, I shall not insist upon it now.

Mr. COCKRELL. I do not think we ought to commence passing bills this morning.

Mr. SPOONER. Very well.

Mr. COCKRELL. If there is no further morning business, I renew my request.

The PRESIDENT *pro tempore*. The Chair will receive further morning business, if any be offered.

STEAM-PRESSES IN BUREAU OF ENGRAVING AND PRINTING.

Mr. BLAIR. I desire to make an announcement, if the morning business is to be dispensed with. I am compelled to leave the city, and understand that a motion may be made to discharge the Committee on Finance from the further consideration of the House bill relating to the use of steam-presses in the Bureau of Engraving and Printing. I desire to say that should such a motion be made, I hope it will prevail and that the bill may be passed, and my friend, the Senator from Mississippi [Mr. GEORGE], not now in the room, will please note that I desire him to vote on that question, as my vote accords with his own.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 11139) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis.

The message also announced that the House had passed the Senate concurrent resolution to print the fourth annual report of the Bureau of Animal Industry for the year 1887, with amendments in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the President *pro tempore:*

A bill (S. 45) for the relief of Col. James C. Duane;

A bill (S. 307) for the relief of Margaret Kennedy;

A bill (S. 1137) for the relief of Adam L. Epley;

A bill (S. 1190) for the relief of the estate of Joseph Fenno, deceased;

A bill (S. 1494) to secure to the Cherokee freedmen and others their proportion of certain proceeds of lands under the act of March 3, 1883;

A bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas;

A bill (S. 2663) granting an increase of pension to Mrs. Mary M. Ord;

A bill (S. 2802) to fix the number of unbound and bound Journals of the Senate and House of Representatives, and to provide for their distribution;

A bill (S. 3433) authorizing the Secretary of the Interior to accept the surrender of and cancel land-patents to Indians in certain cases;

A bill (S. 3559) to allow persons who have abandoned or relinquished

their homestead entries to make another entry, and for other purposes;

A bill (S. 3597) to provide for the disposal of the Fort Wallace military reservation in Kansas;

A bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President, and to provide for and regulate the counting of the votes for President and Vice-President, and the decision of questions arising thereon;"

A bill (H. R. 1239) to extend the jurisdiction of the Light-House Board to the Sacramento and San Joaquin Rivers, California.

A bill (H. R. 1249) for establishing a light-house and fog-signal on Roe Island, Suisun Bay, California;

A bill (H. R. 1641) for the erection of a light-house at or near a point about midway between Barnegat and Navesink lights, in the State of New Jersey;

A bill (H. R. 2196) for the relief of S. T. Marshall;

A bill (H. R. 2972) authorizing the President to appoint and retire Alfred Pleasonton with the rank and grade of major;

A bill (H. R. 5700) to facilitate the transportation of life-saving and light supplies at Hog Island, Virginia;

A bill (H. R. 6514) for the allowance of certain claims reported by the accounting officers of the United States Treasury Department;

A bill (H. R. 6619) for the relief of Eliza A. Cutler Jones;

A bill (H. R. 7421) for establishing a light off Pamlico Point, North Carolina;

A bill (H. R. 7547) granting the right of way to the Yankton and Missouri River Railway through the Yankton reservation in Dakota;

A bill (H. R. 7604) for the establishment of a light-house and fog-signal at or near Gull Shoal, Pamlico Sound, North Carolina;

A bill (H. R. 8674) for the relief of Sterling H. Tucker and others;

A bill (H. R. 8855) for the establishment of a light-ship with a steam fog-signal at Sandy Hook, New York Harbor;

A bill (H. R. 10183) to establish a light-ship off Great Round Shoal, near Nantucket, Mass.;

A bill (H. R. 11107) to amend an act entitled "An act to authorize the Fort Smith and Choctaw Bridge Company to construct a bridge across the Poteau River, in the Choctaw Nation, near Fort Smith, Ark.;"

A bill (H. R. 11581) making an appropriation for the enforcement of the Chinese exclusion act;

Joint resolution (S. R. 59) authorizing Brig. Gen. Absalom Baird, United States Army, to accept from the President of the French Republic a diploma conferring the decoration of Commander of the National Order of the Legion of Honor; and

Joint resolution (S. R. 112) authorizing the Secretary of War to receive for instruction at the Military Academy at West Point Henry Lecomte, of Switzerland.

THE REVENUE LAWS.

The PRESIDENT *pro tempore*. If there be no further morning business that order is closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of the tariff bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

The PRESIDENT *pro tempore*. The Senator from Missouri [Mr. COCKRELL] is entitled to the floor.

Mr. TELLER. I desire to submit some remarks in reply partially to the Senator from Missouri [Mr. VEST] yesterday, and some remarks that will not perhaps be in the nature of a reply to what he said, and I desired to do so this morning; but I propose to wait until the Senator from Missouri [Mr. COCKRELL], who is entitled to the floor, and the Senator from Wisconsin [Mr. SPOONER], who desires to submit some remarks, conclude, and follow the Senator from Wisconsin, who, I understand, desires to leave the city this afternoon. When they are through, I shall ask the indulgence of the Senate to be heard.

Mr. COCKRELL. Mr. President, the question of taxation is by far the most important of all the many questions that have demanded the consideration and action of the Congress of the United States. It is a vital question with every organized government in the world; always has been and always will be such. No system of government can be administered without cost or expense. No cost or expense can be incurred and paid by any system of government without some source from which to derive the revenue or money to pay such cost or expense. No such revenue or money can be obtained by any government without some burden, some taxation, being imposed upon the subjects or citizens of such government directly or indirectly. Such burden, such taxation is the return or the equivalent borne or paid by such subject or citizen to his government for the rights, privileges, and immunities of his citizenship and the protection of his life, liberty, and property. In a perfect system of government every subject or citizen should contribute equally for the protection of his life and liberty, and in proportion to the property he possesses for the protection of such property.

In every system of government, the right and the power to determine the amount and objects of and to impose such burden, such taxation upon its citizens, must be vested in some department of such government.

Under our written Constitution such right and power are vested in Congress. Our Constitution requires "direct taxes" to—

be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed—

And declares that—

no capitation or other direct tax shall be laid, unless in proportion to the census or enumeration herein before directed to be taken—

And—

no tax or duty shall be laid on articles exported from any State—

And—

no preference shall be given by any regulation of commerce to the ports of one State over those of another; nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Section 8, of Article I, provides that—

The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

The grammatical construction and true meaning of which clause, in my judgment, is that Congress has the power to lay and collect taxes, duties, imposts, and excises in order to pay the debts and provide for the common defense and general welfare of the United States.

What are taxes, duties, imposts, and excises?

A tax is an excise, a duty, a custom, an impost, whatever is required by Government, national, State, municipal, and local, to be paid by the people for governmental use; a sum levied by government authority for public purposes. An excise is a tax imposed on commodities produced and consumed in our own country, and is usually called an internal or an internal-revenue tax.

A duty, a custom, an impost is a tax imposed on commodities imported from foreign countries; is a tariff tax.

What is the origin of the word "tariff?" Upon a promontory running out into the Straits of Gibraltar, at the southern point of Spain, is a fortress called "Tarifa," which commands the entrance and exit of the Mediterranean Sea. When the Moors were in possession they demanded, and having the power, exacted, of all vessels passing in or out of that sea a duty, a custom, an impost, a tax, or sum fixed according to the rates they prescribed on all commodities transported therein, and this duty, custom, tax, so levied and exacted, was called "Tarifa," or "Tariff."

The power to tax vested in Congress is not unlimited, not merely discretionary. Constitutions are made to limit, define, and restrain the powers of government.

Judge Thomas M. Cooley, in his work on Constitutional Limitations, well says:

Constitutionally a tax can have no other basis than the raising of revenues for public purposes, and whatever governmental exaction has not this basis is tyrannical and unlawful. A tax on imports, therefore, the purpose of which is not to raise revenue, but to discourage and indirectly prohibit some particular import for the benefit of some home manufacturer, may well be questioned as being merely colorable, and therefore not warranted by constitutional principles.

Mr. Justice Miller, in delivering the opinion of the Supreme Court of the United States in the case of Loan Association *vs.* Topeka (20 Wallace Reports), most ably expounds the power and objects of taxation, and says:

The theory of our Government, State and national, is opposed to the deposit of unlimited power anywhere. The executive, the legislative, and the judicial branches of these governments are all of limited and defined powers. * * * Of all the powers conferred upon government that of taxation is most liable to abuse. * * *

The power to tax is, therefore, the strongest, the most pervading of all the powers of government, reaching directly or indirectly to all classes of the people. It was said by Chief-Justice Marshall, in the case of McCulloch *vs.* The State of Maryland, that the power to tax is the power to destroy. A striking instance of the truth of the proposition is seen in the fact that the existing tax of 10 per cent. imposed by the United States on the circulation of all other banks than the national banks drove out of existence every State bank of circulation within a year or two after its passage. This power can as readily be employed against one class of individuals and in favor of another, so as to ruin the one class and give unlimited wealth and prosperity to the other, if there is no implied limitation of the uses for which the power may be exercised.

To lay with one hand the power of the Government on the property of the citizen and with the other to bestow it upon favored individuals to aid private enterprises and build up private fortunes is none the less a robbery because it is done under the forms of law and is called taxation. This is not legislation. It is a decree under legislative forms.

Nor is it taxation. A "tax," says Webster's Dictionary, "is a rate or sum of money assessed on the person or property of a citizen by government for the use of the nation or State." Taxes are burdens or charges imposed by the legislature upon persons or property to raise money for public purposes.

Coulter, J., in Northern Liberties *vs.* St. John's Church, says, very forcibly:

"I think the common mind has everywhere taken in the understanding that taxes are a public imposition, levied by authority of the Government for the purpose of carrying on the Government in all its machinery and operations—that they are imposed for a public purpose.

"We have established, we think, beyond cavil that there can be no lawful tax which is not laid for a public purpose.

"If it be said that a benefit results to the local public of a town by establishing manufactures, the same may be said of any other business or pursuit which employs capital or labor. The merchant, the mechanic, the inn-keeper, the banker, the builder, the steam-boat owner, are equally promoters of the public good, and equally deserving the aid of the citizens by forced contributions. No line can be drawn in favor of the manufacturer which would not open the coffers of the public treasury to the importunities of two-thirds of the business men of the city or town."

In order to determine intelligently the question of taxation now pend-

ing we must ascertain the exact condition of our Government financially, its indebtedness, its assets and liabilities, its revenues and their sources.

First. The total debt, including all kinds of obligations, on June 30, 1888, was $1,717,784,793.72, consisting of three classes of items, to wit: First, "debt bearing no interest," $688,350,21 .32; second, "debt on which interest has ceased since maturity," $2,664,363.12; third, "interest-bearing debt," principal and accrued interest, $1,026,770,217.28.

The first class of items includes $56,807.50 of "old demand notes" outstanding; $346,681,016 of United States or legal-tender notes or greenbacks, used as money, never to be redeemed or reduced I hope till every dollar of interest-bearing debt has been paid; $14,415,000 of certificates of deposit, for which an equivalent amount has been deposited in the Treasury; $119,887,370 of gold certificates and $200,387,376 of silver certificates, for both of which an equal amount of gold coin and bullion and silver dollars has been deposited and is now in the Treasury, and $6,922,643.82 of fractional currency, being the estimated amount outstanding and undestroyed.

The second class of items, "debt on which interest has ceased since maturity," includes thirty different kinds of obligations, issued at sundry times since the organization of the Government, which have never been presented for redemption or payment and may never be.

The third class of items, "interest-bearing debt," includes $11,624,-205.28 of accrued unpaid interest and $1,015,146,012 of principal bearing interest, consisting of $222,207,050 of "funded loan of 1891" bearing 4½ per cent. interest, redeemable or payable September 1, 1891; and of $714,177,400 of "funded loan of 1907," bearing 4 per cent. interest, redeemable or payable July 1, 1907; and of $138,050 of "refund certificates," bearing 4 per cent. interest, fundable in the 4 per cent. bonds of the "funded loan of 1907," and redeemable July 1, 1907; and of $64,623,512 of Pacific Railroad bonds bearing 6 per cent. and redeemable at different dates from January 16, 1895, to January 1, 1899; and of $14,000,000 of "Navy pension fund," bearing 3 per cent. interest, being simply a fund for Navy pensioners, the amount of 3 per cent. interest on which is appropriated to pay Navy pensions, and will probably never be extinguished. This sum should not be considered as an interest-bearing obligation to be paid. Excluding the "Navy pension fund" and the accrued unpaid interest, we had on June 30, 1888, an interest-bearing debt of $1,001,146,012, principal payable as above stated.

Second. The aggregate assets, cash in the Treasury on June 30, 1888, amounted to $714,033,484.77, consisting of—

Gold coin and bullion	$313,753,616.89
Silver dollars and bullion	248,022,218.54
United States notes or legal tenders	52,398,204.07
Trade-dollar bullion, national-bank notes, and funds in depositories	66,739,903.45
Paid bonds, coupons, etc	185,384.97
National-bank notes in process of redemption	6,770,380.08
Minor and fractional silver coin	26,163,776.77

The aggregate liabilities of the Treasury were $584,649,243.29, consisting of the following items:

Outstanding gold certificates	$119,887,330.00
Outstanding silver certificates	200,387,376.00
Outstanding certificates for United States notes	14,415,000.00
Held to pay matured debt, interest, etc	14,289,926.37
Held for redemption of United States notes or legal tenders	100,000,000.00
Held for redeeming national-bank notes "failed," "in liquidation," etc	98,929,571.27
Held to meet current liabilities, checks, etc	36,739,999.65

Deducting the aggregate liabilities from assets we had $129,384,-241.48 cash in the Treasury, June 30, 1888.

Of this sum there were $112,035.58 in minor coins—1, 2, and 3 cent pieces—and $26,051,741.19 in fractional or subsidiary silver coins, accumulated under act of June 9, 1879, which made such coins and United States notes interchangeable in sums of $20 or any multiple and such coins a legal tender in sums not exceeding $10.

Deducting the minor and fractional silver coin we had on June 30, 1888, a net surplus of cash in the Treasury of $103,220,464.17, and on September 30 we had an aggregate surplus of $121,290,666.06, and, deducting minor coin and fractional silver coin, a net surplus of cash of $96,444,845.84.

We have not a dollar of interest-bearing debt either redeemable or payable prior to September 1, 1891, and the surplus now existing and sure to accrue during fiscal year 1889 would be sufficient to extinguish the debt maturing in 1891, and then we would have no debt redeemable or payable till July 1, 1907.

This condition, this congestion of the Treasury has not arisen suddenly from unforeseen causes, but from causes long foreseen and understood, as I will clearly prove.

On the 31st of August, 1865, the public debt reached the highest point, and was made up of the following items, to wit:

Funded debt	$1,109,568,191.80
Matured debt	1,503,020.09
Temporary loans	107,148,713.16
Certificates of indebtedness	85,093,000.00
Five per cent. legal-tender notes	33,954,230.00
Compound interest legal-tender notes	217,024,160.00
Seven-thirty notes	830,000,000.00
United States legal-tenders	433,160,569.00
Fractional currency	26,344,742.51
Suspended requisitions uncalled for	2,111,000.00
Total	2,845,907,626.56

Of these obligations, $684,138,949 were a legal tender, not counting the fractional currency also circulating as money.

During the fiscal year ending June 30, 1866, for the first time since 1860, we had a surplus in the Treasury, after paying all net ordinary expenditures, including interest on public debt and premiums, of $37,-223,203.07, and during each of the fiscal years since we have had a surplus. The aggregate amount of the surplus for the years 1866 to 1888, both inclusive, is $1,603,187,227.75.

The surplus in 1870 was over one hundred and one millions, in 1880 over sixty-five millions, in 1881 over one hundred millions, in 1882 over one hundred and forty-five millions, in 1883 over one hundred and thirty-two millions, in 1884 over one hundred and four millions, in 1885 over sixty-three millions, in 1886 over ninety-three millions, in 1887 over one hundred and three millions, and in 1888 over one hundred and three millions. These sums remained after paying all interest and other net ordinary expenses.

During these twenty-three years, from July 1, 1865, to June 30, 1888, being the fiscal years 1866 to 1888, both inclusive, we have paid from the Treasury of the United States—

Principal of bonds or funded debt	$1,199,970,200.00
Principal of other obligations, such as temporary loans, 5 per cent. compound interest, and United States legal-tender and 7.30 Treasury notes, etc	403,217,027.75
Interest on public debt	2,197,803,200.41
Net ordinary expenses, exclusive of interest	4,447,676,414.52
Aggregate payments	8,248,666,842.68

Third. Enormous revenues, with prolific sources, were essential to enable the Government to collect and expend this bewildering amount in twenty-three years.

These vast amounts have been received into the Treasury during said period from taxes imposed by our laws upon and collected from the people, in sums and from sources, as follows:

Customs or tariff taxes	$4,197,588,329.33
Internal-revenue taxes	3,313,462,178.35
Direct taxes	10,430,595.43
Sales of public lands	83,302,504.71
Premiums on loans and sales of gold coin	169,265,420.90
Other miscellaneous sources	474,617,813.96
Aggregate receipts	8,248,666,842.68

During these twenty-three years the people of the United States, the toiling masses, have paid in taxes imposed by the tariff laws upon the numerous articles of imported merchandise consumed and used by them the vast sum of $4,197,588,329.33, which has actually been received into the Treasury. They have also paid into the Treasury in taxes imposed by the internal revenue laws upon the taxable articles they have used the sum of $3,313,462,178.35. Of this sum the taxes on "distilled spirits" yielded $1,273,639,807.06; on fermented liquors, $273,616,446.33; on manufactured tobacco, $755,552,749.18; and on all other sources under said laws, $1,011,356,303.80.

We will receive no more revenue from the two sources of "direct taxes" and "premiums on loans and sales of gold coin."

The revenues for the fiscal year 1888 were:

Customs or tariff taxes	$219,091,173.63
Internal-revenue taxes	124,296,871.98
Sales of public lands	11,202,017.23
Other miscellaneous items	24,674,446.10
Direct taxes	1,565.82
Total revenue for 1888	379,266,074.76

In the probable event of a change in the public land laws by reserving such lands for actual homestead settlers the revenue from that source may greatly diminish, if not entirely cease. There will be no more revenue from direct taxes. The revenues from "other miscellaneous items" vary from year to year, and may continue at from fifteen to twenty-five million dollars annually.

The two main sources of revenue are the customs or tariff and the internal revenue, and will, with reasonable certainty, continue to yield sums of net revenue equal to or even greater than the sums yielded the past year. The surplus must therefore continue to accumulate in the Treasury as long as the existing tariff and internal-revenue laws remain unchanged and the people are able to purchase the articles so taxed.

With this condition of an idle, demoralizing surplus now in the Treasury, and the reasonable certainty of its continued increase under existing laws, what is the wisest and best remedy for relieving the Treasury?

This is the great, vital question, overshadowing all others in its magnitude and demanding the most serious, painstaking thought and laborious efforts of every patriot, tax-payer, and voter.

Three remedies, and only three, are apparently available.

First. To pay out the surplus in the purchase of the interest-bearing debt at whatever premium the holders of the funded bonds may have the conscience to ask, and also in the redemption and absolute retirement of the United States legal-tender notes or greenbacks.

This would only give temporary relief; for the existing and the reasonably certain surplus for the next ten or eleven years would purchase and extinguish the funded debt and, in two or three years more, redeem and absolutely retire the greenbacks, and then we would have no debt of any kind.

This is neither a wise nor judicious remedy and only a *dernier ressort* for temporary relief.

Second. Larger expenditures, extravagant, generous, liberal appropriations, to be made by Congress for objects and purposes other than those necessary for a wise, judicious, and economical administration of our Government, so that the annual appropriations shall equal total receipts from taxation.

This proposal, in my judgment, would not be a remedy for any condition of the Treasury, but would be a crime, and nothing less, committed by the agents and representatives of the people—the tax-payers—which should relegate to private life every Representative and Senator who supports such policy.

Third. A change in the existing laws, imposing the internal-revenue and customs or tariff taxes so as to reduce the amount of such taxes collectible from the consumers of the articles taxed under such laws to the amount actually required to pay the expenses of the Government economically administered, and to make the annual receipts from such taxes equal to the expenses of the Government.

This seems to me to be the only wise and just remedy against surplus revenues arising from taxes imposed by law upon the people.

What have been the policies of the Republican and Democratic parties touching the accumulating surplus and the remedies therefor?

The Republican party had a two-thirds majority in the House and Senate from July 1, 1865, to March 4, 1869, and could pass any party measure over the veto of President Johnson. From March 4, 1869, to March 4, 1875, the beginning of the Forty-fourth Congress, that party had the complete control of the Government in all the three branches—executive, legislative, and judicial. From March 4, 1875, to March 4, 1885, it had complete control of the executive department—the President, Cabinet, and all appointive officers—and the President, by his veto, could defeat any inimical measure of Congress. From 1865 to date that party has had and now has control of the Senate, excepting only that from March 4, 1879, to March 4, 1881, during the Forty-sixth Congress, the Democratic party had control of the Senate. During the Forty-seventh Congress, from March 4, 1881, to March 4, 1883, the Republican party had control of both Senate and House. From March 4, 1875, to March 4, 1879, during the Forty-fourth and Forty-fifth Congresses, the Democratic party had control of the House, and from March 4, 1879, to March 4, 1881, during the Forty-sixth Congress, had control of both the Senate and House. From March 4, 1883, to date, the Democratic party has had control of the House. And from March 4, 1885, to date, has also had control of the executive department.

To ascertain what has heretofore been the policy of the Republican party in regard to the continuously accumulating surplus, we will examine the official records of the Republican executive administration from 1865 to March 4, 1885. The Treasury Department is specially charged by the laws with the administration of the finances—taxation, revenue, etc. The Secretary of the Treasury is required by law to submit to Congress, annually, a finance report showing the receipts and expenditures of the revenues, with such recommendations as he may deem proper for the consideration of Congress. Hon. Hugh McCulloch, a distinguished Republican statesman and financier, was Secretary of the Treasury under Presidents Lincoln and Johnson, from March 7, 1865, to March 4, 1869, and in his finance report for 1866, says:

A further diminution of internal taxes and a modification of the tariff, which will doubtless lead to a reduction of customs duties on many articles, will be required in order that production may be increased and new life infused into certain branches of industry that are now languishing under the burdens which have been imposed upon them.

And recommended:

Third. In a careful revision of the tariff for the purpose of harmonizing it with our internal taxes, removing the oppressive burdens now imposed upon certain branches of industry, and relieving altogether or greatly relieving raw materials from taxes, in order that the product of labor may be enhanced and the production and exportation increased.

And in his instructions to Hon. David A. Wells, special commissioner of the revenue, touching the preparation of a system of taxation, said:

You will therefore endeavor, first, to secure for the Government a revenue commensurate with its necessities, and, secondly, to propose such modifications of the tariff laws now in force as will better adjust and equalize the duties upon foreign imports with the internal taxes upon home productions. If this last result can be obtained without detriment to the revenue by reducing taxation upon raw materials and the machinery of home productions rather than by increasing the rates of imports, it would, in my opinion, by decreasing the cost of production and increasing the purchasing power of wages, greatly promote the interests of the whole country.

And said in his recommendation to Congress:

The Secretary does not, as before stated, intend to discuss it, but he ventures to suggest that the following general principles, some of which have been acted upon by Congress, and the correctness of all of which have been proved by other nations, may be safely adopted as a guide to the legislation that is now required:

First. That the fewest number of articles, consistent with the amount of the revenue to be raised, should be subject to internal taxes, in order that the system may be simple in its execution and as little offensive and annoying as possible to the tax-payers.

Second. That the duties upon imported commodities should correspond and harmonize with the taxes upon home productions, and that these duties should not be so high as to be prohibitory, nor to build up home monopolies, nor to prevent the free exchange of commodities which is the life of commerce. Nor, on the other hand, should they be so low as to seriously impair the revenues, nor to subject the home manufacturers, burdened with heavy internal taxes, to a competition with cheaper labor and larger capital which they may be unable to sustain.

Third. That the raw materials used in building and manufacturing, and which are to be largely enhanced in value by the labor which is to be expended upon them, should be exempted from taxation, or that the taxes upon them should be low in comparison with the taxes upon other articles. This is the policy of other enlightened nations, and it is believed that the diminution of direct revenue which it would involve, if adopted by the United States, would be more than made up by the augmented value which it would give to labor and by the increase of productions and exports which would be sure to result from it. It should be constantly borne in mind that taxes upon raw materials directly increase the cost of production, and thus tend either to reduce the product of labor or to prevent exportations to foreign markets.

Fourth. That the burdens of taxes should fall chiefly upon those whose interests are protected by taxation and upon those to whom the public debt is a source of wealth and profit, and lightly upon the laboring classes, to whom taxation and the debt are without so many compensatory advantages.

And in his finance report for 1867, said:

Inasmuch as large and permanent revenues can not be realized unless laws are so framed as not to bear heavily upon the industrial pursuits, a tariff which, harmonizing with internal taxes, should year by year yield the largest revenues, would undoubtedly prove to be the least prejudicial to national growth and prosperity.

And in his finance report for 1868, when it was uncertain whether too large a reduction of the internal-revenue taxes might have been made, said:

The Secretary does not doubt, however, that the best interests of the country will be subserved by a reduction of the tariff and an increase of excise duties.

Hon. George S. Boutwell, a distinguished Republican from Massachusetts, was Secretary of the Treasury from March 11, 1869, to March 16, 1873, and in his finance report for 1869, in discussing the revenue question and speaking of its unexpected success, said:

We shall then be in a condition to enter upon the work of reducing taxation at the commencement of the next session of Congress.

And in his finance report for 1870 said:

The financial prospect, although highly favorable, is not such as to warrant important changes in the revenue system at the present session of Congress; but should the result during the coming year meet my expectations, it will be possible at the December session of the Forty-second Congress to make a very material reduction in the revenues without impairing the ability of the Government to make satisfactory payments of the public debt.

And in his finance report for 1871 said:

It is practicable to dispense with all revenue from internal sources except that derived from stamps, spirits, tobacco, and malt liquors.

And in speaking of reduction of the customs duties, said:

In this view, I respectfully recommend to the consideration of Congress the reduction of the duties on salt to the extent of 50 per cent.; the duty on bituminous coal to 50 cents per ton; the reduction of the duty on raw hides and skins; and the removal of all duties from a large class of articles produced in other countries, which enter into the arts and manufactures of this country, and which are not produced in the United States, and the revenue from which is inconsiderable. Such a list, with the revenue derived from each article, is in course of preparation, and will be submitted to Congress. * * * While nothing, as the consequence of legislation, could be more disastrous to the public prosperity than a policy which should destroy or seriously disturb the manufacturing interest of the country, it is still possible, by wise and moderate changes adapted to the condition of business and labor, to reduce the rates of duties with benefit to every class of people.

And in his finance report for 1872, said:

Anticipating a condition of peace, we may also anticipate a general reduction in the percentage of customs duties. This reduction, however, should not be measured solely by the wants of the Treasury; but regard should be had also to the condition of the various branches of industry in which the people are engaged. In presence of the fact that the leading pursuits of the country are stronger than ever before in the possession of adequate capital and a supply of intelligent laborers, there may be a moderate reduction from time to time in the rate of duties, as the diminishing expenses of the Government shall permit, without either alarming capital or injuring labor.

Hon. JOHN SHERMAN, the most distinguished financier in the Republican party and the ablest, and a statesman of unquestioned ability, varied attainments, and long experience, was Secretary of the Treasury from March 9, 1877, to March 4, 1881, and in his finance report for 1878, said:

The needs of the public service require that no reduction of internal-revenue taxes be made. The commodities from which the internal revenue is mostly collected, namely, spirits, tobacco, fermented liquors, and stamps, are those which properly bear the burden of the tax, and the present rates are, in the main, equitable and satisfactory; and to them the trade in those commodities has become adjusted. Any change in these rates, or agitation of change, disturbs the course of business, and is prejudicial both to dealers and the revenue. Stability in the rates of taxation is, in view of the present condition of the country, especially desirable.

And in his finance report for 1879, in discussing the internal-revenue taxes, said:

The very large proportion of the revenue derived from those sources is of itself an argument for the stability of the rates of taxation upon them. If the proportion were small, fluctuation in the rates of taxation would be of less consequence. * * * The demand for change of rates does not originate with the consumers, who pay the greater part of the tax, but chiefly with those who seek an enhancement of profit on the capital invested in the manufacture.

And in his finance report for 1880, said:

If it should be determined by Congress to reduce taxes, it is respectfully recommended that all the taxes imposed by the internal-revenue law, other than those on bank-circulation and on spirits, tobacco, and fermented liquors, be repealed.

And further said:

The Secretary can not too strongly urge the importance of stability in the rates imposed on spirits, tobacco, and fermented liquors. These articles are regarded by all governments as proper objects of taxation. Any reduction in the rates imposes a heavy loss to the owner of the stock on hand, while an increase operates as a bounty to such owner. When the rate is fixed the trade adapts itself to it. A change disturbs the collection of the tax and the manufacture of the article. As already suggested, the time is opportune for reducing the subjects of internal taxation to the articles named and the taxes on circulating notes of banks.

Hon. Charles J. Folger, a distinguished Republican statesman and jurist from New York, was Secretary of the Treasury from November 14, 1881, to his death, on September 4, 1884; and in his finance report for 1881 said:

Meanwhile the daily receipts from the community by the Treasury continue, the surplus over its needs increases, and money lies idle. It seems that the plan most just for giving relief is to reduce taxation, and thereby diminish receipts and surplus.

* * * And is it a beneficial exercise of governmental power to raise money by taxation in greater sums than the lawful demands upon the Government require, when those demands are of themselves a heavy burden upon the industry and business of the country?

And in speaking of the amount of taxes derived from spirits, tobacco, and fermented liquors, said:

The tax on these articles is a tax on appetite or indulgences, legitimate subjects of taxation when taxation is needful. A reduction of that tax is not recommended.

And in his finance report for 1882, said:

I respectfully refer to my last report for my views upon this subject. They have not materially changed. Now, as then, it is recommended to retain a tax on spirits, tobacco, and fermented liquors, as legitimate subjects of needful taxation. They are, in the main, the means of indulgence, and should come before necessaries as subjects of taxation. * * * Propositions have recently been made to abolish the whole sytem of internal revenue, but neither public sentiment nor political action indicates a desire on the part of the tax-paying citizens to strike out this class of taxes.

To complete an effectual reduction of taxation it must be made on some principal source of revenue, and such an one is the duties on imports collected under the tariff laws, and an additional obvious method of avoiding a surplus in the Treasury is a reduction of the revenues from those.

He further said:

In reading the testimony before the Tariff Commission it is to be observed that with scarcely an exception the representative of every industry, while conceding that a general reduction of the tariff is proper and necessary, has claimed that its peculiar product can submit to no reduction of the protection now afforded.

He further said:

* * * The classes of merchandise paying the largest amount of duties from customs are the following, in the order named: Sugar and molasses, wool and manufactures from it, iron and steel and the manufactures from them, manufactures of silk, manufactures of cotton, amounting to about one hundred and thirty-seven and a half millions. A substantial reduction upon each of the classes of articles named is recommended. And it is believed that the time has arrived when a reduction of duties on nearly all the articles in our tariff is demanded and is feasible.

And in his finance report for 1883, made after the passage of the present tariff law, he said:

That there is likely to be a continuing surplus in the Treasury over the ordinary expenses of the Government, so long as the present revenue laws remain, is seen by those attentive to fiscal affairs.

He further said:

In the recommendations of the President and those of this Department, and the action of Congress, and in the expression of public opinion, there has been substantial concord as to how the needed reduction of the revenue should be brought about. It has been generally conceded that the internal-revenue taxes, except those upon spirits, fermented liquors, and upon the circulation of banks, might well be abolished.

There has been difference whether the tax upon tobacco should be abolished or modified. There were but few advocates of the immediate total abolition of taxes upon spirits or fermented liquors. My last report said that taxes upon spirits and tobacco, being upon things not needful, should be retained rather than those upon the common necessaries of life; which as a proposition is not to be controverted.

But it was conceded by all that a substantial reduction should be made upon nearly all imported articles subject to duties.

To make a start in the proposed reduction of revenue from imports, the Tariff Commission had been created. In good faith it undertook the work. * * *

He further said:

* * * On the whole, then, this Department does not recommend an immediate revision of the tariff act. It adheres, however, to its conviction, that ultimately the just and expedient method of relief from taxation and of limiting the revenues to the needs of an economical government must be found in a reduction of the duties on imports.

He further said:

Propositions are made to repeal the whole system of internal revenue. As to this, I repeat my remark of last year: I see no public sentiment or political action, indicating a desire on the part of tax-paying citizens to strike out this class of taxes.

Hon. Hugh McCulloch was again Secretary of the Treasury from the 28th day of October, 1884, to the incoming of the present Democratic Executive, and in his finance report for 1884, touching the necessity for a reduction of import duties, says:

First. That the existing duties upon raw materials which are to be used in manufacture should be removed. This can be done in the interest of our foreign trade.

Second. That the duties upon articles used or consumed by those who are the least able to bear the burden of taxation should be reduced. This also can be effected without prejudice to export trade.

The tax upon whisky could not be repealed without a disregard of public sentiment nor without creating a necessity for higher duties upon imported goods; but while this is true the tax upon the alcohol used in manufacturing might be removed with decided benefit to home industry and foreign trade.

Now consider the official records of the Republican Presidents in their messages to Congress. President Grant in his first annual message of December 6, 1869, said:

The subject of tariff and internal taxation will necessarily receive your attention. The revenues of the country are greater than the requirements and may with safety be reduced. But as the funding of the debt in a 4 or 4½ per cent. loan would reduce annual current expenses largely, thus, after funding, justifying a greater reduction of taxation than would now be expedient, I suggest postponement of this question until the next meeting of Congress.

In his second annual message, December 5, 1870, he said:

With the revenue stamp dispensed by postmasters in every community, a tax upon liquors of all sorts and tobacco in all forms, and by a wise adjustment of the tariff which will put a duty only upon those articles which we could dispense with, known as luxuries, and on those which we use more of than we produce, revenue enough may be raised, after a few years of peace and consequent reduction of indebtedness, to fulfill all our obligations. * * * The necessities of the country compel us to collect revenue from our imports. An army of assessors and collectors is not a pleasant sight to the citizen, but that or a tariff for revenue is necessary.

In his third annual message, December 4, 1871, he said:

I therefore recommend a modification of both the tariff and internal-tax laws. I recommend that all taxes from internal sources be abolished, except those collected from spirituous, vinous, and malt liquors, tobacco in its various forms, and from stamps.

In readjusting the tariff I suggest that a careful estimate be made of the amount of surplus revenue collected under the present laws, after providing for the current expenses, etc., * * * and that this surplus be reduced in such a manner as to afford the greatest relief to the greatest number. There are many articles not produced at home, but which enter largely into general consumption, through articles which are manufactured at home, such as medicines compounded, etc., from which very little revenue is derived but which enter into general use. All such articles I recommend to be placed on the free-list.

And in his annual message of December 7, 1874, said:

I would suggest to Congress the propriety of readjusting the tariff so as to increase the revenue and at the same time decrease the number of articles upon which the duties are levied. Those articles which enter into our manufactures, and are not produced at home, it seems to me, should be entered free. Those articles of manufacture which we produce a constituent part of, but do not produce the whole, that part which we do not produce should be entered free also.

I will instance fine wools, dyes, etc. These articles must be imported to form a part of the manufacture of the highest grades of woolen goods.

Chemicals used as dyes, compounded in medicines, and used in various ways in manufactures come under this class. The introduction, free of duty, of such wools as we do not produce would stimulate the manufacture of goods requiring the use of those we do not produce, and therefore would be a benefit to home production. There are many articles entering into "home manufactures" which we do not produce ourselves the tariff upon which increases the cost of producing the manufactured article. All the corrections in this regard are in the direction of bringing labor and capital in harmony with each other, and of supplying one of the elements of prosperity so much needed.

In his annual message in December, 1875, in speaking of the articles which should be entered free, he said:

I would mention those articles which enter into manufactures of all sorts. All duty paid upon such articles goes directly to the cost of the article when manufactured here, and must be paid for by the consumer. These duties not only come from the consumers at home, but act as a protection to foreign manufacturers in our own and distant markets.

President Arthur, in his first annual message of December 6, 1881, said:

In view of the heavy load of taxation which our people have already borne, we may well consider whether it is not the part of wisdom to reduce the revenues, even if we delay a little the payment of the debt. It seems to me that the time has arrived when the people may justly demand some relief from their present onerous burden, and that by due economy in the various branches of the public service this may readily be afforded. I therefore concur with the Secretary in recommending the abolition of all internal-revenue taxes except those upon tobacco in its various forms and upon distilled spirits and fermented liquors, and except also the special tax upon manufacturers of and dealers in such articles. * * *

If a careful revision can not be made at this session, a commission such as was lately approved by the Senate, and is now recommended by the Secretary of the Treasury, would doubtless lighten the labors of Congress whenever this subject shall be brought to its consideration.

In his second annual message of December 4, 1882, he said:

It will be remembered that I urged upon Congress at its last session the importance of relieving the industry and enterprise of the country from the pressure of unnecessary taxation. It is one of the tritest maxims of political economy that all taxes are burdensome, however wisely and prudently imposed.

And though there have always been among our people wide differences of sentiment as to the best methods of raising national revenues, and indeed as to the principles upon which taxation should be based, there has been substantial accord in the doctrine that only such taxes ought to be levied as are necessary for a wise and economical administration of the Government. * * *

Either the surplus must lie idle in the Treasury or the Government will be forced to buy at market rates its bonds not then redeemable, which under such circumstances can not fail to command an enormous premium, or the swollen revenues will be devoted to extravagant expenditures, which, as experience has taught, is ever the bane of an overflowing Treasury. It was made apparent in the course of the animated discussions which this question aroused at the last session of Congress, that the policy of diminishing the revenue by reducing taxation commanded the general approval of the members of both Houses. * * *

The present tariff system is in many respects unjust. It makes unequal distributions both of its burdens and its benefits. This fact was practically recognized by a majority of each House of Congress in the passage of the act creating the Tariff Commission. * * * If the tax on domestic spirits is to be retained it is plain, therefore, that large reductions from the customs revenues are entirely feasible.

It must be remembered that these recommendations of President Arthur were made to the Forty-seventh Congress, Republican in both Senate and House. The Tariff Commission, created by the act of May 15, 1882, and composed largely of Republicans, made its report to the House on December 4, 1882, and the so-called tariff act of March 3, 1883, entitled "An act to reduce internal-revenue taxation, and for other purposes," was passed by that Republican Congress.

President Arthur, in his first message thereafter, on December 4, 1883, said:

Hitherto the surplus as rapidly as it has accumulated has been devoted to the reduction of the national debt.

As a result, the only bonds now outstanding which are redeemable at the pleasure of the Government are the 3 percents, amounting to about $305,000,000. The 4½ percents, amounting to $250,000,000, and the $737,000,000 4 percents are not payable until 1891 and 1907, respectively. * * * There are cogent reasons, however, why the national indebtedness should not be thus rapidly extinguished. Chief among them is the fact that only by excessive taxation is such rapidity attainable.

In his last message, on December 1, 1884, he said:

Our system of tax and tariff legislation is yielding a revenue which is in excess of the present needs of the Government. These are the elements from which it is sought to devise a scheme by which, without unfavorably changing the condition of the workingman, our merchant marine shall be raised from its enfeebled condition, and new markets provided for the sale beyond our borders of the manifold fruits of our industrial enterprises. The problem is complex and can be solved by no single measure of innovation or reform.

The countries of the American continent and the adjacent islands are, for the United States, the natural marts of supply and demand. * * * It is by no means desirable, however, that the policy under consideration should be applied to these countries alone. The healthful enlargement of our trade with Europe, Asia, and Africa should be sought by reducing tariff burdens on such of their wares as neither we nor the other American states are fitted to produce, and thus enabling ourselves to obtain in return a better market for our supplies of food, of raw materials, and of the manufactures in which we excel.

It seems to me that many of the embarrassing elements in the great national conflict between protection and free trade may thus be turned to good account; that the revenue may be reduced so as no longer to overtax the people; that protective duties may be retained without becoming burdensome; that our shipping may be judiciously encouraged; the currency fixed on firm basis; and, above all, such a unity of interests established among the states of the American system as will be of great and ever-increasing advantage to them all.

Now examine the policies as declared in the national Republican platforms.

The national Republican convention at Chicago, in May, 1868, which nominated General Grant, declared in its fourth plank:

Fourth. It is due to the labor of the nation that taxation should be equalized and reduced as rapidly as the national faith will permit.

The convention in 1872, which renominated General Grant, in the seventh plank declared:

Seventh. The annual revenue after paying current expenditures, pensions, and the interest on the public debt, should furnish a moderate balance for the reduction of the principal; and that revenue, except so much as may be derived from a tax upon tobacco and liquors, should be raised by duties upon importations, the details of which should be so adjusted as to aid in securing remunerative wages to labor and promote the industries, prosperity, and growth of the whole country.

The convention which nominated Mr. Hayes in 1876 in eighth plank declared:

Eighth. The revenue necessary for current expenditures and the obligations of the public debt must be largely derived from duties upon importations which, so far as possible, should be adjusted to promote the interests of American labor and advance the prosperity of the whole country.

The convention which nominated General Garfield in 1880, in Chicago, in fifth plank declared:

Fifth. We affirm the belief avowed in 1876, that the duties levied for the purpose of revenue should so discriminate as to favor American labor.

The convention which in 1884 nominated Mr. Blaine declared in fourth, fifth, and sixth planks:

Fourth. * * * We therefore demand that the imposition of duties on foreign imports shall be made not for revenue only, but that in raising the requisite revenues for the Government, such duty shall be so levied as to afford security to our diversified industries and protection to the rights and wages of the laborer, to the end that active and intelligent labor as well as capital may have its just reward, and the laboring man his full share in the national prosperity.

Fifth. Against the so-called economic system of the Democratic party, which would degrade our labor to the foreign standard, we enter our most earnest protest. The Democratic party has failed completely to relieve the people of the burden of unnecessary taxation by a wise reduction of the surplus.

Sixth. The Republican party pledges itself to correct the irregularities of the tariff and to reduce the surplus, not by the vicious and indiscriminating process of horizontal reduction, but by such methods as will relieve the tax-payer without injuring the laborer or the great protective industries of the country.

In order to make no mistake as to the declared policy of the Republican party, examine the declarations of some of the leading Republican States in their State platforms, and some other States.

The Republican party of Illinois in State convention, September 20, 1871, declared in third and fourth planks:

Third. That as it will be necessary and desirable to obtain from duties on imports a large portion of the revenue needed to defray the expenses of the Government, to pay the interest on the national debt, and the principal as it matures, such duties should be so adjusted as not to prejudice, but promote the interests of every section and branch of industry as far as may be possible.

Fourth. That the large surplus remaining in the national Treasury after the payment of all the expenses of the Government, including the interest on its public debt, calls for a still further reduction of the public burdens, and that in effecting that reduction regard should be had to relief from that species of taxation which, while it adds but slightly to the revenue of the country, taxes heavily its labor and productive interests; and we heartily approve the bills repealing the duty on coal and salt which have already passed the House of Representatives.

The Republicans of Illinois, in State convention, May 22, 1872, in seventh and eighth planks, declared:

Seventh. That the necessities of the Government require so large a tariff upon importation that the question of free trade is not one now before the American people. The only question left is how to so adjust the tariff that it will most promote the labor industry and general welfare of the country without being oppressive to any interests of society, and we know of no better way to dispose of this subject than that adopted by the Republican party in Congress—to learn wisdom by experience, reduce taxation as fast as possible, and remove unnecessary burdens upon the necessities of life.

Eighth. That in adjusting the details of a system for raising a revenue to cover the necessary requirements of the Government, and meet its liabilities, care should be taken to so regulate the imports that they will press least upon the growing industries of the country, cheapen the necessaries of life, and afford to labor the fairest promise of permanent reward.

Illinois Republicans, in their State platform, on June 28, 1882, declared:

Fifth. That the Republican party now, as in the past, is in favor of such just laws as shall protect the agriculturist, the manufacturer, and the workingman from the oppression of monopolists.

Republicans of Indiana, February 22, 1870, in fifth plank, declared:

Fifth. That a reduction of taxation is demanded both of tariff and internal taxes, until it reaches the lowest amount consistent with the credit and necessities of the Government; and that we are in favor of a tariff for revenue, believing that a proper adjustment of duties must necessarily afford all the incidental protection to which any interest is entitled.

And in their State convention of February 22, 1876, further declared:

Eleventh. Taxes should give the greatest possible exemption to necessities, and be placed more heavily upon the luxuries and wealth of the country.

The Republicans of Ohio, in their State convention of June 2, 1875, declared:

Third. We are in favor of a tariff for revenue with incidental protection to American industry.

And in their State convention of March, 1876, in their sixth plank, again declared:

Sixth. We are in favor of a tariff for revenue with incidental protection to American industry.

And in their State convention of June 12, 1878, declared:

A tariff for revenue should be maintained and so adjusted as to secure incidental protection to home industry.

The Republicans of Iowa, in State convention, August 17, 1871, declared in third plank:

Third. That a tariff for revenue is indispensable and should be so adjusted as not to become prejudicial to the industrial interests of any class or section of the country, while securing to our home producers fair competition with foreign capital and labor.

And in their State convention of June 19, 1878, declared:

Tenth. A tariff wisely adjusted for revenue.

The Republicans of Wisconsin, in State convention, on August 31, 1871, declared in fifth plank:

Fifth. That in our judgment the most efficient and satisfactory means of raising the larger portion of revenue to meet the obligations of the Government is from duties on imports; that such duties should be so laid as, first, to make sure of the amount required; second, to fairly distribute the burdens of the nation upon all sections of the country, all classes of people; and third, so as never to burden one interest that another may thrive.

The Republicans of Connecticut, in State convention, on January 24, 1872, declared in fifth plank:

Fifth. In national affairs we urge, first, a large reduction of taxation; * * * third, retaining a tariff sufficient to raise the needed revenue, we would have it carefully adjusted to favor American industry, working rather to interests widely extended than to merely local and limited pursuits. * * *

The Republicans of New York, in State convention, September 28, 1871, declared in third plank:

Third. That we call upon Congress, as far as may be compatible with the national credit, to continue to reduce taxation, and as rapidly as possible remove the burdens from the national industry; that while our interest accounts, our pension-rolls, and other obligations entailed by the rebellion shall remain, we are in favor of such a tariff as will yield the needed revenue with the least injury to the people, at the same time affording protection to our own rather than to foreign manufactures.

And in their State convention of May 15, 1872, declared:

Sixth. That there should be a tariff for revenue so adjusted as to bear as equally as possible upon every kind of labor, property, and industry.

In order to determine more definitely still the declared policy of the Republican party heretofore, consider the report of the Tariff Commission of 1882.

The Republican Congress, the House and Senate both being Republican, enacted the law of May 15, 1882, creating the "Tariff Commission," to be composed of nine members to be appointed by a Republican President. Section 3 of this law is as follows:

SEC. 3. That it shall be the duty of said commission to take into consideration and to thoroughly investigate all the various questions relating to the agricultural, commercial, mercantile, manufacturing, mining, and industrial interests of the United States, so far as the same may be necessary to the establishment of a judicious tariff or a revision of the existing tariff, upon a scale of justice to all interests; and for the purpose of fully examining the matters which may come before it, said commission, in the prosecution of its inquiries, is empowered to visit such different portions and sections of the country as it may deem advisable.

Said commission made its investigation—took 2625 pages of printed testimony, not, however, verified by the affidavits or oaths of the witnesses—and submitted its report to a Republican Congress December 4, 1882, saying:

Early in its deliberations the commission became convinced that a substantial reduction of tariff duties is demanded, not by a mere indiscriminate popular clamor, but by the best conservative opinion of the country, including that which has in former times been most strenuous for the preservation of our national industrial defenses. Such a reduction of the existing tariff the commission regards not only as a due recognition of public sentiment and a measure of justice to consumers, but one conducive to the general industrial prosperity, and which, though it may be temporarily inconvenient, will be ultimately beneficial to the special interests affected by such reduction.

No rates of defensive duties, except for the establishment of new industries which more than equalize the conditions of labor and capital with those of foreign competitors, can be justified. Excessive duties, or those above such standard of equalization, are positively injurious to the interests which they are supposed to benefit. They encourage the investment of capital in manufacturing enterprise by rash and unskilled speculators, to be followed by disaster to the adventurers and their employés, and a plethora of commodities which deranges the operations of skilled and prudent enterprise. Numerous examples of such disaster and derangements occurred during and shortly after excessively protective periods of the late war, when tariff duties were enhanced by the rates of foreign exchange and premiums upon gold. Excessive duties, generally, or exceptionally high duties in particular cases, discredit our whole national economic system, and furnish plausible arguments for its complete subversion.

They serve to increase uncertainty on the part of industrial enterprise, whether it shall enlarge or contract its operations and take from commerce as well as production the sense of stability required for extended undertakings. It would seem that the rates of duties under the existing tariff—fixed for the most part during the war, under the evident necessity at that time of stimulating to its utmost extent all domestic production—might be adapted through reduction to the present condition of peace, requiring no such extraordinary stimulus.

* * * * * * *

Entertaining these views, the commission has sought to present a scheme of tariff duties in which substantial reduction should be the distinguishing feature. The average reduction in rates, including that from the enlargement of the free-list and the abolition of duties on charges and commissions, at which the commission has aimed, is not less on the average than 20 per cent., and it is the opinion of the commission that the reduction will reach 25 per cent. The reduction—slight in some cases, in others not attempted—is in many cases from 40 to 50 per cent. The actual amount of the total reduction can not be stated with precision, partly from want of time to make the calculations required for such details in the brief period intervening between the final determination in particular cases and the preparation of this report, and there is no exact standard by which to estimate the amount of reduction in revenue on account of the varying character, amount, and price of commodities in the importations of different years.

These numerous quotations from official Republican authorities show conclusively that the policy of that party touching the surplus and the remedies therefor, as declared prior to 1888 to the voters to secure their votes and retain power, has been to retain the internal-revenue taxes on spirits, beer, and tobacco, and remove the others, and to reduce the rates of tariff duties on imported articles and add dutiable articles to the free-list, and thus remove the onerous burdens of unnecessary taxation and reduce the surplus accumulating in the Treasury to the wants of the Government economically administered.

Is this the policy of the national Republican party in this contest of 1888? How can their present policy be ascertained? The Chicago national Republican convention, composed of delegates from every Congressional district, State, and Territory, alone had the right and authority to declare the policy of the party in this contest, and did so declare it, which I now quote:

We are uncompromisingly in favor of the American system of protection; we protest against its destruction, as proposed by the President and his party. They serve the interests of Europe; we will support the interests of America. We accept the issue, and confidently appeal to the people for their judgment. The protective system must be maintained. Its abandonment has always been followed by general disaster to all interests, except those of the usurer and the sheriff. We denounce the Mills bill as destructive to the general business, the labor and farming interests of the country, and we heartily indorse the consistent and patriotic action of the Republican representatives in Congress in opposing its passage.

We condemn the proposition of the Democratic party to place wool on the free-list, and we insist that the duties thereon shall be adjusted and maintained so as to furnish full and adequate protection to that industry.

The Republican party would effect all needed reduction of the national revenue by repealing the taxes upon tobacco, which are an annoyance and burden to agriculture, and the tax upon spirits used in the arts and for mechanical purposes, and by such revision of the tariff laws as will tend to check imports of such articles as are produced by our people, the production of which gives employment to our labor, and release from import duties those articles of foreign production (except luxuries) the like of which can not be produced at home. If there shall still remain a larger revenue than is requisite for the wants of the Government, we favor the entire repeal of internal taxes rather than the surrender of any part of our protective system, at the joint behest of the whisky ring and the agents of foreign manufacturers.

They now declare "the protective system must be maintained" and "the needed reduction" of revenues effected—

By repealing the taxes upon tobacco, and the tax upon spirits used in arts and manufactures, and by such revisions of the tariff laws as will tend to check imports of such articles as are produced by our people, and release from import duties those articles of foreign production except luxuries not produced at home, and if there still remain a surplus revenue then by the entire repeal of internal taxes rather than the surrender of any part of our protective system.

By this platform the Republican convention has issued the command to all the former adherents of its party "to right about march," and to abandon all the lines of policy heretofore declared for party guidance.

It now reverses and denounces all the declared policies and recommendations of Secretaries McCulloch, Boutwell, Sherman, and Folger, and of Presidents, Grant and Arthur, and the national Republican platforms of 1868, 1872, 1876, 1880, and 1884, and the Republican State platforms of Illinois, Indiana, Ohio, Iowa, Wisconsin, Connecticut, and New York, and the findings and recommendations of the Republican tariff commission of 1882.

It is a radical departure from all past policies in this country, and practically a bold declaration for a paternal Government, supported by exorbitant, unnecessary taxes imposed for the enrichment of millionaires and the impoverishment and degradation of the laboring masses.

No such declaration of policies and principles has ever before been adopted in this country by any political organization or party claiming the confidence and suffrages of the voters.

I appeal to the record for the truth of this statement.

The Whig platform at Baltimore, May 1, 1844, adopted by the convention which nominated Henry Clay for President and Theodore Frelinghuysen for Vice-President, declared for—

A tariff for revenue to defray the necessary expenses of the Government, and discriminating with special reference to the protection of the domestic labor of the country.

The national Whig convention at Baltimore, June 16, 1852, which nominated General Scott, declared in fifth plank:

Fifth. Governments should be conducted on the principles of the strictest economy; and revenue sufficient for the expenses thereof in time of peace ought to be derived mainly from a duty on imports, and not from direct taxes; and on laying such duties, sound policy requires a just discrimination, and, when practicable, by specific duties, whereby suitable encouragement may be afforded to American industry equally to all classes and all portions of the country.

The Labor Reform platform adopted at Columbus, Ohio, February 21, 1872, declared in the fifth plank:

Fifth. That Congress should modify the tariff so as to admit free of duty such articles of common use as we can neither produce nor grow, and lay duties for revenue mainly upon articles of luxury, and upon such articles of manufacture as will, we having the raw materials, assist in further developing the resources of the country.

The Liberty party in the Buffalo convention at Utica, N. Y., June 22, 1848, which nominated John P. Hale for President and Leicester King for Vice-President, declared:

15. *Resolved*, That the obligations of honor and patriotism require the earliest practical payment of the national debt, and we are therefore in favor of such a tariff of duties as will raise revenue adequate to defray the expenses of the Federal Government and pay annual installments of our debt and the interest thereon.

The Free-Soil party in the convention at Pittsburgh, Pa., August 11, 1852, which nominated John P. Hale for President and George W. Julian for Vice-President, declared in their thirteenth plank—

That no more revenue should be raised than is required to defray the strictly necessary expenses of the public service and to pay off the public debt.

I have already quoted the Republican national platforms of 1868 and subsequently. I will now quote from earlier platforms.

The Republican convention at Philadelphia, Pa., June 17, 1856, which nominated John C. Frémont for President and William L. Dayton for Vice-President, made no declaration as to revenue or tariff; and at Chicago May 17, 1860, having nominated Abraham Lincoln for President and Hannibal Hamlin for Vice-President, declared in the twelfth plank:

Twelfth. That, while providing revenue for the support of the General Government by duties on imports, sound policy requires such an adjustment of these imports as to encourage the development of the industrial interest of the whole country; and we commend that policy of national exchanges which secures to the workingmen liberal wages, to agriculture remunerative prices, to mechanics and manufacturers an adequate reward for their skill, labor, and enterprise, and to the nation commercial prosperity and independence.

The Republican convention of 1864 at Baltimore, June 7, which renominated President Lincoln, declared:

Resolved, That the national faith, pledged for the redemption of the public debt, must be kept inviolate, and that for this purpose we recommend economy and rigid responsibility in the public expenditures and a vigorous and just system of taxation.

The Republican party now declares for an embargo tariff, a prohibition of imports of such articles as are produced in this country, a Chinese wall around our borders on sea and land, and, rather than surrender any part of their protective system, for free whisky; for if you remove the internal-revenue tax from whisky it will be beyond dispute free. Unless all the States and Territories could agree upon a uniform tax, the manufacture of whisky would be practically free. If any one State should levy a tax on whisky higher than in any other, the production of whisky in such State would be driven out and the manufacture confined to such State or States as imposed no tax or the lowest tax.

But whisky is an article "produced by our people the production of which gives employment to our labor," and in various forms is imported into this country and pays a high tariff tax, and is a "part of the protective system" which this platform says must be maintained and not surrendered. Therefore the Republican party declares for the repeal of all internal taxes upon distilled spirits and for the maintenance of the protective system thereon—that is, the tariff taxes upon all imports of distilled spirits, which is greater than the internal taxes. Who will be benefited, who will be enriched by this policy? Certainly not the consumers of such spirits, but most unquestionably the manufacturers and distillers of such spirits—the whisky ring. For with the repeal of all internal taxes and the retention of all tariff taxes upon imports you protect the home manufacturers and distillers to the amount of the internal taxes so repealed and enable them to sell their home-distilled spirits at the same prices they do now with the internal taxes added. These internal taxes on spirits distilled from materials other than apples, peaches, or grapes, excluding all special taxes, licenses, etc., were in 1884 over seventy millions, in 1885 over sixty millions, in 1886 over sixty-two millions, and in 1887 over fifty-nine millions, and in 1888 about the same. The Republican party thus proposes to protect and enrich the whisky ring annually to the amount of $60,000,000 rather than surrender any part of the protective system.

This policy is in direct antagonism with the declared policies of Alexander Hamilton, the progenitor of the Republican party, Henry Clay, the father of the so-called but misnamed "American system," and James G. Blaine, the bold, impetuous, and reckless leader of the Republican forces in this campaign, as I will now show by quotations from each of them.

Alexander Hamilton, the first Secretary of the Treasury under President Washington, in his first finance report, in speaking of the necessity for an increase of the revenue to the amount of $600,000, recommended that the increase—

Be made on wines, spirits (including those distilled within the United States), teas, and coffee. * * *

And said—

They are all of them in reality luxuries, the greatest part of them foreign lux-

uries; some of them, in the excess in which they are used, pernicious luxuries; and there is perhaps none of them which is not consumed in so great abundance as may justly denominate it a source of national extravagance and impoverishment. The consumption of ardent spirits particularly, no doubt very much on account of their cheapness, is carried to an extreme which is truly to be regretted, as well in regard to the health and the morals as to the economy of the community.

Henry Clay, on the 26th day of April, 1820, in speaking of the probable necessity of increase of revenue, says:

And I am for one ready to exclude foreign spirits altogether, and substitute for the revenue levied on them a tax upon the spirits made within the country. No other nation lets in so much of foreign spirits as we do. By the encouragement of home industry you will lay a basis of internal taxation, when it gets strong, that will be steady and uniform, yielding alike in peace and war.

Clay proposed to exclude importations of foreign spirits and impose an internal tax upon the home product—just the reverse of the proposed Republican policy of to-day.

Hon. James G. Blaine in his Paris pronunciamento in December last, when asked if he would advise the repeal of the whisky tax, replied:

No, I would not. Other considerations than those of financial administration are to be taken into account with regard to whisky. There is a moral side to it. To cheapen the price of whisky is to increase the consumption enormously. There would be no sense in urging the reform wrought by high license in many States if the National Government neutralizes the good effect by making whisky within reach of every one at 20 cents a gallon. Whisky would be everywhere distilled if the surveillance of the Government were withdrawn by the remission of the tax, and illicit sales could not then be prevented even by a policy as rigorous and searching as that with which Russia pursues the Nihilists. It would destroy high license at once in all the States. Whisky has done a vast deal of harm in the United States. I would try to make it do some good.

He further said:

So long as there is whisky to tax I would tax it, and when the National Government should have no use for the money I would divide the tax among the Federal Union with the specific object of lightening the tax on real estate. * * * Some honest but misguided friends of temperance have urged that the Government should not use the money derived from the tax on whisky. My reply is that the tax on whisky by the Federal Government, with its suppression of illicit distillation and consequent enhancement of price, has been a powerful agent in the temperance reform by putting it beyond the reach of so many. The amount of whisky consumed in the United States per capita to-day is not more than 40 per cent. of that consumed thirty years ago.

Now let us ascertain the policy and principles of the Democratic party in regard to a tariff taxation, the accumulating surplus in the Treasury, and the proper remedy for its prevention. The national Democratic party in convention, in 1840, declared in its fourth and fifth planks:

Fourth. *Resolved*, That justice and sound policy forbid the Federal Government to foster one branch of industry to the detriment of another, or to cherish the interests of one portion to the injury of another portion of our common country; that every citizen and every section of the country has a right to demand and insist upon an equality of rights and privileges, and to complete and ample protection of person and property from domestic violence or foreign aggression.

Fifth. *Resolved*, That it is the duty of every branch of the Government to enforce and practice the most rigid economy in conducting our public affairs, and that no more revenue ought to be raised than is required to defray the necessary expenses of the Government.

These resolutions were expressly reaffirmed in the platforms of the national Democratic party in the conventions of 1844, 1848, 1852, 1856, and 1860.

And in the platform of 1868 the Democratic party declared for—

A tariff for revenue upon foreign imports, and such equal taxation under the internal-revenue laws as will afford incidental protection to domestic manufactures, and as will, without impairing the revenue, impose the least burden upon and best promote and encourage the great industrial interests of the country.

And in the platform of 1876 declared—

We denounce the present tariff levied upon nearly four thousand articles as a masterpiece of injustice, inequality, and false pretense. It yields a dwindling, not a yearly rising revenue. It has impoverished many industries to subsidize a few. It prohibits imports that might purchase the products of American labor. It has degraded American commerce from the first to an inferior rank on the high seas. It has cut down the sales of American manufactures at home and abroad, and depleted the returns of American agriculture, an industry followed by half our people. It costs the people five times more than it produces to the Treasury, obstructs the process of production, and wastes the fruits of labor. It promotes fraud, fosters smuggling, enriches dishonest officials, and bankrupts honest merchants. We demand that all custom-house taxation shall be only for revenue.

The national Democratic party in convention in 1880 pledged itself—

Anew to the constitutional doctrines and traditions of the Democratic party, as illustrated by the teachings and examples of a long line of Democratic statesmen and patriots and embodied in the platform of the last national convention of the party.

And declared for—

A tariff for revenue only. * * * Public money and public credit for public purposes solely, and public land for actual settlers.

And—

The Democratic party is the friend of labor and the laboring man, and pledges itself to protect him alike against the cormorants and the commune.

And in 1884 declared—

From the foundation of this Government taxes collected at the custom-house have been the chief source of Federal revenue. Such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. The process of the reform must be subject in the execution of this plain dictate of justice—all taxation shall be limited to the requirements of economical government. The necessary reduction in taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor, and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country. Sufficient revenue to pay all the expenses of the Federal Government economically administered, including pensions, interest, and principal of the public debt, can be got under our present system of taxation from custom-house taxes on fewer imported articles, being heaviest on articles of luxury and bearing lightest on articles of necessity. We therefore denounce the abuses of the existing tariff; and subject to the preceding limitations, we demand that Federal taxation shall be exclusively for public purposes, and shall not exceed the needs of the Government economically administered.

The national Democratic convention of 1888 declared—

The Democratic party of the United States, in national convention assembled, renews the pledge of its fidelity to Democratic faith, and reaffirms the platform adopted by its representatives in the convention of 1884, and indorses the views expressed by President Cleveland in his last earnest message to Congress as the correct interpretation of that platform upon the question of tariff reduction; and also indorses the efforts of our Democratic Representatives in Congress to secure a reduction of excessive taxation.

All unnecessary taxation is unjust taxation. It is repugnant to the creed of Democracy that by such taxation the cost of the necessaries of life should be unjustifiably increased to all our people. Judged by Democratic principles, the interests of the people are betrayed when by unnecessary taxation trusts and combinations are permitted to exist, which, while unduly enriching the few that combine, rob the body of our citizens by depriving them of the benefits of natural competition. Every Democratic rule of governmental action is violated when, through unnecessary taxation, a vast sum of money, far beyond the needs of an economical administration, is drawn from the people and the channels of trade and accumulated as a demoralizing surplus in the national Treasury.

The Democratic policy is to enforce frugality in public expense and to abolish unnecessary taxation. Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation; on the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, must promote and encourage every branch of such industries and enterprises by giving them assurance of an extended market and steady and continuous operations. In the interests of American labor, which should in no event be neglected, the revision of our tax laws contemplated by the Democratic party should promote the advantage of such labor by cheapening the cost of necessaries of life in the home of every workingman and at the same time securing to him steady and remunerative employment.

President Cleveland, in his first annual message, of December 8, 1885, after pointing out the excess of revenues, said:

The proposition with which we have to deal is the reduction of the revenue received by the Government and indirectly paid by the people from customs duties. The question of free trade is not involved, nor is there now any occasion for the general discussion of the wisdom or expediency of a protective system.

Justice and fairness dictate that in any modification of our present laws relating to revenue, the industries and interests which have been encouraged by such laws, and in which our citizens have large investments, should not be ruthlessly injured or destroyed.

In his second annual message, of December 6, 1886, he again called attention to the continuing excess of revenues, which would soon pay off all that part of our public debt which could be paid at our option, and said:

When more of the people's substance is exacted through the form of taxation than is necessary to meet the just obligations of the Government and the expense of its economical administration, such exaction becomes ruthless extortion and a violation of the fundamental principles of a free Government. * * * It has been the policy of the Government to collect the principal part of its revenues by a tax upon imports, and no change in this policy is desirable. But the present condition of affairs constrains our people to demand that by a revision of our revenue laws the receipts of the Government shall be reduced to the necessary expense of its economical administration; and this demand should be recognized and obeyed by the people's representatives in the legislative branch of the Government. In readjusting the burdens of Federal taxation a sound policy requires that such of our citizens as have built up large and important industries under present conditions should not be suddenly and to their injury deprived of advantages to which they have adapted their business, but if the public good requires it, they should be content with such consideration as shall deal fairly and cautiously with their interests, while the just demand of the people for relief from needless taxation is honestly answered. * * *

And these considerations suggest such an arrangement of Government revenues as shall reduce the expense of living, while it does not curtail the opportunity for work nor reduce the compensation of American labor and injuriously affect its condition and the dignified place it holds in the estimation of our people.

But our farmers and agriculturists, those who from the soil produce the things consumed by all, are perhaps more directly and plainly concerned than any other of our citizens in a just and careful system of Federal taxation. * * *

I recommend that, keeping in view all these considerations, the increasing and unnecessary surplus of national income annually accumulating be released to the people by an amendment to our revenue laws which shall cheapen the price of the necessaries of life and give freer entrance to such imported materials as, by American labor, may be manufactured into marketable commodities.

In his message of December 6, 1887, he clearly and concisely presented the whole question of surplus, excessive taxation, its dangers, and the remedies, and showed that after paying all the public debt which we could pay at its face value, all which was payable at our option, and the purchase of over twenty-seven millions of bonds in the market at a high rate of premium, because not yet either due or payable at our option, there was still a surplus, which must continue to increase under existing laws, and said:

Our scheme of taxation, by means of which this needless surplus is taken from the people and put into the public Treasury, consists of a tariff or duty levied upon importations from abroad, and internal-revenue taxes levied upon the consumption of tobacco and spirituous and malt liquors. It must be conceded that none of the things subjected to internal-revenue taxation are, strictly speaking, necessaries; there appears to be no just complaint of this taxation by the consumers of these articles, and there seems to be nothing so well able to bear the burden without hardship to any portion of the people.

But our present tariff laws, the vicious, inequitable, and illogical source of unnecessary taxation, ought to be at once revised and amended. These laws, as their primary and plain effect, raise the price to consumers of all articles imported and subject to duty by precisely the sum paid for such duties. Thus the amount of duty measures the tax paid by those who purchase for use these imported articles. Many of these things, however, are raised or manufactured in our own country, and the duties now levied upon foreign goods and products are called protection to these home manufactures because they render it possi-

ble for those of our people who are manufacturers to make these taxed articles and sell them for a price equal to that demanded for the imported goods that have paid customs duty. So it happens that while comparatively a few use the imported articles, millions of our people, who never used and never saw any of the foreign products, purchase and use things of the same kind made in this country, and pay therefor nearly or quite the same enhanced price which the duty adds to the imported articles. Those who buy imports pay the duty charged thereon into the public Treasury, but the great majority of our citizens, who buy domestic articles of the same class, pay a sum at least approximately equal to this duty to the home manufacturer. This reference to the operation of our tariff laws is not made by way of instruction, but in order that we may be constantly reminded of the manner in which they impose a burden upon those who consume domestic products as well as those who consume imported articles, and thus create a tax upon all our people.

It is not proposed to entirely relieve the country of this taxation. It must be extensively continued as the source of the Government's income; and in a readjustment of our tariff the interests of American labor engaged in manufacture should be carefully considered, as well as the preservation of our manufacturers. It may be called protection, or by any other name, but relief from the hardships and dangers of our present tariff laws should be devised with especial precaution against imperiling the existence of our manufacturing interests. But this existence should not mean a condition which, without regard to the public welfare or a national exigency, must always insure the realization of immense profits instead of moderately profitable returns. As the volume and diversity of our national activities increase, new recruits are added to those who desire a continuation of the advantages which they conceive the present system of tariff taxation directly affords them. So stubbornly have all efforts to reform the present condition been resisted by those of our fellow-citizens thus engaged that they can hardly complain of the suspicion, entertained to a certain extent, that there exists an organized combination all along the line to maintain their advantage.

We are in the midst of centennial celebrations, and with becoming pride we rejoice in American skill and ingenuity, in American energy and enterprise, and in the wonderful natural advantages and resources developed by a century's national growth. Yet, when an attempt is made to justify a scheme which permits a tax to be laid upon every consumer in the land for the benefit of our manufacturers, quite beyond a reasonable demand for governmental regard, it suits the purposes of advocacy to call our manufactures infant industries, still needing the highest and greatest degree of favor and fostering care that can be wrung from Federal legislation. * * *

But the reduction of taxation demanded should be so measured as not to necessitate or justify either the loss of employment by the workingman nor the lessening of his wages; and the profits still remaining to the manufacturer, after a necessary readjustment, should furnish no excuse for the sacrifice of the interests of his employés either in their opportunity to work or in the diminution of their compensation.

The farmer and agriculturist, who manufacture nothing, but who pay the increased price which the tariff imposes, upon every agricultural implement, upon all he wears, and upon all he uses and owns, except the increase of his flocks and herds and such things as his husbandry produces from the soil, is invited to aid in maintaining the present situation; and he is told that a high duty on imported wool is necessary for the benefit of those who have sheep to shear, in order that the price of their wool may be increased. They, of course, are not reminded that the farmer who has no sheep is by this scheme obliged, in his purchases of clothing and woolen goods, to pay a tribute to his fellow farmer as well as to the manufacturer and merchant; nor is any mention made of the fact that the sheep-owners themselves and their households must wear clothing and use other articles manufactured from the wool they sell at tariff prices, and thus as consumers must return their share of this increased price to the tradesman. * * *

In speaking of the increased cost to the consumer of our home manufactures, resulting from a duty laid upon imported articles of the same description, the fact is not overlooked that competition among our domestic producers sometimes has the effect of keeping the price of their products below the highest limit allowed by such duty. But it is notorious that this competition is too often strangled by combinations, quite prevalent at this time and frequently called trusts, which have for their object the regulation of the supply and price of commodities made and sold by members of the combination. The people can hardly hope for any consideration in the operation of these selfish schemes.

The necessity for combination to maintain the price of any commodity to the tariff point furnishes proof that some one is willing to accept lower prices for such commodity and that such prices are remunerative; and lower prices produced by competition prove the same thing. Thus where either of these conditions exists a case would seem to be presented for an easy reduction of taxation.

The difficulty attending a wise and fair revision of our tariff laws is not underestimated. It will require on the part of the Congress great labor and care, and especially a broad and national contemplation of the subject, and a patriotic disregard of such local and selfish claims as are unreasonable and reckless of the welfare of the entire country. * * *

Under our present laws more than four thousand articles are subject to duty. Many of these do not in any way compete with our own manufacturers, and many are hardly worth attention as subjects of revenue. A considerable reduction can be made in the aggregate by adding them to the free-list. The taxation of luxuries presents no features of hardship; but the necessaries of life used and consumed by all the people, the duty upon which adds to the cost of living in every home, should be greatly cheapened.

The radical reduction of the duties imposed on raw material used in manufactures, or its free importation, is of course an important factor in any effort to reduce the price of these necessaries; it would not only relieve them from the increased cost caused by the tariff on such material, but the manufactured product being thus cheapened, that part of the tariff now laid upon such product, as a compensation to our manufacturers for the present price of raw material, could be accordingly modified. Such reduction, or free importation, would serve beside to largely reduce the revenue. It is not apparent how such a change can have any injurious effect upon our manufacturers. On the contrary, it would appear to give them a better chance in foreign markets with the manufacturers of other countries, who cheapen their wares by free material. Thus our people might have the opportunity of extending their sales beyond the limits of home consumption—saving them from the depression, interruption in business, and loss caused by a glutted domestic market, and affording their employés more certain and steady labor, with its resulting quiet and contentment.

Our progress toward a wise conclusion will not be improved by dwelling upon the theories of protection and free trade. This savors too much of bandying epithets. It is a condition which confronts us, not a theory. Relief from this condition may involve a slight reduction of the advantages which we award our home productions, but the entire withdrawal of such advantages should not be contemplated. The question of free trade is absolutely irrelevant; and the persistent claim made in certain quarters that all efforts to relieve the people from unjust and unnecessary taxation are schemes of so-called free-traders is mischievous and far removed from any consideration for the public good.

The simple and plain duty which we owe the people is to reduce taxation to the necessary expenses of an economical operation of the Government, and to restore to the business of the country the money which we hold in the Treasury through the perversion of governmental powers. These things can and should be done with safety to all our industries, without danger to the opportunity for remunerative labor which our workingmen need, and with benefit to them and all our people by cheapening their means of subsistence and increasing the measure of their comforts.

While the Republican party in its last platform has abandoned and renounced all its former-declared policies and remedies, the Democratic party stands undismayed, boldly and fearlessly maintaining and proclaiming its undying principles and its wise and judicious policies for the encouragement and development of the interests of our whole country, the interests of agriculture, manufactures, commerce, and navigation, the four pillars of our national prosperity and greatness. We are the friends of each of these great interests, and of the toiling masses engaged therein. We propose measures of relief from the condition confronting us—an idle, accumulating surplus in the Treasury, arising from burdensome, unnecessary taxation—by such a wise and just, fair and careful revision of our existing internal-revenue and tariff laws as will reduce the receipts of revenues to the amount necessary for an economical administration of the Government, and at the same time best promote and encourage the development and permanent prosperity of all our industrial interests, and give to them assurance of, and the means for, securing more remunerative and extended home and foreign markets, and more steady and continuous operations, and to American labor—the toiling millions in our own country—increased advantages and opportunities, and better wages.

The Republican party in its platform of 1884 arraigned the Democratic party, charging that "the Democratic party has failed completely to relieve the people of the burden of unnecessary taxation by a wise reduction of the surplus," thus admitting the burden of unnecessary taxation, and that the proper relief was "by a wise reduction of the surplus."

The Democratic party in the House of Representatives has passed a bill (H. R. 9051), commonly called the Mills bill, proposing to correct the irregularities of the tariff and to reduce the surplus—

by such methods as will relieve the tax-payer without injuring the laborer or the great productive industries of the country—

and thus, in enforcing its own principles and policies, practically carries out the recommendations of the Republican party heretofore made by its Secretaries of the Treasury, Presidents, national platforms, State platforms, and Tariff Commission.

This proposed measure of relief was met in the House by a persistent refusal of the Republican minority to propose any substitute or any better measure, notwithstanding all their party's pledges.

I hold in my hand a tabular statement, prepared in the Bureau of Statistics at my instance, which I will have printed in the RECORD to save time of reading, and which compares the existing laws and the House bill and Senate substitute as applied to imports in 1887.

What is this House bill No. 9051, entitled "A bill to reduce taxation and simplify the laws in relation to the collection of the revenue?" This bill proposes a revision of both the internal-revenue or excise and customs or tariff laws, and a reduction of the revenues derived from each. It proposes to repeal all restrictions on sales of tobacco by the producer, all taxes on tobacco, excepting on cigars, cigarettes, and cheroots, and all privilege and license taxes, excepting those for manufacturing and selling cigars, cigarettes, and cheroots. The excise duties so proposed to be repealed yielded during the fiscal year 1887, $17,381,161 in revenue, and a reduction of this sum is proposed. This bill also proposes to repeal all the special taxes under the internal-revenue laws imposed upon manufacturers of stills and retail dealers in liquors and in malt liquors. These taxes in the fiscal year 1887 yielded a revenue of about $4,814,895, and a reduction by such sum is proposed.

These are the proposed changes and reductions in and under the internal-revenue laws, amounting to about $22,196,056.

This table shows clearly the results of the present tariff laws in 1887, applied to the dutiable imports, and also of the proposed law applied to the same imports.

All dutiable articles under the present and proposed laws are grouped under fourteen schedules, as shown in the table, and each schedule includes a large number of kindred articles. The proposed bill makes no changes in the present law in the schedules F, "tobacco," leaving the average ad valorem rate of duty at $83.32 on the $100; or H, "liquor," leaving the same rate of 72.64 per cent.; or L, "silk goods," leaving the same rate of 49.71 per cent., and makes only a very slight change in schedule I, "cottons," so as to correct certain irregularities and inequalities in the present law, and reduces the present average ad valorem rate of duty of 39.99 per cent. to 39.07 per cent., a reduction of only 92 cents on the $100 in value.

The proposed bill takes from the list of dutiable merchandise under the present law and places on the free-list sundry articles of which the imports in 1887 were of the value of $70,443,012.64, and the amount of duties thereon collected under present law at the average ad valorem rate of 28.07 per cent. was $19,773,598.34, and by this amount reduces the surplus revenue.

Under the present law the dutiable merchandise imported in 1887 was of the value of $449,945,271.18; the amount of duties collected thereon was $211,811,632.49, and the average ad valorem rate thereon was $47.07 on the $100 in value, or 47.07 per cent.

The value of the merchandise dutiable under the present and also under the House bill imported in 1887 was $379,502,258.54, and the duties collected thereon amounted to $192,038,034.15 under the present law, and the average ad valorem rate of duty was $50.60 on the $100 in value, or 50.60 per cent.; and the duties collectible thereon under the House bill amount to $162,325,392.74, and the average ad valorem rate of duty thereon is $42.77 on the $100 in value, or 42.77 per cent.

The House bill therefore reduces the average ad valorem rate of duty, based upon the imports of 1887, from $50.60 on the $100 in value, or 50.60 per cent., to $42.67 on the $100 in value, or 42.77 per cent., being a reduction of only 7.83 per cent., and reduces the revenues from $192,038,034.15 to $162,325,392.74, being $29,712,641.41, and by this amount reduces the surplus revenues. The total reductions by the proposed bill, therefore, are $19,773,598.34 by the free-list and $29,712,641.41 by reduced rates of duties from 50.60 per cent. to 42.77 per cent., making $49,486,239.75. Briefly, the proposed bill takes from the merchandise imported in 1887 to the value of $449,945,271.18, and taxed by present tariff laws at 47.07 per cent., and places on the free-list articles of the value of $70,443,012.64, taxed by present law at 28.07 per cent., and reduces the average ad valorem rates of duty on the remaining $379,502,258.54 worth imported in 1887 from $50.60 on the $100 in value, the tax of the present law, to $42.77 on the $100 in value, a reduction of only $7.83 on the $100 in value, or 7.83 per cent.

Based on importations of 1887, the following table shows reductions in rate of duty and amount placed on the free-list, by schedules:

Schedules.	Reduction in duty.	Amount placed on free-list.
	Per cent.	
Chemicals	5.24	$4,535,557.96
Earthen and glass ware	6.03	30,789.97
Metals	3.44	18,323,612.91
Wooden ware	4.68	6,679,202.12
Sugar	14.74	None.
Provisions	1.04	3,334,013.86
Hemp, flax, and jute	9.56	14,490,501.40
Wool and woolens	28.91	18,206,987.97
Books, papers, etc	.06	None.
Sundries	2.02	4,842,346.45

This House bill, proposing a reduction of the surplus arising from internal-revenue taxes by about $22,196,056 and from tariff taxes by free-list and reduction of rates of tariff duties by $49,486,239.75, being an aggregate reduction of $71,682,295.75, is denounced as a direct attempt to fasten on this country the British policy of free foreign trade, and declared to be free trade. This is absolutely false, as the record shows. The statute laws of the United States from July 4, 1789, the date of the first law imposing tariff duties on imported merchandise, to March 3, 1883, the date of the existing law, show that as many as fifty-five or more laws have been enacted affecting tariff taxation, and such laws were enacted in forty-five different years during this period of ninety-four years, and in some years more than one such was passed. The longest period in our whole history during which no such law was passed was from July 30, 1846, the date of the so-called Walker tariff, to March 3, 1857, when duties were reduced.

The principal tariff laws are popularly known by the names of their supposed authors. The following table gives the popular names, dates, and average ad valorem rates of duties as nearly as can be determined:

Popular name.	Date of passage.	Average ad valorem rate of duty.
Hamilton tariff	July 4, 1789	About 10 per cent.
Calhoun tariff	Apr. 27, 1816	About 20 to 25 per cent.
Clay tariff	May 22, 1824	About 32 to 37 per cent.
Abominations tariff	May 19, 1828	About 45 to 48 per cent.
Clay's compromise tariff	Mar. 2, 1833	About 30 to 20 per cent.
Whig tariff	Aug. 30, 1842	About 35 per cent.
Walker tariff	July 30, 1846	About 25 per cent.
Morrill tariff	Mar. 2, 1861	About 48 per cent.

With these facts and figures before him, how can any intelligent man say that the House bill is a free-trade measure?

FREE TRADE.

In the minority report by the Republican members on the House bill, in the majority report of the Republican Senators, in the Republican press, and by Republican speakers free trade is held up as a scarecrow to frighten voters and deter them from supporting the Democratic party.

Why is this done? There must be some object sought to be accomplished.

What is it?

What is free trade? It has two separate and entirely different meanings?

1. The dictionaries define free trade to mean:

Commerce unrestricted by tariff regulations or customs duties; free interchange of commodities or liberty of introducing merchandise into a country from any other country without payment of government duties; trade or commerce between people and nations without restrictions, taxation, duties, imposts, or burdens.

Under our Constitution we have free trade, as defined by dictionaries, pure and simple, among all our people throughout all our States and Territories.

No man can truthfully say that the House bill proposes or favors such free trade. The charge is absolutely without any foundation.

2. Free trade in the United States, when applied and used to indicate a policy of revenue, means a tariff for raising revenue, with such incidental protection as all tariff duties necessarily afford. It means a policy for revenue tariff as distinguished from a policy for protective tariff. To establish the correctness of this definition I will quote from so-called free-traders and protectionists.

The free-trade convention of many delegates from many States held in Philadelphia in 1831, by Albert Gallatin, chairman of the committee, presented a memorial to Congress in 1832 protesting against the then existing tariff, and asking—

That duties be so reduced as to leave after extinguishment of the public debt only that amount of revenue which may be necessary to meet the ordinary exigencies of the Government.

The American Free-Trade League of New York, in 1870 or 1871, in response to inquiries from Edward Young, Chief of the Bureau of Statistics, said:

We believe in the utmost possible freedom for all citizens of the United States in trade as well as in all the other relations of life; but we recognize that absolute freedom of trade must be limited to the revenue necessities of the Government, just as absolute freedom in other respects is necessarily limited by government; and therefore the Free-Trade League willingly submits to taxation and duties to meet the necessities of government, while it denounces as robbery and tyranny all taxation for the benefit of special classes.

Henry Clay, in his speech "on American industry," in the House of Representatives, March 30 and 31, 1824, said:

Two classes of politicians divide the people of the United States. According to the system of one, the produce of foreign industry should be subject to no other impost than such as may be necessary to provide a public revenue; and the produce of American industry should be left to sustain itself, if it can, with no other than that incidental protection, in its competition, at home as well as abroad, with rival foreign articles. According to the system of the other class, whilst they agree that the imports should be mainly, and may under any modification be safely relied on as a fit and convenient source of public revenue, they would so adjust and arrange the duties on foreign fabrics as to afford a gradual but adequate protection to American industry, and lessen our dependence on foreign nations, by securing a certain and ultimately a cheaper and better supply of our own wants from our own abundant resources. Both classes are equally sincere in their respective opinions, equally honest, equally patriotic, and desirous of advancing the prosperity of the country. In the discussion and consideration of these opposite opinions, for the purpose of ascertaining which has the support of truth and reason, we should, therefore, exercise every indulgence, and the greatest spirit of mutual moderation and forbearance. And, in our deliberations on this great question, we should look fearlessly and truly at the actual condition of the country, retrace the causes which have brought us into it, and snatch, if possible, a view of the future. We should, above all, consult experience—the experience of other nations as well as our own—as our truest and most unerring guide. * * *

Hon. James G. Blaine, the leader of the protectionists in this campaign, in his "Twenty Years in Congress," discusses tariff legislation and policies at length, using the terms "free-traders" and "protectionists," as the two great opposing parties in politics and on pages 207, 208, and 211, says:

In the foregoing summary of legislation upon the tariff the terms "free trade" and "protection" are used in their ordinary acceptation in this country, not as accurately defining the difference in the revenue theories, but as indicating the rival policies which have so long divided political parties. Strictly speaking, there has never been a proposition by any party in the United States for the adoption of free trade. To be entirely free, trade must encounter no obstruction in the way of tax either upon export or import. In that sense, no nation has ever enjoyed free trade. * * *

The essential question which has grown up between political parties in the United States respecting our foreign trade is, whether a duty should be laid upon any import for the direct object of protecting and encouraging the manufacture of the same article at home. The party opposed to this theory does not advocate the admission of the article free, but insists upon such rate of duty as will produce the largest revenue and at the same time afford what is termed "incidental protection." The advocates of actual free trade according to the policy of England, taxing only those articles which are not produced at home, are few in number and are principally confined to doctrinaires.

Hon. WILLIAM MCKINLEY, Jr., of Ohio, on May 18, 1888, said:

This brings us face to face, therefore, with the two opposing systems, that of a revenue as distinguished from a protective tariff, and upon their respective merits they must stand or fall.

Yet Mr. Blaine, Mr. MCKINLEY, and other protectionists, in speeches and campaign literature, declare the proposed bill to be a free-trade measure—to mean the "British policy of free foreign trade"—and declare the Democratic party to be a free-trade party and the advocates of the British policy of free foreign trade, and so use the term "free trade" that their auditors and readers must necessarily think they mean by "free trade" trade without any restrictions, duties, or taxes, and such freedom of trade as England has, and as we have among ourselves. Why is this done? The object must be to deceive, mislead, and array prejudice, and at the same time divert attention from the real issue.

Such a course is neither fair nor creditable to the persons who pursue it, for they know that neither the Democratic party nor any other political party in the United States has ever proposed the adoption of free trade—trade without any restrictions, duties, or taxes—and that no nation has ever enjoyed such free trade.

The Tariff League Bulletin of New York, a special pleader for protection, has published far and wide the charge that President Cleveland has said:

I believe in free trade as I believe in the Protestant religion.

And in the issue of September 7, 1888, states that—

We have received many letters asking for proof that the statement is correct, and we have taken great pains to trace to their origin these words attributed to the President.

And then says:

We have in our possession conclusive evidence that the President used the expression some time ago in a private conversation with an ex-attorney-general of Pennsylvania, who repeated it to Colonel McClure, editor of the Philadelphia Times. Colonel McClure repeated it to a gentleman of prominence and veracity, and finally the President's expression became public. It has never been disputed either by the President or those who repeated it. There is no doubt whatever of its authenticity.

Is the publication of such falsehoods, based upon such pretended hearsays, fair, honorable, or just?

Is the cause of protection in such desperate straits that such cowardly attacks must be made upon the President in the face of his frank, bold, and manly messages upon the tariff?

The following letter of the President shows the utter falsity of the charge:

PHILADELPHIA, *September* 15.

George Whiteley, of 107 Walnut street, in answer to a letter of inquiry sent to President Cleveland as to certain free-trade utterances he was charged with having made, yesterday received the following:

"EXECUTIVE MANSION, *Washington, September* 13, 1888.

"DEAR SIR: Your letter of the 8th instant has just been presented to my attention, and it affords the first intimation I have had that in an article published in the North American Review I am charged with the declaration that 'I believe in free trade as I believe in the Protestant religion.' In answer to your inquiry as to the truth of this allegation I have to say that I never made use of that expression or one anything like it. The statement you quote is pure, unadulterated fabrication. While it would be unfair to attempt to meet or refute every false statement coined or forged to serve the purposes of misrepresentation in the heat of the political canvass, the friendly spirit of your inquiry has led me to make this emphatic denial.

"Yours, very truly,

"GROVER CLEVELAND.

"GEORGE WHITELEY, Esq."

Will the Tariff League Bulletin have the honor and manliness to publish the President's letter? I doubt it.

The true issue is not free trade, but a question of policies in regard to the accumulating surplus in the Treasury and the best method or system for reducing the onerous burdens of unnecessary taxation, and leaving the surplus in the pockets of the tax-payers.

Shall the policy of a high protective tariff or of a revenue tariff with incidental protection prevail?

What is protection? Webster says:

Protection is the establishment of such duties on goods imported as will protect or cherish domestic industry.

And—

A protectionist is one who favors the protection of some branch of industry by legal enactments.

The Industrial League of Pennsylvania, in answer to Mr. Edward Young, in 1872, said:

Protection is simply defense; nothing more, nothing less, and nothing else.

Yes, it is defense. Defense against what? Defense against competition, and consequently a monopoly of the market for the sale of the protected article.

What are the advantages or benefits of a protective tariff as claimed by protectionists?

Could some intelligent being, divinely endowed with a knowledge of the English language, be translated from some other world to the United States and only hear and read the Republican speeches, platform, and literature, he would necessarily be led to believe that the protective-tariff policy was the fountain and source of all blessings and caused the succession of day and night, and of the seasons; regulated sunshine and shower, made the seeds to germinate, the harvests to ripen, agriculture to prosper, commerce to flow, and developed all the industrial interests of the country, enriched the poor by providing them with houses, food, clothing, and high wages, and made the people of the United States the most intelligent, progressive, prosperous, and happy among all the nations of earth.

Mr. President, let us examine the origin, purpose, alleged benefits, and proposed duration of this high protective-tariff policy, and the origin of the term "American system," and why applied thereto.

President Washington in his message to the Second Congress on January 8, 1790, said:

The advancement of agriculture, commerce, and manufactures by all proper means, will not, I trust, need recommendation. But I can not forbear intimating to you the expediency of giving effectual encouragement, as well to the introduction of new and useful inventions from abroad, as to the exertions of skill and genius in producing them at home.

No law had then been enacted for granting any exclusive rights or patents to inventors for their inventions.

On January 15, 1790, the House of Representatives in Committee of the Whole House on the state of the Union adopted a resolution—

That it is the opinion of this committee that the several matters recommended by the President of the United States in his speech to both Houses of Congress, relating to a provision for the national defense; to the promotion of manufactories for essential, particularly for military, supplies; * * * to the advancement of the agriculture, commerce, and manufactures of the United States; to the encouragement of useful inventions, etc., * * * ought severally to be referred to select committees, etc.

The House thereupon ordered—

That it be referred to the Secretary of the Treasury to prepare and report to this House a proper plan or plans, conformably to the recommendations of the President of the United States in his speech to both Houses of Congress, for the encouragement and promotion of such manufactories as will tend to render the United States independent of other nations for essential, particularly for military, supplies.

In obedience to this order Alexander Hamilton, the Secretary of the Treasury, on December 5, 1791, submitted to the House his celebrated "Report on Manufactures." Mr. Hamilton is justly entitled to the distinction of being the father of the system of protection, and he and Henry Clay were certainly the ablest advocates and expounders of the system, its objects and purposes. When Mr. Hamilton submitted his report Congress had already enacted the tariff laws of July 4, 1789, and August 10, 1790.

Mr. Hamilton in his report said:

The Secretary of the Treasury, in obedience to the order of the House of Representatives, on the 15th day of January, 1790, has applied his attention, at as early a period as his other duties would permit, to the subject of manufactures, and particularly to the means of promoting such as will tend to render the United States independent of foreign nations for military and other necessary supplies; and he thereupon submits the following report.

He then enumerates the principal circumstances which would make manufacturing establishments beneficial to the country, as follows:

1. The division of labor.
2. An extension of the use of machinery.
3. Additional employment to classes of the community not ordinarily engaged in the business.
4. The promoting of emigration from foreign countries.
5. The furnishing greater scope for the diversity of talents and dispositions, which discriminate men from each other.
6. The affording a more ample and various field for enterprise.
7. The creating in some instances a new and securing in all a more certain and steady demand for the surplus produce of the soil.

In discussing the beneficial influence of manufacturing establishments in "the promoting of emigration from foreign countries," he says:

Here is perceived an important resource, not only for extending the population, and with it the useful and productive labor of the country, but likewise for the prosecution of manufactures, without deducting from the number of hands which might otherwise be drawn to tillage; and even for the indemnification of agriculture, for such as might happen to be diverted from it.

In discussing the home market for farm products, the benefits of manufactures in "the creating in some instances a new and securing in all a more certain and steady demand for the surplus produce of the soil," he says:

It is evident that the exertions of the husbandman will be steady or fluctuating, vigorous or feeble, in proportion to the steadiness or fluctuation, adequateness or inadequateness, of the markets on which he must depend for the vent of the surplus which may be produced by his labor; and that such surplus, in the ordinary course of things, will be greater or less in the same proportion.

For the purpose of this vent a domestic market is greatly to be preferred to a foreign one, because it is, in the nature of things, far more to be relied upon.

To secure such a market there is no other expedient than to promote manufacturing establishments. Manufacturers, who constitute the most numerous class, after the cultivators of land, are for that reason the principal consumers of the surplus of their labor.

This idea of an extensive domestic market for the surplus produce of the soil is of the first consequence. It is of all things that which most effectually conduces to a flourishing state of agriculture. If the effect of manufactories should be to detach a portion of the hands which would otherwise be engaged in tillage, it might possibly cause a smaller quantity of lands to be under cultivation; but by their tendency to procure a more certain demand for the surplus produce of the soil, they would, at the same time, cause the lands which were in cultivation to be better improved and more productive.

In discussing the objections and obstacles to the establishment of successful manufactures, he says:

First. If the system of perfect liberty to industry and commerce were the prevailing system of nations, the arguments which dissuade a country in the predicament of the United States from the zealous pursuit of manufactures would doubtless have great force. It will not be affirmed that they might not be permitted, with few exceptions, to serve as a rule of national conduct. In such a state of things each country would have the full benefit of its peculiar advantages to compensate for its deficiencies or disadvantages. If one nation were in a condition to supply manufactured articles on better terms than another, that other might find an abundant indemnification in a superior capacity to furnish the produce of the soil.

And a free exchange, mutually beneficial, of the commodities which each was able to supply on the best terms might be carried on between each, supporting in full vigor the industry of each. And though the circumstances which have been mentioned, and others which will be unfolded hereafter, render it probable that nations merely agricultural would not enjoy the same degree of opulence in proportion to their numbers as those which united manufactures with agriculture, yet the progressive improvement of the lands of the former might in the end atone for an inferior degree of opulence in the mean time; and in a case in which opposite considerations are pretty equally balanced the option ought, perhaps, always to be in favor of leaving industry to its own direction.

But the system which has been mentioned is far from characterizing the general character of nations. The prevalent one has been regulated by an opposite spirit. The consequence of it is that the United States are to a certain extent in the situation of a country precluded from foreign commerce. They can, indeed, without difficulty, obtain from abroad the manufactured supplies of which they are in want, but they experience numerous and very injurious impediments to the emission and vent of their own commodities. Nor is this the case in reference to a single foreign nation only. The regulations of several countries with which we have the most extensive intercourse throw serious obstructions in the way of the principal staples of the United States.

In such a position of things the United States can not exchange with Europe on equal terms; and the want of reciprocity would render them the victim of a

system which should induce them to confine their views to agriculture and refrain from manufactures.

A constant and increasing necessity on their part for the commodities of Europe, and only a partial and occasional demand for their own in return, could not but expose them to a state of impoverishment, compared with the opulence to which their political and natural advantages authorize them to aspire.

Remarks of this kind are not made in the spirit of complaint. It is for the nations, whose regulations are alluded to, to judge for themselves whether, by aiming at too much, they do not lose more than they gain. It is for the United States to consider by what means they can render themselves least dependent on the combinations, right or wrong, of foreign policy. * * *

But the greatest obstacle of all to the successful prosecution of a new branch of industry in a country in which it was before unknown consists, as far as the instances apply, in the bounties, premiums, and other aids which are granted, in a variety of cases, by the nations in which the establishments to be imitated are previously introduced. * * *

The objections to the pursuit of manufactures in the United States, which next present themselves to discussion, represent an impracticability of success arising from three causes—scarcity of hands, dearness of labor, want of capital.

The first two circumstances are to a certain extent real, and within due limits ought to be admitted as obstacles to the success of manufacturing enterprise in the United States. But there are various considerations which lessen their force, and tend to afford an assurance that they are not sufficient to prevent the advantageous prosecution of many very useful and extensive manufactories. * * *

It may be affirmed, therefore, in respect to hands for carrying on manufactures, that we shall, in a great measure, trade upon a foreign stock, reserving our own for the cultivation of our lands and the manning of our ships, as far as character and circumstances shall incline.

As to the dearness of labor, another of the obstacles alleged, this has relation principally to two circumstances: one, that which has just been discussed, or the scarcity of hands; the other, the greatness of profits.

So far as the dearness of labor can be a consequence of the greatness of profits in any branch of business, it is no obstacle to its success. The great undertaker can afford to pay the price.

There are grounds to conclude that undertakers of manufactures in this country can at this time afford to pay higher wages to the workmen they may employ than are paid to similar workmen in Europe. The price of foreign fabrics in the markets of the United States, which will for a long time regulate the prices of the domestic ones, may be considered as compounded of the following ingredients: The first cost of materials, including the taxes, if any, which are paid upon them where they are made; the expense of grounds, buildings, machinery, and tools; the wages of the persons employed in the manufactory; the profits on the capital or stock employed; the commissions of agents to purchase them where they are made; the expense of transportation to the United States, including insurance and other incidental charges; the taxes or duties, if any, and fees of office which are paid on their exportation; the taxes or duties and fees of office which are paid on their importation.

He then says that—

As to the cost of materials, the advantage upon the whole is at present on the side of the United States—

And—

as to the expense of grounds, buildings, machinery, and tools, an equality at least may be assured—

And—

as to the article of wages, the comparison certainly turns against the United States—

And—

as to profits on the capital or stock, it is alike applicable to the foreign and domestic manufacture.

But with respect to all the remaining items, they are alone applicable to the foreign manufacture, and, in the strictest sense, extraordinaries; constituting a sum of extra charge on the foreign fabric which can not be estimated at less than from 15 to 30 per cent. on the cost of it at the manufactory.

This sum of extra charge may confidently be regarded as more than a counterpoise for the real difference in the price of labor; and is a satisfactory proof that manufactures may prosper in defiance of it in the United States. * * *

To all the arguments which are brought to evince the impracticability of success in manufacturing establishments in the United States, it might have been a sufficient answer to have referred to the experience of what has been already done. It is certain that several important branches have grown up and flourished with a rapidity which surprises, affording an encouraging assurance of success in future attempts; of these it may not be improper to enumerate the most considerable.

He then discusses the proper plan for the encouragement and promotion of manufactures, and says:

In order to a better judgment of the means proper to be resorted to by the United States, it will be of use to advert to those which have been employed with success in other countries. The principal of these are:

1. Protecting duties, or duties on those foreign articles which are the rivals of the domestic ones intended to be encouraged.

Duties of this nature evidently amount to a virtual bounty on the domestic fabrics, since by enhancing the charges on foreign articles they enable the national manufacturers to undersell all their foreign competitors. * * * Indeed, all the duties imposed on imported articles, though with an exclusive view to revenue, have the effect in contemplation, and, except where they fall on raw materials, wear a beneficent aspect toward the manufacturers of the country.

* * * * * * * *

2. Prohibitions of rival articles, or duties equivalent to prohibitions. * * *

Considering a monopoly of the domestic market to its own manufacturers as the reigning policy of manufacturing nations, a similar policy on the part of the United States in every proper instance is dictated, it might almost be said, by the principles of distributive justice, certainly by the duty of endeavoring to secure to their own citizens a reciprocity of advantages.

3. Prohibitions of the exportation of the materials of manufactures. * * *

4. Pecuniary bounties.

This has been found one of the most efficacious means of encouraging manufactures, and it is in some views the best.

He discusses at great length the advantages of "bounties," and among others, says:

It can not escape notice that a duty upon the importation of an article can not otherwise aid the domestic production of it than by giving the latter greater advantages in the home market. * * *

The continuance of bounties on manufactures long established must always be of questionable policy, because a presumption would arise in every such case that there were natural and inherent impediments to success. But in new undertakings they are just as justifiable as they are oftentimes necessary. * * *

There is a degree of prejudice against bounties, from an appearance of giving away the public money without an immediate consideration, and from a supposition that they serve to enrich particular classes at the expense of the community. * * *

As to the second source of objection, it equally lies against other modes of encouragement which are admitted to be eligible. As often as a duty upon a foreign article makes an addition to its price, it causes an extra expense to the community for the benefit of the domestic manufacturer. A bounty does no more. * * *

5. Premiums.

These are of a nature allied to bounties, though distinguishable from them in some important features. * * *

6. The exemption of the materials of manufactures from duty.

The policy of that exemption, as a general rule, particularly in reference to new establishments, is obvious. It can hardly ever be advisable to add the obstructions of fiscal burdens to the difficulties which naturally embarrass a new manufacture; and when it is matured and in a condition to become an object of revenue, it is, generally speaking, better that the fabric than the material should be the subject of taxation. * * *

7. Drawbacks of the duties which are imposed on the materials of manufactures. * * *

8. The encouragement of new inventions and discoveries at home and of the introduction into the United States of such as may have been made in other countries, particularly those which relate to machinery.

This is among the most useful and unexceptional of the aids which can be given to manufactures. The usual means of that encouragement are pecuniary rewards and, for a time, exclusive privileges. The first must be employed according to the occasion and the utility of the invention or discovery. For the last, so far as respects "authors and inventors," provision has been made by law. * * *

9. Judicious regulations for the inspection of manufactured commodities. * * *

10. The facilitating of pecuniary remittances from place to place.

11. The facilitating of the transportation of commodities.

He then discusses the rates of duty necessary for the encouragement and protection of manufactures. As to the first instance, iron, he says:

The only further encouragement of manufactories of this article, the propriety of which may be considered as unquestionable, seems to be an increase of the duties on foreign rival commodities.

And recommends the increase of the duty upon steel from 75 cents to 100 cents per hundredweight, and a duty of 2 cents per pound upon nails and spikes, and says:

To insure the end, it seems equally safe and prudent to extend the duty ad valorem upon all manufactures of iron, or of which iron is the article of chief value, to 10 per cent.

And as to the manufactures of steel, says:

Manufactures of steel generally, or of which steel is the article of chief value, may with advantage be placed in the class of goods rated at 7½ per cent. As manufactures of this kind have not yet made any considerable progress, it is a reason for not rating them as high as those of iron; but as this material is the basis of them, and as their extension is not less practicable than important, it is desirable to promote it by a somewhat higher duty than at present.

A question arises, how far it might be expedient to permit the importation of iron in pigs and bars free of duty. It would certainly be favorable to manufacturers of the article; but the doubt is, whether it might not interfere with its production.

And as to cotton, he says:

The present duty of 3 cents per pound on the foreign raw material is undoubtedly a very serious impediment to the progress of these manufactories. * * *

To secure to the national manufacturers so essential an advantage, a repeal of the present duty on imported cotton is indispensable. One cent per yard, not less than of a given width, on all goods of cotton, or of cotton and linen mixed, which are manufactured in the United States, with the addition of 1 cent per pound weight of the material if made of national cotton, would amount to an aid of considerable importance, both to the production and to the manufacture of that valuable article.

If the duty of 7½ per cent. on certain kinds of cotton goods were extended to all goods of cotton, or of which it is the principal material, it would probably more than counterbalance the effect of the drawback proposed in relation to the fabrication of the article.

I have made these voluminous quotations to show the exact grounds upon which the policy of protection by tariff duties and bounties was presented by Mr. Hamilton at that early day.

In enumerating the supposed benefits of manufacturing establishments he lays great stress upon the promotion of immigration from foreign countries and the creation of a home market for the surplus products of agriculture, but does not intimate the possibility even of higher wages or any protection to American labor against competition with the pauper labor of Europe.

He frankly admitted that the wages of labor were higher here than in any other nation, and that the "scarcity of hands and dearness of labor" were serious obstacles to the success of manufactures; and argues that these obstacles can be overcome by immigration, the importation of foreign laborers, and that our manufacturers could even then afford to pay higher wages than were paid in other countries for similar work, by reason of the disadvantages under which foreign manufacturers labored, and which were extraordinaries, such as commissions, transportation, insurance and other charges, taxes, and duties on importation, and that these were an extra charge on foreign fabrics, amounting to not less than 15 to 30 per cent. on cost at manufactory; and that this sum of extra charge was more than a counterpoise—an equivalent for the difference in price of labor, and was a proof that manufactures may prosper in defiance of the higher wages here.

He claims that the greatest obstacle to success of new manufactures was in the bounties, premiums, and other aids granted in many cases by the nations in which the establishments to be imitated were previously introduced. In other words, infant manufactures could not without aid compete with old-established ones, and therefore infant industries must be protected, not American labor, already then receiving higher wages than in Europe. In discussing the means to be

adopted for encouraging and protecting manufacturers he says nothing of an "American system," does not propose an "American system," but on the contrary, says:

It will be of use to advert to those which have been employed with success in other countries.

He proposes to adopt foreign policies, foreign systems, the British system of protecting duties and bounties, and frankly admits that protecting duties, any duties on foreign articles—the rivals of domestic ones—are a "virtual bounty on the home fabric," for the benefit of the home manufacturer, giving him "the monopoly of the domestic market" and an addition to the price of the domestic fabric, to be paid by the consumer as "an extra expense to the community for the benefit of the domestic manufacturer, and that "a bounty does no more."

He seems to give preference to bounties over duties, and asserts that their effects, so far as the domestic manufacturer is concerned, are practically the same. He admits that—

The continuance of bounties on manufactures—

The same as protective duties—

long established must always be of unquestionable policy, because a presumption would arise in every such case that there were natural and inherent impediments to success. But in new undertakings they are just as justifiable as they are oftentimes necessary.

"New undertakings," "infant industries," need the protecting duties or bounties, not "long-established ones."

The duties specifically recommended by him as necessary to be imposed for the protection of manufacturers, were very little higher than the then existing duties under the tariff acts of August 10, 1790, and March 2 and 3, 1791, and reduced to an average ad valorem rate were not exceeding 10 per cent., excluding coffee, tea, spirits, and wines as then taxed.

Mr. Clay, in his speech in the House, April 26, 1820, "on the protection of home industry," said:

But, say gentlemen, there are to the manufacturing system some inherent objections, which should induce us to avoid its introduction into this country; and we are warned by the example of England, by her pauperism, by the vices of her population, her wars, etc. * * *

Pauperism is in general the effect of an overflowing population. Manufactures have undoubtedly produced a redundant population; but so may commerce and so may agriculture. * * *

But even France has not that great security against the abuses of the manufacturing system, against the effects of too great a density of population, which we possess in our waste lands. While this resource exists we have nothing to apprehend. Do capitalists give too low wages? Are the laborers too crowded and in danger of starving? The unsettled lands will draw off the redundancy and leave the others better provided for. * * *

I am aware that while the public domain is an acknowledged security against the abuses of the manufacturing or any other system, it constitutes at the same time an impediment, in the opinion of some, to the success of manufacturing industry by its tendency to prevent the reduction of wages of labor. * * *

It is true that we can not remain in the relation of seller only to foreign powers for any length of time; but if, as I have no doubt, our agriculture will continue to supply as far as it can profitably to the extent of the limits of foreign demand, we shall receive not only in return many of the articles on which the tariff operates for our consumption, but they may also form the objects of trade with South America and other powers, and our comforts may be multiplied by the importation of other articles * * *

But, sir, friendly as I am to the existence of domestic manufactures, I would not give to them unreasonable encouragement by protecting duties. Their growth ought to be gradual, but sure. I believe all the circumstances of the present period highly favorable to their success; but they are the youngest and weakest interests of the state. Agriculture wants but little or no protection against the regulations of foreign powers. The advantages of our position, and the cheapness and abundance and fertility of our land, afford to that greatest interest of the state almost all the protection it wants. As it should be, it is strong and flourishing, or if it be not at this moment prosperous, it is not because its produce is not ample, but because, depending, as we do altogether, upon a foreign market for the sale of the surplus of that produce, the foreign market is glutted. Our foreign trade, having almost exclusively engrossed the protective care of the Government, wants no further legislative aid; and whatever depression it may now experience, it is attributable to causes beyond the control of this Government. The abundance of capital, indicated by the avidity with which loans are sought, at the reduced rate of 5 per cent.; the reduction in the wages of labor, and the decline in the price of property of every kind, as well as that of agricultural produce, all concur favorably for domestic manufactures.

The plea is for protecting duties for domestic manufactures, the youngest and weakest interests—"infant industries"—and the plea is urged because of "the reduction in the wages of labor;" not for the protection of labor, not to enable the manufacturers to pay higher wages, and because "agriculture wants but little or no protection," and "our foreign trade * * * wants no further legislative aid."

On March 30 and 31, 1824, when Speaker of the House, Mr. Clay, in his speech on "American industry," said:

The greatest want of civilized society is a market for the sale and exchange of the surplus of produce of the labor of its members. This market may exist at home or abroad, or both; but it must exist somewhere if society prospers, and whenever it does exist it should be competent to the absorption of the entire surplus of production. It is most desirable that there should be both a home and a foreign market. But with respect to their relative superiority I can not entertain a doubt. The home market is first in order and paramount in importance. The object of the bill under consideration is to create this home market and to lay the foundations of a genuine American policy. It is opposed; and it is incumbent upon the partisans of the foreign policy (terms which I shall use without any invidious intent) to demonstrate that the foreign market is an adequate vent for the surplus produce of our labor. But is it so? First, foreign nations can not, if they would, take our surplus produce. If the source of supply, no matter of what, increase in a greater ratio than the demand for that supply a glut of the market is inevitable, even if we suppose both to remain perfectly unobstructed. * * * But secondly, if they could they will not. The policy of all Europe is averse to the reception of our agricultural produce so far as it comes into collision with its own, and under that limitation we are absolutely forbid to enter their ports, except under circumstances which deprived them of all value as a steady market. The policy of all Europe rejects those great staples of our country which consist of objects of human subsistence. The policy of all Europe refuses to receive from us anything but those raw materials of smaller value essential to their manufactures to which they can give a higher value, with the exception of tobacco and rice, which they can not produce.

Our agricultural is our greatest interest. It ought ever to be predominant. All others should bend to it; and, in considering what is for its advantage, we should contemplate it in all its varieties of planting, farming, and grazing. Can we do nothing to invigorate it; nothing to correct the errors of the past and to brighten the still more unpromising prospects which lie before us? We have seen, I think, the causes of the distress of the country. We have seen that an exclusive dependence upon the foreign market must lead to still severer distress, to impoverishment, to ruin. We must then change somewhat our course. We must give a new direction to some portion of our industry. We must speedily adopt a genuine American policy. Still cherishing the foreign market, let us create also a home market, to give further scope to the consumption of the produce of American industry. Let us counteract the policy of foreigners and withdraw the support which we now give to their industry and stimulate that of our own country. It should be a prominent object with wise legislators to multiply the vocations and extend the business of society, as far as it can be done, by the protection of our interests at home against the injurious effects of foreign legislation. * * *

The creation of a home market is not only necessary to procure for our agriculture a just reward of its labors, but it is indispensable to obtain a supply of our necessary wants. If we can not sell we can not buy. That portion of our population (and we have seen that it is not less than four-fifths) which makes comparatively nothing that foreigners will buy, has nothing to make purchases with from foreigners. * * *

At that time and for many ages before and afterward to 1846 the English corn laws, imposing high tariff duties on all imports of corn, wheat, and breadstuffs from foreign countries into England were in force and our exports of the same heavily burdened.

Mr. Clay further said:

But it is said that wherever there is a concurrence of favorable circumstances, manufactures will arise of themselves, without protection; and that we should not disturb the natural progress of industry, but leave things to themselves. If all nations would modify their policy on this axiom, perhaps it would be better for the common good of the whole. Even then, in consequence of natural advantages and a greater advance in civilization and in the arts, some nations would enjoy a state of much higher prosperity than others.

The object of protection is the establishment and protection of the arts. * * *

The adoption of the restrictive system on the part of the United States, by excluding the produce of foreign labor, would extend the consumption of American produce, unable in the infancy and unprotected state of the arts, to sustain a competition with foreign fabrics. Let our arts breathe under the shade of protection; let them be perfected as they are in England, and we shall then be ready, as England now is said to be, to put aside protection and to enter upon the freest exchanges. * * *

"On the reduction of duties on imports," in the Senate of the United States, January 11, 1832, Mr. Clay said:

Whoever may be entitled to the credit of the payment of the public debt, I congratulate you, sir, and the country most cordially, that it is so near at hand. It is so nearly being totally extinguished that we may now safely inquire whether, without prejudice to any established policy, we may not relieve the consumption of the country by the repeal or reduction of duties and curtail considerably the public revenue. In making this inquiry, the first question that presents itself is whether it is expedient to preserve the existing duties in order to accumulate a surplus in the Treasury for the purpose of subsequent distribution among the several States. I think not. * * *

The public revenue, then, should be regulated and adapted to the proper service of the General Government. It should be ample; for a deficit in the income, always to be deprecated, is sometimes attended, as we know well from history and from what has happened in our own time, with fatal consequences.

We may safely assume that the revenue may now be reduced, and considerably reduced. This reduction may be effected in various ways and on different principles. Only three modes shall now be noticed.

First. To reduce duties on all articles in the same ratio without regard to the principle of protection;

Second. To retain them on the unprotected articles and augment them on the protected articles; and

Third. To abolish and reduce the duties on unprotected articles, retaining and enforcing the faithful collection of those on the protected articles.

To the first mode there are insuperable objections. * * *

The second would be still more objectionable to the foes of the tariff than either of the others. * * *

The third mode is the most equitable and reasonable, and it presents an undebatable ground, on which I had hoped we could safely tread without difficulty. It exacts no sacrifice of principle from the opponent of the American system; it comprehends none on the part of its friends. The measure before you embraces this mode. It is simple and free from all complexity. It divides the whole subject of imports according to its nature. It settles at once what ought not to be disputed, and leaves to be settled hereafter, if necessary, what may be controverted. * * *

It assumes the right of the Government in the assessment of duties to discriminate between those articles which sound policy requires it to foster and those which it need not encourage. This has been the invariable principle on which the Government has proceeded from the act of Congress of the 4th of July, 1789, down to the present time. And has it not been admitted by almost every prominent Southern politician? Has it not even been acknowledged by the fathers of the free-trade church in their late address promulgated from Philadelphia to the people of the United States? If we never had a system of foreign imports, and were now called upon for the first time to originate one, should we not discriminate between the objects of our own industry and those produced by foreigners? And is there any difference in its application between the modification of an existing system and the origination of a new one?

Mr. Clay in his speech in the Senate on February 2, 3, and 6, 1832, in defense of his so-called American system, said:

I pass with pleasure from this disagreeable topic to two general propositions which cover the entire ground of debate.

The first is that under the operation of the American system the objects which it protects and fosters are brought to the consumer at cheaper prices than they commanded prior to its introduction or than they would command if it did not exist; and, second, that the tendency of the system is to sustain, and that it has upheld the prices of all our agricultural and other produce, including cotton. * * *

This brings me to consider what I apprehend to have been the most efficient of all the causes in the reduction of the prices of manufactured articles, and that is competition. By competition the total amount of the supply is increased, and by increase of the supply a competition in the sale ensues, and this enables the

consumer to buy at lower rates. * * * The great law of price is determined by supply and demand. Whatever affects either affects the price. If the supply is increased, the demand remaining the same, the price declines. If the demand is increased, the supply remaining the same, the price advances. If both supply and demand are undiminished, the price is stationary, and the price is influenced exactly in proportion to the degree of disturbance to the demand or supply. * * *

And now, sir, I would address a few words to the friends of the American system in the Senate. The revenue must, ought to be reduced. The country will not after, by the payment of the public debt, ten or twelve millions of dollars become unnecessary, bear such an annual surplus. Its distribution would form a subject of perpetual contention.

Mr. Clay on February 25, 1837, in discussing the bill to reduce the tariff, said:

But the best friends of the protective policy never intended that that policy should be perpetual, though the acts establishing it were unlimited in point of time. All who advocated the system went upon the ground that after a certain time (the precise period they did not attempt to fix) our domestic manufactures would become so thoroughly fixed and permanently established that they would bear the competition of rival products from abroad. * * *

The great question so long agitated between different portions of the Union has not been whether in laying a bill for revenue the Government may not levy a duty which gives incidental protection to the industry of our own citizens, for this none will deny, but whether such protection is in itself a proper and legitimate object for which taxes may be laid. The friends of the protective policy have always maintained the latter proposition.

And in speaking of the compromise act of 1833, he says:

At the time of its conception he was not in the city, but in Philadelphia, whither he had retired for three weeks. While there he was called upon by a committee of manufacturers, who disclosed to him their apprehensions of the imminent danger to which the tariff system was exposed, and who asked with anxiety what was to be done, whether no measure could be devised to save the manufacturing interests from the ruin with which they were threatened. It was to these individuals, and not to his friends in Congress, that he first applied to know whether in their apprehension a long lease of the protective policy, even though on a lower scale, would not be better than the uncertain state with regard to it in which they then were. To this question not a single man (and he put it to the most intelligent individuals) hesitated for a moment to reply in the affirmative. He afterwards conferred with other manufacturers and found that they concurred in the same view. * * *

The bill then provided a biennial reduction at the rate of 10 per cent. on all duties over 20 per cent., till the 1st of December, 1841; in June following, one-half of the remaining excess of duties over 20 per cent., and soon after the residue. To this bill it was objected that the manufacturing interest could never live under it. But what has been the fact? The law has now been in operation for four years, and have you heard any complaints from that interest? Can any period of four years be pointed out in which it has enjoyed greater prosperity? But it was urged that, although the manufacturers might get along till 1842, yet when that time should arrive they could no longer exist under the remnant of protection which would then be left them; that is, with a duty of 20 per cent., the home valuation, and the cash payment. In reply to this I said then, and I say now, that no man can tell beforehand whether this protection will be found sufficient or no. For myself, I do believe that the leading manufacturing interests of the country can subsist under it.

Mr. Clay, on March 10, 1838, in reply to Mr. Calhoun in their memorable discussion, in defending his compromise tariff of 1833 (this reply of Clay is found in the Daily National Intelligencer of March 19, 1838), said:

There is protection from one end to the other in the compromise act; modified and limited, it is true, but protection nevertheless. There is protection, adequate and abundant protection, until the year 1842; and protection indefinitely beyond it. Until that year the biennial reduction of duties is slow and moderate, such as was perfectly satisfactory to the manufacturers. Now, if the system were altogether unconstitutional, as had been contended, how could the Senator vote for a bill which continued it for nine years? Then, beyond that period, there is the provision for cash duties, home valuations, a long and liberal list of free articles carefully made out by my friend from Rhode Island, Mr. Knight, expressly for the benefit of the manufacturers, and the power of discrimination, reserved also for their benefit, within the maximum rate of duty fixed in the act. * * *

No one, Mr. President, in the commencement of the protective policy, ever supposed that it was to be perpetual. We hoped and believed that temporary protection extended to our infant manufactures would bring them up and enable them to withstand competition with those of Europe. We thought, as the wise French minister did, who, when urged by a British minister to consent to the equal introduction into the two countries of their respective productions, replied that free trade might be very well for a country whose manufactures had reached perfection, but was not entirely adapted to a country which wished to build up its manufactures. If the protective policy were entirely to cease in 1842, it would have existed twenty-six years from 1816, or eighteen from 1824; quite as long as, at either of those periods, its friends supposed might be necessary. But it does not cease then, and I sincerely hope that the provisions contained in the compromise act for its benefit beyond that period will be found sufficient for the preservation of all our interesting manufactures. For one, I am willing to adhere to and abide by the compromise in all its provisions, present and prospective, if its fair operation is undisturbed.

Mr. Clay, in his letter of September 13, 1843, to Dr. F. S. Bronson, of Lagrange, Ga., published in Niles's National Register of October 21, 1843, said:

The sum and substance of what I conceive to be the true policy of the United States in respect to a tariff may be briefly stated. In conformity with the principle announced in the compromise act, I think that whatever revenue is necessary to an economical and honest administration of the General Government ought to be derived from duties imposed on foreign imports. And I believe that in establishing a tariff of those duties such a discrimination ought to be made as will incidentally afford reasonable protection to our national interests.

I think there is no danger of a high tariff being ever established; that of 1828 was eminently deserving that denomination. I was not in Congress when it passed, and did not vote for it, but with its history, and with the circumstances which gave birth to it, I am well acquainted. They were highly discreditable to American legislation, and I hope for its honor will never be again repeated.

After my return to Congress in 1831 my efforts were directed to the modification and reduction of the rates of duty contained in the act of 1828.

The act of 1832 greatly reduced and modified them, and the act of 1833, commonly called the compromise act, still further reduced and modified them. The act which passed at the extra session of 1841, which I supported, was confined to the free articles. I had resigned my seat in the Senate when the act of 1842 passed. Generally, the duties which it imposes are lower than those in the act of 1832. And, without intending to express any opinion upon every item of this last tariff, I would say that I think the provisions, in the main, are wise and proper. If there be any excesses or defects in it (of which I have not the means here of judging) they ought to be corrected.

My opinion that there is no danger hereafter of a high tariff is founded on the gratifying fact that our manufactures have now taken a deep root. In their infancy they needed a greater measure of protection, but as they grow and advance they acquire strength and stability, and consequently will require less protection. Even now some branches of them are able to maintain in distant markets successful competition with rival foreign manufactures.

I have thus quoted very fully from Mr. Clay, beginning in 1820 and ending in 1843, that we may clearly see the exact grounds upon which he sustained the protective system.

THE AMERICAN SYSTEM SO CALLED.

In his speech in March, 1824, for the first time in tariff discussions, Mr. Clay designated the policy of protection, the "American policy," the "American system," and ever since that speech protectionists have rolled this phrase "American system" as a sweet morsel under their tongues and have hurled at all persons who differed with them the charge of favoring a British system of free foreign trade—a foreign system.

Daniel Webster, then a Representative in the House from Massachusetts, on April 1 and 2, 1824, in reply to Mr. Clay, then Speaker of the House, said:

And allow me, sir, in the first place to state my regret, if indeed I ought not to express a warmer sentiment, at the names or designations which Mr. Speaker has seen fit to adopt for the purpose of describing the advocates and the opposers of the present bill. It is a question, he says, between the friends of an "American policy" and those of a "foreign policy." This, sir, is an assumption which I take the liberty most directly to deny. Mr. Speaker certainly intended nothing invidious or derogatory to any part of the House by this mode of denominating friends and enemies. But there is power in names, and this manner of distinguishing those who favor and those who oppose particular measures may lead to inferences to which no member of the House can submit. It may imply that there is a more exclusive and peculiar regard to American interests in one class of opinions than in another. Such an implication is to be resisted and repelled. * * *

Indeed, sir, it is a little astonishing, if it seemed convenient to Mr. Speaker, for the purpose of distinction, to make use of the terms "American policy" and "foreign policy," that he should not have applied them in a manner precisely the reverse of that in which he has in fact used them. If names are thought necessary, it would be well enough, one would think, that the name should be in some measure descriptive of the thing; and since Mr. Speaker denominates the policy which he recommends "a new policy in this country;" since he speaks of the present measure as a new era in our legislation; since he professes to invite us to depart from our accustomed course, to instruct ourselves by the wisdom of others, and to adopt the policy of the most distinguished foreign states, one is a little curious to know with what propriety of speech this imitation of the other nations is denominated an "American policy," while, on the contrary, a preference for our own established system, as it now actually exists, is called a "foreign policy." This favorite American policy is what America has never tried; and this odious foreign policy is what, as we are told, foreign states have never pursued. Sir, that is the truest American policy which shall most usefully employ American capital and American labor and best sustain the whole population. With me it is a fundamental axiom, it is interwoven with my opinions, that the greatest interests of the country are united and inseparable; that agriculture, commerce, and manufactures will prosper together or languish together; and that all legislation is dangerous which proposes to benefit one of these without looking to consequences which may fall on the others.

It would seem that the reply of Mr. Webster would have silenced the further demagogical use of the term "American system," but it did not, and to-day we hear the same use of the term from ocean to ocean.

Why did Mr. Clay use this term of "American system" to designate his protective-tariff system?

Mr. Hamilton in his celebrated report, as before quoted, based his whole system of protective duties and bounties upon the like systems or policies "which have been employed with success in other countries," and reasoned, from their successful adoption and employment by foreign nations, the probability of their success in our country, and thus boldly proposed to introduce these exotic, foreign systems into our country. In the tariff discussion in 1820 Mr. Clay had been warned of the effects of the adoption of this foreign system of protective duties, and especially of the dire results of the system in England, for he said:

And we are warned by the example of England, by her pauperism, by the vices of her population, her wars, and so forth.

And in reply to the warning said:

Pauperism is in general the effect of an overflowing population. Manufactures have undoubtedly produced a redundant population, but so may commerce and so may agriculture.

He was warned of our higher wages for labor in this country than in foreign countries, and of the effect of the protective policies in foreign countries in reduced wages, pauperism, and vices, and that the same foreign policies adopted here would produce like results.

To break the force of these facts, that the policy of protective, discriminating, restrictive duties was the policy then of England and other foreign countries, and the results of such policy there were a redundant, overflowing population, low wages, and pauperism, and that his protective policy was only an imitation of such foreign policy, he introduced and coined the term "American system."

The protective, restrictive policy is not an American system. On the contrary, it is the excluding, restrictive, prohibitive system practiced by the "Celestial Empire," China, for thousands of years, which built by pauper labor the Chinese wall. It is the system to-day of Italy, Spain, France, Germany, Austria, Hungary, and Russia. It was the system of England, and rigidly maintained in the days of Hamilton

and Clay, and until her labor was degraded and wages reduced to starvation point. Such is the historical origin of this real foreign Chinese-British-Italian policy of restrictive, prohibitive duties adopted by protectionists in this country and proclaimed by the Chicago platform as the American system of protection.

Not a word did Mr. Clay utter in behalf of increasing the wages of American labor; not a word for the protection of American labor against the pauper labor of Europe; on the contrary, as with Hamilton so it was with Clay—protection to American manufacturers and contention by both that our wages, compared with the so-called pauper labor of England and Europe, were not as much higher as represented. How long was this protection to continue? Mr. Hamilton claimed that protective duties were necessary and justifiable for "new undertakings," "new manufactures," and that—

The continuance of bounties on manufactures long established must always be of questionable policy—

But fixed no date. Mr. Clay claimed, in 1820, that—

Manufactures were the youngest and weakest interests of the State. Agriculture wants but little or no protection—

And—

our foreign trade wants no further legislative aid.

And, in 1824, that—

The unprotected manufactures of a country are exposed to the danger of being crushed in their infancy.

And—

Let our arts breathe under the shade of protection; let them be perfected as they are in England, and we shall then be ready, as England now is said to be, to put aside protection and to enter upon the freest exchanges.

Mr. Clay called them infant industries in 1820 and 1824, but in 1837 said:

The best friends of the protective policy never intended that that policy should be perpetual.

And that—

All who advocated the system went upon the ground that after a certain time (the precise period they did not attempt to fix) our domestic manufactures would become so thoroughly fixed and permanently established that they would bear the competition of rival products from abroad.

And in speaking of "the remnant of protection" left under compromise tariff of 1833, which was a duty of 20 per cent., said:

For myself, I do believe that the leading manufacturing interests of the country can subsist under it.

In 1838 Mr. Clay said:

No one, Mr. President, in the commencement of the protective policy ever supposed that it was to be perpetual. We hoped and believed that temporary protection extended to our infant manufactures would bring them up and enable them to withstand competition with Europe. * * * If the protective policy were entirely to cease in 1842 it would have existed twenty-six years from 1816 or eighteen from 1824, quite as long as at either of those periods its friends supposed might be necessary.

In his letter to Dr. Bronson in September, 1843, Mr. Clay said:

My opinion that there is no danger hereafter of a high tariff is founded on the gratifying fact that our manufactures have now taken a deep root. In their infancy they needed a greater measure of protection, but as they grow and advance they acquire strength and stability, and consequently will require less protection. Even now some branches of them are able to maintain in distant markets successful competition with rival foreign markets.

And now, after nearly a century of duties under the various tariff laws protective of our manufactures against competition with like manufactured products from foreign countries to the amount of 10 to 25 per cent. from 1789 to 1824, and of 30 to 48 per cent. from 1824 to 1846, and of 25 per cent. from 1846 to 1857, and of 20 per cent. from 1857 to 1861, and of 40 to 50 per cent. from 1861 to this date, and after the lapse of forty-five years from the date of Mr. Clay's letter to Dr. Bronson, we hear the same cry for protective duties to our infant industries.

When will they attain the age of majority—of maturity?

When this British system of protective duties was transplanted in this country by Mr. Hamilton we were then an infant nation in population and time of separate existence, under a republican-democratic government, antagonistic to the other governmental systems of the world, burdened with an onerous debt, without financial credit in the money centers of the world, with limited sources of revenue, with a vast area, with sparse population, and without the essential and necessary supplies, military or otherwise, to render us independent of other nations. We were without railroads, canals, steam-boats, and necessary transportation facilities for the exchange and the internal commerce among our own people. Our products of agriculture and manufacture were largely confined to restricted local markets at home, and when exported were burdened with heavy duties by the restrictive and discriminating policies of foreign nations, and especially our surplus agricultural products, not large in quantity, were, when exported to England, heavily taxed by an almost prohibitive duty; and we had but few products we could sell to or exchange with foreign countries upon equal or fair terms, and were to a large extent dependent on foreign nations for many supplies essential to our existence and success in event of wars. Europe was in a state of almost continual wars, and our new nation was liable at any time and upon easy provocation to be drawn into a war.

Thus situated, the system of protective duties was urged by Hamilton as well as by Clay, to counteract the foreign protective systems, to render us independent as a nation on foreign nations for essential, especially military, supplies, and to induce capital to be invested in new manufactories of such supplies, and to protect the manufacturers in the infancy of such establishments against the competition of old, long-established manufactories in foreign countries; and to insure to such manufacturers a sure return of profits on their investments, and without any purpose of making the system perpetual; and to induce foreign immigration in order to increase the numbers of the laborers in this country, and to enable the manufacturers to trade on a foreign stock, imported laborers, and thus, by increasing the numbers engaged in manufactures, increase the demand for our surplus agricultural products, and furnish in the various localities where manufactories might be established the home market for farm products, then absolutely excluded from the foreign markets by the restrictions and prohibitory laws of England and other countries.

The conditions and surroundings have entirely changed. The grounds upon which the system was advocated by Hamilton and Clay no longer exist.

In 1790 we were a nation of 3,929,214 people. Now we number over 60,000,000.

Then we were in our national infancy—babyhood. Now we are a mature nation one century old.

Then our governmental system was an experiment, dissimilar to any previously existing system, and the envy of all others. Now our system is established beyond doubt, and has carried us safely and victoriously through the war with Great Britain, then the most powerful nation on land and sea, and through the war with our now esteemed and friendly neighbor, Mexico, and through our own late civil war, the severest ordeal to which our system could possibly be subjected.

Then we were poor, burdened with debt, without financial credit and standing among nations, and with limited sources of revenues. Now we are rich in all the elements of true wealth, with financial credit at home and abroad second to no nation on earth, without a dollar of debt we can now redeem or pay without a heavy premium, and with an overflowing Treasury and sources of revenue we are trying to decrease, and with territorial boundaries extending from ocean to ocean and from Canada to Mexico, inhabited by an intelligent, progressive, enterprising, self-reliant, patriotic people.

Then we were dependent on foreign nations for many essential supplies necessary to our national existence, even military supplies, and without transportation facilities for our surplus products. Now, in 1880, we had 253,852 manufacturing establishments with a capital of $2,790,272,606, consuming materials of the value of $3,396,823,549, and yielding an aggregate product of the value of $5,369,579,191; and with steam and water power in 1880 equal to the muscular power of 21,000,000 of men, representing a population of 105,000,000 of people, and capable of manufacturing all the supplies of our consumption at home, if continuously working on full time, in six months, and making us wholly independent of any foreign nation for essential supplies, military or otherwise. And in 1887 we had 148,987 miles of railroad in operation, binding together the oceans that wash our shores, and extending into the territories of our bordering nations, and running into and through every State and Territory except Alaska; and bringing together, excluding Alaska, the farthest parts of our country, in point of time, within one week, and affording boundless facilities of travel and transportation for our surplus products from State to State.

Then the only markets for our surplus products were the home local markets. Now our markets are simply the powers of consumption of our people in every locality in our own country and in all foreign countries, and are quickly and easily accessible to our surplus wherever produced.

Then we had no foreign markets for our surplus agricultural products, because of the restrictive policies of foreign nations. Now the markets of the world are open to the competition of our products on terms equally as advantageous and liberal as we offer them.

And yet we are called upon by our Republican friends to increase the protective duties upon the manufactured products of our century old but still infant industries, and to perpetuate their British-Chinese policy of restriction, to the exclusion of any healthful competition of foreign products in our home markets, and secure to our manufacturers a monopoly of this home market, and thus strengthen the powers of their trusts, which Mr. Blaine calls "private affairs with which the consumers have nothing to do."

THE SO-CALLED HOME MARKET.

This leads us now to consider this "home market for farm products."

This is another pet phrase of protectionists. Why are they continually pleading for a home market, just as they do for their so-called American but real foreign system?

There is an object in view—an end to be secured.

The majority of the Senate committee in their report say—

No class of people in the United States have an equal interest with the farmer in the diversification of our industries and in the development of manufactures, for proximity to profitable markets gives increased value to labor and to land and its products.

And that—

An addition of 5 cents per day to the wages of the workingmen of the country would furnish a market within our own territory equal in extent to the value of the surplus agricultural products now annually exported.

Protectionists point to the tariff duties imposed on corn, 2 cents per bushel, corn-meal same, on wheat 20 cents per bushel, on flour 20 per cent. ad valorem, on beef and pork 1 cent per pound, on hams and bacon 2 cents per pound, and on cheese and butter 4 cents per pound and on other farm products when imported, to make them believe they, too, are protected against the products of pauper labor in foreign countries.

Our Republican friends say that lands are higher and farm products bring a higher price in the vicinity of manufacturing establishments than elsewhere. To some extent and in regard to some products this is true, but is not caused by protection. Lands are always higher in the vicinity of any locality where any considerable numbers of people are aggregated, and not engaged in farming, are consumers. As in the vicinity of towns and cities and in densely settled districts, regardless of whether such persons are engaged in manufacturing or commercial or other pursuits, and regardless of whether their employments are the beneficiaries of protection.

There are many towns, cities, and communities where lands are higher and farm products bring a higher price than in the more distant surrounding country, and yet where there are no protected industries and no employed consumers in such industries.

There are many industries in this country, wherein are employed thousands of laborers, which do not enjoy any protection and in whose vicinity lands are higher and farm products of certain kinds command a higher price than elsewhere. Therefore protection can not be the cause of such higher prices of lands and for such farm products.

The whole extent of the so-called home market for farm products is the consumption of farm products by those engaged in the protected industries, for whilst so engaged they are consumers and not producers of farm products. Now, to what extent does protection benefit the farmers in the prices of their surplus products to these employés in the protected industries? Our Republican friends say to the full extent such employés consume such products. I deny the assertion, for it is merely an assertion. Bear in mind that in this great country, among all our people, in all our States and Territories, absolute free trade, without any restrictions, burdens, or taxes, is the constitutional system and the law of the land, and all our products of the soil which will bear transportation are carried upon our railroads and navigable waters from ocean to ocean and from Canada to Mexico, and the prices are regulated and controlled, not by any local neighborhood, town, or city market, but by the prices in our great commercial centers and ports of export to foreign markets. And the foreign markets of the world absolutely regulate, fix, and determine the prices of all such transportable products, not only in such markets, but also throughout the length and breadth of our whole country, subject only to the cost of such transportation.

Consequently our farmers derive no benefit whatever in the prices of their surplus products susceptible of transportation, in these local markets where employés are aggregated in protected industries and only receive the price of such articles in such localities as regulated and fixed by the foreign markets of the whole world.

Now, as to farm products, which will not bear, or are not susceptible of transportation—quickly perishable vegetables and products—the local market everywhere—the number of consumers of such articles in each locality, determines the price regardless of whether such consumers are engaged in protected or unprotected industries, or commercial or other pursuits, or mere pleasure seekers at resorts, or students in institutions of learning, or Government officials and employés.

Protection is therefore of no benefit to such producers of perishable products in the prices they receive.

Protection therefore does not and can not affect or increase the prices of the surplus products of the farmers; and the so-called home market for farm products is a myth, a delusion, and a snare to entrap farmers into voting for the Republican party.

Now, as to the extent of the increase of consumers of surplus farm products by protection, I say emphatically that a high protective tariff as distinguished or opposed to a revenue tariff has never caused, does not now and can not in future cause, any increase in the numbers of consumers engaged in manufacturing industries over or above the numbers who have been or will be employed in such industries under a revenue tariff.

But admitting for the sake of argument that all the persons engaged in protected manufactures are so engaged because of the high protective tariff, and to the extent of their numbers are consumers of surplus farm products, are they consumers in such numbers and of such quantities as to seriously affect the prices of the surplus farm products? Let the facts and figures show. The total population of the United States of all ages, sexes, and races in 1880 was 50,155,873, and the total number of all persons engaged in both manufacturing and mining industries was 3,837,112. Deduct from this number those engaged in the unprotected industries of the country, such as carpenters, blacksmiths, butchers, bakers, etc., and we have not exceeding 2,623,089 persons, including all ages, sexes, and races engaged in protected industries. As to the whole population they are as 1 in 19, or about 5.23 per cent.

In 1880 the total exports of all kinds of products from the United States amounted to $823,946,353. Of this sum the agricultural products were $685,867,737, being 83.24 per cent. of all exports. After having exhausted the home market this vast sum of surplus agricultural products was exported and sold in the foreign markets of the world—in competition with the pauper labor of India, Russia, and all other parts of the world—and the prices in the markets of the world regulated and fixed the price not only in such markets, but also in the home market.

Our Republican friends, in their Senate report, as quoted before, say that an addition of 5 cents per day to the wages of the workingmen of the country would furnish a market for all this surplus of farm products so exported. Do they mean to leave the impression that an addition of 5 cents per day to the wages of those engaged in protected industries would equal in amount the value of all such exported farm products? If they did not mean this, why make such a statement? Perhaps they meant that our workingmen do not have sufficient food under a high tariff, and if their wages were increased 5 cents per day they could eat that much more.

I admire their arithmetic. Five cents per day—working days, three hundred—would be $15, and, counting 2,623,089 as the employés or consumers in protected industries, would amount to $39,346,335—to equal the exports of surplus farm products of $685,867,737 in value.

Suppose, however, that each of the men, women, and children engaged in protected industries consumed during the year $40 worth of the kind of articles so exported, and this estimate is too high, they would only have consumed $104,923,560 worth, or less than one-sixth of the value of such exported articles, and such consumption would have but little effect. Our Republican friends claim they are protecting farm products.

The following statement will show some of the surplus farm products exported in 1880, and the imports, duties, etc.:

Articles.	Exports.	Imports.	Duties.
Cotton, raw	$211,535,905	$591,120	Free.
Corn	54,279,608	65,364	10 cents per bushel.
Wheat	190,546,305	534,475	20 cents per bushel.
Flour	35,333,197	28,532	20 per cent. ad valorem.
Meat products	132,488,201	1,239,292	1 cent per pound on beef and pork, 2 cents per pound on hams and bacon, and 4 cents per pound on butter and cheese.
Butter and cheese	18,862,407		
Total value	643,045,623		

This shows clearly the farce of the so-called home market and the protective duties on such products. Farm products have no competition worthy the name in the home market with like foreign products.

But farmers compete with the products of the lowest and most degraded pauper labor of the world in the markets of the world, and receive for their surplus products both in the home and foreign markets the prices established and regulated by such foreign market with such competition, and are neither directly nor indirectly the beneficiaries of any tariff duties at home, and in some foreign markets even have to submit to protective duties imposed on their surplus products exported thereto. Farmers can not be benefited by high-tariff taxes.

To establish these facts beyond the power even of Republican protectionists to dispute them, I will present the deliberate statements of two distinguished Republican leaders, Senators on this floor, representing great agricultural farming constituencies.

Senator W. B. ALLISON, of Iowa, said in the House on March 24, 1870:

The agricultural interest, it will be seen, is much the largest interest in its aggregate product, as well as in the number of persons employed. I believe no one will claim that this large interest is directly protected. It is true that under customs laws there is a small duty upon wheat, barley, oats, and other agricultural products, but it does not afford any protection to the great wheat and grain-producing regions of the country. The gentleman from Ohio [Mr. WILSON], in discussing this question, stated that the cost of wheat in New England is about $1.70 per bushel, while in Illinois, Iowa, and Wisconsin the price is about 65 cents per bushel. The Canadian wheat is the only wheat that comes in competition with our own. Canada being nearer New England than the wheat-growing States more than makes up the duty in the reduced cost of transportation.

What is true of wheat is equally true of other grains. Therefore the farmer has practically no protection at all, and whatever benefit he derives is from what the home market furnishes for home products. Unfortunately for the farmer the market price of wheat is fixed by the price which the surplus will bring abroad, or the price of wheat in London or Liverpool. At that market, where the surplus is sold, and which fixes the value of the whole crop, he comes in competition with the grain produced in the Crimea, in Hungary, and in the region of the Baltic, from fields cultivated by what is known, in comparison with our own, as pauper labor.

But I am told we must so legislate as to furnish a home market for all our agricultural products, and this can only be done by high tariff. Any one examining the subject will see that our agricultural products increase more rapidly than our population, so that if we do not export these products in their natural condition we must do so by converting them into manufactured articles and export these articles. But this can not be done under a high tariff, for all nations will buy manufactured products where they are the cheapest, and the nation selling the cheapest will control the market. This rule excludes our

highly-taxed manufactures made from highly-taxed materials from the markets of the world, although we have natural advantages possessed by no other nation.

Senator P. B. PLUMB, of Kansas, January 17, 1883, said in this Chamber:

I do not ask that any duty shall be increased. No one raising anything within the State of Kansas, and no manufacturer in that State asks for an increase of duty on anything. We do ask that a ring—if I may use that expression without offense—a collection and combination of interests located upon the eastern frontier of this country, near the seat and source of power, easily accessible to tariff commissions and easy to get their ears, shall not have their own way about everything of this kind, entirely irrespective of the sections of this country remote from the seat and sources of power.

Mr. President, some of us have got to be consulted before this bill finally passes, and some of us will be consulted after the bill has passed in regard to the reasons for the action or non-action taken. I say now to the persons who have the run of this thing, to those who have had control and are better posted, and have been able by arts and various processes to do those things which were not thoroughly understood—I beg of them to consider that the people are watching this proceeding, and that they want no higher taxes, but lower taxes, and that in giving the protection for American industry they want to give a decent chance to a class of people who by reason of their calling can not be protected at all, but who have got to take their chances in the market of the world for their products, hard products to raise, expensive products to get to market, and in the production of which there is the smallest margin of profit.

I was talking with a farmer from Massachusetts to-day about this thing. He said he had as good a farm as there was in the old Bay State, and yet he said that he could barely make both ends meet, and he complained to me that one of the reasons why he could not do so was because everything else that surrounded him was so much protected that it simply took the difference between profit and loss in his calling, and left him a very slim chance indeed, from year to year.

I will present the testimony of that distinguished soldier and statesman, whose presence in this Chamber we all so much miss, and whose death we mourn.

General John A. Logan said in the House on April 18, 1870:

Now, when the gentleman, who seems to be the protector to an especial manner of the great labor interests of the country, speaks of this protection being the protection of the labor of this country, I ask him: Does not every farmer and mechanic in this broad land make use of iron in all kinds of labor? The 4,000,000 men that have been freed recently are laborers, are producers, not manufacturers. They are not men of skilled labor; they evidently are not the men who are protected. And then there are the men in the Northwest who produce corn, wheat, oats, pork, and beans, etc.; they are producers and consumers, and are not protected; and it is they who pay this large amount of money into the pockets of the manufacturers of this article. And when a gentleman stands upon this floor and tells me that this high, this extraordinary high tariff is for the protection of the laboring men of this country who are not skilled laborers, I tell him I do not understand how he can possibly substantiate such a theory.

If we will not buy of foreign nations, they will not buy of us. If we sell to them, we must buy of them.

Close the markets of the world to the exports of our surplus farm products and the ruin and bankruptcy of our farmers follow unavoidably, and all other industries suffer.

There is, however, a home market—a prolific, enriching home market—for the protected manufactured products, but none for surplus farm products.

Let census and record figures show the enchanting beauties of this home market for manufactured products.

By the Tenth Census the value of manufacturing products was $5,369,579,196. Deduct from this the value of materials, $3,396,823,549, and we have the value of net product, $1,972,755,642. This is an enormous sum of products to be sold in some market. Where was it sold, and in competition with what other like products? In 1880 the total imports into the United States were $667,954,746, of which $208,301,863 were free of duty, and $459,652,883 were dutiable, and upon which duties or taxes to the amount of $186,522,065 were paid into our Treasury by the consumers of such imports. In the same year the total exports, $823,946,353, of which $685,867,737 were exported agricultural products, leaving only $138,078,616 as the value of all other exports, and at the highest estimate not over $90,000,000 were protected manufactured products.

The following statement shows some of the manufactured products so exported and imported:

Manufactured products.	Exported.	Imported.
Cotton manufactures	$9,981,418	$29,929,366
Iron and steel manufactures	14,716,524	53,714,008
Wood and manufactures	16,237,376	6,650,598
Woolens	216,576	33,911,093
Earthen, stone, and china ware	106,724	5,760,163

Deduct the $90,000,000 worth of manufactured products enjoying home protection from net product $1,972,755,642, we have $1,882,755,642 of manufactured products sold in our home market, with the advantage and benefit of high protective duties imposed on all like foreign products imported. In this net product of manufacturing products sold in the home market there are doubtless many products not enjoying the benefit of protective duties, or in fact any duties. For these make a liberal allowance of $350,000,000, and we still have $1,532,755,642 as the value of the manufactured products enjoying the home market and hedged around with high protective duties on like imports.

It is no wonder that manufacturers enjoying this hedged-in home market organize into "home-market clubs," and publish tariff-league bulletins, and sundry other publications, circulars, and leaflets, and send them broadcast throughout the land, through the mails and Republican campaign committees and clubs, and hire Jarrett and other pretended laboring men to proclaim the benefits of this home market, of which they have the exclusive monopoly for their millions of products, up to the limit of the high tariff duties on like imported products. Having this monopoly, they try to make farmers believe that the home market is for them. In 1880 the $459,652,883 worth of foreign products imported and taxed by the tariff laws $186,522,065 was the only competition they had with products of the world, and against this they had the shield and protection of the tariff duties as stated.

What is the origin of this home market for farm products? It originated with Hamilton and Clay, as shown in my quotations from them.

Why did they plead for a home market for farm products? Because there was then no foreign market for such products, on account of the restrictive, prohibitive corn laws of England and restrictive laws of other foreign countries. And such products were practically denied admission into foreign countries.

Mr. Hamilton said:

The United States are to a certain extent in the situation of a country precluded from foreign commerce. The regulations of several countries with which we have the most extensive intercourse throw serious obstructions in the way of the principal staples of the United States.

Mr. Clay said:

The policy of all Europe is averse to the reception of our agricultural produce, so far as it comes into collision with its own, and under that limitation we are absolutely forbid to enter their ports, except under circumstances which deprive them of all value as a steady market.

Since those days the conditions have entirely changed. England in 1846 to 1848 repealed her obnoxious corn laws and other nations removed their restrictions, and now our agricultural products of cotton, wheat, meats, etc., are admitted free of duty in almost every country and our surplus agricultural products are left free to compete in the foreign markets with all the laborers of all countries, and their prices there regulate and fix the prices there and here, and they therefore have no advantages in the home market over the foreign, but are absolutely controlled by the foreign.

Yet we hear the same old song of home market, delicious and enriching to the manufacturers, who enjoy its exclusive monopoly; pernicious and impoverishing to the farmers, who enjoy no advantages in it over the foreign markets.

The grounds upon which it was advocated by Hamilton and Clay have passed away and no longer exist, and yet our Republican friends persist in proclaiming it the panacea for the farmers, merely to catch their votes.

WHO PAYS THE TARIFF DUTIES IMPOSED BY OUR LAWS UPON DUTIABLE IMPORTED ARTICLES?

Any person, firm, or corporation, either at home here, or in any foreign country, desiring to sell in our markets such dutiable article ascertains the cost at foreign factory, the transportation and insurance charges, and the tariff duties, and by adding all these items together determines the total cost of the articles to him when ready for sale here, and then ascertains the selling price in our markets, and determines by comparing the relative total cost and the selling price the margin, if any, for profit on the investment.

The tariff duty is just as much a part of the total cost here as the cost at factory or the transportation and insurance charges, and is essentially an inseparable part of the total cost of such article when ready for sale in our markets, and the profit expected to be realized in its sale is computed upon the tariff duty so paid as fully as upon the factory cost or transportation and other expenses. And the consumer of such article must and does necessarily and unavoidably pay, in the price paid for such article, the amount of such duty with percentage of profit added thereto.

For illustration: An American citizen desiring to purchase either for his own consumption or for sale in our home market an article of foreign manufacture, costing at the factory $1,000, and the transportation and other expenses being $20 and the tariff duty 60 per cent. ad valorem, or $600, can make his purchase in different ways as may best suit his convenience. He may purchase directly from the foreign manufacturer, and in such case pays the $1,000 factory cost, the $20 expenses, and upon the delivery of the article in our Government warehouse does and must pay the $600 tariff duty before the article can be delivered to him or transferred to his house. The total cost to him is $1,620, and if he consumes the article the tariff duty of $600 is an integral part of the $1,620 cost to him. If he sells the article he computes his profit as much upon the $600 paid for tariff duty as upon the $1,000 paid at factory. And the final consumer, whoever he may be, pays in the total price paid for such article the amount of such duty, with profit thereon added.

He may, to suit his convenience, purchase such article of the foreign manufacturer, or of his resident agent, partner or branch house in this country, to be delivered at his own business house or home. And in this case the seller, either foreign manufacturer, his resident agent, partner or branch house, pays the $20 transportation charges, and, upon

the delivery of the article from the ship or railroad in our Government warehouse, must and does pay the $600 tariff duty before the article can be removed, and then delivers such article to such purchaser and receives from him the total amount, $1,620, being the factory cost, transportation expenses, and duty, and our American citizen purchasing in this way pays the tariff duty of $600 as fully as if he himself had imported the article and had paid the said three items—$1,000 factory cost, $20 expenses, and $600 duty—to the three different persons, manufacturer, carrier, and collector of customs.

Suppose, however, that after he has bought this article at a cost of $1,620 the selling price in the market falls, or fashions or styles change, or financial depression ensue, or he becomes financially embarrassed, or for any other cause he is compelled to sell the article at cost, the consumer still pays the duties. He may be compelled to sell the article even at a loss of 10, 20, 30, or 50, or any other per cent., then he is the sufferer and the consumer the gainer. He does not deduct the loss from the item of $600 tariff duty any more than from the item of $1,000 factory cost.

He simply charges his loss to account of loss. This is an incident to all transactions of buying and selling all kinds of products, domestic and foreign, dutiable and free, and is an exception to the general rule of business; and in all such cases of loss the consumer gets the benefit of such reduced price. Certainly no one buys to sell again without the hope of gain or profit. If mistaken, he must bear the loss.

The duty is imposed by law upon the specific article when imported, not upon the foreign manufacturer, not upon the common carrier of such articles, not upon the importer, nor yet upon the seller or the buyer. It is imposed by law upon such dutiable imported articles, regardless of the persons producing or handling, buying or selling such article for the express and avowed purpose of making such article cost more; of increasing the cost of such article in our markets by the amount of the tariff duty; for the especial benefit and protection, not of the consumer, nor of the importer, whoever he may be, but of the home manufacturer, and for the further express purpose of making the consumer of such foreign article pay this increased additional cost of the tariff duty if he will purchase such foreign article in preference to the like article manufactured here. If this be not the object and purpose of imposing tariff duties upon imported articles, then protection and high tariff laws are a humbug, a fraud, a delusion, a will-o'-the-wisp.

The fact that the consumer of any imported product pays the tariff duties thereon in the increased price paid for such article seems so plain, so patent, that no one would dispute it. Yet we find the protectionist leaders and publications claiming that the foreign manufacturer pays the tariff duties, not the consumer. If this be true, the consumer is benefited to the amount of the tariff duties. This conclusion must necessarily and logically follow if the claim be true that the foreign manufacturer pays the tariff. Practically this claim is that the protectionists have devised a mysterious system imposing high tariff duties upon imported articles, whereby the foreign manufacturers and exporters to this country have to pay such duties and then sell such articles to our consumers without adding such duties as a part of the price.

There is no mystery about taxes imposed on an imported article. The consumer of such article pays it. No arithmetical legerdemain can relieve him from its payment.

Senator EDMUNDS, in his tariff article in Harper's Magazine for February, 1888, in reply to Mr. Watterson, refers to the policy of England in advocating partial free trade, and what she knew, and said, meaning England:

> Well understanding the error of the idea that seems to be advanced in Mr. Watterson's article, that it is the consumer who bears the whole burden of impost duties, and well understanding the fact that at least a very heavy proportion of such imposts is borne by the foreign producer or manufacturer, this last-named fact appears to be entirely overlooked by those who advocate great reductions of customs duties as a benefit to the consumer and as a relief of the consumer from taxation. If the profits of the foreign manufacturer or producer are essentially diminished by customs duties, and are essentially increased by the diminution or abolition thereof, then so far the money obtained from them is not by taxation of our own people, but by taxation of the foreigner; and if the surplus revenues are to be reduced by the abolition or reduction of the customs duties, so far they are reduced not for the benefit of our own people but to the benefit of people of other countries who are the exporters of goods to our markets.

He attempts to sustain his position by referring to the removal of the duties on coffee and tea, and says no decrease in selling price here resulted, and makes comparisons of prices.

The fallacy of his statement is clearly shown by his illustration of the effects of removing duties from coffee and tea, articles not produced in this country and not benefited in production here by duties.

The question is not what effect the removal of duties from an article not manufactured or produced in this country may have upon its selling price here.

Protectionists advocate protective duties on articles manufactured here, to defend, to protect the home manufacturers against competition or too close competition with like articles manufactured abroad, and the effects of an increase or reduction of tariff duties must and can only be ascertained by confining comparisons to protected articles produced here with like articles produced abroad.

Senator EDMUNDS says—

> "If" the profits of the foreign manufacturer or producer are essentially diminished by customs duties and are essentially increased by the diminution or abolition thereof, then so far the money obtained from them is not by taxation of our own people but by taxation of the foreigner.

He uses his famous "if," and does not assert his proposition to be true.

His "if" is based upon the supposition that the demand and supply, and consequently the market price paid by the consumer, remain unchanged, and disregards competition.

Take as an example an article of cotton cloth manufactured here and in England, the cost of which in England is $950 and here $1,000, and the market price—selling price to consumer—is $1,200. There being no duty, the English manufacturer receives $250 profit and the home manufacturer $200 profit, and the consumer pays $1,200.

Now, impose a tariff duty of 10 per cent. ad valorem on the imported article, and you reduce the profit of the foreigner to $155 and leave the profit of the American at $200, and consumer pays $1,200 for the article and is not benefited; but the home manufacturer realizes a relatively higher profit.

Now, impose a tariff duty of 20 per cent. ad valorem, or an equivalent specific duty on the imported article, and you reduce the profit of the foreigner to $60 and relatively increase the profit of the American manufacturer, and the consumer still pays $1,200 and is not benefited.

Now, impose 30 per cent. ad valorem duty, and the foreigner suffers a loss of $35 and the American receives his same $200 profit and has a monopoly of the American home market, and the consumer still pays the same $1,200, derives no benefit, and is liable to have the $1,200 market price slightly increased.

Now, increase the duty to 40 per cent. ad valorem, and the foreigner would lose $130, if he still sold at $1,200, and the home manufacturer would have an exclusive monopoly of the home market; and even at the same price of $1,200 the consumer would still pay the tariff tax and would certainly have the market price increased to $1,250 or $1,300.

Now, reverse the transaction. There is a 40 per cent. duty on the foreign article and the home manufacturer has a monopoly, no competition from abroad, and holds the article at $1,200, or even an increase, and no duty goes to the Government. Reduce the duty to 30 per cent. and he still has a monopoly. Reduce it to 20 per cent. and the foreign producer can make a profit of $60 on his product, worth at home $950, and begins to export the product to this country, and as long as the demand, the consumption, will take all the home product and foreign at the $1,200, the home manufacturer keeps on his $200 profit, but if the market becomes dull and demand light he reduces the price in the home market to $1,140, or his profit to 14 per cent., and then the foreigner can make no profit and must retire. And in all cases of reduction of duties the consumer receives the benefit, either in reduced price of foreign product or reduced price of home product, or both.

The consumer at home, and never the foreigner, pays all tariff duties on imported articles, and not only this, but he pays to the home manufacturer for his product profits increased by the amount of the tariff duties imposed on like competing imported article, subject only to the competition in this country among and between the protected manufacturers.

When the duty is so high that there is no margin of profit to the manufacturer in foreign countries on his products exported to this country, you close our ports to the entry of his products, and the duty becomes prohibitory and gives the home manufacturers a monopoly and the liberty, power, and temptation to form trusts and combinations, to reduce any competition among themselves, limit the products of their factories to the consumptive demand at their own prices, and to shut down their factories whenever production exceeds consumption, and thus begin a reduction of consumption, which leads to industrial depression and to lock-outs of laborers and to want, misery, and suffering.

But to establish still more clearly that the consumer pays in the price paid for a dutiable imported article the amount of the tariff duty thereon with the per cent. of profit generally added, I will quote from protectionists whose loyalty to the system can not be doubted. Mr. Clay said, in 1832, in speaking of the public debt:

> It is so nearly being totally extinguished that we may now safely inquire whether, without prejudice to any established policy, we may not relieve the consumption of the country by the repeal or reduction of duties.

If the consumers of the country did not pay the tariff duties, how could their repeal or reduction relieve them?

Ex-President John Quincy Adams, when a Representative in the House from Massachusetts, on May 23, 1832, submitted to the House from the Committee on Manufactures his celebrated report, No. 481, in which he discusses fully who pays the tariff duties, and says:

> But the duty upon the article imported from abroad enabled the domestic producer to enter into competition with the importer from abroad. So long as this competition continues the duty operates as a bounty or premium to the domestic manufacturer. But by whom is it paid? Certainly by the purchaser of the article, whether of foreign or of domestic manufacture. The duty constitutes a part of the price of the whole mass of the article in the market. It is substantially paid upon the article of domestic manufacture as well as upon

that of foreign production. Upon one it is a bounty, upon the other a burden, and the repeal of the tax must operate as an equivalent reduction of the price of the article, whether foreign or domestic. * * *

The incidental effect of competition in the market, excited on the part of the domestic manufacturer by the aggravation of duty upon the corresponding article imported from abroad to reduce the price of the article, must be transient and momentary. The general and permanent effect must be to increase the price of the article to the extent of the additional duty, and it is then paid by the consumer. If it were not so, if the general effect of adding to a duty were to make the price of the article upon which it is levied less, the converse of the proposition would also be true, and the operation for increasing the price of the domestic article would be to repeal the duty upon the same article imported—an experiment which the friends of our internal industry will not be desirous of making. We can not subscribe, therefore, to the doctrine that the duties of impost protective of our own manufactures are paid by the foreign merchant or manufacturer.

This should be absolutely conclusive.

PROTECTION TO AMERICAN LABOR.

The burden of the song of protectionists to-day is the alleged protection of our laboring people against foreign pauper labor.

Our Republican friends assert that a high protection tariff gives higher and better wages to laborers engaged in our manufactures—than they would receive under a revenue tariff—which necessarily affords protection to the extent and amount of the duties or tariff taxes imposed under it.

The Democratic party denies it.

The issue is squarely and fairly made.

The Republican protectionists hold the affirmative, and the Democratic party the negative.

We demand affirmative proof, facts and figures, of protectionists to maintain their position.

What do they offer in the way of proof, facts and figures?

Mr. Blaine points to the low wages, deprivations, sufferings, almost starvation, of laborers in England and Europe, and then points to the happy, prosperous, joyous, and contented condition and high wages of American laborers, and warns the American laborers that the proposed House bill, reducing the average ad valorem rates of duties from 50.60 per cent. to 42.77 per cent., a reduction of 7.83 per cent., will reduce their wages and lower them to a level with foreign laborers and reduce them to a like condition.

In this he only follows in the footsteps of his distinguished successor in the Senate, Senator FRYE, who previously made a tour of Europe, and has ever since been depicting to American laborers the fearful condition of the pauper laborers of Europe, and appealing to them to vote for a high protective tariff to prevent being reduced to a similar condition.

They say that this proposed reduction of the tariff duties will cause many American manufacturers to close, and thus throw out of employment their laborers, or will force these manufacturers to reduce the wages of labor in order to maintain competition with rival establishments in foreign countries employing so-called pauper labor. In support of their first point, that wages are higher in this country than in England, Europe, or any other country, they present many tables of figures, comparing the daily, weekly, monthly, and yearly wages in this country with the wages for like employment in England, Europe, and other foreign countries, and showing higher wages here than in those countries. In reply we say with the greatest pleasure and pride, yes, wages in dollars and cents in this country as compared with wages in foreign countries by the day, week, month, or year are higher, and we intend they shall remain so, if our wise and just policy shall prevail.

But our Republican friends say the high tariff, the high taxes they have imposed upon foreign products, causes and produces these higher wages in this country, and must be maintained to keep the wages up to their present rate. This we most emphatically deny, and demand the proofs that high tariff taxes have either caused or will maintain higher wages here than in foreign countries. Now, what proof do they offer? They fall back upon the one only simple fact, which we gladly admit, that wages are higher here than in foreign countries. The fact of higher wages here we admit. The assumption, the assertion, that protection causes these higher wages we deny *in toto*. In order to expose the glaring fallacy of this mere assertion, let us apply to this one fact and one false assertion the principles of logic.

Before doing this let me state unquestioned facts, which every intelligent American voter must know, that England is called a free-trade country, and that Russia, Germany, France, Italy, Austria-Hungary, Spain, and other European countries have high protective tariff duties on products imported, just as this country has to-day, and that wages, by the day, week, month, or year, compared in dollars and cents, are higher in England than in any other country except the United States, and are higher in France than in any other continental country, and are higher in Germany than in Austria, Spain, or Italy, and that these countries, Spain, France, Italy, Germany, and Austria, are adjoining and contiguous countries, with lines of division and separation such as mark the boundaries of our respective States, with railroads and transportation routes connecting and running into and through them respectively as in our adjoining States. They are, however, separate and independent nations with different languages.

Now, our Republican friends reason thus: Wages are higher in the United States than in any other country. The United States have a high protective tariff, therefore the high protective tariff causes higher wages and must be maintained. The major premise we admit, the minor premise we admit, but the conclusion is false.

Now, apply the same logic to other countries. Wages are lower in Italy than any other European country. Italy has a high protective tariff, therefore a high protective tariff causes lower wages in Italy and must be maintained to keep them lower.

Again, wages are lower in Germany than in England. Germany has a high protective tariff, therefore a high protective tariff causes such lower wages.

Again, wages are higher in France than in Germany. France has a high tariff, therefore the high tariff causes the higher wages. Wages are lower in Germany than in France. Germany has a high protective tariff, therefore this high tariff causes the lower wages. Wages are higher in the United States than in Germany, France, and Italy, and all four countries have high tariffs; therefore, if the high tariff in this country causes the higher wages here, then the same high tariff in each of those countries must cause the lower wages there.

Wages are higher in England than in Europe. England has free trade; therefore free trade causes the higher wages.

If because wages are higher in this country than in England, the high tariff here causes such higher wages; then, because wages are higher in England than Europe, free trade there must cause the higher wages.

Canada and Mexico, our adjoining countries, each have high tariffs and lower wages than in this country. If the high tariff here cause the higher wages, then the high tariff in Canada and Mexico must cause the lower wages there.

In all these cases the major and minor premises are true, but in each the conclusion must be false. The same substantial cause in such adjoining countries can not possibly produce such diametrically opposite effects.

The conclusion is irresistible that a high tariff, high protective duties, can not and do not in this or any other country increase the rate of wages.

But to further expose the fallacy, the falsity of this assumption—mere assertion—that protection, high tariff taxes, increase wages, compare the rates of wages in this country in the different States, and even in different localities in the same State.

Hon. Carroll D. Wright, Commissioner of Labor, in his first annual report, for 1886, shows by numerous tables "the variation in the rates of wages" in the different States and different localities of the same State, and says:

A casual examination of these summaries will show that any attempt to prove an American rate of wages must necessarily result in failure. There is no such thing as an American rate of wages.

The following are examples of the variation in the rates of wages in same kind of work in manufactures in different States and in different localities in same State:

In agricultural implements the average rates of daily wages for males were for "molders," in Illinois, $3.13; in Indiana, $1.65; in Pennsylvania, $1.80; and in Ohio, $2.51. For painters, $2.09 in Illinois, $1.72 in Indiana, $1.50 in Maine, and $2.50 in Pennsylvania.

In cotton goods, for "carders," 85 cents in Delaware, 71 cents in Maryland, $1.26 in Massachusetts, 96 cents in New Hampshire, and $1.20 in New York; for "engineers," $2.50 in Connecticut, $1.50 in Georgia, $2.04 in Massachusetts, $2 in New Jersey, $2.43 in Pennsylvania, and $4.33 in Vermont; for "machinists," $1.50 in Connecticut, $1.83 in Maine, $2.13 in Maryland, $1.47 in Massachusetts, $2.35 in New Jersey, $1.94 in New York, and $2 in North Carolina; and for "overseers," in Connecticut $2.57, in Georgia $3.43, in Massachusetts $2.85, in New Hampshire $4.15, and in New York $2.56.

In "metals and metallic goods," for "puddlers," in Delaware $2.50, in Illinois $4, in New York $2.84, in Pennsylvania $3.47, and in West Virginia $2.75.

In "print works," for "engravers," in New Hampshire $4.28, in New Jersey $2, and in Pennsylvania $3.33.

In "woolen goods," for "carders," in California $1.75, in Vermont $1, in Pennsylvania $2.65, and in New York $1.08; for "dyers," in California $1.87, in Delaware $3, in Maine $1.44, in Massachusetts $1.12, in New Jersey $1, and in Vermont $1.02; for "finishers," in Connecticut 98 cents, in Massachusetts 99 cents, in New Jersey 75 cents, in New York $1.25, and in Missouri $2; for "weavers," in Delaware $1.71, in New Jersey $1, in New York $1.08, in New Hampshire $1.50, and in Massachusetts $1.28.

In different localities in some States—in Ohio in agricultural implements, "plows," for blacksmiths, in one establishment $2.50, in another $2, and in another, $1.75; and such like variations exist in other States. These variations in the prices for the same kind of work exist in foreign countries and in different localities in the same country in about the same degree as in the different States in this country and in different localities in the same State, and they also exist in all the industries, protected and unprotected, here and elsewhere, and the rates of wages here in the unprotected industries are relatively as much higher than in foreign countries as the rates in the protected industries are. Therefore protection can not regulate or increase wages. How

can these facts of the differences in wages in different States and different localities in the same State exist if the tariff duties regulate or increase wages?

Absolute free trade, without restrictions, taxes, or burdens of any kind between all the States and Territories of our great country and among all our 60,000,000 of people is the constitutional policy, and exists while the same tariff duties are uniform in every State. Can the same cause operating uniformly everywhere in this country produce such widely different effects or results? It is absolutely impossible.

This assertion—mere assumption—that protection is specially for the benefit of the laborers, wage-workers, of this country, and not for the benefit and enrichment of manufacturers, is now the main reliance of protectionists, our Republican friends, to maintain the high tariff duties. Hence the frantic efforts to make the voters, the toiling laborers, believe and assent to this assertion. This is comparatively a new subterfuge, a *dernier ressort* of those who advocate high protective duties.

The protective system, high tariff duties, this exotic system, formed and fashioned in imitation of the restrictive, prohibitory systems of foreign nations, practiced by the Celestial Empire and by Great Britain before our nation was born, when civilization and humane efforts for the amelioration of the masses were struggling with barbarism and feudalism, and it was thought to be necessary to shelter and hedge around every industry with the strictest laws, was not transplanted and established and maintained here to regulate or increase the wages of the employés engaged therein, and had no such object in view. On the contrary, it was established for the express purpose of encouraging and protecting manufactures, such manufactories as would tend to render us independent of foreign nations for essential, particularly military, supplies, and of insuring to manufacturers remunerative profits for their investments of capital, and was never intended to be perpetual, but only temporary, as I have already shown, and the fact was admitted and recognized that the tendency would be the reduction of the then existing higher wages in this country to the standard rates in foreign countries.

What are the proofs of these statements? In the tariff law of July 4, 1789, to which protectionists so often refer, the preamble recited:

Whereas it is necessary for the support of the Government, for the discharge of the debts of the United States, and the encouragement and protection of manufactures that duties be laid on goods, wares, and merchandises imported.

And not a word or syllable can be found in that law looking to the protection of American labor or increasing wages.

On January 15, 1790, the House of Representatives, in the Second Congress, ordered the Secretary of the Treasury, Alexander Hamilton—

to prepare and report a proper plan or plans for the encouragement and promotion of such manufactories as will tend to make the United States independent of other nations for essential, particularly for military, supplies.

Not a word or syllable can be found in this order about any plan for protecting American labor or increasing wages. The Secretary, Mr. Hamilton, submitted his report on manufactures, from which I have quoted so largely, and said not a word about protecting American labor against the cheaper or pauper labor of all foreign countries, or increasing the wages of American laborers; but, on the contrary, expressly enumerated as the fourth principal reason, which would make manufacturing establishments beneficial to the country, "the promoting of emigration from foreign countries," which was to be the panacea for the "scarcity of hands and the dearness of labor."

He admitted the fact, then and ever since existing, that wages were higher in this country than in any other, and affirmed that—

in respect to hands for carrying on manufactures we shall in a great measure trade upon a foreign stock.

Import our manufacturing laborers or employés, reserve our own laborers for other pursuits, and thus, by increasing the numbers of those seeking employment, lessen the scarcity of hands and necessarily reduce the wages.

He admitted that protecting duties—

evidently amount to a virtual bounty on the domestic fabrics;

And—

by enhancing the charges on foreign articles they enable the national manufacturers to undersell all their foreign competitors;

And—

wear a beneficent aspect toward the manufacturers of the country;

And that—

as often as a duty upon a foreign article makes an addition to its price, it causes an extra expense to the community for the benefit of the domestic manufacturer.

It is thus clear that the acknowledged father of this British-Chinese protective system urged its establishment and maintenance, not for the purpose of protecting American labor or increasing wages, then, as now, higher in this country than any other, but for the encouragement and protection of the manufacturers and to insure to them remunerative profits.

Mr. Clay, the successor of Mr. Hamilton, in defending and maintaining this protective anti-American system, never urged it for the purpose of protecting American labor or increasing wages. On the contrary, when warned of the results of the high protective system of Great Britain in producing lower wages, pauperism, and vice, and that the same results might follow the transplanting and maintaining of this British system in America, he replied that—

Pauperism is in general the effect of an overflowing population. Manufactures have undoubtedly produced a redundant population.

And that while our waste lands existed they were a security against the abuses of the manufacturing system and the effects of too great a density of population, and would draw off the redundancy, but were—

An impediment in the opinion of some to the success of manufacturing industry by its tendency to prevent the reduction of the wages of labor.

He urged that—

The abundance of capital, * * * the reduction of the wages of labor, and the decline in the price of property of every kind, as well as that of agricultural produce, all concur favorably for domestic manufactures.

He contended that relatively wages were not so much higher here than in England, as was claimed.

The facts, therefore, are that wages were higher in this country before any tariff law was enacted than in any other country, and have ever since remained so, and that this British system of high protective duties was advocated for the benefit of manufacturers, and to promote emigration from foreign countries to compete here with our American labor, to increase the numbers seeking employment, increase the competition, and reduce the wages.

This has ever since been the policy of protectionists—to import the hands to carry on manufactures, to trade upon a foreign stock.

The conclusive evidence of this is found in the enactment of the law of July 4, 1864, entitled "An act to encourage immigration" (volume 13, United States Statutes at Large, pages 385, 386, 387).

This law appropriated $25,000 to carry its provisions into effect and authorized the appointment by the President of a Commissioner of Immigration with $2,500 salary, and section 2 provided:

That all contracts that shall be made by emigrants to the United States in foreign countries, in conformity to regulations that may be established by the said commissioner, whereby emigrants shall pledge the wages of their labor for a term not exceeding twelve months, to pay the expenses of their emigration, shall be held to be valid in law, and may be enforced in the courts of the United States or of the several States and Territories, and such advances, if so stipulated in the contract and the contract be recorded in the recorder's office in the county where the emigrant shall settle, shall operate as a lien upon any land thereafter acquired by the emigrant, whether under the homestead law when the title is consummated or on property otherwise acquired until liquidated by the emigrant.

It was provided in section 3, as follows:

That no person shall be qualified to fill any office under this act who shall be directly or indirectly interested in any corporation having lands for sale to immigrants, or in the carrying or transportation of immigrants either from foreign countries to the United States and its Territories or to any part thereof.

This clearly shows that these contract laborers to be imported were not intended to develop the West or for the agricultural interest, but for the manufacturing interests. This law was not for the protection of American laborers or the increase of their wages, but was in strict accord with the policy of protectionists from the days of Hamilton.

To establish my position still more conclusively, I quote from the speech of Hon. John F. Miller, now deceased, and late United States Senator from California, in the Senate on the 28th day of February, 1882:

The average American manufacturer is interested generally in two things, namely, the highest protective tariff and the cheapest labor. * * * It is not difficult to perceive the origin of that political economy which suggests high protective tariff and at the same time advocates the admission of servile laborers into this country without limit. It means high prices for the products of manufacture and low prices for the labor which produces them; the aggrandizement of capital and the debasement of labor; greater wealth to the wealthy and greater poverty to the poor.

I also quote from speech of Senator JOHN P. JONES, of Nevada, now a member of Senate Finance Committee, made on the 9th day of March, 1882, in the Senate:

I have noticed, Mr. President, that most of those who are in favor of the largest liberty being extended to the Chinese immigrant to this country are also in favor of a tariff—a tariff which has been urged as necessary to protect the American laborer from the degradation of competition with the pauper labor of Europe, as it is usually termed. In reality, if we may judge of their motives by the action of the men who are now advocating a tariff, it was not the American laborer they wished to protect against the pauper labor of Europe, but it was the American capitalist, the lordly manufacturer, that they wished to protect against the free competition of the capitalist of Europe. Our capitalist manufacturer wanted a larger interest on his money than the capitalist of Europe was willing to accept, and he was given the benefit of a tariff.

Let us see how that tariff works. It works in this wise, that everything that the capitalist manufacturer has to sell he sells in a protected market, he sells in a market in which foreign capitalists can not compete with him.

How is it with what he has to buy? For the principal article he has to buy—to wit, the labor of men—he demands free trade in the broadest sense, not only free trade in bringing in laborers of our own race who can soon accommodate themselves to our conditions of life, but the bringing in a class of laborers who have been inured to poverty by thousands of years of training. The capitalist asks the broadest free trade for that, his own market in any event being protected.

Now, how is it with the laborer? Everything he wants to buy he has to buy from his capitalist master in a protected market; everything he has to sell, to wit, his labor (and, unlike the capitalist, he can not hold it away from sale; unlike the capitalist, he can not wait for better times, or travel here and there where he pleases to sell it, but he must sell it every day), he must sell in the openest market in the world. This is the theory in favor of the laborer that the gentleman [Mr. DAWES, of Massachusetts] propounds to us. We reject it, and by this bill propose to bar out this degrading, this shocking competition with our own people. And yet he tells us we are striking a blow at labor, that we are proposing to inflict injury on the laborers of our country.

Ah! sir, when the artisans and laborers of this country shall be made to understand that they are subjected to free trade in labor they will demand as one

of the conditions of their existence that they shall have an open market in which to buy that which they want if it is an open market in which they must sell their labor, the only thing they have to sell. They will never consent to a tariff on bales and boxes and hampers of goods coupled with free trade in human brain and muscle.

The Senator from Massachusetts [Mr. DAWES] told us that he wanted the American people to know that this bill was a blow struck at labor. Yes, sir, it is a blow struck at degraded, underpaid, underclothed, underfed labor, and it is a blow in favor of that fair remuneration which the forces of our civilization up to this hour have decreed that the laborer should get.

Have those who have been the beneficiaries of the protective duties and bounties of the Government carried out in practice this policy of "promoting emigration from foreign countries" and "traded on a foreign stock" of imported laborers? Let the facts and figures answer.

From January 1, 1865, to December 31, 1887, 8,582,077 foreigners, not including any from Canada and Mexico since July 1, 1885, came to our hospitable shores, and from nearly every civilized nation on earth.

The tenth census shows that 2,732,595 hands of both sexes, all ages and nativities, were employed in manufacturing industries, and 3,837,112 of both sexes, all ages and nationalities, were employed in both manufactures and mechanical and mining industries, and of this number 2,611,325 were natives of this country, and 1,225,787 of foreign birth; 284,175 from Ireland, 368,110 from Germany, 225,730 from Great Britain, 44,615 from Scandinavia, 153,935 from British America, and 149,222 from other countries. The percentage of persons, native and foreign, engaged in all and in separate occupations in 1880 are as follows:

Occupations.	Natives.	Foreigners.
	Per cent.	*Per cent.*
All occupations	79.91	20.09
Agriculture	89.40	10.60
Professional and personal services	75.52	24.48
Trade and transportation	74.67	25.33
Manufacturing, mechanical and mining	68.05	31.95

Hon. Carroll D. Wright, in his first annual report as United States Commissioner of Labor, page 245, in commenting on this ratio or percentage of foreigners in manufacturing industries, says:

It will be seen at once that the tendency of immigrants is to assimilate with our mechanical industries. This increases the supply of labor in comparison to the demand, lowers wages, contributes to whatever overproduction exists, and cripples temporarily the consuming power of the whole.

The eighteenth annual report of Hon. Carroll D. Wright, chief of the bureau of statistics of labor for Massachusetts, submitted December 31, 1887, dealing with the unemployed in that State in 1885, shows 816,470 persons of both sexes, all ages and nationalities, engaged in gainful occupations, and of this number 574,881 employed and 241,589 unemployed, the percentage of employed being 70.41 and of unemployed 29.59.

In his analysis, Mr. Wright says:

In other words, a little less than one-third of the persons returned as being engaged in remunerative labor were unemployed for about one-third of their working time; while on the other hand, the working population of the State, considered in their entirety, were employed at their principal occupation for a trifle less than eleven months during the census year.

Of the 241,589 unemployed, 144,553, or 57.37 per cent., were natives of the United States, and 97,036, or 42.63 per cent., were foreign born; the foreign born from Ireland, 46,872; from Canada, English, 2,297; from Canada, French, 15,535; from England, 11,399; Scotland, 2,314; Nova Scotia, 6,091; New Brunswick, 2,407; Germany, 2,592, and from other foreign countries in less numbers, there being some from each of the following countries: Prince Edward Island, Sweden, Portugal, Asia, Africa, Austria, Belgium, British America, China, Cuba and West Indies, Denmark, France, Greece, Holland, Italy, Japan, Mexico, Newfoundland, Norway, Poland, Russia, Sandwich Islands, South America, Spain, Switzerland, Turkey, Wales, and 388 persons from countries not specified.

When the United States granted to the Central Pacific Railroad of California millions of acres of the public doman and $25,885,120 in bonds to aid in the construction of that road, the managers or contractors, by contract with the Chinese companies in California, imported Chinese laborers by the thousand (estimated at ten thousand) to do the work, to displace American labor, and reduce wages.

These facts speak for themselves and show how faithfully the protectionists have carried out the policy of their so-called protection to American labor by the "promoting of emigration from foreign countries" and the importation of laborers from almost every race on earth, civilized and uncivilized, and placing them in their manufactories to compete with American laborers and reduce their wages.

One thing alone—our immense area of unsettled public domain—has thus far saved us from an overflowing population in our manufacturing centers and the inevitable results, reduction of wages, pauperism, and vice. The proof of this statement is found in the report of cotton manufactures by Edward Atkinson in the Tenth Census, wherein he says:

During the last thirty years the factory population of New England has passed through three phases. First came the sons and daughters of the New England farmer; but as the sewing-machine and other inventions opened new demands for women's work, women of American birth passed out to easier or better paid employments, while the men took up other branches requiring more individual skill. These places were taken mainly by Irish, with a few Germans and English. But as the Irish saved their earnings and as the New England yeomen emigrated to the richer lands of the great West, they passed out of the mills to buy up the deserted farms of the poorer Northeastern States, where by their persistent industry and manual labor they achieved success and gained a position which satisfied them, but with which the native New Englander is no longer contented. Their places in the mills are now being more and more taken by the French Canadians, who in their new conditions and surroundings show little of the stolid and unprogressive character which has kept them so long contented on their little strips of land on the St. Lawrence River.

Thus, while our manufacturers have been protected by high duties on all foreign products competing with theirs in our markets, and have practically enjoyed, and now enjoy, a monopoly of the home market, they have been and are practical free-traders in foreign labor and in wages, and have been the importers of foreign laborers from every race and tongue on earth, and have enacted laws to legalize their grinding contracts made in foreign countries with foreign laborers, even making such contracts a lien upon the homesteads of such laborers and all other property, and made the United States to pay the expenses of administering such laws; and have freely and without restrictions—until the law of February 26, 1885, was enacted "to prohibit the importation and immigration of foreigners and aliens under contract or agreement to perform labor in the United States, its Territories, and the District of Columbia"—imported such foreign laborers and placed them in factories and mines to take the place of their former employés at reduced wages.

These facts are known to all, and can not be denied.

Our American laborers, instead of enjoying any increase of wages in protected industries, have all the time been in free, unrestricted competition with the laborers of all foreign nations. Even since the passage of the law prohibiting imported contract laborers the manufacturing and mining bosses have been evading the law and still importing foreign laborers through others.

Their motto is protection against competition in the sale of the products of labor in their monopolized home market and free trade in laborers and their rates of wages.

If the laborers are benefited by protection and their rates of wages either maintained or increased, why do the laborers, who are members of the organized labor associations, such as Knights of Labor and others, receive higher wages as a rule than other laborers not such members? Why does organized labor receive better wages than unorganized? Why strikes of laborers in protected industries to prevent reduction of wages?

Who receive the prices of the sales of the products of protected industries, the laborers or the manufacturers? Who receive the additional or increased prices for which the protected products are sold, the laborers or the protected manufacturers? The manufacturers always receive the prices for which the protected products are sold in the first instance.

By claiming that protective duties are necessary to enable them to pay the present rate of wages they admit they are the beneficiaries of the protection. If they do not, why do they clamor for protection? They receive all the proceeds of the sales of all the products of all their employés.

Unless protection secures to them higher prices for their products it can be to them no benefit, gain, or profit, and is a delusion. If the laborers are intended to be the sole beneficiaries of protection, or even in part, why not so word the tariff laws as to secure the payment direct to the laborers of the whole or some particular part of the increased prices secured by protection?

The protected manufacturers are intelligent, progressive, and aggressive business men. They have large sums of money invested in protected industries, and like all other business men, they work to make as large profits as possible on their investments. They therefore buy the materials for manufacture at the lowest possible prices in any accessible market, and hire or employ the necessary laborers, skilled and unskilled, at the lowest possible prices they can induce them to accept. And in some instances where force can be used to any advantage, armed detectives and police are hired to overawe the laborers into submission to their own terms.

As they purchase materials, so they purchase the labor of their employés, and then sell the products of the laborers and their investments, the manufactured articles, at the highest prices obtainable in the protected market.

The demand for and the supply of the raw materials in the market determine the prices they have to pay therefor.

If there be a surplus of such materials in the market, an excess over the demand, the prices paid therefor are the lowest, and are graded according to the quantity of the surplus. If demand and supply be equal, the prices are fair, average, or general. If the demand be greater than the quantity of such materials in the market, the prices are higher, above the general average.

So it is in the sales of their products. If the demand for such products be greater than the supply or quantity of the products, they can sell the same at high prices, graded according to the excess of the demand over the supply. If the quantity or supply of such products in the market be greater than the demand therefor, they must either hold their surplus or sell at lower prices.

As in the purchase of materials and the sales of the products of the labor and materials, so in the purchase of the labor of the employés, the demand and supply, the number of employers, and the number of those seeking employment, to a very great extent regulate and control the rates of wages, the selling price of labor—the only product the laboring man has to sell—and sell this labor he must or suffer for the necessaries of life. He can not store it away and await an increase of the rates of wages. If there be only one laborer and one employer the laborer can secure a fair price or rate of wages. If there be one laborer and two employers the laborer can secure a higher rate of wages. If there be two laborers and only one employer he secures the laborer at the lower rates. If there be five, ten, or more laborers to one employer in the labor market such employer can almost dictate his own terms or rate of wages; while if there be five, ten, or more employers to one laborer he can almost dictate the rate of wages.

Protection therefore has absolutely nothing to do with the ability of the protected manufacturer to pay the present or increased rate of wages, and is of no possible benefit to the laborer.

All the prophecies of protectionists of dire disasters to the manufacturing establishments and of reduction of wages to follow the passage of the House bill are without foundation. The duties remaining on imported articles of the same kind manufactured here will, as an incident to the revenues they yield to the Treasury, be amply and more than sufficient to enable every healthful, legitimate manufacturing establishment to continue and to prosper and to pay the present and even an increased rate of wages, and not one will be closed by the passage of that bill that will not be closed if the bill never passes.

To show still more conclusively that the high tariff taxes—protection—do not regulate or increase wages, I submit the following statement, compiled from the Tenth Census, showing the value of various manufactured products, the labor cost, the percentage of labor cost, the existing ad valorem high tariff, and the rate proposed in the House bill:

Industries.	Value of product.	Labor cost.	Percentage paid labor.	Present tariff rate.	Tariff rate by House bill.
				Per cent.	*Per cent.*
Carpets	$31,792,802	$6,835,218	21.5	47	30
Cotton goods	210,950,383	45,614,419	21.6	50	40
Bolts, nuts, etc	10,073,330	1,981,300	19.7	59	35
Nails and spikes	5,629,240	1,255,171	22.3	43	34
Iron pipe, wrought	13,292,162	1,788,258	13.5	70	35
Oil, castor	653,900	44,714	6.8	194	97
Oil, linseed	15,393,812	681,677	4.4	54	21
Screws	2,184,532	456,542	20.9	50	35
Wool hats	8,516,569	1,893,215	22.2	54	40
Woolen goods	160,606,721	25,836,392	16.1	70	40
Worsted goods	33,549,942	5,683,027	16.9	68	40

The laborers in all these employments receive much less for labor—not even one-half of the tariff tax—than the amount of the protection secured to the product by this tax. And the rates of wages do not vary in different industries in proportion to the rate of tariff tax or protection afforded in each.

Our Republican friends claim and assert that protection—high tariff taxes—makes the wages of labor high and the prices of their products to the consumers low, and therefore, in the interest and for the benefit of the laborers and consumers, must be perpetuated. This is a pleasing claim, an attractive assertion, and very misleading and false. Analyze it and see the assertion as it really is. The assertion, in other words, is that high tariff taxes make the rates of wages higher and the prices of products lower than they would be under a revenue tariff or without a high tariff; in other words, high tariff taxes compel manufacturers to pay out more money and to increase their expenses, and to take in less money and to decrease their revenues; and therefore the manufacturers will be ruined, unless these high tariff taxes, which so compel them to pay out more money, increase their expenses, and to take in less money, decrease their revenues, are perpetuated.

They appeal, in that way they have so long found effective, to Congress to enact laws not merely maintaining, but largely increasing, the present war-tariff taxes on all imported products which compete with their products in the blessed home market, and blandly claim that such laws are not for their own benefit, profit, or enrichment, but especially for the benefit of the laborers, American labor, and of the consumers of both the imported and home-manufactured products, and when their claim is denied then they assert vigorously that such laws will so operate as to compel the foreign manufacturers and not the consumers of such imported articles to pay such high taxes, and to compel them to pay higher rates of wages to the laborers, and to sell their manufactures at lower prices, to pay out more money, and to take in less money than they could or would without such high tariff taxes, or with a revenue tariff. The falsity and the absurdity of their claims are thus made apparent.

They receive all the proceeds of the sales of their manufactures. Why do they not pay such higher wages to their laborers and sell their products to the consumers at lower prices without any law to compel them to do so? They can if they will, and no such laws are necessary to make them, and if they were they would be useless and inoperative and could not benefit laborers. Labor would still be bought in the market, laborers would still be hired at the lowest rates of wages at which obtainable in the free market.

High tariff taxes, protection to manufactures, can not and do not regulate or increase wages. This must be apparent from the facts I have presented.

But, Mr. President, instead of regulating or increasing rates of wages, high tariff taxes—protection to manufactures—tend to decrease, to lessen the rates of wages. They give the manufacturers a monopoly of the home market, but restrict them, by the taxes on many products used in their factories, from any serious efforts to secure markets in foreign countries.

As I have shown, the steam and water power in our industrial establishments is capable of turning out manufactures far beyond the possible consumption of such articles by our home market. And being restricted from the foreign markets upon equal terms with competitors the manufacturers must either sell at greatly reduced prices or stop production or reduce wages. They have had from 1880 to 1886, both inclusive, high tariff taxes. The results are that during this period there were 22,304 establishments involved in strikes, and 1,323,203 employés striking or involved in such strikes, and of this last number 1,020,156 employés originated the strikes. The employés before the strikes numbered 1,660,835, and after the strikes only 1,635,047, leaving 25,788 employés to seek labor elsewhere. There were 103,038 new employés engaged after the strikes, of whom 37,483 were brought from other places.

Strikes for increase of wages occurred in 9,439 establishments, against reduction of wages in 1,734, for reduction of hours of labor in 4,344, for increase of wages and reduction of hours of labor in 1,692, and for reduction of hours and against being compelled to board with employer in 800. During same period there were lock-outs in 2,214 establishments, involving 175,270 employés, of which 1,753, or 79.18 per cent., were ordered by combinations of managers.

TRUSTS.

In the great manufacturing States of New York, Pennsylvania, Massachusetts, Ohio, and Illinois the number of establishments in such States involved in strikes was 74.84 per cent. of all the establishments so involved in the whole country, and the number of lock-outs in such States was 89.48 per cent. of all lock-outs.

These five States, by the census of 1880, contained 49 per cent. of all the manufacturing establishments of the country.

Why this great strife and contention about rates of wages and these lock-outs by combinations of managers if high tariff taxes—protection—regulate or increase wages?

The figures I have given are taken from the third annual report of Hon. Carroll D. Wright, Commissioner of Labor. He also gives from the best obtainable data the estimated losses, and says:

> The loss to the strikers as given in these tables for the period involved was $51,814,723. The loss to employés through lock-outs for the same period was $8,157,717, or a total wage loss to employés of $59,972,440.

Verily high tariff taxes affect wages, but to decrease, not increase.

REASONS FOR HIGHER WAGES IN UNITED STATES.

Why are the rates of wages in dollars and cents, by the day, week, month, or year, higher in the United States than elsewhere, if high tariff taxes—protection—do not regulate or increase, but decrease or lessen them?

Mr. President, it would require a volume to show fully all the causes operating in this great country to make wages higher than in any other, and I can only briefly name some of these many causes.

First. Our democratic-republican system of governments, national and State, guarantying to every citizen, by written constitutions, civil, religious, and political liberty, perfect equality before the law, in the enjoyment of life and its protection, of property and its acquisition and disposition, and of labor and its fruits, and in the freedom to choose avocations in life and to attain the positions of honor, profit, trust, and distinction, from the humblest to the highest, in national and State governments, in civil and professional pursuits, and securing to the citizens of each State all privileges and immunities of citizens in the several States, and the perfect liberty to go and come at pleasure throughout all our territorial limits.

Second. The absolute freedom of trade and commerce between all our States and Territories and among all our citizens without any restrictions or impediments.

Third. Our immense public domain and territorial limits, extending from ocean to ocean, and through so many degrees of latitude, with such varieties of climate and soil and products, affording cheap homes to all who will choose them, and facilities to all to engage in so many diversified labors and pursuits, and to change from one to another without serious loss.

Fourth. Our systems of public, common, and purely secular schools, open and accessible to the children of all, the rich and the poor alike, wherein mingle on terms of equality the children of all our citizens, without rank, caste, or class distinction, and all can obtain such edu-

cational qualifications as will fit them for the ordinary business pursuits of life.

Fifth. Our higher educational facilities, universities, colleges, academies, theological, law, medical, technical, and other special institutions, open and accessible to all upon easy and comparatively cheap terms, wherein the varied attainments for the diversified pursuits in life can be acquired.

Sixth. The opportunities for safely investing any surplus of earnings and securing its safety and increase, which induce the habit of saving such surplus among all who are laudably ambitious to better their condition and improve their social surroundings and positions.

Seventh. The absence of a large standing army and freedom from its onerous burdens, its blood tax, and compulsory service in it.

Eighth. Our encouragement of the inventions of new and novel devices by our liberal system of patent laws, granting an exclusive monopoly of the right to inventors for a given term of years to use and make and sell such devices and the patent-rights thereto, which have led to so many useful mechanical and other inventions wonderfully increasing the powers of production beyond the power of the muscular labor of our entire population by utilizing and appropriating the combined powers of coal, steam, electricity, and machinery in production.

Ninth. The versatility, quickness, and power of our citizens to adopt the easiest and quickest means to accomplish the best ends, the largest results. That our citizens, native and foreign, have acquired, and very quickly acquire after becoming adopted these last advantages, can not be disputed, and these advantages result largely from the causes I have named which make our wages higher than in other countries. But the rate of wages of labor must not be measured by the dollars and cents paid therefor by the day, week, or month, but by its efficiency, its productive power, the cost of its product.

One man working by the day at $1 may cut and split 75 fence rails, another at same price 100 rails, another 125, another 150. Their daily wages are the same to the employer, but the cost of the product to the employer is very different. In the first case the rails cost him each 1⅓ cents, in the second 1 cent each, in the third four-fifths of 1 cent, and in the fourth two-thirds of a cent, or just one-half of the amount paid to the first hand; and measured by efficiency, productive power, cost of production, the fourth laborer was worth two laborers of the first one. This example only illustrates in a simple manner the real value of laborers to the purchaser, the employer. Any farmer having timber to be made into rails and seeking to purchase or hire the labor to make the rails could and would, if he knew the efficiency of the first and last named laborers, give the last $1.50 per day in preference to the first at $1 per day. So it is in all kinds of labor, skilled and unskilled. Measured by the value of labor to its purchaser or employer by its efficiency, its productive power, and the cost of its product to the employer, the rates of wages in this country by the day, week, or month are no higher to the employer, the manufacturer, than in other countries where much lower rates prevail.

Hon. Carroll D. Wright, in his sixteenth annual report as chief of the bureau of statistics of labor in Massachusetts, says:

> We venture the suggestion, however, that it is the sum of wages and not the rate which constitutes the true money standard of cost of labor, and we carry this suggestion to its logical outcome in the following proposition: In proportion as capital, through machinery, becomes more effective, the relative number of laborers is decreased in proportion to product, the rate of wages is increased, and the sum of wages is reduced; that is, lower cost is compassed by higher wages.

It is a settled fact, in my judgment, that can not be gainsaid, that high wages to the laborer are cheap wages to the employer or purchaser, higher wages cheaper wages, and the highest the cheapest wages. And low wages to the laborer are dear wages to the employer, lower wages dearer wages, and lowest wages dearest wages. And that the product of the highest paid labor to the employer, the manufacturer, is the cheapest. And while he pays such high rates of wages he secures a cheaper and better product, which he can sell in the market at a greater profit; therefore our high wages are not the result of protection, high tariff taxes, but of the efficiency, the productive power of the laborer and the low cost of its production. That our American labor is more efficient and productive than labor in other countries I will prove by protectionist authorities. Hon. WILLIAM M. EVARTS, when Secretary of State, in his report to Congress on the state of labor in Europe, submitted May 17, 1879, said:

> The average American workman performs from one and one-half to twice as much work in a given time as the average European workman. This is so important a point in connection with our ability to compete with the cheap labor manufactures of Europe, and it seems at first thought so strange, that I will trouble you with somewhat lengthy quotations from the reports in support thereof.

Hon. James G. Blaine, while Secretary of State, in his letter of June 25, 1881, submitting to Congress his report called "Cotton-goods trade of the world and the share of the United States therein," No. 12 Consular Reports, said:

> The wages of spinners and weavers in Lancashire and in Massachusetts, according to the foregoing statements, were as follows, per week:
> Spinners: English, $7.20 to $8 40 (master spinners running as high as $12); American, $7.07 to $10.30.
> Weavers: English, $3.84 to $8.64, subject, at the date on which these rates were given, to a reduction of 10 per cent.; American, $4.82 to $8.73.
> The average wages of employés in the Massachusetts mills is as follows, according to the official returns: Men, $8.30; women, $5.62; male children, $3.11; female children, $3.08. According to Consul Shaw's report, the average wages of the men employed in the Lancashire mills on the 1st of January, 1880, was about $8 per week, subject to a reduction of 10 per cent.; women, from $3.40 to $4.30, subject to a reduction of 10 per cent.
> The hours of labor in the Lancashire mills are fifty-six, in the Massachusetts mills sixty, per week. The hours of labor in the mills in the other New England States, where the wages are generally less than in Massachusetts, are usually sixty-six to sixty-nine per week.
> Undoubtedly the inequalities in the wages of English and American operatives are more than equalized by the greater efficiency of the latter and their longer hours of labor. If this should prove to be a fact in practice, as it seems to be proven from official statistics, it would be a very important element in the establishment of our ability to compete with England for our share of the cotton-goods trade of the world.
> From these returns it is seen that every American spindle consumes 66 pounds of raw cotton, while each British spindle consumes only 32 pounds, or less than one-half the American consumption per spindle.
> It thus appears that each American operative works up as much raw material as two British operatives, turns out nearly $1.50 worth of manufactures to the British operator's $1 worth, and even in piece goods, where the superior quality and weight of the American goods are so marked, the American operative turned out 2.75 yards to 2.50 yards by the British operative.

Mr. Charles S. Hill, a staunch protectionist, who in 1882 was statistician of the State Department and represented the Metropolitan Industrial League of New York, appeared before the Tariff Commission on October 20, 1882, and made the following statement (see Tariff Commission report, 1882, volume 3, page 1688):

> One point further in regard to labor in Europe vs. America. Here are some figures that show a remarkable, but what seems to be an irrefutable fact, or let him who questions it produce further evidence. The following comparison speaks louder than any argument.

Manufacturing industries.

Description.	United States.	Great Britain.
Hands employed	5,250,000	5,140,200
Value of product	$8,000,000,000	$4,000,000,000

> Here is the positive proof that American mechanics in the aggregate accomplish exactly double the result of the same number of British mechanics. They are therefore very justly paid double in wages.

The efficiency of labor, its productive power, has been most wonderfully increased by the aids of coal, steam, electricity, and machinery, and the rates of wages have necessarily increased, but not in proportion to the increase of efficiency and productive power, and the labor cost in the product has been greatly decreased. Hence the higher wages and lower priced products. Numberless examples could be given in every branch of manufacture, showing the increase of the efficiency of labor, or in the amount of work done in each day by each hand with the aid of machinery, and steam, water, or electric power, and the reduced cost to the manufacturer of the articles so produced daily, and consequently reduced selling price.

Who are the beneficiaries of high tariff taxes of protection? If those engaged in the manufacture of the kinds of articles upon which a tarift tax is imposed when imported from a foreign country are not the beneficiaries of such high taxes, why do they demand their imposition? If the high tariff taxes imposed upon a foreign manufactured article when imported do not enable the home manufacturer of similar articles to sell his articles in the home market at a price just below the cost of the foreign articles with the tariff taxes added, why does he want any such tariff tax imposed?

If the high tariff taxes do not increase or add to the total cost and the selling price in our market of the imported article, how can they lessen, reduce, or prevent the competition of the imported article in our home market with our home manufacture? How can the home product be protected from competition? Those engaged in the manufacture or production of the class of articles upon which the high tariff taxes are imposed when imported are the sole beneficiaries of such taxes, aside from the revenues paid into the Treasury, coming only from the imported articles.

If they do not receive the benefits, no one does. Take a piece of cloth costing at the factory in the United States $100, and at the foreign factory $95. The foreigner can send his cloth to our market and sell it—there being no tariff tax—at the cost of the American cloth, and make a profit, less freightage, etc., of $5.

Now, impose a tariff tax of 6 per cent. ad valorem on the imported cloth, and the total cost here will be $100.70 when the home and foreign manufacturers are practically on equal terms in our market. Increase the tariff to 15 per cent. ad valorem, then the foreign cloth pays the duty, $14.25, and costs here $109.25, and the home cloth can be sold at just a little less, say $108, and make a profit of $8, or 8 per cent. Increase tariff to 30 per cent., then foreign cloth is subject to $28.50 tariff, and costs for sale here $123.50. Our home cloth can be raised in price to $120, or 20 per cent. profit. Increase to 50 per cent., then foreign cloth pays $47.50 tax, and costs $142.50. Then home cloth can be raised to $135 or $140, or 40 per cent. profit. Increase tax to 100 per cent., foreign cloth costs here $190, and Americans can sell just below that amount. A tariff tax so high as to make all sales of foreign goods in our markets entail a loss upon importer, whoever he may be, simply amounts to a prohibition of the import of such article.

Our Republican friends argue that the effect of protection, high taxes

on imports, is to cheapen the prices of the home products to consumers, and therefore results in benefit to them. This is a fallacious and misleading argument, and assumes that because a certain fact exists—that is, the reduced selling prices of all manufactured products in this country—therefore protection, high taxes on imports, has caused it. In other words, the prices of manufactured products in the United States have greatly fallen. The United States have a high tax on imports—a protective system. Therefore protection has caused the fall in the prices. Test it by England. The prices of manufactures have greatly fallen in England.

England has free trade.

Therefore free trade has caused the fall in prices. If protection has caused the fall in prices here, then equally must free trade have caused the fall in England. High tariff taxes—protection—have had nothing whatever to do in causing the fall in prices of manufactures here or elsewhere. Prices of all kinds of manufactured products, protected and unprotected just alike, in the United States and in all the countries of the world accessible and open to commerce, to trade, have very greatly fallen. The fall has not been in the United States alone.

The cause of such fall in prices is apparent. It has been the efficiency, the increased efficiency and productive power of human labor, aided by and intelligently and skillfully controlling and directing the powers of coal, steam, electricity, and machinery. Each man with such aids of power and machinery performs a vastly increased amount of work, can raise more wheat, corn, and farm products; can make more boots, shoes, hats, coats, pants, and all other articles of all kinds and classes, and the cost of such articles is much less, and consequently the prices much lower.

The efficiency of labor and its increased productive power have had the same effects, have produced the same results in all industrial pursuits regardless of tariffs.

How can high tariff taxes imposed on imported products, the articles themselves, and added to and becoming an integral, inseparable part of the total cost of such articles thereafter, regardless of the persons who may import, sell, or resell them, make similar articles manufactured here sell at lower prices? The claim is farcical.

The tariff duty imposed on an imported article is paid into the Treasury before it can be taken out of the Government warehouse, and thereafter forms a part of the selling price of such article.

The manufacturer here adds to the selling price of his product an amount which will make such price just a little less than the selling price of the import, and the purchaser of such article pays such amount so added in the price he pays and the manufacturer puts such amount into his pocket.

If he does not do this, then of what benefit is protection to him? What is the object of protection? If it fail, then protection is a failure. But our friends say: "Look at this article and at that article, they are actually selling in the home market for less than the amount of the tariff duties on such imports." Yes; such things have occurred, and will probably occur again; but high tariff taxes—protection—was not the cause of such things directly or indirectly. Such claim that protection caused such reductions is without foundation in fact, and can not be established by any legitimate proof. Years ago lead was selling in this country at a price considerably less than the amount of duty imposed thereon on importation, and, as a matter of course, none was imported. The tariff duty did not cause this reduced price.

The reduced price was caused by the great excess of lead in the market for sale over and above the demand and other causes, such as cheapness of production, etc., and the tariff was inoperative. The principle and the object of protection, high taxes, are as I have stated. To all general rules there are exceptions. Competition between rival establishments may cause a very great reduction, a cut in prices, just as so often occurs between our railway lines. Overproduction, a surplus of products beyond the demand, the consumption, may reduce prices. Industrial depressions will also reduce prices. Bad management and the failure of large establishments with heavy stocks of products to be thrown on the market suddenly will reduce prices. These are some of the incidents which attend protected industries as well as others, and are exceptions and not the rule.

Think seriously for one moment about this claim of manufactured products being so reduced in price. A sane, responsible, and intelligent American manufacturer, with large amount of capital invested in machinery for manufacturing woolen cloth, deliberately asks Congress to pass a tariff law imposing high taxes upon all imported woolen cloth, so that he, in the operations of such law, may be constrained or compelled to sell his product, so protected by such taxes from competition in our home market, for a less price than he could or would with only a revenue tariff or without any tariff!

How farcical! This statement only shows the fraud and false pretense of any such claim.

In order to show beyond any question that the protected manufacturers are the sole beneficiaries of the high taxes, I will quote some protectionist authorities.

Ex-President John Quincy Adams, in his report on manufactures before referred to, said:

The doctrine that duties or impost cheapen the price of the articles upon which they are levied seems to conflict with the first dictates of common sense. But its supporters first appeal with confidence to the fact that most of the articles upon which additional duties were levied by the tariff of 1828 have since that time considerably fallen in price, and then they argue that it must be so by the excitement of competition in the market. It is certainly contrary to the natural course of things that an addition to the cost should be a reduction of the price of an article. True it is that the duty gives a spur to the production of the article at home. The price of any article in the market must always depend upon the relative condition of the demand and supply at the time and place of sale. But very slight variations of time or place affect often to a very great extent the relative proportion of the demand and supply, and consequently the price of the article. No safe conclusion can be drawn from the fact that subsequent to the tariff of 1828 the prices of the articles upon which the duties were then increased have fallen, unless from other circumstances it can be shown that the increase of the duty was the cause of the fall in price, nor will it be sufficient to prove so strange a paradox to account for it by the excitement of competition. Wherever there is a profitable market there will be competition. Had the tariff of 1828 never been enacted the competition in our markets would have been as great and would have been as effectual to reduce the prices as it has been with the aggravation of duties. In that competition our own manufactures might not indeed have shared, but it would have existed in all its force between those who furnished the supply, and could not have failed to reduce the prices to the level of the moderate profit necessary to the existence of the trade.

James P. Foster, president of the Republican League of the United States, wrote a confidential letter, dated May 23, 1888, headquarters of the Republican League of the United States, New York, and sent it in confidence to leading Republican manufacturers. It therefore contains the confidential, personal views and knowledge of Mr. Foster and the gentlemen to whom he refers. The following are extracts therefrom:

It may not be of your personal knowledge, but it is a fact nevertheless, that the manufacturers of the United States who are most benefited by our tariff laws have been the least willing to contribute to the success of the party which gave them protection, and which is about to engage in a life and death struggle with free trade.

A Republican United States Senator, from a State which never had a Democratic representative in either House of Congress or a Democratic State officer, in speaking of the well-known disposition of the manufacturing interest to lock up its money, fold its hands, and look on while somebody else fights for its success, says:

"The campaign which we are about to enter will concern, more than anybody else, the manufacturers of this country. They have heretofore been very laggard in their contributions to the Republican cause. In fact, if I could punish them without punishing the cause of protection itself, I would consign them to the hottest place I could think of on account of their craven parsimony. If this class of people do not care to contribute to the success of the Republican party they are welcome to try their chances under a Democratic administration. I can stand it as long as they can." And again: "I was solicited to contribute to a protective-tariff league, and I replied that if the manufacturers of the United States in their associated capacity were an eleemosynary institution that I would vote to give them a pension, but that I did not propose myself to contribute money to advance the interests of men who were getting practically the sole benefit, or at least the most directly important benefits, of the tariff laws. I am in favor of protection; not precisely the kind we are having, but I might be willing to keep even that rather than not to have any; but I am sure I can get along without any of it fully as well as the manufacturers can, and if they think the Republican party is going to maintain a high protective corps for this benefit, and that the men who do the work in that party are going to keep up the expenses of a campaign out of their own pockets, leaving them to reap the fruits of the tariff policy without any deduction for political expenses, they are very greatly mistaken. I understand that in a general way the manufacturers of New England have been more liberal in their contributions than those of Pennsylvania.

"In fact, I have it from the best possible source that the manufacturers of Pennsylvania, who are more highly protected than anybody else, and who make large fortunes every year when times are prosperous, practically give nothing toward the maintenance of the ascendency of the Republican party. Of course, I shall not violate what I consider to be a proper principle of action; but, if I had my way about it, I would put the manufacturers of Pennsylvania under the fire and fry all the fat out of them. If the Mills tariff bill comes to the Senate there will be some votes cast there which will open the eyes of some of these people who have, while gathering their millions, treated the Republican party as their humble servant."

These are strong words and bitter, but they are true, and it now remains with you and your associates to determine whether they are to be reiterated after this campaign is over, and protection has, through your apathy, been struck its death-blow. If you give us the means to win the victory we will do it. Are you willing?

Yours, very truly,

JAMES P. FOSTER, *President*.

I now hold in my hands Tariff-League Bulletin, devoted to the protection of American labor and industries, volume 1, No. 23, New York, June 8, 1888, in which is an editorial commenting on Mr. Foster's letter. I read the following extracts therefrom:

The Republican party is unfortunate in its friends. In 1884 it was defeated by the indiscretion of one who persisted in entertaining its candidate at Delmonico's, and by the over-enthusiasm of another, whose alliteration was trumpeted by a hostile press to every hamlet in the Union where a Catholic vote could be reached.

Now it is a "confidential" letter issued from the "headquarters of the Republican League of the United States," and so confidentially circulated that it has received flattering attention from every Democratic editor in the country.

The Chicago Times pronounces it "one of the most sensational political documents ever issued in this country."

It would be useless to criticise the tone of this "sensational document," or the temper with which it assails American manufacturers, in words which it says "are strong and bitter, but they are true." And we will not here comment upon the unfortunate policy of the letter, which enforces a peremptory demand for money with a threat.

It is important at this time only to review the charges against American manufacturers, which are the bone and sinew of this "confidential letter" without which it would receive from us no comment whatever. They are quoted, it is true, from an eminent Republican Senator, but they are quoted with approval, and declared to be true.

These charges, when stripped of their discreditable verbiage, are, first, that the "campaign which we are about to enter will concern, more than anybody else, the manufacturers of the country"—"men who are getting practically the benefits, or at least the most directly important benefits, of the tariff laws." And, second, "that while reaping the fruits of the tariff policy they have been

very laggard in their contributions to the Republican cause." Their conduct is called "cravenal parsimony." The New England manufacturers, it is said, have been somewhat less parsimonious than the others. But of Pennsylvania manufacturers it says, in language both vigorous and picturesque:

"If I had my way about it, I would put them under the fire and fry all the fat out of them." * * *

But while manufacturers derive no greater advantages from protection than other classes in proportion to the magnitude of their enterprises, they nevertheless do contribute far more than all other classes to its support. The records of the Republican party prove it. Those who have been engaged in collecting funds for its defense will testify to it. We therefore deny the assertion of the Senator whom the Republican League has chosen for its mouthpiece, and we affirm that more than three-fourths of all the money used in support of Republicanism and protection has come from men directly or indirectly engaged in manufactures.

Facts might be adduced to defend the manufacturers of Pennsylvania from the charge which, in the Republican League document, has been especially made against them. But it is unnecessary. The absurdity of the charge is so apparent that the wonder is that any one holding an important position in the Republican party could have been found to make it.

I submit, Mr. President, with these facts before us, certainly no one can doubt that the business men, not the politicians, who are engaged in protected industries, know what they put in their pockets by the reason of high tariff taxes and how much they can afford to pay out of their profits to perpetuate Republicanism. What is the amount? "More than three-fourths of all the money (the millions of dollars) used in support of Republicanism and protection has come from men directly or indirectly engaged in manufactures." They are the beneficiaries, or they never would pay out such vast sums to perpetuate a system which was of no financial benefit to them.

While the persons engaged in protected industries are the sole beneficiaries of high tariff taxes imposed on imported competing articles, and the consumers, the purchasers of their protected products, pay to them the enhanced prices they are able to command in their monopoly of the home market, and the Government receives no part of such enhanced prices as revenue, the country at large, the masses of the people, and all other industrial enterprises are the sufferers. I assert as an indisputable proposition, principle, that no taxes, no system of tariff taxes, or other kinds of taxes can enrich any nation or people or increase the general wealth.

Taxes may be so imposed as to enrich one class or portion of the people, those engaged in particlar avocations not so taxed, but when so imposed they decrease the wealth of all other classes and avocations; and nothing is added to the general wealth. Peter is simply impoverished to enrich Paul. This is the inevitable result—nothing more, nothing less, and nothing else. Taxation is a burden. High tariff taxes induce an unnatural, abnormal flow of capital into the protected industries by reason of the promised large profits. Other fairly remunerative employments are abandoned. The employés in these are left without labor and thrown upon the labor market for employment.

Coal, steam, electricity, and machinery have all been made obedient laborers in production until our manufacturing establishments can largely more than supply our home market of consumption. An unhealthy rivalry ensues; cuts in prices, as in the rivalry of railroads, follows. The markets are deranged, business unsettled, and establishment after establishment fails or closes. Laborers are thrown upon the labor market; cuts or reductions in the wages result; strikes or lock-outs follow. Having the monopoly of the home market and consumption decreasing, a glut in the market is produced, and the surplus is shipped to some foreign country and sold at greatly reduced prices, and the markets there deranged. As soon as the home market recovers and prices rise, the same process is repeated. It is an abnormal, unnatural, hot-house condition.

To settle these facts beyond dispute I will read extracts, as follows:

Hon. James G. Blaine, in his report on the cotton goods trade of the world, to which I have already referred, commenting on the decrease of trade with China, said:

Our manufacturers, whenever a lull occurs in the home demand, use most commendable efforts for the enlargement of their trade in the various countries, but the moment a brisk home demand again arises they immediately withdraw from foreign markets to the great annoyance of and losses to their correspondents, who enter into their new business relations believing in their permanence.

The persistence of such practical merchants and the manufacturers, as those of the United States are wont to consider themselves, in such a grave commercial mistake as this is surprising both to our business correspondents and to our competitors for the world's trade, and an immediate reformation is demanded if we would hope to assume a permanent and leading place in international commerce.

In commenting on the trade with Australia, he quotes from Consul-General Spencer, at Victoria, as follows:

From information received at this consulate from merchants who were formerly engaged in importing cotton goods directly from America, it appears that some years since such goods were decidedly popular in this market and in good demand, but the importers, who draw their supplies directly from New York and Boston, soon found that the wholesale dry-goods merchants in this city were able to undersell them, the latter having purchased the same brand of goods in London at lower prices than were current at the same date in the American markets. The importers naturally inferred that these goods, representing the surplus stock of American manufacturers, had been "slaughtered" or sacrificed in the London market with a view of maintaining prices at home.

He quotes from Consul Winser, at Sonneberg, Germany, as follows:

Again, it is said that our manufacturers produce more goods than they can well dispose of, and unsettle the trade by filling each succeeding order at a lower price.

Finally, having overstocked the market, some cases are cited of manufacturers who have established sales-rooms in Germany themselves and disposed of their wares at prices far lower than their former largest customers could afford to sell, often on long credit. In many branches of manufacture traveling agents of American houses sell their wares to retailers at the same rates which wholesale dealers have been required to pay, thus cutting the ground from under the feet of the latter, to whom is due the credit of having introduced, after infinite pains and trouble, these very goods to the German people.

He quotes from Mr. Pickering, United States commissioner to the Melbourne exposition, Australia, as follows:

The great natural resources of Australia are too great to allow the present depression to be anything but temporary. It would be well for our manufacturers to bear this in mind, and those who have or who desire to have a share of this Australian trade should assure the merchants here that they may rely on being supplied with goods at the sacrifice (if necessary) of a few home orders. I am the more impressed to urge this, having just been shown a letter received by the agent of a Philadelphia firm who are exhibiting here, from which I quote: "Send us no more orders at present; our home demand prevents us filling foreign orders for some time to come."

In speaking of the field open to our cotton manufacturers he says:

It is estimated that the Chinese supply themselves with cotton goods manufactured by hand-looms, in their primitive manner, to the extent of over 7,300,000,000 yards annually, an amount almost equal to twice the total annual exports of cotton piece-goods from Great Britain. * * *

The cotton-goods trade of the world is a vast subject, and requires the best consideration of American manufacturers, united consideration to be followed by united action; but if the same masterly direction of forces be applied toward its diversion to the United States as has been applied by the statesmen and manufacturers of Great Britain to the development of their trade, the world offers a field large enough for the consumption of all the manufactures we can produce, even were our entire product of raw material converted into American cloth, instead of being exported in such large quantities as it is at present.

I quote from a speech of ex-President Garfield in the House, May 13, 1872, who said:

And I know, moreover, that for nearly two years the wholesale price of American salt in Toronto, Canada, was $1 lower per barrel than the same salt was selling for on the New York side of the lake. That is, we produced it, shipped it across, paying whatever portage, freights, and transportation were required, and then sold it to our Canadian neighbors at $1 per barrel less than it was sold to people on our shores. Certainly, gentlemen will not want a duty continued that enables that thing to be done.

I now quote the following consular report:

No. 67.] UNITED STATES CONSULAR AGENCY,
London, Ontario, September 15, 1888. (Received September 18.)

SIR: In reply to the circular of the Department of State, dated September 4, 1888, requesting information as to imports of agricultural machinery and tools from the United States into Canada, inquiry elicits the following facts:

I find that plows of American manufacture are among the most prominent of the imports in this line. The Oliver chilled plows (made at South Bend, Ind., and the one, I am told, that has the largest sale in the United States), the Syracuse plow, and the South Bend plow seem to be most in demand and to have the largest sale. I have before me on my desk an offer from an Ontario dealer in the Oliver plows to sell same f. o. b. at this city in Canada for $10 each in quantities. The retail price here is $12, and numerous transactions take place at that figure.

The same plows, I understand, are sold in quantities at the factory (not for export) at $14 each, and cost the American farmer at retail $16.

The Syracuse plow retails at $11 or $12 here, and, I am informed, sells for from $14 to $16 in the United States at retail, and the South Bend at $11 here and $14 at home.

It is pleasing to observe how cheaply our manufacturers must be able to turn out these goods, from the fact that the Canadian duty on this class of goods is 35 per cent. ad valorem. Even admitting that the manufacturer makes no profit on his sales in Canada, these figures are of interest:

	Per plow.	
Price at which plow is sold in Canada		$10.00
Duty at 35 per cent. ad valorem and freight	$3.50	
Profit to Canadian dealer, probably	1.50	
		5.00
Leaving actual cost to manufacture		5.00
Retailed to American farmer at		16.00
Profit to manufacturer on all home sales		11.00

It would thus seem that the Canadian farmer has an advantage over his American neighbor in the purchase of necessary implements produced in his own country, and the latter before purchasing his plows might well figure as follows:

Price of plows at retail in United States		$16.00
Price of same in Canada	$12.00	
Freight to return same to United States (duty is free on American goods returned)	1.00	
		13.00
Profit to American farmer by purchasing American-made plow in Canada		3.00

Plows with tempered steel mold-boards and beams, which sell in the United States for $17 and upwards, are manufactured in Canada (from Pittsburgh steel on which duty has to be paid, and the wages of the workmen are substantially the same as in the United States), and are sold for $14 retail; thus showing excess of profit made by American manufacturing over Canadian manufacturing, $3 on each plow. When it is considered that the Canadian manufacturer has to pay a duty on his materials and freight upon same to Canada from Pittsburgh, it will be readily seen at a glance that the excess of profits to the American over the Canadian manufacturer is much greater than the sum named, $3.

I am credibly advised by a very prominent Canadian farmer that he has just bought an American self-binding reaper (Walter A. Woods) for $110. Laid down in an American city near the lines, the price of same machine in same place to an American farmer would be from $150 to $170.

In addition to the larger implements mentioned, farmers' or agricultural hardware imported from the United States consists of light shelf goods, dry paints, whilst agricultural hand-tools, (such as spades, shovels, forks, etc.) on which articles the duty varies from 35 to 70 per cent., although the printed tariff reads only from 30 to 35 per cent. This Government has, however, instructed its customs officers to advance prices on invoices in certain lines, which brings the duty up to a very high rate. Thus, on scythes, for instance, by means of a specific and ad valorem duty they have to pay from 60 to 70 per cent.

Notwithstanding these tremendous charges, a careful comparison of the wholesale and retail prices of the above tools shows that in all cases American goods can be bought in Canada as cheap, and in many cases cheaper, than in the United States.

It is conclusively proven by these facts that the American farmers are not receiving the full benefit of the low prices at which these goods can be produced in the United States These benefits are apparently reserved for the Canadians and other foreigners to whose markets we export goods; but existing conditions enable the American manufacturer to compel the purchase of his goods by the American farmer at exorbitant profits.

So great has been this discrimination by American manufacturers in favor of foreign purchasers that the Canadian customs authorities have come to regard with suspicion the prices on nearly all American invoices, as they can not understand why these goods should be sold to Canadians at such great reductions from the prices at which they are sold at home at the point of manufacture. As a consequence they have, during the past two years, largely adopted the plan of appraising these goods for duty at the home figures in preference to the prices stated in the invoices. For in-tance, an American manufacturer may be willing to sell a certain article for $5 to the Canadian trade, the price for the same article at home being $8. The valuation is placed at the latter figure, and even though he sells for the former the purchaser has to pay duty on $3 more than the goods cost him. The result of this practice is that we are losing our export trade to this and probably other foreign countries.

The falling off of the American export trade to this port on dutiable articles in one year having been $211,058.

The short-sightedness of our manufacturers in this respect, no less than the development of manufacturing in Canada, is closing this as it does other outside markets to our goods, and is driving us back to trade only within ourselves, to the injury of our great agricultural interests, to the reduction of the wages of our workingmen, and to the lessening of the products of our factories.

Replying thus to your circular by an enumeration of facts, I remain, sir,

Your obedient servant,

WM. DE H. WASHINGTON,
Commercial Agent.

HON. GEO. L. RIVES,
Assistant Secretary of State, Washington, D. C.

I now read a letter from Mexico:

OFICINA DE L. LADNER Y HNO.,
COMMERCIANTES EN ESTUFAS, FERRETERIA Y OJALATERIA,
Piedras Negras, Mexico, August 9, 1888.

DEAR SIR: Yours of the 2d at hand. In reply take pleasure in giving you the figures asked for as nearly as possible. First, in regard to shovels. Our shovels bought for our Eagle Pass store cost us about $6 per dozen, exclusive of freight. Our shovels of the same class and material cost us laid down in Piedras Negras $2.91 per dozen. Another item: Agate ironware can not be bought for delivery anywhere in the United States at better than 35 per cent. discount. In Piedras Negras we can buy the same articles from the same houses at 60 per cent. discount. The list is the same in both cases. These are not the only articles. Disston's saws can be bought with an additional 20 per cent. discount, showing that the manufacturers could sell in home markets in competition with the outside producers. These figures are only a partial list. Every article known to the hardware trade can be bought from the American manufacturers for export cheaper than they can for home consumption. Hoping this will answer your purpose, we remain,

Very truly, yours,

A. J. LADNER & BRO.
Per H.

Mr. WALTER NEGLEY, *Hagerstown, Md.*

These extracts show conclusively the results from high tariff taxes, which the Senate substitute proposes to increase, and in some instances to the point of prohibition of imports.

A healthful competition with imported products in our home market is as necessary and beneficial to manufacturing interests as to all others.

Ex-President Garfield in the House, on April 1, 1870, in discussing the high tariff taxes, said:

I hold that a properly adjusted competition between home and foreign products is the best gauge by which to regulate international trade. Duties should be so high that our manufacturers can fairly compete with the foreign product, but not so high as to enable them to drive out the foreign article, enjoy a monopoly of the trade, and regulate the prices as they please. This is my doctrine of protection. If Congress pursues this line of policy steadily we shall year by year approach more nearly to the basis of free trade, because we shall be more nearly able to compete with other nations on equal terms. I am for a protection which leads to ultimate free trade.

This competition can never exist under the existing war tariff or the Senate substitute.

I do not seek to destroy or break down or injure our manufacturing interests. The House bill will not do it. I desire to see them prosper and grow. And would to God to-day that they could and would manufacture and supply our entire home demand at fair and legitimate profits and prices with all such articles as can be successfully manufactured here. No one country can produce and manufacture every article of human want.

As rich as we are in the varied products which supply our wants, we can not successfully and profitably, now or in the future, confine our wants to our own supplies and consume them. We will produce many surplus articles wanted in foreign countries, and will want many surplus products of other countries. In order to sell our surplus, we must buy. A revenue tariff, such as the House bill provides, will be more healthful and beneficial to our manufacturing and all other industries than the Senate substitute. The House bill will afford all the incidental protection to our manufacturing interests which they ought to ask, and at the same time reduce the surplus.

THE TARIFF LAW OF JULY 30, 1846.

Why will some of the highly protected industries not learn by the history of the past?

In 1824 the tariff taxes were increased; the greed for large gains was not satisfied. In 1828 the tariff of abominations was enacted, largely increasing the burdens of high taxes.

What did the manufacturers do?

Remember what Mr. Clay said. They saw the reaction, the sober second thought of the people. The situation was similar to the present. There was surplus, the debt was nearly paid, and the surplus threatened a constant increase beyond all the legitimate necessities of the Government.

Did they then propose the policy of the Republican platform and the Senate substitute—to increase the tariff taxes still higher, so as to exclude imports, and by such prohibitory taxes decrease the revenues?

Mr. Clay, in the language I have quoted, shows that they appealed to him to save them by reducing the high-tariff taxes. He presented and passed his compromise bill providing for a gradual reduction of duties to an ad valorem rate of 20 per cent. and declared his measure many years afterward to afford ample and abundant protection.

In 1842 the duties were increased and reaction again ensued, and resulted in the enactment of the Walker tariff of July 30, 1846, which imposed an average ad valorem tax of 25 per cent., 17 per cent. less than the House bill.

This law, this tariff rate of 25 per cent. proved so satisfactory and beneficial that no effort was even made by manufacturers or high protectionists to change, alter, or amend it for nearly eleven years, a longer period than any tariff law enacted since the organization of our Government ever continued in force without change. This is an unanswerable vindication of the wisdom, fairness, justness, and acceptability to the people interested, of this tariff law against all assaults which can be made upon it by our latter-day protectionists. Under its benign operations we heard nothing about the so-called American but real Chinese system of protection, nothing about protection of American labor, nothing about ruined, struggling, infant industries.

It was and is the true American system contemplated by our Constitution—tariff taxes for the purpose of raising the revenues necessary for an honest, economical administration of our Government; and at the same time affording such incidental protection to our necessary manufacturing industries as would secure a properly adjusted competition between their products and similar foreign products and not give them an exclusive monopoly of our home market.

Now, after it had been in operation nearly eleven years, what occurred? It was finally assaulted by the protected manufacturers, those who had so long enjoyed its beneficial operation. Why? I repeat, why? Because under it the revenues were exceeding the necessary wants and demands of the Government. The situation was similar to the present; the public debt was nearly paid and there was a threatened surplus, just like it was in 1832, when Clay passed his compromise tariff. Did the manufacturers propose, ask, or demand an increase of the tarift duties so high as to prevent imports, destroy healthful competition, and thus reduce the threatened surplus and give them a monopoly of the home market, as now proposed by the Republican platform and Senate substitute? Oh, no; that was not the panacea proposed or desired as a substitute for the then existing real American system. No Chinese, no British system was then proposed to be transplanted and acclimated here.

They proposed, and the tariff law of March 3, 1857, was enacted, reducing the rates of duties from the average ad valorem rate of 25 per cent. to 20 per cent., a reduction of $5 on the $100 valuation.

Senators JOHN SHERMAN and JUSTIN S. MORRILL were then members of the House. From Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island there were 18 yeas and 9 nays. From New York, New Jersey, Pennsylvania, Delaware, and Maryland there were 24 yeas and 28 nays. From Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa, and Missouri, 14 yeas and 33 nays. From Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Texas, Arkansas, Kentucky, and Tennessee the yeas were 60 and nays 2, and from California 2 yeas. Senator SHERMAN, who was a member of the House when the law of March 3, 1857, was passed, said on May 10, 1860, in the House:

The manufacturers have asked over and over again that they should be let alone. The tariff of 1857 is the manufacturers' bill; but the present bill is more beneficial to the agricultural interest than the tariff of 1857. Under that all wool costing less than 20 cents a pound was admitted free of duty. Under this bill wool costing less than 18 cents a pound is admitted free of duty, and imposes a duty of 3 cents a pound on all wool costing between 18 and 24 cents, and a duty of 9 cents a pound on all wool costing 25 cents a pound and upwards, thereby raising the duty on wool.

Senator ALLISON, one of the main authors of the Senate substitute, on March 24, 1870, said in the House:

It is claimed that the high rates of our present tariff are necessary, because the revenue to be obtained therefrom is essential to the Government, and that if we reduce the rates at all the effect will be the depression of all the industrial interests of the country. The tariff of 1846, although confessedly and professedly a tariff for revenue, was, so far as regards all the great interests of the country, as perfect a tariff as any that we have ever had. If any interest was depressed under the tariff of 1846, it was the iron interest.

I do not believe that this interest, as compared with other interests, had sufficient advantage under that tariff; yet, when we compare the growth of the country from 1840 to 1850 with the growth of the country from 1850 to 1860, the latter decade being entirely under the tariff of 1846, or the amended and greatly reduced tariff of 1857, we find that the increase in our wealth between 1850 and 1860 was equivalent to 126 per cent., while it was only 64 per cent. between 1840 and 1850, four years of which decade was under the tariff of 1842, known as a high protective tariff, but the average rate of which was about 70 per cent. below the existing rate, or 27 per cent. under the tariff of 1842 as against 44 per cent. upon all importations under the present tariff. Our industries were generally prosperous in 1860, with the exception, possibly, of the iron industry. This was the statement of Mr. MORRILL, of Vermont, on this floor during the discussion of the tariff of 1864.

The length of time the Walker tariff of 1846 remained unchanged—

and then the reduction of the average ad valorem rate of 25 per cent. to 20 in 1857, which was the first change, and the quoted language of Senator ALLISON, one of the authors of the Senate substitute, are complete vindications of the system of tariff taxes for revenue with such incidental protection as all tariff duties afford.

THE WAR TARIFF AND THE CLAIMS OF ITS REDUCTION.

Our Republican friends seem indignant when we charge the fact that the present rates of duty are still the war rates, and in reply they assert that they have been greatly reduced. Why were the very high rates imposed during the war? The records show that such increased rates were not imposed either for the protection of manufactures or for additional revenues solely, but were largely on account of the high rates of internal-revenue taxes imposed on manufacturers and manufactured products. For the proof of this statement I submit the statements of Senators MORRILL and ALLISON, certainly competent witnesses. Senator MORRILL, in the House on March 12, 1862, in advocating the bill "to provide internal revenue to support the Government and pay interest on the public debt," said:

If manufactures in the history of our Government have been fostered, they are now the strongest pillars of our support. A burden that would paralyze the agriculturists of the country will be taken on the backs of the steam giants with alacrity and confidence. But it will be indispensable for us to revise the tariff on foreign imports, so far as it may be seriously disturbed by any internal duties—on some things the tax proposed is more than the present tariff—and to make proper reparation, otherwise we shall have destroyed the goose that lays the golden eggs. From such a revision, including some articles that hitherto it has not been considered sound policy to take from the free-list and lower schedules of the tariff, it is expected also to increase the revenue several millions of dollars. If we bleed manufactures we must see to it that the proper tonic is administered at the same time. There are many articles, however, where the tariff is now high enough for revenue or protection, which will require no advance.

In June, 1864, in the House, Senator MORRILL said:

And when we impose a tax of 5 per cent. upon our manufactures and increase the tariff to the same extent upon foreign manufactures, we leave them upon the same relative footing they were at the start, and neither has cause of complaint. * * *

In making an estimate of the effect of such a war tariff as is now proposed, it is important that we should bear in mind that as we increase the cost of any article we diminish the number of those who are able to consume it. * * *

This is intended as a war measure, a temporary measure, and we must give it our support as such.

Senator ALLISON, in the House, on March 25, 1870, said:

Mr. Chairman, at the close of the session yesterday afternoon I was endeavoring to show the rise and progress of the existing tariff, and the causes therefor, originating in the internal-revenue laws that were passed from time to time from 1861 to 1865, for the purpose of raising revenue to maintain the Government in its struggle with the rebellion. I stated on the 30th of June, 1864, an ad valorem internal-revenue tax was imposed upon manufacturers in this country equivalent to 5 per cent. upon their gross products, and that tax of 5 per cent. was increased by an act passed in March, 1865, so that it became 6 per cent. upon the gross product of every article manufactured or consumed in this country in the way of internal-revenue tax.

This large internal-revenue tax was made the excuse and the cause of the advance of the tariff of July 14, 1862, and June 30, 1864. I quoted the language yesterday of the then chairman of the Committee on Ways and Means in 1862, Mr. Thaddeus Stevens, himself a protectionist, and certainly in favor of the protection of the great interest of Pennsylvania, iron. He made a pledge upon this floor in 1862 that those additions of duties upon manufactured articles imported in this country were made necessary because of the internal-revenue taxes. Both he and Mr. MORRILL, subsequently chairman of the Ways and Means Committee, declared that the act of June 30, 1864, was a temporary measure, a war measure, and was not intended as a measure which should remain upon the statute-book as a protective tariff in the time of peace.

In 1866, when Mr. MORRILL introduced into the Thirty-ninth Congress a tariff measure as a temporary measure, the manufacturers of the country were groaning under a weight of (internal) taxation equivalent to $128,000,000 per annum.

These taxes, by successive acts of repeal, have all been removed. First came the revenue act of July 13, 1866, when the internal tax was removed from most manufactures of iron and steel and reduced upon manufactures of woolens, and the free-list enlarged. In March, 1867, a further reduction of taxes was made, and by the act of March, 1868, all taxes upon manufactures were abolished save only the tax of $2 per $1,000 upon sales, thus practically relieving the domestic industry of the country of a burden which, in 1865, was $73,000,000, in round numbers; in 1866, $128,000,000; in 1867, $92,000,000; and in 1868, $62,000,000. The abolition of these taxes successively upon domestic manufactures had the effect to increase and still increases by so much the tariff on similar articles, inasmuch as no reduction has yet been made in the tariff.

It is admitted by all that the increase of the tariff was commenced and carried on upon the basis of the protective duties of the Morrill tariff of 1861, the increase of direct taxation, which, added to the price of domestic manufactures, rendered an increased tariff necessary in order to prevent our country from being flooded with cheaper foreign productions. Certainly, then, upon the decrease of internal taxation the tariff may be and ought to be decreased in proportion, the danger being no longer in existence which was sought to be averted by those increased duties.

But I may be asked how this reduction shall be made. I think it should be made upon all leading articles, or nearly all, and for that purpose, when I can get an opportunity in the House, if no gentleman does before me, I shall move that the pending bill be recommitted to the Committee on Ways and Means, with instructions to report a reduction upon existing rates of duty equivalent to 20 per cent. upon the existing rates, or one-fifth reduction. Even this will not be a full equivalent for the removal of all the internal taxes upon manufactures.

During the delivery of this speech Hon. S. S. COX, interrupting Mr. ALLISON, said:

I desire to say, in addition to what has been said by the gentleman from Iowa [Mr. ALLISON], that I was on the committee of conference upon the tariff of 1864. The reason why that conference report was made as it was made, the reason given by Mr. MORRILL and Mr. Fessenden, was that the internal tax had been raised, but that the moment that tax was reduced they would be in favor of reducing customs duties. That was understood when the report was made upon the tariff of 1864; it was one of the conditions leading the conference committee to report that measure.

Hon. Zach. Chandler, in the United States Senate, in 1870, during this discussion, said:

The time has arrived when this tariff question must be settled and settled upon a permanent basis. New England, for the last fifty years, has been receiving the benefit of protection to every product of her looms and her anvils. She now is in the position of the rebels who, after they had established their government in the South, wanted "to be let alone." That is all New England wants now. She has got all the protection she needs on her products, and now her cry is: "Let us alone, and strike off protection from every other part of the United States." I give notice that I shall, at an early day, introduce a bill repealing the entire revenue system and placing a horizontal duty upon every article imported into the United States, except spirits, wine, and tobacco.

The extreme high war rates were imposed as an equivalent for the very heavy internal-revenue taxes imposed on manufacturers and their products, with the distinct understanding that they would be reduced as the internal-revenue taxes were.

Have they been so reduced?

The majority report of the Senate Finance Committee, proposing the substitute, states that "three important revisions of the tariff have taken place since 1870, namely, by the acts of July 14, 1870; of June 6, 1872, and of March 3, 1883;" and claims that by the act of July 14, 1870, one hundred and seventy-eight dutiable articles were placed on the free-list and rates reduced on fifty articles; and by the act of June 6, 1872, two hundred and thirteen items were added to the free-list and duties reduced specifically on forty-nine articles "in addition to those upon which a uniform reduction of 10 per cent. was made;" and by the act of March 3, 1883, seventy-two articles were placed on the free-list, while the rates were reduced on four hundred and twenty-seven paragraphs.

It is true that section 2 of the act of June 6, 1872, provided for a reduction of 10 per cent. after August 1, 1872, on the then existing duties on "all manufactures of cotton, etc., on all wools, etc., on all iron and steel, and on all manufactures, etc., of same, on all metals and manufactures of metals, etc., not otherwise provided for, on all paper, etc., on all manufactures of india-rubber, etc., on all glass and glassware, and on all cotton," not otherwise provided for.

This was a substantial reduction had it been permitted to remain. But by section 4 of the act of March 3, 1875, said section 2 of June 6, 1872, carried into the Revised Statutes as section 2503, was repealed, and the 10 per cent. duties restored as to all manufactures of cotton, etc. And by this act of March 3, 1875, the duties on "molasses, concentrated molasses, tank-bottoms, sirup of sugar, cane-juice, melada, and on sugars according to the Dutch standard in color," were increased 25 per cent. of the then existing duties.

Their claim of reductions by act of March 3, 1883, is not sustained. The Tariff Commission recommended a reduction of 20 to 25 per cent. The reduction actually made was not 4 per cent. average ad valorem. The war rates, therefore, have not been reduced as promised, and as the internal-revenue taxes were reduced.

They have reduced taxes, but they are the very taxes which caused the increased tariff taxes to be imposed, and not the war-tariff taxes. The following statement of the receipts into the Treasury from customs, or tariff taxes, and internal revenue will show how each has been comparatively reduced yearly:

Year.	Customs.	Internal revenue.
1866	$179,046,651.58	$309,226,813.42
1867	176,114,810.88	266,027,537.43
1868	164,464,599.56	191,087,589.41
1869	180,048,426.63	158,356,460.86
1870	194,538,374.44	184,889,756.49
1871	206,270,408.05	143,098,153.63
1872	216,370,286.77	130,642,177.72
1873	188,089,522.70	113,729,314.14
1874	163,103,833.69	102,409,784 90
1882	220,410,730.25	146,497,595.45
1885	181,471,939.34	112,498,725.54
1886	192,905,023.44	116,805,936.48
1888	219,091,173.63	124,296,871.98

These figures show how the war tariff still remains and the internal-revenue taxes have been reduced. The reductions made in the internal-revenue taxes are worthy of consideration and interesting. They have removed the internal-revenue taxes from apothecaries, auctioneers, banks and bankers, billiard-rooms, bowling-alleys, pawnbrokers, produce brokers, stock brokers, circuses, claim agents, express carriers and agents, insurance agents, even jugglers, lottery-ticket dealers, all manufacturers, patent-right dealers, peddlers, and theaters.

They also removed the internal taxes from all incomes (the tax being on incomes over $600), and all dividends or profits from banks, canal, insurance, turnpike, and railroad corporations and companies. From these income and dividend taxes, up to 1873 included, there had been paid into the Treasury the sum of $346,768,347.77.

They also removed the internal taxes from all legacies and successions, which yielded over $14,000,000 up to 1871.

And for the special benefit of the toiling laborers they removed all internal taxes on "billiard tables," carriages, plate of gold and silver, gold watches, piano-fortes kept for use, and yachts kept for use. But in order to show more clearly how the internal taxes have been reduced while the war-tariff taxes have been maintained, let us consider the percentage of the total internal taxes paid into the Treasury each year

under the internal-revenue laws, which have been repealed, or the percentage of collections of internal taxes under the repealed laws, to the total collections under all the laws.

This percentage of collections under laws since repealed was 82.76 per cent. in 1865, 81.61 per cent. in 1866, 77.04 per cent. in 1867, 76.65 per cent. in 1868, 52.82 per cent. in 1869, 49.18 per cent. in 1870, 38.95 per cent. in 1871, 30.24 per cent. in 1872, 15.58 in 1873, and 10 per cent. in 1874 and 1875, 9.39 per cent. in 1876, 8.83 per cent. in 1877, 9.27 per cent. in 1878, 8.94 per cent. in 1879, 9 per cent. in 1880, 8.71 in 1881, 9.15 in 1882, 7.90 in 1883, and fell below 1 per cent. in 1884 under tariff law of March 3, 1883.

In other words, 82 per cent. of the 100 per cent. of all internal-revenue taxes have been removed, while the war-tariff taxes still remain, and the Senate substitute proposes no general reduction, but an enormous increase on many articles over existing rates.

Republicans complain that they have had no chance to revise the tariff for the last five years on account of failure of the Democratic House to pass such a bill.

In the Forty-seventh Congress the Republicans were in power in both branches of Congress. March 3, 1883, they passed their tariff bill, pretending to reduce tariff taxation. They made an actual reduction on some articles, an increase on others, and on others still fixed specific instead of ad valorem duties, thus cunningly revising the law so as to impose higher average duties than before. The average ad valorem duty upon all dutiable articles for the year ending June 30, 1883, before that law took effect, was 42.45 per cent.; under the operation of the law as our Republican friends revised it this duty has been gradually climbing up, so that on the 30th day of June, 1887, it had reached 47.10 per cent.

Republicans now complain they have had no chance in the Senate to revise the tariff for five years past.

On the 6th of May, 1884, the Democrats were in possession of the House, and a motion was made to strike out the enacting clause of Mr. Morrison's bill reducing tariff taxation, and the bill was defeated by a majority of 4; 118 Republicans voted against this bill; they were aided by 41 Democrats; voting for the bill were 4 Republicans and 151 Democrats. On the 17th day of June, 1886, Mr. Morrison moved another bill to reduce tariff taxation. This was defeated by the votes of 107 Republicans aided by 33 Democrats; for the bill were 3 Republicans and 137 Democrats. The Democratic majority were unable to pass a bill through the House of Representatives because of the united opposition of the Republican members, aided by a few Democrats. Thus we see why no bill has, in former Congresses when the House was Democratic, been passed. It has not been the fault of the Democratic party. Why so much delay in reporting the House bill back to the Senate?

The celebrated tariff bill of 1846 was passed by the House July the 7th; in twenty-two days afterwards, July 28, it passed the Senate.

The tariff bill of 1857 passed the Senate six days after it passed the House. I do not cite, because it would not be fair, the rapidity with which such bills were rushed through the Senate during the war. I point only to what was done in time of peace. The tariff bill of 1867 was in the Senate committee fifty-four days, the longest time of any I have been able to find. The tariff bill of 1870 passed the House June 6; twenty-nine days thereafter, July 5, it passed the Senate.

Now we come to the last tariff bill that was passed, the bill of 1883. December 8, 1882, the Senate took from the Calendar a little internal-revenue bill, recommitted it to the Senate Committee on Finance, and January 4, 1883, that committee reported to the Senate a complete tariff bill tacked on to an internal-revenue bill—a thing never done before in the history of our legislation. I call attention to it to prove, and it undoubtedly does prove, that when they want to do a thing they can find a way to do it, and they are not always about it, either. They framed that bill, root and branch; they reported it to the Senate, perfect and complete, in twenty-seven days; and on the 20th of February they passed it.

The same committee that framed the bill of 1883 in twenty-seven days is in the Senate now, and was at work in committee, or pretended to be, on this bill for one hundred and thirty days. The Republican members of that committee were in 1883, Messrs. MORRILL, SHERMAN, Ferry, JONES of Nevada, ALLISON, and ALDRICH. Only one Senator has gone—Ferry. The other five have been there all the time since. They have had five years more of experience; five years more of service on that committee than they had had in 1883; five years more within which to familiarize themselves with the details of taxation: and losing Senator Ferry they have gained HISCOCK, at least his equal in ability and far his superior in knowledge of the subject, for Senator HISCOCK has had many years' experience as a member of the Ways and Means Committee in fighting and killing in the House bills for the relief of the people that never lived to be considered in the Senate. What is the matter with them? What has this committee to gain by taking one hundred and thirty days in which to frame a bill, when five years ago they could make one in twenty-seven days?

The answer can be made but in one way: delay—delay that would excuse them from voting. They have not intended to vote, they dare not vote upon their bill, for a vote would show their division. They prefer the bill should stand subject to amendment. In that shape it is pliable as any political platform that ever was built. In Kansas and on the Pacific coast they can promise to amend it in one particular. That means that the high tariff on sugar which the Kansas farmers want protected can be put back next session. All the Republican members from Kansas and the Pacific coast voted in the House against the reduction on sugar made by the Mills bill. The Senators from those States compromise to vote against the reduction on sugar in the Senate bill. Senators from the Northwest can promise to amend it in other particulars, and those from Pennsylvania and New England can promise still other amendments. The advantage, then, they have is that the Mills bill is the action of a Democratic House. If there are any defects in that bill Republicans can assail it—a Democratic House passed it. But if the Senate bill is defective, why, Republicans can promise that the Senate will amend it. The Senate has not indorsed it. It is only the bill of a committee.

Rumor has it that the distinguished Senator from Ohio [Mr. SHERMAN], before this bill was reported from the Committee on Finance, seducingly intimated to members of the other House that if they would pass a resolution to adjourn and send it here his side of the Senate would vote for it, and they would adjourn before any bill was reported at all.

What have they been waiting for? To take action on this bill? They have been waiting to wear out members of the other House so as to induce that House to pass a resolution to adjourn. They have been waiting to wear out the House and wear out the minority of the Senate, and if possible induce some tired Democrat to offer a resolution to adjourn, so that they can go upon the stump and proclaim to the world that the Democratic party had prevented them from passing this tariff bill.

Mr. SPOONER. There has not been much of a House left to wear out.

Mr. COCKRELL. The responsibility for passing or not passing this bill rests upon the Republican majority of the Senate and not upon the Democratic House. It does not make a bit of difference whether there is one man in the Democratic House or not, the Democratic House has done its duty; it has passed the bill, and it is here; and you have no right to make any inquiry as to whether there is a quorum in that body or not. It has nothing further to do with the tariff question until you have passed your bill and sent it back to that body.

Why have you not done that? There is a reason for it. There is always a policy behind the action of the Republican Senators, distinguished leaders, aspirants for the highest positions in the gift of their party. There is always a reason. The House passed a bill, and the Republican members of the House offered no substitute at all; they proposed to stand upon opposition to that measure. The Chicago convention met and they declared against the reduction. They declared for reducing duties by increasing the rates of duty. That was the policy upon which the Republican members of the House went. They therefore refused to do anything. The bill came here. The Republican Senators were not willing to charge the Democratic line under that kind of a banner. Therefore they must change the line, change front, if possible, in the face of the enemy; and they bring in a bill presumably, claimed to be reducing the tariff and at the same time increasing the rates of duty.

It is a keen, double-edged sword. There is fat to be fried out of somebody; there is fat to be fried out of the manufacturers. Here is one process of frying it: Increase the rates of duty on certain manufactures; they will fry liberally; generous streams will flow from them into the Republican campaign fund. Here is another class. The duties are lowered on them, and they, too, will fry as long as that bill is pending here in the Senate and promises can be made that the duties will be changed.

Only a day or two ago a controversy sprang up in West Virginia over putting a certain kind of coal on the free-list. Who was it who rose in his seat and asked what was the provision of the bill in regard to that article, and who was it who got up and made an explanation that it was a mistake and would be corrected?

In other words, this bill is to be kept open to fry the fat out of all kinds of manufacturers, those who are protected by increased duties and those who claim to be injured by reduced duties. Whenever anybody comes and makes a complaint, "Oh, we will correct that before the bill is passed; we have just reported it tentatively."

The committee say in their report that they are going to take additional testimony; that they are going to give the bill further consideration. What did you report it here for, then, if you are not ready to act upon it? Oh, it is a double-edged sword, and it is keen both ways and on both sides, with a sharp point. You wanted to bring all the manufacturers before you. Did you ever send for any of the farmers? Did you ever send for any of the wheelers? Did you ever send for any of the laborers, the toiling millions? Did you have a man before you who did not come there voluntarily, and whose expenses were not paid by somebody if not out of his own pocket?

We have not yet had the opportunity to see the testimony in print; but I understand you investigated that infamous jute combine out West, and you had before you, I understand, a St. Louis gentleman, one of my constituents, and he brought before you witnesses from Indiana, and from Ohio, probably, and other States, to tell you that it would not do to reduce the tariff on jute. When they were questioned

about it, they were made to confess that this jute man had hired them by the day to come here, and had borne their expenses to come here and swear in his interest.

That is the kind of testimony that you had before that tariff investigation; and this bill has not been reported to be passed. It never has been the intention to do it, and your only hope now to get out of your dilemma is that some Democrat, tired out, will introduce a resolution to adjourn and you will be enabled to let go.

What is your bill? It takes from the free-list and places on the dutiable-list the following articles to the following amounts, according to the importations of 1887:

Articles proposed by Senate Finance Committee to be transferred from the free-list to the dutiable list.

Articles.	Values.	Estimated duties under Senate substitute.
Aluminium	$9,458.00	$1,891.60
Oil of poppy	27,528.00	6,882.00
Gold size	7,461.00	2,984.40
Root flour	575.00	115.00
Macaroni	500,970.20	177,339.54
Animals for breeding—		
Cattle	401,168.83	70,970.00
Hogs	2,298.00	80.00
Horses	2,252,374.00	301,800.00
Sheep	56,348.00	14,267.50
All other	51,357.00	10,271.40
Total	3,309,538.03	586,601.44

Also, "fresh fish, when frozen or packed in ice." Of this no estimate can be made.

This substitute proposes to place some dutiable articles from the schedules of "chemicals," "sugar," "provisions," "cottons," "hemp, flax, and jute," and "sundries," of the aggregate value of $26,331,-815.38 as imported in 1887, on the free-list.

On many of the schedules the duties are increased.

On the whole amount of metals imported in 1887, amounting to $55,111,922.37, the average duty paid was 40.77; under the Senate bill it would be 42.13. On cotton manufactures, amounting to $30,-208,851.83, the average duty was 39.99; under the Senate bill it will be 40.74. On books, papers, etc., amounting to $5,214,635.21, the average duty has been raised. On sundries, amounting to $59,580,006.88, the average duty has been raised. On wool and woolens, amounting to $50,586,613.71, the average duty was 58.80; under the Senate bill it will be 66.12.

Ties for baling cotton and hay now pay a duty of 35 per cent. Capitalists not willing to manufacture them at the importer's price with 35 per cent. added, demanded such a duty as will enable them to "control the American market," and the Senate bill raises the duty to over 100 per cent. This would give us the benefit of a "cotton-tie trust." On woolen dress-goods costing abroad an average of 15 cents a yard, the duty now, 83 per cent., is raised to 92 per cent. These are only samples; look at whole schedules.

The following table shows the values of certain named articles as imported in 1887 and the amounts of duties collected under present and the average ad valorem duty thereon under present law. Also the amounts of duties payable thereon under the House bill, with the average ad valorem rate thereon, and the same under the Senate substitute, and the amounts of the excess of duties payable thereon under the Senate substitute over the same under present law and the percentage of increase, and also the percentage of increase of duties under House bill. This is the table from which my colleague [Mr. VEST] read yesterday, and I will not consume the time of the Senate in reading it.

Values of and duties collected on the below-named manufactured articles entered for consumption in the United States during the year ending June 30, 1887, *with the estimated amounts of duty accruing on like imports under the provisions of House bill* 9051 *and the Senate substitute; also showing the excess in amounts of duty under the Senate substitute over like amounts under the present laws and House bill* 9051.

Articles.	Values.	Duties collected under—						Excess of duties under Senate substitute over—			
		Present laws.		House bill.		Senate substitute.		Present laws.		House bill.	
		Amounts.	Av. ad valorem rates.	Amounts.	Av. ad valorem rates.	Amounts.	Av. ad valorem rates.	Amounts.	Per cent.	Amounts.	Per cent.
Woolens:			*Per cent.*		*Per cent.*		*Per cent.*				
Cloths	$10,022,370.67	$7,055,824.94	70.40	$4,008,948.26	40.00	$7,531,853.64	75.15	$476,028.70	6.75	$3,522,905.38	87.88
Dress goods	17,199,141.02	12,398,974.92	72.09	6,879,656.41	40.00	13,419,025.95	78.02	1,020,051.03	8.23	6,539,369.54	95.05

*Minus.

NOTE.—The amounts of duty stated as "collected" under House bill and Senate substitute are estimated upon the imports of 1887.

W. F. SWITZLER, *Chief of Bureau.*

TREASURY DEPARTMENT, BUREAU OF STATISTICS,
Washington, D. C., October 11, 1888.

Mr. ALDRICH. Will the Senator be kind enough to state what is the final result, what the average ad valorem rate on all dutiable goods?

Mr. COCKRELL. Under your bill?

Mr. ALDRICH. Yes.

Mr. COCKRELL. Why, you pretend to reduce it to 42.75 per cent.

Mr. ALDRICH. We do not pretend at all. That is not a part of our statement.

Mr. COCKRELL. It is your system, not your statement. I understand that. This statement was made by the Treasury Department, and that your system and mode of imposing these duties, calculated as best can be done before they are put in practical operation, shows that you levy an average ad valorem duty of 42.75 per cent.

Mr. ALDRICH. How much is it in the Mills bill?

Mr. COCKRELL. By the Mills bill it is 42.77 per cent., according to my calculation.

Mr. ALDRICH. It is higher by the Mills bill than by ours.

Mr. COCKRELL. Yes; that is, the general average is very slightly. What have you done? How have you cut your rates down? By striking at the sugar tariff, and there is your tender point. Your reductions are all made in the sugar tariff.

Before the House bill was finally reported from the Committee on Ways and Means and in the proceedings of that committee on March 19, 1888, the following proceeding was had:

Mr. BROWNE, of Indiana, moved to strike out lines 340 to 370, inclusive (being the sugar provision, and which would have left sugar at present rates). Lost by following vote: Ayes, Messrs. Kelley, Brown, Reed, McKinley, and Burrows—5; nays, Messrs. McMillin, C. R. Breckinridge, Turner, Wilson, Scott, Bynum, and Mills—7.

Thus when the sugar schedule was pending before the Committee on Ways and Means of the House—and the record has been made public and it is now public property—a Republican member of that committee, Mr. BROWNE, of Indiana, moved to restore the present tariff rates

upon it and not to reduce it at all, and every Republican member there voted for that, voted to restore sugar to the present duty, and they voted in the House against the measure of the majority to reduce the tariff on sugar.

Mr. CHACE. Why, Mr. President, does the Senator say that the Republican members of the Ways and Means Committee voted in the House against a reduction of the tariff duty on sugar?

Mr. COCKRELL. I do not know how they voted in the House on final action.

Mr. CHACE. I understood the Senator to say "in the House."

Mr. COCKRELL. They voted in committee to restore the duty to its present rate, to what it was before, and not to sustain the Democratic majority of the committee in reducing it.

Mr. CHACE. Did they not vote in the House to take off 50 per cent. of the duties on sugar?

Mr. COCKRELL. I do not remember.

Mr. CHACE. That is the fact, I believe.

Mr. COCKRELL. I do not know whether it is or not.

Mr. ALLISON. Certainly, it is the fact.

Mr. CHACE. I should like to say that I am advised by a member of the House of Representatives, who claims to know the fact, that the statement made by the Senator from Missouri is incorrect.

Mr. COCKRELL. What statement?

Mr. CHACE. That they did not vote in committee in that way.

Mr. COCKRELL. I have the official record, and I do not care what the member of the House may say. The official record of the vote by yeas and nays in the committee on March 19, 1888, shows just what I have read.

Mr. CHACE. Will the Senator pardon me one or two questions on this sugar schedule?

Mr. COCKRELL. If the Senator does not make a speech.

Mr. CHACE. I understand the Senator to make out that the average rate of duties in these two bills is about 42 per cent. Will he tell us what the ad valorem rate is in the Senate substitute on sugar?

Mr. COCKRELL. Forty-one and two-tenths per cent.

Mr. CHACE. That is about the same as the average rate of duties.

Mr. COCKRELL. Not at all, sir; the average rate of duties under the present law is 78 per cent.

Mr. CHACE. No; but I say it is about 41 per cent. in the Senate substitute, and the average of all the duties in both bills is about 42 per cent. Now, will the Senator please to tell us why sugar, an agricultural product, should have a rate of duty upon it higher than the average duties upon the most extreme manufactured articles in the country?

Mr. COCKRELL. If the protective system must be maintained at all hazards, and rather than yield one part of the protective system you are going to have free whisky, why will you make a 50 per cent. reduction upon sugar, an industry that, if its friends in Kansas and other States are correct, needs protection at this time, a new industry, the production of sugar from sorghum by machinery, while you increase your tariff on woolen goods manufactured in your own States 100 per cent.?

Mr. ALDRICH. Does the Senator from Missouri support the duty on sugar as a protective duty?

Mr. COCKRELL. It makes no difference whether I support it or do not support it. I am arguing about the Republican party and not about my views. I am attacking the Republican party. I am not defending myself. I am not on trial.

Mr. ALDRICH. I am asking the Senator for his views, if he is willing to give them.

Mr. COCKRELL. It is immaterial what my views are. That is not the question. The question before the American people is the Senate substitute as compared with the House bill. It is a measure that has been brought into the Senate to fry the fat out of the manufacturers by giving some of them high rates and others reduced rates, and then hold it here and never pass it, promising changes and amendments; and, as I said before, when the other day the people of West Virginia got scared, a distinguished Representative running for office sent word down here to the Senator from Iowa [Mr. ALLISON] or some of the Republican Senators that that would never do, and a Republican Senator very innocently gets up on the floor and interrogated the distinguished Senator from Iowa, and he tells him that that is all going to be arranged; that that was just simply a mistake. Let anybody else find any defect in the bill and the same promise can be made.

Mr. ALLISON. It will be.

Mr. COCKRELL. I have no doubt of it; and it is said, rumor has it, that the frying-pan was kept not far from the Senate Finance Committee, so that when the manufacturers and others came voluntarily before the committee, they had an opportunity of visiting that frying-pan and seeing what was wanted.

Mr. President, in addition to the Republican members of the Ways and Means Committee of the House voting to restore the tariff to its present rates, in 1886, when a tariff bill was before the Ways and Means Committee of the House, the Senator from New York [Mr. HISCOCK], then a member of the House, put a question to Mr. GAY, now, and then, a member of the House, in regard to salt and sugar. I read what occurred before the House Committee on Ways and Means March 10, 1886, whilst Mr. GAY was addressing the committee.

The CHAIRMAN. You have got an island of salt?

Mr. GAY. There is no telling the developments of it. There are now fifty cargoes of salt shipped by the day from that island, and its possibilities are unknown.

Mr. HISCOCK. The way with us to remedy the trouble is this: Gentlemen who think as you do should come over and vote on our side of the House, and then the gentlemen at this end of the table will be elevated up to the other end, and you will not be troubled with this thing any more.

Mr. GAY. Whether I stand on one side or the other, I am for the legitimate protection of every American industry.

Mr. HISCOCK. We want the men who think as you do to help us to organize the House so that the order at this table may be reversed.

In other words, you have reached that point where you form a tariff combination trust, and all your interests must stand or fall together.

Mr. ALDRICH. Those same gentlemen voted for the Mills bill. What kind of a combination was it that resulted in that vote?

Mr. COCKRELL. That is just what I wanted the Senator to say. That is the reason you cut sugar down. There it is in a nutshell. They did not vote with you in the House this time, and you are punishing them for it now. That is the reason; that is just exactly the question I wanted the Senator to ask.

Mr. ALDRICH. Will the Senator permit me?

Mr. COCKRELL. Certainly.

Mr. ALDRICH. Every single Republican Senator in 1883 voted for a reduction on sugar almost as great as now is included in this bill, notwithstanding the fact that the Senator says a reduction was proposed by a Democratic member in the House. It is a well-known fact that the gentlemen to whom I have alluded were opposed to the Mills bill up to a certain time, and afterwards they voted for it; and I was asking the Senator if he had any information upon the subject of what it was that caused the change.

Mr. COCKRELL. I have never heard of any cause for the change. I have never seen any cause why the Republican party of the Senate should go back upon the Republican party in the House in regard to this matter.

Mr. ALDRICH. The Republican party in the House voted, without a single exception, in favor of a reduction of 50 per cent. on the present tariff on a vote by tellers.

Mr. COCKRELL. Did the Kansas men vote for the reduction?

Mr. ALDRICH. I say every Republican member in the House.

Mr. COCKRELL. Do you call them Republicans?

Mr. ALDRICH. Yes, sir. With one exception every Republican member voted for a reduction of 50 per cent. on sugar, which is precisely the same reduction effected by the Senate substitute.

Mr. COCKRELL. Now, Mr. President, there is a formation among them, and there is no question about it, to hold up the tariff to the present high war-tariff rates.

Mr. President, I hold in my hand a list of articles on which the duty has been raised by the substitute of our committee. I will have it inserted at the end of my remarks.

You have taken hold of the tariff schedules. Schedule No. 226 changes the rate on tobacco, cigars, cheroots, etc., $2.50 per pound and 25 per cent. to $3.50 per pound, a reduction of $273,097 on importations of 1887.

By this change cigars worth $10 per 1,000, which now pay $2.50 per pound, or an average of $37.50, and 20 per cent., $40, would pay $3.50 per pound, or an average of $52.50 per 1,000, an increase of $12.50 per 1,000, while cigars costing $250 per 1,000, which now pay $100 duty per 1,000, would pay $52.50 per 1,000 under the substitute, the same as the cheap cigar, a reduction of $47.50 per 1,000. That, I suppose, is for the benefit of the laboring man!

Mr. ALDRICH. Let me suggest to the Senator from Missouri, if he has made that calculation upon cigars costing a dollar a thousand, which is quite as probable as Havana cigars costing $10 a thousand, he will show ten times as high an ad valorem rate.

Mr. COCKRELL. Mr. President, the question before the Senate and before the people to-day is a tariff to prohibit imports, because that is the practical policy, the declared policy of the Republican party in its platform, and a majority of the Republican Senate. A minority of the Republican Senate can not change that policy. That is your platform. Upon the other hand, the Democratic party stands upon the platform of a reduction of the rates of tariff duties to that amount which will yield revenues for the support of the Government and afford the incidental protection which all tariff duties afford.

You have not passed your bill; you do not intend to pass it. You are just waiting now to get some tired Democrat to introduce a resolution to adjourn, and you will gladly adopt it and go home, and then try to charge upon the Democratic party throughout the length and breadth of the land that the cause you have not passed the tariff bill is that the Democrats moved an adjournment.

APPENDIX.

ITEMS ON WHICH DUTY IS RAISED BY SENATE SUBSTITUTE.

Metals:
Chains less than three-eighths inch.
Sheets of iron or steel less than No. 29 wire gauge.
Sheets of iron or steel less than No. 29 wire gauge, galvanized.

Metals—continued.
Fence-wire rods smaller than No. 5.
Wire worth over 10 cents per pound.
Steel ingots, blooms, billets, etc., less than 1 cent.
Cotton-ties.
Bronze powder.
Table cutlery, and all knives.
Penknives and pocket knives.
Gold leaf.
Breech-loading shotguns, cheap.
Quicksilver.
Wood-screws one-half inch and less.
Type metal.
Wood:
Rattans, manufactured.
Tobacco:
Cigars, cigarettes, and cheroots, cheap.
Leaf-tobacco, wrapper.
Provisions:
Animals, live.
Cotton:
Medium yarns.
Cotton cloth exceeding 150 threads to 200.
Stockings and hose, fashioned.
Flax and hemp:
Yarns.
Brown and bleached linens.
Grass-cloth.
Sheetings.
Manufactures of flax, etc.
Sail duck.
Jute yarn.
Laces, embroideries, etc.
Cuffs and collars.
Wool:
Class 1, combing wools, cheap.
Class 2, clothing wools, cheap.
Class 3, carpet wools, dear.
Manufactures of wool:
Cloths.
Shawls.
All manufactures.
Flannels.
Blankets.
Hats.
Balmorals.
Yarns.
Women and children's dress goods.
Clothing, ready-made.
Cloaks, dolmans, and jackets.
Silk goods:
Laces, embroideries.
Wearing apparel.
Books and papers:
Blank books.
Photographs.
Buttons.

Mr. SPOONER obtained the floor.

Mr. COCKRELL. Before the Senator proceeds I should like to have read or put in the RECORD a letter from the Commissioner of Internal Revenue in regard to the system for the free use of distilled spirits in the arts and manufactures as provided for in the substitute of our Finance Committee.

Mr. HOAR. I suppose it may be inserted in the RECORD without being read.

Mr. ALDRICH. I want it read either before or after the Senator entitled to the floor gets through.

Mr. COCKRELL. I want it to go in as part of my remarks.

The PRESIDENT *pro tempore*. The Secretary will read the paper.

The Chief Clerk read as follows:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, October 8, 1888.

SIR: Referring to your request for an expression of my views respecting the proposed exemption from tax of alcohol used in the industrial arts, as provided in the amendment reported by the Senate Finance Committee to House bill 9051, inclosed please find copy of a letter addressed from this office to Hon. JAMES B. BECK, under date of August 2, in response to a similar request pending the consideration of this proposed measure in committee. No copy of the proposed amendment was furnished this office at the time, and this suggested change in the law was considered simply as a proposition, without regard to the conditions imposed, and solely from a revenue standpoint. Notwithstanding the many safeguards now contained in the bill against the fraudulent use of the alcohol so exempt from tax, the proposed measure is, in my judgment, still open to the objections noted in my letter referred to; and as a measure for the relief of the manufacturer and the tax-payer, the amendment, I think, is open to still further objection.

The many requirements contained in the bill respecting the storage, custody, and use of the alcohol in the cases provided, and the large bond security exacted and other conditions imposed for the prevention of fraud, would, in my opinion, prove so burdensome and so difficult of compliance in many instances as to prevent the average manufacturer from availing himself of the proposed exemption.

The quantity of alcohol used in small lots by retail druggists and other small manufacturers in this country for pharmaceutical purposes and in the preparation of cologne-waters, toilet articles, etc., is very considerable and possibly exceeds, in the aggregate, the quantity used by the large wholesale manufacturers for like purposes. But, in order to obtain alcohol free of tax in the manner provided for in the bill (except in cases where the alcohol has first been methylated) the applicant must first provide a separate and secure room on his premises for the exclusive storage of the alcohol so obtained, and must file with the collector of his district the necessary notices and entries and a bond in a sum of not less than $5,000; and no portion of the alcohol, however small, can be removed from such store-room unless for immediate use and in the presence of the Government storekeeper having the custody of the room and spirits stored therein.

The practical difficulties here involved in the case of a small manufacturer, in providing the required store-room and securing the attendance of a storekeeper at the proper time, are such as would, in my judgment, effectually exclude this class of manufacturers from any benefits under the bill. If such should prove to be the case the business of manufacturing articles where alcohol is used in any considerable quantities would, of course, soon pass into the hands of a few large manufacturers who could easily comply with all the requirements of the proposed law. Such a law would be manifestly unjust; and the benefits which the consumer of the articles so produced would derive under the law would be such as the manufacturers would graciously concede. The provisions made in the bill for the establishment of "bonded alcohol warehouses," into which all bonded alcohol withdrawn from the distiller's warehouse must pass before reaching the manufacturer, would also in my judgment be greatly to the advantage of the large manufacturer over his smaller competitor.

The large bond security ($100,000) required of the proprietor of such warehouse would necessarily limit the number of warehouses so established, and would of course effectually prevent the small manufacturer from establishing his own bonded warehouse. By a system of warehouse charges, commissions, etc., the small manufacturer would be entirely at the mercy of the proprietors of these bonded warehouses and the distillers of the alcohol. The opportunity afforded by this bill for a combination of alcohol distillers and large manufacturers to establish these bonded warehouses and control the spirits entered into and withdrawn therefrom is, to my mind, a most dangerous one.

One of the principal objections now urged to the present tax on distilled spirits, especially as to alcohol (on which the tax is nearly five times the cost of producing the article) is that, owing to this high rate of tax and the many onerous restrictions placed on the business, the manufacture of this article is controlled by a few distillers, who, by limiting their production, are able to fix their own price on the article produced. If, as I apprehend, the effect of this proposed amendment to the law imposing this large tax would be to confine the manufacture of articles from alcohol, free of tax, to a comparatively small number of manufacturers, the monopoly feature of the internal-revenue law, if it now exists, would, instead of being lessened, be greatly increased, and the whole system of revenue laws relating to distilled spirits would become so unequal and unjust as to invite their hasty repeal.

In view of this objectionable feature of the bill and the dangers to be apprehended from the fraudulent use of the alcohol as set forth in the accompanying letter, I can not but regard this proposed measure as inexpedient and dangerous in the highest degree.

Recent experiments conducted in this office with methylated spirits (the details of which will appear in my annual report of 1888) demonstrate the fact that such spirits, even when containing a large per cent. of methyl, can by a very simple and inexpensive process be so demethylated or cleansed as to admit of their being used in the compounding of liquors intended as beverages.

The provision found in the bill for the methylation of alcohol in the bonded alcohol warehouses, and the exemption of such methylated spirits from many of the restrictions applicable to pure alcohol, would seem to furnish another dangerous opportunity for fraud, instead of affording an additional safeguard against fraud as intended.

The proposed measure is open to the further objection that the employment of a force necessary to carry out the provisions of the bill, and to properly supervise the business therein authorized, would probably entail upon the Government an expense greater than any similar measure heretofore proposed, and perhaps equal to the present cost of collecting the entire receipts from distilled spirits, and that no provision is made in the bill for this large additional expense, or for the appointment of additional revenue agents, which would be absolutely necessary in case the bill should become a law.

Respectfully, yours,

JOS. S. MILLER, *Commissioner.*

Hon. F. M. COCKRELL,
United States Senate, Washington, D. C.

Mr. ALLISON. Mr. President, the Commissioner of Internal Revenue makes his criticisms upon our provision as respects alcohol used in the arts. One is that the provision respecting bonded warehouses is too severe, that we have tied it up too closely, and therefore there is danger that these bonded warehouses may be in a few hands. Inasmuch as the law authorizes the Secretary of the Treasury to establish as many bonded warehouses as he chooses to establish, I do not think there can be any sort of danger in that regard unless the Secretary of the Treasury chooses to act without due regard to the public interest.

As to the recovery of methylated spirits, I wish to say just one word. England and Germany to-day are allowing manufacturers to use methylated spirits, and the concurrent testimony in both those countries is that they can not be recovered except by redistillation. So I care not what the Commissioner of Internal Revenue may have stated in his report of 1888, he can not overcome the fact that in two great countries they use methylated spirits to-day.

Mr. VEST. Will the Senator, before he takes his seat, allow me to make one statement?

Mr. ALLISON. Yes, sir.

Mr. VEST. That is a very material question of fact. I assert now, and I can demonstrate, that this wood-alcohol or methyl can be taken out after it is used in the arts and sciences and prepared as a harmless drink, and in this very town inside of three days I have seen, on a machine costing $22, brandy and whisky manufactured after having been demethylated, equal quantities of fine brandy and of wood-alcohol and of pure alcohol, and afterwards the methyl or wood-alcohol, which is a poison, taken out and then reduced by water until no man, except an expert, could tell the difference between it and the brandy and whisky sold in the saloons at high prices.

That is a question of fact. I assert that I can produce the process here that will manufacture it, and I say, no matter what has been done in England or in France or anywhere else, that this is done in this town; and if I had known that this matter would come up I should have brought the actual article manufactured, which can be drunk with perfect impunity and can not be detected.

Mr. TELLER. Would it make a man drunk?

Mr. VEST. As a matter of course. It has alcohol in it. I assert it as a fact, and it can be proved by actual demonstration; and the Senator from Ohio [Mr. SHERMAN] was right when he said that it was dangerous to put this provision in this bill, as he declared in his opening speech.

Mr. ALLISON. He did not say it so strongly as that. He said he had some doubt about it.

Mr. VEST. Yes; he said he had great doubts, so great that he be-

lieved it would almost destroy the internal-revenue system of taxation on spirits.

I will make this assertion good or else I will stand convicted here not only of inaccuracy, but of something worse. I say you can take the finest brandy or the finest bourbon whisky made at the Taylor distillery or any of the other distilleries of Kentucky, put with it equal quantities of wood-alcohol, which is a poison, and of a pure alcohol, which is not, and you can use the wood-alcohol together with the other in the arts and sciences, and afterwards you can extract by this process, on a machine costing $22, actual valuation, all the wood-alcohol or methyl, demethylate it, and then it is a harmless drink, and can be sold in all saloons.

Mr. ALLISON. What is the process?

Mr. VEST. I do not undertake to describe it. I have seen it.

Mr. ALLISON. It is a process of redistillation, and it requires the same effort that it requires to distill alcohol. If the Senator from Missouri has such a scheme, he has a scheme which under the House bill will enable a man to have in his bureau drawer a distillery for the manufacture of whisky.

Mr. VEST. I would rather the Senator should use another form of expression. I have not any such scheme.

Mr. ALLISON. Very well.

Mr. VEST. That machine is in the office of the Commissioner of Internal Revenue, and open to inspection.

Mr. ALLISON. Very well. I do not care where the machine is. I only want to say that the most distinguished experts——

Mr. VEST. I do not want my name put in any scheme.

Mr. ALLISON. Of course I meant it in no offensive sense to the Senator.

Mr. VEST. I understand that.

Mr. ALLISON. He said he had the machine.

Mr. VEST. No; I said I had seen it.

Mr. ALLISON. I of course know that the Senator from Missouri is not engaged in any such occupation as that. I only know that experts have made efforts in this country, in England, and in Germany for the extraction of wood-alcohol, and it has been regarded as the most important invention that could be made, and they all concur that this wood-alcohol can not be recovered except by a process of distillation or redistillation, which must be of the same nature as the original process of distilling alcohol.

It is true that in Germany they have adopted an additional safeguard by the injection of a small quantity of pyridine, a natural product of nicotine, but recently found in coal-tar, and which is extracted from it, and thereby they have made it more secure and more absolute; and we propose in this bill that the Secretary of the Treasury shall have authority to use the improved methods now in use in Germany and to some extent in Great Britain. So, I care not what the Commissioner of Internal Revenue may say or what machine the Senator from Missouri may have seen or observed, it is by a process of redistillation, in my judgment, which is a process, that if successful, will enable every man to produce alcohol, and it is the only way whereby this wood-alcohol can be recovered.

Mr. VEST. Before the Senator from Wisconsin [Mr. SPOONER] proceeds, will he yield to me for a moment?

Mr. SPOONER. Yes, sir.

Mr. VEST. I desire to have put in the RECORD certain tables, which came to me this morning from the Treasury Department, in regard to the duties imposed by the Senate committee's substitute. I want them put in the RECORD for the use of all Senators.

The PRESIDENT *pro tempore*. The tables will be printed in the RECORD, if there be no objection. The Chair hears none.

The tables are as follows:

SCHEDULE K.—*Wool and manufactures of wool.*

Par. Senate bill.	Articles.	Importations for fiscal year 1887.		Rates of duty.			Amount of duties.			Value per unit of quantity.	Ad valorem equivalents.		
		Quantity.	Value.	Existing law.	House bill.	Senate bill.	Collected in 1887.	At new rates, based upon importations for fiscal year 1887.			Existing law.	At new rates, based upon importations for the fiscal year 1887.

Mr. HOAR. Mr. President, the Senator from Missouri [Mr. VEST] has just put in the RECORD certain papers. I should like permission, without detaining the Senate at this time by any remarks of my own, to put upon the record for the use and for the instruction of the Senate the statement of the most distinguished free-trade statistician in this country, Mr. Edward Atkinson, as to the—I will not say the effect of a protective tariff, because he would not ascribe these results to the tariff in any large degree, but as to the comparative condition of progress of the nation during the last twenty years, when a high protective tariff has been in operation, as compared with the previous years.

Mr. Atkinson, who is unquestionably the most distinguished free-trade statistician in this country, and whose integrity I never heard any person who differed from him most warmly question, or his desire for honest and accurate results, has recently contributed to a magazine called The Forum, for the present month, a statement of the progress of the nation since 1860, or since 1865 or 1870—he takes different dates for the comparison in different cases—as compared with the immediately preceding period, and his results cover and overthrow at every point, so far as I recollect, the elaborate speech of the Senator from Texas [Mr. REAGAN], made the other day. The Senator from Texas attributed to protection certain results which by a process of *à priori* reasoning he undertook to demonstrate would happen, and which he affirmed did exist in this country.

Now, here is the great free-trader's statement of the facts which I desire to put on the record of the Senate.

All the changes—

Speaking now of the period since 1865—

All the changes have been in the direction of lower prices, smaller profits proportionately to each transaction, accompanied by higher wages.

Then he goes on to say:

While the earnings of workmen have increased, the earnings of those charged with the direction and application of capital have increased, while mere possession of capital has become less and less remunerative to the owner.

That is the comment furnished by the facts upon the Senator's statement that some $500,000,000 or $600,000,000 a year were passing into the pockets of the capitalists who were engaged in manufacturing. Says Mr. Atkinson:

While great fortunes have become more conspicuous they yet bear in the aggregate a lessening proportion to the total savings of the community.

The great gain and the increase in consumption in recent years have been chiefly in the consumption of articles which are of common use by the great mass of the people rather than in luxuries or articles of voluntary use.

We find that while the population increased from 1870 to 1887 only 55 per cent. the product of hay, which is synonymous with meat and the products of the dairy, increased from 70 to 80 per cent.; the product of grain 85 per cent.; the consumption of wool, domestic and foreign, nearly 100 per cent.; the product of pig-iron 285 per cent.; the construction of railways 223 per cent.; and so on in varying proportions, all in excess of population, with regard to all the necessities and comforts of life.

The value of the imports of merchandise over and above our exports, from 1866 to 1875 inclusive, was, in round figures, $817,000,000. The value of our exports of merchandise above our imports, from 1876 to 1885 inclusive, consisting wholly of the products of agriculture, was one thousand five hundred and seventy-four million.

On what elements did this depend? The railway charge upon the twenty-six great systems of railway which diverge from Chicago east and west, from 1866 to 1875, was 2.1837 cents per mile; from 1876 to 1885, it was 1.1037 cents per mile, making a saving of 1.08 cents per mile on the traffic of these specific lines on which 35 to 40 per cent. of the whole railway service of the country was performed, yet this difference in the rate of charge on these specific lines only, from 1876 to 1885, inclusive, came to more than $1,700,000,000, as compared to the rate charged in the previous ten years. This saving alone more than accounts for the excess of our exports over our imports, which excess enabled us to redeem our bonds or to import the coin necessary for our use.

He then gives a marvelous table and chart, in which he declares and illustrates by a picture to the eye:

No. 1. Average wages of mechanics, engineers, carpenters, machinists, and printers connected with the mills and works treated in volume 20, United States Census, which he has verified and confirmed by

separate investigations of his own. Establishments in Eastern, Middle, and Western States:

	Per day.
1860	$1.56
1885	2.40

Table No. 2—and I desire to call the attention especially of the Senator from Texas to this table—

No. 2. Average cost of one day's supply of food, fuel, and material for clothing customarily used by such mechanics, computed at retail prices on twenty shops, ten east and ten west of Buffalo:

1860	$0.3095
1885	.30

So that the average cost of food, fuel, and material for clothing since 1860 has diminished .95 of a cent a day, while the earnings of these classes that Mr. Atkinson sums up have increased from $1.56 to $2.40 per day.

No. 3. Purchasing power of three hundred days' wages in equal portions of the same kinds of food, fuel, and cloth, as above given:

1860	$15.72
1888	21.00

His table No 4 I will put in in this connection, although it is not immediately applicable to the present debate.

No. 4. Quantity per capita of coin, convertible bank-notes and legal-tender notes in circulation or in use as money at the respective dates:

1860	$14.06
1885	27.25

These tables are, as I have said, the result of the most careful inquiry of an eminent scientific man, a free-trader, and made, so far as there is any purpose to be extracted from them, in the course of an investigation which does not especially concern the issue which is now under debate in the Senate.

Mr. REAGAN. Will the Senator from Wisconsin allow me one word?

The PRESIDENT *pro tempore*. Does the Senator from Wisconsin yield to the Senator from Texas?

Mr. SPOONER. I will yield if for only a minute. I can not yield for any length of time, as I desire to leave the city at 7 o'clock this evening.

Mr. REAGAN. I only ask the Senator to yield for a moment.

Just how far the tables presented affect the question which I was discussing I am not able now to determine. They do not overthrow the fact, however, that there were five billion and some hundred million dollars' worth of products manufactured in the United States, as shown by the census of 1880, and that if we subtract two billion from the five billion to correspond with the free-list, leaving three billion to correspond with the tax-list, a tax of 47.10 per cent. would yield $1,557,071,798; and that if we subtract from that sum the result of a tax of 30 per cent. it would still leave five hundred and seventy-six-odd million, I believe it is, unnecessarily drawn from the people. But altogether it transfers by operation of the law, if the calculation is correct, over a billion and a half of money as a result of that system, and no tables which a doctrinaire can present can alter those great facts.

Mr. HOAR. These are statements of fact. The Senator from Texas is the person to whom the term "doctrinaire" would be applied, of course not offensively; but he reasons *à priori* from what he thinks ought to exist.

Mr. REAGAN. I leave it with the statement I have made.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the joint resolution (S. R. 116) authorizing the Secretary of War to protect the Washington Aqueduct tunnel, with an amendment in which it requested the concurrence of the Senate.

The message also announced that the House had appointed Mr. CLEMENTS, Mr. MCMILLIN, and Mr. RYAN members on the part of the House of Representatives of the Joint Select Committee to Investigate the Washington Aqueduct Tunnel.

WASHINGTON AQUEDUCT TUNNEL.

Mr. HALE. I ask the Chair to lay before the Senate the action of the House of Representatives on the Senate joint resolution in regard to the Washington Aqueduct tunnel.

The PRESIDENT *pro tempore* laid before the Senate the amendment of the House of Representatives to the joint resolution (S. R. 116) authorizing the Secretary of War to protect the Washington Aqueduct tunnel.

The amendment of the House of Representatives was to add to the joint resolution—

That the joint select committee of the Senate and House authorized by a concurrent resolution of Congress to make inquiry and report concerning all of the work and contracts therefor on the Washington Aqueduct tunnel and other matters in relation thereto, are hereby, in addition to the powers conferred by said concurrent resolution, authorized and directed in their discretion to inquire and report touching all plans and estimates prepared under the auspices of the Government for extending the water supply of Washington City, and finally the said committee may extend their inquiries as to any and all other matters concerning the extension of said water supply that may aid the Congress in ascertaining and fixing the responsibility for any mismanagement therein, or for the future construction and management thereof.

Mr. HALE. I see no objection to that amendment. I move that the Senate concur.

The amendment was concurred in.

LEGAL REPRESENTATIVES OF ELIZA M. FERRIS.

Mr. SAWYER. I wish to enter a motion to reconsider the vote by which the Senate passed the bill (H. R. 1152) for the relief of the legal representatives of Eliza M. Ferris, and I ask that the House be requested to return the bill.

The PRESIDENT *pro tempore*. When did the bill pass the Senate?

Mr. SAWYER. About three or four days ago.

The PRESIDENT *pro tempore*. Unanimous consent, then, will be necessary.

Mr. SAWYER. I ask unanimous consent.

The PRESIDENT *pro tempore*. The Senator from Wisconsin asks unanimous consent that the vote by which the Senate passed the bill named by him may be reconsidered.

Mr. SAWYER. I only ask to enter the motion to reconsider.

The PRESIDENT *pro tempore*. And the Senator accompanies the motion with a request that the House of Representatives be asked to return the bill. It will be so ordered, if there be no objection. The Chair hears none. The motion to reconsider will be entered.

THE REVENUE LAWS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. SPOONER. Mr. President, I do not intend to enter at this time into an argument upon the comparative merits of the Senate or House tariff measures, or to consider the principles upon which the Republican party justifies its adhesion to the protective system, or even to discuss the objections to it. I shall reserve that discussion for the time when the Senate is seriously at work with a quorum upon this subject. My present purpose is simply to prove by witnesses who have been friendly to free trade, who live where it was born and where it has its home, that its results are not satisfactory, and that there is clamor for its overthrow and demnad for its abandonment.

If free trade, or, what is the same thing, "tariff for revenue only," as contradistinguished from "protection," is a system in itself so beneficial to capital and to labor, as our Democratic friends assert, its beneficence must be apparent in its operation in the United Kingdom, if anywhere on the earth, for that is the only distinctively free-trade nation in the world. I propose now only to prove that under the influence of free trade or a tariff for revenue only in Great Britain there has been for twelve years or more past, with slight intermissions, a very serious depression in industry and trade of almost every kind, and a depression in agriculture which defies parallel. The downward tendency was so great as to attract the attention of English statesmen, and to compel an investigation with a view to legislative or diplomatic action for relief.

In 1885, the 29th day of August, Victoria, "by the grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith," issued a commission to certain "trusty and well-beloved cousins and councilors," and others, numbering twenty-six, the Earl of Iddlesleigh being the first and the Earl of Dunraven being the second, the object whereof is set forth in the commission, as follows:

Whereas we have deemed it expedient that a commission should forthwith issue to inquire and report upon the extent, nature, and probable causes of the depression now or recently prevailing in various branches of trade and industry, and whether it can be alleviated by legislative or other measures.

This commission entered upon its work, and it was wonderfully thorough. It called before it a number of distinguished witnesses, one of whom, Mr. Robert Giffen, an official of the Board of Trade, on the 7th of October, 1885, testified, among other things, as follows:

There has been a very rapid increase of consumption of cotton in the United States. It rises from 382,000,000 pounds in 1866-'70 to about 881,000,000 pounds in 1884. That is a very great increase in the consumption of raw material in the country which produced the raw material.

He testified that the consumption in the United States down to 1884 showed an increase of about 130 per cent., and that it was accounted for "by their using up their own raw material." He also testified that at the same time the continent of Europe showed an increase of about 100 per cent. During those periods the consumption of the raw material in England increased only 53 per cent.

Our Democratic friends, it seems, would take the duty off of cotton cloths, after a while and stop all this consumption by home manufacturers. They seem to think it would be wiser to send all of our cotton to England, and buy it back from England manufactured at prices fixed there without restriction. The Republican theory is that we manufacture all our raw material in this country if we can, furnishing employment to our people, investment for our capital, and a market for our agricultural products, shipping our surplus to England and other countries.

I could spend profitably some time in quoting from the testimony of prominent Englishmen, including officials, facts pertinent and important, by way of vindicating the American principle of protection to home markets, but it is apart from my present purpose, and would take too much time. My main object is to lay before the people in form convenient for circulation and reference testimony which can not be disputed, showing that the condition of trade and industry and agricult-

ure in free-trade England is now, and has been for years, what we hope never to see in this country.

The commission addressed a circular of inquiry to the various chambers of commerce in the United Kingdom. These chambers of commerce are important institutions, in a commercial way, in England and other portions of the kingdom. Their methods of investigation, the regularity of their meetings, the reports of their committees, the representation in them of every department of business, and the reports which they make to the Government, all combine to render them competent witnesses as to matters within their jurisdiction. These were each interrogated as to the trades or industries of especial importance to its district.

They were also asked, among other things, how the trade and industry of the district had been affected during the last five years, as compared with the periods 1865 to 1870, 1870 to 1875, 1875 to 1880—when the depression began—when it reached its lowest point, and what were its most common symptoms. They were also specifically interrogated as to the fact of overproduction and the effect of foreign competition, foreign tariffs, and bounties; and they were asked to suggest remedies.

I intend to quote freely from the answers of these chambers of commerce, commencing with—

Aberdeen and surrounding district. Industries: Spinning, the manufacturing of wool, flax, hemp, and jute, the spinning of cotton, the manufacturing of paper, combs, soap and candles, provision curing, granite stone dressing and polishing, ship-building and ship-owning, engineering, fisheries, agriculture, and the industries dependent upon agriculture.

They say—

Most trades and industries at present are depressed, especially shipping, ship-building, and agriculture.

The progress of the depression in most industries may in general be said to have been uniform. No signs of improvement are apparent. Assuming that the depression of trade means reduction of profits, it began about the year 1881. It has now reached a lower point than for many years, with at present a downward tendency. Industries are seriously affected by foreign competition, and to a large extent by foreign tariffs and bounties.

The condition is largely attributed to overproduction.

Barnsley and district. Industries: Coal trade, linen trade, glass-bottle trade, and paper trade:

Paper trade and glass-bottle trade very depressed. Uniform downward depression since 1876.

They say foreign tariffs and bounties

Are at the bottom of all our troubles.

Batley. Industries: Manufacture of heavy woolens, worsted coatings, and blankets; also, to a less extent, coal and iron trade:

All branches may be fairly described as depressed. Depression having begun in 1874, and now at its lowest point. Its most prominent symptoms are low prices of raw material and manufactured goods, which, after a long-continued fall, are probably lower now than ever they were before. Real property, and especially mills and machinery, being unsalable, except at a great sacrifice. Its progress has continued for many years, trade having gone from bad to worse. Production has exceeded demand, and with a falling off in foreign trade there seems to be no prospect of immediate improvement.

Very injuriously and very considerably affected by foreign tariffs.

Belfast. Industries: Linens, iron foundry and machine making, ship building, flour milling.

Principal foreign trade with United States, British possessions, West Indies, and South America, and continental Europe.

The linen trade is depressed, in the sense that it fails to give an adequate return on the capital invested. The depression, which commenced about ten years ago, has been marked by a fall in prices during the first years, and by a continuance of low prices and sluggish demands in subsequent years. The present rate of wages is slightly below the average of the last twenty years. The condition of the linen trade has been adversely affected by the changes in the hours of labor, fall in prices, foreign competition, and foreign tariffs.

Iron foundry and machine making:

Speaking generally, depression began in 1868, continued to end of 1870; trade improved from then to 1875; reached its lowest point in 1879 and 1880; since then it has been languid owing to want of demand.

It is attributed in part to "severe competition," and trade is said to have been severely injured by foreign tariffs.

Flour milling:

Most unfavorably affected, owing to the large importation of foreign manufactured flour.

Trade has been generally depressed during the last ten years.

Birmingham. Industries: The iron metal, hardware, jewelry, guns, leather, glass, and coal trade:

The trade and industry of the district have been much depressed during the years 1880 to 1885, and before, but the extent of such depression, the loss of profits, the diminution of capital, and decreased demand for labor, can only be guessed at, the necessary factors for making any accurate or reliable estimate not being available. Every trade, special and ordinary, can only be described as depressed. This depression began in 1876-'77; lowest period during the present year; depression on the whole uniform in duration and intensity, with occasional short periods of activity in special trades, arising from recent government reforms and other exceptional causes.

It is attributed—

to German and Belgian competition, foreign labor, duties on many manufactured goods exported abroad, the exorbitant cost of carriage of goods from Birmingham to the seaboard, which has placed inland districts at a great disadvantage, compared with maritime towns. They recommend as a remedy, in addition to legislation regulating railways and railway rates, and emancipating the canals from the control of railway companies, "the imposition of an import duty on foreign manufactured goods in all cases where the same class of goods are manufactured in this country."

Thus it will be seen that Birmingham, everywhere famous, complains of the competition of the world, and recommends as a remedy for its depressed trades the imposition of tariff duties and the protection of home industries.

Other grounds to which they impute the depression are the better technical education of the foreign workman and the great agricultural depression, caused by a long series of bad seasons, and foreign competition, resulting in diminished purchasing power.

Birstall, near Leeds. Industries: The manufacture of heavy woolen cloth, worsted coatings, and blankets; also, other industries subordinate thereto.

Generally, they say, the industries in—

1882 were, and are now, as depressed as at any time; excessive depreciation in the value of mill property, serious diminution of profit on the capital invested, want of employment for a considerable number of machines and work people, and serious accumulation of stocks in the hands of manufacturers. Since 1882 the depression has increased gradually, and we are not able to anticipate its further course.

They report that their industries have been materially affected by foreign competition in home markets, and very seriously by the imposition of hostile duties, which "helped to exclude our manufactured goods from foreign markets."

Mr. HOAR. May I ask the Senator a question?

Mr. SPOONER. Yes, sir.

Mr. HOAR. Does the Senator find in his researches that there is any suggestion that that foreign competition which England says is so injurious to her comes from any countries that are not themselves protected?

Mr. SPOONER. None except perhaps Belgium, which has protection after a fashion, but is in a sense a free-trade country. This is all from British witnesses, chambers of commerce; nothing that I assert; no inference that I draw from testimony taken.

Dewsbury. Industries: Manufacturers of heavy woolen cloths, blankets, and carpets, and their kindred industries, including a large sale of rags and shoddy.

As to carpets:

It is the opinion of a large majority of persons engaged in trade that industry is depressed, and that the future is gloomy and discouraging.

The depression began in 1878, and its most prominent symptoms are work people out of employment, machinery standing idle, and depreciation in value of factory and other property.

Attributable to overproduction and foreign tariffs.

Mr. TELLER. I should like to inquire of the Senator if he is reading now exactly the report?

Mr. SPOONER. I am reading exactly the report.

Mr. TELLER. It is a quotation?

Mr. SPOONER. It is a quotation. I am quoting from the various reports.

Dudley. Industries: Coal and iron industries and fire-clay and glass manufacture.

From 1880 to 1885 depressed.

Local trades are generally depressed.

From about 1878—

the depression has been continuous. We can give no answer as to the immediate future. The district is suffering considerably from the inequality of railway rates and the monopoly caused by the absorption of local canals by railway companies.

Among the remedies they recommend is modification of foreign tariffs. They say foreign competition severely felt in some branches of manufactures.

Trade is greatly restricted and diminished by adverse foreign tariffs.

Dundee. Industries: Spinning and manufacturing of jute; the same of flax and hemp, machine and engine building for home and export requirements; also ship-building, steam and sailing, and ship-owning, and the carrying on of seal and whale fishing at Greenland, Newfoundland, and Davis Straits:

The volume of the flax industry has steadily decreased since 1876. The volume of the jute trade since 1865 increased largely to 1884, but has diminished suddenly within the last twelve months, say 12 to 15 per cent. During the last few years the gross value has continued to decrease largely in proportion to the volume; during the last twelve months a further reduction from a very low standard of value has taken place, averaging about 25 per cent. The net profit has been gradually getting less within the last few years, and at present mills and factories are running at a considerable loss. The capital invested is as large as ever, but as the industries have become unprofitable nothing approaching to the invested capital could be realized. This refers not only to the industry of jute and flax, but also to all the industries mentioned above. The quantity of labor has not been seriously affected, but the remuneration has been reduced.

They attribute it to the foreign duties and the increase in the erection of mills and factories in Germany, Austria, Spain, Italy, and Russia since 1880, for the purpose of manufacturing similar yarns and goods as are produced in that district.

The rate of wages is at present lower than it has been for the last ten or twelve years, and also slightly lower than the average of the past twenty years. This is general, but it applies to both skilled and unskilled labor.

How many of our laboring men will want to go to Dundee and live under free trade after reading this?

Exeter. Industries: Iron-foundry trade, mineral-oil trade, and tanning trade; principally, however, the paper trade:

From 1875 to 1880 the trade dropped to its lowest level, at which it now remains, the volume showing a slight increase, but gross value and net profit remaining at the lowest point. The general trade of the district has been materi-

ally affected by the agricultural depression we have for some years been suffering from, as both landlords and tenants have not had money to spend. The depression has since 1875 been uniform; no profit whatever is now got from a great portion of the trade. There are thirteen paper mills now left as against fifteen in 1870, but in the last fifteen years there have been fourteen failures among those fifteen mills, some having failed more than once.

How delightful it would be to the paper manufacturers of the United States, and those who depend upon them for wages and employment, to be put on the Exeter basis!

This continued depression is imputed to the factory act, and to fall in prices due to foreign competition.

Greenock. Industries: Sugar-refining, ship-building and marine engineering and ship owning.

In sugar-refining depression is reported. They say:

The refiners have not only had to contend with the losses arising from the diminishing value of sugar, but they have also had to meet the competition of foreign refiners, who, through the assistance of export bounties, are enabled to pay the cost of sending their refined sugars to this country, and at the same time to undersell the British refiners in their own home market.

As to ship-building:

The gross value has decreased largely; contracts have been lately taken at such extreme low prices in order to keep works open as to yield practically no profit. The number of workmen at present and for the last two years employed in this trade and subsidiary trades has largely decreased. It is reckoned that during the last period of depression, which culminated in 1879, the workmen then employed did not exceed 60 per cent. of the number employed in 1874. In 1882-'83 the gross number employed did not rise to the amount of 1874, but in 1885 the number is fewer than in 1879, the total being estimated at not more than 57½ per cent. of the number employed in 1874.

As to ship-owning:

Profits have been diminishing, especially since 1882, until now they are almost *nil*, and if shipping property were to be realized heavy losses would be sustained. Fewer men are employed than formerly.

As to sugar refining:

The depression began about 1875. It is worse now than ever. A prominent symptom is that from time to time works are shut up, and never for years have all the refineries in Greenock been working at the same time.

As to ship-building:

The depression began about two years ago. Most prominent symptoms are want of work by both employers and workmen; many workmen idle, etc.

The remedy recommended as to sugar refining is—

That the artificial help our foreign competitors get from export bounties should be withdrawn. This could be done either by the imposition of countervailing duties, which we do not desire to be resorted to, or by our government using strong diplomatic action to persuade the foreign governments to adopt free trade. A perfect cure for our grievance would be the abolition of sugar duties all over the world!

They complain, and this is significant, that their ship-building industry is depressed—

Because since 1882 the continental orders have ceased; the ship-owners of Germany, France, Italy, and of the countries which were the principal customers of Greenock builders have now ceased to order vessels in Great Britain to the same extent as formerly, and for the following reasons:

First. Because under the conditions of the subventions granted under color of mail service and under direct bounty inducements it is more profitable or obligatory to have the vessels constructed in their own countries.

Second. Because under the above conditions, and in France especially, under the stimulus of direct bounties given to the ship-builders, a large number of powerful ship-building yards have sprung into existence on the continent, capable of furnishing all the tonnage required.

This is worth a second thought in connection with the policy of the Democratic party of refusing any assistance or encouragement to American steam-ship lines.

Hartlepools. Industries: Ship-building, engine-building, timber, saw-mills, iron manufacturing, timber and grain exports, ship-owning, cement manufacturing, wood-pulp making, coal and glass exports:

All the industries in this district are depressed at present. The present depression began in 1883, and is now at the lowest point. No sign of any improvement.

They impute this to foreign competition and foreign tariffs.

Heckmondwike. Industries: Blanket and carpet manufacturing, principally; also, rags and cloths:

In 1874 and 1875 it gradually grew worse. The depression continued until 1880, when there occurred an American boom which temporarily lifted prices and induced activity; 1880 to 1885 progressively bad and unprofitable years. Prices continuously drooping.

The carpet trade of this district, which is distinct from that of Halifax and Kidderminster, is very depressed from the following causes: First—

The important market of Canada has been taken away from us by the encouragement given to manufacturers in that country by the excessive duty levied on our goods.

If Canada had been as near to the mother country as poor Ireland, her industries would have been stifled generations since, and Heckmondwike would not have had this cause of complaint. They say that they anticipate an improvement for the reason, among others, that there is a great improvement in the United States, and it is sure to react on their markets. They complain of foreign tariffs and foreign competition, including colonial competition. They say:

Indeed, these foreign and colonial manufacturers are often Englishmen who see their way to make money abroad more than at home.

This circular was also addressed to the Huddersfield Chamber of Commerce. Huddersfield comprises thirty-four townships, an area of 68,884 acres, and a population in 1881 of 156,504 people. Its industries are woolen and worsted manufactures, dyeing and finishing, cotton spinning, woolen and Angora yarn spinning, chemical manufactures, and machine making.

The Huddersfield yarn spinners under date of September 29, 1885, addressed a letter to the chamber of commerce in which they say:

We, the undersigned yarn spinners, beg to impress upon your notice the serious depression which has now existed for so long a period in the yarn-spinning trade of this district. As there is now a commission appointed to inquire into such depression, we ask you in returning answers for this center not to overlook or ignore the serious depression and decline this industry has fallen into, and more especially as this decline has taken place in the face of an ever-increasing importation of foreign yarns.

Another communication upon the same subject, dated October 7, 1885, contains the following sad statement of depression and ruin, notwithstanding the operation of the blessed free-trade principle, "Buy where you can buy the cheapest and sell where you can sell the dearest:"

As a proof of the deplorable state this trade has been in for the past fourteen or fifteen years we most respectfully beg to inform you that we hold a list of over fifty firms of spinners who have been ruined and brought into the bankruptcy court during that period. This list can be produced for your perusal, if required. The sole cause we think of the unprofitableness in the yarn trade is brought about by the large imports of foreign yarns which is monthly increasing, and gradually beating down the home spinner in our market, while we are debarred by high tariffs from exporting coarse yarns, which our machines are eminently adapted for producing cheaply. The foreign spinner comes here in times of depression and realizes his yarn at under cost of production to the great loss and embarrassment of the home spinner.

They say:

The productions of other countries, and even of our own colonies, have much to do with the present depression.

The answers of the committee of the East India and China trade section of the incorporated Chamber of Commerce of Liverpool, after referring to the effect of the demonetization of silver as the cause of the depression of trade in Europe and America, say:

Low prices have led to overproduction and efforts to make small profits on a large turn over, and the result has been loss. By all means let us have free trade, but bounties should be met by countervailing duties, and hostile tariffs on English goods should not be countenanced in commercial treaties.

They want free trade, if they can get it, thus to break down the manufacturers in other countries and control the markets of the world; but if they can not have free trade they want protection. Certainly. We do not intend they shall have free trade so far as the United States is concerned, if the Republican party can prevent it.

Lancashire. Sugar refiners' association report sugar-refining industry depressed:

For twenty years it has suffered from foreign bounties. The manufacture of loaf sugar has been extinguished for at least ten years, and that of moist sugar is suffering most acutely at the present time. Refining trade suffers from a large importation of bounty-fed refined sugar. This condition might be met by diplomatic action; failing this, by countervailing duties.

By this is probably meant "diplomatic action" similar to the attempt to force free trade in fish on the United States by the outrageous and abusive treatment of our fishing vessels and fishermen at sea by the Canadian authorities.

Liverpool. The seed-crushing trade:

There had been long-continued depression until July and August last, when, owing to prospective short supplies of seed from Russia, our markets became more active.

They attribute depression to overproduction in part.

The want of demand on the one hand, induced from the farmer's poverty, and, on the other hand, foreign competition. From all parts of the world we now receive cattle-feeding cakes at the mill, and we are unable, owing to foreign tariffs, to obtain any advantage by selling our oil in the markets of our competitors.

Now, I ask attention to what follows here from Liverpool as to the watchmaking trade. There is hardly a man in the Senate who does not remember the time when Liverpool watches were regarded as among the best and filled this country. My friend from Maine [Mr. FRYE] carries one now.

Liverpool. Watch manufactures: T. R. Russell, a representative watch manufacturer of Liverpool, makes this statement as to the manufacture of watches. It is pathetic, and I give it with fullness. He says:

Watch manufacturing was formerly of special importance; it is now of little importance in Liverpool. Thirty years ago the amount of capital invested was probably two hundred thousand to three hundred thousand pounds. Probably eighteen hundred operatives were employed in the various branches. At present I do not think there are two hundred, mostly old men, and none or few apprentices being taken.

The bulk of the operatives before dying suffered greatly, became casual dock laborers, and entirely sunk in the social scale. The production has of course fallen in proportion to the diminished labor and capital employed, both being about one-tenth of what it was thirty years ago. Thirty years ago four-fifths of the large number of watches made in Liverpool were exported to the United States. This trade has been entirely killed by the increased American tariff. In fact it may be said that whatever an English watch can be sold abroad for, it is thus excluded or crippled while the home market is flooded with American and Swiss surplus stock.

This is the condition of the watch-manufacturing industry of Liverpool because of the encouragement given in America by the protective system to the watch-manufacturing industry here, and to-day we make as cheap watches as can be found in the world, and the market of England is supplied with them as well as the markets in other countries.

We have now fifty or sixty watch factories giving steady and remunerative employment to many thousands of skilled workmen and others, and there are no better watches in the world.

In Geneva, Switzerland, last summer I asked the hotel proprietor to point out to me the portion of the city where I could look at watches,

and, approaching it, the first sign I saw was one high up, in a language I could understand, bearing these familiar words, "Waltham watches;" and the Waltham watches were especially advertised in Paris as of great utility.

Mr. Russell continues—this is not American testimony; it is no Republican speech upon the effects of free trade:

I believe the watch trade, not in Liverpool only, but in Coventry and in London, is more depressed now than at any period within the past thirty years, or so far as I have learned it by tradition from father and grandfather during their time. In fact it is a dying industry. The depression began when the United States seriously raised their tariff, and is at the lowest point now if it does not go any lower. The wages have been pretty well wiped out, because the great bulk of the operatives have been wiped out of the trade.

By all means let us adopt the Democratic policy and build up the watch trade of Liverpool, Coventry, and London and destroy our own!

Luton (comprising parts of Bedfordshire, Hertfordshire, Buckinghamshire, and a part of Essex). Industries: Straw-plaiting and manufacturing of straw-plaits into hats and bonnets. Two-thirds home trade, one-third foreign. Straw plaits to Germany, America, and France. "Decrease in regard to the making of straw-plaits, an increase in regard to the importation of foreign plaits." Depression is confined to straw-plaiting. From 1871 to the present date, prices not remunerative. They say:

In negotiating foreign tariffs insist upon the duties being considerably modified, and, if possible, annulled and removed in relation to our local industry.

Certainly. Why not?

Macclesfield. The silk industry, including the sewing and spinning of waste and raw silk and power-loom weaving; also the manufacture of union tablets, such as cotton and silk, and spun and pure silk, and the dyeing of silk:

Thrown silk has in past years been largely exported to America and the continent of Europe, but its reduced production to-day indicates corresponding limited demand both at home and in Europe.

In a note they say:

The exportation as regards America has almost entirely ceased in consequence of the duty of 35 per cent.; annually less.

As regards manufactured goods, large orders were formerly executed for America. France subsequently became a moderate customer. To-day the exportations to America are all but *nil*, while perhaps 20 per cent. of our productions are sent abroad.

In the last five years trade and industry has shown unmistakable signs of prostration and decay. There have been fitful and brief periods of revival both in volume, gross value, net profit, and quantity of labor employed. The decrease of production is apparent.

Prior to 1860 the trade of Macclesfield was in a fairly flourishing condition—fifty-five mills, with an approximate of 14,000 hands. From that day to 1870 there was great depression. The fifty-five mills were reduced to thirty-two, and the hands employed were reduced from 14,000 to 5,000. There was a general depreciation of property, and over two thousand houses being vacant within the borough. During the Franco-German war, when all the continental forces were mobilized, we enjoyed a uniform prosperity—1870 to 1876—but since the latter date the silk industry has gradually languished, and at the present time there are over thirty mills closed entirely.

What an unmixed and uniform blessing free-trade is to England! They impute their loss to foreign tariffs.

Manchester. Industries: Coal, copper, iron, machinery, coal, and chemicals.

Eighteen hundred and sixty-five to 1869 so unsatisfactory that the Manchester Chamber of Commerce reported at the close of 1869—

The extreme depression of trade has resulted in an extent of disasters almost without parallel within the history of our commerce. In this year alone upwards of eighty spinners and manufacturers in this district failed, while those whose wealth enabled them to avoid ruin were left with crippled means and greatly depreciated property. Such property fell to a third and in some cases to a fourth of its former value, and was even at times unsalable. Many mill owners in apparently affluent circumstances were driven to seek for subsistence in subordinate situations, and even in emigration. Destitution caused an enormous advance in the poor rates, and in order to avoid liability to taxation in unworked factories the machinery of many was cleared out, and even sold for old metal.

1870 to 1874: The first two years were prosperous ones. (The Franco-German war.) The three following more or less unsatisfactory. 1875 to 1879: The whole period was unsatisfactory. Many very important failures in financial and other commercial circles occurred in 1875 and 1878. 1880 to 1884: The first two years were, generally speaking, fairly profitable ones, but the last three have witnessed steadily extending depression.

What a wonderful, never-ending blessing, certain of beneficent results, is free trade!

In Great Britain in 1883 there were 42,000,000 cotton-using spindles; on the Continent, 22,500,000; in the United States, 12,660,000; in the East Indies 1,700,000. We want to use our vast cotton product in our own country, and multiply our spindles to 42,000,000, and reduce Great Britain's number to 12,660,000. It will not be done by the application of the principle of the Confederate constitution to our economic system.

Let me give here the characteristics of the cotton trade as to profit as given by Messrs. Ellisons' circulars, and they are authority and are reported by the Royal Commission:

1865. Gloomy, but more encouraging at close.
1866. Most disastrous.
1867. Most unsatisfactory.
1868. Not so unsatisfactory as 1867.
1869. Unprofitable.
1870. Good.
1871. Unexampled prosperity (Franco-Prussian war).
1872. Unprofitable.
1873. Not satisfactory.
1874. Dull.
1875. The year closed unregretted.
1876. Less unsatisfactory than 1875.
1877. Not a single redeeming feature.
1878. Unparalleled depression.
1879. The depression culminated. Revival in October.
1880. Improving.
1881. Fairly remunerative.
1882. Diminished profits.
1883. Very far from satisfactory.
1884. Very unsatisfactory.

A beautiful record for nineteen years of free trade in the English cotton trade!

George Lord, director of the Manchester Chamber of Commerce, says, by way of recommending a remedy:

Government might, however, exert its influence, so far as practicable, in endeavoring to produce modification of the tariffs of foreign countries, and even of some of our own colonies, which are now so onerous as to restrict, and in some cases prohibit, the import of the manufactures of this country.

The mother country ought to direct the combined influence and educational power of the Cobden Club to bringing some of her recalcitrant colonies to appreciate the beauty of free trade before revolutionizing the economic policy of the United States.

Morley. Industries: Woolen and linen trades:

All branches of trade in this district have never been for twenty years past so depressed as at present. Depression began in the year 1877. Lowest point is the present period. Symptoms: Heavy stock, small profits, and severe competition. Attributed to increase of foreign hostile tariffs, especially in respect to France, Germany, Austria, and America.

They recommend legislation securing more favorable treaties with foreign nations, and they say:

The protective and hostile tariffs of other countries, and especially of our own colonies, have much to do with the present depression, as their effect is most severely felt in this district.

Salt. Chamber of Commerce: Manufacture of salt and rock-salt mining:

The salt trade is very much depressed.

In 1884 they exported 233,170 tons to the United States.

The depression began three years ago, and is now at its worst, causing want of employment for the men, one-third of the works being permanently idle for want of trade; houses unoccupied; and still there is every possibility of further depression.

They impute it to competition on the part of foreign countries.

Salt being imported to England from our own colonies.

And the remedy which they suggest is the reduction of duties in foreign countries; to wit, the United States, etc.

Very many such reports might be quoted.

Similar questions were also addressed to various commercial associations, and the answers, if I might take the time to read them, would be exceedingly instructive and interesting. With few exceptions they complain of foreign tariffs and foreign competition, many including tariff and competition by their English colonies, and in some cases recommend as a remedy countervailing duties.

The Tin-Plate Manufacturers' Association made a report admitting great depression, in which they attribute the principal cause to overproduction. There is one item in their report which is worthy of special note. It is this:

This price being below the cost of production, a combination was formed to reduce production by stopping one week in every month, to the end of the year. This combination has been in operation for three months, and has greatly improved the market.

Is this a trust? It is certainly "a combination to put up prices," and it certainly was not caused by protection in England.

Circulars were addressed to the different guilds and trade societies and unions in the United Kingdom, representing workmen in every department of skilled labor, and their replies generally show long-continued depression, and in them there is much of despondency and hopelessness.

The reports and testimony obtained by this commission constitute a mine of great wealth in the way of information bearing upon the effect of free trade, and one finds in them almost limitless vindication of the efficiency and utility of the American system.

I will later in my remarks give the summing up of all the testimony upon the subject by the commission in its report, but before that I desire to show that, depressed during so many years as the industries have been, agriculture has fared infinitely worse than any other department of labor. I fancy the English farmer would thank God with all his heart if he could have a few years of American protection and of the prosperity which that system has for so many years brought to the American farmer.

Sir James Caird, the senior land commissioner for England, and a great authority, testified to the continual depression and ruin among the agricultural classes of England. After giving the result as to the different countries, he was asked:

Have you made any generalization of the result?

Answer. Yes, I have. The present as compared with ten years ago as deduced by me from these figures, which I have already given, would show on an average that the landlords have lost 30 per cent., the tenants 60 per cent., and the laborers 10 per cent., and putting that into figures, it brings out that on £65,000,000 of rental for the United Kingdom the landlords' loss of 30 per cent. would be equal to about £20,000,000, and the tenants' 60 per cent., inasmuch as their income may be taken at half the rental, would be just the same; that is to say, 60 per cent. on half the rental is also £20,000,000. With regard to the laborers there was a difficulty in estimating the amount of reduction, but I will place before your lordships the way in which I endeavored to arrive at it.

Without taking time to give his method, he estimates the reduction upon labor to be 10 per cent. of £28,000,000, which would be £2,800,000, and the total loss to the landed interest in spendable income for the last year, which was the year 1885, he figures at £42,800,000, or $214,000,000 in one year, one million more of annual loss to those engaged in agriculture than all the sums collected last year by the Treasury from customs duties. I wish every American farmer could read his testimony. How much of such "blessing" does the American farmer want? For ten preceding years the annual loss in agriculture had been as great, and in one or two years greater than in the year to which I have called attention.

Another item to which I desire for one moment to call attention is, that the number of applications for patents in Great Britain for 1854 was 2,764; the number of patents granted 1,878; the average for five years down to 1859 was, applications 3,054, granted 2,020; the average for five years to 1864, applications 3,306, granted 2,084; for five years down to 1869, applications 3,668, granted 2,298; the average for five years down to 1874, applications 3,938, granted 2,693; for five years down to 1879, applications 5,052, granted 3,379; the average for five years down to 1884, 8,122; the number granted is not given. This is absolutely trifling compared with the applications made and granted in the United States during the same years.

Who will deny, in the face of these figures, the proposition that the "protective system," encouraging the investment of capital, stimulating home competition, has encouraged invention and made us to lead the world in patentable ideas and improvements?

I turn to the final report of the commission, where, with a strong bias of course toward England, and a desire not to injure national credit or to cripple the successful operation of free trade, the entire testimony and investigation of the commission is thus summed up.

Mr. HOAR. Will the Senator allow me to make an observation there?

Mr. SPOONER. Certainly.

Mr. HOAR. I understand that the result of that comparison looking into English patents is made even more impressive by the fact that according to English law they give a patent to everybody who asks for it, while under our law the application for a patent is carefully examined to see whether it infringes on one already granted.

Mr. SPOONER. That intensifies the value of the contrast, and I thank the Senator from Massachusetts for the suggestion.

Now here is the final report. I desire it to be remembered that it is a report of a commission of Englishmen, some of them noblemen, all of them prominent men, most of them members of the House of Commons and of the House of Lords, and their report is exceedingly significant:

With very few exceptions trade is reported to be depressed, and in many cases it is considered to be more depressed than at any previous period. The number of workmen out of employment at the time when the answers were drawn up showed considerable variation according to the districts and trades to which they belonged, but there appears to have been a greater want of employment among the unskilled than among the skilled workmen. The rate of wages for time work appears on the whole to be slightly higher than the average of the last twenty years, but it is not now at its highest point. The rate for piece-work has diminished for nearly all cases. A reduction is reported in hours of work of from three to four hours a week during the last fifteen years. Both the quantity and the quality of the work produced have largely increased. Summarizing very briefly the answers which we received to our questions, and the oral evidence given before us, there would appear to be a general agreement among those whom we consulted.

A. That the trade and industry of the country are in a condition which may be fairly described as depressed.

B. That by this depression is meant a diminution and in some cases an absence of profit, with a corresponding diminution of employment for the laboring classes.

C. That neither the volume of trade nor the amount of capital invested therein has materially fallen off, though the latter has in many cases diminished in value.

D. That the depression above referred to dates from about the year 1875, and that with the exception of a short period of prosperity enjoyed by certain branches of trade in the years 1880 to 1883, it has proceeded with tolerable uniformity and has affected the trade and industry of the country generally, but more especially those branches which are connected with agriculture.

These unimpeachable witnesses establish the existence of a condition which we do not wish to have duplicated in the United States.

My friend from Colorado [Mr. TELLER], who has had access to a later report than this, has brought to my attention this fact, that in the last year a single association of skilled workmen in Great Britain, the Organized Association of Engineers, paid out of their treasury, contributed out of their earnings, $400,000 to keep from want the members of the association who were out of employment and who were compelled to rely upon such assistance to maintain themselves and their families. He also calls my attention to the fact that in that year the poor-rate of England paid by parliamentary grant amounted to $92,220,510, while all the money paid by Great Britain for educational purposes—and I wish I had time to read the items—amounted to only $27,224,910, and there never has been a time when there was a larger number of men out of employment, of both skilled and unskilled laborers, than today in free-trade Great Britain.

The report continues:

As regards the causes which have contributed to bring about this state of things, there was, as might be expected, less unanimity of opinion, but the following enumeration will, we think, include all those to which any importance was attached:

First. Overproduction.

How is this? We have heard it claimed for a great many years that overproduction was due to the artificial stimulus given by protection. This contention ought to be forever silenced by this finding of the royal commission.

Second. The continuous fall of prices caused by the depreciation of the standard value.

Third. The effect of foreign tariffs and bounties and the restrictive commercial policies of foreign countries in limiting our markets.

No wonder Great Britain desires above all other things, save the extinction of the spirit of liberty in Ireland, that the industries of the United States and other countries may be broken down that she may supply the world with manufactures.

Fourth. Foreign competition, which we are beginning to feel both in our own and neutral markets.

"The tariff is a tax!"

Fifth. An increase in local taxation and the burdens of industry generally.

"Buy where you can buy the cheapest; sell where you can sell the dearest."

This sweet-sounding formula of free trade has not diminished local taxation or lifted the burdens from industry generally in free-trade England apparently.

Sixth. Cheaper rates of carriage enjoyed by our foreign competitors.

It has been claimed that because of the tariff on iron and steel our rates of carriage were too high, and therefore we should let in at lower rates of duty the iron and steel products of other lands. England complains greatly of high rates of carriage and of discrimination, and concedes cheaper carriage to other countries, including the United States.

Seventh. Legislation affecting the employment of labor in industrial undertakings.

Eighth. Superior technical education of the workmen in foreign countries.

This last is quite significant! Is not this remarkable as one of the causes for the continued and terrible depression reported by this royal commission?

I can not follow the commission through its analysis, or attempted analysis, of causes. Time will not permit.

Dealing with the nature of the depression, after having established its existence, they say:

Those who may be said to represent the producer have mainly dwelt upon the restriction and even the absence of profit in their respective businesses. It is from this class, and more especially from the employers of labor, that the complaints chiefly proceed. On the other hand, those classes of the population who derive their income from foreign investments, or from property not directly connected with productive industries, appear to have little ground of complaint. On the contrary, they have profited by the remarkably low prices of many commodities.

This is always so. Wages may go down among the American workmen to meet the wages of other lands, the standard of living may be reduced, but the mortgages upon their homes, the moneys they owe to those of fixed income, and the rate of interest will not go down. The money-lenders will profit, and they alone, "by the remarkably low prices of many commodities," which are to follow the adoption of the Southern philosophy upon this subject. The report continues:

We may therefore sum up the chief features of the commercial situation as being:

A. A very serious falling off in the exchangeable value of the produce of the soil;

B. And increased production of nearly all other classes of commodities;

C. A tendency in the supply of commodities to outrun the demand;

D. A diminution in the profits obtainable by production; and

E. A similar diminution in the rate of interest on invested capital.

The diminution in the rate of profit obtainable, from production, whether agricultural or manufacturing, has given rise to a widespread feeling of depression among all the producing classes. Those, on the other hand, who are in receipt of fixed salaries, or who draw their incomes from fixed investments, have apparently little to complain of, and we think that so far as regards the purchasing power of wages a similar remark will apply to the laboring classes.

They find that there has been "systematic overproduction continued during a long period, and resulting, according to the unanimous testimony of the witnesses who appeared before us, in little or no profit to the producing classes."

What a mass of goods England must have accumulated through all these years of "systematic overproduction," which she holds ready to flood the American market with, at ruinous prices, the moment the principle of the Confederate constitution shall become the ruling principle in the United States!

Systematic overproduction for fifteen years in England in every department almost of effort, we do not want the benefit of!

They say:

We are disposed to think that one of the chief agencies which have tended to perpetuate this state of things is the protectionist policy of so many foreign countries, which has become more marked during the last ten years than at any previous period of similar length. The high prices which protection secures to the purchaser within its protected area naturally stimulates production and impels him to engage in competition in foreign markets. The surplus production which can not find a market at home is sent abroad, and in foreign markets undersells the commodities produced under less artificial conditions. The natural growth of the industries of foreign countries, possessing in many cases the population and other resources required for successful manufacturing enterprise, has also contributed to produce the same result.

I call attention also to what this commission say in this final report in regard to their home market:

We have, as above pointed out, suffered a serious loss in our purchasing power by reason of the deficient or unremunerative character of the produce of the soil. Sir James Caird estimates the loss in purchasing power of the classes engaged in or connected with agriculture at £42,800,000 during the year

1885, and the loss in several of the preceding years must no doubt have been equal to or even greater than this. This amount has been lost to the markets in which it was formerly spent, and can not fail to have had an important influence upon the demand for manufactured goods.

What a blessing is free trade to the English farmer!

Again:
